Vessels equipped with radiotelephone, when within Puponga Point, must maintain a listening watch on 2012 kHz for information relative to berthing, harbour traffic or other harbour conditions.

No regular watches are maintained.
ANCHORAGES: After crossing the bar it is not advisable to anchor until after rounding Puponga Point, if proceeding to Onehunga; or after rounding Kauri Point (situated about 15 miles S.E. of Puponga Point), if proceeding to the Southward.

Prohibited anchoring and fishing area: Within an area extending 2 miles from Destruction Gully front beacon in a 182° direction and having a width of 152 m. (500 ft.) on each side of the transit of Destruction Gully beacons.

Prohibited Anchorage: Within 91 m. (300 ft.) of a sewage submarine pipe-line laid in a 152° direction across Wairopa Channel about 1 mile Westward of Onehunga Wharf. On the Northern shore, 2 white triangular beacons, each bearing the word "Sewer" in black letters, mark the middle of the prohibited anchorage. The pipe-line lies approximately 3 m. (10 ft.) to the Eastward of the beacons when in transit.

Prohibited Anchoring and Fishing Area: Anchoring and fishing are prohibited within an area bounded by a line commencing at the South end of Renton Road (Lat. 37° 00.08′ S., Long. 174° 45.2′ E.); thence running 180° for 2,590 m.; thence 090° for 5,291 m.; thence 050° to the shore. The Northern boundary commences at Nganui Point (Lat. 37° 00′ S., Long. 174° 48.4′ E.); thence 090° to the opposite shore.

The above area, adjacent to Auckland International Airport, is marked by following lights and beacons, bearings and distances from Aero light (37° 00′ 48″ S., 174° 47′ 31″ E., approx.).
Light F. 058° 45′ – 1,936 m.
Beacon 259° 30′ – 3,185 m.
Beacon 220° 45′ – 2,848 m.
Beacon 183° 15′ – 1,890 m.
Beacon 143° – 2,317 m.
Light Beacon Qk. Fl. 239° – 3,642 m.
Light Beacon Fl. R.2 secs. 122° 45′ – 3,466 m.
Light Beacon Fl. R.2 secs. 112° 45′ – 3,261 m.
Light Beacon Fl. R.2 secs. 108° 30′ – 2,453 m.
RESTRICTIONS: Berthing and unberthing during the hours of darkness is not recommended.

	Controlling Depths Below Chart Datum	*Nature of Bottom*
Entrance to port (Southwest Channel)	5.48 m.	Sand.
Anchorages	5.486 m. – 7.62 m.	Mud, Shell, and sand.
Channel	3.048 m.	
Approaches to berth	3.048 m.	
Berth (Onehunga)	3.3 m. – 4.7 m.	

MAX. SIZE: LOA, 95 m. Beam, No limit. Draft 4.7 m.
HEALTH: See "Auckland".
RADIO: See "Auckland".
VHF: See "Pilotage".
RADAR: No radar.
TUGS: 1 twin screw *Manukau* is available. 52.5 tonnes gross, 400 b.h.p., static pull 3.5 tonnes. Tug is equipped with both medium and VHF Radiotelephone.
BERTHING: The principal wharf is situated at Onehunga and is a ferro-concrete structure 293 m. in length which includes a launch jetty of 17 m. at the Eastern end, and with a width of 49 m. A grid for the use of small craft has been constructed immediately North of the wharf. There are small jetties at Cornwallis and Grahams Beach.

The deck level of the wharf is 6.401 m. above chart datum.

The wharf is connected to the railway system and the distance from the outside face of the wharf to the centre of the railway track is 3.73 m.
CRANES: No quay-side cranes. Two 12.5 tonne capacity mobile cranes available. For heavier loads cranes available for hire from outside port.
BULK CARGO FACILITIES: Eastern end of quay is equipped with a pipe-line for the discharge of bulk cement to adjacent privately owned silos.
SPECIALISED CARGO HANDLING FACILITIES: No facilities.
BRIDGES: None.
STEVEDORES: Arranged by Agents. See "Auckland".
MEDICAL: See "Auckland".
TANKERS: No facilities.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Boiler fuel oil, diesel oil, and lubricating oil are available from tank wagons; delivery at the rate of 13,500 litres per hour through a 50 mm. hose. Coal is not kept in stock but can be obtained.
CONSULS: See "Auckland".
REPAIRS: Outside firms are available to do machine shop and foundry work.
DRY DOCKS: No facilities.
SURVEYORS: See "Auckland".
GANGWAY/DECK WATCHMEN: See "Auckland".
HATCHES: See "Auckland".
CUSTOMS ALLOWANCE: See "Auckland".
CARGO GEAR: See "Auckland".
REPATRIATION: Full facilities exist.
AIRPORT: 8 km. from port. Served by major international airlines.
TIME: See "Auckland".
HOLIDAYS: See "Auckland".
POLICE/AMBULANCE/FIRE: All emergency services are called through one telephone number. Dial 111 and state service required.
SERVICES: No special services.
SHORE LEAVE: Crew members may go ashore.
REGULATIONS: See "Auckland".
IDENTIFICATION CARDS: Not required.
DELAYS: Seldom any delays.
DEVELOPMENTS: None currently in progress.
AUTHORITY: Auckland Harbour Board.

OPUA: 35.19 S. 174.07 E. **(See Plan Book)**

PORT LIMITS: Commencing at Northern extremity of Cape Wiwiki, thence by a right line to the Eastern extremity of the Nine Pins, thence by a right line to the North Western extremity of Cape Brett.
DOCUMENTS: See "Whangarei".
PILOTAGE: Compulsory Southward of a line from the Western extremity of Kororareka Point following a true bearing of 253° towards the flagstaff at Waitangi Treaty House. Pilotage shall be optional within the waters contained Northward of the above mentioned line and Westward of a line commencing from the Eastern extremity of Tapeka following a 350° True bearing to the Eastern extremity of the Black Rocks, thence in 271° True direction to the mainland. Pilots are available all hours day and night subject to prior minimum notice of 24 hours being received during normal weekday working day. Second notice confirming or amending first to be sent 4 hours before expected arrival. The Pilot supplies Harbour By-laws. Pratique, Agriculture and Customs clearance is normally undertaken on arrival at berth. Pilot vessel under private contract – No VHF contact — Pilot from Whangarei.
ANCHORAGE: Renown Anchorage as per Bay of Islands Chart N.Z. 5122.
RESTRICTIONS: Veronica Channel dredged to 7 m. at Chart Datum. Maximum Draft is 8.53 m.
RADIO: See "Whangarei".
TUGS: Available by arrangement with Northland Harbour Board, Whangarei. At least 72 hours notice required.
BERTH: Total length 214 m., width 12.5 m., overseas berthage on Eastern side of wharf. Depth at berth is 9.45 m. at MLWS. Wharf is serviced by rail.
CARGO HANDLING: Ships own gear. 2 permanent gangs available subject to Stevedore requirements as per Whangarei.
MEDICAL: Hospital and Ambulance at Kawakawa, 8 miles from Opua. Port Doctor at Paihia, 5 miles away.
DENSITY: 1025.
FRESH WATER: Fresh water available – 200 tonnes in storage. 35 cents per 1,000 litres.

FUEL: By arrangement with Oil Companies via road transport.
CUSTOMS ALLOWANCE: See "Whangarei".
CONSULS: See "Whangarei".
REPATRIATION: See "Whangarei".
TIME: See "Whangarei".
HOLIDAYS: See "Whangarei".
POLICE/AMBULANCE/FIRE: See "Whangarei".
TELEPHONES: Telephones available.
SHORE LEAVE: See "Whangarei".
SURVEYORS: See "Whangarei".
AIRPORT: See "Whangarei".
REGULATIONS: See "Whangarei".
DELAYS: See "Whangarei".
AUTHORITY: Northland Harbour Board.

OTAGO, (includes Dunedin, Port Chalmers and Ravensbourne): 45.46 S. 170.43 E. **(See Plan Book)**

DOCUMENTS: See "Auckland".
PILOTAGE: Address "Herbour Master, Dunedin." Through coastal radio stations ZLW (Wellington) or ZLB (Awarua) giving ship's name, draft, and ETA. First message 72 hours out, revise 24 hours out: if from another New Zealand port (coastwise) similar message as soon as possible after leaving that port. Subsequent contact with port private radio station Taiaroa Heads on 2182 kc/s. or VHF Channel 16. Pilot boat is 55 ft., white launch, also fitted with same frequencies, which meets vessels as required but does not remain on station otherwise. Boarding position is with Taiaroa Head Lighthouse bearing 170° distant 2 miles; good anchorage with Taiaroa Head Lighthouse bearing 160° – 2 miles, depth 12 fathoms. Pilots can always board in this vicinity provided Master has ship under way at slow speed and obeys Pilot's instructions. Vessels arriving to work general cargo should endeavour to embark Pilot by 0500 hrs. in order to be alongside berth ready to take labour on board at normal commencing hour of 0700 hrs.
ANCHORAGES: With Taiaroa Heads Lighthouse bearing 160° distant 2 miles, good holding ground in all weathers, safe except in very strong Easterly gales which are extremely rare. If this position is already occupied by another vessel, there is ample room close Westward, Northwestward, and Northward. Depths 12 to 16 fathoms.
RESTRICTIONS: Tankers proceeding to or from the oil jetty at Dunedin make passage of the upper harbour in daylight hours only. Otherwise ships are not boarded between midnight and 0500 hrs. as no working time is gained by so doing, unless vessel requires HW for transit.
MAX. SIZE: For berthing at *Port Chalmers:* Max. draft 38 ft. at high water, 34 ft. at low tide. Channel is worked as required by circumstances; it is not restricted to slackwater. Max. size of ship 850 ft. length, larger vessels will be considered individually.

For berthing in the upper harbour at *Dunedin* or *Ravensbourne*, max. draft 26 ft. high water, 21 ft. zero tide; max. length 603 ft.
HEALTH: Master to radio to Port Health Officer (entry port in N.Z. only) 24 hours before ETA requesting free pratique or declaring adverse state of health. Agents will advise Port Health Officer and Health Department inspectors who will board vessel on arrival, alongside actual wharf if free pratique requested. N.Z. regulations will require sealing of domestic meat chambers and purchase of local meats for use coastwise.
RADIO: Through Awarua Radio ZLB or Wellington Radio ZLW.
RADAR/VHF: Port radio station at entrance Taiaroa Head (Harbour Radio) maintains 24-hour watch on R/T 2182 kc/s. and VHF Channel 16. Radar operated at station on request has range in excess of 20 miles to North and East.
TUGS: Tugs used in vicinity of wharves turning, berthing and unberthing, etc. Tug's lines used without charge.
BERTHING: Some restrictions for larger vessels berthing with flood tide at Beach St. Wharf Port Chalmers.
STEVEDORES: Labour for Saturday work must be ordered by 0830 hrs. Fridays, otherwise by 1430 hrs. for following day. Advise Agents of firm ETA in time to judge this. Evening shift work to 2300 hrs. can be arranged when labour available.
MEDICAL: Emergency medical services and full hospital services always available at short notice. Emergency advice by radio available. Top priority given arrangements for landing urgent cases for medical treatment.
TANKERS: Diameter of lines 8 in.; minor slop facilities only; one tanker discharge berth 700 ft. long, 28 ft. depth alongside at low water. Max. size ship 603 ft. long; draft for channel transit 26 ft.
DENSITY: Harbour density 1024 all states of tide.
FRESH WATER: Fresh water available all berths, approx. delivery rate 20 t.p.h.
FUEL: Bunkers available at oil berth; all grades up to 1,000 secs. Redwood.
DEVELOPMENTS: George St. Wharf Port Chalmers will have a second Portainer Gantry crane in operation in March, 1979.
GANGWAY/DECK WATCHMEN: Shore watchman not normally required except at entry to oil jetty, such watchman arranged for by oil company. Ships required to maintain own gangway surveillance.
OPENING/CLOSING HATCHES: Automatic hatch gear may be operated by ship's personnel. Manual hatches by shore labour only.
CERTIFICATES: Normal cargo gear and equipment certificates as required for British ports; also Fumigation (Rats) or Exemption Certificate.
CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required for British subjects. Alien identification cards to be retained on board in case of need.
CONSULS: Consular agencies France, Norway, Denmark, Sweden, Germany, Italy, Netherlands, Portugal.
REPAIRS: All types deck and engine repairs possible; good machine shops, etc.
DRY DOCKS: None.
REPATRIATION: Repatriation arrangements can be made.
AIRPORT: Dunedin is served by all internal main airlines with connections to overseas via Christchurch, Wellington and Auckland. Airport 35 minutes from Dunedin City by car.
TIME: N.Z. Standard Time throughout year is GMT plus 12 hours, except that Summer time now operates from last Sunday in October to first Sunday in March. (Add 1 hour).
HOLIDAYS: As for all N.Z. ports, i.e. January 1st and 2nd; Good Friday and Easter Monday; Anzac Day (April 25th); 1st Monday in June; Labour Day (Monday, nearest October 24th); Christmas Day and Boxing Day; Waterside Picnic day (Wednesday at end January). Where New Year and Christmas holidays coincide with Saturdays and/or Sundays, holidays are taken following Monday and/or Tuesday. General cargo not worked on these days nor on Sundays: tankers discharge 365 days: ships arrive and depart regardless of holidays. Container ships worked all days except Good Friday and Anzac Day.
POLICE/AMBULANCE/FIRE: Police 76012; Ambulance 77111; Fire Brigade 79111; Hospital 76740; Emergency (serious) dial 111 and ask for any service needed.
TELEPHONES: Slot telephones can be put on board with all local calls free, others by cash in slot.
GENERAL: No special moorings are required. Harbour, though tidal, is landlocked and there is no surge at any berth. Tide rise averages 6 ft. above datum (extremes 5 ft and 8 ft.).
SERVICES: Radar and gyro compass technicians available. Good shop and providore facilities. Compass adjuster usually available.
SHORE LEAVE: Crew members not restricted ashore.
REGULATIONS: No special local regulations, but all N.Z. ports have very strict rules for garbage collection and disposal, etc. and against oil spillage.
DELAYS: Ample berths normally available. Occasional delays for labour shortage or wet weather (rainfall average 30 in. per year). Small quantities bunkers available ex-tank wagons at any berth. Larger quantities obtainable by shifting to oil jetty outside cargo work hours or as otherwise convenient.
AUTHORITY: Otago Harbour Board.

PICTON: 41.17 S. 174.00 E. **(See Plan Book)**

PORT LIMITS: A straight line drawn in a 303° direction from Paparoa Point on Arapawa Island to the opposite shore of the mainland. A straight line drawn between East Head and West Head, Tory Channel Entrance.
DOCUMENTS: See "Auckland".
PILOTAGE: Pilotage is compulsory inside a straight line drawn in a 180° direction from Snake Point to the opposite shore, including all the waters of Tory Channel. Pilotage in the Outer Reaches of Queen Charlotte Sound and in Pelorus Sound is optional. Unless otherwise requested, Pilot will board vessels between Long Island and Motuara Island. By arrangement with the Harbour Master, Pilots will board vessels 7 cables East of Snake Point, where a Pilot is not required in the optional pilotage area. By arrangment with the Harbour Master, vessels may enter and leave via Tory Channel, subject to weather, when Pilot will board and leave 1 mile S.E. of West Head Light. Application for a Pilot must be made at least 4 hours before the estimated time of arrival. For vessels arriving at night or during the weekend, application should be made no later than 1530 hrs. on the last previous working day. Pilot boat 14.6 m. in length equipped with VHF radio Channel 16. Call sign "Picton Harbour".
ANCHORAGE: Except during strong N.W. winds, there is a good anchorage Northward of Mabel Island in 16 fathoms for vessels of all sizes.

Quarantine Anchorage. Within the navigable area to Westward of Mable Island enclosed between the foreshore and a line from Kaipupu Point 047° to the Western extremity of Mable Island, thence 349° to Wedge Point. Vessels not in quarantine can use this anchorage.
RESTRICTIONS: Controlling depth in approaches to anchorage is 13 m. MLWOS.
MAX. SIZE: Max. length 201 m. Draft, 11 m. aft, 8 m.–10 m. forward depending on length. Vessels of this size can berth at any state of the tide. Longer vessels may be accommodated by arrangement with the Harbour Master.
HEALTH: First entry at a New Zealand port pratique is granted after vessel berths provided she has a clean bill of health from her last port, otherwise vessel would anchor in the quarantine anchorage, where port Health Officer would board. Once clear at the first port in New Zealand no further pratique is required.
RADIO: Port is equipped with medium frequency and VHF, call sign "Picton Harbour Radio", calling frequency 2182 kc/s. Watch is maintained Monday to Friday, 0900 to 0933, 1140 to 1203, 1540 to 1603 hrs. daily and at other times by arrangement. In addition the following schedule is maintained for communication with the

road/rail ferries: 0103, 1140, 1640, 2020, 2050 hrs. Sundays only: 1603 hrs.

TUGS: None.

BERTHING: One overseas wharf 240 m. length with accommodation for two vessels. Depth at wharf up to 11.58 m.

2 road/rail ferry berths 152 m. long with modern terminal facilities for roll-on/roll-off traffic.

STEVEDORES: Agents will provide gangs and other facilities provided Master gives prior notice of his requirements.

MEDICAL: It is necessary for Master to give his Agent as much advance notice as possible. Two doctors reside in the port. Hospital at the port and the main hospital at Blenheim, 35 km. by road. Ambulance service available.

DENSITY: 1025.

FRESH WATER: Supplies available at 30 t.p.h. Cost 75 cents/1,000 gals.

FUEL: By tank wagon only.

GANGWAY/DECK WATCHMEN: Required by general harbour regulations and is generally carried out by ship's deck hands.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: See "Auckland".

CARGO GEAR: Marine Department control this and regulations are issued accordingly. These regulations are very similar to those in the United Kingdom.

IDENTIFICATION CARDS: Not required.

CONSULS: These are stationed at Wellington. (See "Wellington".)

REPAIRS: Small repairs undertaken by three companies.

REPATRIATION: Crew changes can be made.

AIRPORT: Woodbourne -22 miles by road from Picton, served by feeder services to Wellington – Christchurch. Local seaplane service from Picton Harbour.

TIME: GMT plus 12 hours, Daylight saving time, plus 1 hour, in force from October to March.

HOLIDAYS: New Year's Day, Anniversary Day, Good Friday, Easter Monday, Labour Day, Sovereign's Birthday, Christmas Day, Boxing Day, Anzac Day, Watersiders' Workers Picnic Day, New Zealand Day.

POLICE/AMBULANCE/FIRE: Police, tel. 439; Ambulance, through doctor or in case of emergency tel. 207; Fire, ring exchange operator.

TELEPHONE: Facilities exist to place telephones on board.

SHORE LEAVE: Allowed.

AUTHORITY: Marlborough Harbour Board.

TAURANGA (Mount Maunganui):

37.39 S. 176.11 E. **(See Plan Book)**

PORT LIMITS: An arc of a circle of 2 nautical miles radius running from the landward boundary of the foreshore on Matakana Island, and thence into the Bay of Plenty to a position intersection of a right line with North Rock Light, bearing 273°; thence to North Rock Light; thence in a 180° direction to the landward boundary of the foreshore, and having as its centre, trig. station A, Mount Maunganui, Block 6 Tauranga Survey District.

DOCUMENTS:

3 Crew Lists
3 Passenger Lists
1 Search List (on regulation form)
1 Bonded Store
1 Gift List
1 Inward Report Check List (C. Form 98)
1 Declaration by Master of Restricted Immigrants
1 M.O.T. Declaration of Safety Certificate
1 Maritime Declaration of Health
1 Cargo Manifest (for each Port of discharge)
1 De-Rat
1 Clearance, Last Port
1 Poisons on Board
1 Firearms on Board
1 Ship's Papers

PILOTAGE: Pilotage is compulsory for merchant vessels of over 100 tons net tonnage; Pilot boards vessel about 2 miles N.E. of North Rock light structure. If due to adverse weather conditions, the Pilot is unable to embark, the pilot launch may, in certain circumstances, lead the vessel into smoother waters and embark abreast No. 2 light buoy. All vessels inward bound must give 24 hours notice by radio of their expected time of arrival off the port limits. If bound from Auckland or near ports, vessels send their expected time of arrival immediately on departure from that port.

A second message confirming or amending the first is to be sent 4 hours before the ETA. Should, however, the vessel expect to arrive later than her 24-hour message, her 4-hour message shall be sent 4 hours before the ETA given in her original message.

All communications, which should be addressed to "Harbour Master, Tauranga", will be attended to at all hours of the day or night.

The pilot launch, which is 15 m. in length, is painted white and equipped with R/T 2182 kHz, 2162 kHz, and 2012 kHz, VHF Channels 16, 14, 12, 8 and 6, and radar.

Vessels awaiting to enter Port may find suitable anchorage in 12 fathoms, 2 miles N.E. of Mount Maunganui. The holding in sand and shell is good in all but extreme conditions.

ANCHORAGES: 3 sheltered anchorages are situated in the Western Channel of Tauranga Harbour, these include the Quarantine and Explosive Anchorage, and are available for vessels of 152 m, and a maximum draft of 6.86 m. (H.W.).

RESTRICTIONS: Vessels may enter, berth, unberth, or depart during hours of darkness in fine weather, Tankers are handled during daylight only except tankers in ballast and gas free which may sail at night. Vessels over 95 m. generally enter or depart on HW or LW slack.

MAX. SIZE: Max. length permissible is 225 m. (229 m. at Harbour Master's discretion), no restrictions on beam. Max. arrival and departure draft at high water is 10.7 m. and at low water 9.20 m.

HEALTH: Radio notification to be sent to "Port Health Tauranga", ragarding state of health of crew and ETA 24 hours before arrival.

Pratique is granted by Port Health Officer on arrival. Notification should be made by radio to Port Health in case of suspected disease or fever on board.

Pratique is automatic if vessel has been previously cleared at another New Zealand port. Radio pratique may be granted isn case of passenger vessels or such vessels as carry a doctor on board.

RADIO: Nearest coastal radio station to Port of Tauranga is "Auckland Radio" – call sign ZLD.

The Harbour Board Watch Office, call sign "Tauranga Harbour Radio", is fitted with VHF and R/T; a continuous listening watch is maintained on Channel 16 and 2182 kHz.

RADAR/VHF: Radar is fitted to the pilot launch and 1 tug. VHF is fitted to both tugs and pilot launch. Channels 16, 14, 12, 8 and 6 available.

TUGS: 2 tugs are available, each with a bollard pull of approximately 28 and 15 tons. They usually join inward vessels in the vicinity of the Harbour entrance. Tug's lines are normally used, for which there is no extra charge.

BERTHING: Berthing normally takes place 30 minutes after negotiating harbour entrance at HW or LW slack. The quay type concrete wharf 1842 m. in length, (nominally eleven berths), is fitted with wooden spring piling and rubber buffers. A linkspan is situated in the centre of the wharf area.

STEVEDORES: ETA to stevedoring companies is usually worked in conjunction with ETA to Harbour Master.

MEDICAL: Unless specifically required for arrival, Agents do not require advice. Local medical practitioners are consulted and services of one public and one private hospital are utilised. Smallpox certificates are required.

TANKERS: Discharge of black and white products is done through a single 2540 mm. pipe-line. The flexible connection between the discharge lines and ship is 2030 mm. There are no slop facilities available. Chemical tankers are loaded and discharged at the same berth, No. 9, where the max. permissible draft is 9.75 m.

DENSITY: Salt water, 1025.

FRESH WATER: Fresh water is supplied by pipe-line at 20 tonnes per hour, prior arrangements must be made with the Harbour Master for quantities in excess of 1,000 tonnes.

FUEL: Bunkering connections are placed at Nos. 1, 2, 3, 4, 5, 6 and 9 berths. Quantities of L.F.O., 200 secs, Redwood No. 1 and H.F.O. 1,000 secs, Redwood No. 1 can be supplied by prior arrangement with the Oil Companies.

FIRE PRECAUTIONS: In addition to the normal precautions, a fence is erected around tankers to prevent unauthorised access to the berth. A Watchman from the Harbour Master's Staff is also placed on duty at the gate. Both tugs are equipped for fire-fighting.

DEVELOPMENTS: An increase of draft to 10.67 m. is planned for in the near future.

GANGWAY/DECK WATCHMEN: Ship's watchmen are usually employed by overseas ships.

OPENING/CLOSING HATCHES: Usually performed by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams tobacco. 1 part bottle of spirits or wine.

IDENTIFICATION CARDS: Not required.

REPAIRS: All types of engine and deck repairs are possible. A slipway can take vessels of 610 tonnes displacement and up to 56 m. length.

REPATRIATION: All facilities exist.

AIRPORT: The airport is situated 1.6 km. from the wharf and is served with regular internal flights to other main centres where overseas flights may be connected with.

TIME: GMT plus 12 hours.

HOLIDAYS: New Year's Day; 2 January; Picnic Day and Anniversary Day, both in latter part of January; Waitangi Day, 6 February; Good Friday; Easter Monday; Anzac Day, 25 April; Queen's Birthday, 1 June; Labour Day, 26 October; Christmas Day and Boxing Day (12 days).

POLICE/AMBULANCE/FIRE: All connected through automatic exchange, Emergency No. 111.

TELEPHONES: Telephones are placed on board all ships when they arrive.

SERVICES: Local compass adjusters and Surveyors are available. Ships stores can be provided by local Providore firms. Fumigation can be arranged. Ships' garbage is collected daily. No facilities for discharge of tank washings exist.

SHORE LEAVE: Crew are permitted ashore at Master's discretion.

AUTHORITY: Bay of Plenty Harbour Board. Mount Maunganui.

AGENT: Russell & Somers (Bay of Plenty) Limited, 194 Maunganui Road, POB 5087, Mount Maunganui. Tel. 53059. Telex: 2942 "Lumberco". Cables: "Rusticated" Mount Maunganui.

TIMARU: 44.24 S. 171.19 E. (See Plan Book)

DOCUMENTS: See "Auckland".

PILOTAGE: Pilotage is compulsory, and Pilots are available day and night. A vessel requiring a Pilot should remain 1.5 miles seaward of Eastern Extension Mole, near and to South of entrance beacon. Vessels should not proceed Northward of line of leading lights on Benvenue Cliff.

ANCHORAGES: A vessel should anchor in a depth of not less than 12.8 m., sand, and Eastward of harbour light structure, and not within 1.5 miles of Eastern Extension Mole.

RESTRICTIONS: Tidal conditions may affect the time of entering harbour.

MAX. SIZE: Length, 198 m. O.A. 227 m. if fitted with bow and stern thrusters; beam, No limit; Max. permissible draft 9.1 m. HWOST. Time of berthing vessels of over 6.4 m. draft will depend on tidal conditions and at Harbour Master's discretion.

HEALTH: Due to exposed nature of anchorage, incoming vessels are examined and pratique is granted after a vessel berths. In event that vessel is quarantined, she will be required to return to anchorage without any contact being made with shore.

RADIO: Timaru Harbour Board has a radio telephone station equipped with both medium frequency and VHF installations.

Call sign "Timaru Harbour Radio", calling frequency 2182 kc/s., working frequency 2162 kc/s. Fixed watches maintained for a period of 15 minutes every 4 hours, e.g.: 0345–0400, 0745–0800, 1145–1200, 1545–1600, 1945–2000, 2345–2400 hrs. (New Zealand Standard Time) and at other times mutually arranged. VHF call sign is "Timaru Harbour", Channels 6, 12, 16.

TUGS: 1 tug, 1100 h.p. and Pilot launch/tug, 200 h.p. available.

BERTHING: Berthing space available, 947 m. with 9.75 m. at LWOST, 197 m. with 9.29 m. at LWOST. and 378 m. with 8.48 m. at LWOST. Loading and unloading by ship's gear; railway lines on all wharves. Rail to Christchurch and Dunedin.

SPECIALISED CARGO-HANDLING FACILITIES: *All weather mechanical loaders:* 4 all-weather mechanical meat loaders. Each machine is capable of loading 720 units per hour, to a max. of 2,500 units per hour. Also butter, cheese, frozen vegetables can be handled. Can be used to unload suitable cargoes e.g. fruit.

Roll-on/Roll-off facilities available for coastal vessels.

BULK HANDLING FACILITIES: Two silos with total holding capacity of 2,200 tonnes. Loading rate, 300 tonnes/hr. into vessel; into silo 120 tonnes/hr. A modern bulk handling installation with 7 silos providing storage for 8,500 tonnes of lucerne or 9,500 tonnes of grain. Loading in rates by road and/or rail transport, up to 300 tonnes per hour. Ship loading rates, lucerne 680 tonnes per hour, grain 800 tonnes per hour. Inert gas protection provided for lucerne. Wharf conveyor has maximum belt rate of 1,000 tonnes per hour. Plant able to handle lucerne, all grains and certain types of minerals.

Fertilisers and Sulphurs discharged through 6 mobile hoppers 27 cu.m. capacity each.

CRANES: One 20 tonne mobile crane, one 20 tonne crawler crane, one 6.7 ton crawler crane.

STEVEDORES: Gangs must be ordered before 0700 hrs. weekdays, and before 0900 hrs. Friday for Saturday work.

MEDICAL: Full medical facilities are available as required, including an excellent public hospital.

TANKERS: 1 tanker berth, discharge through 8-in. hoses.

DENSITY: Specific gravity 1025 at all states of tide.

FRESH WATER: Available at all berths, delivered at up to 25 t.p.h.

FUEL: Bunkers available, heavy and medium fuel oil. 24 hours advance notice required.

FIRE PRECAUTIONS: When tankers are discharging, access to wharf is prohibited except to those holding passes. Fire-fighting equipment is placed in readiness on wharf.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: See "Auckland".

IDENTIFICATION CARDS: Not required.

SURVEYORS: Lloyd's Surveyor – Captain A. Grieve.

REPAIRS: Most deck and engine repairs can be undertaken.

REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.

AIRPORT: Two flights each day to and from Wellington. Christchurch International Airport is 160 km. north of Timaru.

TIME: Approximately March–October New Zealand Standard Time (GMT plus 12). Approximately November–February New Zealand Daylight Saving Time (GMT plus 13). Actual dates of changeover to and from Daylight Saving Time decided annually.

HOLIDAYS: New Year's Day; 2nd January; Picnic Day (port holiday Monday of the week in which 29th January falls); New Zealand Day, (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (first Monday in June); Dominion Day (third Monday in September); Labour Day (last Monday in October); Christmas Eve (work ceases midday); Christmas Day; Boxing Day. Work can be arranged only by private negotiation on a voluntary basis.

POLICE/AMBULANCE/FIRE: Emergency No. 111 and ask operator for service required. Other than emergency calls: Police, 84-199 Timaru; Ambulance, 80-467 Timaru; Fire Brigade, 7089 Timaru.

TELEPHONES: Can be supplied to vessels at all berths.

SHORE LEAVE: Allowed.

DEVELOPMENTS: The depth in the entrance channel is being deepened to 9.75 m. LWOST. Container terminal due for completion in June 1978. Discharge and loading by ships equipment. Containers handled by crane/ships gear. Terminal in operation in June 1978. Suitable for multi purpose vessels. Container cleaning and inspection facilities available.

AUTHORITY: Timaru Harbour Board.

WANGANUI: 39.57 S. 175.00 E. (See Plan Book)

PORT LIMITS: Arc of a circle of 3 nautical miles radius centred at the flagstaff at Castlecliff, sited 39° 56′ 49″ S. 174° 59′ 23″ E.

DOCUMENTS: See "Auckland".

PILOTAGE: If Wanganui is first N.Z. port, initial application for Pilot and vessel's ETA should be passed to local Agent by radio through one of three Post Office radio stations. If not first N.Z. port, this information should be given to local Agent by Agent at previous port. Final details settled when R/T contact made between pilot station and ship.

Pilot launch "Karere", LOA, 41 ft. painted white, high midship wheelhouse. Pilot boards at anchorage position. International signals for Pilot should be used if no R/T contact made.

ANCHORAGES: One anchorage for vessels awaiting to enter.

RESTRICTIONS: Port worked day or night at high water when bar conditions are suitable.

MAX. SIZE: Length 350 ft., beam no limit, draft dependent on bar depths at particular time but usually 15 ft. max. at high water springs. No installations outside main port area.

HEALTH: See "Auckland".

RADIO: Wellington Radio ZLW. R/T frequencies 2182, 2162, 2012.

VHF: Channels 16 and 14.

TUGS: No tug available. Pilot launch used for swinging.

BERTHING: Berthing takes place at high water slack.

SPECIALISED CARGO-HANDLING FACILITIES: *No. 6 Berth:* pipeline for bulk cement connecting wharf with adjacent silos.

No. 1 Wharf: direct handling into cool store for fruit.

Portable hoppers used for bulk cargoes to load directly into railway wagons.

There are no facilities for containers, roll-on/roll-off traffic, liquid chemicals or LPG carriers.

CRANES: One mobile crane, capacity 4 tons.

STEVEDORES: Requirements for labour should be given with ETA and request for Pilot. At least 24 hours notice required.

MEDICAL: 24 hours notice required if possible. Hospital facilities available. Inoculations, certificates, etc.

DENSITY: 1020 at HW. 1005 at LW. These figures vary greatly according to amount of freshwater in river.

FRESH WATER: Plentiful supply through wharf hose connections. Rate of delivery depends on height of ship's filling pipe above wharf level.

FUEL: All grades available but ship has to pump out of road tankers. Amount of notice depends on grade required.

DEVELOPMENTS: Development plan in course of preparation but as yet no details of size of any possible new installations or draft increases.

GANGWAY/DECK WATCHMEN: Watchman necessary, either crew member or shore watchman.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: See "Auckland".

IDENTIFICATION CARDS: Not required.

REPAIRS: Minor deck and engine repairs possible.

REPATRIATION: Facilities exist but more easily accomplished at a main port.

AIRPORT: About 6 miles. Airport caters for internal services only.

TIME: N.Z. Standard Time (12 hours in advance of GMT). N.Z. Daylight time (13 hours in advance of GMT) is kept from last Sunday in October until first Sunday in March.

HOLIDAYS: As Auckland, except Anniversary Day holiday which is that held in Wellington Province. No cargo is worked on these days.

POLICE/AMBULANCE/FIRE: Ambulance, 53909; Police, 54488; Fire Brigade, Wanganui, 58505; Fire Brigade, Emergency 111.

TELEPHONES: Arrangements can be made for placing telephones on board.

SHORE LEAVE: Allowed.

DELAYS: Fresh onshore winds could make entrance unworkable for a vessel waiting to enter. Cargo work stops in rain and in unusually strong wind. Bunkering would be slow if large amount of bunkers required.

AUTHORITY: Wanganui Harbour Board.

WAVERLEY HARBOUR, North Island: 39.50 S. 174.37 E.

LOCATION: Waverley Harbour is located on the West coast of the North Island of New Zealand in the Northern end of the South Taranaki Bight.

PORT LIMITS: Waverley harbour is defined as being all that area of water bounded by the line of mean high water spring tides, and having as its seaward limit the arc of a circle of 2 nautical miles radius centred at 39° 49.6′ S. 174° 36.5 E, near the mouth of the Wairoa Stream.

DOCUMENTS: Besides the Port Health Doctor, other Government personnel boarding the vessel by helicopter for inward clearance are: 1 Port Health Officer, 1 Customs Department Officer, 1 Agriculture Department Officer.

Port Health Officer will inspect Deratisation Certificate and (possibly with Agriculture Officer) inspect food store rooms, refrigerated spaces, galley, pantry, etc.

Customs Officer: The Customs Boarding Officer acts for the Immigration Department and the Marine Department and will inspect the following ship's documents: Register, Loadline Certificates, Safety Equipment Certificates, Radio Certificates.

The following documentation is required on Inward Clearance:
1 copy Form 1A General Declaration
1 copy Form 1B Cargo Declaration
1 copy Form 1C Crew List
1 copy Form 1D Passenger List
1 copy Form 3A Ship's Stores List
1 copy Reg Form 2 Search List
1 copy Declaration re Safety Certificates
1 copy List of Poisons
1 copy List of Firearms

For Outward Clearance (Customs):
2 copies Form 1A General Declaration
2 copies Form 1B Cargo Declaration
2 copies Form 1C Crew List
2 copies Form 1D Passenger List
2 copies Form 3A Stores List
1 Passenger Arrival Card for any Crew or Passenger leaving vessel.

Agriculture Officer: on arrival:
2 copies of Ship's Meat Locker
Reg. 1966 Agl. 36.

The Boarding Officer will inspect the vessel's meat locker and inspect the garbage containers.

Australia, United States, Canada and New Zealand meat not loaded in the place of origin, and Japanese meat will be sealed up on vessel's arrival by the Agriculture Officer.

At sailing time, the Agriculture Officer may attend to check on garbage, sealed lockers, etc., together with the Customs Officer, who issues the Port Clearance, to check if all crew are aboard, and that the Bonded Stores Seal is intact.

NAVIGATION AIDS: SBM – radar reflector, white flashing light, one flash every 9 seconds, range 6 miles.

Leading Lights: In transit bearing 355° 33′.

Range Lights: In line bearing 312° 03′.

All four light towers are of louvred timber construction, painted white with vertical centre line painted red.

The pumphouse building immediately to the West of the two leading lights is prominent with a radar visibility to 15 miles.

PILOTAGE: Pilotage is compulsory for Waverley Harbour and under control of the Waverley Harbour Master.

It has become customary for vessels to await the Pilot in a position 2 miles South of the SBM. Vessels equipped with VHF will be contacted accordingly when within range. Information on weather conditions and time of Pilot boarding will be advised through this media.

Due to the nature of the coastline adjacent to Waverley Harbour and the weather conditions experienced, the transportation of the Pilot (and other port official personnel) is effected by helicopter, from a pad adjacent to the Administration building. It must be ensured that radio antennas running respectively from foremast to bridge and bridge to aft, as the case may be, are lowered clear in good time prior to the arrival of the helicopter and the landing area cleared of loose gear and portable foam fire equipment properly charged, available for immediate use at the landing area.

Berthing to the S.B.M. is normally effected in daylight only, dependent on weather conditions, visibility and flying conditions being acceptable to the helicopter pilot and in concurrence with the Master of the vessel.

For night flying a wind sock will be erected for the helicopter pilot's observation of wind direction, and vessel is to be floodlit overall.

ANCHORAGE: The recommended anchorage off the port is a rectangular area 0.75 miles East and West, and 1 mile North and South of a position 3 miles South of the SBM. The bottom is sandy in 11 to 12 fathoms and the holding ground is reported fair.

A safe anchorage for vessels having to leave the buoy and/or to await suitable weather to moor to the buoy is recommended in Golden Bay. Distance is approximately 90 miles S.W. of Waverley, the approaches are clear and the lights on Farewell Spit and Separation Point, of 15 miles and 12 miles respectively, most reliable. The holding ground is good and depth of water 15 to 16 fathoms.

WEATHER: The Harbour and SBM is exposed to the West through South to South-east. The swell conditions caused by Westerly and South-westerly weather are considerably reduced by the shallow ground to the Westward, but Southerly swell rolls in unhindered. Very sudden changes of weather are experienced on this coast with the rapid movements Eastward of cold fronts over the Tasman Sea.

PRATIQUE: Vessels arriving at Waverley on consecutive voyages Japan/New Zealand and with all personnel holding valid International Certificates for smallpox should radio to "Health, Wanganui" 24 hours before arrival Waverley, advising number of passengers and crew, and "All Healthy" in which case pratique is automatically granted without any acknowledgement to the vessel.

If a vessel has any suspected diseases on board and if any crew member does not hold a valid International Certificate for smallpox, this information should be stated in the radio message to "Health, Wanganui". The Port Health Doctor will then attend on board on arrival for inspection of all International Health Certificates, and carry out vaccinations as required.

The doctor will supply on arrival N.Z. Maritime Declaration of Health Form H-Q2 for completion by the vessel. It is customary to procure an additional form for the following voyage to facilitate easy inward health clearance thereafter.

RADIO: There is no Government Radio Station at Waverley. Vessels trading to Waverley use ZLD Auckland Radio, ZDB Awarua Radio, or ZLW Wellington Radio.

Advice of Arrival: Vessels to radio ETA to "Wavemarine" Waverley on departure from last port, and 48 hours and 24 hours prior to arrival.

In addition to the vessel's ETA to "Wavemarine", arrival draft and details of the hatch loading plans should be advised.

Vessels equipped with VHF should listen in on Channel 14 (156.7 mHz) when in range of Waverley Harbour.

Base Station is at the Shiploading Pump Station, on board the tender vessel *Otapiri* and a remote control unit is fitted in the main administration building. Mobile units are also employed during the loading operation.

Base Station Channels are:
Channel 6 – 156.3 mHz Intership.
Channel 9 – 156.45 mHz Private and Loading.
Channel 14 – 156.7 mHz Port Operations/Docking.
Channel 16 – 156.8 mHz Safety.

Meteorological information for shipping is broadcast by the Coast Radio Stations ZLW, ZLB and ZLD at frequent scheduled times. ZLW broadcast by radio telegraph on 417.5 kHz, ZLD 487.5 kHz.

BERTH DESCRIPTION: The single point mooring buoy of 11 m. diameter is moored in 57 ft. at low water, 1.5 miles from the shore in position 39° 51′ 02.2″ S. 174° 35′ 52.14″ E.

BERTHING: Vessels will be secured to the S.B.M. by a single 21 in. nylon hawser with chafing chains at each end.

When the carrier approaches the buoy, the tender vessel "Otapiri" will receive a 3 in. messenger rope from the carrier. "Otapiri" will then shackle the messenger to a 10 in. polypropylene pick-up rope. The carrier heaves the messenger and pick-up rope inboard until the chafing chain passes through the bull nose.

Dedicated ships secure the chafing chain to a quick release hook fitted for this purpose.

Ships without a quick release hook should advise "Wavemarine" by radio on departure from last port.

It is essential that two or three good heaving lines be available with the messenger rope in the first instance to pass to the tender vessel, to avoid any delays in mooring.

HOSES: The floating loading hose string comprises eleven 35-ft. lengths of hose, with the shipboard end supported by a steel buoy. After mooring is completed the tender vessel will tow around the floating hose underneath the pick-up derrick, plumbed over the manifold connection on the port side of the foredeck abaft the forecastle head. The pick-up buoy of the hose-end will have shackled into it a 30-ft. length of polypropylene, of 7 in. circumference, to which is attached a 100-ft. length of 2.25 in. circumference for passing to the vessel. The 7-in. polyprop is hove up to the rail and hooked into the vessel's cargo hook. The flange elbow with attached camlock coupling is then hove up and connected to the vessel's deck hose manifold. The hose is presently supported on the ship's derrick and stayed fore and aft after coupling up has been completed.

It has been estimated that after the iron sand slurry has been loaded, and the excess water decanted from the surface of the cargo, that the bulk density of the iron sand should be 190 lb. to the cubic foot.

LOADING: All compartments to be loaded should be clean with all drain sumps and double bottom butterworth hole filter places clear.

If weather conditions permit, the vessel should arrive with the after hatch lid of each hold open to facilitate visual inspections of the hold decanting eductors.

FRESH WATER/FUEL: Not available.

REPAIRS: Emergency repairs can be arranged, including radio.

MEDICAL: The Port Health Doctor is a qualified doctor of medicine and can be acquainted of any medical problems affecting any crew member; the necessary arrangements can then be made for treatment aboard or ashore, as convenient.

CUSTOMS ALLOWANCES: See "Auckland".

CONSULS: There are no consular representatives at the port of Waverley.

REPATRIATION: Lists of personal effects, accounts of wages, etc., of any vessels' personnel left ashore, hospitalised or deserted, should be available to Agent as early as possible.

A letter of authorisation is required if the Agent is to provide accommodation, meals, medical attention, transportation or travel expenses, and/or cash advances for account of vessel.

SHORE LEAVE: Shore leave for vessel's personnel is not practicable.

GENERAL: No Port Authority personnel remain on the vessel during the loading period at the SPM Buoy.

The Marine Department require that all vessels, while moored, "shall at all times be kept in readiness to proceed to sea".

The Pilot who is the loading master for Waipipi Iron Sands Limited will accept the Notice of Readiness for the vessel, and acts as Agent for all the vessels requirements. It is customary for the Pilot/Loading Master/Agent to be accommodated on board the vessel during her period on the buoy.

Whistle signals in an emergency may be used for medical, police, etc., as required.

Storing is accomplished by helicopter, cost of which is borne by the ship.

No garbage is to be thrown over the side of the vessel whilst she is on the New Zealand coast and moored to the buoy. Garbage must be retained on board and not dumped until the vessel is one day's steaming clear of the Northern point of New Zealand.

AUTHORITY: Waipipi Iron Sands Limited.

WELLINGTON: 41.18 S. 174.46 E. (See Plan Book)

PORT LIMITS: All the waters comprised within the harbour of Wellington having as their outward seaward limit the arc of a circle running from the landward boundary of the foreshore at Fitzroy Bay and thence into Cook Strait and thence to the landward boundary of the foreshore at Island Bay, such arc being an arc of a circle 3 nautical miles radius and having its centre at a point on the Outer Rock in the harbour of Wellington.

DOCUMENTS:

Port Health Authorities.

Maritime Declaration of Health (1 copy).

Crew List, stating name, rank, sex, nationality and date of smallpox vaccination. (1 copy).

Port Health Officer will also wish to sight each member of crew's smallpox Vaccination Certificate.

Current International Derating Exemption Certificate.

Customs Authorities. See "Auckland".

Agent.

Crew List, stating name, occupation, rank, sex and nationality (1 copy).

Freight Manifest (3 copies).

Note: Manifests should be airmailed by loading port to arrive in New Zealand at least one week prior to vessel's arrival.

Stowage Plan, airmailed same as Manifest (2 copies).

Agricultural Authorities.

Port Agriculture Inspection Instructions – Ship's Meat Locker Regulations 1966.

PILOTAGE: Compulsory, pilot vessel is not normally cn station outside entrance, and all vessels requiring a Pilot are required to give 24 hours notice by radio of their expected time of arrival off port limits. A second notice confirming or amending the first is to be sent 4 hours before expected time of arrival. In event of a ship expecting to arrive earlier than the time given in 24-hour message, 4-hour message shall be sent 4 hours before the new expected time of arrival. Should vessel expect to arrive later than her 24-hour message, her 4-hour message shall be sent 4 hours before expected time of arrival given in her original 24-hour message. All communications which should be addressed "Harbour Master, Wellington", will be attended to at all hours of the day or night.

Should it not be possible to give previous notice of arrival it may be up to 1.5 hours after a vessel is sighted by signal station on Beacon Hill before a Pilot can board.

Pilots normally embark or disembark South of Pencarrow Head, but in the event of heavy Southerly weather, it may be necessary to embark or disembark Pilot in smooth water at or near the compulsory limit.

ANCHORAGES: Depth in anchorages up to 60 ft.

Fairway. Within portion of harbour lying inshore and to Westward of a line drawn from Easternmost point of Oriental Bay, in a 344° direction, to Kaiwharawhara Shore.

Inner Anchorage. Within portion of harbour laying between the Eastern boundary of fairway anchorage and a line drawn from Point Jerningham, in a 354° direction to Kaiwharawhara Shore.

Outer Anchorage. Within portion of harbour Eastward of inner anchorage.

Note: Vessels anchoring in outer anchorage should take up a position well up towards Kaiwharawhara.

Explosives Anchorage: Within that portion of the harbour contained in a circle with a radius of 0.3 nautical miles having as its centre a point bearing 000° true, distant 1.45 nautical miles from Point Halswell Light Beacon or in such other place within the Harbour of Wellington as may be specified by the Harbour Master on any occasion having regard to weather conditions.

Caution: It is advisable when anchoring (especially when in light draft) to drop two anchors in an Easterly and Westerly direction, veering from 75 to 90 fathoms of cable, as it frequently blows hard with heavy gusts of wind off the high land that surrounds harbour, causing a vessel to sheer about. In very strong winds a ship will lie much easier by having both anchors down. A strict watch should be kept.

Prohibited Anchorages. Anchorage is prohibited within 500 ft. of the jetty situated on the N.E. side of Somes Island.

RESTRICTIONS: Controlling channel depth is 37 ft. 09 in. below chart datum. All vessels may enter, berth, unberth, or depart during the hours of darkness. Tankers do not usually berth or depart during the hours of darkness. Berthing is carried out at any state of the tide.

Tides: Rise of tide varies between 0.75 m. and 1.35 m. Tidal rate neaps 2 knots, springs 2.5 knots.

MAX. SIZE: Max. draft 33 ft. LW with no swell. Size no limit.

HEALTH: *Health Officer's Examination Ground.* Within that portion of the harbour contained in a circle with a radius of 0.2 nautical miles, having as its centre a point bearing 347° (true), distant 0.56 nautical miles from Point Jerningham Light Beacon or in such other place within the Harbour of Wellington as may be specified by the Harbour Master on any occasion having regard to weather conditions. Until pratique has been granted vessels arriving from ports beyond New Zealand must not proceed inwards beyond the limits of this area.

RADIO: Medium frequency; Call sign is Wellington Harbour Radio, calling frequency only 2182 kHz, working frequency 2012 kHz. Vessels working on the port and calling 2182 kHz should listen for reply on 2012 kHz. A continuous watch is maintained on 2182 kHz.

VHF: Call sign "Wellington Harbour Radio", on Channel 16. Working Channel 12 and Channel 14. A continuous watch is maintained on Channel 16.

Port operations. Vessels equipped with radio-telephone when within harbour limits must maintain a listening watch on 2182 kHz or Channel 16 to ensure immediate contact if required. Only calls for information on harbour conditions, berthing or safety of navigation will be accepted.

Vessels are notified of their berth by radio telephone (VHF or MF) or morse lamp from Beacon Hill (viz Wellington Harbour Control). On occasions this may be confirmed by Pipitea Tower.

Note: Beacon Hill and Pipitea Wharf signal stations, pilot launches and tugs are equipped with both medium frequency and VHF radio-telephone. Harbour Master's Office and all Pilots are equipped with VHF radio-telephone.

TUGS: The Harbour Master may direct the Master of any vessel to engage the services of a tug, and also direct the manner in which the tug shall be used. 3 × 2,700 b.h.p. Voith Schneider tugs, guaranteed bollard pull 28/31 tons, speed 12 knots, also equipped for fire fighting and salvage duties. The tugs are owned by Wellington Harbour Board.

DEVELOPMENTS: Containers:

Thorndon Container Wharf situated South of Aotea Quay breastwork has a quay length of 584 m. for two berths, depths at low water 12.5 m. Three container gantry cranes, one transfer terminal container crane, eighteen straddle carriers, five fork lifts, one travel lift, six 20 ton container trailers and thirteen battery fork lifts for vanning operations.

The Wellington Container Terminal area for handling up to 100,000, 20 ft. containers annually will be 60 acres (24.3 hectares) comprising 40 acres (16.2 hectares) operating and marshalling area, 10 acres (4 hectares) rail and road access 9 acres (3.6 hectares) depot working buildings etc. 1 acre (0.4 hectare wash area).

Container stacking: General cargo 2,309, reefer 1,376, empties 1,824, total 5,500 two high.

Tankers: Seaview Wharf under construction is an oil tanker wharf 97.5 m. in length, berthing dolphins 190 m. apart, mooring dolphins 213 m. apart, size of vessel 213 m. maximum, designed for vessel draft of 12.8 m. (See harbour entrance max. draft).

Kaiwharawhara: Future reclamation for bulk handling container and roll-on berths.

TANKERS: Tankers can berth alongside Point Howard Wharf, Aotea Quay, Burnham and Miramar Wharves. Side connections are to be used at all wharves. During hours of darkness pipe-line must not be disconnected without first obtaining permission from Harbour Master. All precautions must be taken to avoid oil pollution of harbour. Scuppers must be plugged and sawdust kept at hand in case of spillage.

Point Howard and Seaview wharves are exposed to weather and in the event of a Southerly gale special attention must be paid to vessel's moorings.

No facilities are provided for discharge of tank washings other than when a vessel is on the floating dock.

Details of pipe-lines serving these wharves are as follows: Miramar Wharf, one 8 in. pipe, one 12 in. pipe; Point Howard Wharf, two 10 in. pipes, one 6 in. pipe, four 8 in. pipes, one 9 in. pipe, two 4 in. pipes (chem. products); Aotea Quay, one 8 in. pipe, one 12 in. pipe; Burnham Wharf, one 12 in. (jet fuel).

DENSITY: 1025.

FUEL: Available at tanker discharging wharves.

FRESH WATER: Available at all wharves, delivered by hose (4 hoses per vessel max.), 50 t.p.h.

DRY DOCKS: *Floating dock.* A floating dock capable of lifting vessel of 17,272 tonnes displacement is available.

Slipway: Patent slipway available to accommodate vessel up to 508 tonnes.

Floating Crane. Harbour board has an 80-ton revolving and self-propelling floating steam crane of sufficient radius and height to serve the largest vessels when floating in light draft conditions.

REPAIRS: Major repairs can be undertaken. There are machine shops and foundries. Diving equipment and the services of trained divers are available for underwater inspections and repairs. Marine Radio and Radar Services, compass adjusters.

GANGWAY/DECK WATCHMEN: Shore watchmen available.

OPENING/CLOSING HATCHES: Work normally carried out by stevedores. Only time crew are to open and close top hatches is when advised by stevedore. In case of hydraulic hatches in tweendecks, crew are to open and close, not stevedores.

STEVEDORES: Available. No particular ETA advice required except as normally sent by Master.

MEDICAL: 4 hour's notice is sufficient for Agent to mobilise the service concerned. For minor attention it is sufficient that Master advises Agent on arrival. Hospital facilities are available. Current International Certificates of Vaccination against smallpox are required by the Authorities.

CERTIFICATES: Customs Department require ship's Register on arrival. Marine Department require:

- Load Line Certificate.
- Tonnage Certificate.
- Certificate of Registry.
- Convention Certificates, i.e.
  - Safety Equipment Certificate.
  - Safety Radio-telegraphy Certificate.
  - Safety Construction Certificate.
  - Exemption Certificate (if any).
  - If passenger ship, Passenger and Safety Certificate.
  - Cargo Gear Register.
  - Certificates for all Cargo Gear, i.e. runners, spans, shackles, swivels, etc.
- Deratification Certificate.

CUSTOMS ALLOWANCES: See "Auckland".

IDENTIFICATION CARDS: Not required.

CONSULS: Arab Republic of Egypt, Argentina, Australia, Austria, Belgium, Great Britain, Canada, Chile, People's Republic of China, Czechoslovakia, Denmark, Ecuador, Finland, France, Federal Republic of Germany, Greece, Iceland, India, Indonesia, Ireland, Italy, Japan, Republic of Korea, Malaysia, Mexico, Netherlands, Norway, Papua New Guinea, Philippines, Singapore, Poland, Portugal, Romania, South Africa, Switzerland, Thailand, U.S.A., U.S.S.R., and Yugoslavia.

REPATRIATION: Facilities are available for crew changes and arranging any necessary repatriations.

SHORE LEAVE: Crew members are allowed shore leave at all times.

AIRPORT: Situated 4.5 miles S.E. of City Wharves by road; regular internal and Australian services.

TIME: Local time is GMT plus 12 hours in Winter, (Daylight saving during Summer months).

HOLIDAYS: New Year's Day (1st January); 2nd January; Wellington Province Anniversary Day (22nd January); Waterside Workers Union Picnic Day (generally observed on Monday of the week 29th January falls); New Zealand Day, (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Sovereign's Birthday Observance (first Monday in June); Labour Day (fourth Monday in October); Christmas Day (25th December); Boxing Day (26th December).

Note: Pilotage services available public holidays. Container vessels at container berths work on public holidays.

POLICE/AMBULANCE/FIRE:

	Routine	*Emergency*
Wharf Police	723-000	Dial 111 and ask operator for service required
Ambulance	722-999	
Fire Brigade	850-188	

TELEPHONES: Vessels may be connected to telephone system at city berths by application to the Harbour Master.

GENERAL Garbage may only be disposed of in accordance with strict Government regulations. The normal method of disposal is overside to self-propelled garbage vessel in special cans supplied. Daily collections are made or as arranged through the Harbour Master.

SERVICES: *Shore Electricity:* Available at all berths. Type AC, voltage 230-400, cycles 50, amperage 60.

AUTHORITY: Wellington Harbour Board.

WHANGAREI: 35.45 S. 174.21 E. (See Plan Book)

PORT LIMITS: From a point due South of the summit of Sentinel Rock, thence to a point 5 cables due East of Sentinel Rock, thence to a point 5 cables due East of Bream Head, thence to a point 5 cables due East of Tutukaka Head, thence to Tutukaka Head.

DOCUMENTS:

- 3 copies Passenger List.
- 3 copies Crew List.
- 1 copy Search List (Form 2).
- 1 copy Stores List (Form 3).
- 1 copy Prohibited and Restricted Immigrants.
- 1 copy Poisons List.
- 1 copy Animals and Birds List.
- 1 copy List of Firearms (not cargo).
- 1 copy Arrival Manifest (Form 1).
- 1 copy List showing the gross tonnage of cargo for discharge in New Zealand.

PILOTAGE: Compulsory. Pilots embark on the line of leads 141°/321° at the seaward extremity of Pilotage District, i.e. up to 1.5 miles South-eastward of the Fairway Buoy. In heavy Easterly weather, it may be necessary for pilot vessel to lead ship in through the Outer Channel and embark in the lee of Frenchman Island.

Pilots are available all hours day and night subject to prior minimum notice of 24 hours being received during normal week-day working hours. Second notice confirming or amending first to be sent 4 hours before expected arrival. The Pilot supplies a set of Harbour bylaws. Pratique, agriculture and customs clearance is normally undertaken on arrival at berth.

Pilot boat is equipped with VHF. Working frequency is Channel 12, but Channels 6, 8 and 16 are also fitted. Pilot vessel *Manaia* – call sign ZM3830; pilot vessel *Ngapuhi* – call sign ZM2146. Range approximately 20 miles. *Manaia* painted blue, varnished housing, yellow funnel: *Ngapuhi* painted blue, white housing, yellow capping rails – pilot ladder with manropes required.

ANCHORAGE: Is situated 5 to 10 cables. Eastward of the Fairway Buoy in 12 to 20 fathoms of water in the section enclosed by the Fairway Buoy bearing 225° T to 315° T. Holding ground good in fine sand, but exposed to Easterly weather.

Harbour Anchorage. At Marsden Point, 2 cables West of Passage Island light, in 5 fathoms of water. Max. draft 24 ft. Good holding ground, sand and shell bottom.

RESTRICTIONS: Controlling depth in entrance channel 50 ft. MLWS. Depth in upper harbour channel maintained at 28 ft. MLWS.

MAX. SIZE: Marsden Point: Oil Refinery dolphin berths, LOA no restriction, draft 50 ft., Cargo berth LOA 600 ft., draft 28 ft.

Port Whangarei: LOA 600 ft., draft 31 ft.

HEALTH: All vessels examined by Health Officer on arrival.

RADIO: The station is Marsden Point, Whangarei. Call sign "Whangarei Harbour Radio" Continuous 24-hour watch is maintained on VHF Channels 16 and 12, range 40 miles. Medium frequency, listening watch on 2182 kc/s., working frequency range 200 miles. Station transmits on 2012, 2045, 2162 and 4139 kHz.

RADAR: Tugs and pilot boat *Manaia* fitted with radar.

TUGS: Available. Tugs equipped with VHF. Tugs usually secure to vessels entering in vicinity of Frenchman Island. Numbers of tugs normally used are 1 tug for vessels up to 25,000 tons d.w.t., 2 tugs for vessels up to 45,000 tons d.w.t., 3 tugs for vessels up to 65,000 d.w.t. 4 tugs over 65,000 d.w.t. Unberthing: 1 tug is normally required for vessels under 25,000 d.w.t., and 2 tugs for all other vessels, subject weather conditions.

BERTHING: Marsden Point Oil Berths (2) – operated by the New Zealand Refining Company, Marsden Point. LOA no restriction, max. draft 50 ft.

Marsden Point Cargo Berth (1), LOA 600 ft., max. draft 28 ft.

Port Whangarei berths (3), LOA 600 ft., max. draft 31 ft.

1 Berth LOA 400 ft., max. draft 20 ft.

Portland berths (3), bulk cement berth LOA 270 ft., max. draft 18.5 ft.; cargo berth LOA 350 ft., max. draft 18.5 ft.

SPECIALISED CARGO HANDLING FACILITIES: Portland bulk cement loading jetty. Port Whangarei, 7 portable hoppers for use discharge of bulk cargoes. Cargon system of butter loading.

STEVEDORES: Confirmation of arrival time 4 hours before ETA or revised ETA, whichever is earlier is required. Notice of arrival during a week-end or public holiday must be given not later than 1400 hrs. on the last working day preceding arrival.

MEDICAL: Hospital and dental services available.

TANKERS: Are berthed at all hours day and night. Vessels of 30,000 tons d.w.t. and upwards are usually berthed portside to berth at slack water, and should position ship's gangway 20 ft. upstream of hose connections prior to arrival.

Slop reception facilities are available. Diameter of load and discharge line 10 in. ASA.

DENSITY: 1025.

FRESH WATER: At Northland Harbour board wharves by hose 20 t.p.h. at 30 cents per 1,000 litres. Refinery jetties limited and arranged by refinery.

FUEL: Available from berths (viscosities 3,500 secs. red 1. 1,500 secs. red 1 and MDO).

OPENING/CLOSING HATCHES: Usually carried out by stevedores.

CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes or 0.5 lb. tobacco or 50 cigars permitted each crew member. Wine/spirit: one opened bottle wine/spirits for each crew member.

A New Zealand flag ship arriving from overseas may have a concessionary allowance.

IDENTIFICATION CARDS: Refinery passes are required when berthed at the Refinery wharves. Passes are brought on board by Agent.

CONSULS: None.

REPAIRS: Most repairs undertaken.

DRY DOCKS: None. 1 slipway capable of receiving vessels up to 1,500 tons d.w.t.

REPATRIATION: Facilities exist.

TIME: GMT plus 12 hours. Daylight saving time observed from early October to early March.

HOLIDAYS: The following are recognised holidays: New Year's Day; 2nd January; Anniversary Day (usually last week January); New Zealand Day (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Sovereign's Birthday (First Monday in June); Labour Day (fourth Monday in October); Christmas Day; Boxing Day; Waterside Workers Picnic Day.

POLICE/AMBULANCE/FIRE: Telephone 111 for emergency, and ask for service required.

TELEPHONES: Available at wharves.

SHORE LEAVE: Allowed.

FIRE PRECAUTIONS: Fire fighting tug on duty 24 hours a day. Tankers to have fire wires fore and aft.

SURVEYORS: Lloyds – New Zealand Government, Marine Division of the Ministry of Transport.

AIRPORT: 8 miles from Port Whangarei; regular daily internal flights.

SERVICES: Tank cleaning, radio and radar repairs. Compass adjuster from Auckland.

REGULATIONS: Issued by Pilot on arrival.

DELAYS: Tidal delays and berth vacancies.

AUTHORITY: Northland Harbour Board.

NOTES

Please also advise Shipping Guides Ltd.

Nicaragua

CORINTO: 12.30 N. 87.11 W. (See Plan Book)

ARRIVED SHIP: Vessels are considered as arrived only after having negotiated the entrance channel and are safely inside the proper harbour; vessels at the Pilot station are not considered as having arrived.

DOCUMENTS:
For the official clearance, the following authorities will board the vessel:

The Port Captain
The Public Health Delegate
The Delegate from the Ministry of Agriculture and Livestock
A representative of the Port Authority
Two Customs Officers
A representative of the steamship agency.

Each vessel must present documents legalised by the Nicaraguan Consul from the port of origin of the cargo as well as from the last port of call before Corinto. The documents required are the following:

	Legalised	Non-legalised
From the port of origin of the cargo:		
Cargo Manifest	3	18
Bills of Lading	—	2
Tally Books	—	14
From the last port of call:		
Manifest	3	18
Clearance	1	—
Crew List	—	6
Passenger List	3	6
Stores List	—	6
Health Declaration	—	1
Voyage Memorandum	3	10

In the cases where there is no Nicaraguan Consul at the port of origin of the cargo or at the last port of call, the documents may be legalised by the Consul of a friendly nation or can be certified by some competent authority of the port certifying that there is no Nicaraguan Consul in said port. When a vessel brings cargo for Corinto from the last port of call, then it must also bring both sets of documents mentioned above, the manifest in the second group being replaced by the Cargo Manifest.

Once these documents are satisfactorily received, the vessel is declared in "free pratique" or rather, officially cleared and numbered by the Port Authorities; it will then blow.

Vessels are cleared, numbered and attended in their successive order of arrival with the exception of vessels loading perishable cargó (bananas). In Corinto there is no preferential treatment given to these vessels since they operate on their own special berth.

To clear the vessel for sailing, the only requirement is the presentation of a Customs Solvency Certificate and the Clearance for the next port of call extended by the Port Captain.

Customs: Customs assigns two Customs Guards to each vessel docked or anchored, the vessel being under the obligation to provide these guards three meals daily. Besides meals, guards on anchored vessels must be given a cabin since watches are made in shifts.

PILOTAGE: The Port Authority must receive in writing from Agents advice regarding vessels ETA 72 hours prior to vessels arrival and a confirmation 12 hours. There is no VHF apparatus in use, therefore all advice must be sent through Agents by cable via Balboa or Limon station. Pilotage is compulsory on all vessels exceeding 500 gross registered tons or exceeding 7 ft. draft. Pilot boards 1 mile off Isla de El Cardon.

ANCHORAGE: The anchorage inside the harbour can accommodate 6–10 vessels, depending on size and draft.

RESTRICTIONS: The port is open 24 hrs.; however, entry is restricted in accordance with tide and vessels draft. Access channel and turning basin dredged to 13.35 m. Due allowance should be made for heavy swell if necessary. Speed limit 8 knots in Corinto Bay, and 5 knots in the vicinity of berths or other craft.

MAX. SIZE: Maximum permissible length 650 ft., 80 ft. beam. Draft controlled by depth of water in approach channel and state of swell.

HEALTH: After entry and vessel has berthed or anchored, 3 long blasts are given requesting free pratique; after these blasts the Authorities board the vessel together with the Agent's representative and proceed with distribution of the documentation. In the event of any suspected disease on board, the action to be taken will be given by the Representative of the Health Department. There is no automatic pratique even though vessel is proceeding from another port in the same country.

Although the port is open 24 hours, vessels arriving after 2100 hrs. are not boarded by the authorities until 0600 hrs. the following day, unless the vessel will berth and commence operations immediately. This being the case, free pratique is granted regardless of the hour. This arrangement is restricted to 0100 hrs. as gangs are not allowed to commence operations after that hour.

RADIO: ETA cables are generally routed via NBA Balboa Station or TIM Limon station, and received through Tropical Radio & Telegraph or All America Cable.

VHF: The Port Authority will soon have in operation, a VHF station to communicate directly with all vessels nearing the port. This radio station will become operative sometime during this year (1978).

TUGS: Compulsory for berthing and unberthing. The tug joins vessel just after vessel passes Buoy No. 7. Tug's lines are generally used: however, at times ship's lines are used. There is no charge for use of tug's lines. 1 tug of 1,100 h.p. and one launch of 167 h.p. available.

BERTHING: There is no preferential berthing, and berthing is indicated by the Port Authority. Vessels are attended to in the manner "first come first served".
Berthing facilities are as follows:
1. Container Pier, length 240 m. Depth alongside 13.35 m. (Designed for 25,000 d.w.t. vessels).
2. Concrete Pier (Container Pier extension of this Pier). Length 370 m. (2 berths). Depth alongside 13.35 m.
3. A special berth with conveyor-belt system for loading of carton boxes such as bananas, frozen meat, as well as the handling of inbound and outbound cargoes such as fertiliser and cottonseed meal. Bananas can be loaded into 4 hatches at one time at a rate of 4,500 boxes per hatch per hour. Depth alongside at low water is 35 ft.

Port Authority equipment includes fork-lift trucks with capacity up to 7,000 lb. and 3 barges (2×60 ton and 1×80 ton capacity).

CRANES: Two mobile cranes, capacity 75 tons and 12.5 tons.

STEVEDORES: *Working Hours:* The Port gives service 24 hours a day under the following schedule:
From 0700 to 1200
From 1300 to 1800
From 1900 to 2400
From 0001 to 0600

Each shift is of 8 hours. Meal hours are from 0600 to 0700; 1200 to 1300 and 1800 to 1900. The first shift commences at 0700 and is completed at 1600; the second shift is from 1600 to 2330. When a vessel announces with sufficient anticipation its intention to work during night-time continuously until the following day then a second shift does not work a full 8 hours but is relieved at 2200 hours and completely new gang takes over from 2200 until 0600 the following day.

When a vessel does not wish to work during the entire night, it may do two things: (1) Suspend all operations at 2330; (2) Work with the gangs of the second shift up until 0230 hours of the following day after which time the gangs of said second shift cannot continue working. Normally gangs are called at the following fixed official hours: 0630, 0930, 1230, 1530, 1830 and 2130, however on special occasions and with the approval of the syndicate, it is possible to integrate gangs at any hour of the day.

Average Cargo Handling Rates:

Exports:	Tons of 1000 kilos per gang hour
Cottonseed meal in bulk	48
Raw sugar in bulk-dumped by hand	48
Cottonseed in bags	45
Coffee in bags	45
Sesameseed in bags	45
Cotton in bales of 250 kilos each	40
Frozen meat	28
Lumber	12

Imports:	Tons of 1000 kilos per gang hour
Drums	40
Wire rolls	40
Bulk cargo (discharged by clam-shells)	35
Fertilisers – insecticides in bags	30
Vehicles (by weight)	30
Paper rolls	27
Wheat (by aspirators)	20
Oats (by aspirators)	15
General cargo	15

MEDICAL: There are several doctors in the port and most of the Agents have a particular doctor to their service. Hospital facilities are also available. No particular inoculation is required.

TANKERS: The only tankers which frequent this port are those of Esso Standard, Parcel Tankers and the Athel Line. There is one tanker berth; depth alongside 13.35 m. and each of the above-mentioned companies have their particular load/discharge lines.

The Esso tankers only discharge oils, the Athel tankers load out molasses, the Parcel tankers discharge solvents and occasionally others load out cotton seed oil.

There are 9 lines belonging to the consignees ranging from 4 in. to 12 in.

Loading rates:		Tons (1000 kilos) per hour
Molasses	12 in. pipe	140
Bunker or asphalt	8 in. pipe	409
Aviation gasoline	6 in. pipe	237
Hexane	6 in. pipe	240
Aromatics	6 in. pipe	203
Chemical Products	6 in. pipe	210
Turpentine	6 in. pipe	125
Coconut oil	4 in. pipe	60
Lubricants	4 in. pipe	45
Tallow	4 in. pipe	35

DENSITY: (Average) Rainy season 1014, dry season 1020.

FRESH WATER: Fresh water is available and is supplied from connections on the pier, by gravity, at a rate of approximately 10 t.p.h.

FUEL: Corinto cannot supply bunkers. In emergencies small quantities of bunkers and/or diesel oil may be supplied by private firms.

DEVELOPMENTS: Projected installation of bulk handling plant, additional warehouses and extension of pier 1,500 ft. with 2 transit sheds, new administration building, stevedores shed, equipment shed and repair shops; redesigning of range lights and buoys and increasing amount of same, also area for Industrial Park. Completion expected 1978.

A 40 ton container handling crane, 70,000 lb. capacity front loader, tractors and trailers have been ordered for the container berth.

GANGWAY/DECK WATCHMEN: After entering, 2 Custom Officers are placed on board all vessels and their meals must be furnished on board.

OPENING/CLOSING HATCHES: If vessel is equipped with regular hatch boards or pontoons, stevedores open and close hatches as well as swing out booms. However, if covers are of the McGregor type or mechanical, the crew has to do the job.

CERTIFICATES: Ship's Registry Certificate is required from ships making their first call at the port.

CUSTOMS ALLOWANCE: There is no limit on tobacco allowance to be held out of Bond but crew members are only permitted to take 2 packages of 20 cigarettes ashore. Crew not permitted to take any alcohol ashore. Anyone trying to do so will be subjected to heavy fine through Master of their vessel.

IDENTIFICATION CARDS: Crew members allowed ashore if they wish to do so after being previously identified by means of a seaman's book or a passport. This document is kept by the Customs Guard at the foot of the gangway and given back to the Crew member when he returns to the vessel.

CONSULS: In Corinto

Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Honduras
Mexico
Sweden
Venezuela

REPAIRS: There are no shipyards; no large-scale repairs available. Small motors and generators may be repaired in shops in Corinto and Chinandega.

AIRPORT: The airport at Managua is approximately 150 km. from the port and served by regular airlines with daily flights.

REPATRIATION: Can be effected.

SERVICES: *Provisions:* There are several ships chandlers operating in the port who are in position to supply vessels with provisions necessary and required by stewards, engine or deck departments.

Laundry: The same ships chandlers can take care of any amount of laundry. Drycleaning can be done by these suppliers in the nearby city of Chinandega.

Cleaning: There are special gangs of labourers in the port who work on vessels doing odd jobs such as cleaning, chipping, painting, etc.

Transportation: For anchored vessels, there is a very efficient ship-to-shore launch service.

There is taxi service available for transportation by day or night to any part of the country. There is an air-conditioned express bus service between Corinto and Managua under the following schedule:

From Corinto	0400 hrs. arrive Managua	0645 hrs.
From Corinto	0600 hrs. arrive Managua	0845 hrs.
From Managua	1445 hrs. arrive Corinto	1800 hrs.
From Managua	1745 hrs. arrive Corinto	2030 hrs.

Hotels: There is a small third-class hostel in the port, however in the city of Chinandega there is the Hotel Cosiguina with all the modern conveniences and facilities desired. Chinandega is connected to Corinto by a modern highway.

TIME: Local time is Central Standard Time, GMT minus 6 hours. There are no alterations during the year.

HOLIDAYS: Official holidays are: January 1st (New Year's Day); Holy Thursday; Good Friday; May 1st (Labour Day); May 3rd (Local Patron Saint's Day); July 14th (Annullment Chamorro-Bryan Treaty); September 14th (San Jacinto Independence Battle Day); September 15th (Independence Day); October 12th (Columbus Day); December 25th (Christmas Day).

In accordance with regulations, no work will be done on these days, however, from experience, we know that with the only exception of May 1st (Labour Day), all other holidays are workable under special arrangement.

POLICE/AMBULANCE/FIRE: Police 269; Ambulance 313; Fire 421.

SHORE LEAVE: Allowed. See "Identification cards".

AUTHORITY: Autoridad Portuaria de Corinto.

PUERTO CABEZAS: 14.01 N. 83.23 W.

DOCUMENTS:

1 Clearance from Last Port.
10 Voyage Memorandums.
11 Crew Lists.
10 Passenger Lists.
10 Stores Lists.
1 Bill of Health.
12 Ballast Manifests.
13 Manifests of Cargo.
4 Bills of Lading.
10 sets Tally Books.

PILOTAGE: ETA required 24 hours before arrival at the port. The Pilot uses a boat with an outboard motor and boards about one mile off the port. Agent advises the Pilot the date of arrival, he goes out when he sees vessel.

ANCHORAGE: Vessels can anchor about 0.5 mile South of the wharf. Depths in anchorage 20-22 ft.

MAX. SIZE: Max. length, 400 ft. Draft 19 ft. 6in. Difference between high and low tide is 18 in.

HEALTH: The inspection takes place on arrival. It is not necessary when the vessel comes from some other port in Nicaragua.

RADIO: The Nipco has a radiophone for personal use, but they make contacts with vessels. The frequency is 2738. It is better to use or send radiogram via Radio Tropical in Managua.

TUGS: There is no tug service.

BERTHING: There is wreck in front of the wharf. The location is: 14° 0′ 57″ North, 82° 22′ 4″ West, 1,200 yd. from wharf end.

STEVEDORES: The Agent advises stevedores arrival of vessel. They discharge 8 tons of general cargo each hatch (one gang) per hour.

MEDICAL: Not necessary to advise the need of a doctor, only for emergencies. One hospital and two other doctors, apart from the official doctor of the port.

TANKERS: There are 2 pipes of 6 in. diameter on the wharf. There is no special berth for oil tankers.

DENSITY: 1025.

FRESH WATER: The fresh water is carried to the wharf by truck or from one pipe on the wharf. The boiler water gets to the vessel by the pipe on the wharf.

FUEL: Gasoline, diesel oil and lubricants are supplied by Texaco. Arrangements are made at the arrival of the vessel.

GANGWAY/DECK/WATCHMEN: It is not obligatory. It is customary to have two custom guards in the gangway.

OPENING/CLOSING HATCHES: The opening and closing of hatches is done together by the crew of the vessel and the stevedores.

CUSTOMS ALLOWANCES: Each of the crew can take 2 packs of cigarettes with the seal broken, and one bottle of wine or liquor opened.

IDENTIFICATION CARDS: Not needed, just passport or seaman's book.

CONSULS: Only consul of Panama available locally.

REPAIRS: Minor repairs only can be effected.

REPATRIATION: It is possible and only a passport needed. Necessary to go to the capital by air, thence to any part of the world.

AIRPORT: Distance of airport from wharf is about 2 kilometres. Service every day to the capital except Sundays and holidays. The name of the only airline is Lineas Aereas de Nicaragua (Lanica).

TIME: Local time is Central Standard Time, GMT minus 6 hours.

HOLIDAYS: Holidays are 1st January; Holy Thursday; Good Friday; 1st May; 14th July; 14th and 15th September; 12th October and the 25th December.

SHORE LEAVE: The crew is allowed to go ashore after the vessel is received by the Authorities.

DEVELOPMENTS: A hydrographic survey has been completed in the port zone and surrounding area to establish the best place for future port facilities or whether expansion should be made to the existing port. This survey is being effected in view of projected installation of paper and pulp industry and forthcoming development of agricultural and mineral products which could be exported through the port.

The Port Authority is taking the necessary steps to get technical and financial help to make a general survey of the zone in order to find an adequate and/or protected site to place the new port installations. Port plans are combined with the paper and pulp industry, which is supposed to be installed in the next few years.

DELAYS: Delays in berthing can be expected from bad weather.

AUTHORITY: Autoridad Portuaria de Puerto Cabezas.

PUERTO SOMOZA: 12.12 N. 86.46 W.

DOCUMENTS:

Clearance from previous Port.
6 copies Voyage Memorandum.
6 Stores Lists.
6 Passenger Lists or negative declaration, 3 to be visaed.
6 Crew Lists.
8 Cargo Manifests, 3 to be visaed.
8 Tally books.
6 Lists of Mail, Explosives or Drugs if carried.

9 crew lists and 6 store lists should be despatched by the Nicaragua Consul at loading port if possible, otherwise they are forwarded by Agents from the Panama Canal.

PILOTAGE: Optional by local Pilots. Leading lights are installed, at the entrance to the port, prominently sited on a hill. Several buoys indicate exact anchorage positions.

Tankers: A Pilot is provided by the oil company in agreement with the Panama Canal Authority. Pilot boards about 0.5 mile West of the sea berth.

ANCHORAGE: About 1.75 miles off port entrance, depth is 30 ft. at low water, and about 45 ft. at high water.

RESTRICTIONS: Port is open day and night without exception.

MAX. SIZE: Tankers at Sea Line Terminal up to 850 ft. length and 41 ft. draft.

HEALTH: Port Health inspector boards all vessels on arrival.

RADIO: There is a radiotelephone installation at the Customs office. No VHF.

TUGS: Not available for manoeuvring vessels. 5 small tugs employed for shifting lighters.

BERTHING: No quays for ocean-going vessels. Vessels work cargo to lighters at the anchorage.
STEVEDORES: Port has 4 gangs of 40 men each for boarding vessels.
TANKERS: *Sealine Terminal.* The sea berth is situated in approximate location 12° 10′ N. 86° 49′ W., about 2 miles off shore in a depth of 47 ft. There are 5 mooring buoys, 2 at the bows and 3 at the stern of the vessel. The first lines to the buoys should each consist of 2 good ropes lashed end to end to effect the length required. 5 lines are normally used at each end of the vessel.

Strong winds may delay berthing or cause vessel to vacate the berth once moored. Sailing at night is not recommended for safety reasons. The discharge hose is lifted on the port side by ship's crew.
MEDICAL: Doctor available in case of emergency. Nearest hospital at Leon, 35 km. away.
FRESH WATER: Not available for supply to ships.
FUEL: Not available for supply to ships.
OPENING/CLOSING HATCHES: Normally performed by stevedores. Mechanically operated hatches are opened by ship's crew.
CUSTOMS ALLOWANCES: Each crewman allowed two packets of cigarettes. No wine/spirits allowed to be taken ashore.
IDENTIFICATION CARDS: Seaman's Book required for going ashore.
CONSULS: Nearest at Leon, 35 km. distant.
REPAIRS: Small items for repair can be sent to Leon, 35 km. away.
REPATRIATION: No facilities for crew changes. If crew member left behind, Agents are responsible for his repatriation at vessel's expense.
AIRPORT: Las Mercedes international airport at Managua, 75 km. away.
TIME: Central standard time, GMT minus 6 hours. No alterations.
HOLIDAYS: All holidays can be worked.
POLICE/FIRE/AMBULANCE: Police available locally. Nearest fire and ambulance stations are at Leon, 35 km. away.
SHIPMASTER'S REPORT: 1976. Port authorities board the vessel at 0600 hrs., either at outer anchorage or at discharging anchorage. There is no night work performed unless the vessel reaches discharging anchorage with last daylight.

In general, stevedores are well acquainted with handling cars. Vessels carrying cars, for Pto. Somoza should avoid loading No. 1 hatch for this port. As there is a permanent swell at anchorage, barges cannot lie safely under No. 1 hatch.

There is a Pilot available, on request, who also acts as stevedore-foreman.
SHIPMASTER'S REPORT: 1978
Approach: Coastwise from the North, no difficulties being encountered.
Anchorage: Vessel anchored in position with the rear leading light bearing 088°(T) – 2.1 miles, starboard anchor used, 4 shackles in 8 fathoms of water.

It is advisable to run in to the anchorage slightly to the North of the leading line, thus avoiding the shoal patches on and to the Southward of the line. The anchor should, however, be let go right on the leads, otherwise the vessel will be required to shift anchorage, as happened in our case.

Buoyage was as per B.A. Chart 1960.
Point Penas del Tiscuco: Now has a large power station on it, not shown on the Chart. This is a good land mark when making the port. The shape of the point, as observed on Radar, appeared slightly different from the shape shown on the Chart.
Pilotage: Pilot is available if required, but was not used. I would advise a deep-draft vessel to take a Pilot.
Communications: For long distance communications, it is best to maintain radio watches.

The Charter's Agents have a VHF set in their Office at Corinto and contact can be maintained for day to day matters in this way.
Charter's Agents: They have a resident water clerk at Pto. Somoza, who can be contacted on Channel 27, VHF. He is available from 0800 to 1200 hrs. and from 1400 to 1800 hrs.

Under normal circumstances, a representative from Corinto will meet the vessel on arrival and visit her prior to departure, but this was not possible on this occasion.
Documents required: As per "Guide to Port Entry".
Officials: Were helpful. 1 Customs guard is on duty at all times, but the Guards are regularly relieved from the shore and the ship is not required to provide accommodation for them.
Cargo Work: Continuous and fast. Large, modern lighters, towed by powerful tugs, were used. Due to the swell, these lighters ranged heavily alongside. Although the lighters were well fendered, several indentations were caused in the ship's side. Delays due to lack of lighters were minimal.

Rate of discharge, net of delays, was 60 tons per gang hour, steel coiled rod.
Pratique: Granted on arrival.
Provisions: Not purchased.
Fresh Water: Unobtainable.
Shore Leave: Under normal circumstances, can be arranged by catching a ride on the lighters.
AUTHORITY: Administracion de Aduana. Puerto Somoza.

NOTES

Please also advise Shipping Guides Ltd.

Nigeria

GENERAL

Documents: The Port Authorities have to be provided with 7 copies of the Cargo Manifest 14 days before the vessel berths, otherwise berthing will not be possible.

In the near future 12 copies of the Cargo Manifest and 5 copies of the Freighted Manifest will be required.

Shipmaster's Report: 1978.

No ship is to enter Nigerian waters unless issued with a Ship's Entry Number. Issuing Authority, not known.

BONNY: 04.26 N. 07.09 E. (Inshore Terminal)
04.11 N. 07.14 E. (Offshore Terminal)

(See Plan Book)

OPERATORS: The Shell-B.P. Development Company of Nigeria Ltd.

DOCUMENTS:

7 Crew Lists.
3 Vaccination Lists.
3 Maritime Declaration of Health.
8 Lists of Last Port of Call (6 weeks).
6 Lists of Birds & Animals.
7 Passenger Lists.
1 Stores List.
1 Personal Effects List.
2 Arms & Ammunition Lists.
1 Clearance Last Port.

Agent: Requires NPA lights and buoy dues form.

PILOTAGE: *Inshore berths:* Pilotage is compulsory. Pilots board off Fairway Buoy; incoming ships must *not* enter Bonny Channel without a Pilot on board.

Offshore berths (SBMs): Berthing Master will board vessel on arrival or at anchorage, and remains on board throughout and acts as loading master. On arrival at anchorage contact Berthing Master on VHF Channel 14 call sign "Ocean Berthing Master".

N.B. also contact Bonny Terminal on Channel 14 on arrival at Offshore anchorage to ensure vessels arrival etc. is recorded.

ANCHORAGES: *Inner Berths:* West of Fairway Buoy in 8–9 fathoms.

Outer Berths: 3 miles South of manifold platform in position 4° 11.2′ N. 7° 14.2′ E.

Vessels must not proceed inshore of this position without a Pilot. When at anchor listening watch must be kept on VHF Channel 14 and this Channel must not be used for intership communication.

RESTRICTIONS: Berthing not possible at night at the Inner berths.

The maximum draft to which a vessel can load at Bonny is governed by three factors *viz.*

1. Datum Depth in Bonny Channel.
2. Height of the tide.
3. The underkeel clearance allowed.

Datum depth of the Bonny Channel is dependent on the amount of dredging; at the present time Datum depth is 38 ft. 6 in.

Tide is variable but the relevant factor is the height of the tide at the time the vessel will transit the Channel. The underkeel clearance allowed is dependent on the time of the year and is related to the height of the swell expected to be encountered in the Bonny Channel.

The present allowances are as follows.

(January 1st–February 15th

		ft.	ins.
1/1-15/2	=	2	6
16/2-15/3	=	2	9
16/3-31/3	=	3	0
1/4-30/4	=	3	3
1/5-15/5	=	3	6
16/5-31/5	=	3	9
1/6-31/8	=	4	0
1/9-15/9	=	3	9
16/9-30/9	=	3	6
1/10-15/12	=	3	3
16/10-31/10	=	3	0
1/11-15/12	=	2	9
16/12-31/12	=	2	6

Thus it can be seen that the max. draft at any particular time is equal to:

Datum Depth plus Height of Tide minus Underkeel Clearance Allowance.

A typical calculation would be as follows:

		ft.	in.
Datum Depth	=	38	6
Height of Tide	=	+ 7	0
		45	6
Underkeel Clearance Allowance		3	9
Max. Draft	=	41	9

MAX. SIZE: *Inshore Terminal:* Min. size approximately 18,000 tonnes or 161 m. (530 ft.). Max. length 269 m. (850 ft.). Max. beam no restriction. Max. draft, see "Restrictions".

Offshore Terminal: Min. size 45,000 tonnes s.d.w.t. Max. size 300,000 tonnes s.d.w.t. Max. length no restriction. Max. beam no restriction. Max. Draft 22.8 m. (75 ft.).

HEALTH: Q-flag to be shown on arrival, except if from another Nigerian port, yellow fever and small-pox inoculations compulsory. In case of suspected disease on board, advance notice to Agent advisable. Valid Yellow Fever and Smallpox Certificates to be produced for all crew members. Also Deratisation Exemption Certificate.

RADIO: Original ETA message should be sent via Lagos Radio to the Lagos Agents at least 72 hours before arrival. 48 hours before arrival at the Fairway Buoy a further ETA message should be sent to Lagos Agents. When anchored at the Fairway Buoy contact Bonny Terminal on Channel 14, passing date and time of arrival (same for Harbour Master Bonny), keeping watch on VHF Channels 14 and 16. Failure to comply with the requirements for ETA messages may result in delays in berthing the ship.

BERTHING: *Inshore Terminal:* There are 4 berths (CBMs) designated A, B, C and D, from upstream. A, C and D consisting of 5 buoys (1 astern, 1 on each quarter, 1 ahead and 1 on the inshore bow). A, C, D are flood tide berths. B is ebb and flood tide berth consisting of 6 buoys, the 6th buoy is on the offshore bow or quarter depending on which direction the ship is berthed.

Tankers berth on the flood tide (or ebb at berth B) using the offshore ships anchor as an additional mooring point. Ships moor by means of 40 mm. wires (provided by the Terminal) one 40 mm. wire is picked up from each of the buoys and ship's ropes are not normally used. Mooring is carried out by ship's crew; and care must be taken to ensure that the mooring wires are laid out in a seamanlike manner to prevent runs and kinks forming in the wires. Mooring wires must not be kept on tension winches, but stoppered off by means of Carpenter's stoppers provided by the Terminal, and then "turned up" on the bitts. Two men from the Terminal are put on board the vessel to assist the ship's crews position and set up the Carpenter's stoppers.

Vessels must be equipped with hose-handling derricks with a SWL lifting capacity of not less than 5 tonnes.

Vessels must arrive with clean ballast.

Load-on-top system operates at Bonny, but slops cannot be accepted ashore. Maximum loading rate: 5,000 t.p.h.

Grades handled: both light and medium crudes.

Offshore Terminal: Two SBMs fitted with two 16-in. double nylon mooring lines and 1 hose string terminating in two 16-in. diameter end hoses.

No. 1 SBM is S.S.W. of the Platform. No. 2 SBM is S.S.E. of the Platform and they are designated Bonny West and Bonny East respectively.

Berthing effected under guidance of berthing master and local assistant who both remain on board throughout loading operations. Accommodation for both to be provided. Whilst berthed a mooring rope must be ready on the poop deck so that the mooring launch (line boat) may, in the event of the vessel riding up on the SBM, make fast and tow to re-align vessel.

Vessels must be equipped with hose handling derricks with a capacity of not less than 7 tonnes.

Vessels must arrive with clean ballast.

Load-on-top system operates at Bonny but slops cannot be accepted ashore. Max. loading rate: Light crude 61,712 bbls.p.h.; Medium crude 58,400 bbls.p.h.

HOSES: *Inshore Terminal:* Vessels should endeavour to present two 12-in. diameter 150 ASA connections on the port side of the vessel when berthing at A, C, D, berths. On B berth two 16-in. 150 ASA connections should be provided on the port or starboard sides of the vessel – dependent on whether the vessel is berthing on ebb or flood tides. Vessel's hose handling derrick to be rigged and plumbed overside. Hoses will be connected by shore labour, but winchmen must be supplied to operate the ship's lifting gear. The derrick runner must be equipped with a suitable hook. The estimated weight of each hose string at berths A, C and D, when lifting with the ship in light condition is between 3 and 5 tonnes. Ships fitted with only 5 tonne derricks should exercise care when lifting to avoid shock loads. On "B" the estimated lifting weight is between 5 and 7 tons.

Weight of Hoses: Indication only of approximate weights of hose strings in tonnes (including fittings, floats, and pick-up buoy). Assumed total lift of 7.6 m. (25 ft.) above deck level and vessel in light draft condition with hoses full of crude oil SG 0.850.

d.w.t.	*16 in.* *I.D. Hoses* tonnes	*12 in.* *I.D. Hoses* tonnes
100,000	8.3	4.9
70,000	7.5	4.5
50,000	7.3	4.4
35,000	7.1	4.2
18,000	6.3	3.7

Offshore Terminal: Port or starboard side amidships (dependent on which SBM is used). Vessels should endeavour to present two 16-in. standard 150 ASA connections on arrival. Ships crew are required to connect and disconnect the hoses under the advice of the berthing master and/or his assistant. A derrick SWL at least 7 tonnes must be rigged ready on both port and starboard sides and plumbed clear of this side. Derrick runner must be equipped with suitable hook.

Weight of Hoses: Indication only of approximate weights 16-in. I.D. hose strings in tonnes (including fittings, floats, and pick-up buoys with all hoses full of crude oil SG 0.850. Assumed lift is 7.6 m. (25 ft.) above deck level, with vessel in light draft condition.

d.w.t.	tonnes
200,000	8.9
100,000	8.1
70,000	7.3
50,000	7.0
35,000	6.9

SHORE LINE SYSTEM: *Inshore Terminal:* Crude oil is loaded at berths A, C, D via 32 in. submarine lines and 2 strings of flexible hoses each consisting of 3 lengths of 16 in. hose and 3 lengths of 12 in. hose at the ship end, and via a 28 in. submarine line and 2 strings of 16 in. flexible hose at berth B. Reducers are made available by Terminal on request.

Offshore Terminal: Vessels load through SBM from shore through a 48 in. diameter line, thence through a 24 in. diameter floating hose which is terminated by a "Y" piece and two 16 in. diameter hose tails which connect to the ships manifold. Loading rates up to 8,000 t.p.h. may be expected. The 48 in. submarine loading line from the Terminal is some 20 miles in length, therefore great care must be exercised during loading when ships valves are manipulated to avoid pressure surges. Pressure recorders are normally fitted at the spool piece between ships manifold and tail end of the hose string to monitor pressure changes generated on board the vessel.

BALLAST: No facilities for dirty ballast, no tank cleaning facilities.

MEDICAL: Hospital at Bonny.

DENSITY: *Inshore Terminal:* 1015 at Low Water particularly during rainy season.

Offshore Terminal: Salt.

FRESH WATER: Available by barge at rate of 15 t.p.h. 48 hours advance notice required as barge comes from Port Harcourt.

FUEL: Available only by barge from Port Harcourt.

CUSTOMS ALLOWANCES: 200 cigarettes per man per 7 days. 1 wine or 1 btl spirit per officer per 7 days.

IDENTIFICATION CARDS: Crew to carry passport or seaman's book whilst ashore.

CONSULS: Nil.

REPAIRS: Nil. See "General".

REPATRIATION: Possible via Port Harcourt and Lagos.

AIRPORT: 28 miles by river, to Port Harcourt, then 7 miles by road, twice daily to Lagos, no international flights.

TIME: GMT plus 1, no change.

POLICE/AMBULANCE/FIRE: Contact Via Harbour Master or Shell/BP, VHF 14 or 16.

SHORE LEAVE: Not permitted.

GENERAL: Accommodation ladder must be rigged – used in conjunction with pilot ladder at offshore terminal – and for direct access in inshore terminal. Limited medical assistance available but in extreme emergencies only. Treatment of minor ailments and vaccinations etc. is under no circumstances available. It may be possible in the event of an accident to obtain medical advice. Contact terminal VHF Channel 14 in first instance. Pollution of the sea by dirty ballast bilge discharge or any other means will result in heavy fines, or in severe cases, imprisonment. Any attempt on the part of the boarding officers to persuade the Master to supply more than normal representation should be resisted. In the event of any problem arising over such a matter full details should be *reported to the Agent.* Nigerian flag to be flown. Air letter forms are not acceptable unless with Nigerian stamps.

Delays: Inshore berths: None.

Offshore berths: Worst weather period June–September when heavy swell may be encountered.

Immobilisation of engines: Not permitted at the berth. Not permitted at SBMs. Not advised at sea anchorage due to indifferent holding ground and the existence of obstructions and foul ground in the vicinity.

Loading: Ships are required to load cargo as rapidly as possible by day and night in accordance with the terms of their charter parties.

This means that ships are expected to load as fast as Shell-BP can supply or they can safely receive. The question of how fast a ship can load is the responsibility of the Master having regard to his Owner's instructions, the charter party and the experience of ship's personnel. However, as further guidance and in absence of any instructions to the contrary, ships are expected and nominations of vessels are accepted by Shell-BP on the understanding that ships will be able to accept a bulk loading rate per hour of not less than ten per cent of the summer deadweight of the vessel.

At offshore berth the Berthing Master acts as Loading Master during loading operations and is provided with walkie-talkie radios to ensure adequate ship/shore communication.

Loading Masters visit each vessel, and Masters are requested to co-operate in the completion of the Shell-BP Tanker Port Performance Time Sheet by ship and shore personnel at all terminals. Only crude oil is handled at Shell-BP terminals, loading temperatures and specific gravities of the two grades of crude, Bonny Light and Bonny Medium are reasonably constant and are approximately:

Bonny Light	0.823 at loading temperature
Bonny Medium	0.890 at loading temperature

Early Departure Procedure: A modified early departure procedure is in operation at Bonny Offshore Terminal. Masters are requested to sign all documents in blank, retaining in their possession Masters' consignee copies. On completion of loading, the berthing Master will supply Masters with a copy of the figures required for the completion of the retained documents. Masters requested to complete these before the departure of the vessel. Customs and Agency representatives will normally board vessels during the daylight hours. Depending on other commitments of the offshore launch, it may be necessary to request Masters to provide temporary accommodation for these officials.

AUTHORITY: Nigerian Ports Authority.

AGENT: Alraine (Nigeria) Ltd., 26 Creek Road Apapa. POB 265, Apapa. Tel. 47770. Telex 21 244. Cables: "Freight Lagos".

BRASS RIVER (Offshore Terminal): 04.04 N. 06.17 E.

SHIPMASTER'S REPORT: 1976.

DOCUMENTS:

1 Maritime Declaration of Health.
2 Vaccinations Lists.
6 Crew Lists.
4 Passengers Lists.
2 Stores Lists.
2 Personal Effects Lists.
4 Arms and Ammunitions Declarations.
4 Lists of Animals and Birds.
4 Lists of Ports of Call (last 6 weeks).
Clearance last port.

APPROACHES: Coast line is well defined on high definition radar at a distance of 12 to 15 miles and sounding machine will assist efficently while approaching.

Terminal consists of a central platform showing two flashing lights (one red and one white) – letter "U".

Two SBM's: No. 1 situated 1 mile East of the platform is equipped with a Racon (letter "A"). No. 2 situated 1 mile West of the platform.

PILOTAGE: Berthing Master will board the vessel 2.5 miles North East of the platform. Contact "Brass Terminal" on VHF Channel 16 for berthing instructions and immediately on anchoring to ensure that vessel's arrival is recorded.

ANCHORAGE: 2.5 miles N.E. of the platform.

RESTRICTIONS: Vessels berth in day hours only.

MAX. SIZE: About 250,000 d.w.t.

PRATIQUE: Agent, Health and Customs Officers board at same time as Berthing Master.

RADIO: ETA to be given via Lagos Radio, 120, 72, 48 and 24 hours before arrival at the Terminal anchorage.

TUGS: None available.

BERTHING: Effected under the guidance of Berthing Master assisted by a party of 4 Nigerian people and ship's crew.

Whilst berthed a mooring rope must be ready on the poop deck so that the mooring launch, in the event of the vessel riding up on the SBM, may make fast and tow to realign the vessel.

Each SBM is fitted with 2 nylon mooring ropes connected on a single chain and two hose strings with 16 in. end hoses. Position of hoses connection: amidship port side. Vessel should endeavour to present on arrival 2×16 in. connections on port side. A derrick of 7 to 10 tons SWL with a suitable hook must be rigged ready on port side.

MEDICAL: No facilities but assistance may be given on an emergency basis.

FUEL: Not available.

FRESH WATER: Not available.

DENSITY: About 1025.

REPATRIATION: No crew changes possible.

SHORE LEAVE: Not permitted.

GENERAL: Crude oil handled is: Light Nigerian Crude API=44.0. Temperature about sea temperature, R.V.P.=10.5. Two of the four Nigerian crew stay on the forecastle head and maintain security watch throughout loading operations. Accommodation must be provided for Berthing Master and 2 men. Accommodation ladder is not required. Pilot ladder or pilot hoist are more suitable because of the swell. Immobilization of engine is not permitted at SBM's.

Early Departure Procedure: Masters are required to sign all documents in blank. On completion of loading, seals are controlled by customs officer and Agents complete Master's and Consignee's copies of documents whilst ship is disconnecting and leaving berth.

TERMINAL OPERATOR: The Nigerian AGIP Oil Co. Ltd.

BURUTU (inc. Warri): 05.21 N. 05.31 E.

DOCUMENTS:

7 Ports of Call Lists.
5 Crew Lists.
5 Kroo boy Lists.
2 Animal Lists.
2 Arms and Ammunition Lists.
9 Manifests.
2 Summaries.
1 extra Manifest for transhipment cargo.
3 Stores Lists.
2 Crew Declarations.
2 Inward Reports.
2 NPA Master's Declaration.
2 NPA ship's particulars.
1 Customs Clearance.
1 Declaration of Health.
1 Vaccination List.

PILOTAGE: No compulsory pilotage. local Pilots or rather river guides, available at Escravos. No communication is possible with these guides from Burutu.

ANCHORAGES: 1 anchorage known as "the pool", opposite Okorodudu Town; max. draft for pool anchorage 14 ft. MLWS. Further anchorage at Forcados for vessels waiting to proceed to Burutu or Warri.

MAX. SIZE: Restricted only by draft. Official depth 21 ft. MLWS, governed by actual depth on Escravos bar which does vary from time to time and being dredged for increased draft. Latest information always available from Nigerian Ports Authority, Lagos.

HEALTH: International pratique regulations prevail. Pratique *not* necessary when coming from another port in Nigeria.
RADIO: Station, Port Burutu. Watch kept from 0730–1200, 1400–1700 hrs. on week-days and 0730–1200 hrs. on Saturdays on 2182 kc/s R/T and Channel 16 VHF.
TUGS: No tugs available.
BERTHING: No specific requirements to berthing. Berth number is hoisted on flagpole situated on No. 4 berth. Ships berthed in order of arrival.

Warri		*length (m.)*	*draft (m.)*
1	Buoys Fore and Aft	160	6.4
2	Buoys Fore and Aft	191	6.4
3	Single Buoy	No limit	6.4
4	Main Wharf	160	6.4
5	Canal Berth	322	6.1

Burutu

Two vessels normally berth alongside the wharves. The main wharf being some 750 ft. in length and a smaller wharf of some 300 ft. There is plenty of water alongside these berths and the depth that a vessel can load to is controlled by the Burutu flats which are 13 ft.

One 25 ton and 6×2 ton diesel cranes available for handling lighters only.
STEVEDORES: Advice given on radio during transit Escravos-Burutu is quite adequate. Normal rates approximately 13/15 ton per hook hour.
MEDICAL: Fully equipped hospital under supervision of resident medical officer situated at Burutu.
TANKERS: Only small coastal tankers use Burutu to periodically replenish bulk tanks, which have capacity for 1,800 tons gas oil and 900 tons fuel oil, used primarily for consumption by local vessels.
DENSITY: Fresh water.
FRESH WATER: Limited amount available in wet season from shore line at rate of 4 t.p.h.
FUEL: No fuel available.
FIRE PRECAUTIONS: Small fire station situated in port area. No specific fire precautions required.
GANGWAY/DECK WATCHMEN: Considered advisable have gangway/deck watchmen.
OPENING/CLOSING HATCHES: Normally carried out by stevedores, except in ships fitted with Mcgregor hatches.
CUSTOMS ALLOWANCE: 200 cigarettes; part bottle.
IDENTIFICATION CARDS: Either discharge books, or passports advisable.
CONSULS: No consulates at Burutu.
REPAIRS: Dockyard has four slipways which can accommodate most creek and river vessels up to tonnage of 600 tons. Management of dockyard in hands of qualified engineers who are able carry out afloat, hull and/or machinery surveys as required. Limited deck, hull and engine repairs can be carried out.
REPATRIATION: Facilities exist for individuals but not for crew changes.
AIRPORT: Small airstrip 1.5 hours away by launch, where daily scheduled flights by small twin-engined aircraft operate to Lagos.
TIME: GMT plus 1.
HOLIDAYS: See "Lagos".
POLICE/AMBULANCE/FIRE; No telephone numbers – all these services available in port area.
TELEPHONES: Facility available for connecting telephones on board.
SHORE LEAVE: Crew members allowed ashore.
DEVELOPMENTS: A wharf, length 1,300 m. with 6 berths under construction at Warri.
AUTHORITY: Nigerian Ports Authority, Burutu.

AGENT: Intertrans (Nigeria) Ltd., 4 Khalil Road, POB 374, Warri. Tel. Warri 341. Telex via Lagos 21.244. Attention Warri.

CALABAR: 04.57 N. 08.27 E.

Situated on right bank of Calabar River, 42 miles from sea.
DOCUMENTS, and all general information, refer to "Lagos".
PILOTAGE: Not compulsory, but the services of the Harbour Master can be requested for pilotage duties.
MAX. SIZE: The max. recommended draft for vessels using the port of Calabar is 5.94 m., which is, at present, governed by a depth of water on Duke Town Crossing of 3.66 m. Max. LOA 160 m.
BERTHING:

Berth	*Length (m.)*	*Max. Draft. (m.)*	*Remarks*
Pool Anchorage	—	—	3 Ocean going vessels
Jackson Wharf	27	5.79	1 Coastal going vessel
Milerio Wharf	61	7.32	1 Ocean going vessel
Ivy Warf	41	4.27	1 Ocean going vessel
Cement Wharf	75	5.79	1 Ocean going vessel

FRESH WATER: Available.
AIRPORT: At Calabar.
AUTHORITY: Nigerian Ports Authority.
AGENTS: Intertrans (Nigeria) Ltd. P.O. Box 10, Calabar. Tel: 175. Telex: via Lagos 21244. Att: Calabar.

DEGEMA (Including Abonnema): 04.44 N. 06.46 E.

LOCATION: Degema and Abonnema are very close to each other on the Sonbreiro River and are divided by a Creek through which launches and small craft sail to Port Harcourt.
PILOTAGE: Compulsory through Boler Creek. Pilots embark at Bonny.
BERTHING: The ports are approached from Bonny via Boler Creek, which has a depth of 4.88 m. at HW. Anchorages for 3 vessels in harbour to load/discharge, max. draft 16 ft. (limited by depth of Boler Creek). Cargo is handled by lighters.

Bulk Oil Plants of Nigeria Ltd. operate a berth for the loading of bulk palm oil onto main line vessels.
AUTHORITY: Harbour Master, Port Harcourt.

ESCRAVOS: 05.30 N. 05.00 E. (See Plan Book)

DOCUMENTS: Required and brought out by Pilot:

4 Nigerian Ports Authority/Masters Declaration.
2 Customs and Excise (Form C 13).
4 Ship's Report (Gulf) }on behalf of Agent.
2 Requests for Service }on behalf of Agent.

The sailing clearance will be completed after B/L figure of cargo loaded is available, and will be delivered to the ship before sailing.
PILOTAGE: Compulsory. Boarding area is in a position 3 miles W.N.W. of the berth operation platform.

Supervisor Pilot's Report: From my personal experience here at the Tank Farm, I can add that in poor visibility or when Tankers approaching this Terminal are having difficulties with their Radars, I am guiding them to proper anchorage using a small R.D.F. which is located at the local airport – Heliport in the Tank Farm and used by local aircraft traffic. The signal comes as "ES" (·   ···) on 305 kcs and gives a good bearing from a distance of 30 miles. This is not an official Navigational Aid, but I have used it successfully for many years and besides, when you have nothing else in the area, this is a great help to obtain a line-position.
NAVIGATION AIDS: Berth Operations Platform is a conspicuous steel structure 85 ft. high and is approx. 1 mile from Berth No. 2, between the berth and the shore. On top of this structure is a heliport, which at night is surrounded by red lights. In the event of a power failure a green intermittent light will be shown from one corner of the seaward side of the platform.

A RACON reflector is mounted on this platform for easy identification of the Gulf Sea loading area. Radar transmission from the incoming vessel triggers the RACON Unit which responds with the Morse Code letter "G" (– – ·), followed by a solid tail. This signal is observed visually on the ship's radar screen and appears very close to the point where the radar echo of the berth operations platform itself should appear.
ANCHORAGE: Vessels required to anchor on arrival will anchor in position approx. 3 miles W.N.W. of the berth operations platform, i.e. in a position Lat. 05° 31′ 00″ N., Long. 04° 57′ 30″ E., or as otherwise instructed.

On approaching the terminal, VHF contact can be established with the Mooring Master on Channel 16 and the vessel will be advised of which berth has been nominated for her cargo. At the same time, the vessel will be advised where the Mooring Master will board. In cases where VHF contact is not made, the vessels will remain in the anchorage area until such time as contact is made by radio or the pilot boat. Vessels are advised to anchor only in the stated area due to the existence of submarine pipe-lines in other areas.

Anchorage is forbidden in the mooring area.
RESTRICTIONS: Mooring and unmooring operations will be undertaken by day and by night under normal weather conditions.

Notice of Readiness will be accepted by the Company representative on arrival providing that the ship is in all respects ready to load.
MAX. SIZE: The Escravos Terminal consists of two Single Buoy Mooring Berths Nos. 2 and 3 only, the conventional Sea Berth (Berth No. 1) having now been de-commissioned.

The location of the Sea Terminal Berth No. 2 (SBM) for vessels up to 100,000 d.w.t. is off the North of the Escravos River in a position Lat. 5° 30′ 37″ N., Long. 4° 59′ 25″ E., and has a min. depth of water of 72 ft. at LWS.

Berth No. 3 (SBM) for 350,000 d.w.t. vessels is situated 4.25 miles W.S.W. of No. 2 berth in a position Lat. 5° 29′ 29″ N., Long. 4° 55′ 54″ E., and has a min. depth of 105 ft. at LWS.
RADIO: Vessels bound for Escravos must advise their ETA to Gocon, Lagos, 72 hours and 24 hours before arrival -the message to contain the vessel's name, ETA, Master's name. A 24-hour watch is maintained on VHF Channels 10 and 16, in the Senior Mooring Master's Office, and ships are usually able to make contact on this Channel at a distance of 20 to 30 miles on the seaward side of the Berth Operations Platform. Channel 10 is used for internal traffic and ship berthing operations.
MOORING: Before arrival at the pilot boarding area, it will be necessary to ensure that the following moorings are ready for use on arrival at the berths:

Four mooring ropes – buoyant lines if possible, e.g. polypropylene, on the forecastle head.

When the vessel is within reasonable distance of the buoy, 2 ship's lines will be carried by the mooring launch to the floating buoy lines and secured to same, these lines will then be heaved aboard. As the buoy ropes come clear of the water it will be noted that chains are attached to them. These chains are to be secured to the bitts in such a manner that the nylon is outside of the extreme length of the ship; i.e. so that the chains will absorb any chafing if the buoy line crosses the bow. There are two buoy lines.

Power must be available at all times on deck winches and windlass while vessel is at the berth.

A mooring line must be available aft, secured to the bitts and of sufficient length to enable a tug-boat to pick up the eye and tow on it to realign the vessel if necessary. If available, a buoyant line is also preferred in this position.

CARGO: Nigerian Light Crude -API 37° approx. Temperature 85° F. (fairly steady throughout the year).

HOSES: Lifting, connecting, disconnecting, lowering and other handling of hoses will be performed by the ship's crew, as advised by the Company representative, and where possible the Company will provide a pipe-line gang to assist the ship's crew. At all times handling of hoses will be performed by the ship's crew, as advised, and a deck officer must be in attendance.

Both derricks must be rigged and ready for use on arrival and vessels are cautioned that the weight of each hose is at least 5 tons under favourable conditions. Where possible, it is requested that the derrick runner is on one winch and the topping lift on another, as this will make the hose-handling operation much smoother and faster. In any case, members of the ship's crew will be required to operate the winch or winches.

As no equipment will be supplied from the shore; it is essential that all vessels nominated for this port have an adequate supply of gaskets, nuts, bolts, spanners, tools, etc. ASA reducers for use with the Camlock connections can be supplied in an emergency in the standard sizes. Failure to have these items will lead to delay in berthing and could even lead to a situation where the vessel was not accepted by the port. Such delays would be for the ship's account.

Berth No. 2: Loading is through an SBM which is approx. 33 ft. in diameter and held in position by 4 chains secured to piles sunk into the seabed. 1×24 in. floating hose is secured to buoy and has 2×12 in. tailing pieces attached to it with 12 bolt holes ASA 150 flanges; they are also fitted with Camlock connections.

Berth No. 3: Is a larger version of No. 2 and more heavily moored with 8 chains secured to piles sunk into the seabed. There is 1×24 in. floating hose with 2×12 in. tailing pieces. These are ASA flanges with Camlock connections, similar to those at Berth No. 2.

BALLAST: *Deballasting and Loading Procedures:* Vessels proceeding to Escravos to load must arrive with sufficient clean ballast for safe manoeuvring. A vessel arriving with dirty ballast will incur costly delays as it is not permitted to discharge dirty ballast to the sea. The "Load on top" system is accepted at this port and vessels are requested to arrive with the slop tank "settled out" as far as is possible and so avoid any chance of pollution of the Terminal waters from this particular tank.

The Nigerian Government has very strong views on pollution and vessels are warned that a very careful watch is kept at all times to ensure that pollution does not take place, or that if pollution should occur it is controlled as quickly as possible.

All vessels are cautioned to keep a close watch on the floating hose (or hoses) towards the end of deballasting, as it is possible, under certain conditions of weather and tide for the hose to become trapped under the fore-foot of the vessel. Should this situation appear likely to arise vessels are requested to attempt to keep the fore-foot submerged by transfer of water or bunkers, etc. If the hose becomes foul, it must be disconnected and towed clear causing considerable delay to the vessel.

During the hours of darkness it is requested that searchlights from bridge wings and approved floodlights be used to illuminate the surrounding water to facilitate detection of oil and assist generally in loading operations. Vessels are advised that failure to supply sufficient lighting could result in cargo operations not being allowed during the hours of darkness. Such delay would be for the ship's accounts.

After the ballast tanks have been inspected and found to be satisfactory, deballasting will commence on the advice of the Company Representative. When all the ballast has been discharged, the tanks will again be inspected and if ready for cargo a dry certificate, if presented, will be signed by the Company representative. In any case, cargo will be loaded when both ship and shore are ready to commence operations. In no circumstances will the vessel be expected to load at a faster rate than that requested by the Master. It is the ship's responsibility to check that the requested loading rate is not being exceeded. The Company for their part will make every effort to maintain the requested rate and will advise of any alteration of loading rate immediately; prior warning being given if circumstances permit.

Simultaneous Deballasting and Loading: In order to reduce the turn around time at this Terminal, but with close attention to safety, vessels will be permitted to load cargo and discharge ballast simultaneously, provided that no contamination of cargo or pollution of the Terminal waters can occur. Vessels desirous of adopting this method of loading can do so, but will be required to advise the Company in writing, stating that the vessel accepts full responsibility if this method of loading results in contamination of cargo and/or pollution of the Terminal waters.

Throughout the deballasting and cargo operations, a deck officer must be on deck with sufficient crew members to safely handle the operation. Company representatives will be on board throughout to co-ordinate terminal and marine operations and will be in constant communication with the terminal by portable and/or ship's VHF sets. Before loading commences the amount of cargo required must be given to the Company Representative in writing and the Terminal will, in conjunction with the vessel, arrange to stop the flow of cargo at this predetermined figure.

THERE ARE NO FACILITIES AVAILABLE TO DISCHARGE EXCESS CARGO SHOULD THE VESSEL OVERLOAD.

The Company Representative will advise on the detailed procedure for shutting down and disconnecting, but briefly, after cargo is completed and oil has ceased to flow, loading valves on the shore and Berth Operation Platform (BOP) will be closed. Then and not before, the vessel's manifold valves may be closed.

Do not close ship's valves against incoming oil as such procedure creates excessive pressure which may damage hoses, terminal facilities, or ship's piping.

Figures taken after completion will be passed to the shore by VHF and a ship/shore difference obtained. On request, full sets of cargo papers will be prepared and delivered to the Master as speedily as possible. However the briefer form of documentation is used at this terminal, and the remainder of the documents will be forwarded by airmail. At the same time the Company will arrange clearance for the vessel.

Loading signal to be displayed is the International Code flag "B" from a conspicuous halyard during the hours of daylight. During the hours of darkness a red light visible all around the horizon at a distance of at least one mile is to be exhibited.

REPAIRS: No facilities of any kind are available at this port.

Under no circumstances are engine repairs or the immobilisation of main engines permitted within the port limits.

REPATRIATION: Not permitted except in grave emergency and then only if the person concerned holds all the necessary valid certificates and documents, e.g. valid Smallpox, Cholera and Yellow Fever Certificates.

WEATHER AND CURRENTS: Wind and swell are mostly from a South-westerly direction. The weather is generally good from November to May, but is unfavourable during the wet season, i.e. May to November. For approximately 75% of the year the current sets in a N.N.W. direction and for the remainder of the year it is reversed, i.e. S.S.E. The strength of the current varies from 0.5 to 1.5 knots, and the currents frequently reverse direction very quickly causing the vessel to yaw (swing) heavily at the berth.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: Not available except in an emergency.

STORES: Stores are not available at this Terminal and urgent spares/equipment forwarded by air can take up to three (3) weeks to clear formalities. In view of this it is essential that Gulf be advised of the airway bill number at the earliest opportunity to avoid further delays.

NATIONAL FLAG: Available from the Company.

GENERAL: In view of the exposed location of the berths, the Mooring Master and pipe-line gang will have to remain on board throughout the vessel's stay at the berth and, therefore, it will be necessary for the vessel to arrange food and accommodation for this period. A pipe-line gang will usually consist of four men, but this number may be varied at the discretion of the Company.

It is assumed that the Mooring Master will be accommodated in the Pilot Room; but where such a room does not exist on board, then accommodation equivalent to a minimum standard required for a Senior Officer is to be provided. In the case of meals, due allowance and provision is to be made for the fact that irregular hours of work by day and night may be involved.

TIME: Local time is GMT plus one hour throughout the year.

SHORE LEAVE: In view of the isolated positions of the buoy moorings (approx. 15 and 19 miles from shore) Masters are strongly advised not to grant shore leave. The weather and swell conditions could result in persons being injured either embarking or disembarking from the vessel, and in addition the boat journey will take approx. 2-2.5 hours. Should the weather deteriorate, it could mean delay to the vessel as outward clearance would not be granted until all the crew were on board the vessel. As the terminal does not own any suitable boats, it would be necessary for the vessel to charter one for shore leave purposes.

In view of the foregoing, the terminal does not recommend shore leave being granted.

AUTHORITY: Gulf Oil Company (Nigeria) Limited.

FORCADOS (Offshore Terminal): 05.10 N. 05.10 E. (See Plan Book)

DOCUMENTS:

Port Health:

4 copies Crew List.
3 copies Vaccination List.
3 copies Maritime Declaration of Health.
5 copies List of Last Ports of Call (6 weeks).
4 copies List of Animals and Birds.
4 copies Passenger List.

Customs:

1 copy Crew List.
1 copy List of Last Ports of Call (6 weeks).
2 copies List of Animals and Birds.
1 copy of Passenger List.
1 copy Stores List.
1 copy Personal Effects List.
2 copies Arms and Ammunition List.
1 copy Clearance Last Port.

Agent:
2 copies Crew List.
2 copies List of Last Ports of Call (6 weeks).
2 copies Passenger List.
Vaccination booklets for all crew members to be produced.
Deratisation Exemption Certificate to be produced.

APPROACHES: An efficient sounding machine and a high definition radar will assist in making the terminal for the first time. A heavy cluster of radar echoes from the Escravos area may be recorded on passing the 100-fathom line. On making the 20-fathom line, it is reported that the coastline from North Point to Moore Point and from South Point to Ajamabri shows on the radar screen with good chart comparison.

Once the vessel's position is ascertained and the course for Forcados adopted, the first and most obvious sighting, at night, will be that of the platform, which is marked with numerous fixed lights at several levels. The platform, which also serves as a helicopter platform, is in close proximity to the two SBM's.

PILOTAGE: Berthing Master will board vessel on arrival or at anchorage, and remains on board throughout. Contact Berthing Master on VHF Channel 8. Call sign "Forcados Pilots". *N.B.*: Also contact "Forcados Terminal" on Channel 8 immediately on anchoring to ensure that vessels arrival is recorded and that berthing turn will be in correct sequence.

ANCHORAGE: 3 miles West of or 2 miles N.W. of Production Platform in position 5° 10′ 17″ N. 5° 10′ 42″ E.

Vessels must not proceed inshore from these positions without a Pilot. When at anchor a listening watch is to be maintained on Channel 8 and this Channel must not be used for ship-to-ship exchanges.

Note: A 14-mile 48 in. pipe-line extends from the coast at South Point near Forcados to the manifold Platform and hence to the SBMs. Vessels are warned not to anchor in the vicinity of the pipeline.

RESTRICTIONS: Vessels berth at any state of tide, night or day.

MAX. SIZE: Min. size 45,000 tonnes. Max. size 254,000 tonnes. Max. freeboard during loading 60 ft. No restriction on length and beam. Max. draft 65 ft.

PRATIQUE: Health and Customs Officers board at a convenient hour come from Forcados, 20 miles distant from the buoys. Normally travel by high-speed launch, but may occasionally use helicopter.

RADIO: ETA to be given via Lagos Radio, 72 hours before arrival and re-confirm 48 hours before vessel's ETA at the terminal anchorage.

TUGS: No tugs required and none available.

BERTHING: Effected under guidance of Berthing Master and/or local assistant who both remain on board throughout loading operations. Accommodation for both to be provided. Whilst berthed a mooring rope must be ready on the poop deck so that the mooring launch (line boat) may, in the event of the vessel riding up on the SBM, make fast and tow to realign vessel.

There are two SBMs each fitted with two 15 in. nylon moorings and 1 hose string 840 ft. long with 2×16 in. end hoses. No. 1 SBM is South of platform and No. 2 is West.

Position of hose connections: Amidships port or starboard side depending on seasonal conditions. Vessels should endeavour to present 2×16 in. (400 mm.) (150 ASA) connections on arrival. Ship's crew are required to connect and disconnect the hoses under the advice of the Berthing Master and/or his assistant. A derrick, SWL at least 7 tonnes, must be rigged ready on both sides and plumbed clear of ship's side. Derrick runner must be equipped with suitable hook.

Weight of Hoses: Indication only of approximate weights 16 in. I.D. hose strings in tonnes (including fittings, floats, and pick-up buoys) with all hoses full of crude oil SG 0. 850. Assumed lift is 7.6 m. (25 ft.) above deck level, with vessel in light draft condition.

d.w.t.	tonnes
200,000	8.9
100,000	8.1
70,000	7.3
50,000	7.0
35,000	6.9

Loading: Load-on-top system operates at Forcados but slops cannot be accepted ashore. Maximum loading rates 11,000 t.p.h.

A single grade of crude oil is handled which is known as "Forcados Blend".

Shore Line System: Vessels load through SBM from shore through 48 in. line to SBM. The 48 in. submarine line to the SBM is some 14 miles in length, therefore great care must be exercised during loading when ships valves are manipulated to avoid pressure surges. Pressure recorders are normally fitted at the spool piece between ships manifold and tail end of the hose string to monitor pressure changes generated on board the vessel.

MEDICAL: No facilities for medical attendance but assistance may be given only on an emergency basis.

FUEL: Not available.

FRESH WATER: Not available.

DENSITY: Approximately 1025.

REPATRIATION: No crew changes possible.

SHORE LEAVE: Not permitted.

GENERAL:

Loading: Ships are required to load cargo as rapidly as possible by day and night in accordance with the terms of their charter parties.

This means that ships are expected to load as fast as Shell-BP can supply or they can safely receive. The question of how fast a ship can load is the responsibility of the Master having regard to his Owner's instructions, the charter party and the experience of ships' personnel. However, as further guidance, and in absence of any instructions to the contrary, ships are expected and nominations of vessels are accepted by Shell-BP on the understanding that ships will be able to accept a bulk loading rate per hour of not less than ten per cent of the summer deadweight of the vessel.

At offshore berth the Berthing Master acts as Loading Master during Loading Operations and is provided with "walkie-talkie" radios to ensure adequate ship/shore communication.

Loading Masters visit each vessel, and Masters are requested to co-operate in the completion of the Shell-BP Tanker Port Performance Time Sheet by ship and shore personnel at all Terminals. Only crude oil is handled at Shell-BP terminal, loading temperature and specific gravity of the grade of crude. Forcados Blend is reasonably constant and is approximately: 0.856 at loading temperature.

Immobilization of engines: Not permitted at SBMs. Not advisable at sea anchorages as many obstructions if vessel drags anchor.

Restrictions which may cause delays: Weather. Worst period June–September when heavy swell may be encountered.

Early departure procedure: A modified early departure procedure is in operation at Forcados offshore terminal. Masters are requested to sign all documents in blank, retaining in their possession Master's consignees copies. On completion of loading, the Berthing Master will supply Masters with a copy of the figures required for the completion of the retained documents. Masters are requested to complete these before the departure of the vessel. Customs and agency representatives will normally board vessels during daylight hours. Depending on other commitments of the offshore launch, it may be necessary to request masters to provide temporary accommodation for these officials.

WATCHMEN: Whilst berthed at an SBM, a security watch must be kept on the forecastle head by member(s) of the ship's crew throughout the hours of darkness and advise Berthing Master on the approach of local small craft.

SHIPMASTER'S REPORT: The SBM's are situated about 11 miles offshore.

Moorings: Starboard derrick topped and doubled up. If accommodation ladder rigged then on port-side. Not necessary for vessels up to 50,000 d.w.t.

Hoses: All sizes of reducers available.

TERMINAL OPERATOR: The Shell-B.P. Petroleum Development Co. of Nigeria Ltd.

LAGOS (including Apapa and Tin Can Island): 06.27 N. 03.24 E.

DOCUMENTS:
7 Ports of Call Lists.
5 Crew Lists.
5 Kroo Boy Lists.
2 Animal Lists.
2 Arms and Ammunition Lists.
9 Manifests.
2 Summaries.
1 Extra Manifest for Trans-shipment Cargo.
3 Stores Lists.
2 Crew Declaration.
2 Inward Reports.
2 N.P.A. Master's Declaration.
2 N.P.A. Ship's Particulars.
1 Customs Clearance.
1 Declaration of Health.
1 Vaccination List.

PILOTAGE: Compulsory. Hoist "G" flag. Agent to give notice of ETA to Harbour Master as early as possible. Contact Pilot by VHF Channel 16. No pilot boat stationed outside. 24 hour service available.

ANCHORAGES:

	Length	*Draft*
Pool 1	480 ft.	24 ft.
Pool 2	600 ft.	28 ft.
Pool 3	450 ft.	26 ft.
Pool 4	450 ft.	26 ft.
Badagry Creek	380 ft.	22 ft.

Vessels not permitted to remain at anchor at Pool 1 during hours of darkness due to poor holding ground.

4 vessels, maximum length 380 ft. can anchor at Badagry Creek Anchorage. Max. draft 22 ft.

RESTRICTIONS: Draft only. Vessels of more than 600 ft. LOA are not allowed to be brought into the port. Depth over bar 9.14 m. at LW.

MAX. SIZE: See "Berthing".

HEALTH: Port Health Officer boards vessel on arrival. ETA's must be advised by ship or Agent direct to Port Health. Pratique automatic when from Nigerian port. Also see "General".

RADIO: Messages routed through Lagos Radio.

Continuous VHF watch on Channel 16 maintained in Harbour Master's office. Contact Signal Station by VHF Channel 16.

TUGS: No specific joining position, depending on tide and on Pilot's request, otherwise close to berth. Normally ship's line used. 2 tugs 1,280 h.p., 3 tugs 1,490 h.p. and several smaller for towing lighters. 24 hour service available. Also see "General".

BERTHING: Cargo for Apapa and Lagos should be stowed separately on all liner ships as the Apapa wharves have rail connections to the North, and the customs wharf only receives cargo for Lagos locally.

No specific arrival time is required for berths, except for Petroleum Wharf where tankers need high water. Berthing on ebb tide required for Fish Wharf and Ijora Wharf:

Tin-Can Island Port, Lagos: Tin-Can Island Port (TCIP) is situated N.W. of Apapa, North of Badagry Creek. TCIP was opened in October, 1977 is self-contained operational unit with 5,000 kw. diesel generating station.

Accommodation: Area 73 hectares, quay length of 2.5 km. Extensive quay apron 40 m. wide with berthing capacity for 10–15 vessels depending on size of vessels.

Roll-on/Roll-off facilities: Bulk berth for handling bulk commodities. Two service berths for tugs and light crafts; quayside depth of 11.5 m. below mean Springtide water level (MSLW), although ultimate depth will be 13.5 m.

Dredged Channel is 200 m. wide with Turning Basin.

Two fresh water wells (250 m. deep) with purification plant.

Ten quayside cranes – 8 of 6,000 k. at 28 m. radius, 2 of 10,000 k. at 25 m. radius, transit sheds and warehouse each of 7,000 sq.m. area.

CRANES: 35 quay cranes from 2.5 to 5 tonnes capacity; 2 floating cranes of 50 and 100 tonnes capacity; 77 mobile cranes from 6 to 50 tonnes capacity; 307 forklift trucks; 93 tractors; 5 freight lifters; 16 conveyors and 188 trailers.

STEVEDORES: Available. First shift: 0730–1530 hrs.; 2nd shift: 1530–2330 hrs.; 3rd shift: 2330–0730 hrs. Overtime is paid for extra duty.

MEDICAL: Agents to be given advance notice of medical attention required as early as possible. Hospital facilities available. International Certificates of smallpox and yellow fever required.

TANKERS: One berth operated by the Port Authority. Length 177 m. Max. draft 7.62 m. No night berthing. Water and bunkers available. (Subject to tidal restriction).

DENSITY: 1012.

FRESH WATER: Delivery by barges at between 20 to 40 t.p.h. Advance notification needed.

FUEL: Fuel oil available, coal bunkers obtained from Ijora Wharf. A guarantee of sufficient bunker to last the period of stay on a berth will be one of the conditions to be satisfied before a vessel is allocated a berth.

FIRE PRECAUTIONS: Tankers and vessels with explosives: fireboat always in attendance with fire-control depot ashore working in conjunction with the Harbour Master on VHF Channel 16. Port area tugboats also equipped for fire fighting.

GANGWAY/DECK WATCHMEN: Advisable, available if required.

OPENING/CLOSING HATCHES: Stevedores/crew.

CUSTOMS ALLOWANCES: Tobacco allowance: 200 cigarettes per person, re-issue after 8 days. Wine/Spirit: 1 part bottle, re-issue to officers after 4 days.

IDENTIFICATION CARDS: Passports or identity cards.

CONSULS: Most countries maintain Embassies/High Commissions or Consuls.

REPAIRS: Major repairs available.

DRY DOCKS: Authority maintains large, well-equipped dockyard, which, while primarily for maintenance of Authority's own fleet, provides facilities to commercial interests. In installation is modern floating dock which has lifting capacity of 4,000 tons. Max. draft 18 ft. Synchro-lift available lifting capacity 100 tons max.

In addition to facilities offered by Authority's dockyard, major shipping agencies in port maintain dockyard installations, including slipways for raking smaller vessels and lighters; can provide first-aid repair for main line vessels.

Bull Nose – No. 1 – can accommodate a vessel of 380 ft. in length and max. draft 16 ft. 6 in.

Bull Nose – No. 2 – can accommodate a vessel of 250 ft. in length and max. draft 16 ft. 6 in.

REPATRIATION: Facilities available for effecting crew changes and arranging any necessary repatriations.

AIRPORT: Ikeja 14.4 km. from port, served by regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: Fixed: New Year's Day (1st January); National Day (1st October); Christmas Day (25th December); Boxing Day (26th December). Variable: Good Friday; Easter Monday; Eid-El-Fitir Festival; Eid-El-Kebir Festival; Maolud Nabiyyi (Mohammed's Birthday). Port closed on National Day, Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: Police Apapa 45798, Lagos Custom 20030; Ambulance Apapa 41341/227; Fire Apapa 41741, Lagos Custom 20777, General Emergencies 199.

TELEPHONES: No arrangements for telephones on board.

SERVICES: Small services available.

SHORE LEAVE: Crew members allowed ashore after clearance by Port Health and Immigration Authorities.

DEVELOPMENTS: *3rd Wharf Extension*: There is a 1,500 m. long quay under construction with 6 berths, some for container traffic and Ro/Ro.

GENERAL: Notice issued by the Harbour Master in May, 1976: Will all ships' Agencies note that from the date of this circular letter, Lagos Radio has been instructed to reject any telex messages from any ship addressed to the Harbour Authority unless the itemised particulars are included:

(a) Ship's name.
(b) Ship's call sign.
(c) Ship's Agent's name.
(d) Ship's length overall.
(e) Ship's tonnage loaded.
(f) Ship's draft.
(g) Nature of cargo (i.e. cement, general cargo, etc.).
(h) Last port of call.

Notice issued by the Nigerian Federal Ministry of Health in May, 1976:

Please communicate to all Masters that request for radio pratique either by international sanitary codes or otherwise must state clearly the following:

(a) Last port of call;
(b) number of crew;
(c) vaccination and inoculation of crew;
(d) date and time of arrival;
(e) condition of ship;
(f) number of passengers onboard;
(g) name of Agent.

AUTHORITY: Nigerian Ports Authority.

AGENT: Alraine (Nigeria) Ltd., 26 Creek Road, Apapa, Lagos. P.O. Box 265. Tel. 47 770. Cables "Freight Lagos". Telex 21244.

PENNINGTON OFFSHORE TERMINAL:

04.15 N. 05.36 E. **(See Plan Book)**

All vessels required fly Nigerian Ensign on foremast.

OPERATORS: Texaco Overseas (Nigeria) Petroleum Company.

LOCATION: The floating storage vessel, designated as "Special Purpose Vessel (SPV) 367001", is a 367,000 barrel storage hulk fabricated from the forebodies of 2 tank vessels and is approximately 740 ft. in length. The SPV is moored to SPM-A, one of two single point mooring berths:

1. SPM-A is located approximately 20 miles off the mouth of Fishtown River in a position
Lat. 4° 14′ 35.2″ N.
Long. 5° 36′ 53.2″ E.

2. The Export Tanker Buoy (SPM-B) is capable of accommodating vessels up to 250,000 d.w.t. and is located at
Lat. 4° 15′ 0.0″ N.
Long. 5° 36′ 10.5″ E.

on a bearing of North 60° West and a distance of approximately 5,000 ft. from SPM-A. The minimum water depth at SPM-B is approximately 88 ft.

APPROACHES: Incoming tankers should make their terminal approach from a westerly direction to a point not less than 2 miles seaward of the Export Tanker Berth. At this location the Mooring Master will board the vessel.

DOCUMENTS: Following documents required by Customs and Health Officials.

Last Port Clearance.
1 copy Vaccination List.
1 copy Stores List.
1 copy Crew Declaration.
4 copies Crew List.
4 copies Passenger List.
4 copies Animal List.
4 copies Ports of Call (last 6 weeks).
2 Arms and Ammunition List.
24 copies Notice of Readiness.
24 copies Dry Tank Certificate.
24 copies Ship's Ullage Report.

Government officials representing various departments may, at their discretion, board the vessels in the Terminal area.

PILOTAGE: (see "Approaches") The Company Mooring Master, together with Customs Officials will board incoming vessel about 2 miles seaward of the Terminal Export buoy. Vessel's Master will be advised on approach to the berth details in respect of mooring, unmooring, connecting and disconnecting hoses, loading operations and departure from the berth.

Vessels requested to have pilot ladder safely and securely rigged for immediate use, and long enough to reach the Mooring Master's launch. A light line should be ready to take on board the Mooring Master's radio and/or briefcase.

The Mooring Master will remain on board during loading operations and he will be in direct control of all ship communications while in Terminal area.

MAX. SIZE: Max. d.w.t. 250,000 tons.

RADIO: All vessels to be loaded at the Terminal must cable ETA to "Topcon, Lagos", 96 hours and 24 hours prior arrival. The Company in Lagos will then notify Senior Mooring Master on board Special Purpose Vessel.

Ship to "SPV 367001" communication, while vessels are in the export tanker berth will be by portable VHF radio-telephone units, provided by Terminal . The Company Mooring Master will advise ship's Master regarding emergency whistle signals set up for use in event radio-telephone units become inoperative. Use of ship's radio station and/or battery charging is prohibited while loading is in progress.

VHF: As soon as possible prior to arrival, vessels should establish direct communication with the Terminal (SPV 367001) on VHF International Calling Channel 16 (156.8 mHz).

TUGS: *SPM Vessels:* The Terminal will have available 2 line handling vessels and one SPM-Hose maintenance vessel. These 3 vessels are under the control of the Mooring Master and are used to assist the mooring of the Tanker as required. These service vessels are not available to the Tanker for any other work.

READINESS: The Company will make every effort to load vessels upon arrival, or as promptly as berth is available, weather permitting.

"Notice of Readiness" will be accepted as at time of arrival, provided vessel is in all respects ready to load. Arrival time will be considered as at time Mooring Master boards vessel, or time vessel anchors off the terminal, which ever occurs first.

Mooring Master may reject a vessel if in his judgment she is not properly equipped or suitably manned, or if, upon inspection, he deems her to have dirty ballast or tanks unsuitable for cargo. However, Company will not issue any certificate or representation purporting to state that vessel's tanks, pipes and pumps and appurtenances are clean or acceptable for receiving cargo nor will the Company assume any responsibility for "contamination of cargo aboard ship caused by condition of ship's tanks, pipes, pumps or appurtenances".

The vessel shall have in readiness 2 nylon ropes with a minimum diameter of 2 in., each approximately 200 ft. long and each terminated with 2×2.25 in. joining shackles to attach and retrieve the SPM mooring lines.

Vessels must be adequately equipped with blocks, tackle and booms to hoist the floating hose string in a safe, efficient and expeditious manner. Vessels must also have an adequate supply of nuts, bolts, gaskets and wrenches to connect cargo hoses system.

BALLAST: Absolutely no provision is made for dirty ballast. Vessels with dirty ballast will be rejected and all costs therefrom will be to the vessel's account.

It is the Ship Master's responsibility to see that no oil or oily ballast is pumped or spilled overboard. Drip pans must be used at all times and all scuppers must be plugged. The waters in and adjacent to the Terminal must not be polluted, and only clean oil-free ballast and/or bilge water may be discharged at the Terminal.

As soon as practicable after arrival, and prior acceptance for loading, all vessel's tanks will be inspected for evidence of oil in ballast, and during discharge of ballast, similar inspections will continue. If evidence of oil appears at these inspections, the vessel may have to vacate berth. Upon return, vessel will be obliged to tender new "Notice of Readiness".

If, during first inspection or during process of loading it is revealed that vessel's tanks are not oil-tight, she will be rejected, or refused further loading.

In addition to lights usually displayed, vessels discharging ballast or loading cargo during darkness will illuminate area around the ship to satisfaction of Mooring Master, in order that any oil on the surface of sea may readily be detected and appropriate action taken. Vessels unable to illuminate sea satisfactorily may not discharge ballast during darkness. Vessels should provide suitable floodlights for working on deck during night operations.

In the event any vessel should accidently discharge dirty ballast or spill oil in the vicinity of the Terminal, the Company shall have the right to take any action that may be necessary to clean up or remove any contamination or pollution resulting from such discharge of dirty ballast or spillage. In addition, the Company shall have the right to settle any claims of third parties arising from such contamination or pollution. All costs and expenses incurred by the Company to carry out the cleaning up of such contamination or pollution or the settlement of third party claims, shall be the joint and several liability of the Vessel, its Owners and Managers, and the Company shall be entitled to claim reimbursement accordingly in any jurisdiction.

Vessels properly equipped will be encouraged to discharge clean ballast and load simultaneously.

BERTHING: All manoeuvring within loading berth area is to be done only in accordance with advice of Company Mooring Masters, subject to understanding that in all cases and circumstances Master of vessel being manoeuvred shall remain solely responsible for safety and proper manoeuvring. Vessel's Master or a qualified Deck Officer must be on bridge at all times during manoeuvring.

EXPORT TANKER BERTH FACILITIES: The Export Tanker Buoy is a conventional SBM which is 10 m. in diameter and held in position by 6 chains secured to piles sunk in the seabed. Two mooring hawsers and a single floating hose string extends from the buoy.

CONNECTING MOORING LINES: When the Vessel is within reasonable distance of the SPM-B, 1 ship's line will be carried by a line handling launch to the floating buoy line and secured. This line will then be heaved aboard. As the buoy ropes come clear of the water it will be noted that chains are attached to them. One chain is to be secured to the bits in such a manner that the nylon is outside of the extreme length of the ship; i.e. so that the chain will absorb any chafing if the buoy line crosses the bow. There are 2 buoy lines. Power must be available at all times on all winches and windlass while Vessel is at the berth.

LOADING: During loading, the International Code Flag "B" shall be displayed from top-mast signal halyard during daylight hours. During hours of darkness, a red light shall be displayed, visible at a distance of at least 1 mile, and showing unbroken light all around the horizon.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by vessel's crew under direction and supervision of an appropriate vessel's Officer as advised by the Mooring Master, who will remain on board while the vessel is in moorings.

After vessel securely moored the floating hose will be lifted to rail amidships. The weight of the lift is approximately 5 tons and is lifted with vessel's gear on starboard side. The Mooring Master advises vessel's personnel in the lifting, connecting, disconnecting and lowering of the hose system. A vessel's Deck Officer must be present, and direct the crew in all hose handling. There must be sufficient crew on deck to perform this work.

The vessel's Master is responsible for own vessel at all times. The max. loading rate is about 15,000 b.p.h. and Company mooring Master will advise in respect to loading pressures and hazards, but will not direct loading except as may be necessary to protect Terminal facilities. Manipulation of vessel's valves is direct responsibility of vessel's personnel.

Prior to commencement of loading, Chief Officer will assure the Mooring Master that sea suction valves are *closed* and he will make note to that effect in Mooring Master's log before cargo loading started. Final ullaging and computation of cargo will be done by an Officer of the vessel who will hand this information to Mooring Master for transmittal to Officer in charge on board "SPV 367001" for use in comparing metered-out cargo.

Caution. – The incoming oil stream is controlled on board the "SPV 367001" and it is extremely dangerous to close a cargo valve against the incoming stream. Such a procedure creates excessive pressure, which may damage hoses, piping or Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Emergency Signal. – When normal ship-to-"SPV 367001" communications fail, the emergency signal to stop the flow of oil will be a continuous blast on the whistle until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations will be shut down until communications can be re-established.

Terminal Stops. – Request for the Terminal to stop the flow of cargo at a predetermined tonnage must be made in writing. Requests must include statements that the Company will not be held responsible for any error and in case of overloading, the excess cargo cannot be pumped back to the "SPV 367001". Some delays are always incurred when such a shore stop request is made.

SAFETY: Vessel's personnel responsible for safety of vessel, and must take all necessary precautions whether or not so advised by Mooring Master. Any safety precautions imposed by Company Mooring Master, and so disregarded by ship's Officers or Crew, will be considered just cause for rejection of vessel and all expenses and liabilities related thereto will be for account of the tanker.

Not less than 1 Deck Officer and 3 seamen shall be available on deck at all times while vessel in moorings.

Power must be available at all times on deck winches and windlass while vessel in moorings.

Presence of unauthorized craft alongside is extremely hazardous and Masters are requested to require all unauthorized craft to clear vessel's side prior to ballast pumping and cargo loading.

Mooring Masters are authorized to shut down loading operations during severe electrical storms, if another vessel or craft of any description comes alongside the loading vessel, and under any other circumstances which imperil loading operations.

MEDICAL: Medical assistance on an emergency basis only.

REPAIRS: No facilities of any kind are available. Pennington Offshore Terminal is considered an open roadstead and under no circumstances may engines be shut down for repairs while a vessel is moored in the Export Tanker Berth. The Vessel must be able to depart from the berth immediately on instructions to do so.

WEATHER/CURRENTS: Wind and swell are mostly from a Southerly direction. The weather is generally good from November to May but is unfavourable during the wet season months of May to November. The currents are irregular and at times strong. The Mooring Master will provide the Master with this information when boarding the vessel.

FRESH WATER: Not available.

FUEL: Not available.

STORES: Not available.

REPATRIATION: Not permitted except in grave emergencies.

SHORE LEAVE: Not permitted.

GENERAL: Cargo inspection services are available from E. W. Saybolt and Co. S.A. who have offices in Lagos. The use of this service will be for account of vessel or Consignee.
AGENCY: The Company does not perform general agency functions. Owners of vessels calling at the Terminal may arrange for their own Agents, although due to the location of the Terminal there are no Agent's offices in the area. For this reason the Company will arrange for the minimum agency service necessary to document and clear vessel and export cargo through Nigerian Customs. Costs of this Agency service will be charged back to appropriate parties.

PORT HARCOURT (incl. Okrika): 04.46 N. 07.00 E.

DOCUMENTS:
9 Crew Lists.
9 Passenger Lists.
6 Arms and Ammunition Lists.
6 Livestock Lists.
7 Ports of Call Lists.
2 Bonded Store Lists.
3 Vaccination Lists.
10 Manifests.
2 Bills of Lading.
2 Crew Declaration (Special Lists).

PILOTAGE: Compulsory from Bonny Fairway buoy, 24 hour service. The Pilot Station for Port Harcourt is at Bonny, 15 miles from Fairway Buoy, 28 miles from Port Harcourt. The Harbour Master keeps watch on VHF Channels 16 and 14 and on 2182 from 0700 hrs. to 1800 hrs. As there presently is no radio station at Port Harcourt Masters should cable their Lagos Agent with a 48 hours ETA asking the Lagos Agent to pass the information to Port Harcourt. Pilot boards at Fairway Buoy from pilot-cutter green hull, stone colour superstructure.

Position of Fairway Buoy: 4° 12′ 56″ N., 7° 00′ 28″ E.

It should be noted that Bonny is an Oil Terminal and as such heavy traffic of tankers is continuous. In extreme circumstances vessels may be requested by Harbour Master to pass the channel from Fairway Buoy at Bonny, and anchor at Bonny without a Pilot, in which case latest Notices to Mariners should be studied in order not to damage oil pipe-lines in prohibited anchorage areas.
ANCHORAGES: Position West of Fairway Buoy, depths 8–9 fathoms.
RESTRICTIONS: Night pilotage available for tankers at Bonny only. Vessels for Okrika and Port Harcourt can only navigate during daylight.

Bonny channel is 11.73 m. deep and Okrika is 9.14 m. deep at Chart Datum.
MAX. SIZE: Max. draft is 7.62 m. at HW, minimum depth in approaches 5.49 m. Datum. Max. length 600 ft., no restrictions on beam. Ebb tide reaches a max. of 3 knots off the berths and 2.5 knots in the river, flood tide 2.5 knots off berths and in the river.

Berth No.	*Length (m.)*	*Max. Draft (m.)*	*Remarks*
1	158	7.92	
2	158	7.92	
3	158	7.92	
4	110	7.92	
5	128	7.92	
6	134	7.92	
7	134	7.92	
8	137	7.62	Coal berth with conveyor to storage hoppers.
9	143	7.62	B.O.P. berth for loading palm oil by direct pipe-line and unloading explosives.
10	137	6.71	Kidney Island.
11	137	6.71	Timber Buoys.
12	107	6.55	Pool Anchorage.
Lighter Berth	8	1.83	
Tanker Buoys	244	6.71	

HEALTH: Q-flag to be shown on arrival, except if from another Nigerian port, Yellow fever and smallpox inoculations compulsory. In case of suspected disease on board, advance notice to Agent advisory.
TUGS: One tug available, 1,490 h.p.
BERTHING: *Main Quay:* The main Quay is 3,459 ft. long and capable of berthing 7 vessels.

The old quays at Port Harcourt have been completely reconditioned to enable them handle bigger ships. Dredging in front of these quays is in progress and when completed ships with drafts of up to 29 ft. will be able to use these berths.

B.O.P. Berth. This berth lies outside the Quay area, and is for the loading of palm oil by means of a direct pipe-line from the installation of Bulk Oil Plants (Nigeria) Limited. It consists of a central "T" jetty with dolphins and is capable of berthing vessels up to 480 ft. in length. It is also used for the discharge of explosives as such cargo is not permitted to be handled across the general cargo Quay.

Oil is supplied by a 6-in. diameter pipe at a maximum rate of 250 t.p.h.

Okrika Oil Refinery: Okrika lies on the Bonny River, 56 km. from the sea. The approach over the bar is by a channel 12.8 km. in length, dredged to a depth of 11.58 m. Chart Datum. The river from Bonny to Okrika has been dredged as necessary to a depth of 8.84 m. Chart Datum. The bar channel and river are well buoyed with light buoys, port and starboard. There are also beacons in the river. Jetty at the oil refinery suitable for berthing coastal and ocean tankers up to 33,000 d.w.t. The jetty is "L" shaped with a square dolphin at the end of the arm. Ocean tankers secure on the outside of the jetty making fast to two sets of mooring dolphins each end. The coastal vessels and barges are berthed on the inside of the jetty. Oil is supplied via gantry hoses on either side.

Max. draft limit for tankers sailing from port 9.75 m., draft for berthing 7.92 m.

Fresh water available from the jetty.

The tug based at Port Harcourt is available if required.

Pilotage is compulsory from the Fairway Buoy to the Refinery Jetty except for Naval vessesl and vessels of less than 1,000 tonnes whose Master holds a licence issued by the Nigerian Ports Authority. All vesels using the Refinery Jetty will berth and unberth on the flood tide only during daylight hours until further notice.

Radio message for vessels proceeding to Okrika are sent to Port Harcourt Radio after initial contact with Bonny Radio.

Coal handling facilities: Facilities for loading coal have been completed and a conveyor capable of loading about 60 t.p.h. is working. Max. draft at the coal berth is 7.62 m. This berth is situated at the Northern end of the Port, berth No. 8.
STEVEDORES: Gang requirements and hatch distribution should be included in 48-hours ETA cable to Agent. Discharging general cargo 8 tons per gang/hour, cement 15 tons per gang/hour, bagged cargo 20 tons per gang/hour, loading produce 15–20 tons per gang/hour.
MEDICAL: Doctors available 24 hours, but limited supply of medicaments. Yellow fever, cholera and smallpox vaccination required.
DENSITY: Appx. 1015.
FRESH WATER: No restriction, from barge (15 ton/hour). From quay low pressure, max. 8 ton/hour.
FUEL: Most standard lubricants available, fuel available by barge only. Requirements by 48-hours ETA cable.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Normally by crew.
CUSTOMS ALLOWANCES: 200 cigarettes per man per 7 days. 1 wine or 1 bottle spirits per officer per 7 days.
IDENTIFICATION CARDS: Crew to carry passport or seaman's book whilst ashore.
REPAIRS: Only very minor repairs available, no spares.
REPATRIATION: Possible via Lagos.
AIRPORT: Port Harcourt 11.2 km. from port. Twice daily flights to Lagos, no international flights.
TIME: GMT plus 1 hour, no changes during the year.
HOLIDAYS: See "Lagos".
POLICE/AMBULANCE/FIRE: All can be contacted by tel. 999.
SHORE LEAVE: Allowed provided crew carry passport or seaman's book.
DEVELOPMENTS: Four berths are planned on a new site at Port Harcourt.
SHIPMASTER'S REPORT: 1977.
The ETA for this port should be sent via Lagos Radio, but much earlier than 48 hours. Better as soon as possible, for communication between Lagos and the out-ports is poor.

The normal practice at the moment is that the Master enters the Bonny River himself after permission from Bonny Harbour Master. The anchorage position on Bonny roads is given by Harbour Master and vessel can proceed as far as buoy 1A. (A few miles up Bonny River).

Discharging at Port Harcourt not only occurs alongside, but from Dawes Island upwards to Port Harcourt. Ships are discharged while laying at anchor. No buoys available. The cement cargo ships especially are discharged this way.

At Dawes Island the Bonny River Pilot leaves the ship and is replaced by a Port Harcourt Pilot.

Tugs are not available for mooring.
AUTHORITY: Nigerian Ports Authority.
AGENT: Alraine (Nigeria) Limited, PO Box 622, Port Harcourt, tel. 8059, 8062, 8053. Telex Freight Lagos 21244 attention – Port Harcourt.

QUE IBOE: 04.20 N. 07.59 E. (See Plan Book)

LOCATION: The Terminal is located on the Eastern side of the estuary of the Que Iboe River in approximate position Latitude 4° 33′ 00″ N., Longitude 7° 59′ 30″ E.

The crude oil storage facilities consist of seven tanks each of 500,000 barrels capacity.
DOCUMENTS:
Crew Lists with passports and Certificates of Vaccinations available for inspection.
Stores List.
Crew Personal Effects List.
Manifest of Cargo.
Arms and Ammunition List.
List of Animals.
List of Ports of call during last 21 days.
If the vessel has a clearance for another port the deviation cable has to be shown to the Customs Officer.

PILOTAGE: Vessels loading at Que Iboe will be boarded by a Company Mooring Master either at the anchorage or where directed.

The Mooring Master will advise the ship's Master in regard to the approaches to the berth; and the mooring, unmooring, connecting, disconnection of hoses, departure from the berth and loading operations.

All vessels must have upon arrival a pilot ladder in good, clean condition safely and securely rigged. A vessel arriving with freeboard of 30 feet or more must use its accommodation ladder in conjunction with the pilot ladder unless a "pilot hoist" or similar arrangement is available.

In the event that a vessel is deemed by the Mooring Master to be improperly or insufficiently equipped with adequate mooring facilities, lines or gear, then he shall so inform the ship's Master. In such an event the vessel will not be brought into the mooring until satisfactory gear or equipment is provided.

ANCHORAGE: Numerous submarine pipe-lines and structures exist in the approaches and close vicinity of the loading berths.

Under no circumstances whatsoever should vessels anchor except in the approved anchorage described below.

The safe Anchorage Area is located two (2) miles Southeast the Berth operation platform (BOP) and clear of the SPM between the parallels of Latitude 4° 10′ North and 4° 13′ North and meridian 8° 03′ East and 8° 07′ East. Vessels bound for the Que Iboe Terminal should proceed with extreme caution from the Southeast to the safe Anchorage Area. If uncertain of the vessel's position because of poor visibility stay Southeast and clear of the safe Anchorage Area until visibility is good.

HEALTH: Pratique may be granted by radio (Lagos Radio). Quarantine officials board vessel at the berth.

MAX. SIZE:

Berth	Length	Beam	Draft
No. 1 (SM)	850 ft.	No Limit	45 ft.
No. 2 (SPM)	No restriction	No Limit	75 ft.

RADIO: Vessels proceeding to load at Que Iboe must radio:

1. MOBIL OIL, Lagos indicating their cargo requirements and ETA 5 days prior to arrival. When their passage time is such as to not permit a 5-day ETA then the maximum possible advance notice of arrival and cargo requirements must be given.
2. MOBIL OIL, Lagos, confirming or amending the ETA given in (1) above at 72 hours and 24 hours prior to arrival.
3. The Nigerian Government Port Health Officer at Lagos at least 72 hours before arrival advising the following:
   - (a) Vessel's name and call sign.
   - (b) ETA Que Iboe
   - (c) Approximate cargo tonnage to be loaded
   - (d) Number of crew and whether healthy or not
   - (e) Whether or not a doctor on board
   - (f) Requesting free pratique.

If the request for free pratique is granted the Port Health Officer will so advise th vessel by radio.

In addition, as soon as possible prior to arrival vessels should establish direct communication with the Terminal ("Que Iboe Control") on VHF international calling Channel 16 (156.8 mHz). After initial contact communication will continue on Channel 14 (156.7 mHz).

Vessels not equipped with VHF R/T equipment or whose equipment is not fully functional should advise MOBIL OIL, Lagos, at the time of their ETA messages previously referred to.

The (BOP) Berth Operation Platform is fitted with a racon and transmits the Morse signal "K" (—·—). All vessels equipped with 3 cm radar will be able to pick this up on their radar screen.

TUGS: None. Terminal launches assist in berthing.

BERTHING: The tanker loading facilities consist of two berths: No. 1 Berth: A 7-point spread mooring (SM) located in a position Latitude 4° 20′ 19″ N., Longitude 8° 00′ 11″ E., approximately 12 nautical miles South of the terminal tank farm. Depth of water at the manifold 65 feet.

No. 2 Berth: A single point mooring (SPM) buoy located in a position Latitude 4° 13′ 05″ N., Longitude 8° 02′ 45″ E., approximately 19.4 nautical miles S.E. of the terminal tank farm. Depth of water at the manifold 85 feet.

Vessels loading at Que Iboe will normally berth at the SPM. From time to time and at the discretion of the Mooring Master vessels of up to 80,000 SDWT will be berthed at the Spread Mooring.

All vessels must be adequately provided with bollards or cruciforms and suitable leads to facilitate the hanging off of the hoses during the lifting operation. All vessels loading at Que Iboe must have two bower anchors and a minimum of 10 working shots of chain attached to each anchor.

All vessels must be equipped with adequate on-deck and overside lighting. A spotlight should be rigged on the bridge when berthing during the hours of darkness.

To assist in the vessel's turnaround, tankers should have all booms and cargo gear rigged on the port or starboard side as advised by radio from the Terminal before the ship is boarded by the Mooring Master.

Berthing Requirements: No. 1 Berth. Vessels of less than 80,000 Summer d.w.t. should be equipped with booms, cranes or derricks to safely lift 12 inch and 16 inch I. D. hoses from a 65 ft. water depth. Submarine hose taken aboard on the starboard side.

Vessels must have at least eight (8) good ropes, preferably non-stretch synthetic lines, at least 120 fathoms in length. Three of the eight lines should be prepared at the after end of the main deck forward of the poop in the following manner: one line on each side of the ship and one in the centreline with the ends of the centre rope married to the inboard ends of the port and starboard ropes so that if necessary a double or treble length can be run on either side of the ship without delay. The other five ropes should be located on the poop deck. The use of nylon or other mooring lines having a high stretch factor should not be used in this berth.

Mooring buoys No. 2, 4 and 6 are provided with preventer wires. These preventer wires are to be taken aboard and secured as directed by the Mooring Master.

Anchor buoys should be attached to the bower anchors.

Berthing Requirements: No. 2 Berth. All vessels proceeding to the SPM must secure their anchors with chain stoppers or compressors. Floating hoses taken aboard on the port side.

The moorings have been designed in general accordance with the recommendations of the SPM Forum. The mooring lines consist of two 15 inch braided polypropylene strops each 160 ft. long.

In order to have the mooring lines aboard, the vessel should have ready on the forecastle a rope messenger at least 5.5 inches in circumference and a minimum length of 120 fathoms. The messenger is led through a fairlead, large enough to permit the entry of a 4.25 in. dia. chafing chain, on port side or centre line down to the water clear of the ship's bow. This messenger should have a good lashing attached to the eye.

The Terminal Launch crew then make this fast to a 300 ft.×10 in. plaited polypropylene buoy approach or pick up rope and then the ship is hove steadily towards the buoy until the chafing chain lies across the fairlead. The chafing chain then will be shackled to a heavy wire strop, which has been placed over a suitable set of bitts. The wire strops and shackle are provided by the Terminal and put on board as the ship approaches the buoy.

HOSES: *Tanker on Light Draft: Weights of hose strings for multi-buoy moorings:* Indication only of approximate weights of hose strings in *long tons* (including fittings) with all hoses full of crude oil S.G.0.850. Assumed total lift 25 ft. above deck level.

Water Depth in Berth (feet)

Size of Tanker	16 in. I.D.	70 ft.	60 ft.	12 in. I.D.	70 ft.	60 ft.
100,000 d.w.t.	Hoses	8.6	8.4	Hoses	5.1	5.0
70,000 d.w.t.	,,	7.8	7.6	,,	4.6	4.5
50,000 d.w.t.	,,	7.7	7.4	,,	4.5	4.4
35,000 d.w.t.	,,	7.5	7.2	,,	4.4	4.3
18,000 d.w.t.	,,	6.7	6.4	,,	3.9	3.8

Tanker on Light Draft: Weights of Hose strings for SPM: Indication of hose strings approximate weights of hose strings in *long tons* (including fittings and floats) with all hoses full of crude oil S.G. 0.850. Assumed total lift 25 ft. above deck level.

	Inside Diameter of Hoses	
Size of Tanker	16 in.	12 in.
200,000 d.w.t.	8.8	5.2
100,000 d.w.t.	8.0	4.7
70,000 d.w.t.	7.2	4.2
50,000 d.w.t.	7.0	4.1
35,000 d.w.t.	6.8	4.0
18,000 d.w.t.	6.0	3.6

LOADING: The Mooring Master will inspect the vessel's cargo tanks and will sign the dry certificate prior to the commencement of loading.

Hose connection and disconnection must be carried out by the ship's crew under the supervision of a suitable qualified Officer acting on the advice of the Mooring Master.

Ship's loading manifolds should be prepared for two 12 inch hose connections prior to arrival at the Que Iboe Terminal. Sundry equipment should include tools to connect the hoses, nuts, bolts, gaskets and rope strops as none of these items are supplied by the Terminal. All 12 inch hoses have ASA flanges.

The Notice of Readiness will be signed by the Mooring Master on behalf of the Company. The time for giving the Notice of Readiness is the time of the vessel's arrival at the usual anchorage, or the time of boarding of the Mooring Master, whichever is the earlier. Notice of Readiness will not be accepted unless the vessel is ready to load.

Loading rates will vary according to conditions but can be expected to be up to 30,000 bbls per hour at the Spread Mooring and up to 65,000 bbls. per hour at the SPM.

Information as to the anticipated loading rate should be obtained from the Mooring Master who will also advise the expected specific gravity and loading temperature.

The maximum possible notice in regard to slowing the loading rate for "topping off", etc. should be given to the Mooring Master.

Pressure Surges: Because of the long lengths and large diameters of the pipe-lines, ships' loading valves must not be closed against the flow of oil. Vessels provided with mechanically or hydraulically operated valves whose closing time is less than thirty seconds must advise the Mooring Master accordingly. In such circumstances the loading rate may have to be reduced.

BALLAST: There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Masters are required to sign oil pollution advice form letters on arrival. If a vessel is observed to be discharging dirty ballast, then it may be liable to prosecution or penalty and all further discharge will cease. The discharge of oil from bilges or other spaces is similarly strictly prohibited.

A vessel must have sufficient ballast for safe manoeuvring into the berth.

FRESH WATER: Not available.

FUEL: Not available.
STORES: Not available.
MEDICAL: Only emergency medical facilities.
TIME: Nigerian local time is GMT plus 1 hour throughout the year.
CUSTOMS ALLOWANCES: 200 cigarettes per man. Beer, no limit. 1 bottle of spirits, officers only.
REPATRIATION: Crew changes not possible.
GENERAL: *Agency:* The Company will handle documentation requirements for vessels loading at the Terminal. It does not carry out general vessel agency functions.

Early Departure Procedure: The Early Departure Procedure will be used at the Que Iboe Terminal.

Courtesy Ensign: All vessels must exhibit the Nigerian National Ensign from the foremast or as appropriate while in the vicinity of the moorings.

"B" Flag: During loading, the International Code Flag "B" must be displayed from a topmast signal halyard during daylight hours. During hours of darkness a red all around light must be displayed where it can best be seen.

Communications at the Berth: The primary system of communication with the Terminal while in berth shall be through the Mooring Master by means of portable VHF units provided by the Company.

Safety Precautions:

(a) The ship's engines must remain ready with full power for immediate use. No repairs of any sort will be permitted in the moorings.

(b) Fire Fighting equipment shall be in instant readiness throughout the vessel and additional extinguishers available at the loading manifold. Fire hoses must be connected at all fire stations and ready for immediate use.

(c) Not less than one deck officer and three seamen shall be available on deck at all times while vessel is in moorings.

(d) Power must be available at all times on all deck winches and on anchor windlass while vessel is in moorings. Vessels moored to SPM will be required to go astern when using turning gear.

(e) All deck scuppers must be plugged tight before connecting the submarine and deck hoses, and remain plugged until all hoses are disconnected.

(f) Adequate deck lighting must be available for night mooring and loadings. A good floodlight will be required to illuminate the area around the submarine and cargo hose connections during cargo loading operatings. During the discharge of ballast and loading of cargo at night, the sea area around the vessel must be adequately lighted.

(g) No transistor radio sets or other electrical appliances may be used on deck unless certified for use in hazardous petroleum areas.

(h) Smoking will not be permitted on deck whilst in the moorings and will only be permitted in places approved by the Mooring Master. All alleyway doors to passageways, leading to deck areas are to be kept closed during cargo transfer operations.

(i) The I. O. T. T. S. G. Check List will be used jointly by vessel's staff and Mooring Master in order to arrive at a mutually agreed safety standard.

AUTHORITY: Mobil Producing Nigeria, Lagos.

SAPELE (incl. Koko): 05.55 N. 05.42 E.

PORT LIMITS: Escravos Fairway Buoy.
DOCUMENTS:

Crew List.
Port of Call List.
Passenger List.
List of Arms and Ammunition.

These documents required by Following Government Departments: Collector of Customs, Customs Preventive Service, Ports Health Authority, Police Authority/Immigration, Nigerian Produce Marketing Co., Nigerian Ports Authority NPA also require Inward and Outward Masters' Declarations Manifests, Bill of Lading, etc.
PILOTAGE: Not compulsory, but local river guides available at Escravos on request.
ANCHORAGES: No laid-down areas.
RESTRICTIONS: None under normal conditions.
MAX. SIZE: Max. permissible length 239.57 m., draft 16.5 ft. plus tide for the day, minus Master's underkeel clearance.
HEALTH: Normal International Regulations, but between ports in Nigeria nothing required.
RADIO: ETA and ETD best passed via Lagos Radio to Lagos Agents, who in turn advise local Agents. Port Authority operate VHF Channels 16, 14, 13, 12, 11 and 9.
TUGS: None available.
BERTHING: Mooring/unmooring normally done in daylight hours.
Sapele:

Koko: One wharf length 137.16 m., depth 7.315 m. Also see "Shipmaster's Report".
STEVEDORES: Handled by Shipping Agents.
MEDICAL: Local general hospital.
TANKERS: Only small coastal tankers.
DENSITY: River water almost fresh at all states of tide.
FRESH WATER: None available.
FUEL: None.
GANGWAY/DECK WATCHMEN: Supplied by Shipping Agents.
OPENING/CLOSING HATCHES: Either by crew or stevedores.
CUSTOMS ALLOWANCE: (Tobacco/wine allowance): 200 cigarettes per person per week. 1 bottle per officer per week.
CARGO GEAR: No extra requirements.
IDENTIFICATION CARDS: Seamen's identity card.
CONSULS: None.
REPAIRS: No facilities.
DRY DOCKS: None.
REPATRIATION: By road to Lagos/Benin and international airways.
AIRPORT: Benin 52 km., internal only.
TIME: GMT plus 1 hour.
HOLIDAYS: Port closed only Christmas Day, Good Friday and Republic Day.
POLICE/FIRE: Police Sapele 19. No fire service.
TELEPHONES: No facilities exist for placing on board.
SERVICES: None.
SHORE LEAVE: Allowed.
DEVELOPMENTS: There is a proposal for a development of a new Port with 6 berths (Wharf) of 250 m. There will be increase in draft after the completion of the Port.
SHIPMASTERS REPORT: 1977 (Koko).
Documents: Livestock list also required.
Pilotage: Request Creek Pilots through Escravos Pilot on VHF Channel 16. The Pilots are local fishermen and race each other to the vessel to offer their services. They will not proceed beyond the breakwater. Special care must be taken when entering, as many of the buoys are out of position.

A strong NW'ly current runs by the breakwater, also there is a heavy swell which makes steering difficult.

Draft varies but seems to be not less than 18 ft. at LW, to 24 ft. HW. In Escravos not only a Pilot boards the ship but a helmsman too. The latter is quite useful especially in the narrow part of Nanacreek.

Koko has a VHF station Channel 16 for port operations.

Cargo shed capacity is insufficient, so more often than not this shed is full and cargo is discharged into "direct delivery". But because of the bad infrastructure of this port and the frequent lack of lorries, this discharge is a slow operation (sometimes less than 100 tons per day).

Ships waiting for berthing at Koko can anchor downstream or upstream of the berth. The anchorage is good and the "creekpilots" stay on board, i.e. they stay till the ships return to Escravos, where they boarded.
Repatriation: By road to Warri and there by small plane to Pt. Harcourt or Lagos.
AUTHORITY: Nigerian Ports Authority.
AGENT: Alraine (Nigeria) Ltd. Private Mail Bag 4030, Sapele Tel. 177. Telex: Lagos 21244.
N.B. Correspondence should be addressed to Warri office, see "Burutu".

Norway

AGOTNES: 60.25 N. 05.01 E. (See Plan Book)

DOCUMENTS:
1 General Declaration.
2 Cargo Declarations.
1 Stores List.
1 Health Declaration.
1 Personnel Effects.
2 Manifests.

PILOTAGE: Usual entrances to port at Korsfjord and Fedje.

Provisions for Advance Reports in connection with the ordering of Pilots. Issued by the Director of Pilotage.

1. Vessels approaching from the sea and desiring a Pilot should order the Pilot at 24 hours notice insofar as possible and confirm arrival at pilot station at 2 hours notice.

The advance order can be sent in the following manner:

a. From ships at sea over radio direct to the sea pilot watch (calling frequency 2182 kc/s from 2 minutes past until 10 minutes past each full hour, or over VHF-radio-telephone, calling frequency 156.80 mc/s, Channel 16).

b. From ships at sea over coastal radiostation to pilot station or pilot office.

c. From broker or shipowner over telephone to sea pilot station or to any pilot office which will immediately convey the report to the sea pilot station.

2. Vessels lying in port and desiring Pilot will order the Pilot from the nearest pilot office during its office hours and if possible at 4 hours notice.

3. Vessels approaching from the sea as well as vessels lying in port shall, when making an advance order state the name and destination of the vessel and whether or 2 Pilots are desired.

4. The Pilots will on the whole be despatched to the ships in accordance with the advance orders, and vessels are therefore requested to comply with the foregoing rules as far as possible in order to avoid having to wait for Pilot.

5. The international provisions for summoning Pilots by signal flags or blue lights, etc., are still in force, but should in future be used as a supplement to the radio communications or as the sole communication in emergencies.

ANCHORAGE: About 1,600 ft. North of CCB quay, depths from 29 to 74 m.
MAX. SIZE: Water depths up to 60 ft. at quayside.
HEALTH: No Certificates required. In event of any disease or fever, contact Agents.
RADIO: All messages to Agents via Bergen or Rogaland Radio.
VHF: Bergen Radio on Channel 16 or direct on Channel 10.
TUGS: Available upon request. Vessel's lines usually used. No extra charge for tug's line.
BERTHING:
West side, quay of 100 m. long. Depth of water 60 ft.
East side, quay of 105 m. long, Depth of 14 m.
North West side, quay of 120 m. long. Depth of 7.2 m.
CRANES: 1 Mobile crane 280 tons lifting capacity. 1 Mobile crane 50 tons lifting capacity. 1 Mobile crane 40 tons lifting capacity. 2 Mobile cranes 25 tons lifting capacity. Also 45 tons floating crane available upon request.
BULK CARGO FACILITIES: For drilling mud and cement only.
SPECIALISED CARGO HANDLING FACILITIES: Loading/unloading carried out by Mobile cranes and trucks.
BRIDGES: Bridge between Knarrevik and Drotningsvik. Height at mean level 50 m.
STEVEDORES: Provided by Coast Centre Base.
MEDICAL: 4 hospitals available (Bergen).
DENSITY: About 1024.
FRESH WATER: Can be supplied alongside the quay.
FUEL: Gasoil No. 0401 can be supplied alongside the quay.
CONSULS: (in Bergen). Belgian, Brazilian, British, Danish, Finnish, French, Greek, Islandic, Dutch, Panama, Peruvian, Portuguese, Spanish, Swiss, Swedish, Turkish, German, Uruguay, Austrian.
REPAIRS: All repairs possible.
DRY DOCKS: Available in Bergen. 3 Dry docks 365 ft. long with 12.5 – 21 ft. depth on blocks.

1 floating dock for vessels up to 10,000 g.r.t. and 2 smaller floating docks. Largest vessel 51,839 g.r.t.

Draft 34 ft. 4 in. Drafts up to 35 ft. can be accommodated.

SURVEYORS: Lloyds, A.B.S. and Norske Veritas.
GANGWAY/DECK WATCHMAN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCE: 0.75 litres of spirit and 200 cigarettes for each member of the crew.
REPATRIATION: All facilities available for crew changes.
AIRPORT: 35 km. from Bergen Airport served by regular airlines.
TIME: GMT plus 1 hour.
HOLIDAYS: New Years Day (January 1st); Maundy Thursday; Good Friday; Easter Monday; May 1st; May 17th; Ascension Day; Whit Monday.
POLICE/AMBULANCE/FIRE: Bergen 002; Bergen 003; Bergen 001 respectively.
TELEPHONES: No arrangements for connection on board ships. Telephone box on quayside.
SERVICES: Compass adjuster, Radio/Radar service. Also calibration of the Direction Finder, Ships laundries.
SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
AGENTS: A.S. Coast Center Base Ltd. & Co. 5363 Agotnes. Tel: (05) 21 66 80. Telex: 42 835 ccb n. Cable: Ceeceebee.

ALESUND: 62.27 N. 06.09 E. (See Plan Book)

DOCUMENTS:
1 Crew List.
1 Passenger List.
1 Customs Documents.
1 Health Documents.
3 Manifests.
3 Bills of Lading.
1 Ship's Papers.
1 Stores Lists (provisions).

PILOTAGE: From open sea, Pilot is taken on board at Rundo pilot station. Watch 24 hours a day. To be called 3-4 hours before ETA by VHF 16, or radio.
ANCHORAGE: On the North side of the town in Valderhaugfjorden in depths of 20 m. to 60 m.; bottom, sand and mud.

On the South side of the town in Aspovagen in depths of 20 m, to 40 m., bottom mud.

RADIO: Alesund Radio 2182. VHF 16. Harbour Office is manned 24 hours. Tel.21425.
TUGS: Meet vessel normally before entering the harbour, or by order.
BERTHING: At the Southern Harbour there are the following commercial quays:

Storneskaia: East side, length 85 m., depth 13 m. to 7 m. On this side Ro/Ro berth available. South side, length 150 m., depth 13 m, Warehouse cap. 1,600 sq. m.

Prestekaia: South side, length 220 m., depth 13 m. West side, length 43 m., depth 5 m. min. Warehouse cap. 4,100 sq. m.

Skutevika: Special quay for fishing vessels, length 300 m., depth 6 m. Only mooring on N.E. side. Quay, length 40 m., depth 7 m.

Sjogata: Mooring quay, length 200 m., depth 9 m. At Northern Harbour there is one commercial quay.

Skansekaia: North side, length 190 m., depth 13 m. South side, length 150 m., depth 5 m. This quay forms protection for a small inner harbour with several smaller quays.

STEVEDORES: Obtained by Agent who requires ETA 12 hours before ships arrival.
CRANES: Mobile crane to lift 18 tons available. Floating to lift max. 100 tons available.
CONTAINERS: Depot for *C.T.I.* containers.
FRESH WATER: Available.
FUEL: Bunkering facilities from all major oil companies. Loading by barge or pipeline at berth.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: This work is normally carried out by crew.
CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes. Wine/Spirit: 1 bottle of spirits.
IDENTIFICATION CARDS: Not required.
REPAIRS: Available. Floating dock 380 ft. by 50 ft. to lift 3,000 tons. Three patent slips for vessels up to 700 tons.
AIRPORT: Alesund airport, Vigra. Passenger flights (three times a day) to and from Oslo, Trondheim, Bergen.
TIME: GMT plus 1 hour.
HOLIDAYS: 1st May; 17th May.
POLICE/AMBULANCE/FIRE: Police 21321; Ambulance 23348; Fire 014.
TELEPHONES: No arrangements for placing telephones on board.
AUTHORITY: Alesund Havnevesen.

ALVIK: 60.26 N. 06.24 E.

Alvik located in inner part of Hardangerfiord. Ferrosilisium works. Vessels from abroad may call Haugesund for inward Customs' clearance.
DOCUMENTS: See "Bergen".
PILOTAGE: Compulsory. Belonging to Bergen Customs' district.
BERTHING: Quay No.1, length 80 m. 2 cranes, 7.5 and 9.5 tons. Quay No. 2, length 90 m. 1 crane 7.5 tons.
AUTHORITY: See "Bergen".

ARDALSTANGEN: 61.14 N. 07.42 E.

Ardalstangen: Aluminium works. Located in innermost part of Sognefiord. 61° 14′ 03″ N. 7° 42′ 28″ E.
DOCUMENTS: See "Bergen".
PILOTAGE: Compulsory. Belonging to Bergen Customs' district and unless otherwise arranged beforehand vessels from abroad must call at Bergen for inward clearance.
BERTHING: 1 quay 600 ft., 29 ft. depth alongside; 1 quay 210 ft., 18 ft. depth alongside.

Cranes up to 50 tons capacity. Ice free.

TRAFFIC: About 500 ships loading and discharging.
AUTHORITY: See "Bergen".

ARENDAL: 58.28 N. 08.46 E. (See Plan Book)

DOCUMENTS: See "Bergen".
PILOTAGE: The Pilot boat *Arendal* is stationed at Arendal. Contact may be made on VHF/RT or telephone 21347–23668 or out of office hours via Kristiandsand or Tjome Radio.
ANCHORAGE: Safe anchorage ground is readily available and there are numerous mooring places for vessels not docking alongside the quays.
MAX. SIZE:

	Depth Feet	Length Metres
Nye Tollbodkaien	33	230
Batterikaien	33	110
Hotellbryggen	30	77
Malmkaien	28	30
Stenkaien	26	110
Utstikkerkaien Barbu	24	58
Fryselagerkaien	22	76
Jaktekaien	20	50
Gamle Tollbodkaien	20	45
Kallevigs Brygge	20	43
Langbryggen	15	120
Ferjekaien	26	30

No tide even in exceptional weather conditions, increase in water level never exceeds 3 ft.
TUGS: Two small tugs. 500 h.p. and 300 h.p.
RADAR/VHF: Radar at Pilot station. VHF see "Pilotage".
CRANES: 2×3 ton electric cranes on rails at Nye Tollbodkaien. At Vindholmen, 1 crane 100 tons capacity and 1 crane 60 tons capacity.
MEDICAL: Advance notice required for medical attention.
FRESH WATER: Available all quays.
FUEL: Advance notice required.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Crew or stevedores.
CERTIFICATES: Normal International Certificates required.
CUSTOMS ALLOWANCE: 200 cigarettes, 1 bottle spirits.
IDENTIFICATION CARDS: Not required.
CONSULS: Sweden, Denmark, Finland.
REPAIRS: Port has well-equipped workshop to carry out engine repairs as well as hull work above water line.
AIRPORT: Kjevik 60 km.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police 22030; Fire Station 22255.
TELEPHONES: Can be placed aboard.
AUTHORITY: Harbour Master.

BERGEN: 60.24 N. 05.19 E. (See Plan Book)

DOCUMENTS:
1 Provision List.
1 List of Bonded Stores.
1 Health Declaration.
2 Manifests.
2 Crew Lists.
2 Passenger Lists.
Certificate of Tonnage.
Dangerous Cargo List.

PILOTAGE: Compulsory. Main entrance to port at Marsteinen Lighthouse (pilot station) 60° 24′ N. 5° 18′ 50″ E. 24 nautical miles from town, but vessels from South may enter at Skudesnes (88 nautical miles) and from North at Fedje pilot station (32 nautical miles). VHF Channel 16. Practically no tide. Port free of ice throughout whole Winter and well sheltered from all winds. Sound signals for Pilot, 3 long and 1 short. Harbour pilotage not compulsory but advisable.
ANCHORAGE: Puddefiord. Good holding grounds. Depth 10 to 50 fathoms of water.
RESTRICTIONS: Vessels can enter day and night.
MAX. SIZE: Max. draft 35 ft. Vessels up to 50,000 tons have been berthed at Dokkeskyaersquay. Oil installation up to 30,000 d.w.t.
HEALTH: See "Documents". If vessel carries quarantine flag on contagious diseases, radio communication should be sent to Agents for instructions, otherwise no special regulation.
RADIO: Communication to Agent should be sent through Rogaland Radio or Bergen Radio.
VHF: VHF radio for port operations. Call sign "Bergen Port Radio".
TUGS: 2 tugs, each 1,000 h.p. available. Ship's lines to be used, contractors Bergen Steamship Co. Tugs normally join vessel at Puddefiord or subject to requirements.
BERTHING: Berthing instructions from Harbour authorities through Agent's office.
CONTAINER FACILITIES: Container terminal at Dokkeskjaerskai area. The quay is 90 m. long with a depth of 9 m. at MW. It is intended for bow/stern loaders and is equipped with a ro/ro bridge with an axle load of 60 tons and 13,000 sq.m. area for storage and container handling.
BRIDGES: A bridge between Knarrevik and Drotningvik is completed. Height of bridge from the water will be 50 m. at mean water level. Bridge position will be 5 miles from harbour in the entrance to port from South.
STEVEDORES: Stevedoring arranged by Agents subject to requirements. 24 hours notice, important obtain in good time accurate ETA. Ordinary working hours at port 0730-1530 hrs. Saturdays until 1300 hrs.
CRANES: 15 shore cranes, lifting capacity 6 tons.
MEDICAL: Masters to advise by radio prior arrival if medical attendance required on board. Hospital facilities available.
TANKERS: Discharge lines usually 6 and 8 in. No slop (residues) discharge facilities. Number of tanker berths 5: Shell, Esso, Fina, Mobil Oil, and BP. Max. drafts 30 ft.
DENSITY: Salt water.
FRESH WATER: From all quays and wharves with exception of some oil berths where water barge necessary.
FUEL: All grades of diesel, fuel and gas oil including lubricating oil available at all wharves in main entrance. Supplies also from barge subject reasonable notice.
FIRE PRECAUTIONS: No special precautions. Special harbour fire-fighting boat. As usual no smoking permitted during discharge operation.
GANGWAY/DECK WATCHMEN: Obtainable subject inquiry for 12 hours watch from 1900 to 0700 hrs.
OPENING/CLOSING HATCHES: Crew allowed to open and close hatches.
SHIP'S CERTIFICATES: All certificates to be on board. Ship's tonnage certificate to be produced to Custom authorities upon arrival.
CUSTOMS ALLOWANCE: Tobacco, 20 cigarettes per day or 20 gramme tobacco per crew member. Wine and/or Spirit, 1 bottle spirit or wine for consumption on board allowed per crew member.
IDENTIFICATION CARDS: Not required.
CONSULS:

Belgian	233 873	Panama	200 011
British	210 990	Peruvian	218 028

Denmark	21070		

REPAIRS: Minor deck and engine repairs possible.
DRY DOCKS: None.
REPATRIATION: Good facilities.
AIRPORT: 2 km. distant. Regular airlines.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: 1st May and 17th May (national holiday) Cargo work may be arranged.
POLICE/AMBULANCE/FIRE: Police 20020; Ambulance 22360; Fire 22622.
TELEPHONES: No arrangements for placing telephones on board.
GENERAL: Imports oil, coal, coke and salt. Exports fish, herring meal, herring oil.
SERVICES: Compass adjusting, all kinds of nautical instruments. Ships' chandler.
SHORE LEAVE: No restrictions.
AUTHORITY: Bodo Havnevesen.

BREVIK: 59.03 N. 09.43 E. (See Plan Book)

PORT LIMITS: Port limits begin in Langesundfjorden, 2 nautical miles S.E. of Brevik.
DOCUMENTS:
Crew List.
Tobacco and Spirit List.
Cargo and Stores List.
3 copies of Manifest.
Declaration of Health List.
PILOTAGE: Langesund Pilot Station – call sign LHXP. 24 hours prior notice and 2 hours before arrival. VHF Channel 16 – radio telephone 2182. Pilot boat located 1 mile S.E. of Langoytangen Lighthouse (pos. 58° 59′ 30″ N., 9° 45′ 30″ E.).
ANCHORAGE: At Helgerofjorden, 2 miles East of Langoytangen Lighthouse. Depths 15–25 fathoms.
RESTRICTIONS: No entry restrictions, except in bad visibility.
MAX. SIZE: Tankers: LOA 600 ft. Beam 85 ft. Max. Draft 32 ft. Others: LOA 600 ft. Beam 85 ft. Max. draft 34 ft.
HEALTH: Pratique obtained when alongside wharf; arranged by customs.
RADIO: Rogaland Radio, call sign LGQ.
TUGS: Tugs not normally used in Brevik. 1 tug, 1200 h.p. and 1 tug 3000 h.p. used for tankers.
STEVEDORES: 24 hours prior notice required for ordering gangs.
BULK HANDLING: 1 berth handling bulk cargo, situated at Norcem, half a mile North of Brevik. Cargo: Cement and cement-clinker. Length of berth: 200 m. Depth alongside 36 ft.
No other berths handling bulk cargoes.
MEDICAL: No advance notice required for medical attention.
TANKERS: Discharging hoses 8 in. diameter. No slop discharge facilities. 2 tanker berths draft 32 ft.
DENSITY: Brackish water, density from 1012 to 1023.
FRESH WATER: Hoses from shore, capacity 10 t.p.h.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Watchmen available but not compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew members.
CERTIFICATES: Ship's Register, and Derat. Certificate required.
CUSTOMS ALLOWANCES: 200 cigarettes per man. 1 bottle of spirit per man.
IDENTIFICATION CARDS: Not needed.
REPAIRS: All types of repairs possible (deck and engine).
REPATRIATION: Can be arranged.
AIRPORT: Fornebu – Oslo airport – 100 miles, served by regular airlines.
TIME: GMT plus 1 hour. No alterations during the year.
HOLIDAYS: New Year's Day; Day before Good Friday; Good Friday; Easter Monday; May 1st; Ascension Day; May 17th; 25th and 26th December. No work done on these days.
POLICE/AMBULANCE/FIRE: Police 51040; Ambulance 70111; Fire 71171.
TELEPHONES: Can be placed on board at no extra cost.
SHORE LEAVE: Crew members allowed ashore.
AGENT: Stiansen & Wiborg A/S, P.O. Box 85, 3951 Brevik. Tel. (035) 70040 and 70833. Telex 16338 AB–STIWI N. After hours Tel: (035) 70835 and (035) 70833. Cables: "STIANSEN", "WIBORG"

BRONNOYSUND: 65.30 N. 12.13 E.

DOCUMENTS: See "Bergen".
PILOTAGE: Pilot ordered through Harbour Office tel. 78. Cable address "Losforman".
ANCHORAGE: Prestoytaren. 65° 29.0′ N. 12° 11.5′ E. Depth 28 ft. to 180 ft.
MAX. SIZE: Largest ship approximately 5,000 g.r.t. Depth at Port Authorities quay 18 ft. to 24 ft. LWOST.
At tanker installations:

A/S Norwegian Esso	16 ft. LWOST
A/S Norske Shell Central fishing port	15 ft. LWOST
A/S Braendselolje, Salhus	16 ft. LWOST
A/S Algea Produkter	14 ft. LWOST
Central fishing port	15 ft. LWOST

RADIO: Rorvik radio station call signal: "LGY". Hours of attendance 0800 to 2100 hrs.
TUGS: None.
BRIDGES: Bronnoysund Bridge, max. clearance – 30 m. spring high tide.
VHF: Bronnoysund Port Radio. Channel 16 – 156.800 mHz; Channel 12 – 156.600 mHz primary work; Channel 14 – 156.700 mHz secondary work; Channel 13 – 156.650 mHz pilotage work.
STEVEDORES: Bronnoysund Discharge and Loading Society tel. 301.
MEDICAL: Nearest hospital Sandnessjoen 67 km.
FRESH WATER: Delivered by hose to all Port Authority Berths.
FUEL: Delivered to all berths, 24 hour service.
GANGWAY/DECK WATCHMEN: Watchmen at gangways and pilot ladders optional. Can be ordered through Bronnoysund Discharge and Loading Society.
OPENING/CLOSING HATCHES: Usually by port workers.
CUSTOMS ALLOWANCES: Master 400 cigarettes or 40 grams tobacco; all other crew 200 cigarettes or 20 grams tobacco. Wine/spirits; Master 2 litres; all other crew 0.75 litre.
IDENTIFICATION CARDS: Crew to possess identification card with passport photo.
CONSULS: None.
REPAIRS: Limited deck and engine repairs. Turner's shop and welder's shop available.
AIRPORT: Regular traffic North and South daily.
TIME: GMT plus 1.
HOLIDAYS: During Sunday and holidays not permitted discharge/load between 1000 to 1300 hrs., but dispensation can be obtained.
POLICE/AMBULANCE/FIRE: Police 45 and 450; Ambulance 28; Fire 19 and 106.
AUTHORITY: Harbour Master.

DRAMMEN: 59.45 N. 10.13 E. (See Plan Book)

DOCUMENTS:
Bill of Health.
2 Crew Lists.
2 Passenger Lists.
2 Customs Lists for crew members and passengers.
Bills of Lading.
3 Manifests for every port of discharge.
PILOTAGE: Give 6 hours notice by R/T 2182 kc/s or VHF Channel 16 to "Faerder Pilot". Coast stations "Tjome Radio" LGT or "Farsund Radio" LGZ can also be used. Harbour Pilots ordered through ship's Agents. Harbour pilotage is not compulsory.
ANCHORAGES: Pilot service supplies information regarding anchorages.
RESTRICTIONS: Svelvikstrommen Channel, depth 10 m. equipped with beacons and radar reflectors for safe navigation.
During ice-breaker season, which may last from end-December, to middle-March, ice breaker is in radio contact with port and with ships needing assistance.
MAX. SIZE: Max. draft for main harbour 30 ft., otherwise no restrictions.
HEALTH: International procedure followed to obtain pratique. In case of suspected diseases or fever inform Port Authorities, tel. 81 88 90. When arriving from a Norwegian port pratique automatic.
RADIO: Tjome Radio, call sign "LGT" Farsund Radio, call sign "LGZ". Oslo Radio, call sign "LGO". R/T 2182 kc/s. or VHF Channel 16 can also be used.
Port Authority maintains VHF radio-telephone watch 24 hours. Call sign "Drammenhavne Radio". Not on holidays.
TUGS: Under normal conditions not necessary except for large vessels, but available on request. Normally ship's hawsers or lines used for towing. Tugs ordered through Agent.
RADAR/VHF: VHF Channel 16, 12 and 11 when communicating with Drammen Port Authorities. No port radar service.
TANKERS:
Tronstad Berth
Wooden quay 92 m. long, max. draft 32.81 ft. (10 m.). Fresh water available.
Pipeline connections: Gas oil 8 in.; light fuel oils 9 in.; asphalt 8 in.
Holmen South Berth
Concrete quay, max. draft 29.53 ft. (9 m.). Fresh water available.
Pipeline connections: Gas oil 8 in.; light fuel oils 8 in.; paraffin 6 in. heavy fuel oil 4 in.
B.P. Berth, Solumstrand
9 m. wide quay at end of pier, max. draft 16.4 ft. (5 m.).
Pipeline connections: Light gas oil 6 in.; petroleum 4 in.; white spirit 3 in.; propane 2 in.
Bakketomta Berth, Lierstranda
Concrete quay, 23 m. long, max. draft 16 ft. (4.88.m.).
Pipeline connections: Super petroleum 8 in.; petroleum 8 in. light fuel oil 8 in.; gas oil-paraffin 6 in.; white spirit 4 in.

Esso Berth, Solumstrand

Concrete quay, 23 m. long, max. draft 16 ft. (4.88 m.).

Pipeline connections: Light fuel oil 6 in. and 4 in.; gas oil 6 in.; petroleum 6 in. and 4 in.

Container and Ro-Ro Facilities: Three and Ro-Ro quays for containers, vehicles and trailers.

Fruit Storage 21,600 sq. ft. Airconditioned fruit-storage.

Also see "Tankers".

STEVEDORES: Labour must be ordered latest 1530 hours day before arrival. Saturdays before 1230 hrs. Working hours: Monday to Friday from 0700 to 1600 hrs. with breaks from 0900 to 0930 hrs. and 1300 to 1330 hrs.

Saturday from 0700 to 1300 hrs. with break from 0900 to 0930 hrs.

Overtime can be arranged through Agent.

MEDICAL: In case of emergency, notice regarding required medical treatment must be given as soon as possible. First class hospital facilities available. No special inoculation or fever certificates necessary, except those according to international health regulations.

DEPTHS: Chart depths vary only slightly owing tidal fluctuations. Exceptional conditions, such as snow melting in Spring, heavy rainfall and prevailing strong Southerly or Northerly winds will cause stronger currents and a variation in water levels.

FRESH WATER: Delivery by hose available anywhere at any time.

FUEL: Tronstad berth: gas oil 200 sec. Holmen S.: fuel 2000 sec., marine diesel 200 sec. Bakketomta Lierstrand: Bunkering by tanklorry possible if necessary. Esso Solumstrand: gas oil visc. 1,2 at 20 degrees cel.; diesel visc. 1,7 at 20 degrees cel. Lubricating greases and oils available.

FIRE PRECAUTIONS: International danger signals and precautions practised. Wires for towing must be ready for immediate use. In case of fire on board or in vicinity, vessel must leave quay and harbour as soon as possible.

GANGWAY/DECK WATCHMEN: Watchmen recommended, through Agent.

OPENING/CLOSING HATCHES: If necessary hatches can be opened or closed by stevedores, but usually by crew.

CERTIFICATES: Usual ship's certificates according to international regulations.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes/100 grams of tobacco allowed weekly. Wine or Spirits, 1 bottle wine or spirits usual weekly allowance.

CARGO GEAR: International Safety Regulations followed.

CRANES: 12 electric cranes 3-10 tons, 2 mobile cranes 10-50 tons, 2 electric cranes for discharging of coal, capacity 500 t.p.d. each.

IDENTIFICATION CARDS: Not required.

CONSULS:

Belgium	tel. 831485	Germany	tel. 819780
Denmark	,, 833650	Sweden	,, 838670
Finland	,, 832985		

All other consulates situated in Oslo.

REPAIRS: Shipyard facilities for all kinds of deck and engine repairs available.

DRY DOCKS: 2 floating docks, 20,000 and 3,000 tons capacity. Nearest dry docks in Horten and Oslo. Distance by sea respectively 24 miles and 46 miles.

REPATRIATION: All facilities available.

AIRPORT: Nearest airport Oslo Airport, Fornebu, situated 16 miles by road from Drammen. Regular services to all parts of the world.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: On Saturdays work stops at 1230 hrs., but if ships can be finished, loading and discharging is continued to 2230 hrs.

All Sundays; 1st January; Maundy Thursday; Good Friday; Easter Monday; 1st May; Ascension Day (17th May); Whit Monday; Christmas Day; 26th December.

On Easter, Whit, Christmas, and New Year's Eve work stops at 1400 hrs.

POLICE/AMBULANCE/FIRE: Fire-alarm accidents 832020; First-aid station 831585; Hospital 834585; Police 838170; Taxi 835060.

TELEPHONES: Telephones can be connected if ordered.

GENERAL: Notice will be given to local Agents regarding changes or new developments which can affect usual procedure in port.

SERVICES: Ice-breaker assistance available during winter months.

SHORE LEAVE: No restrictions on shore leave when all formalities in order.

DELAYS: Delays may occur, when very heavy traffic cause shortage of labour.

AUTHORITY: Drammen Havnevesen.

EGERSUND: 58.27 N. 06.00 E.

DOCUMENTS: Health Certificate (forms obtainable from Customs when entering harbour). Crew List, Dangerous Cargo List, Ship's Register. Vessels bound for Egersund must be provided with document signed by Master, setting out specification of cargo to be discharged Egersund, also quantities all provisions and stores on board. Document must include name, tonnage, port of registration, last port, next port, and number of crew and passengers on board.

PILOTAGE: Pilot – if necessary – to be ordered latest 3 hours prior arrival pilot station. Order to be given to Pilot office – telephone 91.328 or to ship's Agent, giving ETA, name of vessel, gross tons, where Pilot required, draft in feet, and discharging/loading place. Vessels entering Egersund liable to inward and outward pilotage dues, mileage money according distance piloted; and pilot dues, whether services of Pilot used or not. Pilot station lying on Eigeroy – and Pilot available for Southern and Northern entrance, from pilot boat. Southern entrance mostly used, max. draft 31 ft. In case of using Northern entrance, ship has to pass bridge between Eigeroy and the continent. Max. height 23.5 m. Max. draft 16 ft.

ANCHORAGE: Any place in harbour available for anchorage. Especially used is Hovlandsviken – 36 ft. draft.

MAX. SIZE: Largest vessel which has entered Egersund – 25,000 d.w.t. Max. draft 31 ft. In harbour there are 2,000 ft. of quayage with 18–27 ft. alongside.

RADIO: Rogaland Radio and Farsund Radio.

TUGS: Not available in Egersund.

STEVEDORES: Ordered by Agent – no ETA to stevedores necessary. Time for ordering gangs for next morning must be given by 1300 hrs. day before.

FRESH WATER: Can be delivered at most discharging/loading places.

FUEL: Gas oil and Light Marine Diesel oil available.

GANGWAY/DECK WATCHMEN: Available – but not compulsory.

OPENING/CLOSING HATCHES: Crew allowed open and close.

CERTIFICATES: On first call Registered Tonnage Certificate necessary – thereafter not required unless gross/net tonnage changed.

CUSTOMS ALLOWANCE: (Dependent size – destination, etc.) each crew member is allowed 100 cigarettes, 20 cigars or 100 grams tobacco and one bottle spirits.

CARGO GEAR: No additional requirements. One 150-ton crane, one 30 ton crane and some mobile cranes 5-15 tons available.

IDENTIFICATION CARDS: Not required.

CONSULS: Denmark and Sweden.

REPAIRS: All minor repairs possible. Service station for electronic aids.

HOLIDAYS: Work can usually be arranged on all holidays.

POLICE/AMBULANCE/FIRE: Police 91.600; Fire 91.500; Hospital/Ambulance Tel: 044-90022

AUTHORITY: Egersund Havnevesen.

FLORO: 61.31 N. 05.02 E.

DOCUMENTS:

2 Manifests.
Crew List.
Provisions List.
Health Document.
Passenger List.

PILOTAGE: Nearest station Fedje (60° 51′ N., 04° 37′ E.). Distance to Floro harbour about 52 nautical miles. Pilot boat a white-painted cruiser-type marked "LOS" on both sides of bow.

Fixed watch on Fedje island covers both Holmengra and Hellesoy. VHF Channels 8, 12 and 16 on M. wave. Listening first 10 minutes of every hour. ETA 24 hours before arrival. Telegram "Feielos". If bad weather, Pilot to be picked up on Eastern side of Fedje Island.

ANCHORAGE: No anchorages close to pilot station. Floro harbour: space of about 1 sq. km., depths from 15 to 30 fathoms.

RESTRICTIONS: Tide difference about 1.5 m. Max. draft entering Floro harbour 36 ft.

MAX. SIZE: Entering Floro harbour: No restrictions in main harbour concerning length and breadth. Max. draft berthing: "Gunhildvagen" (herring factory) 25 ft. and length of 120 m.

NB. – "Gunhildvagen" lies outside main harbour, and has narrow entrance. Weather permitting, ships of 100 m. length and breadth 20 m. can pass.

BERTHING: *Vestlandske Kjopelag:* A bulk grain/molasses terminal for vessels up to 6,000 d.w.t. Berth length, 100 m. Depth alongside 7.0 m. Storage capacity 20,000 tons of Grain/Molasses.

Fugleskjaerskaia: The deep-sea pier to the West of Fugleskjaerskaia is in operation. Fugleskjaerskaia now offers 500 m. of pier frontage, depth from 16 ft. to 43 ft. New section: 36 m., 18 ft. depth; 140 m., 33 ft. depth; and 1 berth 43 ft. depth.

The extension of Fugleskjaerskaia provided 14,000 sq.m. new cargo handling space. A shed of 1,200 sq.m. is now being erected, and is expected to be put to use in January 1979. A Ro/Ro facility is also provided, max. axle load 60 tons.

STEVEDORES: ETA before 1600 hrs. for gangs required next morning.

MEDICAL: Hospital close to harbour, and available any time.

TANKERS: Harbour is only used by small tankers, about 500 to 1,000 reg. tons.

FRESH WATER: Only available alongside berth. Delivery about 30 t.p.h., possibility of 60 t.p.h.

FUEL: Ordinary fuel. Diesel and gas oil delivered by truck. Ships up to about 1,000 reg. tons receive oil-bunkers directly by berthing bunker station.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Mostly done by crew.

CREW IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: Most repairs possible.

DRY DOCKS: None. There is a new berth at Ankerlokken Shipyard. Length 100 m. Depth alongside 9–10 m.

AIRPORT: Regular service with DeHaviland Twin Otters, 5 flights to Bergen and 2 to Aalesund each day. (Runway 860 m.).

TIME: GMT plus 1 hour.

HOLIDAYS: Cargo work can be arranged any time, holidays included.

POLICE/AMBULANCE/FIRE: Police 42101; Ambulance 41011; Fire 41000.

TELEPHONES: Can be arranged on board alongside wharf.

SHORE LEAVE: Permitted.

SERVICES: Servicing for all kinds of ships navigation instruments can be arranged, except adjusting radio bearings.

AUTHORITY: Harbour Master. Floro Havnevesen.

AGENT: K. Jansen, Shipping Agent, Stevedore, Shipbroker. Telephones: (057) 42303 A.O (057) 42222–42277. Cable: Shipping. PO Box 15.

FREDRIKSTAD 59.12 N. 10.57 E.

DOCUMENTS:

Bill of Health.
2 Crew Lists.
2 Passenger Lists.
2 Custom List for Crew members and Passengers.
Bill of Lading.
3 Manifests for each port of discharge.

PILOTAGE: Compulsory. Pilot boarding at Faerder Lighthouse, 59.2 N. 10.32 E. Agents report vessel's ETA to pilot station and vessel to give a couple of hours' notice by R/T 2182; kc/s. or VHF Channel 16 to Faerder Pilot. Coast station Tjome Radio LGT or Farsund Radio LGZ can also be used. Harbour Pilot and tugs, when necessary, will be arranged by Agents to meet at Belgen.

ANCHORAGES: Safe anchorage for larger vessels Belgen, East entrance. For smaller vessels anchorage to be pointed out by Pilot or Harbour Master.

RESTRICTIONS: Max. draft, East entrance 36 ft.; West entrance, 17 ft. Otherwise no restrictions.

HEALTH: See "Documents".

If vessel carries Quarantine Flag for contagious diseases, radio communication should be sent to Agent for instructions, otherwise no special regulations.

RADIO: Communication to Agent through Tjome Radio or Rogaland Radio.

TUGS: Three tugs, 750 h.p. and 1,200 h.p. Stronger tugs can be ordered from Oslo if necessary.

BERTHING: As instructed by Harbour Master through Agent, depending on vessel's draft and size.

East River Berths:

Oera Quay:

Southern part, max. draft 36 ft.
Northern part, max. draft 33 ft.

Denofa Lilleborg Quay:

Max. draft 33 ft., 5 m., off the quay.

Additional facilities:

4 warehouses, each at 2,000 sq.m. with cooling 300 sq.m.
4 ordinary cranes up to 10 tons.
1 mobile harbour crane up to 36 tons.
2 Ro/Ro terminals with an open area of about 40,000 sq.m.

STEVEDORES: To be arranged by Agent subject to requirements. 24 hours notice important to obtain in good time accurate ETA.

Ordinary working hours 0700 to 1530 hrs.; Saturday until 1230 hrs. Bulk cargoes are usually discharged in shifts until Saturday 2200 hrs., in the extent stevedores available.

MEDICAL: Master to advise by radio prior arrival if medical attendance required on board. Hospital facilities available.

TANKERS: Discharge pipe-lines usually 6 and 8 in. No slop (residues) discharge facilities. Tanker berths are at BP and Denofa/Lilleborg.

Sulphuric Acid is loaded at Oera Quay.

DENSITY: Brackish water, 2.7% salt water.

FRESH WATER: From shore or by barge.

FUEL: All grades available. For larger quantities, delivery arranged by barge.

GANGWAY/DECK WATCHMEN: Obtainable.

OPENING/CLOSING HATCHES: Crew members allowed to open and close hatches.

SHIP'S CERTIFICATES: To be produced to Customs Authorities on arrival.

CUSTOMS ALLOWANCES: *Tobacco:* 20 cigarettes or 20 grs. tobacco per man, per day. *Wines/Spirits:* 1 bottle of spirits or wine for consumption on board per crew member.

IDENTIFICATION CARDS: Not required, except at the quay of Defona/Lilleborg, when Master, upon arrival, will receive a sufficient number of cards for filling-in for each crew member, to be shown when passing the gate.

CONSULS: Danish, French, Finnish, Dutch, Swedish.

REPAIRS: All repairs possible.

DRY/FLOATING DOCKS:

A/s Fredrikstad mek Verksted: Dry dock 945 ft. length, 126 ft. breadth, 25 ft. draft when docking. Floating dock, 900 tons, 181.6 ft. length, 52.6 ft. breadth, 14 ft. draft when docking.

Sarpsborg mek Verksted: Floating dock, 3,000 tons, 380 ft. length, 55 ft. breadth, 18 ft. draft when docking.

REPATRIATION: All facilities available.

AIRPORT: Fornebo, Oslo, 110 km. From Fredrikstad. Frequent connection by train.

TIME: GMT plus one hour.

HOLIDAYS: New Year's Day (1st January); Maundy Thursday; Good Friday; Easter Monday; Labour Day (1st May); Ascension Day (11th May); Constitution Day (17th May); Christmas Eve; Christmas Day; New Year's Eve.

POLICE/AMBULANCE/FIRE: Police, tel. 17700; Doctor, tel. 13333; Hospital, tel. 11080; Ambulance, tel. 13000; Fire, tel. 12345.

TELEPHONES: May be installed on board at the quay of Oera.

SERVICES: Compass adjusting, laundry, ship chandler for delivery of provisions and bond stores.

SHORE LEAVE: No restrictions.

GLOMFJORD: 66.50 N. 13.57 E.

DOCUMENTS:

3 Crew Lists.
Customs List.
Shipping Manifest.
Health Statement.
Bill of Lading.
Ship's Certificate of tonnage.

PILOTAGE: Pilot station, approach from South, is Aasvaer, Lat. 66° 17′ N. Long. 12° 18′ E., VHF/radio telephone, frequency 2182.

Pilot station, approach from North, is Fleinvaer, Lat. 67° 13′ N., Long. 13° 42′ E. Order Pilot over Bodo Radio, tel. Bodo 22115.

ANCHORAGE: No berth for anchoring in Glomfjord but possible anchor at Sandaabukten close to Glomfjord.

MAX. SIZE: Quay length 317 m. and depth 8 m.

HEALTH: Health certificate – only for first port in Norway.

RADIO: Sandnessjoen or Bodo Radio station.

VHF: On quay. Call: Hydro Glomfjord Port station on Channel 16.

TUGS: None.

BERTHING: No specific requirements relating to berthing.

STEVEDORES: In accordance with Charter Party.

MEDICAL: Medical aid in Glomfjord, and hospital in Bodo.

TIDE: Difference between high and low water about 3m.

FRESH WATER: Alongside quay.

FUEL: None.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Usual certificates.

CUSTOMS ALLOWANCES: 200 gr. tobacco or 200 cigarettes per man. 0.75 litre spirits or 0.75 litre wine per man.

CARGO GEAR: Discharging by cranes on quay. Loading by conveyor.

IDENTIFICATION CARDS: Usual passport necessary.

CONSULS/REPAIRS/REPATRIATION: None.

AIRPORT: Airport in Bodo.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: See "Drammen".

POLICE/AMBULANCE/FIRE: Police station 52147 Glomfjord.

TELEPHONES: On quay.

REGULATIONS: No particular or unusual regulations. Control by passing gate between dock area and surrounding field.

SHIPMASTER'S REPORT: 1976

Anchorage: The nearest anchorage to the berth, which is part of Norsk Hydro's chemical plant is Sandabukta, about 6 miles away. It is safe and sheltered and the Agent will board there. Communication with Glomfjord is by VHF Channel 16 or via the local boatman with whom private arrangements for shore leave are possible.

Clearance: Ship is boarded on arrival at the anchorage by the Glomfjord Customs officer who also acts as Immigration and Port Health.

Weather: This vessel called at Glomfjord in April but weather conditions were not attractive. Frequent snow squalls reduced visibility to zero but were usually short-lived.

Pilotage: There are no harbour Pilots at Glomfjord. If proceeding direct to berth, sea Pilot will put ship alongside. If awaiting berth at Sandabukta anchorage, Pilot leaves there and it is normal for ships to complete the passage unaided. A Pilot can be obtained from Bodo but is not always available. If another ship is arriving at the anchorage, Pilot will transfer.

AUTHORITY: Norsk Hydro a.s. Glomfjord Fabrikker.

HALDEN: 59.08 N. 11.25 E. (See Plan Book)

DOCUMENTS: See "Bergen".
PILOTAGE: Pilot boat at Faerder light station. Pilot boat at Herfol Losstation-Hvaler. Ordering usually over Radio Land Station. Tjome Radio = LGT (also VHF). Signals according to ordinary international requirements. Exact area for Pilot boat: Faerder light station (Store Faerder); Herfol pilot station; Hvasser pilot station.
ANCHORAGE: At Faerder light station in Oslofiord-Singlefiorden West side.
RESTRICTIONS: No special restrictions but larger vessels have to take necessary care with passing Svinesund. The tide current altering according to high and low water time.
MAX. SIZE: For the harbour inside Svinesund (Main Harbour) length 560 ft., beam 70 ft., draft. 25 ft.
HEALTH: Pratique, ordinary.
TUGS: If wanted; outside Sponviksskansen light with the entrance to Svinesund. Usual, ship's lines.
RADIO: All radio services over Tjome Radio-Land Station (use the ordinary international frequency — (600-705-800 m.).
BERTHING:

Quay	*Depth* (ft.)	(m.)
Ytre Molbrygge	23	7.2
Indre Molbrygge	23	7.2
Jernbanebryggen	22	6.9
Krankaien	27	9.0
Brokaien	23	7.2

FUEL: Available.
FIRE PRECAUTIONS: According to Harbour regulations.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Carried out by crew.
IDENTIFICATION CARDS: Required.
REPAIRS: Only small repairs carried out.
DRY DOCKS: None.
REPATRIATION: No facilities.
AIRPORT: Nearest Fornebu-Oslo.
TIME: 1 hour behind GMT.
POLICE/AMBULANCE/FIRE: Fire 81212; Police 82250.
TELEPHONES: None available for shipboard use.
SHORE LEAVE: Allowed.

HAMMERFEST: 70.40 N. 23.40 E. (See Plan Book)

DOCUMENTS: See "Bergen".
PILOTAGE: Entering from sea, a state Pilot is compulsory as one has to pass through prohibited sea area. Pilot should be ordered 4 hours in advance, and boards ship at Tarhalsen (situated at Eastern-most tip of Soroy island). Harbour Pilot boards outside harbour breakwaters.
ANCHORAGE: Anchoring in harbour or as appointed by the state Pilot or harbour Pilot.
MAX. SIZE: Alongside quay ships up to 30,000 g.r.t., with draft max. 30 ft. For anchorage no limitation.
RADIO: Hammerfest Radio, equipped with VHF.
TUGS: None.
STEVEDORES: Normal working hours: Monday–Friday 0700–1630 hrs.
MEDICAL: Hospital facilities available at Hammerfest.
TANKERS: Discharge line 8 in.
DENSITY: Salt water.
FRESH WATER: Capacity 300 t.p.h. at Harbour Board quay, no water barge.
FUEL: All grades, except heavy fuel oil, available.
CUSTOMS ALLOWANCES: See "Stavanger".
IDENTIFICATION CARDS: Not needed.
CONSULS: French, Danish, Finnish, Icelandic, Netherlands and Swedish Vice-Consuls.
REPAIRS: Slipway for smaller ships, up to 200 ft. Only minor repairs and radar repairs available.
DRY DOCKS: None.
REPATRIATION: Daily connection by ship and air.
AIRPORT: Hammerfest Airport. Regular service several times a day.
AUTHORITY: Hammerfest Havnevesen.

HARSTAD: 68.48 N. 16.39 E.

PORT LIMITS: Inside a straight line from Trondenes Church to Stangnes Light.
DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
Derat Certificate.

PILOTAGE: If entering via Andenes, 12 hours advance notice of ETA in order to arrange Pilot. If entering via Lodingen, 2 hours notice. VHF Channel 16 both at Lodingen and on pilot-cutter at Andenes.
ANCHORAGE: Inside harbour limits, fairly good anchorages available, Pilot will assist.
RESTRICTIONS: No restrictions, only all foreign ships must have a Coast Pilot on board in inland waters.
MAX. SIZE: Any sizes can anchor in harbour.
HEALTH: In case of suspected disease doctor has to be called by radio before entering. After calling at another Norwegian port and no disease, pratique is not necessary.
RADIO: Routing of ETA cables to Agents at Harstad is best over Harstad Radio. VHF installed at Harbour Office.
TUGS: Two small tugs available.
MEDICAL: No advance notice required. Hospital facilities available. No medical information required if no suspected disease on board.
SPECIALISED CARGO-HANDLING FACILITIES: Two coal bunkering stations; draft about 24 ft.; equipped with cranes running on rails. No other specialised docks.
TANKERS: Two berths. Esso 33 ft. Norol 36 ft.
TIDE: Rise in tide about 6 ft.
FRESH WATER: Available at most quays.
FUEL: All grades available. In the Winter 3–4 hours notice required.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Usual International certificates.
CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes or equal amount of tobacco. Wine and/or Spirits: Spirit half a bottle per person.
IDENTIFICATION CARDS: Not needed.
CONSULS: Per Kind & Son – Iceland. O. Galschiodt – Finland. Kr. Holst – Denmark.
REPAIRS: All types of repairs possible.
DRY DOCKS: 1 dry dock 110 m. long, 17 m. wide.
REPATRIATION: Facilities available.
AIRPORT: New airport in operation at Evenes, about 1 hour's drive from Harstad by road.
TIME: GMT plus 1 hour.
HOLIDAYS: Cargo work can be arranged on holidays, except 1st and 17th May, Easter Day and Christmas Day.
POLICE/AMBULANCE/FIRE: Tel. 62010–62000–61122.
TELEPHONES: Available, can be arranged by Agent or Dockyard.
SERVICES: Harbour Office, Tel. 62880 62892. Compass adjusting.
SHORE LEAVE: Allowed.
AUTHORITY: Harstad Havnekontor.

HEROYA: 59.07 N. 09.38 E.

DOCUMENTS:

Clearance documents – forms obtainable from Custom officers on arrival.
Derating Certificate.
Bill of Lading.
Manifest.
2 Crew Lists.
Ship's Register.

PILOTAGE: Ships Agent gives ETA Pilot station 24 hours before arrival and direct to Pilots 2 hours before arrival. Telegraphic address: Pilotstation, Langesund. VHF Channel 16 to be used when contacting Pilots. Pilot boards at Steingrunnen light buoy Langesund bay, 58° 55′ N.; 09° 44′ E. Flag, sound and morse signal: G. Pilotage compulsory for all foreign vessels but dispensation can be obtained for smaller Scandinavian vessels.
ANCHORAGES: All anchoring at Frierfjorden.
RESTRICTIONS: No restriction on night entry except for large vessels when Pilots prefer daylight.
MAX. SIZE: Max. draft 32 ft. 6 in., max. length 600 ft. entering Kjorttingen between Langesund and Brevik.
HEALTH: See "Documents". Norwegian Health Certificate required on clearance inwards.
RADIO: Cable Agents giving ETA, draft and cash required via Tjome Radio/LGT or Farsund Radio/LGZ.
TUG: Tugs join at berthing place. Ship's lines used.
BERTHING: No specific requirements relating to berth.
CARGO HANDLING FACILITIES: On the East side of the river, a berth of 800 ft. length, 20 to 21 ft. alongside. A new quay for vessels up to 10,000 tons, 26 to 27 ft. depth, specially for handling bulk cargoes.

No berth equipped for handling roll-on/roll-off traffic, but berth available for liquid chemical and LPG carriers.

Oil pier Norsk Hydro A/S, vessels up to 20,000 d.w.t.
Main quay Norsk Hydro A/S, length 1,838 ft., draft 26 ft. to 34 ft. 6 in.
Western quay Norsk Hydro A/S, length 1,263 ft., draft 26 ft. to 32 ft. 6 in.

CRANES:

Main quay Norsk Hydro A/S:
4 cranes reaching 10-11 m. outside quay border capacity 6 tons.
2 cranes reaching 18 m. outside quay border capacity 6 tons.
3 elevators for loading of bagged cargo reaching 16 m.
Western quay Norsk Hydro A/S:
2 cranes reaching 18 m. outside quay border capacity 7 tons.
1 crane reaching 15 m. outside quay border capacity 8 tons.
1 crane reaching 9 m. outside quay border capacity 3 tons.
3 elevators for loading of bagged cargo reaching 8 m.
Deep Water Jetty:
2 cranes reaching 16 m. outside quay border capacity 10/12 tons for bulk cargo only.
1 crane capacity 5 tons for handling of stores, etc.

BRIDGES: Brevik bridge max. height 45 m. Porsgrunn bridge only when proceeding to Menstad, Borgestad, Waterloo and Skien,

liftbridge with breadth of 30 m. Sound signals for passing bridge inward, 1 long and 2 short. Outward signals, 1 long and one short.
STEVEDORES: Ordered by Shippers/Receivers or Agents.
MEDICAL: All medical assistance to be arranged via Agents.
TANKERS: Discharge lines 4 in., 6 in., 8 in.
DENSITY: Brackish 4–6 in. allowance.

PORT LIMITS: The offical port limits for the port of Larvik is a line from Stensnes in East to Rodbergodden in West. Notices of Readiness for loading or discharging, however, will be accepted when the vessel is anchored in any of the anchorages in inner Larvik Fjord.

DOCUMENTS:

Maritime Declaration of Health.
Tolliste i.e. tobacco & curio list for total number of crew.
1 "Varefortegnelse med proviantliste", i.e. cargo & provisions list. (2 copies required for bulk cargoes).
"General-varefortegnelse", i.e. list of general cargo – 3 copies required.
3 Ship's Manifest.
3 Bills of Lading.

Customs Officer will accept tobacco & curio lists, also provision lists filled in on foreign forms, if all goods correctly stated.

PILOTAGE:

1. Vessels approaching from the sea and desiring a Pilot shall order the Pilot at 24 hours notice insofar as possible and confirm arrival at pilot station at 2 hours notice:
   (a) by telephone or telegram from ship to the pilot office concerned or sea pilot station over an official coastal radio station.
   (b) by telephone or telegram from broker/shipowner to the pilot office concerned or sea pilot station.
2. For direct connection between ships desiring Pilot and the pilot service, VHF-radio telephone Channel 16 (156.8 mHz) shall be used for calling and reply, and a VHF-radio telephone ship-to-ship Channel or harbour Channel shall be used for conversations.
   Ships not equipped with VHF-radio telephone may use the distress and calling frequency 2182 kHz for calling pilot vessel, but both the ship desiring Pilot and the pilot vessel shall in such cases immediately turn to ship-to-ship frequency. At such connections minimum transmission effect shall be used.
3. Vessels lying in port and desiring Pilot will order the Pilot from the nearest pilot office during its office hours and if possible at 4 hours notice.
4. Vessels approaching from the sea as well as vessels lying in port shall, when making an advance order, state the name and destination of the vessel and whether one or two Pilots are desired.
5. The Pilots will on the whole be despatched to the ships in accordance with the advance orders, and vessels are therefore requested to comply with the foregoing rules as far as possible in order to avoid having to wait for Pilot.
6. The international provisions for summoning Pilots by signal flags or blue lights, etc., are still in force but should in future be used as a supplement to the radio communications or as the sole communication in emergencies.
7. These provisions came into force on the 1st January 1971.

Description of pilot boat: white painted, teak wheelhouse,, 2 masts, "Los" on both sides of bow. Light and sound signals: international signal "G" with flag, sound or light. Exact area where pilot vessel situated when on station: "Rakke" sound and light buoy, 5 cables off. In poor weather Pilot will board vessels off "Ramsholmflu" light and bell buoy. If Pilots not available, pilot vessel will conduct vessels to safe anchorage.

Please note: The following temporary changes regarding the pilot service. From October 1st 1976 and until further notice the pilot station is keeping radio watch all days between hours 0900 to 2000 hrs. only. All vessels requiring Pilot to enter the Port of Larvik should advise their requirements and give their ETA's during said hours.

ANCHORAGE: Safe anchorages at end of fjord, West side. Masters should consult Pilots and/or charts before anchoring. Ample water and good holding ground for all sizes of vessels.

MAX. SIZE: Largest vessel berthed at Larvik Canal Quay, LOA 644 ft. 8 in., breadth 83 ft. 3 in., max. draft 32 ft. 6 in.

HEALTH: Advise Agents of any suspected disease or fever on board by radio or telephone before entering. Vessel will then anchor in anchorage and be boarded by state doctor. When vessel is healthy, Custom Officer will grant pratique.

RADIO: Tjome Radio LGT, Rogaland Radio LGQ.

TUGS: No tugs at Larvik. Tugs to be ordered via ship's Agents from Fredrikstad or Porsgrunn. If tugs required Agents should be given 12 to 24 hours notice. Tugs join vessel in fjord off harbour breakwater. Extra charges for use of tug's lines.

BERTHING:

Revquay West (Vester Revkai): Length 118 m. Depth alongside 9 m. Newest quay for general and miscellaneous cargo. New warehouse, measuring 1600 sq. m. Asphalted area outside measuring 10,000 sq. m. Railway track.

Adjacent to this quay is the roll-on/roll-off berth. Max. length vessels 150 m. Depth alongside 8 m.

Kanalquay (Kanalkaia): Kanalquay North – length 335 m. Depth. 10 m. Kanalquay West – length 120 m. Depth 6 m. Kanalquay South — length 90 m. Depth 5 m.

Facilities available at Kanalquay and Revquay West: Railway tracks, 4 portable electric cranes, capacity 6-23 tons, 3 mobile cranes, capacity 14-30 tons. Portable pneumatic grain discharging plant, capacity 85,000 tons. Warehouses measuring 4,000 sq. m.

Outdoor storage area: 20,000 sq. m.

East Pier (Ostre Brygge): Length 130 m. Depth 8 m. New Ferry quay with roll-on/roll-off facilities. Car park for 560 cars or 52 lorries/trailers 18 m.

West Pier (Vestre Brygge): Depth—east side 6 m. West side 7 m. Ferry quay with roll-on/roll-off facilities on both sides. Good parking. Passenger terminal. Customs.

Private Wharves; Treschow-Fitzoe Pulp Quays—West side: Length 50 m. Depth alongside 5 m. East side: Length 90 m. Depth alongside 6.3 m.

B.T. Transport A/S: Length 50 m. Depth 3-11 m.

STEVEDORES: Gangs to be ordered before 1600 hrs. and cranes before 1500 hrs. for following day. During office hours 2 hours notice required.

MEDICAL: No advance notice required, unless in urgent medical cases and when ambulance needed. No particular inoculations required.

TANKERS: For larger oil-tankers for asphalt works, 8 in. connections required; for coasting vessels, 6 in. connections used. Fuel oil and diesel oil shipped in coastal vessels require 6 in. connections; kerosene, white spirit and gasoline, 4 in. connections. No slop tanks. 2 berths for tankers, 1 for larger vessels and 1 for coasters. Max. draft in both berths 32 ft. 6 ins.

DENSITY: Salt water, brackish at times.

FRESH WATER: Delivered by hose from wharf.

FUEL: Fuel oil, gas oil, diesel oil, delivery rate by tank lorry 20 t.p.h.

FIRE PRECAUTIONS: Any vessel discharging benzine must have city fireguard on watch. 30 m. clearance required to next vessel. Ships loading explosives require fireguards on watch on board.

GANGWAY/DECK WATCHMEN: Not compulsory, but recommended for larger overseas vessels.

OPENING/CLOSING HATCHES: Usually done by ship's crew.

CERTIFICATES: Vessels must have all usual International Certificates, no special certificates required.

CUSTOMS ALLOWANCES: Every crew member allowed one bottle wine or spirits, and 200 cigarettes out of bond for use in port. This allowance is for 10 days. After this period new tobacco allowance is granted, but no new spirit issue.

CARGO GEAR: No additional requirements.

IDENTIFICATION CARDS: Not required.

CONSULS: Danish, tel. 84040, French Vice-Consulate tel. 82 030, Swedish and Dutch Vice-Consulates tel. 82 090, Finnish Vice-Consulate tel. 81 000.

REPAIRS: Minor deck and engine repairs only.

REPATRIATION: Facilities for effecting crew changes and necessary repatriation by railway, continental ferry and by air.

AIRPORT: Distances from airport: Skien, regular service to Oslo 40 km. Torp, charter planes, 35 km. Fornebu, 130 km., world-wide service. Private airport open for small aircraft at Larvik.

TIME: Local time, GMT plus one hour. Permanent.

HOLIDAYS: New Years Day; Ash Thursday, Good Friday; Easter Monday; May 1st & 17th; Ascension Day; Whit Monday; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Tel. Police 82204, Ambulance 81234, Fire 81288.

TELEPHONES: Arrangements exist for placing telephones on board; charges 40 kr. for one week's hire plus cost of phone calls.

AUTHORITY: Port Manager, Havnefogden, Larvik Kommune.

LILLESAND: 58.15 N. 08.23 E.

CARGO HANDLING: Special berth equipped with a roll-on/roll-off berth in connection with quay 225 ft. long, from 18 to 36 ft. depth alongside.
STEVEDORES: From Maaloy Skipsekspedisjon.
MEDICAL: Nearest hospital Nordfijordeid Sykehus, 1 hour by car.
FRESH WATER: Available at main quay and delivered from a fresh-water line at quay.
FUEL: Bunkers available from Esso, Shell, B.P. and Mobil Oil. Three bunker barges available.
GANGWAY/DECK WATCHMEN: Available in the harbour.
OPENING/CLOSING HATCHES: Done by crew.
CUSTOMS ALLOWANCE: Tobacco: Wine/Spirits: 200 cigarettes or 100 gram tobacco. 1 bottle of spirit and 1 bottle of wine.
CONSULS: No consuls.
REPAIRS: Minor repairs only possible.
AIRPORT: Nearest airport Floro, 1 hour by boat, and Flesland Airport (Bergen) 8 hours night service by sea. Air route Bergen-Maaloy every day except holidays.
TIME: GMT plus 1 hour.
HOLIDAYS: 1st January; Easter Sunday; Easter Monday; Thursday and Friday before Easter; 1st May; 17th May; Whit Sunday and Whit Monday; Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Police tel. 51-175; Fire and Ambulance contact telephone station.
TELEPHONES: Can be placed on board and cost same as on shore.
SERVICES: No tank cleaning services available. Compass adjusting.
SHORE LEAVE: No restrictions about shore leave.
AUTHORITY: Harbour Master.

MANDAL: 58.02 N. 07.29 E.

DOCUMENTS:

- Bill of Measurement.
- General Cargo List (two copies).
- Cargo and Provisions List (ship's stores).
- Derating Certificate.
- Maritime Declaration of Health.
- Tobacco list.

PILOTAGE: Pilot station on Oksoy lighthouse outside Kristiansand. Telephone 32834 via Kristiansand radio.
ANCHORAGE: Mannefjorden. Depth approx. 30 ft. Bankefjorden, shallow entrance with approx. depth 15 ft.
MAX. SIZE: Ship up to approx. 12,000 g.r.t. No tide problems. Oil carriers to installations outside main port area up to 20,000 tons.
HEALTH: Contact Agent for pratique.
RADIO: Farsund Radio or Kristiansand Radio.
TUGS: One small 200 h.p. tug available in harbour. Heavier tugs must be ordered from Kristiansand at 5 hours notice.
BERTHING: Mandal main harbour is Kleven, situated 1 km. East of Mandal town. There is also some kind of a harbour in Mandal River, running through town. River entrance is shallow, 14 ft. In South-easterly strong winds it can be impossible to go up the river. Kleven harbour is a good harbour in all weather conditions. There is 1 × 90 m. quay 30 ft. deep and 1 × 45 m. quay 17 ft. deep.
STEVEDORES: 6 hours notice to Agents to arrange gangs.
MEDICAL: No advance notice required. Hospital facilities available.
DENSITY: 1026.
FRESH WATER: Delivered by local firemen. Rate of delivery 20 t.p.h.
FUEL: At Oil installation inside Harbour limit.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Certificate of Nationality.
CUSTOMS ALLOWANCE: Tobacco: 200 gr. Tobacco or 200 cigarettes. Wine and/or Spirits: 2 litre alcohol for ship's Master, .75 litre for crew.
IDENTIFICATION CARDS: Not needed.
CONSULS: Sweden 62521; Finland 61288; Denmark 61799.
REPAIRS: All types of deck and engine repairs can be carried out.
DRY DOCKS: None.
AIRPORT: Kristiansand Airport at Kjevik. Distance from Mandal 64 km. Airport served by regular airlines.
TIME: GMT plus 1 hour.
HOLIDAYS: The only holidays that one cannot arrange cargo work Christmas Eve (after 1400 hrs.), Christmas Day, Easter Day, 1st May, 17th May (Independence Day). The rest of the year cargo work can be carried out day and night.
POLICE/AMBULANCE/FIRE: Police 61211; Ambulance 61113; Fire 61112.
TELEPHONES: Telephones available at quay.
SERVICES: No services for tank cleaning. Compass adjusting and all kinds of electronic repairs.
SHORE LEAVE: No restrictions.
AUTHORITY: Mandals Havnevesen.

MO-I-RANA: 66.19 N. 14.08 E.

PORT LIMITS: The vessel is considered to be an "arrived vessel" when within the Haukneset port lighthouse – about 2 nautical miles from the port.
DOCUMENTS:

- 1 Cargo List.
- 1 Stores List.
- 1 Sealing Certificate.
- 1 Health Certificate.
- 2 Crew Lists.
- 2 Passenger Lists.

(All Forms obtainable from Customs by clearance on board).
PILOTAGE: Asvaer pilot station 66° 17′ N. – 12° 09′ E. (lighthouse). Order preferably through Agent or direct to station 24 hours before arrival. 2 boats: L/K "Asvaer" and L/K "Asvaer II" both painted white, 2 yellow masts and yellow funnel. "LOS" painted in black on both sides. Radio (frequency 2182) and VHF Channel 16. Pilots embark at Asvaer Lighthouse. Pilots advise alternative place or anchorage if necessary. Pilot compulsory unless vessel ballasting for loading at another port in Norway.
ANCHORAGE: In the fjord at Utskarpen Bay to be advised by sea Pilot. Anchorage in the inner harbour to be advised by the harbour Pilot.
HEALTH: See "Documents". No animals allowed on shore.
RADIO: From South; Rogaland Radio/LGQ, LGW, LGB. Within 24 hours off; Rorvik Radio/LGD. From North; Vadso/LGV or Hammerfest/LGI or Tromso/LGE or Bodoe Radios/LGP.
VHF: At harbour office call sign. "Mo Port Radio" Channel 16. At A/S Norsk Jernverks quay call sign. "Jernverks quay" Channel 16.
TUGS: Available and recommended for vessels above 13,000 d.w.t. 24 hours notice to be given. Ships' lines used.
BERTHING: Harbour Pilot recommended but not compulsory for small vessels. Details given through Pilot/Harbour Pilot.

Koksverket Pier	37 ft. depth alongside
Town Pier	25 ft. depth alongside
Jernverket Pier (Steel)	26 ft. depth alongside
Andfiskaa Pier	23 ft. depth alongside

CARGO-HANDLING FACILITIES: The harbour has the following facilities for handling cargoes, Norsk Koksverk A/S pier depth 36 ft.; length 427 ft. and 295 ft., North and South side handling following cargoes: ore, coal, coke, tar, bensol, ammonia and oil.

A/S Norsk Jernverk Quay: handling ore, coke, steel products and general cargoes. Length of quay, 823 ft.; depth 25 ft. A/S Bleivassli Gruber Pier, length 115 ft.; depth 23 ft. Has equipment and elevator for handling pyrites – fast loading. The Town Quay (Harbour Board Quay), length 823 ft. and depth 18 to 26 ft., handling general cargoes of all kind, with up to 15-ton lifts.

STEVEDORES: Ordered by Agents preferably in office hours 0900–1600 hrs. Exact time for commencement of work to be arranged with Agent. Vessels to pay for waiting hours for workers if delay not reported. If such report after office hours, vessel to pay for 2 hours.

MEDICAL: If in need of doctor/dentist preferably inform Agent from sea if vessel stays only 1 day.

FRESH WATER: Available at all piers from shore installations.

FUEL: All types available.

GANGWAY/DECK WATCHMAN: Available but not compulsory.

OPENING/CLOSING HATCHES: Crew allowed to open/close.

CUSTOMS ALLOWANCES: Per 10 days in Norway per crew member – 200 cigarettes or 200 gr. tobacco and 2 packages cig. paper, and 1 bottle spirits.

CARGO GEAR: Winchmen from shore required acc. to local tariffs.

REPAIRS: Small damages can be repaired.

AIRPORT: 12 km. to local airport "Rana Airport" connection with Bodoe (North) twice per day and Trondheim (South) twice per day.

TIME: GMT plus hour permanent.

HOLIDAYS: New Year's Day; Thursday before Good Friday; Good Friday; Easter Monday; Labour Day; National Day (17th May); Ascension Day; Whit Monday; Christmas Day and Second Christmas Day. No work can be arranged on any of these days.

TELEPHONES: Accidents/hospital: 51233; Ambulance: 51510; Fire: 51222 and Police: 51122.

SHORE LEAVE: No restrictions.

AUTHORITY: Port Manager, Mo Havnevesen.

MOLDE: 62.44 N. 07.10 E.

DOCUMENTS:

Health Certificate.
Crew Lists.
Passenger List.
Dangerous Cargo List.
Ship's Register.

PILOTAGE: Telegraphic address "Alesund Radio". Address of pilot station "Rundo".

ANCHORAGE: A well-protected harbour. Depth from 15 to 20 fathoms. Tide rises about 6 ft.

MAX. SIZE: Passenger vessels of 25,000 g.r.t. berth at Storkaia.

RADIO: Alesund Radio.

VHF: Molde Harbour Radio, Channel 16 and 12.

TUGS: None. Tugs called from Alesund.

BERTHING: Depths alongside quay 25 to 32 ft. LW.

A new port, 2 km. from the town. Two quays with roll-on/roll-off ramps. Depth alongside No. 1 – 6 m. and No. 2 – 12 m.

CRANES: 150 ton crane and 20 ton mobile crane.

STEVEDORES: Available, ordered by Agents.

MEDICAL: Hospital available.

FRESH WATER: By shore installation.

DENSITY: 1025.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: By crew or stevedores.

IDENTIFICATION CARDS: Not required.

REPAIRS: Most repairs possible.

SURVEYORS: Norske Veritas.

POLICE/AMBULANCE/FIRE: Police 51111; Ambulance 52011; Fire 51100.

AIRPORT: Aaro Airport, 4 km. from town.

SHORE LEAVE: Possible, no restrictions.

AUTHORITY: Molde Havnevesen, Molde.

MONGSTAD: 60.49 N. 05.02 E.

OPERATORS: Oil refinery operated by Rafinor A/S & Co., Mongstad, which company is owned by Norsk Hydro A/S, Norsk Olje A/S and Den Norske Stats Oljeselskap A/S (Statoil).

DOCUMENTS:

3 copies Crew List.
1 copy Crew Effects Declaration.
2 copies Ships Stores Declaration.
1 copy Health Declaration.
1 Passenger List (if any).

IMCO standard forms in most cases required.

On ship's arrival the following documents must be available: Letter of Registry, Outward Clearance from last port of call, Deratting or Deratting Exemption Certificate, and Certificates of Insurance for Civil Liability for Oil Pollution Damage. Non-member registered ships of the International Convention on Civil Liability for Oil Pollution Damage, 1969, must after 30th June, 1976, carry a Certificate issued by Maritime Directorate, PO Box 8123, OSLO-Dep., Oslo, Norway. Before this date Certificates issued by Denmark, Sweden and U.K. covering non-Convention registered ships, will be recognised.

PILOTAGE: Compulsory. Vessels will be berthed/unberthed by pilots from Fedje Pilot station (Position 60° 51′ N., 04° 39′ E.). Contact pilots on VHF Channel 16, 2/3 hours notice required.

ANCHORAGE: North-west of refinery area. However, not well sheltered and holding ground not good. No anchorage for VLCC's.

MAX. SIZE: Draft limitation at Crude Jetty 72 ft.

HEALTH: International procedure followed to obtain pratique. In case of suspected disease or fever on board, the port authorities to be informed in advance.

RADIO: Cable Agent ETA, cash, bunkers, personnel, bonded stores, or other special requirement. For the refinery's guidance also cable flange dimensions on ships' headers, cargo quantities acceptable and order of loading, quantity of clean ballast and estimated time for discharge, size of cargo to be discharged and max. pumping rates, max. acceptable loading rates, quantity of tank washings and estimated time for discharge.

TUGS: Two tugs of 2,650 b.h.p., each – bollard pull 36.5 tons situated at the refinery. Additional tugs available from Bergen.

BERTHING:

Berth No. 1 (for crude) – draft limitation 72 ft., length 124 m. – min. depth 125 ft.

Berth No. 2 (products) – draft limitation 38 ft., length 69 m. – min. depth 59 ft.

Berth No. 3 (products/coasters) draft limitation 22 ft., length 36.5 m. – min. depth 25 ft.

Berth No. 4 (petrol coke) draft limitation 21 ft., length 50 m. – min. depth 24 ft.

CARGO HANDLING FACILITIES:

Berth No. 1 – 4 × 16 in. plus 2 × 16 in./10 in. Woodfield autoflowbooms.

Berth No. 2 – 4 × 10 in. plus 2 × 8 in. Autoflowbooms.

Berth No. 3 – 2 × 8 in. plus 2 × 6 in. Autoflowbooms.

BALLAST: Deballasting facilities available at jetty Nos. 2 and 3. Tankage capacity 27,000 cu. m. All ballast to be discharged ashore.

MEDICAL: Medical attention available. Hospital facilities at Bergen.

DENSITY: Salt water.

FRESH WATER: Available from the jetties. Cost per ton Nkr. 2.50.

FUEL: All grades available.

FIRE PRECAUTIONS: Special safety regulation forms given when berthed.

CONSULS: Consuls available at Bergen from the following countries: Austria; Belgium, Brazil, Denmark, Finland, France, Great Britain, Greece, Iceland, Italy, The Netherlands, Panama, Peru, Portugal, Spain, Sweden, Switzerland, Turkey, Uruguay, West Germany.

REPAIRS: Repair shop facilities available. Repair work must not be commenced without the agreement of the Port Captain.

SURVEYORS: The following Classification Societies represented by Surveyor at Bergen: American Bureau of Shipping, Bureau Veritas, Det norske Veritas, Germanisher Lloyd, and Lloyd's Register of Shipping.

GANGWAY/DECK WATCHMEN: Available.

CUSTOMS ALLOWANCES: 200 cigarettes or 200 grammes tobacco and 1 bottle spirit or 2 bottles of wine, each man.

REPATRIATION: All facilities. Bus or Taxi transport to international airport.

AIRPORT: Flesland Airport, approx. 86 km. (54 miles) distance from Mongstad. Distance Bergen to Mongstad approx. 45 km.

TIME: Central European time i.e. GMT plus one hour.

POLICE/AMBULANCE/FIRE: Police telephone Knarvik 350504 and 350505. Ambulance and Fire fighting brigade available at the refinery.

TELEPHONES: No telephones on board. Long distance calls to be arranged via Agent. Local calls from Gatehouse.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes delivered on board on arrival.

PORT REGULATIONS: *Moorings:* Mixed moorings in the same direction are not allowed. Wire ropes shall have nylon "tails" not longer than 12 m. Nylon "tails" are available for purchase. Due to occasionally heavy swell in the fiord, particular attention is paid to the moorings.

AUTHORITY: Rafinor A/S & Co.

AGENT: Berle & Petersen A/S, N-5153 Fonnes (Norway), Telex: 42261 mogfs n, Tel.: Fonnes 186 (later this year to be changed to (47 5) 368523).

Head Office: Berle & Petersen A/S, P.O.B. 895, N-5001 Bergen. Telex: 42650 bepet n, Tel.: (47 5) 232010.

MOSJOEN: 65.51 N. 13.11 E. (See Plan Book)

DOCUMENTS:

Health Certificate.
Crew List.
Passenger List.
Ship's Register.
Cargo List.
Bonded Store List.

PILOTAGE: Pilot station at Asvaer, location 66° 15′ 9″ N. 12° 18′ 03″ E. Telegraphic address: Pilot Station, Asvaer. VHF Channel 16. Telegraph ETA 24 hours prior to arrival. Piloting around clock.

ANCHORAGES: Hellesvik. Location 66° 01′ 30″ N. 12° 54′ 20″ E.

RESTRICTIONS: No restrictions night entry. If draft above 33 ft. enter on high tide and commence discharging immediately.
HEALTH: Free pratique given automatically when "Q" flag not to be flown.
MEDICAL: Master to advise prior to arrival if medical attention required. Hospital facilities available.
RADIO: Rorvik Radio LGD.
TUGS: Stationed at Sandnessjoen. Have to be ordered through Agents 24 hours prior to arrival. Normally used by vessels above 20,000 d.w.t.
BERTHING: Draft above 33 ft. berthed only on high tide and commence discharging immediately. No restrictions on length and breadth.

Crane for bulk cargo (alumina), capacity 300 t.p.h. Mosjoen Aluminiumverk, private berth. Maximum outreach from quay – 15 m.

No other special facilities (roll-on/roll-off facilities may be constructed).
STEVEDORES: Ordered through Agents. No ETA to stevedores necessary.
DENSITY: Brackish in port.
FRESH WATER: Supplied from installations at berth.
FUEL: Gas oil, delivered by lorries.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Performed by vessel's crew.
CUSTOMS ALLOWANCE: 1 bottle spirits, 200 cigarettes, 200 gr. tobacco.
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Minor repairs possible.
TIME: GMT plus 1 hour. No alterations during year.
HOLIDAYS: New Year's Day; Good Friday; Maunday Thursday; Easter Monday; Workers' Day (1st May); 17th May; Ascension Day; Whit Monday; Christmas Day; Boxing Day.
POLICE/AMBULANCE/FIRE: Fire 70222; First Aid 70800; Police 71611.
AUTHORITY: Mosjoen Havnevesen.

NAMSOS: 64.28 N. 11.30 E.

DOCUMENTS:
Crew list.
2 Passenger lists.
2 Health Certificates.
Manifests.
Ship's papers.
PILOTAGE: Sea pilot stationed at Namsos. Contact through Rorvik Radio. Pilot boat: white painted 46 ft. long. Usual signals. Pilot boards at 64° 38′ N. 10° 51′ E. Pilot can be ordered by ship's Agent.
ANCHORAGE: Good anchorage inside harbour.
MAX. SIZE: Vessels up to 15,000 d.w.t. have entered harbour. 3 small oil berths with depth 18 ft. L.W.
HEALTH: Normal Norwegian regulations.
RADIO: Rorvik Radio. No radar or VHF service in the harbour.
TUGS: No tugs in Namsos. 1 tug stationed at Bangsund and can be hired.
STEVEDORES: Notify day before arrival to arrange gangs.
TANKERS: 3 tanker berths 18 ft. alongside L.W.
DENSITY: Average density 1020 in Spring, and in Summer 1015.
FRESH WATER: Available by hose. Capacity 10-15 t.p.h.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Stevedores operate hatches.
CERTIFICATES: Usual international certificates.
IDENTIFICATION CARDS: Not needed.
CONSULS: None.
REPAIRS: Small repairs available.
REPATRIATION: Organized by seamen's office.
AIRPORT: 4 km. from town. Regular service twice a day South and North.
TIME: European standard time. GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police 72151; Ambulance 72500; Fire 72000.
TELEPHONES: Can be placed on board.
SHORE LEAVE: Crew allowed ashore.
DELAYS: None expected.
AUTHORITY: Namsos Havnevesen Boks.

NARVIK: 68.26 N. 17.25 E. (See Plan Book)

DOCUMENTS:
Health Declaration in Norwegian form (if not available another form is possible).
6 Crew Lists.
1 Provision List.
1 Private Customs List.
Passenger List.
PILOTAGE: Tranoy Pilot station. Position 68° 11′ N. 15° 34′ E. Pilots request 24 hours notice. Cable address: Tranoy Pilot station. Before arrival pilot station Pilots should be called on VHF Channel 16.

Distance from Tranoy to Narvik is 46 miles. The Harbour Pilot will board and assist during berthing.
ANCHORAGE: Narvik Harbour. Pilot will advise anchorage.
RADIO: Cable Agents giving ETA, draft and cash required. Radio station: Rogaland Radio/LGB but other stations can be used.
RESTRICTIONS: No restrictions on night entry.
TUGS: Must be employed for tankers. 3 tugs available, capable of assisting vessels up to 250,000 d.w.t.
HEALTH: Free pratique, otherwise see "Documents".
BERTHING: Max. depth alongside 13.5 m. at LWOST, max. draft on sailing 13 m. A deeper sailing draft may be permitted if tide and weather conditions are favourable but the Master will be liable for any damage caused by a vessel with draft over 13 m.

2 boom-type shiploaders are available, on each side of the pier. If 2 vessels are loading simultaneously, 1 on each side of the pier, then only 1 loader may be used by each vessel. The designed capacity of each loader is 4,500 t.p.h. but average capacity of each loader is 2,000/3,000 t.p.h. depending on quality and kind of ore to be loaded.

Maximum outreach from fender line is 15 m. The height from the water to the top of the vessel's coaming must not exceed 13 m. (Pier 3) and 11 m. (Pier 4).

The length of the ore pier is 250 m. on the outside (No. 3) and 220 m. on the inside (No. 4).

The shiploaders are able to travel over a distance of 145 m. so larger vessels (65,000 tons d.w.t.) may have to shift during loading operations. The length of the vessel from the bow (or bulbous bow) to the aftermost loading point must not exceed 202 m.

The limit on beam is 37-38 m. for ore/bulk carriers and 39-40 m. for OBO vessels (approx.)

A stowage plan is to be handed to the Agent and foreman on arrival, stating the quantity in metric tons and loading rotation of the hatches, also the estimated draft on sailing.

Weighing: Electronic conveyor weighing with an average accuracy better than ±0.15%.

New Ore Pier No. 5:

The quay is 208 m. long and has a water depth of 27.5 m. which allows tonnages of about 350,000–400,000 d.w.t. In the first stage only 1 ship's loader will be built but room will be left for an additional one. The loading capacity is 11,000 tons of ore or 7,500 tons of pellets per hour.

Vessels of up to 150,000 tons will be loaded without shifting the vessel. Larger vessels will have to be shifted alongside during loading.

Fagerneskaien: Situated in the Southern part of the harbour, may be used by iron ore vessels during repairs, etc. Length of quay 230 m. Depth alongside at LW 15 m.
STEVEDORES: Ordered by Agent. Not necessary to contact stevedores.

Working hours: Ordinary working hours 24 running hours, except Saturday 2200 to Sunday 0600 hrs.

Loading does not take place on the following holidays:

December 24th	1300 hrs.	– December 26th	2200 hrs.
December 31st	1300 hrs.	– January 1st	2200 hrs.
Maundy Thursday	1400 hrs.	– Easter Monday	2200 hrs.
Whitsun Eve	1400 hrs.	– Whit-Monday	2200 hrs.
April 30th	2200 hrs.	– May 1st	2200 hrs.
May 16th	2200 hrs.	– May 17th	2200 hrs.

DENSITY: 1020.
FRESH WATER: Ore berth has supply of fresh water. Otherwise delivery by tugs.
FUEL: Only clean oil (diesel) and lubricating oil available.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: May be handled by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams tobacco and 0.75 litre spirit or 2 bottles of wine. Must be declared on Customs list together with radios, tape recorders, binoculars, etc.
IDENTIFICATION CARDS: Not required.
CONSULS: Swedish, Danish, British, West German.
REPAIRS: Only small deck and engine repairs possible.
DRY DOCKS: None.
AIRPORT: Bardujoss 3 hours bus trip from the port. South-bound planes twice a day.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; May 1st; May 17th; Easter; Christmas Day; December 26th.
POLICE/AMBULANCE/FIRE: Police 41060; Hospital 44044; immediate help 4300 (only at night time); Ambulance 43600; Fire 41122.
LAUNCHES: The Agent will supply a time table and tickets on arrival. If a launch is required, the "B" flag or red light should be displayed from the signal mast.
TELEPHONE: Local and long-distance calls can be ordered via Harstad Radio on VHF (Channel 16).

Vessels alongside the piers may hire a telephone but continuous telephone watch should then be kept on board.
SHORE LEAVE: Allowed.
AUTHORITY: Harbour Master, Narvik Havnevesen.

OSLO: 59.54 N. 10.43 E. (See Plan Book)

DOCUMENTS:
Maritime Declaration of Health.
Sealing Certificate.
2 Crew Lists.
2 Passenger Lists.
2 Lists Crew Personal Effects.
Provisions List.
3 Cargo Manifests.
Certificate of Tonnage.
Dangerous Cargo List.

PILOTAGE: Compulsory. Pilot boards at Faerder Lighthouse, 50 miles from docks. Give 6 hours notice by R/T 2182 kHz or VHF Channel 16 to "Faerder Pilot".

ANCHORAGE: Good sheltered anchorage in Western Harbour Basin, depths up to 20 m.

RESTRICTIONS: Vessels may enter at any time. No tide or current.

MAX. SIZE: Vessels up to 34 ft. draft may berth at Filipstad Quay and Sjursoya Quay.

Tankers: Up to 36 ft. draft at Oslo, or 38 ft. draft at Fagerstrand.

HEALTH: International procedure followed to obtain pratique. In case of suspected disease or fever on board, inform the Harbour Master's office in advance. When arriving from a Norwegian port, pratique is automatic.

RADIO: Communicate through Oslo Radio, call sign LGO. Harbour Master's Office equipped with VHF, Channel 16.

TUGS: Sufficient tugs available for all requirements.

BERTHING: Instructions given from Harbour Master. Masters of ships are requested to send their ETA to the Harbour Master's Office through Oslo Havne radio, VHF Channel 16.

Filipstad Quay: up to 11 m. depth alongside.
Sjursoya Quays: up to 11 m. depth alongside.
Vippetangen: up to 10 m. depth at Pier No. 1.
Pipervika: up to 8 m. depth at Akershus Pier.
Bjorvika: up to 7.30 m. depth at Lang Quay.
Bispevika: up to 11 m. depth at Sorenga Pier.
Gronlia: up to 8.50 m. depth alongside.
Kongshavn Quays: up to 6 m. depth alongside.
Bekkelaget: up to 10.80 m. depth alongside.

BULK CARGO FACILITIES: Container traffic handled at Filipstad, Bekkelaget and Sjursoya North.

Sorenga Pier equipped for palletised cargo handling and containers, ro/ro.

8 new berths for roll-on/roll-off traffic. Cranes for ISO-container and other container handling equipment, quay cranes and mobile cranes of 30 tons capacity.

Sjursoya North: cement, phosphate, grains, molasses and containers.
Sjursoya South: gasoline and oil, propane and gas.
Bekkelaget North: molasses, general cargo and oil.
Sorenga: coal, coke, sulphur, china clay and leca.
Pier 3: grains and sugar.
Kongshavn: building material, coal and phosphate.

STEVEDORES: Arranged by Agents. Working hours 0700-1600 hrs., Saturdays overtime is voluntary.

TANKERS: Also see "Slagen".

Oslo: Oil pier at Sjursoya, depth alongside 12 m. A tug required to stand by during discharge.

Fagerstrand: Terminal operated by Norske Braendselolje A/S situated in Oslo fjord, 12 miles S. of Oslo. 1 berth for tankers up to 30 ft. draft.

1 berth for tankers up to 38 ft. draft.

MEDICAL: All facilities available. Masters to advise by radio prior to arrival if medical attendance required on board.

DENSITY: Salt water, 1025.

FRESH WATER Available by pipeline from all quays.

FUEL: All grades available, ex-wharf at many quays. Can be delivered by barge.

FIRE PRECAUTIONS: 2 boats fully equipped with fire-fighting equipment.

CUSTOMS ALLOWANCES: 200 cigarettes allowed weekly, 1 bottle spirit weekly, for each man.

CARGO GEAR: International Safety Regulations to be observed.

IDENTIFICATION CARDS: Not required.

CONSULS: Following countries are represented at Oslo:

Austria
Bangladesh
Benin
Bolivia
Canada
Chile
Colombia
Costa Rica
Cyprus
Denmark
Dominican Republic
Ecuador
Ethiopia
Finland
France

Thailand
Tunisia
Uruguay
Venezuela

REPAIRS: All types of hull and machinery repairs can be effected.

DRY DOCKS: 1 ship repair yard managing a total of 3 floating docks with lifting capacity of up to 19,000 tons, max. length 665 ft.

1 graving dock; length 564 ft. depth 23 ft.

REPATRIATION: All facilities available without restrictions.

AIRPORT: Fornebu Airport situated 8 km. from city centre. Regular services to Europe and U.S.A.

TIME: Local time, GMT plus 1 hour all year round.

HOLIDAYS: January 1st; Good Thursday; Good Friday; Easter Monday; May 1st; May 17th; Whit Monday; Christmas Day; Boxing Day.

No cargo work normally on Saturday, Sunday and Holidays.

POLICE/FIRE/AMBULANCE: Police, tel.: 33.12.90; Fire, tel.: 42.99.00; Ambulance, tel.: 20.10.90.

TELEPHONES: Can be placed on board vessels at most quays.

SHORE LEAVE: No restrictions.

DEVELOPMENTS: Extensions of the land areas in the port by approx. 200,000 sq. m. Quay extensions of 1,000 m. Storage halls in hills, 100,000 sq. m. or more, sheds and service buildings.

AUTHORITY: Port Director, Oslo Havnevesen.

RISOR: 58.43 N. 09.14 E.

DOCUMENTS:

3 Crew Lists.
3 Customs Lists.
Ship's Register.
Bill of Lading.

PILOTAGE: VHF Channel 16. 45 ft. long boat "Los" on both sides. Will be instructed by Pilot over VHF.

ANCHORAGE: In 15 fathoms depth.

MAX. SIZE: 10,000 d.w.t., draft 28 ft.

RADIO: Farsund and Tjomoy Radio. VHF Channel 16. No radar.

TUGS: No tugs for berthing.

STEVEDORES: Available 24 hours notice of ETA required.

FRESH WATER: Available by pipe-line at berth.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: May be performed by ship's crew.

CUSTOMS ALLOWANCE: Tobacco: Wine/Spirits: 200 cigarettes per crew member for 10 days. 3 bottles spirit for ship's Master only for 10 days.

IDENTIFICATION CARDS: Not needed.

CONSULS: French and Swedish.

REPAIRS: No shipyard.

AIRPORT: 10 miles; every day service.

TIME: GMT plus 1 hour.

HOLIDAYS: Work can be arranged by 100% overtime.

TELEPHONES: Can be arranged on board.

AUTHORITY: Harbour Master, Risor Havnekontor.

SARPSBORG: 59.17 N. 11.07 E.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
1 Health Certificate.
3 Manifests.
1 Bill/Lading.
2 Tobacco/spirit Lists.

PILOTAGE: Pilot ordered by Faerder Losstasjon or Herfol Losstasjon via Tjome Radio. Harbour office can be contacted by VHF. Pilotage compulsory for all vessels of 100 g.r.t. and over.

ANCHORAGE: Between Struten Light and Stromtangen Light.

MAX. SIZE: 24 ft. draft.

HEALTH: No particular action necessary, but Agent to be informed.

RADIO: Tjome Radio.

VHF: Harbour Master's office, Channels 16 and 12. Day and night service.

TUGS: Small harbour tug available.

BERTHING: A roll-on/roll-off berth has been built to handle vessels of up to 6,000 tons gross. Depth alongside 28 ft. Vessels will moor alongside the old Alvim pier enabling them to work through the side doors and stern doors.

STEVEDORES: Ordered through Agent.

MEDICAL: If medical attention necessary Agent must be informed in advance.

FRESH WATER: Only at Alvim Kai, average 15 t.p.h.

FUEL: Fuel obtained only with tank cars.

GANGWAY/DECK WATCHMEN: No gangways from shore. Watchman can be obtained.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: 100 gr. tobacco or 200 cigarettes per crew member. Wine 1 litre per member or 1 bottle of spirit.

IDENTIFICATION CARDS: Have to be used for Melloes Quai only.

CONSULS: Denmark, Finland, Iceland, Sweden, Greece, all have vice-consulates.

REPAIRS: Deck and engine repairs possible.

DRY DOCKS: One for 3,100 tons d.w.t.

REPATRIATION: No facilities.

AIRPORT: Fornebu Airport 110 km. from Sarpsborg. Served by regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January; 1st May; 17th May; 25th/26th December. No work on these days.

POLICE/AMBULANCE/FIRE: Police 52000; Ambulance 52040; Fire 51234.

TELEPHONES: No arrangements exist for placing telephones on board.

SHORE LEAVE: No restriction.

AUTHORITY: Harbour Master, Sarpsborg Havnevesen.

SAUDA: 59.40 N. 06.22 E. (See Plan Book)

DOCUMENTS:
Health Certificate.
Crew List.
Derating Certificate.
Ship's Register.

PILOTAGE: Skudefjorden Pilot Station, tel. 047-58337 (or Pilot boat "Skudefjord" on VHF). Kvitsoy, position 59° 05' N., 05° 20' E.

ANCHORAGES: Safe anchorages everywhere in Sauda Harbour area.

RESTRICTIONS: No restrictions night entry – but sea Pilots usually refuse to take in vessels over 10,000 d.w.t. between 1800 hrs. and 0600 hrs. during Winter time, November-January.

MAX. SIZE: Draft 30 ft. – but vessels over 30 ft. are allowed to get alongside at owner's own risk. Length no restriction. Breadth, 75 ft.

RADIO: Cable Agents giving ETA, draft and cash requirement via Rogaland Radio. No VHF station at Sauda.

TUGS: Not necessary.

BERTHING: May take place at any time provided quay available.
(1) Import Quay: 250 m. long. 2 unloading towers with a capacity of about 3,500 tons ore per day.
(2) Export Quay: 115 m. long. 2 loading cranes with a capacity of about 1,600 tons ferro alloys per day.

STEVEDORES: Ordered by Agents. Normal working hours 0700–2300 hrs. and on Saturday 0700–1200 hrs.

MEDICAL: Masters to advise by radio prior arrival if medical attendance required aboard. Modern hospital.

DENSITY: Brackish in port area, average salinity 2.39%.

FRESH WATER: Good fresh water available, delivery irrespective of quantity.

FUEL: No fuel available at Sauda, must be ordered from Stavanger.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Crew allowed open and close.

CERTIFICATES: Registered Tonnage Certificate required.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per crew member (Captain double up). Wine/Spirit, 3 bottles for Captain and 1 bottle either spirit or wine for each crew member.

CARGO GEAR: No additional requirement.

IDENTIFICATION CARDS: Admittance cards to be filled in to pass the gate.

CONSULS: No consulates at Sauda. Nearest in Stavanger.

REPAIRS: Minor repairs possible.

DRY DOCKS: No dry dock at Sauda. Nearest in Stavanger and Haugesund.

REPATRIATION: Any repatriation may take place.

AIRPORT: Stavanger and Haugesund.

TIME: GMT. plus 1 hour.

HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Labour Day (May 1st); National Day (May 17th); Ascension Day; Whit Monday; Christmas Day; Second Christmas Day (December 26th) (no work on these days).

POLICE/AMBULANCE/FIRE: Police 52300; Ambulance 52811; Fire 52200.

TELEPHONE: If wanted, telephone may be placed on board (apparatus No. 52163) free of charge.

REGULATIONS: Strictly prohibited throw wastes or garbage into sea within port area.

DELAYS: All vessels loaded/unloaded in turn, very seldom any congestion in port.

AUTHORITY: Sauda Havnestyre.

AGENT: Electric Furnace Products Co. Ltd., 4201 Sauda, Norway. Tel. 52561 or 52570. Telegram "Saudecia". Telex 33166 EFPCO N.

SKIEN (incl. Menstad): 59.12 N. 09.38 E.

DOCUMENTS: Clearance documents, forms obtainable from Customs Officers on arrival.
Deratisation Certificate.
Bill of Lading.
Manifests.
2 Crew lists.
Ship's Register.

PILOTAGE: Ship's Agent gives ETA pilot station 24 hours before arrival and direct to Pilots 2 hours before arrival. Telegraphic address: Pilot station, Langesund. VHF Channel 16 to be used when contacting Pilots. Pilot boards at Steingrunnen light buoy, Langesund bay, 58.55 N. 09.44 E. Flag, sound and morse signal "G". Pilotage compulsory for all foreign vessels but dispensation can be obtained for smaller Scandinavian vessels.

BRIDGES: On passage from sea, vessels pass Porsgrunn where there is a lifting bridge with breadth 30 m. Signals for passing bridge inward: 1 long and 2 short sound signals. Outward signals, 1 long and 1 short sound. There is also a bridge at Brevik: Max. height 45 m.

TUGS: One tug available.

BERTHING: Between Porsgrunn and Skien, Norsk Hydro have loading place, Menstad, for vessels up to 425 ft. length and max. draft 18 ft. 06 in.Between Menstad and Skien Grain Silo for vessels with max. length 425 ft. and max. draft 18 ft. 06 in. At Skien vessel's length must not exceed 335 ft. and max. draft 18 ft. 06 in.

DENSITY: At Menstad and Skien practically fresh water.

STEVEDORES: Ordered by Agents.

FRESH WATER: Obtainable.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

RADIO: Tjome Radio/LGT or Farsund Radio/LGZ.

OPENING/CLOSING HATCHES: By crew or stevedores.

CUSTOMS ALLOWANCES: 400 cigarettes and 4 bottles spirit for the Master. 200 cigarettes and half a bottle spirit for each crew member.

CONSULS: Belgium, Holland, Sweden, Germany, Finland.

REPAIRS: All repairs possible. Dry dock: Lifting capacity: 2,000 tons. Radar/radio services can be arranged through Agents.

MEDICAL: All medical assistance to be arranged via Agents.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Eve (half day); Easter Monday; Labour Day (1st May); Ascension Day; National Holiday (17th May); Whit Monday; Christmas Eve (half day); Christmas Day; (26th December), New Year's Eve (half day).

REPATRIATION: Facilities exist for effecting crew changes and repatriation.

RESTRICTIONS: No restrictions on night entry for vessels of above mentioned sizes.

AIRPORT: International at Oslo and Skien airport.

AUTHORITY: Skien Havnevesen.

SLAGEN: 59.20 N. 10.31 E. (See Plan Book)

Oil refinery pier operated by A/S Norske Esso, Norge.

DOCUMENTS:
Four Crew Lists.
Manifest of Crew Personal Effects.
Stores List.
Cargo Papers.
Bill of Health.
Ship's Register.

PILOTAGE: Compulsory for all foreign vessels. Pilot embarks from white painted cutter with the name "LOS" on the side at a position 3 miles N.N.E. of Ferder lighthouse. Call Ferder Pilot station at least 2 hours in advance via VHF Channel 16, working Channel 13, or via Tjome Radio on medium wave. Due to deep water there are no convenient anchorage available in vicinity of the Pilot station.

ANCHORAGE: N.N.W. of pier head. Particulars regarding anchorage will be given by Pilot.

MAX. SIZE: Tankers up to 350 m. length and 66 ft. draft can be berthed.

HEALTH: Clearance is effected on arrival. International procedure followed to obtain pratique. In case suspected disease or fever on board inform port authorities in advance.

RADIO: 72 hours prior to arrival at Pilot station, radio Agent ETA, cash, bunkers, personnel, bonded stores, or other special requirements. ETA should be repeated 48, 24 and 12 hours prior arrival Pilot station. All radio messages should be transmitted via Rogaland Radio, and when within closer range via Tjome Radio. When Pilot has embarked, contact should be established with Slagen Harbour Office via VHF Channel 16 or 14 for exchange of information prior to berthing, such as berth availability, current, wind, draft, ballast to be discharged, etc.

TUGS: Are available up to 4,000 i.h.p. Tankers over 20,000 d.w.t. required to have tug standing by throughout discharging operations. The charge for standby tug is to owner's account.

BERTHING: The East side of the pier (crude side) is used for loading and discharging. The West side (product side) is used for loading products only. Berth No. 1. Shore based gangway for use on VLCC's.
Berth No. 1 and crude berth – max. length 350 m., max. draft 66 ft.
Berth No. 2 max. length 192 m., max. draft 34 ft.
Berth No. 3 for coasters and barges.

HOSES: Crude oil berth: Four 12 in. lines, max. pressure 200 psig.

Berth No. 1:	One	10 in.lines for		dirty oils	
	Two	10 in.	,, ,,	clean products	
	One	8 in.	,, ,,	fuel (bunker)	
	One	4 in.	,, ,,	LPG	
	One	3 in.	,, ,,	,,	
Berth No. 2:	One	12 in.line for		clean products	
	Two	8 in.	,, ,,	,,	,,
	One	10 in.line for		dirty products	
	One	6 in	,, ,,	,,	,,

BALLAST: Shore ballast capacity 100,000 bbls. All ballast to be discharged ashore.

POLLUTION: A submersible oil boom has been installed enclosing the oil pier. Normally, the boom rests on the sea-bed, but when needed it will be raised to the surface using compressed air.

The oil boom and its system of anchorage will be damaged by vessels' anchors. In order to ensure that the oil boom is operable at all times, and to avoid expensive repairs, which will be charged to the ship responsible for the damage, great care should be taken in connection with manoeuvres along the Slagen pier, which will require the use of anchors.

The drawing of the pier shows the position of the oil boom and the anchorage system. Except for emergency situations, anchors should not be used within the shaded area.

All manoeuvres to and from berths should be discussed with the Harbour Office (Slagen Harbour Radio, Channel 14). The Harbour Office will give you information regarding current strength and setting.

Approach to Berth 2, and Berth 3 if Berth 2 is not occupied, is facilitated by the fendered sliding front.

MEDICAL: Medical attention and hospital facilities available.

DENSITY: Occasionally brackish.

FRESH WATER: Available from pier.
FUEL: All grades available.
FIRE PRECAUTIONS: Special safety regulation forms given when berthed.
GANGWAY/DECK WATCHMEN: Oil Pollution/Safety Inspector placed on board all vessels over 20,000 d.w.t.
CUSTOMS ALLOWANCE: 200 cigarettes/or 200 grammes tobacco and 1 bottle spirits for each man.
IDENTIFICATION CARDS: Gate pass delivered to ship when berthed.
CONSULS: Denmark, Finland, France, Great Britain, Netherlands, Spain, and Sweden have representatives in Tonsberg. W. German consul in Sandefjord. All countries represented in Oslo.
REPAIRS: All kind of ship repairs can be undertaken by nearby ship yards. Service for radio, gyro, radar, echo sounder, data bridge, etc. available. Also classification surveyors representing NV, LR or AB can be called upon.
DRY DOCKS: Available at Sandefjord about 35 miles from Slagen.
REPATRIATION: Changes of crew are available. Transportation by train and plane from Oslo (about 100 km. from Slagen), passenger lines from Oslo. Hotel accommodation available at Tonsberg (10 km. from Slagen).
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; Maunday Thursday; Good Friday; Easter Monday; Labour Day (1st May) 17th May; Ascension Day; Whit Sunday and Whit Monday; Christmas 25th and 26th: Discharging/loading all days.
POLICE/AMBULANCE/FIRE: Police Tonsberg 13355; Ambulance/Fire local at the refinery.
TELEPHONES: Available at berth.
SERVICES: Tanker cleaning services available at Horten, about 15 miles from Slagen.
GENERAL: No ship may immobilize its engines, steering gear, etc. whilst alongside Slagen Jetty.
SHORE LEAVE: Crew members allowed to go ashore.
AUTHORITY: A.S. Norske Esso, Tonsberg.
AGENCY: Several shipbroker firms are established in Tonsberg and may be called upon as acting Agents for owners and/or charterers. A/S Norske Esso, S & T Dept. act as general Agent for all Exxon owned tonnage, cable address "Essoship" Tonsberg.

STAVANGER: 58.58 N. 05.44 E. (See Plan Book)

DOCUMENTS:
Declaration of Health, 1 copy.
List of Goods, including stores, 1 copy.
Crews Lists of Goods liable to duty, 1 copy.
List of Goods, 2 copies for each port of discharge. All Bills of Lading to be entered with marks, numbers, weight and quantity.
General List of Goods, one copy.
A form for entering ports of call where discharging will take place.

PILOTAGE: Vessels approaching from sea and desiring a Pilot should order at least 24 hours notice in so far as possible and confirm arrival at Pilot station at 2 hours notice. Advance order can be sent in following manners:
(*a*) From ships at sea over radio direct to sea Pilot watch (calling frequency 2182 kc/s, from 2 minutes past until 10 minutes past each full hour, or over VHF radio-telephone calling, frequency 156.80 mc/s; Channel 16).
(*b*) From ships at sea over coastal radio station to Pilot station or Pilot office.
(*c*) From broker or shipowner over telephone to sea Pilot station or to any Pilot office which will immediately convey report to sea Pilot station.

Vessels lying in port and desiring Pilot will order Pilot from nearest Pilot office during its office hours and if possible at 4 hours notice.

Vessels approaching from sea as well as vessels lying in port shall when making an advance order state name and destination of vessel and whether 1 or 2 Pilots are desired.

Pilot will be despatched to ships in accordance with advance orders, and vessels are therefore requested to comply with foregoing rules as far as possible in order to avoid having to wait for Pilot.

International provisions for summoning Pilots by signal flags or blue lights, etc., are still in force, but should in future be used as a supplement to radio communications or as sole communication in emergencies.

Pilots are taken on board at:

A. *Feistein Lighthouse*, 19 miles South of Stavanger, or in bad weather 6 miles North of lighthouse under the lee of Rott.

B. *Skudefjorden*, 18 miles N.W. of Stavanger. In bad weather under the lee of Karmoy or Kvitsoy, as weather permits.

Pilot boats are stationed at Tananger and Skudesneshavn. No boats are out cruising.

RADAR/VHF: Radar service for inner harbour. At Kvitsoy Pilot station radar service may be obtained over VHF Channel 16.
ANCHORAGE: Found in the Byfjord, 3 nautical miles North of Stavanger. Harbour pilots recommended when anchoring.
MAX. SIZE: Largest depth alongside goods and passenger quays is 30 ft. Depth alongside oil refinery 16.5 m. Max. draft for tankers, 48 ft.
TUGS: Normally not used.
BERTHING: The coasting and the foreign trade is located in the Western harbour, comprising the 2 main quays, namely the Skagen Quay and the Strand Quay. These quays measure 1,600 m. with depths alongside 24 to 30 ft.

The quays are equipped with one 6-ton crane and eight 3-ton cranes. A floating crane with a lifting capacity of 65 tons available.

Grain: Rogaland Felleskjop: Capacity for storing 72,000 tons quay length 190 m., depth alongside 48 ft. Discharging capacity 200 t.p.h. Stavanger Havnesilo: Storing capacity 140,000 tons, quay length 170 m., depth alongside 51 ft. Discharging capacity 500 t.p.h.

Roll-on/roll-off: Traffic is offered by a ferry berth constructed for ships up to 5,000 g.r.t., depth alongside 26 ft.

Offshore oil-exploration bases: Aker-Norsco A/S at Risavik, Tananger North Sea Exploration Services A/S, Dusavik.

STEVEDORES: No particular ETA advices required.
MEDICAL: Agents should get advance notice to secure speedy service. Hospital facilities available.
TANKERS: Discharge at Sola refinery terminal where there are 3 berths, depth alongside up to 16.5 m. It is intended to enlarge these facilities to accommodate 200,000 d.w.t. vessels with restricted draft.

Esso Norske: 3 nautical miles South of central harbour, depth alongside 45 ft.

Norske Shell A/S: 14 nautical miles S.W. of central harbour, depth alongside 38 ft.

Norske Braendselolje A/S: 7 nautical miles South of the central harbour.

Texaco Oil: 1 nautical mile from central harbour, depth alongside 25 ft.

A/S Kulimport: Coal and coke. Length of wharf 116 m., depth alongside 27 ft.

DENSITY: 1025, no change in relation to state of tide.
FRESH WATER: Delivered from quay or from water boat.
FUEL: Normal grades available without advance notice.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Usually carried out by crew.
CUSTOMS ALLOWANCE: Tobacco: 20 cigarettes per day. Wine and/or Spirit: 2 bottles of wine or 1 bottle of brandy.
CONSULS: Germany, C. Middelthon, Tel. 21.040; Denmark, Leifbuch Hansen, Tel. 27.575; U.K. Colin W. Peck, Tel. 23.652; Sweden, Charles R. Bergensen, Tel. 27.500.
REPAIRS: All kinds of repairs available.
DRY DOCKS: One, 545 by 75 by 24 ft. Marine slipway up to 1,500 d.w.t.
AIRPORT: 10 km. from port. Airlines to Continent, U.S.A.
TIMES: GMT plus 1 hour. No alterations during year.
HOLIDAYS: 1st January; Maunday Thursday; Good Friday; Easter Monday; 1st May; 17th May; Whit Monday; Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Police Tel. 31.520; Ambulance 21.500; Fire 22111.
TELEPHONES: There are arrangements for placing telephones on board.
SHORE LEAVE: No restrictions.
AUTHORITY: Stavanger Havnevesen.
AGENT: C. Middelthon's Dampskibsexpedition, Skansegt. 13–15, POB 27, 4001 Stavanger. Tel. 21040. After office hours: 24936; 32541 Telex: 33034 "Cmdex".

SUNNDALSORA: 62.41 N. 08.36 E.

DOCUMENTS:

General Declaration
Cargo List
Cargo Manifest
Personal Effects List

PILOTAGE: Telegraphic address of Pilot Station: "Grip Pilot". Description of Pilot Boat: White hull, orange wheelhouse, length 43 ft., speed 18 knots. The Pilot has to be taken on board 1 nautical mile East of Grip Lighthouse (Latitude: 63° 14′ N., and Longitude: 07° 37′ E.), no alternative area. No anchorage for vessel awaiting Pilot.
ANCHORAGE: Poor conditions in the Sunndalsfjord. Possible to anchor at Freifjord and Bolgsvaet West of Kristiansund.
RESTRICTIONS: No restrictions.
MAX. SIZE: Max. draft 34 ft.
HEALTH: "Declaration of Health" to be issued before arrival.
RADIO: Rogaland Radio and (20–30 hrs. before arrival) Alesund Radio.
VHF: For inner harbour on Channel 16 (normally in use when mooring).
RADAR: No Port Radar Service.
TUGS: Not available in Sunndalsora. Nearest Alesund, steaming time about 12 hours. Tugs only required when Pilot/Master find it necessary.
BERTHING: Length of quay: 1,007 ft. Low water depth: 34 ft. Load/discharge normally by shore equipment.
CRANES: 2×6 tons, 1×10 tons and 1×50 tons.
BULK CARGO FACILITIES: 1 grab crane 280 t.p.h.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: No notice required.

MEDICAL: Doctors available in Sunndalsora. Nearest hospital: Kristiansund or Molde (60 miles from Sunndalsora).
TANKERS: The usual rules for tankers to be complied with.
DENSITY: Average density of the port 1019 – 1020.
FRESH WATER: Available.
FUEL: Available in smaller quantities (from Mobil and BP).
FIRE PRECAUTIONS: No specific precautions.
CONSULS: None. Nearest Kristiansund: Great Britain, Denmark, Finland, France, Holland, Portugal, Sweden, West Germany.
REPAIRS: Only small repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: Nearest Kristiansund (Norske Veritas) and Bergen (Lloyds).
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Opening/closing to be carried out by crew.
CUSTOMS ALLOWANCE: Quantity permitted for each Crew member to be held out of bond: 200 cigarettes or 200 grams tobacco, 1 bottle spirit and 1 bottle of wine.
CARGO GEAR: Load /discharge effected by shore gear.
REPATRIATION: Crew changes and repatriation possible.
AIRPORT: Kvernberget (Kristiansund) and Aro (Molde), both at 60 miles distance and with regular air service.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: May 1st and May 17th. No cargo work can be arranged on those days.
POLICE/AMBULANCE/FIRE: Police Tel.: 91166, Ambulance (doctor) 91479, Fire 91122, Lifeguard 91933.
TELEPHONE: On request, telephone may be rented from Ardal og Sunndal Verk a.s.
SERVICES: Not available. Nearest Kristiansund or Molde.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Ardal og Sunndal Verk a.s. demands identification cards, obtained from Dock Master.
REGULATIONS: Forbidden to take photographs within boundaries of Ardal og Sunndal Verk a.s.
DELAYS: Usually no delay if notice of arrival given to Agent in good time.
DEVELOPMENTS: No developments expected in foreseeable future.
GENERAL: No cargo on Saturday and Sunday.
AUTHORITY: Sunndal Havnevesen, Sunndalsora.

SVOLVAER: 68.14 N. 14.35 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Custom Documents.
Stores List.
Manifest.
Bill of Lading.
Ship's Papers.
Valid Deratisation Exemption Certificate.
Ships arriving from Finland, Denmark, and Sweden need Customs permit from last port.

PILOTAGE: Vessel approaching Svolvaer may call Bodo Radio, 2182 kc/s. by radio asking for Svolvaer harbour pilot. Telegraph ETA Svolvaer 24 hours before arrival. All communication with harbour pilot boat is via Bodo Radio. No VHF. Exact position for pilot boat is 68° 11′ 30″ N. 14° 36′ 00″ E. In the event of bad weather call Lodingen Pilot station, position 68° 24′ 00″ N. 16° 02′ 00″ E., via Bodo Radio for further information. Different types of pilot boats are used, but usually the pilot boat flies pilot flag. No special requirements for boarding, except usual pilot ladder.
ANCHORAGES: Boundaries for safe anchorage 68° 13′ 36″ N. 14° 37′ 00″ E., 68° 13′ 48″ N. 14° 36′ 12″ E. Depth in area about 25 fathoms.
RESTRICTIONS: Ships of 2,000 tons or more berthing at daylight only.
MAX. SIZE: Max. permissible length 520 ft., draft 30 ft.
HEALTH: Pratique is automatic given by radio. Vessel only required fly yellow flag. In event of any suspected disease or fever on board call Svolvaer Harbour Master by telephone via Bodo Radio (2182 kc/s.).
RADIO: Call Bodo Radio by R/T 2182 kc/s. or VHF-Channel 16. Svolvaer Harbour office VHF-Channel 16.
TUGS: No tugs available.
STEVEDORES: All information regarding gangs, loading and discharging rates can be obtained by calling ship's Agent in Svolvaer via Bodo Radio.
MEDICAL: Hospital facilities available.
TANKERS: There are 2 discharging berths for oil carriers in Svolvaer. Diameter of lines at B.P. berth 6 in. and 8 in., at Shell 8 in. At the Shell berth tankers moor stern to and discharge through stern lines.
DENSITY: Density in port is 1025.
FRESH WATER: Is delivered from piers by hose with a rate of about 20 t.p.h. Water is not available at B.P. berth.
FUEL: All kinds of fuel oil are available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally done by ship's crew but can also be done by stevedores.
CERTIFICATES: Ship's Register Certificates.
CUSTOMS ALLOWANCE: Tobacco: Quantity for each crew member is 20 cigarettes or 20 gr. tobacco and 20 leaves cigarette papers per day. Wine and/or Spirit: For crew members 1 bottle spirit or wine (0.75 litre) for each passenger 0.25 litre.
IDENTIFICATION CARDS: Not required.
CONSULS: Swedish and Italian consulates. Lloyd's sub agent.
REPAIRS: Nearly all types of engine and deck repairs. Both for internal combustion and turbine engines.
DRY DOCKS: No dry docks in port, only slipways for ships up to 160 ft.
REPATRIATION: Facilities for effecting crew changes are available.
AIRPORT: Four km. from town. Nearest main airport is Bodo.
TIME: Local time is GMT plus 1 hour.
HOLIDAYS: Official holidays stated by Norwegian Government.
POLICE/AMBULANCE/FIRE: Call telegraph station Svolvaer.
TELEPHONES: Phones on pier.
GENERAL: Svolvaer is the main port in Lofoten Island, and a typical fishing harbour. Radar-Decca-Radio and VHF service, and all other electrical services can be executed.
SERVICES: Compass adjusting.
AUTHORITY: Harbour Master Svolvaer.

THAMSHAVN (Thamshamn): 63.20 N. 09.52 E.

DOCUMENTS:
Health Certificate.
Crew List.
Passenger List.
Store list.
Bill of Lading.
3 Manifests.

PILOTAGE: 24 hours prior arrival Grip, Pilots can be ordered by cable to "Loskontoret, Kristiansund N." or by telephoning Kristiansund Pilot Office, tel. 74333 during office hours, and 71481 private. Pilots can also be ordered by radio through Kristiansund Radio or through Agents. Use Channel 16 for VHF., contact to Kristiansund Pilot Office, or pilot boat. Pilot boat equipped with radio telephone 2182, carries red and white flag during day and white and red light during night.
ANCHORAGE: Vessels should anchor 150 m. off piers where depth between 26 and 30 m. Anchoring between piers and buoys is not permitted.
MAX. SIZE: Depth at Import Quay 20 ft. MLW. Ships of 28 ft. draft can load at Pyrites Quay.
RADIO: Vessel should route ETA cables to Agent through Rogaland Radio or Aalesund Radio.
TUGS: No tugs needed or available.
BERTHING: Berthing only between 0700 and 2400 hrs.
CARGO HANDLING: 1 berth is specially equipped for handling of pyrites in bulk. Ships of 28 ft. draft can load at the pyrites quay. Loading by conveyor. There are no berths equipped for containers or roll-on/roll-off traffic, nor berths handling liquid chemicals or LPG carriers.
STEVEDORES: Arranged by Agent. No ETA to stevedores necessary.
MEDICAL: Hospital facilities available.
FRESH WATER: Available, delivered from berth.
FUEL: No fuel supplies available. Nearest port for such supplies is Trondheim.
GANGWAY/DECK WATCHMEN: Not compulsory, and this service is left to the discretion of the Master.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Ship's Register.
CUSTOMS ALLOWANCES: Each crew member allowed 20 cigarettes on shore. When leaving ship, 200 cigarettes and 1 bottle of wine or 1 bottle of spirit permitted.
IDENTIFICATION CARDS: Not required.
CONSULS: Nearest consul available in Trondheim.
REPAIRS: Only small repairs can be carried out.
DRY DOCKS: None.
AIRPORT: Nearest airport, Vaernes, 62 miles N.E. Served by regular airlines with several flights per day.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: January 1st; Easter Holidays; Ascension Day; Whit Monday; 1st and 17th of May; December 25th and 26th.
POLICE/AMBULANCE/FIRE: All mentioned services obtained through Agent or by contacting local telephone exchange.
TELEPHONES: No facilities for placing telephones on board ships.
SERVICES: Provisions available.
SHORE LEAVE: Permitted.

TONSBERG: 59.16 N. 10.25 E.

DOCUMENTS:
Ship's Register.
Crew Lists.
Customs Manifest for each crew member (cigarettes, spirits, etc.).
Store List. Cargo Papers. Health Certificate.

PILOTAGE: Sea pilots obtainable from Ferder pilot station. Pilots normally take vessels to berth; also harbour pilot on the spot.
ANCHORAGES: Good anchorages at Byfjorden and Traela; anchorages for large vessels are found in Narverodbukten and Husoyflaker.
MAX. SIZE: 18 ft. draft for East entrance and 21 ft. draft for West entrance. Up to 30,000 tons in ballast.

RADIO: Cable ETA via Tjome Radio prior arrival.
TUGS: Are available.
BRIDGE: 1 bascule bridge over East entrance. Working days open 0600 to 2100 hrs., holidays 0900 to 1700 hrs. Signal 1 long and 2 short to open bridge. Opening can also be arranged by VHF during night-time. Horizontal clearance 88 ft., depth 22 ft.
MEDICAL: Medical, dental and hospital facilities available.
DENSITY: Occasionally brackish.
FRESH WATER: Available from hydrants at quays.
FUEL: Delivered by lorry.
GANGWAY/DECK WATCHMEN: Available on request.
CUSTOMS ALLOWANCE: 200 cigarettes or tobacco and 1 bottle spirits, for each man.
CONSULS: Britain, France, Netherlands, Finland, Denmark, Sweden and Spain. All vice-consuls.
REPAIRS: All types of repairs available.
DRY DOCKS: At Kaldnesmek, a shipyard for total length of 515 ft. The shipyard is building ships up to about 50,000 d.w.t.
REPATRIATION: Available by train from Tonsberg, plane and passenger lines from Oslo (about 100 km. from Tonsberg). Fairly good hotel accommodation in Tonsberg.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Labour Day (1st May); 17th May; Ascension Day; Whit Monday, Christmas (25th and 26th December). Mostly no working.
POLICE/AMBULANCE/FIRE: Police 13355; Ambulance 13370; Fire 11656.
TELEPHONE: Lines available on board vessel.
SERVICE: Mostly all services or equipment available from Tonsberg or Oslo. Inform prior arrival.
SHORE LEAVE: Crew members allowed to go ashore.
DELAYS: Ice during January and February, but port kept open by ice breakers.
AUTHORITY: Harbour Master, Tonsberg Havnekontor.

TROMSO: 69.39 N. 18.58 E.

DOCUMENTS:
Trade Certificate.
Tonnage Certificate.
Certificate of Nationality.
Number of Crew and Passenger Lists.
Customs and Health Documents.
Manifest and Bills of Lading.
PILOTAGE: Telegraphic address of pilot station is "Tromso Pilot Station". Order latest 12 hours before arrival.
ANCHORAGE: Depth at anchorage is 15-35 m.
RESTRICTIONS: No restrictions on night entry.
RADIO: Tromso Radio VHF Channel 16–26. Harbour Office Channel 16 and 12. 20 miles from town.
TUGS: If necessary, join vessel North or South end of harbour.
BERTHING: Ships can berth at quay, depths up to 34 ft., lengths of quay 100–200 m. (New harbour, Breivika), equipped for container handling, truck 20 tons.
BRIDGES: Tromso Bridge, 60 m. wide, 36.5 m. high.
Sandnessundet Bridge, 120 m. wide, 41 m. high, dredged min. depth 10.4 m.
STEVEDORES: Ordered by Agent. No ETA to stevedores necessary.
MEDICAL: Master to advise by Radio prior to arrival if medical attention required aboard. Hospitals in town (University).
TANKERS: There are 4 oil berths:
Norol – 20 ft. depth.
Mobil Oil – 17 ft. depth.
Esso – 31 ft. depth.
Shell – 39 ft. depth.
FRESH WATER: Most berths supplied by pipeline.
FUEL: All grades available.
FIRE PRECAUTIONS: Ordinary restrictions.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close.
CUSTOMS ALLOWANCE: Crew members 200 cigarettes or 20 cigars or 100 grams tobacco, and 1 bottle spirits.
IDENTIFICATION CARDS: Not required. Seaman's book.
CONSULS:

Belgium	81074–82417	Sweden	85090–81336
Denmark	81148–82310	Germany	81088–85665
France	81144–85663	Italy	85040–82604
Great Britain	84050–82395	Netherlands	85040–82604

REPAIRS: All engine and instrument repairs. Shipbuilders' Yard.
DRY DOCKS: 4 slip-ways 80–222 ft. 1 small dock.
AIRPORT: 5 km. from town.
TIME: GMT plus 1 hour.
HOLIDAYS: No work on New Year's Day and Christmas Day.
POLICE/AMBULANCE/FIRE: Police 85080; Ambulance 81100; Fire 81122. Port Pilot Station 81191–82537.
SURVEYORS: Lloyds, N.V.
SHORE LEAVE: Permitted.
REGULATIONS: Harbour Pilot compulsory. Speed in port waters max. 6 knots. Ships size passing Tromso Bridge max. 7,000 tons displacement.
DELAYS: Minor delays only.
SERVICES: Compass adjusting, stores, etc.
AUTHORITY: Port Manager.

TRONDHEIM: 63.25 N. 10.24 E.

DOCUMENTS: See "Bergen".
PILOTAGE: Harbour Pilot: Havne Kontoret, Tel. 28015 or VHF Channel 16.
RESTRICTIONS: The fjord is very deep and easy to enter. The channel is clear and ice-free throughout the year.
MAX. SIZE: Controlled by depth at berth. See below.
HEALTH: Call "Havne Kontoret" by radio for free pratique.
RADIO: Orlandet Radio (also VHF).
TUGS: Arranged by Agent.
BERTHING:

River Harbour	Quays	1–10	Depth alongside up to	26 ft.
Outer Harbour	,,	12–18	,, ,, ,, ,,	18 ,,
Inner Harbour	,,	19–24	,, ,, ,, ,,	20 ,,
Ilha Pier		26–32	,, ,, ,, ,,	29 ,,

Germany	,, 29 644	Spain	,, 20 689
Greece	,, 29 771	Sweden	,, 31 000

REPAIRS: All types of deck and engine repairs are possible.
DRY DOCKS: 1 available with capacity of 3,600 d.w.t. and a floating dock for vessels of 8,000 d.w.t.
REPATRIATION: Can be arranged.
AIRPORT: 35 km. away from port. Regular airlines.
TIME: GMT plus 1 hour.
HOLIDAYS: Christmas (2 days); Easter, (4 days); 17th May; Ascension Day; Whitsun, (2 days).
POLICE/AMBULANCE/FIRE: Police 27500; Ambulance 21-510; Fire 21-505.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Plans for reconstruction of outer Basin with new bridges also planned.
AUTHORITY: Trondheim Havnekontor.

VADSO: 70.04 N. 29.45 E. (See Plan Book)

DOCUMENTS:
Trade Certificate.
Tonnage Certificate.
Certificate of Nationality.
Number of Crew and Passenger Lists.
Customs and Health Documents.
Manifests and Bills of Lading.
PILOTAGE: Vessels approaching from sea and desiring Pilot should order at 24 hours notice and confirm arrival at Pilot Office, Vadso, at 2 hours notice. The advance order can be sent over coastal radio station to Pilot Office, the Harbour Master, Vadso, tel. Vadso 51235 or 51143. Harbour Pilot has to be taken on board in position Lat. 70° 45′ N. Long. 29° 41′ E. VHF Channel 16.
ANCHORAGES: Anchorage for vessels up to 400 tons in basin, with depths varying between 14 and 21 ft. Larger vessels anchor W. of the mole in 16 to 20 m. Outer harbour inside breakwater, inner harbour, further to East. Entrance to inner harbour is by buoyed and lighted channel 1,560 ft. long and 115 ft. wide, this has been extended by the addition of a fishery basin 750 ft. long 800 ft. wide. Outer harbour is 1,000 ft. long, 700 ft. wide, depths 15 to 30 ft.
MAX. SIZE: Max. length of vessel 300 ft. and breadth 45 ft. Draft 16 ft. Ship about 3,000 g.r.t.
HEALTH: Health documents necessary.
RADIO: Call Vadso Coastal Radio Station, through which contact by telephone Agent or Harbour Master or Vadso Harbour on VHF Channel 16.
STEVEDORES: Stevedores arranged. Agent telephone 51395 Vadso.
TANKERS: Only small tankers can discharge. Discharging berth only for 500 g.r.t. tankers, draft 13 ft.
FUEL: Gas and diesel oil. Water available on all quays.
GANGWAY/DECK WATCHMEN: Watchmen necessary. Master can use ship's crew as gangway and deck watchmen. Not necessary to use watchmen from the Watchmen Service.

CUSTOMS ALLOWANCE: Tobacco: Wine/Spirit: For 10 days, each crew 200 cigarettes, or 200 grams tobacco. 0.25 litre spirit, for each crew member.
CONSULS: Finland, tel. 51225 Vadso.
REPAIRS: Only smaller types of deck and engine repairs are possible.
AIRPORT: Vadso Airport 4 km. from port. Widero flights 4 times per day.
TIME: Local time, GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police 51271 or 51593 Vadso; Ambulance 51845 or 51691 Vadso; Fire 51122 or 51554 Vadso.
AUTHORITY: Vadso Havneseven.

NOTES

Please also advise Shipping Guides Ltd.

Oman, (Sultanate of)

MINA-AL-FAHAL: 23.39 N. 58.32 E. (See Plan Book)

DOCUMENTS:

Required on arrival (provided by vessel):
2 copies Crew List and 2 copies of Vaccination List.

All other necessary papers will be supplied on arrival by the Berthing Master.

PILOTAGE: The Berthing Master will board incoming tankers off Fahal Fairway Buoy, or as directed by VHF. Tanker should arrive at this position, make a good port lee, and take way off.

Harbour steaming is deemed to start at this point. The port side derrick should be rigged and crew standing by at the derrick ready to lift the mooring equipment from the launch when the Berthing Master comes on board.

The pilot access should be in good condition, clean and ready on the port side. Tankers of 70,000 tons Summer deadweight and above in ballast or partly loaded condition should have either a pilot hoist or a combination of accommodation ladder and pilot ladder rigged.

ANCHORAGE: If a vessel is required to anchor the information will be passed by VHF. The normal tanker anchorages are:–

A. Fahal Is. Lt. Brg. 015° × 1.0′
B. Fahal Is. Lt. Brg. 045° × 1.3′
C. Fahal Is. Lt. Brg. 075° × 1.0′
D. Fahal Is. Lt. Brg. 115° × 1.0′

The coastal tanker anchorage is:–
Fahal Is. Lt. Brg. 340° × 1.1′

Cargo ship anchorage area:–
A. Fahal Is. Lt. Brg. 340° × 2.0′
B. Fahal Is. Lt. Brg. 345° × 1.6′
C. Fahal Is. Lt. Brg. 000° × 1.7′
D. Fahal Is. Lt. Brg. 015° × 1.6′

Ships proceeding to an anchorage within the Port Area should pass North of Fahal Island and under no circumstances enter the prohibited area unless instructed to or accompanied by a Mina al Fahal Berthing Master.

RESTRICTIONS: Open sea approaches.

MAX. SIZE: No length limitation. Draft up to 96 ft. Tankers up to 550,000 d.w.t. can be accommodated.

HEALTH: When advising ETA, include in message whether any sickness on board.

Port Health Officer boards with Berthing Master, this Officer will carry out any necessary vaccinations. 'Q' flag to be flown until pratique granted.

RADIO: ETA messages should be sent to Petromar Muscat via Muscat Radio (call sign A4M). If no contact can be established with Muscat Radio, the message should be sent through an alternative coast station such as Bahrain Radio.

The message should contain the following information.

(a) ETA in local time and date in plain language to avoid multilation.

(b) Whether there is any sickness on board.

(c) Whether any crew require medical treatment and very briefly the nature of the complaint.

(d) Last port of call.

VHF communications should be established as soon as possible calling Fahal Control on Channels 19 or 12. The range is about 80 miles to the Northward but only 20 miles to Eastwards because of screening by mountains. Channel 19 area basically long range while the working Channel is Channel 12 and is manned 24 hours a day by either Fahal Control or Fahal Pilots. The station may call vessels on Channel 16, although a permanent watch on Channel 16 will *not* be maintained. The mooring launches are also equipped with Channels 16 and 12 but mooring operations are carried out using UHF radio sets.

TUGS: None available and not required.

BERTH DESTINATION: 3 single buoy moorings with floating hose strings. SBM lights are ISO.W.

SBM No. I: Crude export and marine fuel oil import and export. This buoy is served by 2 × 30 in. submarine crude lines and 2 × 10 in. submarine fuel lines each 10,300 ft. long.

The floating crude hoses are 2 × 810 ft. long × 20 in. reduced to 16 in. for manifold connection. Same hoses are used for Fuel Oil imports these lines having a displacement connection ashore for emptying the crude content. Bunkering is by a single 12 in. hose 820 ft. long.

This buoy is capable of handling any vessel up to 229,000 d.w.t. tonnes and under the deadweight if sailing draft will not exceed 64 ft.

SBM No II: For crude and bunker export and is served by 1 × 40 in. submarine crude line and 2 × 10 in. submarine fuel oil lines each 13,980 ft. long. The floating crude hoses are approx. 2 × 1,100 ft. long x 20 in. reduced to 16 in. at manifold connection. Bunkering is by a single 12 in. floating hose. Maximum size ship 550,000 d.w.t. tonnes and max draft of 96 ft.

SBM No. III: Fuel export only served by two 10 in. submarine hoses each 8,003 ft. long. The floating hose is one 8 in. line approx. 700 ft. long. Max. size of ship is 100,000 tons and under this deadweight if sailing draft will exceed 46 ft.

Loading crude is by gravity and rates vary. If loading from upper tank farm 9,000 t.p.h. but only 5,500 t.p.h. if loading from lower tank farm.

Bunker rate is approx. 450 t.p.h. bunker discharge at SBM-I maximum 3,000 t.p.h. maximum back pressure 150 p.s.i.

BERTHING: Vessels berth head to buoy and are provided with 2 x 4.5 in. mooring snotters picked up from the mooring launch when the pilot boards. Vessels over 230,000 d.w.t. tonnes are provided with two 15 in. × 80 ft. nylon braidline snotters. Connection at SBM-I and III is to two 12 in. plaited nylon lines 150 ft. long; at SBM-II to two 15 in. plaited nylon lines 150 ft. long. A suitable messenger rope should be provided by ship. An Assistant Berthing/Loading Master will advise in all mooring and hose connection operations which are carried out by ships staff.

HOSE CONNECTIONS: Ships port side derrick must plumb over relevant manifold. This derrick should be ready on arrival at the pilot boarding area to pick up the mooring gear and reducers (if necessary) safety chains etc. for hose connection. Derrick to be in good condition and be rigged for a SWL of a minimum of 10 tons for SBM-I and II and 5 tons for SBM-III.

BALLAST: No facilities for reception of dirty ballast.

Tankers should arrive with clean ballast, lines and pumps and no oil should be released into the sea.

MEDICAL: Medical treatment can be given by Petroleum Development (Oman) Ltd.'s medical staff to crews of ships on Time Charter to Shell International Marine on ships using P.D. (O) Ltd.'s tanker agency facilities. A charge of R.O.17 is made per hour for launch hire and transport facilities. Dental treatment available but at least 24 hours notice required.

REPAIRS: It is not permitted to immobilise main engines whilst moored to the SBM's; under no circumstances should the propeller be turned in the ahead direction.

DENSITY: Approximately 1026.

FRESH WATER: Not available.

FUEL: Fuel oil only available. Limited store facilities and at least 24 hrs. notice is required.

A wide range of marine lubricants is available and is supplied in drums. At least 24 hours notice is required for supplying lubricants.

REPATRIATION: Crew changes are possible at Mina-al-Fahal provided the Agent receives 72 hours notice (excluding Fridays and Holidays), (24 hours notice if using Petroleum Development as Agent) giving full particulars of embarking/disembarking crew, such as full name, nationality, place and date of berth, passport/seaman's book number with date and place of issue and expiry date, and also destination for repatriation of disembarking crew members, to enable Agents to obtain necessary permits and arrange air passages.

N.B. If the information required as above is received on a Thursday or a day preceding a holiday, the time mentioned of 72 hours will not be sufficient as no permits can be obtained from the Authorities during holidays.

Note: No crew changes possible at this time (November 1976) as a Government Decree has been issued cancelling crew changes until the present hi-jacking security procedures have been relaxed.

TIME: GMT plus 4 hours all year round.

SHORE LEAVE: Not possible.

GENERAL: *Liquor.* Trading in liquor strictly prohibited and no alcoholic drink should be offered to Arab nationals.

AUTHORITY: Petroleum Development (Oman) Limited.

AGENT: See "Port Qaboos" (Mutrah).

Petroleum Development (Oman) Ltd. can also act as Agent. Petromar Muscat are on VHF Channel 12.

PORT QABOOS (Mutrah): 23.37 N. 58.34 E. (See Plan Book)

Muscat has ceased to be a commercial port and instead vessels now call at Port Qaboos.

PORT LIMITS: From the level of high water springs at a point near Ras Kab at Long. 58° 33.2′ East on a line due North to Lat. 23° 41′ North;

Thence due East to Long. 58° 35.6′ East;
Thence due South to Jazirat Muscat;
Thence in a generally Southerly direction by the line of high water on the Western side of Jazirat Muscat to Pinnacle Rock;
Thence S.W. to the Easternmost point of Siraz al Gharbiyah;
Thence by the line of high water springs to the point of commencement.

DOCUMENTS:

Required on Arrival:
4 Copies Crew List.
1 Copy Maritime Health Declaration form with ports of call from commencement of voyage.
2 Copies Vaccination List.
6 Copies Passenger List.
3 Copies in transit Passenger List.
3 Copies Hatch List.
5 Hazardous Cargo Lists.
3 Heavy Lift Lists.

To be airmailed in advance:
5 Copies Cargo Stowage Plans.
9 Copies Cargo Manifest.
1 Copy Freight Manifest.

Customs and Immigration requirements for vessels entering and leaving ports: 24 hours advance notice, cargo manifest and passenger list, crew personnel declaration. No cargo vessel is allowed to enter until immigration formalities are completed off the port.

PILOTAGE: Compulsory for vessels other than exempted vessels as defined in Port Rules and Regulations.

Arrival notice requirements: ETA, LOA, draft 72 hours, 48 hours, 24 hours before arrival. Berthing and unberthing – 24 hours a day.

MAX. DRAFT: Depth of entrance channel at LAT. 35 ft. 06 in. (10.8 m.). Also see "Berthing".

TUGS: Three twin screw tugs, 1,400 h.p., 1,600 h.p. and 2,000 h.p.

APPROACH: Port Qaboos has a very open approach with a deep water anchorage. The hilly coast is radar conspicuous. Lights on Fah Is., Jazirat Muscat and the Breakwater make night navigation fairly simple. There is no appreciable current once inside the bay.

Vessels approaching from a North or Westerly direction; pass North of Fahal Fairway buoy situated in position Lat. 23° 41′ 00″ N., Long. 58° 33′ 12″ E.

Vessels approaching from an Easterly or Southerly direction; pass North of Jazirat Muscat.

Prohibited Entry Area: The whole of the bay of Khawr Muscat, South of a line between Ras Kalbuh and Ras Muscat.

ANCHORAGE: Vessels should anchor Northwest of the breakwater within the area enclosed by the following perimeters:

1. A line extending 060° (T) from Port Qaboos breakwater.
2. The Western most extremity of Port Qaboos.
3. A line extending 325° (T) from Muscat forward leading light after crossing perimeter (1).

All areas described above are clearly defined in the current edition Admiralty Chart No. 2869.

Prohibited Anchorage Area: The area enclosed by the following perimeters is a prohibited anchorage area:

North boundary:	The parallel of Lat. 23° 41′ 00″ N.
East boundary:	The meridian of Long. 58° 36′ 00″ E.
South boundary:	Sultanate of Oman coastline.
West boundary:	Muscat forward leading light bearing 145° (T) from seaward and Port Qaboos breakwater light bearing 240° (T) from seaward.

Severe penalties are imposed for vessels infringing the above prohibited areas.

HEALTH: International Health Regulations apply. Pratique may be granted by the Harbour Master on receipt of following information:

1. All Smallpox/Cholera vaccinations valid.
2. Valid Derat Certificate.
3. No sickness on board.
4. No sickness at last Port.
5. Country of origin and date of departure.

Pilot will issue Health Form on boarding. Port Health require:

1 Crew List
1 Vaccination List
Valid Derat Certificate
Last Port Clearance

RADIO: Port control can be contacted on VHF Channel 16 or Channel 14 or on R/T via Muscat Radio. Hours of operation 0700 – 1800 hrs. except Friday when hours of operation depends on actual movement in the Port.

BERTHING: There are 9 deep water berths: 3 coaster berths and 1 berth for launches. The berths vary in length from 76 to 228 m. and are sheltered by a breakwater on one side and cliffs on the other. Nine berths can take vessels of up to 36 ft. draft and the remaining 3 are reserved for shallow draft vessels drawing 12/16 ft. of water.

Supporting the berths are 9 modern transit sheds facing broad uncluttered aprons, providing both covered and open storage space. Two berths front directly on to large open areas ideally suited for rapid discharge of containers and oversized units requiring direct delivery.

Berth	*Length*		*Depth at LAT*		
No.	*(ft.)*	*(m.)*	*(ft.)*	*(m.)*	
1	600	183	41	12.5	
2	600	183	41	12.5	
3	750	228	32	9.8	
4	600	183	30	9.1	
5	600	183	30	9.1	
6	650	198	29.5	9.0	
7	600	183	24	7.3	To be dredged to 30 ft.
8	600	183	24	7.3	To be dredged to 30 ft.
9	450	137	13	4.0	
10	500	152	13	4.0	
11	600	183	26	8.0	
12	250	76	10	3.1	
13	500	152	7	2.2	

Nos. 1 and 2, 4, and 5, 7 and 8 berths are "in line", therefore larger vessels can occupy part of a second berth when necessary.

Transit sheds and cold storage facilities: 9 transit sheds and 1 cold store adjacent to the port, capacity of cold store 3,000 tonnes plus cool rooms, blasting facility and ice making plant. Facilities for electrical connection of refrigerated containers with Kheops and Wilco Plugs.

SPECIAL HANDLING FACILITIES: Bulk Cement Silos: Capacity 6,000 tons, supplied by underground pipe line from the berth.

Grain Silos: Capacity 30,000 tons supplied by quayside underground conveyor from the berth.

In conjunction, 2 km. from the port, a highly automated mill produces various flour and animal feed products for local consumption and export.

The port has modern container and Ro-Ro handling equipment, including a Mafi-type roll trailer system, backed up by mobile cranage of up to 150 tons capacity.

A plan to convert one of the existing berths to a specialised container berth is now under consideration.

At present containers can only be accepted from self-sufficient vessels. Containers are transported by trailers and handled in stacking area by mobile crane or forklift truck. Reliance Mercury Tractors of 160 b.h.p. with Mafi-type trailers are available for Ro-Ro vessels. Lash and BACAT service.

CRANES: 10 Mobile Cranes 3 tons – 25 tons, 1 Mobile Crane 70 tons, 1 Mobile Crane 150 tons, 81 Fork Lift Trucks 4,000 lbs. – 16,000 lbs. Trailers and Tractors are also available.

There are no fixed quay cranes.

STEVEDORES: The labour position is fair, except in the date-picking season June to August.

Landing rates: bagged cargo 4/600 tons per day; general 200 tons per day; timber 100/150 tons per day during fair weather provided no congestion on jetty and if cargo stowed in more than 3 hatches.

Working Hours:

Saturdays/Wednesdays	Day Shift	0700 — 1300	
		1300 — 1500	Lunch Break
		1500 — 1700	
		1700 — 1900	On overtime
	Night shift	2000 — 2300	
		2300 — 2400	Tea break
		2400 — 0600	
Thursdays	Day Shift	0700 — 1400	
	Night shift	2000 — 2300	
		2300 — 2400	Tea break
		2400 — 0600	
Fridays	No Day Shift		
	Night shift	2000 — 2300	
		2300 — 2400	Tea break
		2400 — 0600	

MEDICAL: Port Clinic and Government hospitals available.

CONSULS: Egypt, France, Germany, Iran, India, Jordan, Kuwait, Pakistan, Qatar, Sudan, UAE, UK, U.S.A.

FRESH WATER: Available at all berths.

FUEL: Gas oil only on berths. Other fuels can be supplied by arrangement with owners Agent. Marine lubricating oils available.

SERVICES: Fresh and dry provisions from chandler. Limited availability of ship and engine room stores.

GANGWAY/DECK WATCHMEN: A Port Services Corporation watchman will be present on board throughout the stay of the vessel in port, and the vessel must provide him with food and accommodation during the stay. The same is applicable in the case of tally staff.

REPATRIATION: Is now possible if Masters give full particulars of the seamen to be repatriated by telegram at least 72 hours earlier. This also applies to embarking crew members. The 72 hours notice is not enough in the case of a Friday, or any other holiday which falls in between.

CUSTOMS ALLOWANCES: Vessels will no longer be permitted to have free use of their stores (Tobacco goods, Alcohol, etc.) whilst in the confines of the port.

On arrival in port, an allowance will be given by the Customs Boarding Officer and the surplus stores will then be placed under Customs Seal.

The allowance will be:
200 cigarettes or 50 cigars or 250 gms. tobacco.
One bottle (1 litre) alcoholic spirit.
One bottle (1 litre) wine.
24 cans beer.
Various used personal effects such as radios, cameras, etc.

Should a vessel remain in port for more than 4 days, an issue of stores will be given upon request being made to the Customs Authorities.

These Regulations also apply to ships at the Anchorage.

SHORE LEAVE: Crews are only allowed ashore between the hours of 0700 – 1900.

GENERAL:

Ships arriving at Port Qaboos:

Ships may approach Port Qaboos without a Pilot as far as the perimeter of the limits of the port. No ship shall proceed through the entrance to or from the port without the permission of the General Manager or the Harbour Master.

All ships, other than expected ships, shall be under the pilotage of a Pilot appointed by the Port Authority when under way within the limits of the port. The ship shall have rigged and ready for use a Pilot ladder of modern pattern, in good repair and provided with reliable manropes. Such Pilot ladder shall be well illuminated between dusk and daybreak. The ship shall have a boat-rope ready rigged from the break of the forecastle to abaft the Pilot ladder.

No ship shall enter or leave Port Qaboos unless her draft marks are correctly shown and clearly visible.

Every ship shall at all times when entering, navigating in or leaving the port have both anchors ready for immediate use.

Ships proceeding to berth at the port premises shall have no list and shall be trimmed upright.

Before entering Port Qaboos every ship shall hoist the following flags: The ship's signal letters. The "Q" flag, International Code, unless the Port Health Officer has previously given pratique. The "H" flag, International Code, denoting that a Pilot is onboard. The "I" flag, International Code, if the ship is carrying passengers.

Until pratique has been granted communication between ship and shore shall be made by: Flag hoist, using the International Code of signals, Morse Code, by signal light, or radio-telephone on approved frequencies, which will be promulgated for use for such purpose.

Conduct: The Master or Owner of every ship shall be held directly responsible for the proper conduct and behaviour of the crew of such ship while in the port and for strict observance of the laws of the Sultanate of Oman, particularly those laws concerning the sale, transference or consumption of any narcotic or alcoholic or intoxicating drink of any kind.

Flags: Every merchant ship within Port Qaboos between the hours of sunrise and sunset shall fly her national flag and the national flag of the Sultanate of Oman.

Repairs: The Master of any ship wishing to carry out major engine repairs or adjustments, which will affect the mobility of the ship whilst in the port shall make written application to the Harbour Master so to do. The Harbour Master shall give his permission or otherwise in writing.

Safety of ships and persons: The Master of every ship anchored or moored in the port or berthed at the port premises shall, unless the Harbour Master concede some relaxation in this port rule, at all times retain on board sufficient crew to work or move the ship.

Ships berthing and unberthing at the port premises: No person shall swim from any ship berthed at the port premises.

No person shall make fast or anchor any country craft or boat of any kind at any quay, wharf, pier or landing place or at any steps provided thereat in the port premises except with the prior permission of the Harbour Master.

Pollution: It shall be unlawful to throw, discharge or deposit, or cause, suffer, or procure to be thrown, discharged or deposited, either from or out of any ship, barge or other floating craft of any kind, or from the shore, wharf, manufacturing establishment or mill of any kind, any refuse matter or other substance of any kind or description whatever into the waters of the harbour; and it shall be unlawful to deposit, or cause, suffer or procure to be deposited, material or any kind in any place, or on the bank of any water, where the same shall be liable to be washed into such water, either ordinary or high tides, or by storms or floods or otherwise, whereby navigation within the corporate limits of the harbour shall or may be impeded or obstructed, provided that nothing herein contained shall extend to, or apply to, or prohibit operations in connection with the improvement of the port of Qaboos or the construction of public works considered necessary and proper by the Port Authority and provided further than nothing herein contained shall extend to, apply to, or prohibit the depositing of any material above mentioned in such navigable waters within such limits as may be defined, and under such conditions as may be prescribed by the proper officer of the Sultanate of Oman.

It shall be unlawful for any person, or corporation to deposit, place, or discharge into the waterways of Port Qaboos, either directly or through private or public sewers, any sanitary sewage, butcher's offal, garbage, dead animals, gaseous liquid or solid matter, oil, gasoline, residium of gas, calcium chloride, trade waste, tar or refuse or any other matter, which is capable of producing floating matter or scum on the surface of the water, sediment in the bottom of the waterways, or the odours and gases of putrefaction.

Vessels discharging ballast, oil from bilges or tanks or solid matter into the waters of Port Qaboos will be reported to the pollution control officer and be subject to a fine of R.O. 500.00 for each offence, imposed by and payable to Port Qaboos. Such fine shall be in addition to any other fines, which may be levied for the same offence by the Sultanate of Oman.

Ships Leaving Port Qaboos: Port Rules applying to ships arriving at Port Qaboos apply equally, in so far as they are relevant, to ships leaving the port.

Merchant ships shall fly the "P" flag International Code, for 24 hours before sailing from the port.

The Port Authority may refuse to give the Master of any ship outward clearance, unless and until all charges due in respect of the ship and any penalties, to which the ship or her Master are due, have been paid or secured to the satisfaction of the Port Authority.

The Working of Cargo at Port Qaboos: Ships may be permitted to discharge or load cargo in the anchorage if a berth is not available at the port premises or if in the opinion of the Port Authority the ship's cargo is more suitable for handling to or from barges or lighters.

The Master or Owner of any ship shall be held responsible for any loss or damage arising from careless or improper slinging of cargo onboard such ship.

Any cargo, cargo-handling equipment or ship's gear, which may be dropped overboard shall at once be reported by the Master or appointed officer to the Port Authority and shall be immediately recovered by the ship's personnel if it is reasonably possible so to do. Failing this, it may be recovered by the Port Authority at the ship's expense. The Port Authority shall not be responsible for any damage to or loss of cargo, equipment or gear so recovered.

The Master of every ship discharging or loading cargo in the port, whether at anchor or berthed alongside shall provide drinking water for all cargo handling labour and all other persons appointed and directed to be on board such ship in connection with the discharge or loading of cargo.

If the labour or transport allocated or engaged for the purpose of landing, loading or transshipping cargo from or to any ship is not fully continuously employed by reason of a fault or action attributable to such ship, the expenses incurred thereby shall be paid by such ship.

In the event of any accumulation of cargo or goods upon the quay or jetty or in a lighter for any cause that may appear reasonable to them, the Port Authority may require the ship discharging such cargo or goods to suspend or reduce the rate of discharge of such cargo or goods.

The Port Authority may refuse to permit cargo to be landed from any ship until suitable shed or open storage space or other accommodation is or becomes available for such cargo.

Delivery of cargo or goods shall not be deemed to have been made to the Port Authority until such cargo or goods have been brought into the port premises and until the Port Authority accepted delivery of such cargo or goods and have issued an official receipt therefor to the Master of the ship discharging such cargo or goods or to the ship's Agent or to any other person duly authorised so to do, conveying such cargo or goods to the port premises.

AUTHORITY: General Manager, Port Services Corporation Ltd., Muscat.

AGENT: Gulf Agency Co. (Oman) W.L.L., PO Box 3740, Ruwi, Sultanate of Oman. Tel. Mutrah 734888, 772703. After Hours 702249. Telex 3284 ("Gacship MB"). Cables "Confidence", Muscat. VHF Channel 16. Call sign "Confidence Muscat".

PORT RAYSUT (Salalah): 16.56 N. 54.01 E.

PORT LIMITS: The water limits of the port are bounded by the parallels of 16° 55′ 30″ N. and 16° 56′ 50″ N., and by the meridian 54° 01′ 30″ E. to the Eastward. To the West the limit follows the coastline from its Northern interception with the headland of Ras Raysut.

The land limit to the port area follows the line of the outer security fence across the neck of the Ras Raysut headland.

DOCUMENTS: See "Port Qaboos".

PILOTAGE: Compulsory, except for vessels less than 100 n.r.t., Port Authority craft and vessels of the Oman Navy.

ANCHORAGES: Anchorage positions at the present time will be given to all vessels upon reporting by VHF radio. Anchorage positions are set with 0.5 miles between each ship in a minimum of 10 m. of water for large vessels, less depth of water as required for coaster vessels. All ships are anchored per their draft in consideration for maximum safety.

RESTRICTIONS: Due to the fact that the Port is presently undergoing major expansion, ships are requested not to enter the anchorage after darkness. No ship movements are permitted after darkness except in case of an emergency. Vessels arriving in the area after nightfall are requested to anchor no nearer than 2 miles from the Eastern breakwater.

The expansion programme which dictates these restrictions is due for completion in March 1980 and until that time all restrictions will remain valid.

MAX. SIZE: At the present time the maximum size of vessel permitted to enter the port for discharge at the berth is: draft, 18 ft. and length, 300 ft.

Vessels arriving under these conditions of max. draft and length will be brought to the berth only during high tide. Any larger size vessels will be handled at anchorage using barges. Barges are provided free of charge to vessels arriving on liner terms, all other vessels will negotiate barge charges.

HEALTH: Quarantine procedures are followed and all ships upon arriving must fly flag "Q" until completion of quarantine procedures. Public health requires certificates for smallpox, cholera and yellow fever.

RADIO: For advance ETA data the port must be notified via Agent. For more accurate ETA within 3 to 4 hours VHF Channel 16. Channel 16 has range of about 60 to 70 miles depending on weather. Call: Port Raysut Anchorage Control.

VHF: VHF radio has a range of about 60 to 70 miles depending on weather conditions. The radio station is manned from 0800 to about 2300 hrs. daily. All ships arriving must contact the Port on VHF Channel 16, call sign "Port Raysut Anchorage Control". The operator will require the following information:

1. Ship's name – spelt out.
2. Maximum draft.
3. Overall length of vessel.
4. Type of cargo being delivered.
5. Anchorage time.

After formalities are completed on Channel 16, all vessels will be directed to switch on to VHF Channel 12 for Port movements and operations. This Channel is the Internal Port Control Channel for Pilots, Tugs and enquiries to the Port or Shipping Agents. VHF Channels 10 and 6 are also available for special usage or alternative Channel for 12 when required.

Upon completion of cargo discharge all vessels must call on VHF Channel 16 and report to anchorage control their departure time and next port of call. The contact with the port anchorage control at this time is very critical as the contractor is doing under water blasting and the operator of the VHF radio is kept informed of the blasting schedule.

RADAR: None available in the port at this time.

TUGS: Two workboats are in use in the port. They deliver the Pilot to the vessel and accompany the vessel into berths. The workboats are on VHF Channel 12.

BERTHING: There are two berths available at present. Berth No. 1 is 250 ft. long (being extended) and can accept a vessel of 300 ft. in length with the max. draft of 18 ft. on a high tide entry. Berth No. 2 is 350 ft. long but will only accommodate vessels of 16 ft. max. draft on high tide entry. No ships are berthed at low tide. All vessels operating at the berths are discharged by shore equipment, exceptions to this do arise but not as a general rule. All vessels operating in the anchorage must use ship's gear and must provide their own winch operators.

CRANES: There are 5 mobile cranes in the port operating in the range of 2 to 5 tons. There is one mobile crane rated at 15 tons. There is one mobile crane rated at 20 tons. There is one mobile crane rated at 30 tons. There is one mobile crane rated at 70 tons. The cranes are placed at any berth as requirements become necessary.

BARGES: 3×350 ton barges are used by ocean-going vessels in deep water anchorages. Vessels arriving under liner terms receive free barge facility. Vessels arriving under charter, terms are negotiated as to charges for barge facility.

SPECIALIZED FACILITIES: There are no special facilities at this time. Ro/Ro services are carried out in the existing port at present. However such vessels must meet the standard requirements for entry to the berth. There are no bulk handling facilities.

BRIDGES: None.

STEVEDORES: Arrangements must be made through the Agent for max. notification of arrival to arrange gangs. Minimum notification 24 hours. All cargoes handled. Normal working hours from Saturday to Wednesday 0700 to 1500 hrs. Thursday from 0700 to 1300 hrs. with no lunch break.

Working hours are subject to change during the month of Ramadhan.

Overtime would be charged to hours worked outside the normal working hours. Overtime will be worked at the request of the Agent and will be worked on Fridays and public holidays at special request.

MEDICAL: Agents handle all medical matters. A hospital is available in the town of Salalah (17 miles away). Also see "Health".

TANKERS: At this time closed to tankers. Other than those in present service.

FRESH WATER: For vessels at berths, Agents must arrange for tank truck delivery from Salalah. For ships at anchor there is no means of fresh water delivery at this time.

FUELS: Available to ships at the berth, must be arranged by the Agent.

FIRE PRECAUTIONS: Nothing at this time beyond standard precautions.

CONSULS: None available at present.

REPAIRS: No facilities at present.

DRY DOCKS: None available.

SURVEYORS: Lloyd's representative is Oman United Agencies in Salalah.

GANGWAY/DECK WATCHMEN: Not required except as deemed necessary by the Captain of the vessel and then he must supply his own.

HATCHES: Opening and closing hatches is normally done by the crew but arrangements may be made with the port for provision of this service. Agents can advise.

CUSTOMS ALLOWANCES: Usage and sale of tobacco and all alcoholic beverages are not permitted to shore based personnel. Notices of special changes in the rules are provided by the Agents upon arrival.

CARGO GEAR: Normally handled by shore equipment and shore gear. Any special lifting equipment required must be provided by the vessel. Ships in the anchorage are normally expected to supply all gear required. The port has rental gear for those vessels requiring same.

REPATRIATION: This is not normally permitted at this port but on special consideration arrangements may be made by the Agent for this service. Crew changes may not be effected at this port at the present time.

AIRPORT: Salalah Airport is serviced by special charter flight from Gulf Air on a once daily schedule. The special schedule is operating between Salalah and Muscat. From Muscat, international flights are available.

TIME: Time local is GMT plus 4 (Delta Time).

HOLIDAYS: All Muslim holidays are observed. Working hours are reduced during the period of Ramadhan. Special National days celebration is held from 17th to 21st November each year. Working of overtime may be arranged during most of the holiday periods, Agents can advise.

POLICE/AMBULANCE/FIRE: The port has police available at the port at all times. Fire and ambulance service must come from Salalah at this time. The port has the only telephone service and the police located within the port also maintain telephone service. Required numbers are familiar to all persons in these two areas.

TELEPHONES: For any long distance calls Omantel maintains office in Salalah where calls may be placed and paid for. For local calls the port will permit the use of port phone on a limited basis.

SERVICES: None available at this time.

SHORE LEAVE: Captain, First Officer and Chief Engineer are permitted restricted shore leave but all other members of the crew are restricted to the ship or port area.

IDENTIFICATION CARDS: Seamans book or passport are sufficient for those persons going ashore.

REGULATIONS: No vessel shall enter the port area unless authorised by the Harbour Master. The Harbour Master may at his discretion refuse to allow vessels, with the exception of vessels in distress, to enter the port, and may order from the port any vessel with the exception of vessels unfit for sea, which does not have business within the port, or is in breach of these Regulations.

No vessel shall anchor, or weigh anchor or move within the port area except when and where required by the Harbour Master.

No water ballast which is not free from oil or other harmful contaminants, shall be discharged into the waters of the port area. In case of the pumping of bilges or pollution by oil or harmful contaminants into the waters of the port area, the vessel will be responsible for any fines imposed by the Port Authority and any compensation or other damages.

Should fire break out aboard any vessel the Master should make an immediate signal either by a continuous sounding of long or short blasts on the ship's whistle or siren or by ringing of a fire bell.

In cases of adverse weather it is the sole responsibility of the Harbour Master to decide whether the sea conditions are suitable for handling cargo with barges in the Anchorage or whether the day will be declared a "Weather non-working day".

Masters shall be responsible for the adequate provisions of safety equipment and lights on board whilst cargo is being handled.

Conveyance of alcoholic liquor, other than manifested cargo under Customs supervision, from any vessel to the shore or from one vessel to another is prohibited.

No unauthorised person may enter the port area. Visitors to vessels are prohibited except by permission of the Harbour Master.

Ship's personnel and passengers are not permitted ashore except by permission of the Immigration Authorities and the Harbour Master.

Every merchant vessel in port shall fly her national flag, and the national flag of Sultanate of Oman, between sunrise and sunset.

DEVELOPMENTS: The port is at the present time undergoing major expansion which is expected to be completed in March, 1980. Due to this expansion programme day to day alterations must be made in the ports decisions regarding vessels and their cargo. The port will keep all vessels in the area advised by VHF radio as to any changes or movements required. It is important that at this time all vessels in the port or anchorage areas maintain a radio watch on VHF as instructed upon their arrival.

GENERAL: See above. The port operates on a year round basis today with the exception of vessels requiring barging. All barging is closed from mid-June to late September depending on the sea state. Coaster vessels are berthed on a year round schedule but must be prepared to leave the berth under hurricane conditions.

SHIPMASTER'S REPORT: May 1978.

Best Anchor Position: Easternmost rock off Ras Risut bearing 195°T×1 mile for vessels up to 30 ft. draft (B.A. Chart No. 3784).

Documents: Derat Certificate. Last port clearance. Vaccination list. (Bond not sealed).

Pilotage: Only vessels up to 300 ft. length with maximum draft of 17 ft. are berthed alongside. Pilotage is compulsory.

Radio: Send ETA, draft, LOA, g.r.t., n.r.t., cargo to discharge, last port, to: General Manager, Port Raysut, Salalah, Sultanate of Oman, giving 48 hours, 36 hours, 24 hours notice.

Barges: There are 3×250 ton barges, into which cargo is discharged at anchorage. Two more such barges are expected by end of 1978. These are flat top dummy barges on which cargo is stowed by fork-lift. Fork-lifts are available at anchorage.

Labour: A gang consists of 10 men. They are government employees. Presently port is short of gangs. Vessel must supply own men to operate winches.

Fresh water: Available only at berth. Supplied by trucks at the rate of USD 7.5/ton. NOT available at anchorage.

Provisions: Presently the port Quarantine Officer does shipchandling. However it is better to buy the provisions from a supermarket.

Shore Leave: Crew can go ashore from anchorage either by shore tugs which tow the barges or by ship's lifeboat. Must carry passports/CDCs. Taxis available to go into town of Salalah which is at a distance of 25 km.

Airport: Daily flight to Muscat.

Telex-Telephone-Cable-Posts: Facilities available by "Cable & Wireless" offices.

Hospital: Very good.

Workshop: Nil.

Fuel Oil: Not available.

General: Cargo is not worked during the monsoon period due to heavy swell, i.e. from 1st week of June to end of September.

Cost of barges at anchorage is 1 Rial per ton of cargo loaded. Such charges to be paid by the ship or her Agent prior to ship's departure.

Presently 6 berths are under construction which are expected to be ready by end of 1980. These will accommodate vessels up to 32 ft. draft.

AUTHORITY: Directorate General of Communications, Salalah, Sultanate of Oman.

AGENT: See "Port Qaboos".

Pakistan

KARACHI: 24.49 N. 66.59 E.

DOCUMENTS: *Required before vessel's arrival:*
2 copies Freight Manifest.
2 sets Bills of Lading.
3 copies Stowage Plan.
2 copies Passenger Manifest.
3 copies Cargo Manifest.
3 copies Hatch Lists.
1 copy Exception Lists.
6 copies Passenger Lists.
With vessel:
2 copies Cargo Manifest.
Last Port Clearance Certificate.
6 copies each Passenger List, disembarking and transit.
2 copies List of favour parcels.

The following special Pakistan forms are brought on board by Agent for completion on arrival:
2 Customs Arrival Reports.
2 Opium and Dangerous Cargo Certificates.
2 Ship's Currency Lists.
6 Deck Cargo Certificates.
1 Company's Arrival Report.
1 Ship's Crew Advance (if required).
1 Expiry date of Ship's Certificate.
1 Same Bottom or Intransit Cargo.
1 Water Indent.
*10 Crew Lists.
3 Stores Lists.
3 Property Lists.
7 Cargo Gear Information Forms.
*If this is ready prior to arrival, please attach to this form.

Metric weights and measures to be used on Particulars of Cargo, Tonnage Certificates, Stevedoring Bills, Manifests and Bills of Lading.

PILOTAGE: Pilotage is compulsory for ship of 200 n.r.t. and upwards. Pilot boards at the Outer Anchorage.

Vessels are piloted day and night, subject to tides, length and draft, to berths lying on the East and West of the fairway, which is 4.27 miles long. Pilotage distance is about 5 to 6 miles.

ANCHORAGE: Outer Anchorage where ships await berth safe except during the S.W. monsoon from mid-May to September. During monsoon no anchorage is recommended. Vessels should anchor a safe distance outside the breakwater within Lighthouse bearings 045° and 025°. Depth of water at the anchorage is about 9 fathoms.

RESTRICTIONS: Datum depth is 27 ft. Vessels with a draft in excess of 32 ft. are not permitted to enter Karachi due to varying depths at berths, and silting in the ship channel.

Berthing at any time, except vessels with bridge aft which permitted daylight only.

Sailings permitted during flood tide only. Tankers with LOA over 525 ft. Permitted to sail on flood tide during daylight hours only. Vessels with bridge aft permitted to sail on flood tide during daylight hours only.

MAX. SIZE:

	Length	*Draft*
Bulk carriers and general cargo (dry cargo)	945 ft.	32 ft.
Bulk oil tankers, white oil product	550 ft.	32 ft.
Bulk oil tankers, black oils.	650 ft.	32 ft.
New oil pier No. 4	800 ft.	32 ft.

HEALTH: The Port Health Authorities give automatic clearance on receipt of a "clean" standard quarantine message and this will be conveyed by the Pilot. However, ships from Yellow Fever areas must be cleared during daylight hours by the Port Health Officer on arrival alongside. On sailing to ports outside India and Pakistan, a medical inspection takes place on the day before sailing. It is, in theory, necessary for a member of the crew to be present at this inspection, although usually the inspection is only a formality. All vessels required obtain Immigration Clearance on arrival.

All vessels which have touched any port or ports between Port Sudan and Durban, on the East Coast of Africa, including these ports, are considered "suspected" vessels on account of Yellow Fever and Jigger and may not have communication with the shore till cleared at berth by the Port Health Officer, who attends only between sunrise and sunset, except in special circumstances. The incubation period for Yellow Fever under the rules is given as 9 days, but vessels arriving later than 9 days are still not free from quarantine because there is no incubation period for Jigger.

RADIO: Port Authorities equipped with VHF radio-telephone, calling Channel 16, working Channel 12. Control Station call sign "Manora Pilot Control".

Vessels should establish radio contact with control station as soon as they are within VHF range.

Use of Channel 12 is restricted to the following: Ships while entering harbour are to maintain watch on Channel 12 as soon as Pilot boards. Ships in harbour scheduled to sail are to keep a listening watch half an hour before sailing till their clearance from the port.

"Intercommunication with the ships, other than Pilot Control, at outer anchorage or ships in harbour on Channel No. 12 and 16 is strictly prohibited. The Manora Pilot Control Station is equipped with multi-channel VHF Radio Telephone sets which are operating on International Maritime Channels 8, 9, 11, 12 and 16 subject to above restrictions."

TUGS: There are five diesel tugs all owned by Port Trust. Four tugs have bollard pull varying from 10 to 18 tons and one tug has 27 tons bollard pull.

Towage inside the harbour is rendered by Port Trust on signal from Pilot. Towage is not provided outside the breakwater except in very special circumstances at the discretion of the Deputy Conservator, subject to weather permitting and availability of tugs on special terms and conditions.

BERTHING: There are 17 berths at East Wharves, total quayage 8,622 ft. Berth Nos. 1 to 17 are on a concrete quay wall of the latest type. All berths are rail-served. Berth lengths vary from 470 ft. to 550 ft. Available depths vary from 26 ft. to 31 ft. There are 8 berths at West Wharf and their length varies from 550 ft. to 700 ft. Depths available vary from 29 ft. to 31 ft.

There are three Bulk Oil Piers having length of 425 ft., 644 ft. and 750 ft. which can accommodate tankers of overall length between 525 ft. and 650 ft. Also see "Tankers".

Moorings: Three moorings of 700 ft. each and one Lash Mooring of 1,000 ft. have been laid and are commissioned for accommodating the vessels of sizes between 600 ft. and 850 ft. respectively.

STEVEDORES: Working Hours: Monday through Thursday and Saturday, day shift: 0730–1130 and 1230–1630 hrs. On Fridays day shift: 0730–1230 and 1400–1630 hrs. Mondays through Saturday, night shift: 1900–2300 and 2300 to 0330 hrs. next day.

Overtime periods: 0330–0630, 1130–1230, 1630–1830 hrs.

TANKERS: Mineral oils discharged at the Bulk Oil Pier, 3 berths, and at West Wharf berth 20. Heavy grades may be discharged at the steamer wharves but dangerous petroleum only at the Oil Pier.

Vegetable oils are handled at both the terminals mentioned above, and at East Wharf berth 9.

New Oil Pier No. 4: Completed 1978. Max. LOA 800 ft., max. beam 100 ft., max. loaded draft 32 ft., max. size 75,000 d.w.t. and 95,000 tons, max. gross displacement.

Slop reception facilities: Not available.

Also see "Berthing".

FRESH WATER: Fresh water is available at East and West Wharves and at Oil Piers. The ships at Moorings are supplied fresh water by barges.

FUEL: In addition to coal, 3 grades of petroleum are available – furnace oil, light diesel oil and high speed diesel oil. Furnace oil can be supplied by pipe-line at all berths. Light diesel only at berths 1 to 4. At other berths supply is made by tank wagons and lorries. Large quantities can be supplied by pipe-line at the Bulk Oil Pier only.

REPAIRS: Repairs can be carried out at the anchorage except in the monsoon season. 2 ship repair jetties are available in the port. In addition, Karachi Shipyard and Engineering Works Ltd. provide all kinds of repair and ship-building facilities.

DEVELOPMENTS:
(i) New Railway Yard for serving West Wharf berths is under construction.
(ii) A new road bridge serving 17 East Wharves Berths is under construction in replacement of the existing century-old Napier Mole Bridge connecting Keamari with the City.
(iii) New high throughput storage facilities have been added to the Port in 1976 comprising of 16,000 tons Transit Sheds at Berth No. 23, and 8,000 tons Transit Sheds at Berth No. 3.

Port Qasim: New port under construction 30 miles South-east of Karachi. The first phase of Port Qasim, to be completed in 1979-80. It includes construction of 7 multi-purpose berths and 1 steel mill terminal to handle iron ore and coal for the Karachi Steel Mills, and dredging of the approach channel to take vessels of up to 50,000 d.w.t.

The first 4 multi-purpose berths are expected to be available within 2 years to take ships of up to 50,000 d.w.t. The second phase of the port will be completed in 1984-85 and will add 12 high throughput berths.

HOLIDAYS: Eid-ul-Azha; Muharram; Defence of Pakistan Day (23rd March); Eid e Miland un Nabi; Independence Day (14th August) Defence of Pakistan Day (6th September); Jamat-ul-Wida; Eid-ul-Fitr; Anniversary of Death of Quaid-e-Azam; Christmas Day (25th December).

TIME: GMT plus 5 hours all year round.

AIRPORT: Karachi Airport, 7 miles from city. International connections to all parts of the world.

SHORE LEAVE: Shore passes are granted by Immigration Authorities when they first go on board and must be returned on departure of the vessel. These passes permit entry/exit to the docks until 11 p.m. This latter regulation is not strictly enforced.

Indian crew are not allowed ashore except in emergency. An Immigration policeman will remain on board in port where Indian crew are carried. This policeman will ask for some sort of accommodation. This need only be given if it does not cause inconvenience to the ship.

GENERAL: The Karachi Port Authorities advise that in order to avoid delays to ships requiring abreast berths for working cargo, it has been decided not to berth more than 1 vessel for receiving supplies of fresh water and bunkers. Ships due to call at Karachi are therefore *recommended to arrive with sufficient fresh water and bunkers to last for two or three weeks from the date of arrival at the outer anchorage.*

AUTHORITY: Karachi Port Trust.

Panama

AGUADULCE: 08.14 N. 80.30 W. (See Plan Book)

LOCATION: The port of Aguadulce is located 4.5 km. from the coast on the Palo Blanco inlet in the Bay of Parita, Pacific coast of Panama.

The port consists of a single quay 70 m. long used mainly for shipment of bulk sugar and molasses to ports in the U.S.A.

DOCUMENTS: The same documents are required and the same procedures are followed as for Almirante, Armuelles and Bahia las Minas. See "Almirante".

PILOTAGE: There is an official pilotage service with Pilots available 24 hours a day. Pilotage is compulsory for all vessels greater than 150 tons g.r.t., wishing to enter and leave the port. To request the Pilot, the vessel's Agent must make arrangements with the National Port Authority. The pilot station is in Aguadulce. Vessels can also ask for Pilot by calling the National Port Authority on Channel 12 VHF.

The Pilot launch is blue, with a white superstructure and flies a blue pennant. Vessels can communicate with the launch on Channel 12 VHF.

ANCHORAGE: Vessels must await the Pilot at the anchorage located near the sea buoy which is painted white with a white light flashing every 2 seconds. Position of the buoy is Lat. 08° 13' N., Long. 80° 25' W. Depth of water at the buoy's location is 22 ft., average low tide, and in places one mile to the N.E. it increases to 30 ft.

RESTRICTIONS: The port is on an inlet. It has an access channel 13 km. long from the sea buoy. The width of the channel varies from 200 m. in its widest part down to 75 m. at its narrowest.

The channel is marked by buoys which are lit and in accordance with the uniform lateral signalling system, and coming from the sea the buoys on the starboard are red with even numbers and red light and those to the port side are black with odd numbers and white lights.

The port is tidal and vessels may only enter and leave on the high tide. At low water the access channel has depths of less than three feet for which reason the max. draft permitted in the port is 19 ft. with 18 ft. high tides. Furthermore, inside the inlet there are fairly sharp curves which do not permit entry of vessels greater than 100 m. overall length and 2,500 g.r.t. tons. In the future it is planned to dredge the access channel to provide minimum depths of 10 ft. at low tide.

HEALTH: As with other Panamanian ports, the doctor boards the vessel with the other officials of the reception commission. If there is any infectious illness on board, the Captain must communicate this to the Port Authority by VHF Channel 12.

VHF: The Port Authority has VHF equipment. Call on Channel 12. It operates throughout the day.

TUGS: None available.

BERTHING: There is a main quay 70 m. long with an average low water depth of 10 ft. There is also a small quay 30 m. long which is not used. The quay has a fender system. There is also a dolphin type quay for shipment of molasses, and a 50 m. berth for sugar carriers, which has automatic sugar loaders.

No loading equipment available. Unloading must be by ship's gear. There are belt type sugar loaders. Mobile cranes can be contracted in Aguadulce.

There are two storage tanks for molasses of 1,000,000 and 500,000 gallons capacity respectively.

There are also open air facilities for storage of general cargo.

STEVEDORES: Loading and unloading work is carried out by a gang of local workmen contracted by the ship's Agent, via their representative.

FRESH WATER: Available via tanker lorries. No supply via pipes in the port.

FUEL: None available.

POLICE/AMBULANCE/FIRE: Available in the town of Aguadulce 5 km. from the port.

REPAIRS: No facilities.

PROVISIONS: Supplies available in Aguadulce.

TIME: GMT less five hours.

CONSULS: None; the nearest are in Panama City 193 km. from the port by road.

MEDICAL: Hospital in Aguadulce.

CUSTOMS ALLOWANCES: See "Almirante".

TELEPHONES: Telephonic communication from the port by public telephone by micro-wave to any part of the world. No facilities for phones on board vessels.

DENSITY: Approximately 0.9971 gm/c.c. at 85° F.

SHORE LEAVE: No restrictions.

REPATRIATION: There are Immigration Officials on the quay. Repatriation presents no difficulty.

COMMUNICATIONS: The port is connected to the town of Aguadulce by an asphalt highway 5 km. long.

Aguadulce is connected to Panama City by road, the capital being 193 km. distant.

AIRPORT: At Aguadulce there is a small airstrip. There is an airport at Chitre 60 km. from Aguadulce and where a local airline effects two trips between this town and the airport of Paitilla in Panama.

AUTHORITY: National Port Authority.

ALMIRANTE (Bocas del Toro): 09.18 N. 82.23 W. (See Plan Book)

LOCATION: Located in Almirante (Bocas del Toro) Bay, on the N.E. end of the Atlantic coast of Panama.

The Port of Almirante consists of a pier 305 m. long used for loading bananas. The port is used principally by reefer vessels coming from Europe and bound for European ports.

The port was built by the United Brands Company and later transferred to the Government. Currently, it is rented by United Brands but is administered by the National Port Authority.

DOCUMENTS:

2 General declarations.
1 Clearance from previous port.
5 Cargo manifests or declaration that no cargo is carried.
2 Crew lists.
4 Passenger lists or declaration that no passengers are carried.
2 Supplies declarations for crew or declaration that there are no supplies.
2 Crew personal effects declarations.
1 Maritime Health Declaration.
2 Mail lists.
1 Bill of lading (1 copy of each).

The above documents must be presented by the Captain of the vessel when the reception commission boards the ship, this commission comprising the following: Port Authority, Customs, Immigration, Health (Doctor), Vegetable Health and National Guard.

Once the reception commission finds the documents to be correct, free pratique is given enabling the vessel to commence operations.

PILOTAGE: Pilotage is compulsory for vessels entering Almirante.

The service is provided by a private Pilot who has his station in the town of Bocas del Toro. To request his services, the Agent must make arrangements with the Port Administration. Vessels using Almirante frequently take the Pilot on board in the Bay of Almirante, in front of the town of Bocas del Toro. The pilot cutter is blue with white superstructure, and has VHF radio. To communicate with the cutter, call up on Channel 12 VHF.

In January 1979, the Port Authority will establish an official pilotage service, and all arrangements for the services of the Pilot must be made with the Port Authority. For vessels arriving for the first time in Almirante, they must anchor outside the entrance of Bocas del Toro aligned at 150° to 180° to Toro Point and 8 cables off. At this point, they must await the Pilot.

ANCHORAGES: Within the Bay of Almirante there are good locations with depths up to 90 ft.

In front of the quay there is space to anchor with depths of 50–60 ft.

RESTRICTIONS: The entrance channel has a minimum depth of 30 ft. and is marked by buoys and light floats as indicated on the Port Nautical Charts. Also see "Developments".

Shipmaster's Report: The water depths on passing Bocas del Toro are greater than 30 ft. as you follow the charted course lines.

Proceeding at a reduced speed consisting of "dead slow" and "stop", with enough manoeuvrability, to minimise the vessel's pitching, you can enter or leave the Bocas del Toro with a draft of 26 ft. without any difficulties.

On entering and leaving I was forced by cargo circumstances to berth with a 26 ft. deepest draft, and never had less than 10 ft. below my vessel's keel (deepest section), at low water.

MAX. SIZE: There are no restrictions as to beam and size of vessel; but as far as draft is concerned this must not exceed 30 ft.

Bocas del Toro can be entered and left with drafts of 29 ft. without difficulty.

HEALTH: The doctor on boarding the vessel with the Reception Commission receives his documents and declares free pratique.

In the event of illness on board, Agent must be advised by VHF radio and this will be passed on to the doctor.

RADIO: Cables for and from the Agent are sent by radio operated by Tropical Radio Telegraph Co. The Port Authority has VHF and SSB equipment. The SSB equipment operates on the call-up frequency of 7447.5 kHz.

VHF: VHF communications can be made on Channel 12 at a distance of 30 miles from the port. Furthermore, United Brands Co. has VHF equipment which receives calls on Channel 16.

TUGS: None available.

BERTHING: A banana quay 653 ft. long with a single mooring frontage and with 4 automatic banana loaders. It is recommended that vessels moor on the starboard side. Also there is a general cargo quay 350 ft. long which has pipes for discharge of refined oil. The max. depth at the quays is 30 ft.

STEVEDORES: Loading work is carried out by the local Workers Union. The Agent must make contact with United Brands Co. for these workers.

FRESH WATER: Available throughout the year. The pumping capacity is 2–3 t.p.h.

FUEL: Not available.

REPAIRS: No facilities for repairs to vessels.

PROVISIONS: Obtainable in the local market; but it is preferable for provisions to be obtained in Colon.

TIME: GMT minus 5 hours.

CONSULS: Costa Rica, El Salvador, Honduras, Nicaragua.

MEDICAL: A modern hospital is available in Changuinola 20 kms. from Almirante. Almirante also has a small hospital.

CUSTOMS ALLOWANCES: The customs offices are in the port vicinity. Permitted quantities are 2 packs of cigarettes of 20 packets each per crew member and 2 bottles of whisky or other alcoholic drink per crew member for consumption on board.

TELEPHONE: There is a micro-wave telephone service to Panama and other places in America. The Port Authority has telephones in their offices, but there are none available for installation on vessels.

OPENING/CLOSING HATCHES: Carried out by stevedores.
DENSITY: 1.022 gm./cu.cm.
SHORE LEAVE: No restrictions.

POLICE/AMBULANCE/FIRE: Available in Almirante.
REPATRIATION: Can be effected without difficulty.
AIRPORT: There is a small airport at Changuinola 21 kms. from Almirante, which connects the province of Bocas del Toro with the rest of the Republic. There are 2 flights a day between the airport of Changuinola and Tocumen in Panama City. Changuinola is connected with Almirante by railway.

DEVELOPMENTS: It is planned (for the end of 1979) to reposition the buoys marking the port entrance channel for the purpose of obtaining a minimum depth of 32 ft. along the whole of the port access channel.

SHIPMASTER'S REPORT: October 1978.
Position: 29° 17.4′ N., 82° 23.5′ W.
Pilot: Compulsory. The boarding position of the Pilot varies, however he usually boards in the region of No. 10 Beacon. If he should be moving another vessel at the time of arrival, he requests vessel to proceed towards the berth and he will board the vessel about 1 mile off the berth. Occasionally he will board vessel as far out as Cape Toro. Notice of arrival is required 24 hours in advance via the Chirique Land Co.
Restrictions: Vessels able to enter and leave at any stage of the tide. It is not recommended to manoeuvre in hours of darkness as the lights on the buoys are not reliable in the Bocas Del Toro Channel. Max. size vessel at the Banana berth is 650 ft. and the deepest draft 26 ft. Bocas Del Toro has a buoy channel least depth 30 ft.
Health: Quarantine officials require 24 hour notice of arrival.
Tugs: No tugs available.
Radio: NBA (Balboa); WAX; WNU (Slidel).
VHF: Pilot and Port Authority on VHF Channel 16. Agent on Channel 16 and 14.
Berthing: The Banana berth has 4 elevators. Distance from Bocas Del Toro to the berth is 17 miles. Max. size of vessel that can safely berth is 650 ft. Deepest draft is 32 ft. alongside, however there is a 27 ft. patch about 200 ft. off the berth. (See Plan Book). Draft limited to a max. of 26 ft. The channel from sea to berth is said to be swept to 30 ft. The nature of the bottom at the berth is sand and mud with occasional patches of coral.
Consuls: Honduras, El Salvador and Costa Rica.
Services available: Fresh water (however pressure very low during the day); Fresh provisions; Repair facilities (Small); Machine shop; Small air strip; Doctor and hospital.
General:
Bocas del Toro Channel: Prior to arrival confirm with Chiriqui Land Co. (Agents) that all buoys are in position and none missing. Channel is swept to a depth of 30 ft. but as can be seen on American Chart 28044, just North of No. 5 buoy a 25 ft. patch exists and the opposite side a 28 ft. patch. "Salen" confirmed max. safe draft is 26 ft.

On occasions quite a heavy swell is present causing vessel to pitch, on the way out it is usually noticable about No. 5 Buoy.
Pilots: There are 3 Pilots, all live at Bocas. They use a small open type "dug out" boat with an outboard engine. Reputed to do 9 knots. They usually board off No. 10 beacon. Our Pilot required the port accommodation ladder. The others use the pilot ladder. They leave at the same place near beacon No. 10.
Mooring at Banana Pier: Morning time is usually the best, quiet, no wind, but by mid-afternoon it is usually blowing off the berth. Difficulty arises as there are no tugs and no mooring boats to take the lines. Good idea to have some extra light heaving lines ready with weights on the end.
Cargo: If Almirante is the last port for loading insist on filling No. 1 hatch before No. 5 (have only got 4 elevators). This guarantees any cartons "shut out" or rejected by the quality control will leave No. 5 light and not No. 1. This helps the draft situation.
Cargo gear: Have derricks lifted ready and the starboard banana lids open all the way down. Leave the port ones closed.
Fresh Water: Usually none available November to April, but the rest of the year it is about 2 t.p.h. They had a booster pump but at present it is burnt out. During the day the pressure is not good enough to reach the tanks, night time is a little better. Good idea to arrive with starboard side empty as they do not have enough hose or pressure to reach the port side.
Contract Work: Contractor Mr. Julio Wood. Very good for engine room scavenge spaces. Only average for painting on deck as they are not used to stages. They have no paint floats. Rate U.S. Dollars 1.50 per man/per hour. Foreman 2 Dollars. Vessel also has to pay 13% social security.
Recreation: A trip to a banana plantation can be arranged via the office, also includes the packing section and Banana Puree factory. Leave the ship at 0700 hrs. Train goes at 0730 hrs. to Farm 8. Had party of 16 and met by school bus. The club house has golf course, tennis courts and large swimming pool. Worth taking swimming gear.

In Almirante, crew are made welcome at the "Lions Club" which has a Ten Pin Bowling alley. Film shows on Thursdays and Saturdays all free of charge.

AUTHORITY: National Port Authority.

BAHIA LAS MINAS (Colon): 09.24 N. 79.49 W.

(See Plan Book)

LOCATION: Situated 11 km. to the East of the entrance of the Panama Canal on the North Coast.
DOCUMENTS:
2 General declarations.
1 Clearance certificate from last port of call.
5 Cargo manifests, or declaration to the effect that no cargo is carried.
4 Passenger lists, or declaration that no passengers are onboard.
2 Supply lists, or declaration that no supplies are carried.
2 Lists of Crew's personal effects, or declaration that none carried.
1 Maritime health declaration.
2 Mail lists or declaration that no mail is carried.
2 Crew lists.

PILOTAGE: Compulsory for all vessels entering the port and is offered by the Pilots of the Marine Department of the Refineria Panama S.A.

Vessels must await the Pilot beyond buoy No. 1 painted white, with a flashing white light every 3 seconds. The best position for anchoring is near buoy No. 1 in position Lat. 09° 25′ 30″ N. Long. 79° 49′ 35″ W. where there is a depth of 63 to 66 ft.

Vessels wishing to enter the port may call up the Port Authority on VHF Channel 12 or Refineria Panama on VHF Channel 16.

The Pilot craft has a black hull and white superstructure. When weather conditions are bad, a tug is used for boarding vessels.

The boarding ladder is placed in accordance with conditions of the sea.

Vessels may also ask for a Pilot via their Agents who will communicate the request to Refineria Panama. In this case, they must give an ETA 12 hours in advance.

RESTRICTIONS: The port of Bahia las Minas is mainly an oil port, specialised in importing crude oil and exporting refined products, being operated from an oil aspect by Refineria Panama S.A., and administered by the National Port Authority.

Apart from the tanker quays, there is a small quay for handling general cargo, length 90 m. This quay is administered and operated by the National Port Authority. The access channel to the port has a width varying from 300 m. in its widest part to 100 m. in its narrowest part, and a minimum depth of 40 ft. at the tanker quays. However, the general cargo quay can only take vessels of up to 23 draft. Tidal variation in this port is less than 1 ft., and so there are no restrictions for entry and leaving relating to tides.

The port access channel is marked with light buoys positioned in accordance with the International Buoy System, i.e. coming from the sea, buoys painted red with red light on the starboard side, and buoys painted black with white light on the port side.

MAX. SIZE: The port can be used by vessels up to 240 m. LOA at its tanker installations and their draft may not exceed 40 ft.

The general cargo quay can be used by vessels up to 152 m. LOA and 23 ft. draft. However, restrictions in vessels' lengths vary when the quay is used by Ro/Ro vessels which tie up by the bow or the stern, and in this case vessels up to 600 ft. length are permitted.

HEALTH: When a vessel arrives it must hoist the yellow flag of the International Signalling Code. Free pratique will be granted by the reception commission after handing over of documents (See "Documents".) In the case of illness on board, this must be communicated to the vessel's Agent so that he may pass on the information to the Authorities. The vessel may not moor or carry out any operations until the doctor has come on board and verified that the illness does not constitute any danger.

RADIO: Vessels may communicate via the coastal station of the Panama Canal. Generally speaking, the same ships' agencies operating in the Canal Zone are those who represent vessels arriving at Bahia las Minas.

VHF: The Port Authority has VHF equipment at Colon which operates 24 hours a day on Channels 12 and 16.

For calls to the Port Authority, Channel 12 must be used. Refineria Panama also has VHF radio equipment and calls must be made via Channel 16.

RADAR: There is no radar service.
TUGS: Refineria Panama S.A. supplies this service to vessels which may require it. There are 4 tugs available. Generally, tugs work at the bow and stern of the ship, and lines must be fixed by the vessel's crew.
BERTHING:

Quay	*Length*	*Depth (Average low tide)*
Tanker quay	140 m.	40 ft.
2 lighter quays (refined products)	75 m. each	20 ft.
General cargo quay	90 m.	23 ft.

CRANES: There is no cargo handling equipment on the general cargo quay. All unloading must be by ship's gear.
SPECIAL CARGO FACILITIES: The dry cargo quay is used by Ro/Ro vessels making regular trips between Miami and Panama. The port offers unloading and loading services to these vessels.

The oil quays have special equipment for unloading and loading oil and its derivates.

STEVEDORES: These are provided by the Colon Port Workers' union, and must be contracted by the ship's Agent.
FRESH WATER: Available.
FUEL: Pipe-lines are available at all oil quays, but no such facility is available at the general cargo quay.

PROVISIONS: These can be obtained in the town of Colon via local suppliers, the Agent making the necessary arrangements.
DENSITY: 1.0212 grams per cu.cm. at 85° F.
TIME: Local time is GMT less 5 hours.
CONSULS: U.K., Norway, South Africa, Sweden, Denmark, Finland.
MEDICAL: Hospital available in the town of Colon 15 minutes from the port.
TELEPHONE: None available for connection to vessels. Available in the Port Authority offices. Tel: 42-1658.
AIRPORT: There is a small runway at Colon. At Panama, 90 kms. from Colon, is the airport of Tocumen, which is an international airport, served by the main world airlines.
HOLIDAYS: 1st January, 10th January, Mardi Gras, 1st May, 11th October, 2nd and 3rd November, 8th and 25th December.
POLICE/AMBULANCE/FIRE: Available in Colon. Refineria Panama has a small fire brigade, and also in the town of Colon, 15 kms. away, there is a fire brigade.
REPATRIATION: This can be done without difficulty via the Immigration offices.
SHORE LEAVE: No restrictions; but due to the distance between the port and Colon, a taxi service must be used. The tariff in a Refineria Panama taxi to Colon is approximately 5 U.S. dollars.
SERVICES: No special services offered. In the ports of the Canal Zone it is possible to have compass adjustments, laundry, chemicals, etc.
AUTHORITY: National Port Authority.

BALBOA: Canal Zone, 08.58 N. 79.34 W. (See Plan Book)

(N.B. For items not listed below, see "Panama Canal".)

RESTRICTIONS: Port open throughout 24 hours.
MAX. SIZE: Harbour limitations generally unrestricted as to length and beam. Depth about 40 ft. low water. Vessels in excess of 38 ft. 6 in. draft not handled during period 2.5 hours before and 2 hours after low water.

Tankers working cargo restricted to 700 ft. length and 36 ft. salt water draft.
TUGS: Available and assigned for berthing by Pilot. Tug's lines used at no extra charge.
BERTHING: No specific requirements as to arrival times. Nine berths available.

(Pleasure yachts under 65 ft. length, may be permitted to dock at Panama Canal Yacht Club or Balboa Yacht Club after clearance by Boarding Officer and after Master has received permission from Port Captain, Customs authorities and Yacht Club Officials concerned. Chief Customs Inspector shall have authority to grant or deny such permission at his discretion.)

Rodman Naval Station: Piers can accommodate vessels of 700 ft. length and up to 39 ft. draft for oil discharge, bunkers or stores.

Panama Canal Co. Dock:

Dock	*Usable length*	*Maximum S.W. draft*
4	492 ft.	30 ft.
6	742 ft.	36 ft.
7	1,058 ft.	34 ft.
8	470 ft.	26 ft.
14	775 ft.	36 ft.
15	1,146 ft.	40 ft.
16	742 ft.	38 ft.
18–A	500 ft.	39 ft.
18–B	500 ft.	35 ft.
18–C, D	1,000 ft.	40 ft.

STEVEDORES: Endeavour arrange arrival to avoid cost of "stand by" as Agent arranges gangs for 0700 hrs. or 1700 hrs. commencement.
TANKERS: One berth for vessels up to 40 ft. draft.
FRESH WATER: Available.
FUEL: Bunker "C", diesel, light fuel and light diesel available at Government wharves from commercial companies. Rate of delivery 2,000 bbls. per hour.

Vessel's personnel are to connect and disconnect all fuel lines aboard the vessel. The vessel is also to supply necessary fittings to match U.S. standard 4 in. and 6 in. 150-pound flanges.

A bunkering area has been established in the Pacific Anchorage.
REPAIRS: Emergency repairs possible.
DRY DOCK: Length 1044 ft., generally reserved for Canal Company vessels, but arrangements may be made for emergency dry-docking.
POLICE/AMBULANCE/FIRE: Emergency tel. 110; routine Police business 2-1277.
TELEPHONES: May be placed aboard through arrangement with Port Captain.
SHORE LEAVE: Generally permitted.
CUSTOMS: Customs and Immigration Inspection Service available Monday to Saturday from 0700 to 1700 hrs. Charges for such service after hours and on Sundays and holidays set forth in Panama Canal Tariff. Number of Inspectors required will be determined by Chief Customs and Immigration Inspector of port.
DELAYS: Delays in berthing, load or discharge or bunkering are minimal and infrequent. Eight hours is considered excessive.
AUTHORITY: Panama Canal Company.

AGENT: C. Fernie & Co., Inc. PO Box 212. Cable Address: "Fernie-Balboa". Also VHF. Telephone Nos.: Balboa 5657-5371. After office hours telephone numbers: Panama 21-2629, Panama 22-1037.

All correspondence should be addressed to Cristobal, Canal Zone.

COLON: 09.21 N. 79.54 W. (See Plan Book)

LOCATION: Located in the Bay of Limon, the port of Colon is completely separated from the port of Cristobal (Panama Canal Zone). It is a port, completely under the jurisdiction and operation of Panama. It is constituted by Quay No. 3 in the area of Fort Jessep.
GENERAL:
Shelter: All the quays are protected from the sea by the breakwater which protects the canal entrance in the Atlantic sector.
General description: The port of Colon (Quay No. 3) is used by small vessels of length not greater than 100 m. engaged in coasting trade between Colon and Bocas del Toro, and international trade between Colombia and Panama.
Port maritime access: The Colon port access is the same as that which leads to the port of Cristobal in the Canal Zone.
Nature of bottom: Soft mud and clay.
DOCUMENTS: The same documents are required and the same procedures are followed as at Bahia las Minas.
PILOTAGE: No pilotage service at Colon. Vessels berth and unmoor under the orders of their Masters.
RESTRICTIONS: The port is restricted to vessels of length not greater than 100 m. due to the size of the quays. Draft at the berths varies from 8.5 to 20 ft., which also restricts the size of vessels.
Aids to navigation: The port entrance channel has no aids of its own for navigation. Maritime accesses are however marked clearly by the Panama Canal Authority.
HEALTH: Same as Bahia las Minas.
RADIO: Vessels can communicate with the Port Administration on Channel 12 VHF.
TUGS: None at Quay No. 3, but they may be contracted in the Canal Zone.
BERTHING:

Berth	*Length*	*Depth (average low tide)*
Quay 1	55 m.	16 ft.
Quay 2	58 m.	16 ft.
Quay 3	82 ft.	10 ft.

STEVEDORES: All loading and unloading operations are carried out by the Union of Port Workers of Colon. The ship's Agent must make the necessary arrangements.
CRANES: None.
FRESH WATER: Available.
FUEL: Available at the quay by pipe-line. Also Refineria Panama supplies fuel in the Bay of Colon by means of lighters.
PROVISIONS: Available in Colon.
DENSITY: 1.0212 grams cu. cm. at 85° F.
TIME: GMT less 5 hours.
CONSULS: Norway, UK, Sweden, Denmark, Finland.
MEDICAL: In the town of Colon.
TELEPHONE: Available in the offices of the National Port Authority. Telephone 47-9181.
POLICE/AMBULANCE/FIRE: Available in Colon.
DEVELOPMENTS: *Container Port Project:*

Description: The container port project at Coco Solo is located on the opposite side to the town of Colon, adjacent on the Eastern side to the Bay of Manzanillo and on the South side with the area occupied by the Naval Base of Coco Solo which will be returned to Panama in accordance with the Torrijos-Carter Treaties of 7.9.1977.

CHARACTERISTICS OF THE CONTAINER PORT OF COCO SOLO: This modern terminal for the mooring, loading and discharge of container vessels will be developed in 2 main stages. In Stage 1, which consists of the supply of a quay for containers and 2 quays for Ro/Ro vessels, and Stage 2 consisting in the supply of 2 container berths and 2 quays for Ro/Ro vessels. It is hoped that Stage 1 may serve traffic expected between 1981 and 1986 and Stage 2 for projected traffic between 1986 and 1991. The total estimated cargo handled by the port in 1981 is 520,000 tons, and 752,000 in 1986.

Access to the port will be by means of an access channel 4.2 km. long by 150 m. wide with an average depth of 11.5 m., at the end of which will be built a handling dock whose diameter will be 430 m. in Stage 1 and 500 m. in Stage 2, with an average depth of 11.1 m. and 12.3 m. respectively.

The area available for development of Stages 1 and 2 is approx. 37 hectares which includes areas for storing containers and trailers, buildings and areas for future expansion. 16.2 hectares are covered by the development of Stage 1 and 6.8 hectares for Stage 2. The area of the buildings and the handling facilities is 6 hectares, there remaining available 8 hectares for a future expansion of the port.

The container storage area in Stage 1 will have a capacity for 1,500 t.e.u., which will increase to 2,100 t.e.u. within 5 years of operation. In the second stage, this same area will have a capacity for 2,100 t.e.u., which will be increased to 3,100 t.e.u. by 1991.

The length of the container berths will be 240 m. in Stage 1 and 500 m. in Stage 2, with an approx. draft of 11.1 m. and 12.3 m. respectively. The draft of the berths for Ro/Ro vessels will be 8.1 m. in both stages.

The port will have all necessary services for its operation, efficiency and safety such as: aids to navigation, control systems, and will offer all services to vessels using the port such as drinking water, maintenance workshops, firefighting services, loading and unloading services, bunkers, and towing services. There will also be all public services, lighting, electricity, water and telephones.

Container Port at Coco Solo

1. *Access Channel*	*Stage I*	*Stage II*
Length	4,300 m.	the same
Width	150 m.	the same
Draft	11.5 m.	12.72 m.
2. *Manoeuvring Dock*		
Diameter	430 m.	500 m.
Draft	11.1 m.	12.32 m.
3. *Vessel Capacity*		
T.E.U.	1,200	1,800
Draft	11.1 m.	12.32 m.
4. *Berths*		
Container berth	1	2
Dimensions	240×24 m.	500×24 m.
Draft	11.1 m.	12.32 m.
Ro/Ro berth for stern discharge	2	2
Draft	8.1 m.	8.1 m.
5. *Dredging*		
Volume dredged	2,650,000 cu.m.	1,600,000 cu.m.
6. *Storage Areas*		
Containers	8.2 Ha. (1,500 – 2,100 t.e.u.)	15 Ha. (2,100 – 3,100 t.e.u.)
Ro/Ro	8.0 Ha. (400 trailers)	8.0 Ha. (510 trailers)
7. *Tug Services*		
Number of tugs	2	information
Power	2,000 h.p.	not available

8. *Cargo Handling Equipment*
1 40-ton container crane
3 'transtainers'
1 fork lift with 60,000 lb. capacity
2 fork lifts with 25,000 lb. capacity
8 tyred tractors
15 20/40 ft. container combination chassis
8 fork lift with 5,000 lb capacity
1 fork lift with 25,000 lb. capacity (general usage)
3 platform trailers
1 fuel truck
1 service lorry
1 line marker
1 mechanical sweeper for cleaning purposes
1 firefighting truck

AUTHORITY: National Port Authority.

CRISTOBAL: Canal Zone, 09.21 N. 79.54 W. (See Plan Book)

(N.B. For items not listed below, see "Panama Canal".)

PORT LIMITS: Ship's arrival time is normally determined by their passage between the breakwater lights. Those that anchor outside the breakwater by arrangement with the Port Captain are timed as arrived when they drop anchor.

PILOTAGE (Also see "Panama Canal"): Pilotage into Cristobal not compulsory, although services of Pilot outside breakwater are available on request.

Vessels arriving outside Cristobal Breakwater who have requested an outside Pilot are required to *heave to and make a good lee.*

A pilot ladder rigged with appropriate spreaders and well illuminated at night to be provided by vessel. Accommodation ladders not acceptable for embarking Pilots outside breakwater.

Marine Director's Notice to Shipping Agents No. 8–74:

1. A vessel shall, weather permitting, have both an accommodation ladder and a pilot ladder rigged and ready for use upon arrival in Canal Zone Waters.
2. The pilot ladder shall conform to Regulation 17, Chapter V of the International Convention for the Safety of Life at Sea 1960 (SOLAS) and to all additional recommendations of the International Maritime Consultative Organisation (IMCO).
3. The accommodation ladder may be turned in and secured after the Pilot has boarded the vessel in the anchorage, provided the freeboard does not exceed 9 m. (30 ft.). If the freeboard exceeds 9 m., the accommodation ladder may not be turned in until the last Panama Canal employee boards prior to arrival at the locks.
4. A pilot hoist may be used provided the design and construction of the hoist and ancillary equipment are of such a standard as to ensure an effective and safe means of embarkation and disembarkation. The pilot hoist should only be used when:
   (a) A conventional pilot ladder is rigged and ready for immediate use but triced up well clear of the hoist;
   (b) A lifeline attached to a safety stop and a lifebuoy fitted with a self-igniting light are ready for immediate use.

ANCHORAGE: Vessels will ordinarily proceed to anchorage area according to length and draft unless otherwise directed. Arriving vessels expected anchor as far to South and inward from main channel in their anchorage area as is consistent with safety. Vessels anchoring in non-designated areas may be required to move.

Anchorage Area "A". For all ships with a deep salt-water draft of not less than 34 ft. and not in excess of 39 ft. Minimum charted depth is 40 ft.

This area starting at Lat. 9° 23′ 21″ N., Long. 79° 55′ 21″ W.,
thence to Lat. 9° 22′ 48″ N., Long. 79° 56′ 15″ W.,
thence to Lat. 9° 22′ 14″ N., Long. 79° 56′ 15″ W.,
thence to Lat. 9° 21′ 56″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 55′ 21″ W.,
thence due North to starting-point. However, restricted area North and East of Buoy 2, as charted, must be observed. Explosive sector charted in this area to be avoided whenever possible.

Anchorage Area "B". For all ships with salt-water draft under 32 ft. Minimum depth is 29 ft. Explosive sector restricted to vessels carrying explosives or specially designated vessels. All ships of such length are under no circumstances swing into Anchorage Area "A".

This area starting at Lat. 9° 22′ 48″ N., Long. 79° 56′ 15″ W.,
thence to Lat. 9° 22′ 32″ N., Long. 79° 56′ 41″ W.,
thence to Lat. 9° 21′ 42″ N., Long. 79° 56′ 41″ W.,
thence to Lat. 9° 21′ 52″ N., Long. 79° 56′ 00″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 56′ 00″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 21′ 56″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 22′ 14″ N., Long. 79° 56′ 15″ W.,
thence due North to starting-point.

Anchorage Area "C". Required pilotage waters for inbound vessels.

This area starting at Lat. 9° 21′ 25″ N., Long. 79° 55′ 21″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 56′ 00″ W.,
thence to Lat. 9° 20′ 48″ N., Long. 79° 55′ 57″ W.,
thence to Lat. 9° 20′ 27″ N., Long. 79° 55′ 21″ W.,
thence due North to starting-point. Restricted area East and South of Buoy 2, as charted, must be observed.

Anchorage Area "D". For all ships of over 350 ft. in length and a deep salt-water draft of less than 35 ft. except where minimum charted depth is 32 ft.

This area starting at Lat. 9° 23′ 19″ N., Long. 79° 55′ 15″ W.,
thence to Lat. 9° 22′ 55″ N., Long. 79° 54′ 21″ W.,
thence to Lat. 9° 22′ 22″ N., Long. 79° 54′ 21″ W.,
thence to Lat. 9° 22′ 02″ N., Long. 79° 54′ 55″ W.,
thence to Lat. 9° 22′ 02″ N., Long. 79° 55′ 15″ W.,
thence due North to starting-point.

Anchorage Area "E". For all ships less than 350 ft. and small craft. Minimum charted depth of water is 24 ft.

This area starting at Lat. 9° 22′ 55″ N., Long. 79° 54′ 21″ W.,
thence to Lat. 9° 22′ 27″ N., Long. 79° 53′ 54″ W.,
thence to Lat. 9° 22′ 22″ N., Long. 79° 53′ 54″ W.,
thence to Lat. 9° 22′ 22″ N., Long. 79° 54′ 21″ W.,
thence due North to starting-point.

Anchorage Area "F". For small craft and yachts. Pilotage for this area will be decided by Cristobal Port Captain, based on merit of each individual case. Under no circumstances may a vessel proceed to this area prior to being cleared by Boarding Officials. (Bounded by Channel Buoy "3" by a direct line through Buoys "A," "B," "C," "L4," "L2" and return to Buoy "3".)

Outer anchorage area. Established North-West of Cristobal breakwater have the following co-ordinates: Commencing at Lat. 09° 23′ 14″ N. Long. 79° 55′ 21″ W. (West breakwater light); thence to 09° 24′ 40″ N. 79° 56′ 00″ W. (buoy "A", whistle sea buoy); thence to 09° 24′ 40″ N. 79° 57′ 00″ W.; thence to 09° 23′ 14″ N. 79° 57′ 00″ W.; thence due East to starting point.

During periods of harbour congestion, large, deep-draft vessels and/or any vessel so directed may anchor outside the breakwater in the approved area. Such vessels must advise Cristobal Signal Station, by VHF Channel 12, the time of passing sea buoy, in order to establish order of transit. Masters will be given a definite time to enter the breakwater, where the vessel will be met by transit Pilot(s) and boarding officials.

Vessels must strictly adhere to the breakwater entry times as given, in order that transit schedule can be maintained.

Prohibited Anchorage. Eastern side of channel, Canal Zone waters South of Lat. 9° 22′ 02″ N. to Mole Buoy in order to give clear access to Colon Harbour. Also, no vessel or craft may proceed South of Latitude 9° 21′ 25″ N. prior to being cleared by Boarding Officials. No vessel may anchor with any part of the vessel in the main channel or closer than 300 yards to either East or West breakwater lights.

In cases due to harbour congestion, any vessel may be directed to anchor to Westward outside breakwater entrance and given an order as to the time it is to pass through the breakwater entrance.

RESTRICTIONS: Port open throughout 24 hours.

MAX. SIZE: Harbour limitations generally unrestricted as to length and beam. Draft 40 ft.

RADIO: The Port Captain may be contacted via VHF Channel 12. Commercial telephone calls and messages to Agents may be made via Panama Radio, VHF Channel 16.

TUGS: Available and assigned for berthing by Pilot. Tug's lines used at no extra charge.

BERTHING: No specific requirements as to arrival times. Fifteen cargo and bunkering berths.

Cristobal Harbour Controlling Depths:

Dock	Berth	Usable Length (ft.)	Max. S.W. Draft (ft.)	Max. Lgth. of Ship at Max. Draft (ft.)	Beam Limit (ft.)	Total Lgth. Avail. of Dock Face (ft.)	Remarks

Mindi		275	26	492	None	275	No Services

STEVEDORES: Endeavour arrange arrival to avoid cost of "stand by" as Agent arranges gangs for 07.00 hrs. or 17.00 hrs. commencement.

TANKERS: Four berths available.

FRESH WATER: Available from piers.

FUEL: Bunker "C", diesel, light fuel and light diesel available at Government wharves from commercial companies. Rate of delivery 2,000 bbls. per hour.

The Southern part of Anchorage C, Cristobal Harbour, has been designated a limited bunkering area for vessels whose draft is too great to use the East breakwater bunkering area.

Pilotage is compulsory out and into this area for vessels and bunkering barges.

Also see "Balboa".

REPAIRS: Emergency repairs possible.

DRY DOCK: Length 386 ft., breadth 60 ft., depth over blocks 20 ft. 6 in. MLW.

POLICE/AMBULANCE/FIRE: Emergency number 110. Routine Police business 3–2111.

TELEPHONES: May be placed aboard through arrangement with Agent.

SHORE LEAVE: Generally permitted.

CUSTOMS: Customs and Immigration Inspection Service available Monday to Saturday from 0700 hrs. to 1700 hrs. Charges for such service after hours and on Sundays and holidays set forth in Panama Canal Tariff. Number of inspectors required will be determined by Chief Customs and Immigration Inspector of port.

DELAYS: Delays in berthing, load or discharge or bunkering are minimal and infrequent. 8 hours is considered excessive.

AUTHORITY: Panama Canal Company.

AGENT: C. Fernie & Co., Inc. PO Box 5042, Cable address: "Fernie-Cristobal". Telephone Nos.: Cristobal 43-3393 (5 lines). Telex Nos.: ITT–3482020, TR–9211 "Fernie Pa". Also VHF. After office hours telephone numbers. Cristobal 2468, Cristobal 2568.

PANAMA CANAL (entering Cristobal or Balboa) (See Plan Book)

§ Indicates Panama Canal – Code of Federal Regulations Number.

REGULATIONS: The following are some of the important Canal Regulations.

§101.2 Boarding of arriving vessels:

(a) Arriving vessels that are subject to quarantine inspection and arriving vessels that are exempt from quarantine inspection due to compliance with §61.171 of this chapter and intend to transit the Canal without first docking normally will be boarded upon arrival. The boarding will occur inside the breakwater at the Atlantic entrance to the Canal or off the seaward end of the dredged, marked channel at the Pacific entrance. It will be performed by a Panama Canal boarding officer in accordance with the procedures and during the boarding hours established for the respective ports by the Canal authorities. When such vessels are not boarded immediately upon arrival, they shall anchor in a designated anchorage area and await the boarding officer.

(b) Arriving vessels that are exempt from quarantine inspection due to compliance with §61.171 of this chapter and intend to dock at their port of arrival may proceed to the dock without awaiting a boarding officer. Customs, Immigration and admeasurement functions relating to such vessels will be performed by a boarding officer after the vessel docks.

(38 FR 3963, Feb. 9, 1973)

§101.3 Functions of the Boarding Officer:

The boarding officer shall perform the functions of admeasurer for the purpose of determining Panama Canal tolls; shall make inspections for the purpose of insuring compliance with quarantine, immigration, and customs laws and regulations; and shall act as deputy shipping commissioner for seamen aboard US flag vessels pursuant to 2 C.Z.C. 1381 and 1382, 76A Stat. 48.

§101.4 Measurement of vessel making maiden transit:

A vessel that arrives after 2000 hrs. and is to make her maiden transit will normally be admeasured on the following day.

§101.5 Compliance with quarantine and immigration instructions:

(a) In the case of vessels subject to quarantine inspection, all persons shall comply strictly with instructions from the boarding officer until such time as pratique is granted.

(b) In the case of vessels subject to immigration inspection, all persons shall comply strictly with instructions from the boarding officer in all matters concerning immigration inspection; and, until the vessel has been granted immigration clearance, no person other than the boarding officer and the Pilot shall go aboard or leave the vessel unless authorised to do so by the Boarding Officer.

§101.6 Identification signals:

Every vessel shall hoist its signal letters when approaching and entering a terminal port, and those arriving at night shall promptly signal their names, by flashing light, to the signal station. This communication of the vessel's name by signal letters or flashing light is mandatory even though the vessel communicates by voice radio. The signal station on Flamenco Island is equipped with voice radio for communication with vessels approaching the Pacific entrance to the Canal on the following frequencies: International Calling and Distress 2182 kc/s and Panama Canal Company 2846 kc/s.

§101.1 Visual-signal stations at Canal approaches:

The established visual-signal stations with which vessels may communicate upon arriving at the Canal approaches, by means of International Code and flashing light, are located on the seaward end of Pier 6, Cristobal, and on Flamenco Island at the Pacific entrance. Such stations are also utilised to assist in control of traffic at the terminal ports. The signal station at Flamenco Island is also equipped with voice radio.

Cross Reference: See Part 123 for provisions respecting radio communication by vessels prior to arrival and while they are in Canal Zone waters.

§103.7 Temporary holding of vessels:

The Canal authorities may hold a vessel for the purpose of investigating any claims or disputes that may arise, or any formal or informal complaint or allegation of a violation of the laws of the Canal Zone or of the United States or of the provisions of this chapter. A vessel may also be held until, in the opinion of the Canal authorities, its tenderness, trim, list, cargo, hull, machinery, and equipment have been put into such condition as will make the vessel reasonably safe for her passage through the Canal. No claim for damages shall be allowed or considered because of any such temporary holding of vessels.

§103.8 Order of transiting of vessels:

The Canal authorities may dispatch vessels through the Canal in any order and at any time they may see fit. Priority of arrival at a terminal does not give any vessel the right to pass through the Canal ahead of another that may arrive later, although order of arrival will be consideration in determining the order of passage.

§103.4 Load and trim:

(a) A vessel shall not be permitted to transit the Canal if she: (1) Has a list of more than 10 degrees; (2) Is so tender or otherwise so loaded as to dangerously affect her stability or manoeuvrability; or (3) Is so trimmed as to dangerously affect her manoeuvrability.

(b) A vessel having a list of between 3 degrees and 10 degrees, or which is so loaded or so trimmed as to adversely affect her manoeuvrability, may be permitted to transit in the discretion of the Port Captain, provided the Master thereof, in the presence of the Pilot, signs an undertaking, for the said vessel, her owners, operators, or any other persons having any interest in her, and for himself, releasing the Panama Canal Company from and indemnifying it against, any loss, damage, or liability incurred by the Panama Canal Company.

§103.10 Vessels required to be equipped with certain indicators:

(a) All vessels in excess of 150 ft. in length shall be equipped with properly operating rudder-angle and engine-revolution indicators in the wheelhouse so located and illuminated as to be readily visible to a Pilot.

(b) All vessels with beams in excess of 80 ft. shall be equipped with properly operating rudder-angle and engine-revolution indicators in the wheelhouse and on each bridge wing so located and illuminated as to be readily visible to a Pilot.

(c) All vessels in excess of 150 ft. in length which are equipped with variable pitch propellers shall have properly operating pitch indicators in the wheelhouse so located and illuminated as to be readily visible to a Pilot.

(d) All vessels with beams in excess of 80 ft. which are equipped with variable pitch propellers shall have properly operating pitch indicators in the wheelhouse and on each bridge wing so located and illuminated as to be readily visible to a Pilot.

(e) Any vessel which fails to meet the requirements of this section may be denied transit. If the Canal authorities decide that the vessel can be handled without undue danger to equipment or to personnel, notwithstanding her failure to comply with other requirements of this section, the vessel may be allowed to transit after the Master thereof, in the presence of the Pilot, signs an undertaking for the vessel, her Owners, Operators or any other persons having any interest in her, and for himself, releasing the Panama Canal Company from and indemnifying it against any loss, damage or liability incurred by the Panama Canal Company.

§103.22 Vessels at fuel berths:

A vessel at a fuel berth shall keep up steam and be ready to move on short notice unless special authority to the contrary has been obtained from the Canal authorities.

§103.23 Vessels at wharves; fire watch; gangways:

A vessel lying at any pier, dock, or wharf shall at all times keep a satisfactory watch for fire and have suitable fire-fighting apparatus ready for immediate use. Any such vessel shall also keep each gangway which is in use, whether such gangway has been supplied by the vessel or by the Panama Canal Company, properly illuminated when necessary, and properly secured at all times, moving or adjusting the same to allow for rise and fall of the tides and/or other changed circumstances. In addition, a safety net shall be properly rigged beneath each gangway.

§103.27 Clear view forward from the bridge and steering light requirement for certain vessels:

(a) A vessel may not be navigated in Canal Zone waters unless there is a clear, unobstructed view forward from the bridge.

§109.5 Ship's gear to be ready during transit; test:

Before beginning transit of the Canal, a vessel shall have hawsers, lines and fenders ready for passing through the locks, for warping, towing, or mooring as the case may be; and shall have both anchors ready for letting go. The Master shall assure himself, by actual test, of the readiness of the vessel's main engines, steering gear, engine room telegraphs, whistle, rudder-angle and engine-revolution indicators, and anchors. During the transit, at all times while a vessel is underway or moored against the lock walls, her deck winches, capstans, and other power equipment for handling lines, as well as her mooring bitts, chocks, cleats, hawse pipes, etc., shall be ready for handling the vessel, to the exclusion of all other work.

OIL POLLUTION: Every vessel subject to the Federal Maritime Commission's oil pollution financial responsibility requirements, must maintain on board and make available to Panama Canal Company boarding inspectors the original or copy of its certificate. Any vessel that does not have the necessary certificate on board will not be permitted to transit the Panama Canal.

If pollution occurs the Master's appearance in court may be required with possible heavy fine and attendant delays.

DOCUMENTS: All documents listed below shall be ready for immediate delivery to boarding inspector when he boards vessel upon each arrival of vessel in Canal Zone.

Documents required	*From ships which transit Canal but do not take on or discharge passengers or cargo at Canal Zone ports (number of sets)*	*From ships taking on or discharging passengers or cargo at Canal Zone ports (number of sets)*
(1) Ship's information and quarantine declaration (Panama Canal Form 4398)	1	1
(2) Clearance from last port	*1	*1
(3) All certificates of a sanitary nature	*1	*1
(4) Passenger list: Passengers transitting only (on Panama Canal Form 20)	**2	**2
(5) Passenger list: Passengers for discharge (on Panama Canal Form 18–9)	0	**4
(6) Crew list (on Panama Canal Form 1509–10)	2	2
(7) Store list	†1	†1
(8) Cargo declaration (Panama Canal Form 4363)	1	‡1
(9) Manifest of local cargo	0	4
(10) Panama Canal tonnage certificate	1	††1
(11) National register	1	1
(12) General arrangement, capacity, tank and engine room plans	‡1	††1
(13) Report of structural alterations and of changes in use of tanks or other spaces since last transit	1	††1
(14) Declaration by all vessels except ships of war of all arms and munitions of war aboard. Explosives are declared separately	**2	**2
(15) Declaration as to vessel's port(s) of departure, destination, and ports of call, within the last three months, with the corresponding actual or approximate dates	1	1

*For examination and possible retention.

**Not required unless such persons or cargo are carried.

†Required if ship during transit is laid up for repairs, regardless of whether passengers or cargo are taken on or discharged.

††Not required unless ship transits Canal.

‡For taking up and subsequent return through Agent or otherwise.

Documents required at ports. In case a vessel takes on or discharges passengers or cargo at only 1 Canal Zone port and does not transit Canal, documents indicated in column 2 are required. In case a ship docks or takes on or discharges passengers or cargo at both Cristobal and Balboa, or at a port other than port of entry, all documents in column 2 are required at first port and, in addition, 4 copies of document (9) required at second port.

Crew List. For purposes of additional identification of Crew members, all copies of crew list shall include for each seaman the serial number of his certificate of identification, continuous discharge book, passport or other satisfactory identifying documentation. In addition, the given name and middle initial, as well as family name, shall be shown for all seamen.

Passenger list. All copies of passenger lists shall be accurate and legible and shall be delivered to boarding inspector. The list shall show passengers in alphabetical order. Passengers who are to be discharged at Canal Zone ports shall be listed separately from other passengers aboard who are only to transit Canal. In event any passenger listed for discharge fails to disembark, or any passenger listed for transit disembarks, notice shall be given promptly by Master through his ship's Agent to Port Captain and a supplementary passenger list (same number of copies as is required for an original list of disembarking passengers) showing required information concerning such passengers shall be furnished promptly to Chief Customs Inspector prior to clearing Canal Zone waters.

(It is understood that "Advance Documents" are no longer required by Authorities. However, Agents request copies of Crew and Passenger Lists in advance, which should, if possible, be airmailed from last Port).

PILOTAGE: *§105.4 Pilotage changes:* Pilotage for vessels in transit through the Canal is free; but whenever any vessel, while in Canal waters, discharges or receives freight or passengers, or remains for the purpose of effecting repairs, or makes either terminal a port of call, it is liable for the applicable port pilotage charge established by the Canal authorities.

§105.5 Pilotage beyond Atlantic Breakwater

Should a vessel desire a Pilot to meet it outside the Atlantic breakwaters, such vessel shall remain there and make signal to that effect.

§105.6 Status and function of Pilot

The Pilot assigned to a vessel shall have control of the navigation and movement of such vessel.

§105.1 Pilots required

(a) Except as provided by §§105.2 and 105.3, no vessel shall pass through the Canal, enter or leave a terminal port or manoeuvre within the Canal Zone waters lying inside the Canal entrances without having a Panama Canal Pilot on board.

(b) Normally, a vessel will, unless advised to the contrary by the Port Captain, be boarded by the Panama Canal Pilot inside the breakwater at a point North of the Mole Beacon at the Atlantic entrance and in the Merchant Vessel Anchorage to seaward of Buoys 1 and 2 at the Pacific entrance.

(c) Normally a Pilot will relinquish control of the navigation and movement of a vessel proceeding seaward when the vessel passes the Mole Beacon, Atlantic entrance, or Buoys 1 and 2, Pacific entrance. A Pilot shall not, however, relinquish control at the Mole Beacon of a Northbound vessel which is to anchor in Limon Bay, but shall take the vessel to anchor.

Shelter for Pilots: Purpose of platform is to provide a shelter from sun and rain for Pilots working near bow of vessel and to provide adequate visibility around the locks to reduce danger of damage.

Platforms are required on:

(a) All vessels that are 100 ft. or more in extreme beam with bridge aft; and

(b) All vessels that are 95 ft. to 99.9 ft. extreme beam with bridge 600 ft. or more from the bow measured at the outside of the wheelhouse at the centreline.

Platform to be erected at position which is farthest forward at extreme beam and not more than 6 in. inboard from the vertical plane of shell plating. 1 on each side of the vessel. Awning made of suitable material. Deck of wood or other suitable material with non-skid surface.

Vessels equipped with previously approved design may continue to use platforms of that design until they require replacement.

Further inquiries on this subject should be directed to Port Captain Balboa/Cristobal.

The vessels mentioned above require 4 Pilots, 2 forward and 2 aft, when transitting the locks of the canal.

STEERING LIGHT: All vessels with the bridge more than 250 ft. from the stem must have a steering light at or near the stem. The light may be any colour except white, green or amber, must not be visible forward of the beam, and must be of such an intensity and so fixed as to be clearly visible from the navigation bridge.

ANCHORAGES: No vessel shall anchor within navigable waters of Canal Zone in other than a designated anchorage.

1. *Merchant Vessel Anchorages.* (a) *Atlantic entrance merchant vessel anchorage.* An area to the West of the Canal channel bounded as follows: Starting at a point "A", located in position 9° 21′ 25″ N., 79° 55′ 31″ W., and marked by gas buoy No. 2, thence 900 yd. 270° true to a point "B" located in position 9° 21′ 25″ N., 79° 55′ 58″ W., thence to lighted buoy "1", thence to lighted buoy "H", thence due North to a point "C" located in position 9° 22′ 07″ N., 79° 56′ 41″ W., thence 2,800 yd 59° true to a point "D" located in position 9° 22′ 50″ N., 79° 55′ 29″ W., and thence to the starting-point. The line extending due West from the Cristobal Mole through lighted beacon No. 1 and lighted buoy No. 2 (9° 21′ 25″ North) marks the Southern limit of the anchorage area. No vessel shall pass this line without having been passed by the boarding officer and without having a Canal Pilot on board.

(b) *Gatun Lake anchorage basin.* An area immediately East of the Canal channel line, bounded by a line extending to a point 450 yd., 120° true from the East wing-wall at the South end of Gatun Locks, thence 690 yd., 148° true to flashing white lighted buoy "A" thence 700 yards, 070° true to flashing white lighted buoy "1" thence 1,130 yards, 148° true to quick flashing white lighted buoy "3" thence 2,800 yards, 224° true through fixed white lighted buoy "5" and black can buoy "7" to the Canal channel line at flashing white lighted buoy "9"; the channel prism being the Westerly boundary line of the anchorage area.

(c) *Pacific entrance merchant vessel anchorage.* An area bounded as follows: beginning at a point in position 8° 51′ 50″ N., 79° 30′ 00″ W., marked by a lighted whistle buoy which is painted with alternating black and white vertical stripes and which shows short-long flashing white light every 8 seconds, i.e. light 0.4 seconds, eclipse 0.4 seconds, light 1.6 seconds, eclipse 5.6 seconds; thence due East to Long. 79° 28′ 00″ W.; thence due North to Lat. 8° 54′ 31″ N., thence due West toward Flamenco Island Light to a point 8° 54′ 31″ N., 79° 30′ 46″ W.; thence S.W. touching the N.W. corner of San Jose Rock to position 8° 53′ 27″ N., 79° 31′ 23″ W., marked by canal-entrance lighted buoy No. 2, thence S.E. to the point of beginning.

2. *Anchorage areas for ships loaded with hazardous cargoes.*
(a) *Atlantic end.* Area included in rectangle 1,000 yd. wide immediately South of West breakwater, starting at a point on West breakwater 1,000 yd. from West Breakwater Light and thence extending Westward 2,000 yd. along breakwater.
Cristobal: Grade "A" Explosives Anchorage (over 5 tons) and all LNG and LPG Tankers loaded or not Gas free.
Area bounded by:

Lat.	09° 24′ 40″ N.	Long.	79° 57′ 00″ W.
Lat.	09° 24′ 40″ N.	Long.	79° 56′ 29″ W.
Lat.	09° 23′ 53″ N.	Long.	79° 56′ 29″ W.
Lat.	09° 23′ 53″ N.	Long.	79° 57′ 00″ W.

(b) *Pacific end.* Area South of Naos Island bounded on the East by a line drawn South (True) from entrance gas buoy No. 1; on the South by a line drawn East (True) from Tortolita Island, and on the North and West by the curve of 30 ft. depth.

Vessels carrying explosive cargoes shall anchor in the explosive anchorage areas, on arrival at the Canal Zone, and there await instructions.

MAX. SIZE: N.B. The following paragraphs serve as an approximate guide to permitted size of vessel in transitting Canal, but Owners and Operators should always seek official clarification and ruling from: The Marine Director's Office, Panama Canal Company, Box 5012, Balboa, Canal Zone.

MARINE DIRECTOR'S NOTICE TO SHIPPING AGENTS No. 27-76
SUBJECT: Size and Draft Limitations of Vessels
REFERENCE: (a) Marine Director's Notice to Shipping Agents No. 1-75 dated January 17, 1975.
ENCLOSURES: (1) Bilge radius versus safe draft.
(2) Bilge information needed prior to initial transit.

1. Reference (a) is cancelled.

2. *Definitions.*
TFW: Tropical fresh water of Gatun Lake, density 0.9954 gms/cc at 85° F. (Transition to fresh water frequently alters the trim of large vessels 3 in. to 4 in. by the head.)
Published TFW maximum draft: Deepest point of immersion in Gatun Lake waters as promulgated by the Marine Director because of Gatun Lake level or by limitations deemed necessary because of restrictions in the Canal.
Maximum authorised transit draft: Deepest point of immersion in TFW of a particular vessel permitted at anytime, Gatun Lake level and Canal restrictions permitting.
Commercial Vessel: A self-propelled vessel other than a naval, military or other public vessel.
Integrated tug-barge combination: A barge that is specifically configured to receive a tugboat and with the tug, becomes, in effect, a single self-propelled unit.
Non-self-propelled vessel: A vessel which either does not have an installed means of propulsion, or has an installed means of propulsion which is not functioning during transit.
Barge: A flat-bottomed vessel of full body and heavy construction without installed means of propulsion.

3. *Maximum authorised transit draft* of vessels with draft in excess of 35 ft. 06 in.

Prior to the initial transit of a vessel whose transit draft will exceed 35 ft. 06 in., Owners, Operators, or Agents must supply in full the information required in enclosure (2) and request the maximum authorised transit draft for the vessel (deepest point of immersion TFW) from Port Captain, Balboa or Port Captain, Cristobal, depending on the arrival port, not later than 2 weeks prior to loading of the vessel. This request will be returned with the approved maximum authorised transit draft stamped thereon.

4. *Draft during initial transit.*
The initial transit is permitted at the maximum authorised transit draft. After the initial transit, unless the vessel's Agent or Owner is notified of any restrictions imposed by Canal authorities, this maximum authorised transit draft will remain in effect.

5. *Minimum transit drafts, measured in salt water.*
All vessels transiting the Canal should have sufficient ballast to permit safe handling during transit. The following are minimum salt water drafts for ships anticipating transit.

Length	*Minimum Drafts*
Up to 425 ft.	–Trimmed so Pilot can see the ranges over the forecastle from centre of navigation bridge
Over 425 ft.	– 8 ft. forward, 14 ft. aft, TSW
Over 475 ft.	– 18 ft. forward, 20 ft. aft, TSW
Over 525 ft.	– 20 ft. forward, 22 ft. aft, TSW
Over 580 ft.	– 22 ft. forward, 24 ft. aft, TSW
Over 625 ft.	– 24 ft. forward, 26 ft. aft, TSW

Drag must not adversely affect manoeuvrability.

6. *Maximum length.*
a. The maximum length overall including bulbous bow for a commercial vessel acceptable for regular transit is 900 ft., except passenger and container ships may be 950 ft. overall.
b. The maximum length for integrated tug-barge combination acceptable for regular transit is 900 ft. overall including tug. Tug-barge combination must transit together as one unit with the tug supplying the propelling power.
c. The maximum aggregate overall length for non-self-propelled vessels acceptable for transit is 850 ft. including accompanying tugs. Accompanying tugs must lock through with the non-self-propelled vessel.

7. *Maximum beam.*
a. The maximum extreme beam for a commercial vessel and the integrated tug-barge combination acceptable for regular transit is 106 ft.
b. Wider commercial vessels including integrated tug-barge combination up to an extreme beam of 107 ft. may be permitted to transit on a one-time delivery basis only with the deepest point of immersion not exceeding 37 ft. TFW.
c. The maximum extreme beam for non-self-propelled vessels (other than integrated tug-barge combinations) acceptable for transit is 100 ft.

8. *Previous Approvals and Delivery Transits.*
Vessels approved for regular transit prior to this Notice whose maximum beam or length slightly exceed the limits set forth in paragraphs 6 and 7 may continue to transit on a regular basis. After the date of this Notice approval will not be given for transit of other commercial vessels whose extreme beam exceeds 106 ft. by any amount except for vessels transiting on a one-time delivery basis.

9. *Release from liability.*
Masters of vessels will be required to execute a form undertaking to release the Panama Canal Company from liability in case of accident and to indemnify the Company for damages sustained in the following instances:
a. When a vessel transits at less than the minimum drafts in paragraph 5, has a list in excess of three degrees, or is so loaded or trimmed that manoeuvrability is adversely affected.
b. When a vessel transits on a one-time delivery basis with extreme beam exceeding 106 ft.

10. *Denial of transit.*
Vessels will be denied transit under the following circumstances:
a. When the vessel's maximum point of immersion exceeds its maximum authorised draft.
b. When the vessel's maximum point of immersion exceeds the published TFW maximum draft then in effect.
c. When the length overall including bulbous bow exceeds that stated in paragraph 6 above unless the vessel was approved for regular transit prior to this Notice.
d. When the extreme beam exceeds that stated in paragraph 7 above by any fractional amount however minor unless the vessel was approved for regular transit prior to the date of this Notice.
e. Unusual vessels requiring both lock lanes simultaneously.

11. *GENERAL.*
a. Vessels of 100 ft. beam and over whose list, trim or handling characteristics are such as to endanger themselves, Panama Canal appurtenances and/or a third party, may have such further limitations placed on them as Canal authorities deem necessary to insure reasonable safety.

b. The draft of non-self-propelled barges 550 ft. or more in length may be limited, when in the opinion of Canal authorities, such limit is necessary to insure reasonable safety.

c. Vessels may transit with deck cargo protruding over one side only not to exceed 15 ft., but the maximum beam, including protrusions must not exceed 85 ft.

d. Non-self-propelled vessels, other than integrated tug-barge combinations, will be accepted only on an individual basis; advance permission for initial transit as a non-self-propelled vessel is required. Displacement of these vessels is limited to 35,000 tons and the draft requirements of paragraph 5 are applicable. Riding crews must be provided in sufficient numbers, as required by the Port Captains, to safely handle towboat lines and boarding ladders, and to assist in mooring.

e. The numerous constraints affecting the transit schedules of vessels and tows make it important that information provided in advance of the initial transit of the vessel include a capacity plan, general arrangement plans, engine room plans, and whenever possible, a photostatic copy of national register, load line certificate and Panama Canal tonnage certificate. This advance information will minimise the time spent aboard the vessel by Panama Canal officials before commencement of the initial transit.

Enclosure 1.

TABLE OF LIMITING DRAFTS DUE TO BILGE RADIUS CONTACTING CHAMBER BATTERS

(Allows for 6 in. thick rubber fenders on lock walls at batter locations).

Radius of Turn of Bilge (feet)

in.	1 ft.	2 ft.	3 ft.	4 ft.	5 ft.
0	35 ft. 08 in.	36 ft. 06 in.	37 ft. 04 in.	38 ft. 02 in.	39 ft. 00 in.
1	35 ft. 09 in.	35 ft. 07 in.	37 ft. 05 in.	38 ft. 03 in.	39 ft. 01 in.
2	35 ft. 10 in.	36 ft. 08 in.	37 ft. 06 in.	38 ft. 04 in.	39 ft. 02 in.
3	35 ft. 10 in.	36 ft. 08 in.	37 ft. 06 in.	38 ft. 05 in.	39 ft. 03 in.
4	35 ft. 11 in.	36 ft. 09 in.	37 ft. 07 in.	38 ft. 05 in.	39 ft. 03 in.
5	36 ft. 00 in.	36 ft. 10 in.	37 ft. 08 in.	38 ft. 06 in.	39 ft. 04 in.
6	36 ft. 01 in.	36 ft. 11 in.	37 ft. 09 in.	38 ft. 07 in.	39 ft. 05 in.
7	36 ft. 02 in.	37 ft. 00 in.	37 ft. 10 in.	38 ft. 08 in.	39 ft. 06 in.
8	36 ft. 03 in.	37 ft. 01 in.	37 ft. 11 in.	38 ft. 10 in.	
9	36 ft. 03 in.	37 ft. 01 in.	38 ft. 00 in.	38 ft. 10 in.	
10	36 ft. 04 in.	37 ft. 02 in.	38 ft. 00 in.	38 ft. 10 in.	
11	36 ft. 05 in.	37 ft. 03 in.	38 ft. 01 in.	38 ft. 11 in.	

Example: To find draft of ship having a radius-of-turn-of-bilge of 4 ft. 4 in. read across top of table to column headed 4 ft. thence down column opposite 4 in. – read 38 ft. 5 in.

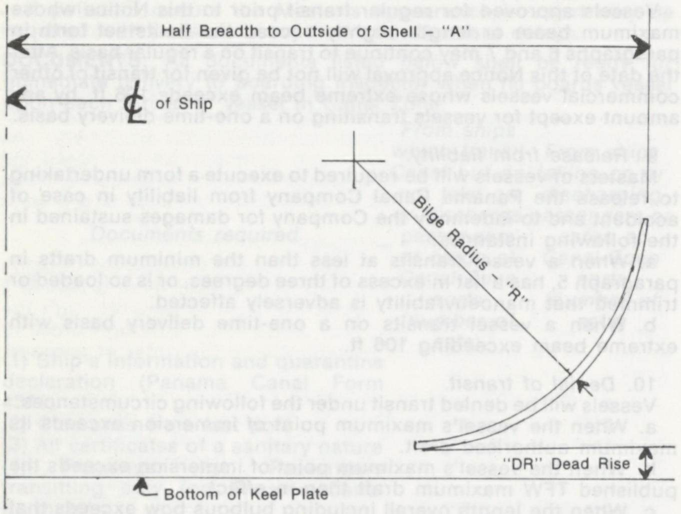
Note: Dead Rise not included in above tabulations and must be added to above readings.

Enclosure 2.

INFORMATION NEEDED PRIOR TO INITIAL TRANSIT THROUGH THE PANAMA CANAL

Bilge Information

Name of vessel .... Date ....
Authorised Tropical Fresh Water Load Line ....
Admeasurer .... Certified as Correct ....
Master – Owners – Agents
1) "A" – Half breadth of vessel to outside of shell ....
2) "R" – Radius of turn of bilge (ft. & in.) ....
3) "DR" – Dead rise at side of vessel (in.) ....



Notes:

1. The Panama Canal Company is not responsible for damage to bilge keels resulting from transit through the locks.

2. On an off centre lockage with the vessel touching the lock wall, the turn of the bilge will clear the lock-wall batters at the most critical point as shown in Enclosure (1).

HEALTH: Application for radio pratique is available to all vessels arriving in Canal Zone waters. Radio pratique is a quarantine clearance by radio, based upon information from the vessel prior to its arrival at Balboa or Cristobal and past experience with the vessel and its personnel. A limited number of vessels will be sampled for compliance with the required standards of health and sanitation on board. The sampling will generally be done on a random basis and will provide a measure of the success of the programme.

It should be emphasised that radio pratique applies only to the quarantine section of the required forms and documents for the Panama Canal. All vessels must still complete the required boarding forms, and in most cases, be prepared to receive the Panama Canal Boarding Inspector on arrival in Canal waters. Such forms as crew and passenger lists, ship's information forms, and the cargo declaration must always be completed for presentation to the Panama Canal officials.

Attached is a listing of the items to be reported prior to arrival in the Canal Zone. The information is similar to that now required of vessels requesting radio pratique in U.S. ports. In addition, there are some special circumstances in the Canal Zone that make additional information necessary.

The manner of reporting the information required should be clear and orderly as specified in 35 CFR, section 123.4, listing information required in advance. The request for radio pratique should originate from the Master and can be submitted directly by radio or through the vessel's local Agent. The local Agent should submit his request with all the required information to the Quarantine Office at the port of arrival of the vessel. The local Agent will be notified when radio pratique is granted or refused and the Agent will communicate this information to the ship.

It is hoped that vessels will take advantage of radio pratique when arriving for transit or docking at the Canal Zone ports of Balboa and Cristobal, and that in as many instances as possible it may be able to grant this time saving privilege.

Radio Pratique Programme

1. *General*

(a) The granting of radio pratique is a Health Bureau responsibility designated to the Division of Public Health. (35 CFR 61.264) which see below.

§61.264 Radio Pratique; vessels only.

The quarantine officer in charge may grant pratique by radio to a vessel upon the basis of information regarding the vessel, its cargo and persons aboard, received prior to arrival of the vessel, when in his judgement, and in accordance with instructions by the Chief, Division of Preventive Medicine and Quarantine, the entry of the vessel will not result in the introduction, transmission or spread of communicable diseases.

(b) In order to process the details of this programme more expeditiously, communication may be held between the quarantine offices and the ship's Canal Zone Steamship Agent representing the vessel hereinafter called local Agent.

(c) All vessels coming to the Panama Canal may request radio pratique by means of the ETA radio message or through the ship's local Agent.

(d) Requests for radio pratique may be submitted to the quarantine office at the port of arrival at least 24 hours and not more than 48 hours before vessel is scheduled to arrive.

2. *Specific Requirement for Each Voyage*

(a) The vessel will be maintained free from rats and vermin.

(b) The Derating Certificate or Derating Exemption Certificate must be valid (i.e. date of issue not more than 180 days prior to date of arrival at the Panama Canal).

(c) Vessels arriving within 15 days from the ports designated in the Aedes Aegypti Indices Bulletins must be disinfected with the aerosol described in the Aedes Aegypti Indices Bulletin No. 8, 1970.

(d) The restrictions imposed in 61.281 through 61.302, "Importation of Certain Things", Title 35 CFR, must be strictly adhered to and followed.

3. *Action taken by the Quarantine Offficer in Charge**

(a) Radio pratique *may* be granted by the quarantine office upon request from the vessel or through the ship's local Agent representing the vessel provided it is documented by ship's radio.

(1) If the information requested in the Appendix hereto is complete; *and,*

(2) If the Quarantine Officer in charge* is of the opinion that the vessel is reasonably free from any condition either from a health or sanitation standpoint that might introduce illness into the Canal Zone.

(b) Radio pratique may be denied by the Quarantine Officer in charge:

(1) If the requested information is incomplete; or,

(2) If the Quarantine Officer in charge* feels that medical or sanitary reasons prevail requiring careful inspection upon arrival of the vessel.

*Or designated representative.

4. *For Sampling and Surveillance of Compliance Purposes*

After the information supplied by the Shipmaster has been reviewed the Quarantine Officer in charge* will advise the ship's local Agent concerned whether radio pratique has been granted or denied and if any restrictions or limitations have been imposed. He will also inform the Marine Traffic Controller, and the Immigration and Customs office whether radio pratique has been granted or denied.

*Or designated representative.

5. *Action taken by Ship's Local Agent*

(a) The ship's local Agent may submit requests for radio pratique to the quarantine office if the vessel has not done so by radio. The information required is listed in the Appendix hereto. Such requests should be submitted, properly documented by ship's radio, not later than 24 hours before the vessel is scheduled to arrive nor earlier than 48 hours before the expected arrival of the vessel.

(b) The ship's local Agent will advise the vessel which he represents whether radio pratique has been granted or denied; and any restrictions or limitation imposed.

6. *Action taken by Panama Canal Company Boarding Inspectors*

On vessels that have been granted radio pratique, the Panama Canal Company Boarding Inspector will:

(a) Ascertain that the Ship's Master has completed the Ship's Information and Quarantine Declaration (Form 4398) *except* the "quarantine data" portion at the bottom of the form; and,

(b) Otherwise process the vessel (e.g. for Immigration, Customs, Admeasurement, and any other non-quarantine requirements) without any further questioning on quarantine matters. This processing may be either in the bay or at the dockside at the discretion of the Admeasurer Watch Supervisor. By agreement with the Chief Immigration Service, passengers that are disembarking from vessels may be processed by the Immigration Service at the docks.

(c) Vessels that are denied radio pratique or have failed to request radio pratique, will be cleared through Quarantine by the Panama Canal Company Boarding Inspector in the prescribed routine manner.

7. *Action taken by Shipmasters*

(a) Shipmasters should request radio pratique directly by radio or

through the Agent representing them in the Panama Canal Zone and supply the information requested in the Appendix hereto.

(b) Shipmasters should take cognizance of the requirements listed in paragraph 2, "Specific requirement for each voyage", above.

(1) If granted radio pratique, they may enter the anchorage area or a Canal Zone port flying the quarantine flag; they must however comply with any restrictions or limitations imposed by the Quarantine Officer in Charge.

(2) Unless the boarding of docking vessels is scheduled to take place at the pier, vessels *must* await boarding by a representative of the Panama Canal authority.

(3) If denied radio pratique, vessels must be cleared for Quarantine in the prescribed routine manner; that is enter the Canal Zone waters or a Canal Zone port flying the Quarantine Flag and must await processing by the Panama Canal Company Boarding Inspector.

(4) It is important that the Shipmasters remember that in all instances all forms regularly required are to be completed prior to arrival for presentation to the Boarding Inspector.

Appendix

Information required by Quarantine Officer in Charge from Shipmaster requesting radio pratique through ship Agency representing him at the Panama Canal.

Full name of vessel.
Country of registry.
International radio call letters.
Estimated date of arrival and port.
Whether docking at Balboa or Cristobal and reason therefor.
List of ports of call within past 15 days prior arrival.
Report any illness or communicable diseases on board.
Report any death occurring on board since departure from last port and cause, if known or suspected.
Report the number of smallpox vaccinations required.
Report the number of passengers to be disembarked and port of disembarking (e.g. Cristobal or Balboa).
Report the date of the Derating Certificate or Derating Exemption Certificate.
Record the number, kind, and origin of all animals aboard and if any are scheduled for disembarking.
Report the origin or source of the meat in the ship's stores.

Only vessels in the following categories need still be subject to "on board" public health clearance upon arrival at Canal Zone ports:

A. Vessels which, during the 15 days prior to arrival in the Canal Zone ports, have or have had on board passenger or crews with any of the following conditions or symptoms of illness:

1. Temperature of 100° F (38° C) or greater *(a)* which persisted for 2 days or more: or *(b)* which was accompanied or followed by any one or all of the following: rash, jaundice, glandular swelling; *or*
2. *Prolonged diarrhoea* (lasting 1 full day or more).

B. Occurrence of death on board for any reason.

C. Vessels which have been in a country infected with smallpox during the 15 days prior to arrival in the Canal Zone.

D. Vessels which have been in a country infected with plague in the 60 days prior to arrival in the Canal Zone.

RADIO: Balboa Naval Radio NBA.

1. *Signal Stations.* (a) Visual-signal stations established for communication on arrival Canal approaches by International Code and/or flashing light, at seaward end of Pier 6 Cristobal, and on Flamenco Island at Pacific entrance.

(b) Flamenco Island and Cristobal Signal Station also contactable on VHF Channel 12 frequency 156.6 Mc/s., and R/T 2182, 2638 and 2846 kc/s. – call letters WHC.

(c) Vessels of 85 ft. beam and above awaiting transit at Balboa anchorage should keep VHF radio watch on Channel 12 for transit orders.

(d) Arriving ships may communicate with Port Captain's Office, Cristobal through Cristobal Signal Station Radio communication is maintained on international maritime VHF Channel 12 (156.6 Mc/s.) through "Cristobal Radio".

2. *Advance information required by radio from vessels approaching Canal.* Vessels approaching Canal should communicate by radio to the Port Captain, through Balboa Radio Station, call letters NBA, at least 48 hours in advance of arrival in Canal Zone, the information required below. If radio communication can be established earlier than 48 hours in advance of arrival, required information should be furnished at time such communication is first practicable.

(a) All items of information listed below, unless previously communicated through Agents or otherwise to Canal authorities, shall be transmitted to Port Captain using phonetic alphabet letters to identify items, as follows:

ALFA – The Panama Canal Identification Number of the vessel.

BRAVO – Estimated date and time of arrival, port of arrival and request for Canal transit if desired.

CHARLIE – Estimated draft upon arrival, in feet and inches (fore and aft).

DELTA – Any changes in the vessel's name, country of registry, structure, or use of tanks that have occurred since the vessel last called in Canal Zone waters.

ECHO – Will the vessel dock at Balboa or Cristobal? What is the reason for docking? If it is for cargo operations, fuel or water, give the tonnage involved in each case. Is there any other reason the vessel will not be ready to transit upon arrival? What is the reason?

FOXTROT – The nature and tonnage of any deck cargo.

GOLF – If the vessel is a tanker, state names and grades of cargo carried. State names and grades of the cargo last carried in each empty tank which is not gas free.

HOTEL – If the vessel is carrying explosives as cargo, state the grade of each explosive and the amount, in tons of each grade.

INDIA – Quarantine and immigration information:

(1) Is radio pratique desired?

(2) State the ports at which the vessel has called within 15 days preceding its arrival at the Canal Zone.

(3) State all cases of communicable disease aboard and the nature of the disease or diseases, if known.

(4) The number of deaths which have occurred since departure from the last port and the cause of each death, if known.

(5) The number of smallpox vaccinations required.

(6) The number of passengers disembarking and their port of disembarkation.

(7) The number of ports of origin of any stowaway and a brief description of the identity papers of each stowaway.

(8) The number, kind and country of origin of any animals aboard. Are any animals to be landed?

(9) The country of origin of all meat, whether carried as cargo or as ship's stores.

(10) Has the vessel called at a port in any country, infected with foot-and-mouth disease or rinderpest during its present voyage? Countries considered to be infected are:

(a) All countries East of the 30th Meridian West longitude and West of the International Date Line except Australia, Channel Islands, Fiji, Greenland, Iceland, Japan, New Zealand, Northern Ireland, Norway, Republic of Ireland.
(b) All countries of South America;
(c) Curacao (the Leeward Islands of the Netherlands Antilles);
(d) Cuba;
(e) Martinique;
(f) Guadaloupe.

(11) Specify whether the vessel has a valid Derating Certificate or a Derating Exemption Certificate issued 180 days prior to arrival.

The following additional information shall be transmitted via radio to the Port Captain from all vessels as applicable:

(1) Vessels approaching from the Pacific shall report actual time of passing Cape Mala, or the latitude of Cape Mala, and the vessel's speed.

(2) Vessels approaching from the Atlantic shall report 12 hours prior to arrival at Cristobal any change of 1 hour or more in the expected time of arrival.

(3) Any other matters of importance and interest.

Timely receipt of the above information will facilitate the transit or docking of arriving vessels. Failure to comply with these reporting requirements may subject a vessel to delay since vessels which do comply will receive priority of service and handling over those which do not.

DENSITY: On several occasions vessels arriving for transit have been found to be over authorised draft after entering Gatun Lake. Overdrafts in these instances have been caused, it is believed, by assuming fresh water densities different from what actually exists in Canal.

Using distilled water as 1.000 at 3.98°C, water densities have been determined to be as follows:

	Density	
Location	*Gm./cc. 85°F*	*Lbs./ft³ 85°F*
(a) Gatun Lake*	0.9954	62.21
(b) Miraflores Lake†	0.9971	62.32
(c) Balboa Anchorage‡	1.0219	63.87
(d) Cristobal‡	1.0212	63.76

*Fresh water.
†Brackish water.
‡Salt water.

BOILER WATER: May be taken without charge from Gatun Lake subject Pilot's permission and draft.

FRESH WATER: Available Balboa or Cristobal cost about 48 cents per 100 cu. ft.

CERTIFICATES: See "Documents". *(a)* If a valid Derating Certificate or Derating Exemption Certificate is not produced with respect to any arriving vessel the quarantine officer shall:

(1) If he is satisfied that vessel is free of rodents or is kept in such a condition that number of rodents on board is negligible, issue a Derating Exemption Certificate; or

(2) If he is satisfied that a Derating Exemption Certificate should not be issued with respect to such vessel, require derating of vessel.

(b) When, pursuant to paragraph *(a)* (2) of this section, derating has been completed to satisfaction of quarantine officer, he shall issue a Derating Certificate.

CUSTOMS: *Hours:* The regular hours for the Customs inspection of baggage of landing passengers and for the Customs supervision of landing passengers are from 0700 to 1700 hrs. daily, excluding Sundays, and holidays. Such Customs services may be furnished during other hours, or on Sundays and holidays, only upon the request of the Master or authorised Agent.

2. *Marine Protests.* Marine notes of protest may be made and extended by Masters of American vessels before Customs officers without charge.

3. *Allowances.* Tobacco, Wine and/or Spirits at Master's discretion sufficient for immediate consumption. Alcohol not permitted to be taken ashore.

CONSULS:

Great Britain: British Consulate, Colon Office 38-7-7060;

Norway: Royal Norwegian Consulate General: Consul General for Panama, R. P., Terence O. Ford, Office: 28-25-2347. Residence: 28-24-1884.

Norwegian Consul, Cristobal, G. R. Morland, Fenton Bldg. 3-2819.

Norwegian Consul for Pacific Side, Canal Zone, Arne Hauge, Office 2-1965.

Republic of South Africa: Consul for the Republic of South Africa, Henry I. Darlington, Office: 28-23-0834. Residence: 28-23-6779.

Sweden: Royal Swedish Consulate General, Edificio Melinda, Via Argentina, Panama 28-23-9694.

Denmark: Royal Danish Consulate General, Consul General for Panama and Canal Zone, W. Ishoy, Office: 28-25-0524. Residence: 28-24-1537.

Royal Danish Consulate for Colon and Canal Zone, George R. Downing, Office: 38-7-1870. Residence: 3-2361.

Finland: Finnish Vice-Consul, Cristobal/Colon, Donald Francey, Fenton Bldg. 3-1781.

REPATRIATION: Crew members, of vessels other than vessels of United States registry or enrolment signed on before a shipping commissioner, may be discharged in Canal Zone only with consent of the Immigration Service. Before such consent may be given, the Chief Immigration Inspector at port concerned shall be furnished a memorandum in triplicate showing name, age, nationality, and rating of the crew members proposed to be discharge.

When crew members are signed on a vessel, other than crew members signed on a vessel of United States registry or enrolment by a shipping commissioner in the Canal Zone, a memorandum in triplicate showing name, age, nationality, and rating of crew members signed on shall be furnished to Chief Immigration Inspector at the port concerned.

Arriving crew members and particularly visiting Superintendents should if possible possess Panamanian visas.

AIRPORT: Tocumen International Airport located outside Panama City, 18 miles from Balboa; 48 miles from Cristobal, served by all major scheduled international airlines operating in Southern hemisphere.

HOLIDAYS: Sunday, January 1; February 22, Good Friday; May 30; July 4; First Monday in September; November 3; November 11; Thanksgiving Day; December 25; and such other days as may, pursuant to law, be declared to be holidays.

TIME: EST. No alterations to clocks necessary throughout the year.

LOCKS: Gatun Locks (Atlantic side) raise and lower vessels 85 ft., Miraflores (nearest to Pacific) 54 ft. and Pedro Miguel (Pacific side) 31 ft.

AUTHORITY: Marine Director, Panama Canal Company.

AGENT: See "Cristobal".

PUERTO ARMUELLES (Chiriqui): 08.17 N. 82.52 W. (See Plan Book)

LOCATION: Puerto Armuelles is located on the Pacific coast of the Republic of Panama.

Puerto Armuelles is a port solely used for the export of bananas, is operated by United Brands Co., and administered by the National Port Authority of Panama.

DOCUMENTS: Same documents and the same procedure as Almirante.

PILOTAGE: United Brands Company has a Pilot who is available 24 hours of the day. Pilotage consists in mooring the vessel at the quay from the anchorage, for which the vessel must position a ladder on the port side. The pilot launch is white and has no VHF radio. The mooring operation is fairly complicated and United Brands provide a gang of men who board the vessel and manipulate the cables used in the mooring process. Mooring at the quay is always done on the starboard side of the vessel and the bow must be pointing out to sea.

The Pilot must be contacted by the ship's Agent and requested by the vessel by VHF radio on Channel 12 to the Port Authority or Channel 16 to United Brands Co.

ANCHORAGE: Vessels may anchor half a mile from the pier, where there are depths of 120 ft. However, due to the great depth of water in front of the quay, care must be taken in letting out the anchor, it being necessary to find places where the water is not so deep.

It is recommended that for Captains of vessels arriving for the first time in the port ask for the Pilot when anchoring.

There is no type of aid to navigation indicating the best place to anchor.

RESTRICTIONS: Puerto Armuelles is located in the Bay of Charco Azul, where there are great depths making it unnecessary to have aids to navigation. Access to the port is free of sandbanks or any other obstruction to navigation. There are therefore no restrictions for vessels wishing to enter the port, except on the quay itself.

HEALTH: The vessel is boarded by the doctor in the operation of clearance. In the event of illness on board, the Port Authority must be advised on VHF Channel 12 and the vessel must wait at the anchorage for the doctor's visit.

RADIO: A radio service exists via telegraphic cables operated by Tropical Radio Telegraph Co. The Port Authority has VHF/FM equipment which receives calls on Channel 12. United Brands Co. also has VHF and receives calls on Channel 16. The range of these stations is 50 nautical miles. The Port Authority also has SSB equipment which takes calls on frequency 7447.5 KHz.

TUGS: None available.

BERTHING: The quay consists of a pier with a single berth 137 m. long and 40 ft. minimum depth. Vessels must moor on the starboard side.

The quay has 4 banana loaders with a loading capacity of 42 boxes of bananas per minute, each weighing 42 pounds. There is no other type of loading equipment.

Since the quay is located in a position open to the sea a set of 3 mooring buoys is used to keep vessels away from the N.E. side of the pier.

STEVEDORES: Loading and discharging work is carried out by the Union of Port Workers. The vessel's Agent must contract the services of the workers via United Brands Co.

FRESH WATER: Supplied at the rate of 2 t.p.h.

FUEL: Diesel fuel can be supplied by pipe-line from the pier.

REPAIRS: No facilities available.

PROVISIONS: Can be obtained locally or in the town of David 100 kms. away.

TIME: GMT less five hours.

CONSULS: Costa Rica, Nicaragua, Colombia.

MEDICAL: There is a modern hospital in Armuelles.

POLICE/AMBULANCE/FIRE: Available in Armuelles.

CUSTOMS ALLOWANCES: See "Almirante".

TELEPHONE: Micro-wave connects Armuelles with any country in America or Europe. No facilities for telephones on board vessels.

OPENING/CLOSING HATCHES: Carried out by port workers.

DENSITY: 1.0219 gm/c.c. at 85°F.

SHORE LEAVE: No restrictions.

REPATRIATION: Can be effected without difficulty.

AIRPORT: Armuelles has a small airstrip for light aircraft. However, the town of David 100 kms. away by road from Armuelles has a larger airport. There are 2 daily flights by local commercial lines between David and the airport of Tocumen in Panama; thus repatriation can be effected without difficulties.

AUTHORITY: National Port Authority.

VACAMONTE: 08.52 N. 79.40 W. (See Plan Book)

LOCATION: The fishing port of Vacamonte (under construction) is located 27 km. S.W. of Panama City, in Arraijan District, Province of Panama. The port has been programmed to begin its operations on April 1st, 1979.

FACILITIES: The following facilities will be available:

Shrimp fleet: 2 jetties that will permit 8 vessels to unload shrimp simultaneously and/or servicing. 2 service jetties for water and fuel facilities and to carry out minor repairs, with a capacity of 48 vessels. 1 synchrolift with a capacity of 250 tons and 1 ship repair yard for 20 vessels.

Fresh Fish Market: Will have 1 marginal jetty with a capacity to berth 8 vessels simultaneously to unload fish and for servicing.

The Vacamonte fishing port has access to Panama City and to the interior of the country by the Inter-American Highway. In addition to this, at present a modern expressway is being constructed to connect Panama City with the port and with the City of Chorrera.

Vacamonte will be considered within a few years, as the most complete port for the operations of the International Tuna Fleets.

Initially the port will have a cold storage room with a capacity for 3,000 tons. Its "T" shape jetty will permit the unloading of 4 tuna vessels or more with drafts of 7.0 m., if they moor at berth bow to stern.

Fuel and fresh water will be available.

Ship chandlers will be available from Panama City, 30 minutes away by road.

Vacamonte is located 20 kms. Southwest of Balboa. Panama City is served by a modern airport with connections all over the world.

Papua New Guinea

GENERAL:

APPLICABLE TO ALL PORTS IN PAPUA NEW GUINEA
(See also details under individual ports) **(See Plan Book)**

DOCUMENTS: International conditions i.e. at the first port of call in Papua New Guinea the following inward Customs documents are required to be handed to Customs Department within 24 hours of ship's arrival.

- 3 Copies Inward Passenger List.
- 7 Copies Inwards Customs Manifest.
- 3 Copies List of Crew.
- 3 Copies Articles in private possession of officers and crew Form 5.
- 3 Copies Stores List.
- 2 Copies Immigration Restriction Ordinance List (Form 6) being complete list of passengers disembarking and in transit.

If other than first port of call:

- 3 Copies Inward Passenger List.
- 7 Copies Inwards Customs Manifest.

Outward Customs Clearance from last port of call.

RESTRICTIONS: Night berthing is not recommended, but is possible at the discretion of the Port Authority.

HEALTH:
(a) Vessels Arriving Directly from Australia. Pratique is given by radio to vessels which voyage directly from Australia to a Papua New Guinea port, Master of vessel notifies Quarantine Officer at the port of entry to which he is proceeding of ETA, the number of passengers and crew and whether there is any sickness aboard. This notification from Master is sent not longer than 24 hours and not less than 12 hours of ETA. If there is no sickness aboard a reply is sent stating that pratique is granted, and when a vessel arrives the actual pratique form is delivered to Master of vessel or to Collector of Customs to hand to Master. Full pratique is given.

(b) Vessels Arriving from a Foreign Port. All vessels which arrive from a foreign port must anchor in the designated position and await arrival of a Quarantine Officer who boards the vessel by himself – no other person (except a Pilot) is to be allowed on board vessel until pratique has been granted. If a Pilot is on board he must remain on board until pratique is granted.

Smallpox: All passengers and crew are required to be in possession of a valid International Certificate of Vaccination against smallpox on arrival in the country.

Cholera: All passengers and crew are required to be inoculated against cholera if the vessel is expected to arrive at a port in the country within 7 days of leaving an area where cholera is either endemic or is present.

Note: The presence on board of a qualified doctor will normally assist in the granting of pratique.

RADIO: 2 radio stations are available.
(a) Port Moresby Radio – Call sign P2M operating between the hours of 2100 – 1000 hrs. GMT.
(b) Rabaul Radio – Call sign P2R operating 24 hours per day.
These stations are generally used for all contact with agents or Government Departments, etc.

VHF: VHF services are available in three (3) ports only.
(a) Port Moresby on Channel 16 – Call sign "Fairfax Harbour" for the Pilot and "Moresby Harbour Control" for the Port Office.
(b) Lae on Channel 16 – Call sign "Lae Harbour Control".
(c) Anewa Bay on Channels 6, 12 and 15 – Call sign "Anewa Bay Pilots".
Normal working hours are 0745 till 1606 hrs. local time, except for Anewa Bay where hours are 0700 till 2300 hrs. local time

RADAR: No port radar services exist in Papua New Guinea.

TUGS: Berthing. Tugs are available in Port Moresby and Anewa Bay. A small tug is also available in Lae but is low powered.

CRANES: There are no wharf mounted cranes in Papua New Guinea, however, mobile cranes are available in most main ports capable of lifting up to 20 tonne containers. Shippers are advised though to check this before shipping and with heavier loads prior advice and approval must be sought from the relevant Port Authority.

BULK CARGO FACILITIES: Except for Anewa Bay (copper concentrate) and the Jant Wharf at Madang (Woodchip), no bulk cargo facilities exist in Papua New Guinea. (Details of the above are given in the appropriate port summaries).

CONSULS: The following Consulate and Commission services are available.

American Consulate General, P.O. Box 3492, Port Moresby.	Phone 242726
Australian Consulate General, P.O. Box 1180, Lae.	Phone 423000
Australian High Commission, P.O. Box 9129, Hohola.	Phone 259333
British High Commission, P.O. Box 739, Port Moresby.	Phone 243331
Commonwealth Secretariat, P.O. Box 914, Port Moresby.	Phone 243825
Fiji Honorary Consulate, P.O. Box 6144, Boroko.	Phone 254185
German Honorary Consulate, P.O. Box 1549, Boroko.	Phone 256311
Indonesian Embassy, P.O. Box 7165, Boroko.	Phone 253116
Italian Consulate, P.O. Box 276, Lae.	Phone 422593
Embassy of Japan, P.O. Box 3040, Port Moresby.	Phone 242855
Netherlands Honorary Consulate, P.O. Box 1626, Boroko.	Phone 255149
New Zealand Commission, P.O. Box 1144, Boroko.	Phone 242031
Phillipines Consulate, P.O. Box 172, Port Moresby.	Phone 242703
Sweden Honorary Consulate, P.O. Box 1228, Boroko.	Phone 255411

MEDICAL: Medical attention is available in most Papua New Guinea Ports, however as much advance notice as possible should be given by contacting the nearest radio station.

DRY DOCK: No dry dock or major repair facilities exist in Papua New Guinea.

GANGWAY WATCHMEN: Not usually necessary.

HATCHES: Opening/closing usually carried out by crew.

CUSTOMS ALLOWANCES: Entry regulations permit 200 cigarettes or 1lb of tobacco, and 40 oz of wines or spirits.
Crew members may hold 200 cigarettes and 1 carton of beer (or 1 bottle of spirits) out of bond per week.

CARGO GEAR: Wharf equipment supplied by stevedores, load/discharge by ship's gear.

REPATRIATION: Possible, but not recommended.

TIME: Local time in all port is 10 hours ahead of GMT.

HOLIDAYS: The only days on which cargo cannot officially be worked are Good Friday and Christmas Day.

TELEPHONES: Not available at present for ship to shore connection.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Generally a seamans book is held at the main entrance to the port. Individual passes are not normally required for crew.

BERTH RESERVATIONS: A berth reservation system applies for all overseas vessels at all Papua New Guinea Harbours Board ports.
At Anewa Bay cargo vessels must vacate berth for concentrate carriers.

AITAPE: 03.08 S. 142.21 E. (See Plan Book)

(See General section on Papua New Guinea ports).

PILOTAGE: Not available.

TUGS: Not available.

RADIO: Communications not available.

BERTHING: Position of wharf 03° 08.51′ S., 142° 21.24′ E. Length of berthing head 18.3 m. (60 ft.). Width 6.2 m. (20.3 ft.). Height of deck above L.A.T. 2.5 m. (8.3 ft.). Minimum depth of water at L.A.T. at wharf head 4.3 m. (14 ft.) – subject to seasonal change. Maximum tidal range 1.4 m. (4.6 ft.)

STEVEDORES: *Working hours:* 0700 – 1200 hrs., 1300 – 1800 hrs.

FRESH WATER: Not available to ships.

FUEL: Not available.

CUSTOMS ALLOWANCE: 200 cigarettes or 250 grams tobacco. 1 litre of spirits or 1 litre of wine or 6 beers (total 4.5 litres) for each 7 days. Aitape is not a port of entry.

AUTHORITY: Port Manager.

ALOTAU: 10.19 S. 150.27 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMIT: Seaward Boundary: From a position in 10° 20′ S. 150° 26′ E. bounded on the West by a straight line due North to the coastline. From the same point bounded on the South by a straight line due East to a position in 10° 20′ S. 150° 28′ E. thence bounded on the East by a straight line due North to the coastline.

PILOTAGE: Pilotage is not compulsory. There are no pilots stationed at Alotau but a pilot will attend from Port Moresby given 48 hours notice of the ship's estimated time of arrival.
Pilot boarding ground: With the light structure on the extreme West point of Sanderson Bay bearing 030° (T) distant 1,000 m.
ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Port Moresby Radio (P2M).

ANCHORAGE: There are no recommended anchorage areas for large vessels in the vicinity of Alotau.

TUGS: Not available.

BERTHING: Overseas wharf is 93 m. long, height of deck above L.A.T. 2.4 m., minimum depth of water at face at L.A.T. 10.0 m. Tidal range 1.1 m. (3.5 ft.).
Vessels may berth either port or starboard side to at the discretion of the Port Authority.
Load/discharge is by ship's own gear (except under special arrangement).
Coastal Wharf: Length 55.8 m. (183 ft.). Minimum depth of water 4.9 m. (16 ft.).

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.

TANKERS: Discharge facilities are not available.
FUEL: Road tanker available from Caltex.
FRESH WATER: Available in limited quantities and restricted periods of the year. Prior application to be made to the Port Manager.
REPAIRS: No facilities available.
AIRPORT: Gurney Airport approximately 20 km. from Alotau is served regularly but not daily.
POLICE/AMBULANCE/FIRE: Police: Alotau 555. Hospital: (No separate Ambulance) Alotau 525. Fire: Service shortly to be in operation.
DELAYS: Delays at Alotau are most unlikely.
DEVELOPMENTS: Alotau is a new port and no further developments are likely in the foreseeable future, except a coastal barge ramp.
GENERAL: Covered Storage Area for Overseas Cargo – 1,874 sq.m. Open Storage Area – 7,640 sq.m.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Alotau.

ANEWA BAY: 06.11 S. 155.32 E.

(See General Section on Papua New Guinea Ports)

PORT LIMIT: Seaward Boundary: A line joining the Southern end of Takenupei Island and Karikiberia Shoal.
PILOTAGE: Compulsory. The pilot boarding ground is North of a line joining Takenupei Island and Karikiberia Shoal.
ANCHORAGE: Anchorages are available at Port Authorities advice.
VHF: Anewa Bay Pilots Channel 6, 12 and 16.
TUGS: Available.
BERTHING: Wharf is 77 m. long with mooring dolphins 59 m. Eastward and 59 m. Westward. The maximum draft permitted alongside is 12 m. and a d.w.t. of 40,000 tonnes.

Vessels may berth either port or starboard side to although normally the latter. Load/discharge is by ship's own gear (except under special arrangement).

STEVEDORES: The Port Authority operate their own stevedoring functions.

Working Hours: 0700–1500 and 1500–2300 hrs.

TANKERS: A bulk oil discharging gantry is sited at the Western end of the overseas wharf. Mooring dolphins are located 59 m. and 107 m. Eastward and 59 m. Westward of the wharf.
FUEL: Bunker facilities are not available.
FRESH WATER: Available up to a limit of 250 tonnes delivered at a rate of 25 t.p.h., subject to seasonal availability.
REPAIRS: No facilities available.
AIRPORT: Aropa airport is 32 km. distant and is served daily by Air Nuigini.
POLICE/AMBULANCE/FIRE: Police: 951222. Ambulance: 956166. Fire: 951333.
DELAYS: Delays are only likely if an ore carrier should make port and the consequent priority system is applied.
DEVELOPMENTS: Enlargement of general cargo facilities are planned by the Port Authority.
GENERAL: Covered Storage: 5,130 sq.m.
SHIPMASTER'S REPORT: 1975

Documents:

Crew List. (2 Copies of Papua & New Guinea forms to be filled in on arrival at pilot station).

Ship's Stores List. (2 copies of P.N.G. forms to be filled in on arrival at pilot station).

Crew Declaration Form: – (2 copies of P.N.G. Form 5 – Articles in Private Possession of Officers & Crew to be filled in on arrival at pilot station).

Vaccination Certificates of all crew members for sighting.

Pilotage: Two Pilots, employees of the Bougainville Copper Company Ltd., are available 24 hours a day. Pilot boards in position 06° 07′ S. 155° 35′ 18″ E. Pilot vessel is a small tug called the "Loloho", which has a dark blue hull and white superstructure. Pilots listen on VHF Channels 6 and 16. ETA's will have been passed to the Pilots by the ship's Agents, as per charter party, but pilot boat should be advised by VHF when vessel is two hours and one hour respectively from Pilot station. Channel 6 is monitored by Pilots Monday–Friday, 1730–0215 hrs. and when vessels are expected. Pilotage is compulsory.

Max. Size: Restriction mainly on draft. Least water on berth is 40 ft. Although the problem has not as yet arisen, max. length is also restricted to about 700 ft.

Pratique: Immigration officer boards as vessel berths. International Code of Signals "Q" flag should be exhibited on arrival off port. Same officer deals with customs clearance.

Radio: ETA's to Pilots are best routed through Rabaul Radio, call sign P2R, who will pass the message direct to the Pilot office. Honiara Radio may also be used for messages to the ship's Agents.

Tugs: Only one tug, the "Loloho", is available. This is a very small tug which "assists" vessels when berthing and unberthing. No lines used. Tug of little use to larger vessels.

Berthing: Only one berth in the port, with a least depth of 40 ft. alongside. The berth is used for the loading of copper concentrates and the discharge of general cargo and containers. Vessels intending to load copper concentrates should ensure that their hatch covers are not more than 36 ft. above the water line on arrival, to enable the loader to be positioned over her holds. In some cases ballast hatches may have to be left filled until after loading has commenced. The berth is approached at an angle of 45° and a mooring boat will take one head rope ashore first. The back spring should be sent ashore by heaving line as soon as possible. All vessels berth starboard side to the quay. The berth itself is 250 ft. long. Dolphins stand 175 ft. Westward and 135 and 310 ft. Eastward of the ends of the wharf. The ore loader is not a movable fixture, and vessels are required to shift up and down the wharf to facilitate loading concentrates at the requisite hatches. When leaving the wharf the vessel is sprung off, using one head rope and the backspring.

Stevedores: Normal cargo hours for vessels loading are 0600 – 2300 hrs. but in cases where required cargo will be worked 24 hours a day. Stevedores are employees of the Bougainville Copper Company. Approx. loading rate for concentrates 750/1,000 t.p.h. Stevedores will render all possible assistance in shifting ship. For vessels discharging, mobile cranes capable of lifting up to 140 tonnes are available. Shore gangway is normally used.

Medical: There are good hospital facilities in both Anewa Bay itself and also in nearby Kieta. Advanced notice of required medical attention not normally necessary.

Tankers: Tankers are also discharged at Anewa Bay's only wharf. As with other vessels, draft is restricted to 40 ft., and length to about 700 ft.

Density: Varies between 1022 and 1025 according to season and amount of rainfall recently experienced.

Fresh Water: Available on the wharf except during periods of drought. Supplied by 3 in. hose at approximately 60 t.p.h. Can only be supplied at main wharf (not at Dolphins) and it is therefore sometimes necessary when loading concentrates to wait until after hatches are being loaded before hose can be put aboard.

Fuel: Not available.
Consuls: None.
Repairs: No facilities.
Dry Docks: None close by.
Surveyors: None.
Hatches: Steel hatch covers to be opened and closed by crew.
Customs Allowances: 200 cigarettes and one bottle spirits per person.

Repatriation: Regular flights from Kieta Airport (24 kms. distant) to Port Moresby, where possible to link up with international flights. Repatriation can therefore easily be arranged from this port.

Time: GMT plus 10 hours.

Shore Leave: All crew members are allowed ashore. No shore passes required.

Delays: No delays normally experienced, but possible up to 24 hours max.

General: Berth very exposed to S.E'ly winds. Moderate ground swell experienced on berth at times. Considerable rain experienced throughout the year, mainly during the night and early morning.

AUTHORITY: Bougainville Copper Ltd., Panguna, Bougainville. Port Superintendent/Harbour Master, Arawa, Bougainville.

BUKA: 05.26 S. 154.40 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PILOTAGE: Not available.
TUGS: Not available.
RADIO: Not available.
BERTHING: Wharf position: 05° 26′ S., 154° 40.4′ E. Length 31.4 m. (103 ft.) Width 5.2m. (17 ft.). Berthing dolphins 9.2 m. (30 ft.) off each end. Height of deck above MLW 2.22 m. (7.3 ft.). Minimum depth of water at MLW 3.65 m. (12 ft.).
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS: Not Port of Entry.
AUTHORITY: Port Manager, Kieta.

DARU: 09.04 S. 143.12 E. (See Plan Book)

(See General Section on Papua New Guinea Ports).

PILOTAGE: Not available.
RADIO: Not available.
TUGS: Not available.
BERTHING: Position of wharf: 09° 04′ S. 143° 12.6′ E. Length of wharf head 29.6 m. (97 ft.). Average width 12.2 m. (40 ft.). Height of deck above LAT – 4.8 m. (15.7 ft.) min. depth of water LAT 2.4 m. (8.0 ft.)

The wharf head is connected to the shore by a wharf bridge length 120 m. (394 ft.) and causeway 220 m. (720 ft.).

FRESH WATER: Not available.
FUEL: Available by road tanker. Supplier – Caltex.
CUSTOMS: Port of Entry.
AUTHORITY: Port Manager.

KAVIENG: 02.35 S. 150.48 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMIT: Seaward Boundary.

Large vessels should approach from the Nusa Channel where the port limits are as follows:

From the beacon on Cape Siwusat by a straight line 220° (T) to the extreme North point of Usien Island thence by a straight line due West to position in 2° 37.87′ S., 150° 44.57′ E., thence by a straight line due North to the Western extremity of Edmago Island. From the Eastern extremity of Edmago Island the line of the port limit crosses the Eickstedt Passage in the direction 253° (T) to the Southern extremity of Nago Island.

PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Rabaul given 48 hours notice of the ship's estimated time of arrival.

Pilot Boarding Ground: The Eastern extremity of Edmago Island bearing due North 900 m.

ETA to be sent not less than 12 hours prior to arrival via Rabaul Radio (P2R) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Rabaul Radio (P2R).

ANCHORAGE: Anchorage may be obtained in sand depth 20 m. in a position East Reef Light structure bearing 042° (T) distant 890 m.

RADIO: Not available.

TUGS: Not available.

BERTHING: Overseas wharf is 93.8 m. long, height of deck above L.A.T. 2.7 m., minimum depth of water at face at L.A.T. 7 m. Tidal range 1.2 m.

Vessels may berth port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift 0800–1200, 1300–1600 hrs. Evening shift 1600–1900, 2000–2400 hrs.

FUEL: Bunker facilities available for diesel at wharf from Caltex and Shell

FRESH WATER: Available in limited quantities, prior application to be made with the Port Manager.

REPAIRS: No facilities available.

AIRPORT: Kavieng airport is some 5 km. from the wharf and is served by daily Air Nuigini flights.

POLICE/AMBULANCE/FIRE: Police: 941222. Ambulance: 941234. Fire: 941222.

DELAYS: Delays at Kavieng are most unlikely.

DEVELOPMENTS: Development of Kavieng port is not envisaged at present.

GENERAL: Covered Storage Area: 750 sq.m. Open Storage Area: 3,000 sq.m.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Kavieng.

KIETA: 06.13 S. 155.38 E. (See Plan Book)

(See General Section on Papua New Guinea Ports).

PORT LIMIT: Seaward Boundary

By a straight line bearing 328° (T) from a point in 6° 10′ S., 155° 42.3′ E., on the seaward edge of Gero Reef to a point in 6° 07.1′ S., 155° 40.4′ E., thence due West to a point at the Northern most extremity of Banaru Reef.

PILOTAGE: Compulsory – Daylight hours only.

Pilot boarding ground: 6° 07.6′ S., 155° 40.3′ E.

ETA pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours but not less than 4 hours prior to arrival again via Port Moresby or Rabaul. No VHF facility.

ANCHORAGE: There are no recommended anchorages for large vessels in Kieta harbour.

VHF: Listening watch maintained during working hours and when ships are expected during non-working hours. Call: Kieta Port Control. VHF Channels: 16, 12, 8, 6.

TUGS: 450 h.p. tug available for hire from Bougainville Copper Pty at Anewa Bay.

BERTHING: Overseas wharf 122 m. long, height of deck above L.A.T. 3.0 m., minimum depth of water at face at L.A.T. 7.5 m. Tidal range 1.7 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 required. Working hours: Day shift 0800–1200, 1300–1600. Evening shift 1600–1900, 2000–2400.

FUEL: Diesel available from road tanker. Supplier: Shell.

FRESH WATER: Not available to overseas vessels. Coastal vessels may be supplied depending on availability and following prior arrangement with the Port Manager.

AIRPORT: Aropa airport is some 19 km. from the port and is served daily by Air Nuigini.

POLICE/AMBULANCE/FIRE: Police: 951222. Ambulance: 956166. Fire: 951333.

DELAYS: Delays can occur occasionally at Kieta but of fairly short duration rarely exceeding 48 hours.

DEVELOPMENTS: A recent extension to the overseas wharf completes the main development programme for the next few years.

GENERAL: Covered Storage: 2,230 sq.m. Open Storage: 14,720 sq.m.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Kieta.

KIMBE: 05.33 S. 150.09 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMIT: Seaward Boundary.

A line from Gigo Point due North for 1,695 m., thence in a straight line due East for 6,821 m., thence in a straight line due South for 2,438 m. to the Eastern extremity of Telagavu Point.

PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Rabaul given 48 hours notice of the ship's estimated time of arrival.

Pilot boarding ground: 5° 28.7′ S., 150° 13.9′ E.

ETA to be sent not less than 12 hours prior to arrival via Rabaul Radio (P2R) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Rabaul Radio (P2R). No VHF facility.

ANCHORAGE: There are no recommended anchorage areas for large vessels in the vicinity of Kimbe.

BERTHING: Overseas wharf is 60.9 m. long, height of deck above L.A.T. 3.1 m., min. depth of water at outer face at L.A.T. 10.7 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/Discharge is by ship's own gear (except under special arrangement).

STEVEDORES: 72 hours notice preferred, but a min. of 24 required. Working hours: 0800–1200, 1300–1600, 2000–2400 hrs.

TANKERS: Discharge facilities only, for oil products. Palm oil loading over main wharf.

FRESH WATER: Available on request from Port Manager at a rate of 25 t.p.h., but may be restricted at times during the year.

FUEL: Diesel available by road tanker from Shell and Caltex.

AIRPORT: Hoskins airport is approx. 30 km. distant and is served by Air Nuigini several times a week.

POLICE/AMBULANCE/FIRE: Police: 935022. Ambulance and Fire: No services available.

DEVELOPMENTS: No further development is planned for the port in the near future.

GENERAL: Covered Storage: 745 sq. m. Open Storage: 6040 sq.m.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Kimbe.

LAE: 06.48 S. 147.11 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMIT: From a position Lat. 6° 44′ 12″ S., Long. 146° 59′ 52″ E. 175° T. for 2.2 cables, thence 270° T. for 9.3 cables, thence 017° T. to the shore. Time of arrival at Sugarloaf Anchorage, if berth is not immediately available, is accepted as time of arrival in port.

The Port Limits are due for revision.

PILOTAGE: Pilotage is compulsory – 24 hours a day.

Pilot Boarding Ground: 1,800 m. E.S.E. of Main Wharf.

ETA at Pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours and not less than 4 hours prior to arrival (VHF Channel 16 – call Lae Port Control then to Channel 12 or 6 for working Channels.)

ANCHORAGE: Safe anchorage is available about 3 miles from Main Wharf in the Huon Gulf Area, called Sugarloaf Anchorage, at approximately 1.5 miles offshore between beacons:

Northern Beacon: Lat. 6° 47′ 10″ S., Long. 146° 57′ 20″ E.
Southern Beacon: Lat. 6° 48′ 20″ S., Long. 146° 57′ 06″ E.

Holding ground is good and 11 fathoms is found just South of the line with Northern Beacon bearing West True 1.5 miles distant. The depth varies within a fathom or two in seasons on account of the soft bottom.

Medium sized vessels up to 100 m. LOA may find safe anchorage 1.5 cables from N.W. end of the Overseas Wharf in position 6° 44′ 03″ S., 156° 48′ 8″ E. Depth of water 9.14 m.

RESTRICTIONS: Except for LPG and tankers, vessels berth and sail any time of the day or night, depending on availability of berths and number of vessels waiting for a berth.

RADIO: Radio contact is made through Port Moresby Radio or Rabaul Radio on 6280 kc/s.

VHF: Call sign "Lae Port Control", Channels 16, 12, 8 and 6. Watch maintained during normal working hours and outside hours when a vessel is expected.

TUGS: A 450 h.p. tug and 2×6.4 m. steel work boats are available for running lines to wharf and shore bollards.

BERTHING: Overseas wharf is 430 m. long, height of deck above L.A.T. 2.7 m., min. depth of water at face at L.A.T. 11.0 m. Max. draft 9.7 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority. Provided anchorage in Milfordhaven Bay is clear, ample swinging room is available off the N.W. end of the Wharf.

Load/discharge is by ships own gear (except under special arrangement).

STEVEDORES: 72 hours notice preferred, but a min. of 24 required. Working hours: Day shift: 0800–1200, 1300–1700, 1800–2200. Evening shift: 2200–0200, 0300–0800 (limited gangs).

Advise number of gangs required, hatch tonnages and information of any particular heavy lifts or awkward cargo.

MEDICAL: Maximum possible notice should be given so that full arrangements can be made with regard to hospitalisation, etc. Full hospital facilities are available approximately 2.5 miles from the wharf.

TANKERS: Discharge and bunkering facilities are available for all ship requirements (See Developments).

FUEL: Available.

FRESH WATER: Sometimes restricted but generally available at the rate of 30 t.p.h.

REPAIRS: Only minor repairs can be carried out.

SURVEYORS: Lloyds Agent.

AIRPORT: Lae airport is at present only 3 km. from the main wharf, however the opening of a new airport at Nadzab will be approx. 30 km. distant. Serviced daily by Air Nuigini flights.

POLICE/AMBULANCE/FIRE: Police: 422222. Ambulance: 421211. Fire: 424333.

Fire alarms are connected to the Gatehouse which has a direct telephone link to the Police station for emergency purposes.

DELAYS: Lae is the largest and busiest of the country's ports (except for Anewa Bay) and at times delays for up to 48 hours can be expected.

DEVELOPMENTS: A new tanker discharge and bunkering facility is to be constructed at the East end of the main wharf.

Future development is based on the concept of a tidal basin to the West of the existing facility.

GENERAL: Covered Storage: 13,622 sq. m. Open Storage: 37,000 sq. m.

SHIPMASTER'S REPORT: 1978

Approaches: No difficulties were encountered either approaching or leaving. There is deep water close to the shore. Muddy water from the outflow of the Markham River is encountered off the port, but is of no navigational significance.

Wharf: Modern, well-fendered and convenient. Currents and tides alongside are irregular and unpredictable, being almost entirely influenced by the discharge from the Markham River. A tanker berth, consisting of concrete dolphins, is under construction close Eastwards of the main wharf and a pile-driving barge is operating. When berthing, some vessels use the off-shore anchor but under normal conditions this appears to be unnecessary and can in fact be something of an embarrassment when leaving. We did not use either anchor or tugs, weather conditions being good. Powered line boats are available and were used. There is a depth of water alongside of about 11 m.

Anchorage: The usual anchorage is as described in Pacific Islands Pilot Vol. 1, 9th Edition and Supplement No. 5 of 1976. We lay quietly to the port anchor in 30 m. of water, with 4.5 shackles in the water, in position with the Northern of the 2 beacons shown on Chart Aus. 385 bearing 268°(T) distant 2.1 miles approximately.

It is not customary to take a Pilot for the anchorage.

Pilotage: Compulsory when berthing and unberthing.

Tugs: There are 3 in the port, privately owned. As most of their income is derived from sources other than berthing and unberthing ships, their availability is uncertain. No doubt a vessel requiring a tug or tugs would be able to make advance arrangements.

Communications: Vessel came from Gladstone, Queensland, and our advices were sent through P2M, Port Moresby Radio, no difficulties being encountered.

Pilots and Harbour Control are available on Channel 16, VHF, when shipping movements are expected.

Documents required:

5 Passenger Lists
5 Crew Lists
7 Inward Customs Manifests
3 Lists of Crew Effects
3 Stores Lists
2 Arms and Ammunition Lists

We were able to obtain local forms prior to arrival, and experienced no problems. Also see 'Pratique'.

Officials: The Bond and Beer Rooms are sealed on arrival. The Customs stuck rigidly to the rules and confiscated any undeclared goods, particularly alcohol, cigarettes and what they judged to be pornographic literature. No fines were levied nor charges brought.

The Port Authority allocates berths and decides priorities for vessels.

During our stay, and for a considerable period prior to then, the port had been very busy.

Depending upon the nature of her cargo and the rate of discharge, it is possible for a vessel to reserve a berth in advance.

Because such a vessel arrived when we were alongside and neither our cargo nor our rate of discharge brought us into the berth reservation category, we were obliged to go out to anchor until a berth again became available.

Cargo Working: Our cargo for Lae consisted of 1,524 tonnes of bulk wheat in No. 1 hatch and 9 containers, the heaviest of which was 19.76 tonnes, on No. 2 hatch. The containers were discharged in 3 hours 20 minutes by ship's gear, no problems being encountered.

Our grain cargo was discharged in 36 hours, including time taken rigging and unrigging the sucker and adjusting the length of the suction pipe. Thus, an average rate of 42.3 m/t.p.h. was achieved.

Grain is discharged by means of a portable sucker, weighing approximately 3.5 tonnes, placed on the hatch lids, where it stays throughout discharge. From the sucker, the grain is transferred to a hopper ashore and from there to lorries that transport it to the Mill, about 1 km. away. No significant delays on account of a lack of transport were encountered.

Working Hours: The standard working day is from 0800 hrs. to 2400 hrs. On 2 occasions, once successfully, attempts were made by receivers to start work at 0700 hrs.

The vessel being on Voyage Charter, receivers made strenuous efforts to arrange for discharge after midnight, but without success. They are also investigating making grain discharge an all-weather operation. This could easily be achieved by rigging a tent over the sucker and open portion of the hatch, but whether Union and/or Government Rules would permit this is another matter.

Pratique: If coming from Australia or New Zealand, pratique is not required, nor is a Health Declaration. Nevertheless, radio pratique was requested but no reply was received.

Provisions: Available but very expensive. We stocked up prior to departure Gladstone and this proved to be a wise decision.

Fresh Water: Available from the wharf, at a rate of 15 tonnes per hour. This is well water and not used by the local residents, who collect the rainwater off their roofs. To be on the safe side it was treated with Chloride of Lime.

Repairs: Only minor repairs can be undertaken. We called in a local firm for some non-urgent burning and welding work, but they were unable to do anything due to a products tanker discharging astern of us. The Chief Engineer reports that appearances suggest that competent work would be done, but that prices would be rather high.

Currency: The unit of currency is the Kina. On June 23rd, 1978, the Kina was worth Australian $1.2232 and 75.29 pence sterling.

Weather: Was hot and humid, with temperatures ranging from 23.2°C to 28.2°C. During the afternoons a South-Easterly breeze, about Force 2-3 usually came up, dying away in the evenings. Rain showers were prevalent, night and morning.

Health: Local residents confirmed that malaria is present at Lae and the usual precautions were taken on board.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Lae.

LORENGAU: 02.01 S. 147.16 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMIT: Seaward Boundary.

From the Eastern extremity of Hauwei Island by a straight line due North for 2,050 m., thence by a straight line due East for 2,920 m., thence by a straight line due South for 2,000 m. to the Old Light House on Ndrilo Island.

PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Madang given 48 hours notice of the ship's intention to call at Lorengau.

Advice from an officer of the P.N.G. Defence Force may be obtained for vessels proceeding to Lombrum Naval Base.

Pilot Boarding Ground: Within 400 m. radius of a position with Ndrilo Island Old Light House bearing 127° (T) distant 1,850 m.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R) and to be confirmed at not more than 5 hours and not less than 4 hours prior to arrival. No VHF facility.

ANCHORAGE: Anchorage may be obtained in soft mud in depths of about 30 m. anywhere in Seeadler Harbour but an anchorage in position Bear Point 210° (T) 2,600 m. is recommended.

BERTHING: Nabu wharf at Lorengau is 15.2 m. long with a berthing dolphin 25.9 m. from the Northern end of the wharf. The height of the deck above I.S.L.W. is 2.9 m., minimum depth of water at face at I.S.L.W. 5.1 m.

Nabu wharf is not suitable for large ships but overseas vessels occasionally use the wharf at Lombrum Navy Base in position 2° 02.1′ S., 147° 22.6′ E., which now lies within the declared port of Lorengau.

Berthing at Nabu wharf may be delayed during the N.W. season, December–March.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 required.

TANKERS: Discharge facilities are available at Nabu wharf.

FRESH WATER: Limited supplies available, prior application to be made to the Port Authority.

FUEL: Diesel available from Caltex or Mobil.

AIRPORT: Momote airport is some 45 kms. from Lorengau and is served by Air Nuigini but not daily.

POLICE/AMBULANCE/FIRE: Police: Lorengau 22. Ambulance and Fire: No services available.

DELAYS: Delays at Lorengau are most unlikely.

DEVELOPMENTS: No development for the port is envisaged in the near future except for the erection of a transit shed.

GENERAL: Covered Storage: 780 sq. m. Open Storage: Very little.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Lorengau.

MADANG: 05.12 S. 145.49 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMIT: Seaward Boundary.

By a straight line due East from the Easternmost extremity of Kramket Island to position 5° 11.9′ S., 145° 51.5′ E., thence due South to position 5° 13.5′ S., 145° 51.5′ E., thence by straight line due West to a point on the Easternmost extremity of the Kalibobo (Schering) Peninsula known as Cape Kusseron.

PILOTAGE: Compulsory – Inwards during daylight hours only. Outwards during the hours 0600–2400 hrs.

Pilot Boarding Ground: Within 400 m. radius of a position with the Coastwatchers lighthouse bearing 260° (T) distant 1,800 m.

ETA pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours but not less than 4 hours prior to arrival again via Port Moresby or Rabaul.

ANCHORAGE: Anchorage area is inside the Dallman Passage in the area to the North of the main channel bounded by Beliau Island to the West and Kramket Island to the East. Depth of water, 40 m. Good holding ground in soft mud. Ships should not proceed to anchorage area without Pilot's advice.

VHF: "Madang Port Control" Channels 16, 12, 8 and 6. Listening watch during normal working hours and when vessels expected outside normal hours.

BERTHING: Overseas wharf 137.1 m. long, height of deck above I.S.L.W. 3.1 m., minimum depth of water at face at I.S.L.W. 10.1 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear (except under special arrangement).

A separate facility to serve woodchip vessels (and Caltex tankers) only is situated within Binnen Harbour West of the main wharf facilities.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 required. Working hours: 0800–1200, 1300–1800 and 1900–2400.

TANKERS: Discharge at main wharf for both Shell and Mobil. Caltex discharge by floating pipe-line while moored at the Jant woodchip facility.

FUEL: Diesel and diesel fuel available by road tanker from Shell, Mobil and Caltex.

FRESH WATER: Only very limited supply available dependent on season, prior arrangement must be made to Port Authority.

REPAIRS: A coastal slipway at Madang but only minor deck repairs could be carried out to overseas vessels.

SURVEYORS: Lloyds agents, The Manager, Burns Philp (N.G.) Ltd., P.O. Box 605, Madang.

AIRPORT: Madang airport is 6 km. from the port and is served daily by Air Nuigini.

POLICE/AMBULANCE/FIRE: Police: 822222. Ambulance: 822022. Fire: 822777.

DELAYS: Although there is only one overseas berth at the main wharf, Madang delays are not common and are of short duration when they do occur.

DEVELOPMENTS: A new coastal facility has been completed, and when traffic justifies expenditure an extension of the overseas wharf Eastward will be undertaken.

GENERAL: Covered Storage: 25,000 sq.m. Open storage: 5,575 sq.m.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Madang.

ORO BAY: 08.54 S. 148.29 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMIT: Seaward Boundary.

From the extreme North point of the mainland on the South side of the entrance to Port Harvey by a straight line due North for 2,935 m. thence by a straight line due West for 2,760 m. to the coastline.

PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Port Moresby or Lae given 48 hours notice of the ship's intention to call at Oro Bay.

Pilot Boarding Ground: Within 300 m. radius of a position with the North corner of Oro Bay wharf bearing 225° (T) distant 1,850 m.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival. No VHF facility.

ANCHORAGE: In sand and mud at 15 m. depth may be obtained on the leading marks 239° (T) distant 400 m. from the North corner of the wharf.

BERTHING: Wharf is 60.3 m. long, height of deck above I.S.L.W. 2.5 m., min. depth of water at outer face at I.S.L.W. 11.4 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear (except under special arrangement).

Berthing may be delayed during the N.W. season, December – March.

STEVEDORES: 72 hours notice preferred, but a min. of 24 required.

TANKERS: No discharge facilities exist at present.

FUEL: Diesel available by road tanker from Shell and Caltex.

FRESH WATER: Not available.

AIRPORT: Popondetta airport is 40 km. from the port and is served by Air Nuigini,but not daily.

POLICE/AMBULANCE/FIRE: Police: 297122. Ambulance: No service available. Fire: 297122.

DELAYS: Delays at Oro Bay are most unlikely.

DEVELOPMENTS: The area around Popondetta is being developed as major palm oil plantations and this could eventually lead to expansion of the port.

GENERAL: Covered Storage: 739 sq.m. Open Storage: 4645 sq.m.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Popondetta.

PORT MORESBY: 09.28 S. 147.08 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMIT: Seaward Boundary.

A straight line bearing 300° (T) from a point at the South Western extremity of Nateara Reef to a point at the Southernmost extremity of Sinari Reef.

PILOTAGE: Pilotage is compulsory – 24 hours a day.

Pilot boarding ground: Within 300 m. radius of a position Basilisk Beacon bearing 065° (T) distant 1,500 m. *OR* in bad weather the pilot boarding ground will be withdrawn inside the Basilisk Passage to a position Basilisk Beacon 220° (T) 950 m.

ETA at Pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (call sign P2M).

Confirm or amend ETA not more than 5 hours and not less than 4 hours prior to arrival (VHF Channel 16 – call Moresby Pilot thence switch to Channel 12 for working Channel).

ANCHORAGE: Vessels may, subject to permission being granted by the Pilotage Authority, proceed inwards without a Pilot to an anchorage area in the outer harbour centred in position North Point Manubada Island 090° (T) 1275 m.

Depth of water 27 m. Good holding ground in soft mud and sand.

TUGS: A tug of 650 h.p. available for hire from private operator.

VHF: Call sign "Moresby Port Control" Channels 16, 12, 8 and 6. Listening watch during normal working hours and outside hours when vessel expected.

BERTHING: Overseas berth is 213.3 m., height of deck above. L.A.T. 4.4 m., min. depth of water at outer face at L.A.T. 7.6 m., 4.6 m. on the inner North Eastern arm, 3.8 m. on the inner South Western arm.

The wharf is a "T" head structure and vessels may berth either side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift: 0800–1200, 1300–1700, 1800–2200 hrs. Night shift: 2200–0200, 0300–0700 (limited gangs).

TANKERS: Tankers may discharge at Oil Company buoys N.W of the wharf area, max. draft 13 m. The discharge is through submarine pipe-lines.

FUEL: Diesel for overseas vessels is by road tanker only.

FRESH WATER: Available at the rate of 20 t.p.h.

REPAIRS: A small slipway for coastal vessels only is situated adjacent to the main wharf.

AIRPORT: Jacksons Airport, Papua New Guinea's only international airport is 13 km. from the wharf and is served by flights to and from Australia daily, to Manila weekly as well as daily flights to all main internal centres.

POLICE/AMBULANCE/FIRE: Police: 252222, 255555, 242000. Ambulance: 256822. Fire: 242255, 255188, 253400.

DELAYS: The main wharf can only just cope with two overseas vessels and consequently in peak periods delays can be expected up to 48 hours.

DEVELOPMENTS: A new deep sea berth backed by land fill reclamation is planned for the area North of the present facility.

GENERAL: Covered Storage: 4710 sq.m. Open Storage Area: 11,150 sq.m.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Port Moresby.

AGENTS: Burns Philp (N.G.) Ltd., P.O. Box 75, Port Moresby. Telex NE 22116. Cables: "Burphil Port Moresby".

Agents at all Papua New Guinea Ports.

RABAUL: 04.12 S. 152.10 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMIT: Seaward Boundary.

By a straight line due South from a point on the Easternmost extremity of Matupi Island for 4,375 m. to a position in Lat. 4° 16.8′ S., Long. 152° 11.8′ E., thence by a straight line due West to a point on the S.E. extremity of the land known as Vulcan.

PILOTAGE: Compulsory – 24 hours a day.

Pilot Boarding Ground: With Matupi Island light house bearing 360° (T) distant 1,800 m.

ETA at pilot boarding ground not less than 12 hours prior to arrival via Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours and not less than 4 hours prior to arrival (Rabaul Radio – (P2R)).

ANCHORAGE: There are no recommended anchorage areas for large ships, but anchorage in approx. 30 m. of water may be obtained in good holding ground in a position lower leading light bearing 015° (T) distant 1,110 m.
TUGS: 2×12 m. workboats (165 h.p.) available for hire from Private Operator.
VHF: Call sign "Rabaul Port Control" Listening watch during normal working hours and when vessel expected outside normal hours. Channels 16, 12, 8 and 6.
BERTHING: There are two overseas berths. Bay Road wharf is 152.4 m. long, height above M.L.W. 2.8 m., min. depth of water at L.A.T. 10.2 m.

Blanche Street Wharf is 121.9 m. long. Height of deck above M.L.W. 2.8 m. Minimum depth at L.A.T. 7.9 m.

Vessels may berth either port or starboard side to at either wharf at the discretion of the Port Authority.

Load/discharge is by ship's own gear (Except under special arrangement).
STEVEDORES: 72 hours notice preferred, but a min. of 24 hours required.

Working Hours: Day shift: 0800–1200, 1300–1600 hrs.
Evening Shift: 1600–1700, 1800–2400 hrs.
Limited work after midnight.
TANKERS: Discharge facilities are available for overseas vessels at the Blanche Street Wharf.
FUEL: Diesel fuel and distillate available by road tanker from Shell, Mobil and Caltex.
FRESH WATER: Available at a rate of 25 t.p.h., supply sometimes restricted. Prior arrangement to be made with the Port Authority.

Fresh water also available by private barge, capacity 150 tons for vessels at anchor.
REPAIRS: Only light deck repair facilities available.
SURVEYORS: Lloyds Agent, Burns Philp (N.G.) Ltd., P.O. Box 87, Rabaul.
AIRPORT: Rabaul airport is 4 km. from the port and is served daily by Air Nuigini.
POLICE/AMBULANCE/FIRE: Police: 922222. Ambulance: 922162. Fire: 921411.
DELAYS: Delays at Rabaul are unlikely.
DEVELOPMENT: The only development planned at Rabaul for the next few years are new coastal facilities.
GENERAL: Covered Storage: 9,640 sq.m. Open Storage: 18,600 sq. m.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Rabaul.

SAMARAI: 10.36 S. 150.39 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)
PORT LIMITS: Seaward boundary.

From a point on the Northernmost point of Samarai Island due North for 800 m. thence due West for 1,300 m. thence due South for 1,000 m. thence due East for 1,000 m. to a point on the N.W. coast of Samarai Island.
PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Port Moresby given 48 hours notice of the ship's intention to call at Samarai.

Pilot boarding ground: within 300 m. radius of a position with the North corner of Samarai main wharf bearing 180° (T) distant 1,850 m.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival. No VHF facility.
ANCHORAGE: There are no recommended anchorage areas for large vessels in the vicinity of Samarai.
BERTHING: Overseas wharf is 93.2 m. long, height of deck above LWOST 2.7 m., minimum depth of water at LWOST 7.8 m. Due for demolition in 1978.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear.
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.
TANKERS: Discharge only at main wharf.
FUEL: Diesel available by pipe-line. Supplied by Shell.
FRESH WATER: Very limited quantities available at times, prior arrangements to be made with Port Authority.
AIRPORT: There is no airport at Samarai. The nearest airport is at Gurney, outside Alotau.
POLICE/AMBULANCE/FIRE: Police: Samarai 225. Ambulance (Hospital) Samarai 222. Fire: No service available.
DELAYS: Delays at Samarai are most unlikely.
DEVELOPMENTS: A new coastal facility is being designed for Samarai and after construction the port will be closed to overseas vessels.
GENERAL: Covered Storage: 390 sq.m. Open Storage: 140 sq.m.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Samarai.

VANIMO: 02.41 S. 141.18 W. (See Plan Book)

(See General Section on Papua New Guinea Ports).
PILOTAGE: Not available.
TUGS: One tug 150 b.h.p.
BERTHING: Position of wharf: 02° 41.09′ S, 141° 17.84′ E. Length, 18.7 m. (61.5 ft.); width 6.1 m. (20 ft.). Minimum depth alongside at L.A.T. 4.9 m. (16 ft.).
FRESH WATER: Not available to ships.
FUEL: Distillate available by road tanker.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Vanimo.

WEWAK: 03.34 S. 143.38 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)
PORT LIMIT: Seaward Boundary.

From Wewak Point by a straight line due North for 2,900 m. thence by a straight line due East for 3,725 m. thence by a straight line due South for 4,780 m. to a point 800 m. due East of Cape Boram, thence to Cape Boram.
PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Madang given 24 hours notice of the ship's intention to call at Wewak. A Pilot will shortly be stationed at Wewak.

Pilot Boarding Ground: With Cape Boram bearing 180° – 4,000 m.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival.
ANCHORAGE: There are no recommended anchorage areas for large vessels in the vicinity of Wewak.
VHF: Call sign: "Wewak Port Control". Channels 16, 12, 8 and 6. Listening watch maintained during working hours and outside normal working hours when vessels expected.
BERTHING: Overseas wharf is 73.1 m. long, height of face above Chart Datum is 3.5 m., min. depth of face at Chart Datum is 6.7 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear.

Berthing may be delayed during the N.W. season December – March.
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.

Working Hours: Day shift: 0800–1200, 1300–1600. Evening shift: 1600–1900, 2000–2400. 2 hours extension to finish possible.
TANKERS: No discharge facility exists.
FUEL: Diesel available by road tanker, supplier Mobil.
FRESH WATER: Only available by road tankers.
AIRPORT: Wewak airport is 5 km. from the port and is served daily by Air Nuigini.
POLICE/AMBULANCE/FIRE: Police: 862222. Ambulance: 865188. Fire: 865055.
DELAYS: Delays at Wewak are unlikely but if they do occur are of short duration.
DEVELOPMENTS: The only planned development is to widen the pile causeways leading to the main wharf.
GENERAL: Covered Storage: 1,500 sq.m.
Open Storage: 2,320 sq.m.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Wewak.

Peru

ATICO: 16.14 S. 73.43 W.

Atico is an open roadstead and unprotected. The main activity is the loading of fishmeal.
PILOTAGE: Not available.
ANCHORAGE: Vessels anchor in the open roads.
TUGS: 1 available.
LIGHTERS: 3 available, 100 tons each.
CRANES: None.
STEVEDORES: See "Pimentel" for working hours and overtime rates.

There are 2 gangs available.
MEDICAL: Available at Mollendo.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: *Swell Period:* Heavy swell in the Winter months, June–September.
AGENTS: See "Callao".

CALLAO: 12.03 S. 77.10 W. (See Plan Book)

DOCUMENTS:

Airmail copies must be presented to Port Authorities 72 hours before arrival of vessel as otherwise vessel will be fined. No docking is allowed until Cargo Manifests and Cargo Plan are presented.

Vessel copies to be delivered on Clearing vessel inbound on arrival when Health, Customs and other Authorities board.

	By Air	*By Sea (With the Vessel)*
Cargo Manifests, including additionals. Must be faithful copies of Bills of Lading descriptions	5	*7
Same Manifests, but freighted	5	2
Cargo Manifests covering cargo shortshipped but manifested on previous vessels calling at Callao	5	*7
(If Master Stencils are airmailed, the required number of Manifests will be printed)		
Transit Cargo Manifests	–	3
Freighted copy of each Bill of Lading	–	4
List of Containers with their numbers	2	2
Content List, each Container, properly identified with marks, numbers and Bills of Lading numbers	2	2
Dangerous Cargo Lists showing complete description of goods, Flash Point, IMCO Classification, Type of Label, marks, numbers and Bills of Lading numbers	3	3
Transit Dangerous Cargo Lists	3	3
Mail Manifests	5	5
Passenger Lists	1	*10
Transit Passenger Lists	–	*10
Tally Books	–	16
Stowage Plan	3	–
Consolidated Stowage Plan, prepared or checked on board	–	3
Visaed Tonnage Certificate or General Declaration from First Port receiving cargo for Peru and every port of call thereafter	–	1
Health Clearance, last port of call	–	1
Vaccination List	–	*1
General Declaration	–	*7
Crew List	–	*10
Crew Personal Effects Declaration	–	*3
Store List	–	*4
Sealed Consular Documents addressed to Customers, in envelope	–	1

*Must be made out on LAFTA Forms.

PILOTAGE: Pilots must be requested by Agent and board ships outside of port at anchorage. Various pilot launches painted white, black and red.
ANCHORAGE: Very large area to the West of entrance buoys.
RESTRICTIONS: Vessels of up to 32 ft. draft may enter at any time. Vessels of more than 32 ft. draft must enter at high water. Pilots available 24 hours.
MAX. SIZE: Length and breadth practically unlimited, draft 32 ft. plus height of tide making allowance for keel clearance.
HEALTH: Cable Agent requesting free pratique. Agent must be notified in advance if any illness or disease suspected on board. Free Pratique is hardly ever given unless Health Officer and Captain of the Port and other Officers board.
RADIO: Radio Costera, OBC3, 460, 500, 8546, VHF 16 and 14 (Peruvian Navy 24 hours).

Arrival Advice: 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: Port Authority Tugs join vessel once inside mole, 1 or 2 as required, using vessel's lines, later passed to pier. 4 tugs available 2 at 175 h.p. 1 at 500 h.p. and 1 at 800 h.p.
BERTHING: There are 9 piers with a total of 24 berths, 22 for large vessels, and 2 for coasters.

The various berths of the port can be subdivided into areas for their appropriate usage as follows:

	Quays	*Berths*
General cargo	1, 2, 3, 4, 5	1A, 1B, 2A, 2B, 3A, 3B, 4A, 5A, 4B.
Dry bulk cargo	11, 9	11A, 11B, 11C, 9A, 9B, 9C.
Liquid bulk cargo (Oil derivates)	7	7A, 7B.
Minerals	5	5B, 5C, 5D, 5F.
Logistic supplies and coastal vessels	9, 10	9D, 10A, 10B.

All piers except the petrol pier are connected to railway system for unloading and loading to railway wagons.

Within port limits anchorages can be used for discharge of livestock, scrap and occasionally for general cargo after permission obtained from the Port Authorities.

Berths 5B, 5C, 5D and 5E are equipped with conveyor belts for shipping granulated bulk ore.

Berths 9A, 9B and 9C have a conveyor belt for shipping fishmeal in pellets.

For discharge of grain, there are three pneumatic mobile suction towers and silos with a capacity up to 23,000 tons. The average rate of discharge of the pneumatic towers is 100/150 tons per hour for two towers and 300 for one tower.
STEVEDORES: No particular advice necessary but Agent must receive Stowage Plan beforehand to advise Port Authority of planned operation.

Working Hours: 1st shift 0700–1200 hrs. and 1300–1600 hrs. 2nd shift 1700–2400 hrs. Both are compulsory, except 2nd shift on Sundays and Holidays. 3rd shift 0100–0700 hrs., optional, except after Sundays and Holidays when not worked. There is an additional charge of 25% for the 3rd shift.

Lighters: In the port, a lighter service is provided by private concerns to enable vessels to discharge at moorings, and thus reduce the time they are at the quays.
CRANES: There are a number of cranes with lifting capacity from 4 to 50 tons. The Callao Naval Base has a floating crane with a lifting capacity of 80 tons, which can be called upon if necessary.
MEDICAL: Advance information as to sick crew members not required but helpful. Ample first class facilities in the Lima area. Smallpox vaccination cards required.
TANKERS: *Petroleum Pier: Pier No. 7:* Max. depth 35 ft., however, depth in approaches to berth is 33 ft. at HW and 31 ft. at LW, max. length about 200 m.

There are numerous loading and discharge pipe-lines of different diameter to handle oil derived products.

These lines can be used simultaneously at the berths A and B, but also depending on store facilities on shore or delivery into trucks.

Discharging pressure of the lines: 100 lb. per sq. in. for 12 to 22 in. lines. On the pipe-line of 6 inches it is possible to reach a pressure of 250 lb. per sq. in., for discharge of LPG.

Connections: There are connections from 4 to 10 in. for all kind of flanges.

Water: Supply of water is possible, 40 t.p.h.

Discharge of ballast or slops inside mole prohibited. Tankers loading Fishoil must arrive free of ballast.
DENSITY: Sea water.
FRESH WATER: All berths equipped with fresh water supply at an average rate of 30 t.p.h.
FUEL: The following are available from Petroleos del Peru, Bunker "C" 3,500 seconds, Petroperu No. 5 (intermediate 4) 400 seconds, Diesel 2 (marine diesel) 100 seconds.
FIRE PRECAUTIONS: Use of Port Authority Fire Equipment mandatory during discharge of petroleum products with charge for service. Safety equipment charge accessed to all vessels on tonnaged moved.
GANGWAY/DECK WATCHMEN: Recommendable.
CERTIFICATES: All may be required but normally only the deratting certificate is asked for. If Ratguards are not used on all lines, vessel liable to fines.
CUSTOMS ALLOWANCE: Any amount over normal consumption usually cause difficulties including searching.
CARGO GEAR: No additional requirements.
IDENTIFICATION CARDS: Supplied by Agent and stamped by Immigration. Authorisation required for all crew members.

REPAIRS: Normal Deck and Engine repair facilities available through private companies in Lima and Callao.

DRY DOCKS: Major repairs can be undertaken by the Naval Industrial Department, including careening and repairs in dock.

(*a*) Dry dock – length 632 ft., width 82 ft., depth 21 ft.
(*b*) Floating dock 107 – length 408 ft., width 48 ft., depth 20 ft.
(*c*) Floating dock 106 – length 288 ft., width 46 ft., depth 14 ft.

SURVEYORS: Lloyd's Register of Shipping, ABS, R.I., and N.V.

REPATRIATION: All foreign crew members who do not have Peruvian Visas which only obtainable abroad, must be repatriated by quickest means (Air) by Agent, paying all detention expenses. Peruvian and foreign crew members available.

AIRPORT: Lima/Callao within city limits has regular direct international service to North and South America, Europe and Far East.

HOLIDAYS: Only 1st May when work is not available.

AUTHORITY: Port Captain, Terminal Maritimo de Callao.

AGENT: "La Hanseatica" S.A. General Agents, Ship Agents, Brokers, Enrique Canaval Moreyra 340, floor 9 and 10, Lima 27 (San Isidro), PO Box 3049, Lima 1. Tel. 406447. Cable "Hanseat". Telex 25279–20029–20464.

CHANCAY: 11.35 S. 77.16 W. (See Plan Book)

Chancay is an unprotected open roadstead about 31 miles North of Callao. The main activities are the loading of fishmeal and discharging of fertilisers.

PILOTAGE: Compulsory. The Port Captain currently acts in this capacity.

ANCHORAGE: There is a good anchorage, in 5 and 8 fathoms of water, on a sand and mud bottom, located in the outer area of the bay, which is 1 mile long by 0.5 miles wide.

RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 2 Tugs of 56 h.p.

BERTHING: There is a pier for loading barges.

LIGHTERS: 12 lighters with a capacity of 40 tons each.

CRANES: 2×14 tons capacity.

STEVEDORES: The same system applies here as throughout the Republic, the tariff only altering according to the number of workers employed.

3 shifts and 2 more if necessary.

MEDICAL: Medical consultations possible.

FRESH WATER: Not available.

FUEL: Not available.

AUTHORITY: Port Captain.

AGENT: See "Callao".

CHIMBOTE: 09.05 S. 78.37 W. (See Plan Book)

Chimbote is a berth port with possibilities to load and discharge from and into lighters if berths are not available. Main activity: Loading of fishmeal and minerals; discharging of iron, steel, and general cargo.

DOCUMENTS:

For Entry

2 Entry Declarations (Form No.1).
1 Departure License of the last foreign port en route.
1 Maritime Health Declaration (Form No. 2).
2 Passenger Lists with entry baggage (Form No. 3).
1 Consular Roll of the last foreign port en route.
1 Consular Passenger List of the last foreign port.

Customs Administration

1 Original Cargo Manifest(s) with the Consular stamp. (Form No.4).

The envelope(s) from the Consul, enclosing copies of the Consular invoices, bill of lading and cargo manifest for the port with the Consular stamp.

1 Cargo Manifest (Form No.4).
1 Cargo Manifest of cargo, but with further destination for another national or foreign port (Form No. 4).
1 Cargo Manifest in transit.
1 Gross or Net Tonnage Certificate, with Consular visa.
1 Unaccompanied Baggage List (Form No. 5).

Customs

1 Entry Declaration (Form No. 1).
1 Cargo Manifest(s) for port without Consular visa (Form No. 4).
1 Manifest of Cargo for port, but with further destination for another national or foreign port, without Consular visa (Form No. 4).
2 Passenger Lists with entry baggage (Form No.3).
2 Not Accompany Baggage Lists (Form No. 5).
1 Crew Personal Effect List.
1 Store List, food and spirits.
1 Mail List.

Port Administration

1 Entry Declaration (Form No.1).
1 Passenger List with entry baggage (Form No. 3).
1 Not Accompany Baggage List (Form No. 5).
3 Cargo Manifests for the port, without the Consular visa (Form No.4).
3 Manifests of Cargo for port, but with further destination for another national or foreign port, without Consular visa (Form No. 4).
3 Sets of Bills of Lading.

Refer to "San Juan" for further information on Consular endorsement.

PILOTAGE: Compulsory. Official Pilot boards vessels at entrance to bay and leads ship to appropriate anchorage according to draft. Private Pilot to moor to the quays of the "Corporacion Peruana del Santa" and to "Sogesa". Vessels enter the inner roadstead, through Southern side of each channel. Depart through Northern side of channel.

ANCHORAGE: Good anchorages in bay according to draft. Anchorages are of mud and sand. Best place to anchor ship of medium draft is inner side of Paso del Norte, 6 fathoms deep, near port and safe. Another good anchorage for ship of medium draft is with Island bearing 170° and Rosas Blancas bearing 275°, 6 fathoms deep.

HEALTH: Health authorities board on arrival.

RADIO: Hablanaves Radio at Talara and Trujillo (Buenos Aires), Radio Costera at Callao.

Arrival Advice: 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 6 private, 3 of 80 h.p., 1 of 60 h.p. and 1 of 165 h.p. and 1 of 180 h.p. The Port Authority has two tugs, 1 of 400 h.p. and 1 of 200 h.p.

BERTHING: 3 piers available.

No. 1 Pier: Length 158 m., width 16 m., depth alongside 27 ft. – 28 ft.

No. 2 Pier: Used only for the loading and discharge of lighters (fishmeal). Length 54 m., width 18.40 m. Average depth 4.5 m.

No. 3 Pier: Operated by Siderperu. Length 265 m., width 25 m., depth alongside 28 ft. – 31 ft. There are two bridges for discharging coke and minerals by clamp. (Total capacity 300 t.p.h.)

LIGHTERS: 12 for dry cargo: 2 at 150 tons and 10 at 50 tons. 10 tanklighters with a total capacity of 1,300 tons.

CRANES: 5 cranes: 3×17 tons, 1×13.8 tons and 1×6.25 tons capacity.

STEVEDORES: See "Callao".

MEDICAL: Agent arranges emergency attention. Hospital and private clinic available.

TANKERS: Three zones for load/discharge of fish-oil and lubricants. Ship loads fish-oil by barges being anchored. Discharge of fuel when ship anchored to buoys by means of submarine lines.

FRESH WATER: Two barges to supply fresh water to ships, one of 40 metric tons and other one of 25 metric tons. Fresh water available at Pier No. 1.

FUEL: Available by tanker lorries if special arrangements are made.

DEVELOPMENTS New quays to be built.

GANGWAY/DECK WATCHMEN: The services of watchmen are necessary.

OPENING/CLOSING HATCHES: This job is carried out by stevedores.

CUSTOMS ALLOWANCE: Tobacco: 10 packets per person per week. Wine and/or Spirits: With approval of Customs, within normal consumption.

CARGO GEAR: Vessel's derricks used, the quay has fixed crane for 50 metric tons and three mobile cranes for 15 tons.

IDENTIFICATION CARDS: Needed for both crew and passengers.

CONSULS: Only the Vice-Consul of Spain and Panama.

REPAIRS: Only minor repairs are possible.

REPATRIATION: Facilities for crew changes and arranging any necessary repatriation.

AIRPORT: Port has landing place for planes, but it is only for national use, not for international flights.

TIME: GMT minus 5 hours, all year round.

HOLIDAYS: Cargo work can be arranged on holidays with an extra 100% charge over basic pay. The only exception is 1st of May, on which cargo work cannot be arranged.

TELEPHONES: No arrangements for placing telephones on board. They are about 50 m. from ship.

SHORE LEAVE: Crew members allowed ashore.

REGULATIONS: Not allowed to use wireless when ship is in port. Nor allowed to put any boat on the water without permission of Capitania del Puerto. Not allowed to throw any waste or litter into bay. Not allowed to make unnecessary sound signals.

GENERAL: *Swell Period:* February/March and June/October.

AUTHORITY: Capitan de Puerto – Direccion Capitania de Puerto Chimbote.

AGENT: See "Callao".

CONCHAN: 12.10 S. 77.00 W.

Tanker Buoy berth about 30 miles South of Callao.

DOCUMENTS: Tankers calling at Conchan must first call at Callao anchorage to be received and cleared by Authorities. Not necessary to call at Callao after discharge as clearance is simultaneous with reception.

PILOTAGE: Private Pilot boards vessel at Callao anchorage and either remains on board or returns to take vessel out, as required by Master.

BERTHING: Vessels moor to buoys. One submarine line of 16 in. reducing to 12 in. at vessel's connection, running 1,000 m. from shore opposite Conchan refinery.

LAUNCH: Launch service between Conchan and Callao or Conchan and Fish Pier at Barranco, southern suburb of Lima during vessel's stay in port.

GENERAL: Two Customs police and two refinery employees board at Callao and remain on vessel during discharge.

AGENT: See "Callao".

ETEN: 06.56 S. 79.52 W.

Eten is about 348 miles North of Callao. The port is an unprotected open road. All cargo operations are undertaken by lighters. The main activities are the export of sugar and import of fertiliser and general cargo.

PILOTAGE: Not available.

ANCHORAGE: Vessel anchor about 0.5 mile off the Mole Head in 7–8 fathoms, near the anchorage place of the lighters mooring out at sea, if draft requires, as loading progresses.

RADIO: *Arrival Notice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 4 tugs of 80 h.p. each.

LIGHTERS: 13 lighters with a total capacity of 635 tons.

BERTHING: There is a pier for handling barges.

CRANES: 3 steam cranes, 2 × 2 tons and 1 × 15 tons. 1 diesel crane of 3 tons capacity.

STEVEDORES: See "Pimentel".

FRESH WATER: Not available.

MEDICAL: There is a hospital at Chiclayo 15 km. from the port.

CONSULS: Vice-consul of the Netherlands.

GENERAL: *Swell periods;* Eten being an unprotected open road port it frequently occurs that the port has to be closed due to heavy swell. The swell comes up suddenly and is not subject to any specific period, but it occurs more frequently during June/September and the Easter week.

AGENT: See "Callao".

GENERAL SAN MARTIN: 13.48 S. 76.17 W. (See Plan Book)

PISCO: 13.43 S. 76.14 W.

PILOTAGE: Compulsory.

RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 16 tugs available. 10–800 h.p.

BERTHING: 1 quay with 4 berths each 175 m. in length. Max. draft 32 ft. (25,000 tons). Cargo is loaded by portable conveyor belts.

LIGHTERS: 28 wooden lighters for general cargo, total capacity 1,800 tons. 5 steel lighters (not immediately available), total capacity 600 tons. 3 lighters for liquid cargoes, total capacity 500 tons.

CRANES: 1×13.61 tons, 1×22.68 tons and 1×6.25 tons capacity.

STEVEDORES: *Working Hours:* 0800–1200 hrs., 1300–1700 hrs., 1800–2400 hrs., 0100–0700 hrs.

109 stevedores available.

MEDICAL: There is a hospital available.

TANKERS: *Submarine Pipe-line:* The pipe-line belongs to Petroperu. Position 13° 36′ 20″ S., 76° 15′ 54″ W. Length of pipe-line 700 m., diameter 8 in. Pilotage is compulsory. Depth of water 7.5 fathoms. Pumping rate 70-75 t.p.h.

FRESH WATER: Available.

FUEL: Not available.

AGENT: See "Callao".

HUACHO: 11.07 S. 77.37 W.

Huacho is an unprotected open roadstead about 69 miles North of Callao. The main activity is the loading of fishmeal and minerals and discharging of fertilisers.

PILOTAGE: Not available.

ANCHORAGE: Vessels anchor in open roads.

RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 4 tugs available, 1 each at 50, 60, 72 and 180 h.p.

LIGHTERS: 29 lighters, total capacity 1,450 tons.

BERTHING: There is a pier for mooring barges, length 223 m.

CRANES: 3×13.60 tons each.

STEVEDORES: See "Pimentel" for working hours and overtime rates.

4 gangs of 9 men each available.

MEDICAL: Assistance available.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Swell Period:* Frequently during the Winter months (May–September).

AGENT: See "Callao".

HUARMEY: 10.06 S. 78.10 W.

Huarmey is an unprotected open roadstead for the loading of fishmeal.

PILOTAGE: Not available.

ANCHORAGE: Vessels anchor in the open roads.

RADIO: *Arrival Notice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and Agent.

TUGS: 4 tugs available, 2 × 145 h.p. and 1 each at 120 h.p. and 165 h.p.

LIGHTERS: 18 at 50 tons each.

CRANES: 1 of 2 tons capacity and 1 mobile crane.

STEVEDORES: See "Pimentel" for working hours and overtime rates.

3 gangs of 9 men each available.

MEDICAL: Assistance available.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Swell Period:* June to August.

AGENT: See "Callao".

ILO: 17.39 S. 71.21 W. (See Plan Book)

DOCUMENTS:

6 Entry Declarations.
4 Passenger Lists (disembarking).
4 Passenger Lists (in transit).
3 Personal Effects Lists.
3 Stores Lists.
1 Maritime Health Declaration.
3 Sets Cargo Manifest.
10 Cargo Manifest.

Refer to "San Nicolas" for further information on Consular endorsement.

PILOTAGE: No pilot station; there is a Pilot in the Capitania del Puerto, who should be notified in advance by Agents. Two hours notice of ETA required. Pilot boards at anchorage 800 m. from extension of the SPCC quay.

ANCHORAGES: 400 m. to the North of the end of the SPCC quay, in 15 fathoms depth.

MAX. SIZE: See "Berthing".

HEALTH: Pratique given by Captain of the Port. In cases of suspected illness a doctor should be requested in advance. When the ship arrives from another Peruvian port free pratique is automatic.

RADIO: Cables connect with National Communications network. ETA sent to Port Authority and to Agencies.

TUGS: 1×690 h.p. tug available.

BERTHING: Berthing anytime. There are two piers, one belonging to Southern Peru Copper Corp. and one to ENAPU.

SPCC: Two vessels are able to berth alongside. Length of pier 520 ft., width 60 ft. Depth alongside varies from 35 ft. to 50 ft.

ENAPU: Length of pier 300 m., width 27 m. Depth alongside varies from 18 ft. to 60 ft. Vessels able to berth both sides. South side depth 18 ft. at inner end, 54 ft. at outer end. North side depth 24 ft. inner end, 60 ft. outer end.

STEVEDORES: Stevedores come under the Capitania del Puerto and are ordered by Agents. *Loading Rates:* Copper sheets loaded 65 metric t.p.h. Fish-flour loaded at 100 metric t.p.h. in an 8-hour shift.

Working Hours: 0700-1200, 1300-1600, 1700-2400, 0100-0700 hrs., ten gangs available of nine men each.

MEDICAL: Medical assistance ordered by Agents. Hospital "El Centro de la Salud", and the Saint Geronimo Hospital.

TANKERS: *At Ilo:* Discharge line diameter 10 in., 2 lines, connection to the ship's manifold 8 in., connection and flexible line, working pressure 100 lb. A buoy mooring berth.

Depth of water 40 ft. pumping rate 80-90 t.p.h. Vessels of Petroperu have preference.

Punta Tablones: Discharge line diameter 12 in., connection to the ship manifold 8 in. Flexible connection line, working pressure 100 lb. or 400 barrels per hour. A buoy mooring berth.

Max. length 750 ft. Depth of water 40 ft.

DENSITY: Salt water.

FRESH WATER: Available.

FUEL: None available.

DEVELOPMENTS: Terminal quay of 900 ft. long is now being built.

GANGWAY/DECK WATCHMEN: Watchmen provided by Agents when necessary.

OPENING/CLOSING HATCHES: Strictly forbidden for the crew; must be done by stevedores.

CERTIFICATES: When the ship comes from foreign port it is compulsory to produce Certificate of Gross Tonnage.

CUSTOMS ALLOWANCE: Tobacco: 10 packets per person. Wine and/or Spirits: Sufficient for meal times. Normal crew consumption only.

IDENTIFICATION CARDS: Agents arrange for cards to be signed by Port Authority for each crew member.

CONSULS: None.

REPAIRS: Some minor repairs.

REPATRIATION: There are facilities for effecting crew changes and arranging any necessary repatriation. Those who are going to be repatriated must have a permit from the Port Authority to be allowed ashore.

AIRPORT: Ilo Airport, 8 kms. Scheduled flights twice a week on Tuesdays and Saturdays and regular airport in Tacna at 1.5 hours by taxi, scheduled flights twice daily to Lima.

TIME: GMT minus 5 hours. No alterations during the year.

HOLIDAYS: 1st January (New Year); Maundy Thursday and Good Friday (change every year); 1st May (Labour Day); 29th June (Saint Peter and Saint Paul); 28th and 29th July (Motherland Days); 30th August (Saint Rosa of Lima); 1st November (All Saint Day); 8th December (Our Lady); 25th December (Christmas).

Holidays which are not in the Calendar but are considered Holidays with reference to payments to the workers: 6th January (King's Day); 19th March (Saint Joseph); Corpus Christi (it varies every year); The evening of the 24th June (India man day); 30th July (Motherland Day); 15th August (Feast of the Assumption); 24th September (Las Mercedes); 12th October (Race Day); 27th November (Tarapaca Battle); 9th December (Ayacucho Battle).

POLICE/AMBULANCE/FIRE: Southern Copper Corporation operate fire service. Police, Tel. No. 3; Ambulance, tel. No. 3.

TELEPHONES: No arrangements for placing telephones on board.

SHORE LEAVE: Crew members allowed ashore and identify themselves with cards signed by Capitania del Puerto given through ship's Agents.

GENERAL: Tank cleaning and well cleaning must be done 5 miles leeward of port. Not allowed to unload explosive cargo.

DELAYS: Only delays when quay is occupied by two ships. In the load/unload operations the port can attend to 4 ships simultaneously and 4 more when new quay (that is now being built) is finished.

AUTHORITY: Capitan del Puerto, who is a Navy Officer.

AGENT: See "Callao".

LA PAMPILLA: 11.55 S. 77.09 W.

Tanker Buoy Berth about 30 miles North of Callao.

DOCUMENTS, ETC.: As for Callao.

Tankers calling at La Pampilla must first call Callao anchorage to be received and cleared by Authorities. Not necessary to call Callao after discharge as clearance simultaneous with reception.

PILOTAGE: Pilot boards vessel at Callao anchorage and either remains on board or returns by launch to take vessel out, as required by Master.

BERTHING: Vessels moor to buoys. 1 submarine line of 18 in. reduced to 10 in. at vessel's connection running 1,500 m. from shore opposite La Pampilla refinery. Max. size 200,000 d.w.t. or 250,000 d.w.t. with part load.

LAUNCH: Launch service between La Pampilla and Callao during vessel's stay in berth.

GENERAL: 2 Customs police and 2 refinery employees board at Callao and remain in vessel during discharge.

AGENT: See "Callao".

MATARANI: 17.00 S. 72.07 W. (See Plan Book)

Matarani is a berth port. Main activity: loading of minerals, wool, coffee, skins, tin-ingots, discharging general cargo. Matarani is an important transhipment port for cargo to and from Bolivia.

PILOTAGE: Compulsory.

RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent through Radio Station in Naval Station, frequencies as per Calloa.

TUGS: 1 at 780 h.p., 1 at 690 h.p. and 1 at 800 h.p.

BERTHING: 1 quay with 4 berths. Length 540 m., width 20.15 m. Vessels of 570 ft. length can berth. Depth alongside 30 ft.

Berth 1A, 1B and 1C each 150 m. length. Berth 1D presently length 90.50 m., but being lengthened to 132.9 m. length.

CRANES: 5 at 10 tons, 4 at 6.25 tons and 1 at 20 tons lifting capacity.

MEDICAL: A hospital is available.

STEVEDORES: *Working Hours:* 0800–1200, 1300–1700, 1700–2400, 0000–0600 hrs.

9 gangs available of 15 men each.

FRESH WATER: Available.

FUEL: Not available.

GENERAL: *Swell Period:* From June to August.

AGENT: See "Callao".

PACASMAYO: 07.24 S. 79.35 W.

DOCUMENTS:

3 copies Voyage Log Extract.
2 originals and 5 copies of Entry/Exit Declaration, endorsed by Consul.
8 copies of Passenger Lists for the Port.
8 copies of Transit Passenger List.
4 copies of Store List.
4 copies of Personal Belongings Manifest.
13 copies of Cargo Manifest.
1 Maritime Health Declaration.
2 Crew Lists.
1 Vaccination List.
When this is the first Peruvian port, Gross Tonnage Certificates.
When having cargo for the port, Statement of Cargo, endorsed by Consul.
When Pacasmayo is the first or last port called, Lists or Manifests of cargo in transit (2 copies each).

Refer to "San Juan" for further information on Consular endorsement.

PILOTAGE: The port has no Pilots because it is an open bay. Vessels have free pratique after boarding by port officials.

ANCHORAGE: To the South of an East-West line from the quay as there are obstacles to the North.

APPROACHES: Reference points are the lighthouse of Cruz Punta Pacasmayo with a range of 12 miles, and during the day the cylindrical tower of cement factory with a height of 50 m. situated in the S.E. of the bay. On the head of the quay there is also a small iron tower of 9 m. height with a permanent red light of 2 miles visibility. The quay is very old and only flat boats can moor.

MAX. SIZE: Wide anchorage without problems concerning length or breadth. Recommended draft 4 fathoms, but it is possible to find 6, 8 or 10 fathoms towards the West. Current from South to North at an average of 6 knots.

HEALTH: Sanitary control is carried out by the health doctor who comes on board with port officials. Normally, captains notify any suspected illness or any other information by telegraph.

TUGS: They only operate to bring or take out flat bottomed barges once the vessel is moored.

BERTHING: Vessels anchor in open bay. There is an Iron Quay for the use of barges, length 533 m., width 10 m., depth at west end 3 m.

LIGHTERS: 9 lighters with a total capacity of 400 tons.

CRANES: 1×1 tons, 2×3 tons.

STEVEDORES: Agents order the number of gangs required. These gangs work at a tariff hour/ton and the amount is controlled by the Port Captain. The number of gangs (9 men each) depends on loading/discharging speed required and on the number of holds and winches available, For overtime rates see "Pimentel".

MEDICAL: Can be provided by Centro Preventivo del Area de Salud or by Hospital Regional de Chepen, 35 km. from port (150 beds).

DENSITY: Salt water.

FRESH WATER: Not available.

FUEL: Not available.

DEVELOPMENTS: When the mines of Micchiquillay (copper) start working, the embarking capacity of the port has to be 100,000 tons per month, consequently it is planned to build a quay for minerals or otherwise a floating island 6 miles from the port for embarking in gross raw materials by pipe-lines.

OPENING/CLOSING HATCHES: These operations are carried out by the stevedores.

SHIP CERTIFICATES: Deratisation or Fumigation Certificate; Vaccination Certificate for Crew and Passengers; Tonnage Certificate when coming from abroad.

CUSTOMS ALLOWANCES: Only tobacco, wines, spirits required for normal consumption, which must be included in vessel's stores list.

CARGO GEAR: Ships gear used.

IDENTIFICATION CARDS: Not required unless leaving the vessel.

CONSULS: There are no Consuls in the port.

REPAIRS: There is a small workshop in the port for minor repairs such as soldering, etc. There is no foundry.

DRY DOCKS: Nearest at Callao.

REPATRIATION: Members of crew of passengers can be repatriated subject to Port Authorities permission and passport control.

AIRPORT: There is a small emergency airport 2 km. from the port where planes can land.

TIME: GMT minus 5 hours. During the 3 months of Summer clocks advance 1 hour.

HOLIDAYS: Holidays have been restricted. The national official holidays are: 27th and 28th July (National Independence Days); 1st January (New Year); 25th December (Religious Fete); Maundy Thursday and Good Friday; variable days and 1st May (Workers' Day).
POLICE/AMBULANCE/FIRE: Police 2126; Ambulance 2225; Fire 2081.
TELEPHONES: It is not possible to instal telephones on board. Communication by walkie-talkie radio.
GENERAL: Fresh and dry provisions can be supplied, such as meat, poultry, vegetables and fruits.
SERVICES: There is no tank-cleaning equipment and the discharge of tank washing and any other kind of garbage is forbidden, for the bay is a bathing area.
SHORE LEAVE: Allowed.
DELAYS: The vessel is anchored on arrival. Delays can occur due to heavy sea or rain in case of cement loading.
AUTHORITY: Captain of the Port.
AGENT: See "Callao".

PAITA: 05.05 S. 81.07 W. (See Plan Book)

DOCUMENTS:
- 5 copies Peruvian "Declaracion de Entrada".
- 13 Crew Lists.
- 5 Cargo Manifests, from each port where cargo loaded, or negative.
- 5 copies of each Bill of Lading.
- 3 Personal Effects Lists.
- 13 Stores Lists.
- 1 Tonnage Certificate from first and last port.
- 1 International Maritime Health Certificate.
- 13 Passenger Lists, disembarking, or negative.
- 13 Passenger Lists, in transit, or negative.
- 1 Clearance from last port.
- 1 Sealed envelope from Peruvian Consulate addressed to Customs.

(Documents should be visaed by Peruvian Consulate.)
PILOTAGE: Compulsory. There are two Pilots, on 24 hour service. Arranged by Agent. The boat is an old disembarking launch, hoisting blue flag with a white "P" Pilot will board after free pratique has been granted by Port Captain and Health authorities.
ANCHORAGE: Recommended 5° 04′ S. 81° 07′ W.
RESTRICTIONS: Draft restricted to 31 ft. at low water.
MAX. SIZE: Length and breadth practically unlimited.
HEALTH: Agent will notify Health Authorities about the vessel's arrival.
RADIO: Recommended Balboa Radio.
Arrival Notice: 24 hours Notice of Arrival should be sent to the Captain of the Port and Agent.
TUGS: 1 tug of 850 h.p., 1 tug 360 h.p. and one launch 60 h.p. used by the Pilot.
BERTHING: One finger pier, length 475 m. width 36 ft. Four berths available, depths are as follows:

No. 1A (North-west Berth)	32.0 ft.
1B (North-east Berth)	32.0 ft.
1C (South-west Berth)	23.8 ft.
1D (South-east Berth)	22.9 ft.

A safety margin of 3 ft. should be observed. It is advisable to request (from Pilot) berths "B" or "D", if empty, due to the prevailing winds. The berths have good fenders.
Cranes with capacity of 25,000, 15,000 and 10,000 lbs. available.
STEVEDORES: Arranged by Agent at 24 hours notice.
Working Hours: 0800-1200, 1300-1700, 1700-2400 and 0000-0700 hrs.
Night Work: Possible, as long as it is ordered in plenty of time.
10 gangs of 9 men each available per shift.
MEDICAL: There is a local hospital with all facilities.
TANKERS: There are 4 mooring buoys 0.25 m. East of the finger pier. Facility is the property of Petro-Peru. Oil loaded and discharged by submarine pipe-line.
DENSITY: 1030.
FRESH WATER: There are 3 drinking water hydrants on each side of the pier. Vessels require pumps to take on water from the storage tank (capacity 14 tons).
FUEL: Not available.
FIRE PRECAUTIONS: Port Authority fire equipment stationed at the end of the pier.
STORES: Fresh provisions available.
GANGWAY/DECK WATCHMEN: Available on request.
CERTIFICATES: Not requested.
CUSTOMS ALLOWANCE: Two cartons and one bottle per person.
CARGO GEAR: No additional requirements.
IDENTIFICATION CARDS: Not required.
CONSULS: Ecuador.
REPAIRS: No facilities.
REPATRIATION: Allowed on request to the Port Captain.
GENERAL: Painting and chipping ship's side restricted. Very strict concerning rat-guards, throwing of garbage, etc.
AIRPORT: Piura, airport 55 km. with domestic flights to Lima International Airport.
HOLIDAYS: 1st May only.
AUTHORITY: Captain del Puerto.
AGENT: See "Callao".

PIMENTEL: 06.50 S. 79.56 W. (See Plan Book)

Pimentel is an unprotected open road port, loading/discharging only from/into lighters. Clearance is possible day and night, including Sunday and holidays, but of course with overtime additionals. Main activity: Sugar export, import of fertilisers and general cargo.
PILOTAGE: Not available.
ANCHORAGE: Vessels usually anchor about 1.5 miles off the Pier Head in 7-8 fathoms, near to the anchorage place of lighters mooring out at sea if draft requires, as loading progresses.
RADIO: *Arrival Notice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 2 at 82 h.p., 2 at 120 h.p. and 2 at 134 h.p.
LIGHTERS: 15 lighters with a total capacity of 1,170 tons.
CRANES: On the mole there are 3 diesel cranes each 3 ton capacity, 3 steam cranes with 4, 6 and 15 ton capacity. Max. dimensions of Cargo 27 ft. (length)×15 ft. (wide)×21 ft. (height).
STEVEDORES: *Working Hours:* 0700–1100 and 1300–1700 hrs. Overtime (plus 100%) 1100–1300 and 1700–2400 hrs. Overtime (plus 200%) 0000–0700 hrs.
On Sundays and holidays an additional 100% to the above-mentioned tariffs.
MEDICAL: There is a hospital at Chiclayo 15 km. from the port.
TANKERS: *Submarine Pipe-line:* Diameter 8 in. max. draft 18 ft. 1 pipe-line for clean products and 1 for dirty products. Length of pipe-line 1,770 m.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: Vice-consul of the Netherlands.
SURVEYOR: Mr. Manuel S. Reyes H., sub-agent of Lloyd's of London.
GENERAL: *Swell Periods:* Pimentel being an unprotected open road port it frequently occurs that the port has to be closed due to heavy swell. The swell comes up suddenly and is not subject to any specific period, but it occurs more frequently during June-September and the Easter week.
AGENT: See "Callao"

PUERTO CHICAMA: 07.42 S. 79.26 W.

Puerto Chicama is about 295 miles North of Callao. Fishmeal is loaded from lighters in an open roadstead.
PILOTAGE: Not available.
ANCHORAGE: Vessels anchor about one mile from the Mole.
RADIO: *Arrival Advice:* Advise general Agents in Lima who will telephone Port Agents.
TUGS: 3 tugs available, 1 of 65 tons and 2 of 80 tons each.
BERTHING: 1 Pier, length 324 m.
LIGHTERS: 20 lighters with a total capacity of 1,000 tons.
CRANES: 4 cranes, 2 of 2 tons, 1 of 4 tons and 1 of 6 tons.
STEVEDORES: Working hours are from 0700-2400 hrs. These hours may be exceeded to complete loading. Five gangs of 9 men are available.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: *Swell Period:* During the months of June, July and August.
AGENT: See "Callao".

SALAVERRY: 08.13 S. 78.59 W. (See Plan Book)

DOCUMENTS: See "Callao".
PILOTAGE: Compulsory.
RESTRICTIONS: Harbour entrance is sand and liable to silting. Advisable to check draft requirements in advance, as depths are subject to latest dredging. Designed depths: Entrance channel 11.0 m. Basin 10.0 m. Berths 11.0 m.
MAX. SIZE: Approx. 25,000 d.w.t. with up to 29 ft. draft. Draft varies greatly and quickly due to heavy constant sanding, although dredging is practically continuous.
HEALTH: Cable Agent requesting free pratique. Agent must be notified in advance if disease suspected on board.
RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 4 tugs available, 1 each at 690 h.p., 190 h.p., 85 h.p. and 40 h.p.
BERTHING: *No. 1 Pier:* Length 225 m. Vessels able to berth both sides. Max. draft 28 ft. There are pipes installed for the discharge of liquids and loading of molasses and alcohol.
No. 2 Pier: Length 230 m. Vessels able to berth both sides. Max. draft 28 ft. This pier is specially for the loading of sugar in bulk, 2 loading bridges available, loading rate 300 metric t.p.h. each.
STEVEDORES: *Working hours:* 0700–2300. Sugar and molasses in bulk loaded 24 hours a day. 10 gangs available of 9 men each.
CRANES: 1×22.68 tons, 1×13 tons, 2×6.25 tons and 1×4.5 tons.
MEDICAL: At Trujillo, 15 km. from the port.
TANKERS: *Submarine Pipe-line:* Length 700 m., diameter of 10 in., depth 26 ft.
FRESH WATER: Available. Capacity of shore tank 800 tons.
FUEL: Not available.
REPAIRS: Workshops available.

GANGWAY/DECK WATCHMEN: Recommended.
CUSTOMS ALLOWANCE: Any amount held over normal consumption may result in Customs search being imposed.
IDENTIFICATION CARDS: Supplied by Agent and stamped by Immigration. Required for all crew members.
HOLIDAYS: Only 1st May when work is not available.
CONSULS: Nearest at Callao/Lima.
GENERAL: Due to constant swell and undertow which, during Winter months, May/September, may even close port, it is recommended vessel moor with greatest possible number of synthetic lines which must be constantly adjusted, otherwise usual line breakage will increase.

AGENT: See "Callao".

SAN NICOLAS: 15.14 S. 75.14 W. (See Plan Book)

DOCUMENTS:

Clearance	1
General Declaration (Form ALALC/OEA 1)	5 for arrival 5 for departure
Cargo Manifest. Only when authorities require it. (Form ALALC/OEA 2)	4 for arrival
Crew List (Form ALALC/OEA 3)	5 for arrival 5 for departure
Store List/Bazaar List (Form ALALC/OEA 5)	5 for arrival
Personal Effects Declaration	3 for arrival
Maritime Declaration of Health	2 for arrival
*Passenger List (Form ALALC/OEA 4)	6

*This document is not to be presented when vessel is not carrying passengers or cargo.

No Peruvian Consul Visa required when the vessel is in ballast.
The following documents should be available for inspection:
Ship's Papers.
Valid Fumigation or Exemption Certificate.
Crew's Identity Documents.
International Vaccination Certificates of all persons aboard.
List with following data: date and port of issue of ship's register, date and port of issue of Health Certificate, date of vessel's building and yard, list of ports of call with dates during previous 4 months.

PILOTAGE: Pilotage is compulsory for berthing. No vessel may proceed to pier until permission to berth has been granted. No vessel is permitted to berth alongside Hierro Peru Enterprise pier without an authorised Docking Pilot on board. While loading, during periods of heavy swells and surge a Hierro Peru Pilot will be on board permanently. Masters are requested to make arrangements and facilities available.

Upon arrival in port, vessels must anchor not less than 0.75 miles from the dolphin and wait for reception. Official time of arrival is the time of anchoring. The starboard accommodation ladder must be rigged for Port Officials and Hierro Peru representatives. Ships approaching San Nicolas must fly their national, Peruvian, call letters and quarantine flags. Vessels proceeding to San Nicolas to load iron ore will radio Hierro Peru, Lima, Peru, cable address Hierro Peru, Telex No. 200005 PE HIERROPE, their ETA 5 days – 72/48 hours and again at 24 hours prior to arrival; when vessels have direct contact with station "OAS", a pre-stowage hatch list in long tons must be radioed to Agent, giving tonnage per hatch and loading sequence. The coast radio station "OAS" located in San Juan Bay should be contacted as soon as vessel is within range. Berthing instructions and other messages from Agent at San Nicolas will be transmitted via this station. Radio contact must be made 48 hours prior to arrival, specially on week-ends and holidays.

BREAKWATER: A 2,410 ft. long breakwater has been built in order to reduce the effects of the swell alongside the pier. The breakwater is at the West side of the pier 875 yards of distance on the South end, and does not run parallel to the pier, but at N. 36° 35′ 28″ E. angle. The North end of the breakwater is 1,430 ft. from the North end of the dolphin, but the perpendicular distance from the pier to the closest point of the breakwater is only 1,090 ft.

At the North end of the breakwater there is a lighthouse with the following characteristics: 1 green flash light, visibility 4 miles.

BUOYS: At the East side of the pier 1 small buoy with a white flash every 4 seconds is located at half a mile True bearing 045° from head of Hierro Peru pier marking 60 ft. line depth.

ANCHORAGE: The anchorage recommended for vessels waiting for berth is in inner portion of the bay, East of meridian through San Nicolas Point in depths of 15 to 20 fathoms. When anchoring, it is essential to leave sufficient sea room, about 0.75 miles for ships to manoeuvre in and about the berth.

Wreck of M/S *Templar* lies in position: Lat. 15° 13′ 27″ S., Long. 75° 15′ 01″ W. The obstruction lies in approximately 150 ft. of water. Clearance above the obstruction is 60 ft. Do not anchor in the vicinity of the wreck.

RADIO: Coast Radio Station "OAS" is located in port of San Juan and serves both San Juan and San Nicolas. This station listens on 500 kc/s. 1200/1400 GMT, 4345 kHz 0130–0200 GMT, 6,510 kHz 0045–0100 GMT, 8,680 kHz 0000/0045 – 0100/0115 – 1200/1230 – 1600/1630 – 2000/2100 GMT, 16,968 kHz 0115/0130 – 1330/1400 – 1630/1655. It handles traffic on 410, 425, 444, 448, 454, 468, and 480 kc/s. Antenna output is 300 w.

There is a transmitter with the following frequencies schedule:
4,365 kHz – GMT 0045; 0100; 1000; 0200.
8,680 kHz – GMT 0000/0045; 1200/1230; 1600/1630; 2000/2100
16,978 kHz – GMT 1330/1400; 1630/1700; 2100/2200 listening on 4, 8 and 16 mHz.

TUGS: 2 small tugs available at 150 h.p.
BERTHING: *Pier and Mooring Facilities:* The pier is located at the South side of the bay and is built on a North-South direction. It is constructed of steel pipe-lines with deck 1,000 ft. long and 50 ft. wide. The deck is 11 ft. 3 in. above mean low water.

At the pier head, a mooring dolphin has been constructed to make fast the stern lines of any vessel bigger than 900 ft. overall length, the diameter 50 ft. Distance from Northern end of pier to Northern end of dolphin 198 ft.

There is a wooden retractile fender around the dolphin of 7.5 ft. wide. There are 3 big bollards, 2 pelican hooks and an electric winch to make fast the stern lines. There is also a connecting bridge from the pier to the dolphin, which is 148 ft. long.

There is a fendering system on both sides of the pier consisting of wood pilings and a continuous rail of laminated lumber and rubber cylinders which keep vessels 5 ft. from the concrete pier. On the West side of the pier (ore-loading side) there are 28 mooring cleats, 12 bollards and 3 double mooring bitts. At the centre of the pier-head there is 1 bollard. On the East side of the pier there are 23 cleats, 2 bollards and 1 double mooring bitt. The loading berth on the West side of the pier has been deepened.

The original depth in the berth was 42 ft. at the shore end and 59 ft. at the seaward end. The new depth is 62 ft. all alongside the pier and up to 300 ft. Westward from the pier fender, except in the place known as anchor pocket which is located between the pier-head and the dolphin. The anchor pocket is 70 ft. deep, 250 ft. long and 300 ft. wide. When docking the 2 anchors are let go in that pocket where enough water exists to prevent any collision of the ship with her own anchors.

The East side of the pier still has the original depth.

The bottom alongside is mud and sand. The ore ship loader has a pier straddle clearance height of 14 ft. and width of 12 ft. thus restricting the size of cargo parcels placed on the pier when the gantry is positioned inshore.

Berthing and Mooring: Vessels calling at San Nicolas for the discharging of general cargo must berth on the East side of the pier with the starboard side of the ship to the pier. Such vessels use their own regular mooring lines. Only ore in slurry form is loaded at this side through 20 in. pipe-lines.

Ore vessels berth at the West side of the pier with the port side of the ship to the pier. In addition to the vessel's own regular mooring lines, heavy surge lines are compulsory for all vessels loading iron ore. Wires are not permitted as moorings to the pier except when attached to tension winches.

VERY IMPORTANT: While vessels are alongside the pier, engines must be ready for immediate use. Sufficient crew must be on deck at all times to tend mooring lines and heave in the slack as loading progresses. Failure to do so may result in a discontinuance of loading and the vessel being moved out from the berth.

Loading and Unloading: Loading is generally carried out at the rate of about 4,000 long tons p.h. If vessels stops the loading for a period over two (2) hours and there is another vessel waiting for loading turn, the vessel will be undocked and shifted to the anchorage area. The tariff for each operation of docking and undocking is US$ 0.07 per gross ton. The tariff of use of pier is US$ 0.02 per gross ton per day of 24 running hours. These are government tariffs subject to change. Vessels arriving with 50 tons of cargo or less may have a choice of barge rental while at anchor in the bay or have pier discharge subject to loading operation or other cargo vessels discharging at the pier.

Loading: Prior to commencement of loading the Master or Chief Officer will deliver to the port Agent a pre-stowage plan with the following information:

Total cargo required, calculated tonnage per hatch, sequence of loading, fuel on board, water and stores on board in long tons, and calculated draft and trim upon completion of loading.

Tonnage on board at any stage of the loading is available from the Loading Master, the Pilot on board, or at the scale house at the upper end of the pier. In order to avoid last minute delays, it is very important that a constant check be made of vessel's draft, ballast left to discharge and cargo on board during the entire loading. Any change in tonnage of cargo required must be reported to the Port Agent or Loading Master not later than when there is approximately 2,000 long tons remaining for completion of loading, and always in writing.

It is convenient to check drafts, ballast and tonnage of cargo on board each time the loading gantry shifts from one hatch to the next. While loading is actually in progress in a hatch, no loading interruptions are permitted except in case of emergency. At the termination of each pouring, a slip stating cargo loaded and draft readings, will be delivered to the Chief Officer.

In calculating the tonnage required to fully stow a hold, it should be remembered that cargo is spout trimmed only. No trimmers are available at San Nicolas.

Vessels will depart from the pier immediately upon completion of loading. The Pilot will take the vessel out from the berth. If the Master wants to anchor in San Nicolas Bay prior to proceeding to sea, he must advise the Pilot who will in turn advise suitable anchorage. The Master will advise the Pilot of the estimated time of departure in order that this may be reported to the Port Captain.

Delays of port operations, as well as delays of other vessels waiting to berth, caused by a vessel which for any reason is not prepared and able to move from the pier when so ordered, are chargeable to the vessel which causes the delay.

Clearance papers, bills of lading, statement of facts and all necessary papers for clearance of the vessel will be delivered shortly after completion of loading, outside of the pier by boat. This can be accomplished while the vessel is being moved from the berth, or at anchor, but never alongside the pier when other vessels are waiting for loading turn.

Slurry: For the new flow system a 20 in. diameter pipe-line has been installed and vessels adapted for slurry transportation can load either at the East or West side of the pier, depending on size and draft of the vessel. Hourly loading rate has not been determined so far but is expected to make over 2,000 long tons p.h.

CRANES: Nil.

MEDICAL: All medical attention may be arranged.

STEVEDORES: *Working Hours:* 0800–1200, 1300–1700, 1800–2400, 0100–0700 hrs.

TANKERS: On the West and East side piers there are 3 raisers to which 3×8 in. diameter hoses can be connected to a main pipe-line of 16 in. diameter for the discharging of bunkers C. Flanges are U.S. Standard (ASA). Location on the pier is for midship connection on vessels. Maximum pressure permissible is 125 lb. p.s.i. and maximum temperature 150° F. The length of the 16-in. pipe-line from the manifold on the pier to the storage tanks is 4,985 ft. There are 2 storage tanks of 66,995 bbls. gross capacity each and 1 storage of 251,423 bbls. gross capacity. Total capacity 385,413 bbls. The height of the tanks above MLW is 142 ft. to the bottom and 190 ft. to the top of the tanks. The intakes to the tanks are at the top.

Diesel oil discharged on the East side of the pier, using one hose to an 8-in. diameter pipe-line. Flanges are U.S. Standard (ASA) with 8 bolt holes. The length of the 8 in. pipe-line from the hose connection to the storage tanks is 3,577 ft. Maximum permissible pressure is 125 lb. p.s.i. There are 2 diesel oil storage tanks of 7,342 bbls. gross capacity each (total capacity 14,684 bbls.).

The height of the tanks above MLW sea level is 145 ft. to the bottom of the tanks and 177 ft. to the top of the tanks. Intakes to the tanks are at the top. There is no booster pump on the pipe-line.

There is a crew on the pier to sling the hoses; the vessel's crew is required to operate the winch, boom, hoist the hoses on board, and connect same to vessel's manifold.

BALLAST: Special attention is called to ballast requirements of vessels which do not need ballast in order to enter under the loading boom. Such vessels are required to carry sufficient ballast for safe handling during berthing. It is permissible to discharge clean ballast at the pier. Air draft is 39 ft.

FRESH WATER: None available.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Recommended by crewmen to prevent stowaways.

OPENING/CLOSING HATCHES: Stevedores/crew.

CARGO GEAR: Ore-loading boom extends 60 ft. from face of pier fender, and can be retracted from this position to a minimum length of 29 ft. Gantry with loading boom is mobile. Range of its mobility is 885 ft. starting at a point 110 ft. from the head of the pier. Shifting of vessels during loading is therefore not required. Height from water to underside of boom is 41 ft. Vessels must be ballasted so that height of any coaming or any other objects in the vicinity of the hatch where loading is to start will not exceed 39 ft. above waterline.

IDENTIFICATION CARDS: Required.

CONSULS: At Lima.

REPAIRS: Except in extreme emergency, repairs cannot be effected at this port.

TELEPHONES: None available.

REPATRIATION: In cases where crew changes are to take place in San Nicolas, at least 7 days advanced cable notice is required to obtain the necessary Immigration authorities permission. The advanced cable must set forth name, nationality and passport number.

HOLIDAYS: See "Ilo".

GENERAL: Official hours for port officials are from 0700 to 1100 and 1300 to 1800 hrs. Upon request, port officials will board vessels at any time day or night, Sundays and holidays included. Office hours are from 0800 to 1700 hrs. Monday to Friday, Saturday 0800 to 1200 hrs. Overtime for such service is for account of vessels.

Emergency Signals: A number of short blasts on the whistle indicates an emergency. The whistle will not be used except for emergency in accordance with Peruvian regulations.

SHORE LEAVE: Shore leave may be granted at the Master's discretion. All crew members must be issued ship's passes before proceeding ashore. These must be shown to the Immigration authorities when required. Peruvian laws and Immigration Regulations must be strictly adhered to in order to avoid unnecessary difficulties. Crew members are not permitted to travel 100 km. outside of San Nicolas. – San Juan port areas without written authorisation or pass from the Master approved by Immigration authorities.

REGULATIONS: Cargo holds must be properly cleaned. In this respect special care must be taken where vessels prior to their arrival at San Nicolas have carried the following cargoes: Gypsum, Phosphate, Pyrite, Coal, Sulphur, Silica, Aluminium, Sand, Gravel, or Quartz, or any other ore containing Arsenic, Phosphorus, Sulphur, Silica, Aluminium, or Copper. Prior to commencement of loading, cargo holds will be inspected by a representative of the Shippers. It is recommended that the Master or a ship's officer accompany the cargo hold inspector during the inspection.

AGENT: Agentes Navieros San Nicolas, S.A. P.O. Box 1229 Lima. Cables: "Agnav Sannicolas".

SUPE: 10.48 S. 77.45 W.

Supe is about 84 miles North of Callao. Cargo operations are undertaken in an open unprotected roadstead. The main activities at the port are the loading of fishmeal and discharging of fertilisers, cellulose and chemical products.

PILOTAGE: Not available.

ANCHORAGE: Vessels anchor in the open roads.

RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 8 tugs available, 1 of 65 h.p., 2 of 85 h.p., 4 of 134 h.p., and 1 of 165 h.p.

BERTHING: There is a pier for mooring barges length 331.5 m.

LIGHTERS: 32 (14 of wood and 18 of steel) for dry cargo only. The capacity of the lighters varies from 50 to 100 tons. Total capacity being 2,100 tons.

CRANES: 3×9 tons and 1×11 tons.

STEVEDORES: See "Pimentel" for working hours and overtime rates.

5 gangs of 9 men available.

MEDICAL: There is a hospital at Barranca.

TANKERS: *Submarine Pipe-line:* One line 10 in. diameter for dirty products and one line 8 in. diameter for clean products. Depth of water 48 ft. At Paramonga there is a 10 in. line, depth 36 ft.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Swell Period:* June/August.

AGENT: See "Callao".

TALARA: 04.35 S. 81.17 W.

DOCUMENTS, and all general information, refer to "Callao".

PILOTAGE: Compulsory. In the vicinity of Talara there are several off-shore oil drilling platforms and near the entrance to the port there is a shallow of 24 ft.

ANCHORAGE:

Summer	04° 34′ 09″ S.	81° 17′ 36″ W.	9.25 Fathoms
Winter	04° 34′ 12″ S.	81° 17′ 29″ W.	10 Fathoms
3rd Place	04° 34′ 03″ S.	81° 17′ 42″ W.	6-10 Fathoms

RADIO: Arrival Notice should be sent at least 24 hours before arrival to Captain of the Port and Agent via the government radio station OAH. Station on 500kc/s. from 0800 to 2400 hrs.

TUGS: 1×13.5 h.p.

BERTHING: At Talara there are two berths for loading fuel and water; one is a regular quay, the other a petroleum berth in which vessels lie, moored to dolphins alongside hose platform.

Quay length 385 ft., depth alongside 18 ft. to 34 ft.

Petroleum berth, length 585 ft., depth alongside 34 ft.

Talara is mainly a bunkering port as it is the main port for the Northern Peru Oilfields. The little general cargo discharged is done at the quay; bunkering being done at the quay and at the dolphin berths.

Larger vessels load/discharge into lighters at anchorage. Seven lighters are available, total capacity 1,400 tons.

CRANES: 3×5 tons, 1×31 tons and 1×22.5 tons.

TANKERS: See "Berthing".

Submarine Pipe-lines: 12-in. diameter. Vessels with a max. draft of 36 ft. can moor to the pipe-line.

STEVEDORES: It is possible to work 24 hours a day with interruptions at meal hours. Three gangs of 16 men each available. Overtime only charged for Sundays and holidays at 50%.

FRESH WATER: Available alongside berths.

FUEL: Available alongside berths. Bunker "C" 3,500 seconds, Petroperu No. 5 (Intermediate 4) 400 seconds, Diesel 2 (marine diesel).

MEDICAL: A private clinic is available.

CONSULS: Panama and Nicaragua.

REPAIRS: Minor repair facilities.

GENERAL: Smoking is prohibited on deck, at the piers and near the refinery installation.

AGENT: See "Callao".

Philippines

GENERAL:

DOCUMENTS: *To be submitted in all Government & Private ports:*
1 copy of Quarantine Pratique.
6 copies of the Inward Cargo Manifest for all cargoes to be discharged in the Port.
2 copies of Cargo Storage Plan or Hatch List.
3 copies of Store List.
3 copies of Passenger List.
4 copies of the Crew List.
4 copies of the Crew Declaration List.
3 copies of Bonded Store List.
3 copies of Firearms and Ammunition Inventories.
3 copies of List of Drugs and Narcotics.

Original copies of all through cargo manifest destined to other ports to be deposited with the Customs Inspector on board and to be returned to the Master prior to the departure of the vessel.

Clearance from the last port.

SHORE LEAVE: Nationals of countries with whom the Philippines maintains diplomatic relations are allowed ashore after securing a pass from the Immigration Officer in the Port.

REGULATIONS: We quote below pertinent sections of PPA Administrative Order No. 13–77 regarding PPA General Port Regulations on Arrivals/Departures of Vessels and Berthing Regulations:

Article II – Arrivals and Departures

Section 4. *Notice of Arrival* – The Owner or Agent of every vessel other than a vessel of 100 g.r.t. or less, intending to call at a port shall, within the time specified in Section 29 of these Regulations, prior to the ETA, give notice in writing to the Authority of its arrival, and make application for a berth if it is intended to berth at the wharf, pier, or anchorage within the Port, Port District or harbour limits.

Section 5. *Particulars to be furnished* – The notice of arrival and the Application for a Berth shall be a form prescribed by the Authority and shall contain full particulars regarding:
(a) Name of vessel and its flag.
(b) The Gross Registered Tonnage (g.r.t.) and Net Registered Tonnage (n.r.t.).
(c) Draft, LOA, and beam.
(d) Names of the Owner, Master, ship's Agent in the port of call.
(e) ETA and ETD of vessel.
(f) Tonnage of cargo to be discharged and loaded.
(g) Dangerous Cargo (Whether to be discharged or not).
(h) Number of passengers, disembarking and embarking.
(i) Any other pertinent information relating to the working (e.g. heavy lifts) or safety of the vessel in the port.

Section 6. *Hoisting of National Colours* – The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted its national colours and signal letters, if any. The national colours shall continue to be exhibited while the vessel remains in port.

Section 7. *Immigration and Quarantine Signals* –
(a) The Master of every vessel arriving from a foreign port shall exhibit the Customs, Immigration and Quarantine signals as prescribed by those government agencies. Such signals shall remain hoisted until the proper officer has given the permission to lower those signals.
(b) No vessel other than an authorised vessel shall approach within 200 m. to a vessel which is exhibiting the Immigration, Health, or Customs signals. An authorised vessel shall mean an Immigration, Health, Customs, Pilot Launch, or Philippine Coast Guard (PCG) vessel.
(c) No person other than a Pilot or authorised government officer(s) may board or disembark from any vessel coming from a foreign port until the vessel is cleared by the Immigration, Quarantine, Customs and PCG officers and the respective signals have been lowered.

Section 8. *Securing of Vessel before Discharge/Loading* – Every vessel entering a port shall be anchored or properly secured to a wharf, pier, or buoy before commencing the loading or discharging of cargo, and/or the embarkation or disembarkation of passengers.

Section 9. *Port Clearance* – No vessel shall leave a port unless in possession of a valid PPA Port Clearance issued by, or on behalf of, the Authority, in addition to the requirements of other government agencies and the final clearance issued by the PCG.

Article IV – Berthing

Section 29. *Berthing Regulations* –
(a) The allocation of a berth belonging to, or operated by, the Authority shall be at the Authority's discretion.
(b) A vessel shall be considered for berthing allocation only after the Agent of said vessel has filed an application for berth.
(c) All applications for berthing at pier/wharf/anchorage shall be submitted 24 hours before arrival for vessels on scheduled runs and 36 hours for tramping vessels (without regular schedules). In either case application should be filed within sufficient allowable time.
(d) All applications received after berthing meeting shall be deliberated upon the following day before the actual arrival of the vessel.
(e) No vessel shall be berthed or unberthed alongside a wharf or pier belonging to, or operated by, the Authority without its permission or contrary to its directions, nor shall any vessel occupy a berth other than the berth allocated to said vessel.
(f) First-come-first-served basis shall be the general rule in determining berthing priorities of vessels, subject to the exceptions hereunder provided. Vessel's arrival will mean the time a vessel drops anchor at the Anchorage Area when there is no available area or the time a vessel reaches the Port's Boarding Area when a berth is available.
(g) When the available berthing space is inadequate for berthing a larger vessel having the priority to berth, the smaller vessel next in priority which can be accommodated shall be allowed to berth on condition that should additional space be made available such that the larger vessel can be accommodated, the smaller vessel shall be moved to the anchorage to allow the larger vessel to berth.
(h) The Pilot manoeuvring a vessel to berth shall be advised by the Authority as to the position or berth which the vessel will occupy and the vessel shall comply with the directions or instructions therefor of the Authority and/or the Pilot.
(i) When a vessel scheduled to berth encounters some mechanical troubles thereby restraining said vessel from docking, an allowance of one (1) hour shall be given for repairs. If after the lapse of this grace period, said vessel is still inoperative, the priority to berth shall be passed on to the vessel having the next priority to berth.
(j) Vessels with berthing priority but scheduled to depart the following day shall be allowed to berth to allow passengers to disembark. Provided, however, that said vessel shall pull-out from berth to give way to passenger vessel scheduled to depart on the same day.
(k) Any vessel intending to berth solely for the purpose of loading fresh water, bunkering or victualling, before such vessel will be able to depart for another port, shall be given priority over other vessels, provided that such stay shall not exceed the time fixed by the Authority.
(l) Government-owned vessels on official business, vessels of foreign government not engaged in foreign trade, vessels under stress, and vessels carrying perishable articles or goods shall be given berthing priority over other vessels.
(m) Whenever practicable, passenger liner or tourist vessel shall, subject to the discretion of the Port Manager/OIC, also be given priority of a limited number of hours stay at berth over purely cargo vessel.
(n) Berthing priority of any vessel shall not be waived in favour of another vessel.
(o) Vessels waiting for cargoes shall be moved to anchorage to allow the next vessel to berth. However, said vessel shall be allowed to berth again, provided that cargoes for loading are ready, unless another vessel is allowed to take the berth temporarily by the Authority.
(p) Domestic vessels may be allowed by the Authority to dock at berths designated for foreign vessels if there are no other vessels waiting to dock at such berths.
(q) Shut-down time caused by heavy rains and other major calamities or accidents which will stop work on a vessel shall be excluded from the time limitation prescribed herein. However, breakdown of lifting gear and also loading of fresh water, bunkering and victualling which should be done simultaneously with cargo handling operations shall not be considered as reason for time extension.

ANTIMONAN: 14.00 N. 121.55 E. (See Plan Book)

SHIPMASTER'S REPORT: 1976.

Berth in position 14° 00′ 30″ N., 121° 55′ 30″ E. Vessel required to be ballasted to one third deadweight. Tidal range 6 ft. Nature of bottom at berth, mud and sand. Density 1025. Anchorage 0.5 mile S.E. of jetty.

Terminal Information: Ship's hoses used to rail only. Length of shoreline, 3,000 ft. diameter 8 in. Products handled at the berth, coconut oil and pellets of copra.

Port Information: Pilotage compulsory. Notice of 24 hrs. and 12 hrs. required. Pilot boards from a small catamaran flying the pilot flag. Boarding position 2 miles S.W. of the port. Vessel is able to enter or leave at any stage of the tide. Vessel cannot enter after dark and it is not advisable to leave after dark as some of the piles on the sea bed near the jetty are broken. Also there are no navigation lights in the bay and many vessels are fishing. Max. LOA 650 ft. Max. beam 100 ft. Max. draft 44 ft. No tugs available. Radio station used, Manila, though messages delayed in receipt at Antimonan.

Facilities available. Fresh water in small quantities for cash. Fresh provisions, groceries and meats in small amounts, doctor and hospital.

No repair facilities, laundry, fuel or slop facilities.

Improvements: The face of the jetty is being piled and breasting dolphins created. Completion expected by mid 1977.

At the present time a barge is inserted between the ship and jetty as the piling is broken.

APARRI (Including Port Irene, San Vicente, Claveria and Divilacan): 18.22 N. 121.38 E. (See Plan Book)

PORT LIMITS: Quarantine anchorage or loading point.

DOCUMENTS: *Before the vessel's arrival:*
Submit/transmit to Philippine Ports Authority (PPA-PMU) Aparri, the vessel's Notice of Arrival, at least 48 hours before ETA for foreign vessels and 24 hours before ETA of domestic vessels.

Upon vessel's arrival:
Submit to PPA-PMU-Aparri a copy of the following documents:
Inward Foreign Manifest (for foreign vessels); Coasting Manifest (for domestic vessels)
Passenger Manifest
Crew List
Stowage Plan/Hatch List
Transit Cargo/Manifest (if any)
Oath of Master
Vessel's Roll Book – to be temporarily filed
Vessel's Information Sheet – to be accomplished

Before Vessel's departure:
Submit to PPA-PMU-Aparri a copy of the following documents:
Outward Foreign Manifest (for foreign vessels); Coasting Manifest (for domestic vessels)
Passenger Manifest
Transit Cargo Manifest (if any)
Oath of Master

Entrance and clearance formalities in the traditional sense of the terms of foreign and domestic vessels shall remain with the Bureau of Customs until Port Management Unit's own clearance is duly stamped in the Manifest and after all port charges, fees, dues and other charges had already been paid.

Payment of charges leviable against the vessel and cargo shall be made either in cash, Manager's or Cashier's Check to the Port Management Unit.

Notice must be transmitted to Port Management Unit Office of Aparri when Export Entry is processed and Wharfage fee is paid to the Philippine Ports Authority – Manila.

PILOTAGE: ETA to be sent to Aparri Pilotage Station, Aparri, Cagayan.

Pilot Boat is a motorised launch.

ANCHORAGES:

Port of Aparri: Boundaries – Lat. 18° 22′ 39″ N., Long. 121° 35′ 33″ E. Depth – 11 fathoms.

Port Irene: Boundaries – The portion between Nulton Pt and Batulinao Pt. This bay known as Casambalangan. Depth – 12 m.

San Vicente Port: Boundaries – Lat. 18° 30′ 43″ N. Long. 122° 08′ 26″ E. Depth – 15 fathoms.

Sub-port, Claveria: Boundaries – Between Centenela and Lacaylacay Pt. Depth – 15 fathoms.

Port of Divilacan: Depth – 11 fathoms.

RESTRICTIONS: Enter channel at daytime only.

RADIO: RCPI. TELEFAST. PT & T. TELECOM. All in Aparri, Cagayan.

VHF: RCPI. TELEFAST. PT & T. TELECOM. All in Aparri, Cagayan.

RADAR: Pagasa Weather Bureau Radar, located in Bukig, Aparri, Cagayan.

TUGS: Available at Claveria, Aparri and Port Irene.

BERTHING:

Port of Aparri: Anchorage area. Ship's-side loading and ship's own gear. Cargoes handled at Shipper's log pond.

Port Irene: One available berth. Ship to pier with ship's derricks. Cargoes to be handled at a specified reclaimed area.

San Vicente: Anchorage area.

Sub-port, Claveria: Anchorage area. Ship's-side loading and ship's own derricks. Cargoes handled at Shipper's warehouse log pond.

Port of Divilacan: Anchorage area. Ship's-side loading and ship's own gear. Cargoes handled at Shippers log pond.

CRANES: Truck mounted cranes.

BULK CARGO FACILITIES: None.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: No bridges.

STEVEDORES: North Luzon Stevedoring and Lighterage Service, Aparri, Cagayan.

MEDICAL: Aparri Hospital.

TANKERS: River stream-draft 16 ft. Discharge lines are through depot discharging pipe-lines Aparri, Cagayan.

DENSITY:
Port of Aparri – 30%.
Port Irene: Salt.
San Vicente Port: 30%
Sub-port, Claveria: 30%
Port of Divilacan: 30%

FRESH WATER: None.

FUEL: Diesel, gasoline and kerosene.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: None.

DRY DOCKS: None.

SURVEYORS: None.

GANGWAY/DECK WATCHMAN: Available from Stevedore in Aparri.

HATCHES: Normally carried out by crew and stevedore.

CARGO GEAR: Cranes.

REPATRIATION: With permission of Bureau of Immigration, Aparri, Cagayan.

AIRPORT: Flights Monday, Wednesday and Friday.

TIME: GMT + 8 hrs.

HOLIDAYS: Philippines Ports Authority, operations personnel served Special and legal holidays.

POLICE/AMBULANCE/FIRE: No telephone. Aparri Integrated National Police Station, Aparri, Cagayan. Aparri Emergency Hospital, Aparri, Cagayan. Aparri Fire Department, Aparri, Cagayan.

TELEPHONES: None.

SHORE LEAVE: Request permission from the Bureau of Customs.

SERVICES: None.

IDENTIFICATION CARDS: Issued by the Bureau of Customs and Philippine Ports Authority.

REGULATIONS: See "General" before first port.

DELAYS: Weather conditions.

AUTHORITY: The Collector of Customs, Bureau of Customs, Aparri, Cagayan.

BATAAN, Limay: 14.30 N. 120.38 E.

See "General" before first port.

PILOTAGE: Pilotage is compulsory, pilots assigned by the Manila Pilots Association. Pilot boards vessel just off the berth.

ANCHORAGE: There is a good anchorage with depth of 9.1 m.–11.3 m.

RESTRICTIONS: Approaches are open deep water. Vessels may berth and unberth at any hour and any stage of the tide. Keel clearance of 10 ft. required.

MAX. SIZE: LOA 1,000 ft. Max. draft 50 ft.

RADIO: Manila Radio. At the berth, shore communication with vocaline JRC 475 transceivers on 465 Mc/s.

HEALTH: Port health officials board with the Pilot. Radio request for free pratique can be made prior arrival.

TUGS: Available.

BERTHING: *Crude berth:* Conventional buoy mooring, tankers moor to eight buoys, in depth of 60 ft. Hoses may be connected on either side. 4×12-inch hoses for crude oil discharge.

Products Pier: Inner berth depth 13 ft. Outer berth depth 32 ft. Can accommodate vessel up to 530 ft. length. No slop discharge facilities available.

Private Piers

	Length (m.)	Width (m.)	Depth (m.)
Bataan Refining Corp.	343.20	15.90	9.90 to 30.00
Planters Products	317.99	n.a.	14.60
LPG Pier	24.60	3.00	5.40

DENSITY: 1025.

MEDICAL: Doctor and hospital facilities available. Advance notice required of any medical attention needed.

FRESH WATER: Not available at berth. Can be supplied by barge.

FUEL: Bunkers, fuel and diesel, obtainable from berth, advance notice required.

REPAIRS: No facilities available.

CERTIFICATES: Those required are.
Certificate of Registration.
Certificate to Operate.
Certificates of Officers and Engineers (Licenses).
Officers and Crew-Seaman's book.

CUSTOMS ALLOWANCE: 200 cigarettes for each crew member, and one bottle of liquor for each crew member.

IDENTIFICATION CARDS: Essential.

REPATRIATION: Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship Agent and the Foreign Embassy concerned.

TIME: Local Civil Time is 8 hours ahead of GMT. This time reckoning is constant throughout the year.

HOLIDAYS: New Year's Day (1st January); Bataan Day (9th April); Holy Thursday (variable); Good Friday (variable); Labour Day (1st May); Independence Day (12th June); Republic Day (4th July); All Saints' Day (1st November); National Heroes Day (30th November); Christmas Day (25th December); Rizal Day (30th December). When any holiday falls on a Sunday, the following day (Monday) is by law considered a public legal holiday. As a general rule, employees of the government in the Philippines do not work on Saturdays. Cargo work on board vessels on these holidays can be arranged.

GENERAL: Customs Inspector and two guards accommodated on board during vessels stay.

AUTHORITY: Bureau of Customs.

BATANGAS, Luzon (including Tabangao): 13.45 N. 121.03 E.

See "General" before first port.

PORT LIMITS: Batangas Harbour embraces all waters of Batangas Bay extending seaward up to an imaginary line connecting Cazador Point and Matuco Point.

DOCUMENTS: Upon arrival, the following papers should be forwarded to the authorities:
2 Crew lists (visaed).
3 List of Stores, Deck, Engine, Stewards Dept.
3 List of Stores, Firearms, Medicine and Narcotics.
6 Personal Effects Declaration.
6 Inward Manifest.
8 Ordinary Crew List.
Clearance from last port of call

PILOTAGE: Pilotage for shifting from quarantine anchorage, docking and undocking compulsory for all vessels engaged in foreign trade. The vessel is met by the harbour pilot approximately 2 miles South of the wharf. Pilotage for entering the Batangas harbour and anchoring in the quarantine anchorage is optional but pilotage for shifting therefrom or changing in the stream is compulsory for vessel engaged in foreign trade. At least 48 hours before ships arrival, advise ship's Agents of estimated time of arrival (ETA).

Visual Signals, "I need a Pilot" – The single hoist of the International Code flag "G".

Sound Signals – "I need a Pilot" – the International Morse Code "G" or 2 prolonged blast, followed by 1 short blast of the ship's siren.

Pilot Launch: 25 GRT white with a black "P" at both sides of bow and with International Code Flag "H" hoisted. At night time, all around white light on top of a red light in a vertical line, with green and red sidelights.

APPROACHES: "Suggested Approach" From the South between Matuco Point and Malajibomanok Islands, with an opening of 3.5 miles. White flashing beacon on Malajibomanok Island duration 0.3 seconds every 10 seconds visible for 8 miles in clear weather. Islands and point can be approached within 0.5 mile.

Landmarks and Coastal Lights: Government pier at Bo. Sta. Clara may be approached safely from either direction paralleling its face. Batangas church dome, Bauan church bell tower, refinery stacks and columns and wharves are good landmarks. Batangas lighthouse is Gp. F. (3) green every 5 seconds.

ANCHORAGE: All vessels entering Batangas harbour shall show their colours and signal letters shall be kept flying until the vessel is boarded by the proper officials within two (2) miles before arriving at the designated quarantine anchorage.

1. 13° 45′ 06″ N. 121° 02′ E. Quarantine
2. 13° 45′ 13″ N. 121° 02′ 14″ E. for vessels less than 1,000 g.r.t.
3. 13° 45′ 06″ N. 121° 02′ E. for vessels over 1,000 g.r.t.
4. 13° 45′ 30″ N. 121° 01′ 55″ E. for vessels over 3,000 g.r.t.
5. 13° 45′ 30″ N. 121° 01′ 42″ E.
6. 13° 46′ N. 121° 01′ 15″ E. for Caltex wharf
7. 13° 43′ 35″ N. 121° 02′ 50″ E. for Shell wharf
8. 14° 42′ 54″ N. 121° 03′ 06″ E. for Pacific flour mills pier
9. 14° 46′ 18″ N. 120° 58′ 15″ E. for Batangas Bay Terminals, inc. pier.

MAX. SIZE: See "Berthing and "Tankers".

TUGS: Tug service is not furnished by the two oil refineries. The use of a tug for berthing and unberthing is required. Although a tug is normally available at Batangas it may be necessary to dispatch a tug from Manila. Accordingly, it is important for Masters of vessels to provide at least 48 hours advance notice of ETA to ensure the availability of the tug boat.

BERTHING: Berthing may be done any time during the day or at night and Masters should exercise their own judgement in this respect. Vessels moor either port or starboard side to, depending on prevailing conditions.

Batangas Govt. pier:

	Length (m.)	*Width (m.)*	*Depth (m.)*
Pier I	127.5	15	9.00
Pier II	105.0	15	7.50 wharf
	48.0	12	
Pier III	84.0	15	2.67

Bauan and Mainaga pier:

Bauan: Latitude: 13° 46′ 48″ N.
Longitude: 121° 04′ 06″ E.
Mainaga: Latitude: 13° 35′ 48″ N.
Longitude: 120° 57′ 12″ E.

Alternative loading or discharging ports, but only in cases when there is congestion at the government piers at the Port of Batangas.

Pacific Flour Mill: Location: The area contained from the Southernmost pile of the Shell Refinery to the area West of Little Tabangao River extending 1 mile Westward.

Max. Size: LOA 492 ft., draft 45 ft.

Pier: Length 93 m. with 142.5 m. causeway, width 7.5 m., depth 14 m.

Special Regulations:

(A) That a navigational and mooring area of 0.5 mile from the Northernmost and Southernmost mooring dolphins of the PFM pier be free from fish traps and other fishing devices.

(B) That a freeway from incoming and outgoing vessels from the PFM pier be kept free from all fish traps of any forms, and/or any other fishing devices that may obstruct navigation for a distance of 0.5 mile North and South of the PFM pierhead outside of the 50 ft. depth contour approach to the pier.

Batangas Bay Terminal, Inc: Pier facilities: 3 breasting dolphins 80 m. apart; 2 fender piles (wooden) and 2 mooring dolphins. Causeway 290 m. long.

Max. Size: LOA – 700 ft. Draft – 39 ft.

Location: The Batangas Bay Terminal, Inc. located at 13° 47′ 00″ N., and 120° 59′ 02″ E. It is in Bo. Bolo, Bauan, Batangas, the total area (shoreland) is 5.5 hectares and 18 hectares (foreshore) land.

Special Regulations:

(A) That the area contained between the S.W. site of the BBTI for a distance of 1 mile from shoreline North and South be entirely free permanently from all forms of fishing devices.

(B) That a distance of 100 yards around the pier be entirely free from all forms of fish traps, fish corrals, fish weirs, etc. and it be "Off Limits" to all unauthorised persons, including fishermen and those travelling by bancas underneath the said pier.

Luzon Stevedoring Corporation (Sta. Rita pier):

Max. Size: LOA – 340 ft. Draft – 14 ft. Pier: Length – 97 m. Width – 4.87 m. Depth – 18 m.

Luzon Stevedoring Corporation (Energy Base):

Max. Size: LOA – 426 ft. Draft – 25 ft.

All vessels proceeding to Batangas should radio either Caltex or Shell, whichever is their destination, their estimated time arrival at Batangas as early as possible, but not less than 96 hours before arrival, amending this ETA subsequently if it varies more than 2 hours from the original estimate in order to arrange towing gangs with the Luzon Stevedoring Corporation.

Vessels Loading Sugar: See "Iloilo – Shipmaster's Report".

STEVEDORES: Stevedoring is usually handled by Luzon Stevedoring Corporation.

MEDICAL: Both refineries have small hospitals for handling emergency cases. Should any ship's personnel need prolonged hospitalisation, arrangement will have to be made to transfer the patient to Manila or to the Provincial Hospital of Batangas where suitable medical attention is available. Dental treatment can be obtained from local dentists in the town of Batangas.

TANKERS: *Shell Refinery, Tabangao*. Jetty 1; two hoses of 10 in. diameter. Jetty 2; 4 arms of 12 in. diameter. Slops acceptable at 500 t.p.h. up to limit of 3,000 tons.

Two wharves with the following dimensions:

(a) Length 336 m. Concrete	(b) Length 700 m. Concrete
Width 9 m.	Width 9 m.
Depth 15 m.	Depth 15 m.

Crude oil is delivered by tankers of up to about 75,000 d.w.t.

Caltex Refinery Wharf. The Caltex Refinery including the island wharf is located North of the government pier and at night can be distinguished by illumination lighting on its structures and red aviation warning lights at the top of the columns. A gas flame at the top of the 150 ft. flare stack is also visible several miles from shore. The Caltex wharves are adequately lighted to facilitate night berthing or unberthing operations if desired. LOA – 755 ft. Draft – 41 ft. Jetty designed for 45,000 d.w.t.

Location: Lat. 13° 48′ 24″ N. Long. 121° 01′ 00″ E.
Lat. 13° 46′ 12″ N. Long. 121° 01′ 36″ E. (service wharf)

Construction: 2 wharves with the following dimensions:

T-Head: Length – 84 m. Width – 13 m. Depth – 14 m. with 2 mooring buoys 244 m. apart parallel to the berths facing the shoreline.

Island Wharf: 2 breasting dolphins 91 m. apart. Length – 16 m. Width – 12 m. Depth – 27 m. with unloading platforms installed in between the dolphins and provided with 2×125 ton quick release hooks and 2×125 ton bollards.

Crude oil is delivered by 200,000 to 300,000 d.w.t. supertankers.

Special Regulations:

(A) That a distance of 100 yd. around each of the 2 wharves (including island wharf) be entirely free from all forms of fishing devices such as "bonbons", fish corrals, fish weirs etc., and that it be "Off Limits" to all unauthorised persons, including fishermen and those travelling by bancas within the areas.

(B) That a navigational and mooring area of 0.5 mile North and South respectively of the limits stipulated be likewise free from fish traps and other fishing devices, but with option to fishermen to fish with hooks or with bancas within the said area provided that they do not come within 100 yd. around the jetty.

(C) That a freeway incoming and outgoing vessels from the Shell Refinery piers be kept free from "bonbons" and/or any other fishing devices that may obstruct navigation for a distance of 0.5 mile North and South of the jetty head outside of the 50 m. depth contour approach to the jetty.

DENSITY: 1.026.

FRESH WATER: Fresh water is available to vessels loading, unloading or bunkering at Batangas Port. It is delivered to the vessel through hose connections. The water satisfies the physical and chemical requirements for drinking water.

FUEL: Bunkers are available from the 2 refineries. Prior advice should be given through the ship's Agent.

FIRE PRECAUTIONS: At both refineries smoking or open fires are prohibited on the wharves or on vessels alongside or within 100 yards of either wharf. Furthermore, each vessel's personnel is responsible for the safety of its own ship at all times.

CUSTOMS ALLOWANCE: Sufficient amount for crew's consumption while in port.

IDENTIFICATION CARDS: Not required in the Port of Batangas.

CONSULS: Consulates are stationed in Manila.

REPAIRS: Keppel, Philippines: (Finger Pier) Total berth of 300 m. with deep water, provides facilities for repair of vessels of up to 5,000 d.w.t.

Cranage: 1×5-ton travelling crane on floating deck; 2×37-ton crawler cranes; 1×12-ton mobile crane.

Hull shop: 80 m.×22 m. covered workshops equipped with 2 units 10-ton overhead travelling crane; 1×750 ton×6 m. long flanging press; 1×500-ton hydraulic portal press.

Machine shop: 80 m.×14 m. covered workshop equipped with 1×5-ton overhead travelling crane, 1×10 m. long×800 m. swing lathe, other lathes, milling machines, drilling machines, etc.

Electrical shop: Facilities for electrical repairs, rewinding, insulation repairs, etc., other shops are pipe and carpenter shop to give full range of services for new constructions and repairs.

DRYDOCKS: Keppel, Philippines has its floating dock with the following data of information: Max. length of vessels, 110 m.; Max. beam of vessels, 19 m.; Max. draft of docking, 5 m.

REPATRIATION: Pre-arrangement by ship's Agent and/or Master of the vessel and the Immigration Officer assigned on board the vessel.

AIRPORT: At Manila.

TIME: GMT plus 8 hours.
HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); R.P.U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th); Special holidays declared by the President of the Philippines are also included. If any other legal holiday falls on Sunday the following day is observed as a holiday. Cargo handling work can be arranged on any or all holidays with the vessel's Agent.
POLICE/AMBULANCE/FIRE: PPA Port Police: 725-2882. National Customs Police: 725-2971. Batangas City Police: 725—2125. Ambulance: 725-2890. Fire Department: 725-2470.
TELEPHONES: At present placing telephones on board foreign vessels is not available; however, telephone service is available on the jetty of both refineries.
GENERAL: Discharge of ballast: No dirty ballast may be dumped into the territorial waters of the Republic of the Philippines. The refineries have provisions for off-loading a limited amount of oil water ballast. Rat Guards: Rat Guards shall be placed on all mooring lines to the wharves and piers.
AUTHORITY: Philippine Ports Authority.

BISLIG, Mindanao: 08.14 N. 126.22 E.

See "General" before first port.
PILOTAGE: Vessel should send direct advice to the Pilot or through its Agents 48 hours prior or at the very least 24 hours before ETA by commercial telegraphy.

There is no VHF operated by the Pilot.

Pilot boat is painted black (hull) and white (bridge and mast). International Code Signals used to call Pilot.

Pilot station is located at Lat. 8° 11.4′ N., Long. 126° 21.2′ E.

Pilot boat will be located (if by prior advice/arrangement by Master requiring specific service of meeting vessel outside of entrance and conducting vessel through channel to inner harbour) at Lat. 8° 16.85′ N., Long. 126° 26.50′ E. or 340°, 2.35 miles off Sanco Pt. Lighthouse.

Pilot will always board a vessel (outside of entrance) via the Pilot's or Jacob's ladder on the leeward side of the vessel.
ANCHORAGE: While waiting for a Pilot, the recommended anchorage (at entrance) is at Lat. 8° 16.1′ N., Long. 126° 26.1′ E. on or about this position and/or within an area of 0.5 miles radius from this point.

Quarantine anchorage or inner harbour is based on the point Lat. 8° 12.9′ N., Long. 126° 22.0′ E. to within 0.25 miles radius from this point as centre, otherwise 1 mile North of BBLCI Pier's end.

Working anchorage at stream. When vessel is through with all the port formalities, she has to go to a working area for loading/unloading operations, thus:

BBLCI. Vessels will anchor at least within a 0.5 mile radius from the tip of BBLCI pier.

PICOP. Is especially preferred during N.W. monsoon at least within a 0.5 mile radius from the foot/base of PICOP breakwater.

Bislig Bay. In general is bounded by a line from *(a)* Sanco Pt. to *(b)* Mawes I. to the N.W., thence to *(c)* the town of Bislig to the S.W., thence to *(d)* the village of Mangagoy to the S.W., and back to *(a)* Sanco Pt.
MAX. SIZE: 30 ft. at PICOP Pier.
HEALTH: Any vessel can be given free pratique if upon inspection everybody is healthy, vessel is clean and all certificates of vaccination are complete. However, if there is a suspicious quarantineable disease, a probationary pratique should be issued and after 6 days, if it was found out that there was no quarantineable disease at all, free pratique will be issued.
RADIO: RCPI, Clavecella and CRC.
TUGS: Tugs normally meet vessel with Pilot at the 5 miles limit and assist Pilot in docking, using ship's lines. 5 available. 4 at 225 h.p., 1 at 112 h.p.
BERTHING: Berthing is on a first-come first served basis. During the N.E. monsoon berthing is in daylight only for precautionary measures.

BBLCI and PICOP maintain 2 piers and 1 marginal pier.

BBLCI: Pier Position 8° 11′ 51″ N., 126° 21′ 55″ W. This is an all concrete pier 800 ft. long and 30 ft. wide with berthing space of 550 ft. on each side. Max. draft 28 ft. at seaward end, 22 ft. at shore end. Both sides are protected by dolphins constructed of pile fenders and large tyres as absorbers. Largest vessel to berth at pier at present is 18,500 tons gross. Lumber, veneer, plywood and logs are loaded at this pier.

BBLCI Marginal Pier. For vessels of less than 1,000 tons gross and 10 ft. draft.

PICOP Piers:

	Length (m.)	*Width (m.)*	*Depth (m.)*
Pier I (concrete)	244	8.0	8.8
Pier II	130	17.7	9.1

There are several patches of reefs projecting N.W. of the channel from Sanco Point to the fairway leading to the PICOP Piers. The port therefore should be entered only during daylight.

January, February and March, the season of the N.E. monsoon, makes it difficult for approaching and securing ship because of strong winds and heavy seas.
CARGO HANDLING FACILITIES: Both companies have ample equipment. Fork lifts, lighters, mobile cranes max. lift 50 ton (BBLCI), and 75 ton (PICOP), sideloaders, trucks and trailers.
STEVEDORES: ETA should be advised 2 days before ship's arrival stating workable hatches and gang requirement for berthing and gang arrangement.

20 gangs available, shifts change at 0600 and 1800 hrs. when port is full. If only few ships in port change at 0600, 1500 and 2300 hrs.
MEDICAL: It is necessary for the Agent to receive advance notice if there is serious medical attendance and hospitalisation. However, less serious medical attendance does not need notification. Port of Bislig has hospital facilities with complete smallpox, cholera, El Tor and typhoid vaccine available.
DENSITY: About 1.025 with tendency to become heavier during dry season and on flood tide.
FRESH WATER: Available at East end of BBCLI Pier. The connection is 2 in., situated 100 ft. from the approach, discharge rate 20 g.p.m.
FUEL: Small quantities available. BBLCI maintain 3 tanks for Caltex.

1. Bunker oil tank	30,000 bbls.
2. Diesel oil tank	11,300 bbls.
3. Gasoline tank	5,100 bbls.

Tank trucks available to deliver oil and gasoline.
DEVELOPMENTS: More berthing facilities are on the programme for the next 3 to 5 years when the pulp and paper mill is in operation. Installation of more log-processing plants to increase shipments.
GANGWAY/DECK WATCHMEN: P1.00 per hour for at least 3 men.
OPENING/CLOSING HATCHES: Rigging of booms is done by ship's crew, while opening and closing of hatches is carried out by stevedores.
CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle liquor for each man.
IDENTIFICATION CARDS: Needed.
REPAIRS: May be made to ship's gear and equipment by arrangement with BBLCI. The company have an engine repair shop, machine shop and foundry.
AIRPORT: 5 kms. distant; daily flights.
TIME: Local Standard Time is 8 hours ahead of GMT.
HOLIDAYS: On Christmas Day; New Year's Day and Good Friday. Cargo work may be arranged.
GENERAL: Engineering supplies available from BBCLI and PICOP. Dunnage available through BBCLI. Provisions available through chandler or market 1 km. from BBCLI Pier.
SHIPMASTER'S REPORT: June 1978

Bislig Bay – East coast of the Philippines – 8° 15′ N., 126° 25′ E.

Apart from the B.A. Charts Philippine Charts 4627 and 4664 were used. (Available at Manila).

Directions: Experienced an insetting current along the coast before entering the bay. For High and Low water Bislig Bay see A.T.T. Hinatuan, No. 5057.

- (a) The tower at Sancopoint has been destroyed though the foundation (5 m. high) is still visible when not obscured by trees when entering the bay.
- (b) All buoys have disappeared.
- (c) Beacon B was blown away but beacons A & C are conspicuous.
- (d) Prominent Hill of 920 ft. in the direction of 230° was invisible because of morning mist.

Kept beacon "A" on bearing 205° till beacon "C" was 130° and the small island of Agonoy 270°. One way of keeping clear of the shallow depths near the entrance.

Altered course to 230° and steered for the Quarantine Anchorage when Agonoy was 320°.

There is one Pilot available. Pilotage is compulsory. He embarked halfway between Sanco Point and the anchorage from a prao, displaying a large H-flag.

Berthed starboard side to to the East side of the pier with starboard anchor one shackle in the water slacking away when necessary. Observed a noticeable swell on the other side of the pier.

Moored with 3 headlines and 1 spring forward. Two springs from Hatch VI leading forward and 2 lines from the fore-end of Hatch No. V, Hatch No. VI could not be accommodated alongside the wharf. Inferring not to stow any Bislig cargo in that hatch. It is possible but this hampers the despatch as cargo has to be driven by fork lift truck from the deck of Hatch VI to Hatch V.

Two small mooring boats assist in the berthing. On departure these 2 boats assisted in pushing the vessel around.

The normal Quarantine telegram, as for other countries, is not necessary for the Philippines.

Two cabins are required for Immigration and Customs.

Connection with shore: Via the offside gangway and prao. There is a curfew from midnight till 0600 hrs.

Cargo handling: The width of the wharf and the lack of fork lift trucks slowed down operations. Another factor is the presence of another discharging or loading vessel alongside the other side of the pier.

Agency: Agent from our Manila Office flew from Manila to assist the local offices.

Fruits and vegetables available.
AUTHORITY: Collector of Customs.

CAGAYAN DE ORO: 08.30 N. 124.40 E.

SHIPMASTER'S REPORT: June 1978

Anchored 4.75 cables, 337° from the lighthouse. (F.R. 58 ft.) lowered 4 shackles into the water and after dropping slacked away to 7 shackles in the water in 50 fathoms of water.

Moored portside to owing to the distribution of the cargo in hatches Nos. V and VI. The Pilot prefers to berth starboard too.

Fore and aft springs, use nylon ropes (no wires, to facilitate the handling by the boatcrews). Small tugs push vessel alongside. Anchor lowered with 1 shackle in the water, slacking away when necessary.

Cargo handling was good. Pallets were nicely stacked on the wharf. Provisions, vegetables and fruit, available.

Recommendation: Arrivals at daylight only. Consult Agents before signing papers.

CEBU, Cebu Island: 10.18 N. 123.53 E.

(See Plan Book)

See "General" before first port.

GENERAL:

Port of Cebu City: General Description:

Situated at the city frontage between Cebu and Mactan Island. 4,474 m. of quayside (including international and domestic zones).

3 finger piers at 155×32.8 m. The international zone has a length of 451 m., excluding the 2 finger piers.

3 government transit sheds on each pier with a total area of 6,264 sq.m.

Total port area is 423,245 sq.m.

Further, Cebu Harbour has 3 Port Districts as follows:

Port District of Cebu:

(a) The National Main Port.
(b) The Ludo Private Port.

Port District of Mandaue:

(a) The Mandaue Municipal Wharf.
(b) The Ouano Private Wharf.
(c) The San Miguel Corp. Private Wharf.
(d) The Fil Oil Depot Private Wharf.
(e) The Matimco Private Wharf.

Port District of Mactan:

(a) The General Milling Corp. Private Wharf.
(b) The Opon Municipal Wharf.
(c) The Mobil Oil Depot Private Wharf.
(d) The Caltex Oil Depot Private Wharf.
(e) The Shell Island Depot Private Wharf.

PORT LIMITS: The Port Limits of Cebu define as: Cebu Harbour as that portion of the Strait between Mactan Island and the Island of Cebu within the following boundaries: an imaginary line extending from Bantolinao Point, Mactan Island, due North (true) to the Island of Cebu; and an imaginary line extending from Lauis Ledge, Mactan Island, to Lipata Point, Island of Cebu.

DOCUMENTS: *For Entry:*

7 Copies of the Inward Foreign Manifest listing therein all cargoes to be discharged in the port.
4 copies of the Cargo Stowage Plan.
3 copies of the Store List.
3 copies of Bonded Store List.
3 copies of Firearms and Ammunition List.
3 copies of List of Drugs and Narcotics.
3 copies of Passenger List.
3 copies of Crew List.

The original copy of the manifest for all through cargo destined for other ports to be deposited with the Customs Inspector on board.

For clearance:

3 copies of Post Office Clearance (for mail discharged or loaded).
3 copies of Request for Clearance.
5 copies of B.C. Form 101 (Customs Inspector report on departing vessel).
5 copies of B.C. Form 98 (Clearance of Vessel to Foreign Port).
5 copies of B.C. Form 198 (Oath of Master).
3 copies of Quarantine Clearance.
1 copy of Plant and Animal Quarantine Clearance.
7 copies of B.C. Form 88 (Outward Foreign Manifest).
6 copies of B.C. Form 88–A (Statistical Supplement).
5 copies of Master's Oath covering list of officers on board.
5 copies of Crew List.

PILOTAGE: At least 48 hours before arrival, the shipmaster shall transmit to the ship's Agent in Manila through the Coastal Station, Manila Radio (DSZ, operated by the Association of International Shipping Lines), a message indicating the ship's position and the estimated time of arrival (ETA).

In turn, the ship's Agent shall pre-arrange the meeting time at the designated boat station through a telegram to the Cebu Harbour Pilots' Association.

Boat Station No. 1:

One mile off Black Buoy No. 1 in the vicinity of Bantolinao Lighthouse, Mactan Island for foreign vessels coming from the North of Cebu Harbour.

Boat Station No. 2:

One mile off Lauis Ledge, Mactan Island for foreign vessels coming from the South of Cebu Harbour.

For confirmation of arrival within the next 24 hours, the ship's Master may use Radio Marine Station "DYM" to contact the Harbour Pilots and the Port Authority, since VHF communication facilities are not available for the time being.

For possible contact with the harbour Pilots or the Port Authority of Cebu, the approaches are not covered by radar aid, nor by VHF communication, but by watchtower located at Cebu Customs Building.

Visual Signals: Request for Pilot. The single hoist of the international code flag "G".

Sound Signals: Request for Pilot. The international morse code "G" or 2 prolonged blasts, followed by 1 short blast of the ship's whistle.

Pilot Boats:

During night-time:
1. All around white light on top of a red light in a vertical line.
2. Side lights.

During daytime:

A motor launch of approximately 20 gross tons, with the single hoist of the international code flag "H".

ANCHORAGE:

(a) 1st Anchorage: In front of Pier 3 in position, Lat. 10° 17.8′ N., Long. 123° 54.90′ E. Depth MLLW=4 fathoms.

(b) 2nd Anchorage: In front of William Lines Warehouse in position, Lat. 10° 18.0′ N., Long. 123° 55.25′ E. Depth MLLW=5 fathoms.

(c) 3rd Anchorage: In front of Aboitiz Terminal in position, Lat. 10° 18.2′ N., Long. 123° 55.5′ E. Depth MLLW=6 fathoms.

South Stream:

(a) 1st Anchorage: Opposite Ludo Wharf in position, Lat. 10° 16.88′ N., Long. 123° 53.43′ E. Depth MLLW=6 fathoms.

(b) 2nd Anchorage: N.E. of Cawit Island in position, Lat. 10° 16.54′ N., Long. 123° 53.33′ E. Depth MLLW=8 fathoms.

(c) 3rd Anchorage: Lat. 10° 16.17′ N., Long. 123° 53.28′ E. Depth MLLW=6 fathoms.

(d) Explosive Anchorage: South of Lipata Point, West of Lauis Ledge.

Anchorage Instructions:

(a) Only 3 vessels of 600 ft. overall length can anchor at the anchorage with a safety margin for dragging and swinging during bad weather with 4 shackles in the water recommended for safe anchorage.

(b) For each vessel of 600 ft. overall length with 4 shackles of anchor chain in the water, approximate turning circle radius is 960 ft.

RESTRICTIONS:

1. Foreign ships are not allowed to pass the North Channel, due to the bridge between Madaue and Opon. However, ships of 80 ft. vertical height from MLW and length of 300 ft. may pass with utmost care.

2. Draft limitation of 40 ft. for Cebu Channel while port established berthing spaces vary from 10 ft. up to 30 ft.

3. Ballast, oil are prohibited to be discharged within the Cebu Harbour and Philippine waters.

MAX. SIZE: See "Berthing".

HEALTH: Pratique obtained after Quarantine personnel have boarded, mustered crew and passengers, and examined ship's health documents. Pratique automatic if vessel coming from another Philippine port.

RADIO: Globe Mackay & Radio Corp. Call letters DZM. *(Other call letters and frequencies available).*

Working frequencies: 4328 kc/s., 6492 kc/s., 8656 kc/s., 12984 kc/s.

Listening frequencies: 425 kc/s. and 500 kc/s.; 6265.5–6258.5 kc/s.; 8354–8374 kc/s.; 12531–12561 kc/s.

Master may contact Cebu Stevedoring Company through Channel 1 (156.7 Mc/s.) and Channel 2 (157.8 Mc/s.) VHF.

TUGS: The Cebu Harbour Pilots Association has available tugs of varying h.p. When additional h.p. is required, Cebu Stevedoring Co. can provide tugboat with h.p. ranging from 350 to 690 h.p.

BERTHING: Berthing may be done at any time during the day or at night and Masters should exercise their own judgment in this respect. Vessels moor either port or starboard side to, depending on prevailing conditions.

Port of Cebu: Berthing of vessels engaged in foreign trade are limited to moor only at the following berthing areas.

(a) National Main Port:

Berth Number	*Length of Berthing space (m.)*	*Draft Limitation (ft.)*
7	193	30
8	258	18
Pier 1 South side	153.65	25
Pier 1 North side	153.65	25
Pier 2 South side	155.65	25
Pier 2 North side	155.65	25

(b) Ludo Private Port: Berthing of vessels engaged in foreign trade at Ludo Private Port are moored to concrete dolphins running N.E. or S.W. of the Ludo pier. Draft limitation: 40 ft.

Port Establishment of Mandaue: Berthing of vessels engaged in foreign trade are not allowed at Mandaue. Draft limitation: 12 ft.

Port Establishment of Madan: Berthing of vessels engaged in foreign trade are allowed at General Milling Corporation Private Wharf, and Shell Island Depot Private Wharf.

Port District	Draft Limitation (ft.)
General Milling Corp. Pvt. Wharf	25
Opon Municipal Port	15
Mobil Oil Depot	25
Caltex Oil Depot	25
Shell Island Depot	30

Cebu is a principal port of entry open to both foreign and domestic trade.

The port of Cebu was taken over by the PPA in April, 1977.

Other Ports of Entry under PMU-Cebu.

I. Mactan. Another port of entry, N.E. of the Port of Cebu City. Considered as an industrial port, it has jurisdiction over all of Mactan, Shell and Olango islands. Average ship call is 145 vessels (foreign and domestic) per month.

Other ports of entry under the jurisdiction of PPA–Mactan but owned by private entities are:

General Milling Corporation – A 275 m. private marginal wharf with an average depth of 12.20 m. Foreign vessels usually carry raw wheat materials for processing at GMC mills.

Mobil Oil Philippines – 97 m. long with an average depth of 9.90 m. Has total storage capacity of 424,162 bbls. Used exclusively by tankers.

Caltex – Shell – 156.34 m. long with total storage capacity of 273.750 bbls.

II. Tagbilaran. Situated at the S.W. portion of the island-province of Bohol, the Tagbilaran Port has a total area of about 10,393.48 sq.m. Average depth is 3.28 m.

Pilotage is compulsory which is handled by the Tagbilaran Harbour Pilots Association.

Philippine Sinter Corporation (PSC) Private Port: Situated in Garcia Hernandez, S.E. of Bohol and is 53 km. from Tagbilaran City.

III. Other private ports which also serve as Ports of Entry.

Atlas Consolidated Mining & Development Corporation (ACMDC). Under the jurisdiction of the PPA Subport of Toledo, this private port caters to ocean-going vessels which unload imported machinery and equipment, anhydrous ammonia, sulphuric acid among others. While those exported are copper concentrates and pyrite cinders.

Durano Private Port in Danao, Cebu.

APO Cement Corporation Private Port in Tina-an, Naga, Cebu.

BRIDGES: The Opon-Mandaue bridge crossing the North channel is completed and open to traffic. According to Cebu Pilots Association, clearance is 76 ft. at HW and 80 ft. at LW.

STEVEDORES: Ordered by Agents, no ETA to stevedores necessary from Master.

Cranes, forklifts, trucks, tugs, barges and lighters are used for cargo handling and are mostly owned by private contractors.

MEDICAL: No advance notice to Agents needed. Hospital facilities available anytime.

TANKERS: See "Berthing".

FRESH WATER: Most berths supply by shore installation, otherwise by barge or trucks.

FUEL: Fuel oil can be obtained by arrangement with the different oil installation on Mactan Island.

FIRE PRECAUTIONS: Tankers discharging: smoking only allowed in saloon (officers), crew in the messroom.

DEVELOPMENTS: Reclamation project at the North side of Cebu.

GANGWAY/DECK WATCHMEN: Services of watchmen necessary subject/Master's recommendation.

OPENING/CLOSING HATCHES: Stevedores, with aid of ship's crew.

CUSTOMS ALLOWANCE: (Tobacco) 1 carton a week for each crew member. (Wine and/or Spirits) 1 bottle a week for each crew member.

IDENTIFICATION CARDS: Required by Immigration Authorities.

CONSULS: Norwegian 9–77–20; Chinese 7–45–85; American 7–31–51.

REPAIRS: Minor repairs possible.

DRY DOCK: Cebu Shipyard – max. 1,000 d.w.t. only.

REPATRIATION: Facilities available.

AIRPORT: Distance 7 miles from port and regularly served by all domestic airlines.

TIME: Local time based on the 120 East meridian. GMT plus 8 hours.

HOLIDAYS: Cargo can be arranged during holidays, which are the following: New Year (January 1st); Maundy Thursday; Good Friday; Bataan Day (April 9th); Labour Day (May 1st); Independence Day (June 12th); Republic Day (July 4th); Bonifacio Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th).

DELAYS: Berthing on North side of piers depends upon tide and current. South side of piers, vessel can dock any time.

AUTHORITY: Philippine Ports Authority.

DADIANGAS (General Santos City): 06.06 N. 125.09 E.

DOCUMENTS:

4 Crew Lists.
3 Stores Lists.
3 Crew Personal Manifests.
Last Clearance.
Ship's Register, etc.

Immigration:

1 Visaed Philippine Crew List (and 1 copy).

Port Health:

Deratisation or Exemption Certificate.
International Health Form.
1 List of Vaccination Certificates – must be valid.
1 Crew List.

Department of Agriculture:

Certificate stating vessel free from Kaphra beetle.

PILOTAGE: Pilotage compulsory. Pilot boards about 0.5 miles from the berth. Uses a white painted launch as a rule. If berth occupied, Pilot takes vessel to anchorage off the town.

ANCHORAGE: Very deep water. Vessel lowers 7 or 8 shackles on the port anchor as vessel approaches shoreline. Anchor then takes hold on reef. This is about 200 ft. from shore, when vessel has swung stern-to.

RADIO: Messages regarding ETA, etc. are sent through Manila Agent.

TUGS: Not available.

BERTHING:

Government Marginal Wharf:

Length 215 m. concrete.
Width 9 m.
Depth 23 m.

Private Piers:

	Length (m.)	Width (m.)	Depth (m.)
Dole Philippines	145	18	11.5
General Milling Corp.	38	9	12.6

REPATRIATION: Possible, but very difficult via Manila.

AIRPORT: Wharf is approximately 7 km. from airport with Monday, Wednesday, Friday and Sunday flights to Manila.

MEDICAL: Small hospital in town.

STEVEDORES: 1 company only. Ship's gear used and a loading rate of about 1,500 tons per day. Exports are: fresh fruit, canned pineapple and concentrated pineapple juice.

CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle of spirits per man.

SHORE LEAVE: Allowed.

FUEL: None available.

DEVELOPMENTS: Rehabilitation of the existing wharf and extension of 300 m. including reclamation area completed 1977.

GENERAL: 1 Customs Inspector and 2 guards to be given accommodation and meals. When a vessel is expected, the Agent usually contacts VHF Channel 16 from a vessel alongside.

AUTHORITY: Philippine Ports Authority, General Santos City.

DAVAO: 07.04 N. 125.38 E. (See Plan Book)

See "General" before first port.

PORT LIMITS: Normally referred to as the "Davao Harbour", it embraces all that portion of Davao Gulf bounded by an imaginary line drawn from Dumalag Point (7° 1.5′ N. and 125° 34.25′ E.) running East (true) to the Western shoreline of Samal Island, thence by the shoreline of Samal Island to Bassa Point (7° 12′ N. and 125° 42.25′ E.); thence by an imaginary line running straight to Gill Point (7° 15.25′ N. and 125° 50.17′ E.) and thence by the shoreline of the mainland (Mindanao Island) to Dumalag Point, the place of commencement.

DOCUMENTS: Required on entry

The Philippine Ports Authority (PPA):

2 Inward Foreign Manifest
1 Cargo Stowage Plan and Hatch List
1 Passenger List
1 Crew Declaration List

The Bureau of Customs (BOC):

7 Inward Foreign Manifest
5 Cargo Stowage Plan and Hatch List
5 Stores List
5 Bonded Stores List
5 Firearms and Ammunitions List
5 Drugs and Narcotics List
5 Passenger List
5 Crew Declaration List
Clearance from last port of call.

PILOTAGE: Pilotage is compulsory for all vessels of foreign registry of 100 gross tons and over.

The Davao Pilotage District covers all ports and harbours beginning from Malalag, Davao del Sur along the coastline Northward and turns up to Baganga Bay in Davao Oriental facing the open Pacific.

All vessels entering the Davao Harbour pass through the Northwestern part of Davao Gulf sheltered by the Western coastline of Samal Island and the Davao Mainland.

An approaching vessel is easily sighted at this part of the gulf from Sta. Ana Pier (7° 4.60′ N. and 125° 35.5′ E.) where the Pilot station is located. Pilot's boarding position is at 7° 2.0′ N. and 125° 39.0′ E., a point approximately 3 miles before the designated Anchorage Areas Nos. 1 and 2.

From the anchorage area, vessels docking/anchoring at the following ports and anchorage loading points within the harbour limits navigate through Pakiputan Strait following the designated fairway.

Public berth: Sasa Wharf.

Private berth: Legaspi Oil Co. (LEGOIL) Wharf; TEFASCO Wharf; TADECO Wharf; Hijo Plantation, Inc. (HPI) Wharf; MCP Wharf; NIDC Wharf; Shell Jetty; Mobil Jetty; Caltex Jetty.

Wharves & Piers Within Davao Pilotage District:

Names	Location	Controlling Draft	Length Overall	Approx. Heading	MLLW Elevation (sea level)	Remarks
Caltex Jetty	Pakiputan Strait	23 ft. 00 in.		030°/210°		Private owned/oil berth
Mobil Jetty	,,	32 ft. 00 in.		041°/221°		Private owned/oil berth
Legaspi Oil Wharf	,,	32 ft. 07 in.	640 ft.	042°/222°	14 ft.	Private owned/coco oil, copra & general cargo
NIDC Wharf	,,	28 ft. 00 in.	99 m.	032°/212°	10.5 ft.	Private owned/coco oil, copra & banana berth
Shell Jetty	''	34 ft. 00 in.		032°/212°		Private owned/oil berth
Sasa Wharf	South 32	24 ft. centre	515 m.	007°/187°	12 ft.	Gov't Wharf/Gen. Cargo
Sta. Ana Pier	Sta. Ana	12 ft. inner end	220 ft.	270°	10 ft.	Gov't. Pier/Gen. Cargo
BCI Conveyor Berth	Ilang	30 ft.				Private/cement berth
MCP Wharf	Ilang	S-32 ft. N-27 ft.	280 ft.	347°/167°	15 ft.	Private & Gen. Cargoes
Panabo (Tadeco Wharf)	Biawa	35 ft.	386 ft. 94 ft. (410)	050°/230°	14 ft.	Private/banana berth
Madaum (Hijo) Wharf	Hijo	31.5 ft fwd	308.3 ft.	318°	14 ft.	Private/banana berth, molasses & gen. cargo
Malalag Wharf	Malalag	17 ft.	105 ft.	N/S	8 ft.	Government Wharf
Mati Wharf	Mati	24 ft.				Government Wharf
TEFASCO						

Working Anchorages: Maco Anchorage; Mabini Anchorage; Tambongon Anchorage; Bunawan Anchorage; Tibungco Anchorage.

A total of six launches are regularly used by the Harbour Pilots distinctively painted red and white with a number preceded by "P" at their bows and fly a small Philippine flag and a red and white flag. Three Pilots are posted to attend to all pilotage needs of vessels on an 8-hour shift schedule for 24 hours. The Pilot launches are stationed at Sta. Ana Pier, Sasa Wharf and HPI Wharf.

ETA Notices: The Master of the vessel sends a radio message to the ship's Agent in Manila through the Coastal Radio Station (DSZ) Manila, operated by the Association of International Shipping Lines containing the advance shipping information as follows: Name of vessel; port of destination and discharging/loading point (public or private wharf, at anchorage or at berth); ETA; LOA; estimated draft whilst alongside (in feet); nature and tonnage of cargo for discharging; special berthing or cargo handling gear/equipment requirement.

The Ship's Agent in Manila consequently relays this shipping information at the earliest possible time to the ship's Agent at the Port of Davao either by long distance telephone, telegram or telex. Where the vessel does not have a local Agent, necessary messages are sent to the harbour Pilot and government agencies directly involved and its supercargo from Manila normally comes a day ahead of the vessel.

No VHF facility is available to facilitate ship to shore communication link.

Benefitting from the shelter provided by Samal Island and the mainland that surround in considerable proximity, Davao Harbour has constantly been calm and all vessels can take Pilots at the aforementioned boarding area throughout the year.

The following signals are recognised by all Pilots:

To ask for a Pilot by day:
- The Pilot jack hoisted at the fore;
- The international code signals or P.T.

To ask for a Pilot by night:
- The pyrotechnic light, commonly known as blue light every 15 minutes;
- A bright white light, flashed or shown at short or frequent intervals just above the bulwark for about a minute at a time;
- The international code signal P.T. by flashing lights.

ANCHORAGE: The Davao Harbour is adequately provided with convenient and safe anchorages with widely rocky bottom. These are situated at both sides of the fairway with Anchorage No. 1 fronting Samal Island towards the East and Anchorage No. 2 to the West.

Vessels anchoring nearest the area in the Southern vicinity of Sta. Ana Pier (Anchorage No. 2) should do so at a point at least 1 mile from the shoreline within a 1 mile stretch along the shoreline beginning from Sta. Ana Pier. Anchoring at Anchorage No. 1 towards the Western shoreline of Samal Island should be done from a point moving South approximately 0.50 mile from its inner limit and 1 mile from the Western coastline of Samal Island.

RESTRICTIONS: Upon entering the harbour limits, especially at night-time there are no restrictions. Agents must give prior advice to the Port authority.

MAX. SIZE: Generally, length and breadth of any vessel does not pose a problem in entering the approaches of the Port of Davao, however, berthing in individual ports varies on the ports' facilities and characteristics as listed: See table above.

HEALTH: Ships will clear for quarantine upon arrival at the Port of Davao. Quarantine officials will normally board the vessel at anchorage area 2 miles South of Sta. Ana Pier. No pratique is issued to vessels entering after calling at another port in the same country.

RADIO: All messages from vessels to Agents can be sent via Apo Communication Service – HF frequency DXF and VHF-DXF-6. VHF radio communication facilities in port operation at the port not available. Generally, the Master of the vessel sends a radio message to the ship's Agent in Manila through the coastal Radio station (DSZ) Manila, operated by the Association of International Shipping Lines and the ship's Agent in Manila consequently relays this shipping information at the earliest possible time to the ship's Agent at the Port of Davao either by long distance telephone, telegram or telex.

TUGS: The use of tug for berthing and unberthing is required. Tugs are normally available from the Davao Pilots Association and the Luzon Stevedoring Corporation (LUSTEVECO). It is important for the Masters of vessels through their Agents to provide at least 24 hours notice of ETA to ensure availability of tug boats. Pilot's boarding position: Lat. 7° 02′ 00″ N.; Long. 125° 39′ 00″ E.

BERTHING: Berthing can be done with the aid of a Harbour Pilot anytime during the day or at night. Vessels moor either port or starboard to depending on the prevailing conditions and characteristics of the individual port facilities (see "Max. Size").

CRANES: Shore cranes are available to work at Sasa Wharf or at any private or government port within the vicinity, for example:

Lusteveco	1 unit 25 tons lifting capacity
Red Ball Express	1 unit 20 tons lifting capacity
Tefasco Wharf	1 unit 20 tons lifting capacity 1 unit 60 tons lifting capacity
Lorenzo Shipping (Sta. Ana Pier)	1 unit 25 tons lifting capacity

Heavy lift floating cranes are not available.

BULK CARGO FACILITIES: Bulk cargoes can be loaded/discharged at the following wharves: Sasa Wharf, Legaspi Oil Mill Wharf, Tefasco Wharf, MCP Wharf, Malalag Wharf, and BCI Wharf.

For details of port facilities see "Max. Size" Maximum loading/discharge rates – 10 to 12 tons per gang hour.

SPECIALISED CARGO-HANDLING FACILITIES: Port facilities servicing the banana industry – (1) HPI Wharf, Madaum, Davao del Norte; (2) TADECO Wharf, Panabo, Davao del Norte; (3) MCP Wharf, Ilang, Davao City; (4) NIDC Wharf, Sasa, Davao City.

Port facilities servicing copra/by-products and other agricultural products – (1) Legaspi Oil Wharf, Sasa, Davao City; (2) NIDC Wharf, Sasa, Davao City; (3) Sasa Government Wharf, Sasa, Davao City.

Port facilities handling containers using the vessels' cranes or booms (derricks) and if requested by the Agent using shore cranes – (1) Sasa Government Wharf, Sasa, Davao City; (2) TEFASCO Wharf, Ilang, Davao City.

Berth facilities handling chemical or LPG carriers – (1) Shell Jetty, Sasa, Davao City; (2) Mobil Jetty, Sasa, Davao City; (3) Caltex Jetty, Sasa, Davao City.

STEVEDORES: Agents of all vessels entering the Port of Davao should apply for berthing/anchorage permit 24 hours before ETA. Ship master should provide details of all cargoes carried on board.

Arrastre/Stevedoring Operators servicing the following ports/berths – (1) Sasa Government Wharf: Luzon Stevedoring Corp. (Stevedoring – Foreign); Davao Veterans Arrastre and Port Services, Inc. (Arrastre-Stevedoring – Foreign); Tri-Port Services (Stevedoring – Foreign); Filipinas Port Services, Inc. (Arrastre-Stevedoring – Domestic); (2) Sta. Ana Pier: Filipinas Port Services, Inc. (Arrastre-Stevedoring – Domestic); (3) MCP Wharf: Mindanao Terminal & Brokerage Services Corp. (MINTERBRO) – (Arrastre-Stevedoring – Foreign); (4) TADECO Wharf: MINTERBRO (Arrastre-Stevedoring – Foreign); (5) HPI Wharf: MINTERBRO (Stevedoring – Foreign); Madaum Arrastre Corp. (Arrastre – Foreign); (6) TEFASCO Wharf: TEFASCO Arrastre-Stevedoring – (Foreign and Domestic); (7) LEGASPI Oil Wharf: Loblercan Arrastre-Stevedoring Services – (Foreign and Domestic).

MEDICAL: Five hospitals available.

TANKERS: Shell Jetty – 2 hoses of 6 and 10 in. in diameter; Mobil Jetty – two hoses of 8 in. in diameter; and Caltex Jetty – 2 hoses of 6 and 8 in. in diameter. These jetties can accommodate tankers with 100,000 d.w.t. Normally, all major oil companies in the Port of Davao receive their supply from Bataan and Batangas Refineries in Luzon, P.I. These companies have only depots for finished oil products ready for distribution to local dealers.

Capacities: Loading and discharging rates of finished oil products (fuel) at the minimum of 500 barrels/hour and maximum of 2,000 barrels/hour.
DENSITY: Average salinity – 1025.
FRESH WATER: Fresh water is available to all vessels entering the Port of Davao. It is delivered through truck-mounted water tanks alongside the quay or barge tankers to service vessels in the anchorage area.
FUEL: All grades are available except for bunkering at Mobil Jetty, while at Shell and Caltex Jetties all grades are also available with bunkering and other special fuel.
FIRE PRECAUTIONS: Normally, all oil companies compounds are off limits to unauthorised persons. Prior approval from the oil company management is needed before any vessel can dock at their jetties.
CONSULS:

Japanese Consulate	Tel: No. 7-37-81
Indonesian Consulate	Tel. No. 7-84-86
Chinese Consulate	Tel. No. 7-44-33

REPAIRS: Limited types of deck, all engine repairs and electrical services are available at Davao Shipyard Corporation and other machine shops in the vicinity.
DRYDOCKS: Largest 300 ft., width 30 ft., maximum 1,600 g.r.t. and 2 smaller docks.
SURVEYOR: Marine surveyor available – R. J. del Pan Mindanao Surveyors, Inc. representing Lloyds, A.B.S., N.K.K., Cargo and Marine Engineers, P&I Club, G.L. and Cargo Gear Bureau.
GANGWAY/DECK WATCHMEN: Service of watchmen is recommended. Minimum cost per watchman – Philippine P.4.50 per hour.
HATCHES: Normally, opening/closing of hatches is carried out by the stevedores.
CUSTOMS ALLOWANCES: Each crew member of foreign vessels calling at the Port of Davao is permitted to bring out supplies to be held out of bond if an article cost not more than P.10.00 (per article). Generally, sufficient amount for crew's consumption while in port.
CARGO GEAR: Ship's cargo handling equipment is usually used in loading and discharging. This gear must be in operative condition and in a state of readiness for use at a moment's notice. However, at least 24 hours before ETA, Agent's advice is needed when to use heavy lifts or shore cranes.
REPATRIATION: In order that proper arrangements can be made in case of repatriation, the Master should send message to ship's Agent 24 hours before ETA. Message should give the detailed names of crew to be repatriated and their destination. Available air/water transportation.
AIRPORT: Sasa Airport 3 km. from Sasa Government Wharf. It is served by regular airline (Philippine Air Lines); domestic flights only.
TIME: GMT plus 8 hours.
HOLIDAYS: New year's Day (Jan. 1st); Holy Thursday; Good Friday; Bataan Day (April 9th); Labour Day (May 1st); Independence Day (June 12th); Fil-American Friendship Day (July 4th); National Heroes Day (Nov. 30th); Christmas Day (Dec. 25th); Rizal Day (Dec. 30th). Special holidays declared by the President of the Philippines are also included. If any other legal holiday falls on Sunday, the following day is observed as a holiday. Cargo handling work can be easily arranged on any holiday with the shipping Agent.
POLICE/AMBULANCE/FIRE: Police Tel: No. 7-26-48; Ambulance Tel: No. 7-27-31; Fire Tel: No. 07.
SHORE LEAVE: Crew members are issued shore pass by the Bureau of Immigration Officers.
IDENTIFICATION CARD: Seaman's Book is sufficient.
SERVICES: Radio/Radar services; ship's laundries and chandling (food).
DEVELOPMENTS: Sasa Government Wharf – quay of 515 m. is being extended Northward for 405.16 m.; cementing of working area, and construction of 1 unit transit shed expected to be finished by end of 1979.
SHIPMASTER'S REPORT: September 1977.
Documents:

14 Copies	Inward Foreign Manifest
12 Copies	Crew List
8 Copies	Passenger List
8 Copies	Narcotic List
8 Copies	Personal Effects List
10 Copies	Store List
5 Copies	Vessel's General Information
8 Copies	Money List
8 Copies	List of Arms and Ammunition
8 Copies	Parcel List
1 Copy	Clearance from last port
2 Copies	Quarantine Declaration
8 Copies	Plant List
8 Copies	List of Animals

Note: Narcotic List, Money List, List of Ammunition and Arms, List of Plants and Animals may be on the same sheet.
Radio/VHF Communications:
APO Communications DXF and Marphil Radio. The Agents Maritime Company of Phil and Everett Steamship Company are equipped with VHF in their offices.
Berthing (for bananas):
1. Madaum Pier – Del Monte bananas (a new pier under construction)
2. Panabo Pier – Chiquita bananas
3. Bacnotan – Del Monte bananas
4. NIDC Pier – Dole bananas.

Berthing (for general cargo):
Max. draft North 24 ft. Centre 24 ft. and South 32 ft. max. length 555 m. A new pier for container vessel and general cargo under construction and expected to be ready in course of the next 12 months.
Medical/Hospital/Clinics: Davao Doctors' Hospital; San Pedro Hospital; Mt. Apo Hospital; Brokenshire Hospital; Davao Gen. Hospital (Government owned). All hospitals located in Davao City.
Identification Card: Not required.
Shore Leave: Curfew hour from 2400 (0000) up to 0400 hrs.
Repatriation: Expensive. Crew to be escorted by one Immigration Officer from Davao City to Manila and all expenses including overtime of Immigration Officer to be charged to Owner's account.
Holidays: New Year – Jan 1st; Bataan Day – April 19th; Labour Day – May 1st; Independence Day – June 12th; Fil-Am Day – July 4th; All Saints Day – Nov. 1st; Bonifacio Day – Nov. 30th; Christmas Day – Dec. 25th; Rizal Day – Dec. 30th.
Bunkers: Fuel, diesel and lube oils available but clearance takes a long time.
Shipchandler/Laundry: Available, prices reasonable.
Working Gangs for Painting Cleaning etc: Foreman: regular time – Peso 3.50/hour; overtime – Peso 5.25/hour. Ordinary workers: regular time – 2.90/hour; overtime – 4.35/hour.
Other charges: Meals. Foreman require 3 meals per day; ordinary require 2 meals per day. Transportation included in working hours.
Repairs of Ship's Instruments: Radar – any type; Radio – any type; Gyro – any type.
Ship Repairs: Minor.
Developments: At the Samal Island (North side) a large ship wharf is under construction.
Time: Standard time minus 8 hours on GMT (but 1977 was the first year with Summer time which commenced in March until September.)
AUTHORITY: Philippine Ports Authority, Port Management Unit (PMU), Davao City.

HONDAGUA, Luzon Island: 13.56 N. 122.14 E.

SHIPMASTER'S REPORT: 1974.
APPROACHES: B.A. Charts 3806 and 3475, neither of which are of very much assistance. There are no navigational marks by night, but the water is deep and we made a comfortable approach by Radar.
PILOTAGE: Minimum 12 hours notice required. Pilot boards at Siain, a village 10 miles West of Hondagua on the North coast of the mainland. Pilot boat is a small dug-out canoe fitted with outriggers and an outboard motor, and by day exhibits the pilot flag, and at night a single white light similar to a normal fishing canoe. Pilot shouts to attract attention when close to the vessel at night.
DOCUMENTS: Officials embark at Siain but not before 0630 hrs. due to curfew. Accommodation ladder required. All documents required as for first port of entry, excepting quarantine which is not performed twice.

10	Ships Store Lists.
8	Crew Personal Effects lists.
12	Crew Lists.
3	Health Declarations.
2	Visaed Crew Lists.
2	Plant Quarantine Lists.
2	Animal Lists.

Officials disembark again at Siain with the exception of the 3 Customs Officers, who remain on board and who require meals and accommodation.
TUGS: Not available.
BERTHING: One berth only, for grain discharge and for coastal tankers supplying fuel to the Mill. Berth lies East/West with approx. depth at L.W. East Dolphin 28 ft., Elevator about 34 ft. 6 in., and West Dolphin about 39 ft. The berth is thought not to be suitable for vessels exceeding 500 ft. L.O.A. The dolphins are of timber-pole construction, and the elevator is concrete. Arrival and departure from the berth is during daylight only. Mooring arrangement is 2 headropes to buoy, 2 breastropes to shore, spring-wire to bollard on elevator, 4 sternlines to concrete dolphin, and 1 spring-wire to bollard on elevator. An old landing-barge is used as a mooring boat, but this has only one engine on the port side and is not very manoeuvrable. A motorised dug-out canoe also assists, but is not powerful enough to pull a line very far. The elevator has two discharging suckers, but these are fixed and the vessel has to be shifted hatch to hatch. Combined capacity about 80 tons per hour which could be improved, but foundations of conveyor-belt system damaged by earthquakes.
FRESH WATER: Available at berth but not of very good quality. Ship's hoses required.
AIRPORT: None. There is a train service to Manila, about a six-hour journey.
CURFEW: Area is under Martial Law. Curfew from 2300 to 0600 hrs.

ILIGAN. Mindanao: 08.14 N. 124.14 E.

(See Plan Book)

PILOTAGE: Pilotage for docking and undocking at government and privately owned piers/wharves for foreign vessels is compulsory. For domestic vessels pilotage is necessary only when docking. The Harbour Pilot meets the vessel 1 to 2 miles NW of the pier. Vessels coming from foreign ports intending to dock at any of the private piers will first anchor at designated anchorage area for boarding formalities.

ANCHORAGES: Upon takeover by PPA in August 1977, anchorage areas were designated. Moreover, when private piers were turned over by the PPA in November 1977, some other anchorage areas were drawn to cope for the needs of foreign vessels. Anchorage areas are found at least 0.5 to 1 mile from beaches and wharves and the average depth varies from 37 m. to 56 m. The characteristics of the bottom near the beach is muddy. Beyond 0.5 mile is good holding ground of sand and gravel. In case of strong SW winds, vessels may resort to the natural protection of the mountains of Initao and Kiwalan.

RESTRICTIONS: See "Berthing".

MAX. SIZE: Max. LOA 150 m. Max. Draft 25 ft. and 15,000 d.w.t. at Pier No. 3 (For foreign-going vessels).

HEALTH: Vessels clear quarantine upon arrival from foreign port. Health Officer boards the vessel 2 miles off the pier at designated quarantine area.

TUGS: The Iligan Harbour Pilot's Association owns 2 tugs both serving the domestic and foreign vessels. The use of tug is necessary especially when docking and undocking foreign vessels on government and private piers. Additional tugs are also available if the Harbour Pilot thinks necessary. It is important that the Masters of vessels/shipping Agents notify the Harbour Pilot at least 48 hours in advance of vessels arrival to ensure the availability of tugs.

BERTHING: Berthing for domestic vessels may be done anytime of the day or night. Foreign-going vessels berth during daylight hours and undock at anytime.

	Length	*Width*	*Depth*
Pier No. 1 (Concrete)	96 m.	12 m.	4 m.
Pier No. 2 (Concrete)	96 m.	12 m.	3 m.
Pier No. 3 (Concrete)	240 m.	15 m.	6.5 m.

STEVEDORES: Domestic and foreign-going vessels proceeding to Iligan should cable their Agents or representatives as to their ETAs, at least 24 hours prior to arrival in order that the stevedoring company may assign sufficient number of gangs to the vessel. Later, if the ETA is revised, shipping Agent should immediately notify the arrastre and stevedoring firm of change. The arrastre and stevedoring firm that controls the government pier in Iligan is handled by the Iligan Merged Arrastre and Stevedoring Corporation (IMASCO).

FRESH WATER: Fresh water is available to vessels loading or unloading at Pier No. 1 and 3 which is equipped with connection direct from the City Waterworks.

FUEL: Bunkers are available provided prior notice is given through the ship's Agent.

INDENTIFICATION CARDS: Not required.

CONSULS: In Manila.

REPATRIATION: Local Immigration takes care of any repatriation or disembarkation provided advance notice and they are given names and destination of each Crew member.

AIRPORT: Baloi Airport 15 km. Cagayan de Oro Airport 110 km.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday and Good Friday (movable); Labour Day (May 1st); Independence Day (June 12th); RP-US Friendship Day (July 4th); Thanksgiving Day (September 21st); Christmas Day (December 25th); Rizal Day (December 30th); Special holidays declared by the Prime Minister of the Philippines are also included. Legal holidays which fall on Sundays are observed the following day. Cargo work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: Police Tel. 101. City Hospital Tel. 20593. Fire Dept. Tel. 103

GENERAL: It is necessary during berthing and unberthing that the ship's engines, tackle and all other gear be in an operating condition and in a state of readiness for use at the moment's notice as required.

TELEPHONES: Placing of telephones on board foreign vessels is not available at present except offices located inside the port zone.

SHIPMASTER'S REPORT: 1974

Approaches: B.A. Chart 3426. This is of not very much use as an approach chart as the scale is too small. However, the water is deep and therefore it does not matter too much. On this voyage we made an approach in darkness and solely on Radar. The only navigational light, a fixed red, being very hard to distinguish.

Pilotage: The Pilot boards about 1 mile N.W. of the piers. Pilot boat is a river-type launch about 50 ft. in length with a grey hull and a white funnel.

Anchorage: 2 cables from old-harbour piers. 7 shackles in 50 fathoms.

Radio: No VHF facilities.

Officials: Iligan is a Port of Entry. Officials board at the anchorage. Accommodation ladder required. Usual procedures take about 1 to 1 hour 30 minutes.

Documents:

20 Ship's Stores Lists.
14 Crew Personal Declarations.
3 Vaccination, and inoculation dates.
3 Ports of Call and dates for previous 3 months.

Immigration: Before leaving last foreign port for the Philippines, obtain 4 official Crew List Forms from the Philippine Consul. Complete these forms and have them visaed by the Consul who will retain 2, and return 2 to the ship. Passes are required for crew members going ashore.

Customs Allowance: 1 bottle and 200 cigarettes per person. 3 Customs officers live on board all the time, and require accommodation and meals.

Tugs: Up to 4 tugs available if required, but it is advisable to give notice of requirements well in advance, since these tugs may be engaged in towing barges elsewhere around the island.

Berthing: Quinalang Cove: 1 grain discharge berth. Depth at berth 40 ft. and ample room for a vessel of 600 ft. L.O.A. Discharge is by sucker direct to the Silo. There are 2 suckers with a combined average discharge rate of 100 t.p.h., but suckers are located in fixed positions requiring the vessel to be shifted hatch to hatch. Berth is well-fendered, with a shore gangway. Stevedores supply a good hatch-tent for working in the rain. 1 bulk-copra loading berth, 600 ft. in length and draft said to be 32 ft. 1 bulk-cement loading berth, reported to be capable of accommodating vessels of 25,000 g.r.t.

Camp Overton: Located South of Iligan, there is reported to be a steel-loading berth to accommodate vessels of 750 ft. length, and 36 ft. draft.

Fresh Water: Available at most berths.

Shore Leave: Crew members should take special care when proceeding ashore, and should not carry cameras or wear wristwatches etc. It is advisable to return aboard before darkness.

Airport: About 20 miles distant. Daily flights to Cebu and Manila.

Stores: Fresh fruit available, also good supply of seafood.

Repairs: Only very minor repairs can be undertaken.

Time: GMT plus 8 hours.

SHIPMASTER'S REPORT: September 1976.

Coconut Oil Berth: Located at "Quinalong Cove" Lat. 08.17 N. 124.15 E. Least depth of water in channel from sea to berth – 40 fathoms. Mean tidal range 5 ft. Density 1025. Nature of bottom at berth – mud. Vessels can berth in daylight only, unberthing anytime.

Anchorage: 3 cables S.W. of City Pier. Depth at L.W. 70 fathoms, cable should be "walked out".

Vessels hoses used, length of shoreline 300 m., size 12 in. No shore booster pumps used. Products handled, coconut oil and coconut products.

Pilotage: Compulsory. Pilot requires 24 hours notice and boards 1 mile N.W. of City Pier.

Max. size of vessel that can enter the port of Iligan is 100,000 d.w.t. and draft 45 ft. Keel clearance required, about 2 ft.

5 small and medium size tugs available.

Nearest consuls are in Manila.

Facilities available: Fresh water, 5 t.p.h. Fresh provisions. Laundry.

No slop tanks, surveyor, repair facilities, fuel.

Documents:

2 Visaed Crew Lists (Philippine) from previous port. If diverted at sea, a copy of the diversionary cable required.

6 Ordinary Crew Lists
6 Personnel Effects Lists
6 Store Manifests
6 Parcel Lists
6 Arms Lists
6 Mail Lists
6 Narcotics Lists
6 Animal Lists
6 Plant Lists
6 Cargo Manifests
6 Transit Manifests
6 List of Ports
6 Currency Lists

There is a cabin search by 4 Customs Officers, accompanied by 2 Ship's Officers. They collected an undeclared radio and two cameras. They did not impose any fine, as they said they had been courteously treated, and this was the vessel's first visit.

3 Customs Officers remain aboard, and have to be fed.

SHIPMASTER'S REPORT: June, 1978.

To avoid having to anchor in very deep and unsafe places organise the arrival time for daylight.

The wharf's construction has been completed though the depths alongside do not facilitate the berthing of large ships. Near the centre of the wharf is a patch of 15 ft. (see sketch).

An anchor is lowered to 1 shackle in the water and after dropping slacked away when necessary. This is to facilitate unmooring. A small tug assists. No. V and VI hatches overhung the quay.

AUTHORITY: Philippine Ports Authority.

ILOILO, Panay: 10.41 N. 122.35 E. **(See Plan Book)**

See "General" before first port.

PORT LIMITS: Also see "Anchorage" – last paragraph. Iloilo Harbour is defined as that portion of Iloilo Strait within the following boundaries: an imaginary line extending from the Northern bank of Dumangas River, Island of Panay, across Iloilo Strait to Navalas Point on the Northern coast of Guimaras Island; thence along the N.W. and West shore of Guimaras Island to Luzaran Point thence along an imaginary line extending from Luzaran Point to the South bank at the mouth of Siuaragan River in the municipality of San Joaquin, Province of Iloilo, Island of Panay. Thence along the Southern shore line of the Island of Panay to the North bank of Dumangas River, the point of commencement.

DOCUMENTS:

Bureau of Customs:

1. On Arrival:
    - 7 Inward Foreign Manifests
    - 3 Crew Lists
    - 3 Personal Effect Lists
    - 3 Store Lists
    - 3 Arms and Ammunition Lists
    - 3 Narcotics Lists
    - 3 Mail Lists
    - 3 Bonded Stores Lists
    - 3 Passenger Lists
    - 3 Storage Plan (if vessel has cargoes to be discharged)
    - 2 Bills of Lading
    - 1 Clearance from last port of call.
2. On Departure:
    - 4 Statistical Supplement (for vessels leaving directly for a foreign port).
    - 7 Outward Foreign Manifests.

Philippine Ports Authority:

1. On Arrival.
    - 2 Inward Foreign Manifests
    - 2 Passenger Lists.
2. On Departure:
    - 2 Outward Foreign Manifests.

PILOTAGE:

1. Application (notice) for pilotage services is usually made by a shipping Agent at least 24 hours before the vessel's arrival. Notice may also be tendered via a commercial telegraph office addressed to Iloilo Harbour Pilot Association, Muelle Loney St., Iloilo City. the Pilot Association does not own any VHF radio.

2. The Pilot Association owns 5 standard-designed pilot boats, with one being utilized as water taxi for vessel's crew intending to go on shore leave.

3. Request for pilotage services may be done in either of the following ways:
   (a) 2 long and 1 short blast of the vessel's whistle.
   (b) Continuous flashing of blue light during night time.
   (c) Display of the international "G" flag during daytime.

4. There are 2 Pilot stations where the Pilot may be taken aboard, namely:
   (a) Sinapsapan Point at the South entrance, 8 miles from the port.
   (b) Nabalas Point at the North entrance, 12 miles from the port.

5. With respect to the boarding and safety measures, the Pilot requires a sturdy and reliable pilot ladder.

ANCHORAGE: (proposed)

The anchorage of the Port of Iloilo is that portion of Iloilo Strait within the following boundaries: an imaginary line extending from Balabago Point, Island of Panay across Iloilo Strait up to Cabugao Point on the Northern Coast of the Island of Guimaras, thence along Northwest and West Shore of Guimaras Island to Bondulan Point; thence along Southern shore line of the island of Panay to Balabago Point, the Point of commencement.

Note: A vessel is considered "arrived" after it drops anchor at any point within the boundaries described above.

RESTRICTIONS: Generally, a vessel may enter the port from the Pilot station at any time of the day or night. However, said entrance of the vessel is restricted by the draft of the vessel and the tide at the time of entrance. At MLLW, only vessels with a maximum draft of 28 ft. may enter or depart from the port. At high water (5 ft.) vessels with a maximum draft of 33 ft. may enter or depart from the port.

MAX. SIZE: Foreign pier has a total length of 345 m., berth 2 (100 m.) has a controlling draft of 33 ft. alongside at MLLW.

HEALTH: The port has 1 Quarantine Doctor. Quarantine formalities are done while vessel is at the Quarantine Station. Notice for quarantine formalities is usually given by the shipping Agent 24 hours before the vessel's arrival.

The following documents are necessary for presentation to the Quarantine Officer on arrival.

A. On arrival:
   1. Deratting Exemption Certificate. (If expired or about to expire, the same could be renewed at the port for a period of 6 months).
   2. International Certificate of Vaccination. (If expired or about to expire, vessel crew could be vaccinated locally).
   3. Maritime Declaration of Health. (Form to accomplish available locally).

Above documents are necessary for the issuance of Free Pratique.

B. On departure:
   1. Quarantine Clearance for Outgoing Vessels. (A fee of P4.00 or approximately $0.53).

Free pratique is issued at the first port of call. It becomes automatic if the vessel intends to call at another port within the Philippines.

RADIO: Coastal Marine Radio Station:

Location: 10° 41.4′ N. 122° 32.8′ E.
Call Sign: DYV
Frequencies: 8632 kHz. 0000 GMT – 0400 GMT
0600 GMT – 0900 GMT
12948 kHz. 0900 GMT – 1130 GMT
VHF Channel 16

Also private telegraph companies with international relaying stations; Central Radio Communications, Radio Communications of the Philippines., Inc.

VHF: Vistranco has a VHF radio, but is out of order and being repaired (1978) . Frequency: Channel 1 – 156.8 megahertz, Channel 2 – 156.65 megahertz.

TUGS: Tugboats usually join vessels for docking and undocking operation. The services may be provided by the pilot's boat or tugboats of the Visayan Stevedoring & Transportation Corp. The charge is P150.00/tug during daytime and P180.00/tug during nighttime.

BERTHING: Also see "Shipmasters Report".

The port has a foreign pier near the mouth of Iloilo River. It has a length of 300 m. divided into 3 berths of 100 m. each. The maximum draft alongside the pier at MLL is 28 ft. However, a vessel may be loaded up to the draft of 31 ft. (at MLL) with the use of a mule barge.

Usually, loading and discharging are done with the use of the vessels own gear, except catch-all nets and crane for heavy lift cargoes which may be provided by the Stevedore operator.

The arrestre operator is capable of handling general and heavy lift cargoes, cargoes in bags (like sugar, fertilizers, cements, copra cake, etc.). Bulk loading may be done also by "bleeding" cargoes in bags directly into the vessel's hold.

CRANES: 1 crawler crane with 15-ton capacity owned by private arrestre. The Ministry of Public Highways has 4 heavy-lift cranes of 25 tons capacity.

BULK CARGO FACILITIES: Within the harbour limit of the port is sugar bulk-loading installation situated at Jordan, Guimaras Island. The berth is capable of accommodating a vessel with a LOA of 182 m. and a draft of 35 ft. at MLL.

Loading is done with the use of a mechanical conveyor which has a rated capacity of 400-500 metric tons per hour. The discharging gear has a maximum height of 30 ft. above HWL.

Cargo handled in this berth is exclusively sugar in bulk.

SPECIALIZED CARGO-HANDLING FACILITIES: the port is *not* specially equipped for handling containers or roll-on/roll-off traffic.

LPG facilities at Petron.

STEVEDORES: An advice of 24 hours before the vessel's ETA is required to prepare the gangs necessary to perform stevedoring services. Stevedoring services can average at the rate of 900 – 1,000 metric tons of loading/unloading per 24 hours.

MEDICAL: The port itself does not own any medical facilities. However, within the City itself are 6 modern hospitals which could be used by the vessel's sick crew. Vaccinations and innoculations may be done by the Quarantine doctor who also issues corresponding certificates for the same.

TANKERS: Bunker is handled through 6-inch pipe-lines; however, Petron load bunker through a 4-inch pipe. "White oil products" are handled through 8-inch pipes. There are 2 privately owned oil-water separators.

Types of oil available: premium, regular, automotive diesel fuel oil, kerosene, and bunker C; rate of delivery: 10–12 t.p.h.

FRESH WATER: Fresh water can be supplied by a private supplier, Springwater Marine Services, Iloilo City. Water is supplied to the vessel while at anchorage or at berth from a water barge at the rate of 15–20 M.T./hour. cost is P16.00 ($2.13) per metric ton. Water is safe and potable.

FUEL: Bunker fuel and fuel oil (of any desired viscosity) are available and can be supplied by Philippine Shell Petroleum Corp., Lapuz, Iloilo City. It can be delivered either by barge or by road tanker at the rate of 10–12 t.p.h. An advance notice of 24 hours prior to delivery is necessary.

CONSULS: British, at Hongkong and Shanghai Bank.

REPAIRS/SERVICES: The Iloilo Dock and Engineering Company offers the following major services: marine construction and repairs, conversion, machine shop, electronics' navigational equipment installation and repairs, steel fabrication, sandblasting, engineering and project consultation. Other services offered: marine salvage, stevedoring and longshoring, lighterage, towing-harbour, inter-island and ocean warehousing and in-transit handling.

Radar:

Repair of ships radar may be done by Louman & Sons Technical Service Inc. The company is capable of repairing radar, radio transmitter and receiver, fathometer and steering system. Usually contacted by the ship's Agent.

DRYDOCKS: Largest drydock at Ideco is Shipway 1: Length 587 ft., width 56 ft. depth (draft at MLLW, 10 ft. without keel blocks, capacity 2,500 L.T. there are 4 other smaller docks, and several side berths.

SURVEYORS: Local Marine Surveyor, Delpan.

WATCHMEN: Watchmen are optional, however if the Master so desires, watchmen can be hired.

HATCHES: Opening/closing of vessels hatches and securing the vessel's derricks, are usually done by the stevedores.

CARGO GEAR: Load/discharge is effected by ship's gear; as of October, 1978, there is no special cargo equipment except for heavy lift cranes.

CUSTOMS ALLOWANCES: Vessels crew are permitted an individual allowance of 1 bottle of whisky and 1 carton of cigarettes per week. However, if necessary, the Master may request the Collector of Customs through the Customs Inspector on board for a further issue within the week.

REPATRIATION: Crew changes and repatriation may be effected by the local Regional Office of the Immigration Commission with the approval of its head office in Manila.

AIRPORT: An all-weather airport situated about 7 kms. from the pier. Regular Iloilo – Manila flight is 3 times a day. Other flights Iloilo – Cebu, Iloilo – Davao.

TIME: GMT plus 8 hours.

HOLIDAYS: *Legal Holidays:* Sundays, January 1st, (New Year's Day); April 9th, (Bataan Day); May 1st, (Labour Day); June 12th, (Independence Day); July 4th, (Phil.-American Friendship Day); November 30th, (National Heroes Day); December 25th, (Christmas Day); December 30th, (Rizal Day).

Note:

1. Special Public Holiday may be issued by the Prime Minister.
2. Under Philippine Law, if a legal holiday falls on Sunday, the following day (Monday) is also a holiday.

Regular working days in the Philippines are Monday through to Friday. Holidays notwithstanding, the Master/Agent may request continuance of stevedoring work after proper notice has been made with the stevedoring company.

POLICE/AMBULANCE/FIRE: Police Tel. 7-55-21; Fire Tel. 7-30-11; 7-49-89; Ambulance Tel. 7-25-61; 7-24-41.

TELEPHONES:

PLDT (Tel Co.) can install a telephone on board a vessel at berth with the following charges:

P200.00	Deposit for the instrument, refundable upon return of the instrument.
74.41	rate/month
45.00	for services
3.00	electrician's fee
322.41	Total charges

SERVICES: See "Repairs".

SHORE LEAVE: Shore leave is granted after the issue of shore passes by the local official of the Commission on Immigration.

IDENTIFICATION CARDS: Identification card is not necessary for the issue of shore passes. Visaed crew list will suffice.

DELAYS: Occasional congestion of the port may delay vessels berthing. Bunkering may be done whether the vessel is at anchorage or at berth.

DEVELOPMENTS: The mouth of the Iloilo River is scheduled to be dredged to an average depth of 9.15 m. As of September, 1978, it has been dredged to an average depth of 6.5 m. at MLLW level. The foreign pier is likewise scheduled to be dredged to an average depth of 9.15 m. As of September, 1978, berth No. 2 at the foreign pier (100 m. long) has a controlling draft of 10 m. at MLLW level. Total completion of work expected in middle of 1979.

GENERAL: Vessel's ETA has to be relayed to Philippines Ports Authority, Iloilo at least 24 hours before arrival.

SHIPMASTER'S REPORT: 1977

There are 3 ports where bulk sugar loading facilities exist, Pulupandan, Iloilo and Batangas Bay. Ships first call at Pulupandan on Negros Island, approximate position Lat. 10° 31′ 30″ N., Long. 122° 47′ 36″ E. and load up to a draft (SW) of 29 ft. The rate of loading by using 1 trimmer is about 300–400 tonnes per hour. Pilotage is compulsory and the Pilot boards in a position (approx.) Lat. 10° 27′ 24″ N., Long. 122° 46′ 12″ E. After completion of port formalities, the vessel is berthed alongside the Bulk Sugar Installation with a stationary conveyor.

The vessel then proceeds to Iloilo for loading upto 32 ft. This vessel, which is 675 ft. in length, loaded bulk sugar in hatches 2, 4, 6, 7 and 8. It was possible to load in hatch No. 1 also. The loading is done from a fixed conveyor with 2 trimmers and the loading rate is between 400–500 tonnes per hour. Finally the vessel proceeds to Batangas Bay and after the usual formalities, goes alongside the Batangas Bay Terminals Inc. (BBTI) at Bolo – Bauan – Batangas, where there is no draft restriction. The loading rate is about 300–400 tonnes per hour. Loading is done from a fixed conveyor with one manually operated trimmer. Pilotage is compulsory and ships awaiting Pilots can anchor either at Santa Rita or Santa Clara (Batangas City) or Tabangas.

The main sugar crop is brought to Iloilo, known locally as Sugar City, because it is the main sugar exporting port, from Negros Island, where most of the sugar farms and factories are situated. The sugar for export at BBTI is brought from factories around Laguna Bay by trucks. The Stowage Factor for bulk sugar worked out to between 40–41.

AUTHORITY: Philippine Ports Authority, Iloilo City.

JOLO: (Jolo Island) 06.03 N. 121.00 E. (See Plan Book)

See "General" before first port.

DOCUMENTS: 4 copies each of Crew Lists; Passenger List; Import Cargo Manifest; Oath of Master and a copy of Vessel's Information Sheet.

PILOTAGE: Pilots are stationed at nearby Zamboanga City. Advice of ETA at least 3 days before is requested to facilitate arrangement of pilotage service.

ANCHORAGE: Anchorage areas are NW of Jolo Wharf and West of Caltex Depot.

MAX. SIZE: Main wharf; Draft 4 m. LOA: 60 m. At Caltex, Mobil and Petron Oil depot: LOA: No limit; Draft: 6 m.

HEALTH: Ships will be cleared by quarantine officers upon arrival at anchorage.

RADIO: Local Port Authority is equipped with SSB radio linking all Port Authorities nationwide. Ships may send message through Radio Communications of the Philippines, Inc. which has international connections.

BERTHING: Berthing space at main wharf is reserved for large foreign vessels; Max. permissible draft at MLLW is 4 m. (SW); Cargo handling by ship's own gear; Cargo may be worked at open storage and direct delivery only.

STEVEDORES: 24 hours advice before ETA is required. Stevedores provided by Sulu Dockhandlers and Forwarders, Inc.

MEDICAL: 2 hospitals are available.

TANKERS: The private wharf of Sulu Agro Industrial Corporation within the port limit is due for completion in late 1979. It is designed to handle Crude coco oil.

FRESH WATER: Supplied by Sulu Water Works Authority with 4 in. piping all along the main wharf.

FUEL: Supplied by Petron Philippines, Inc.

FIRE PRECAUTIONS: Dangerous cargoes are worked at assigned berthing area.

CONSULS: In Manila.

REPAIRS: Minor repairs maybe undertaken by and within the vessel itself after permission is sought and granted by the Port Authority.

GANGWAY/DECK WATCHMEN: Customs Guard and Customs Inspector are on routine and continuous guard.

HATCHES: May be opened by stevedores.

CUSTOMS ALLOWANCES: Minimum quantity for personal use permissible only on board.

TIME: GMT plus 8 hours.

AIRPORT: Jolo Airport, flights to Zamboanga only, 2 flights a day.

HOLIDAYS: Cargoes are worked on holidays.

POLICE/AMBULANCE/FIRE: Central telephone system connects port Authority with Police, Ambulance and Fire Departments.

SHORE LEAVE: Curfew hour is from 2200 to 0400 hours. Crew members are allowed ashore. Identification cards not necessary.

REGULATIONS: No discharge of ballast oil in any territorial waters of the Philippines.

DELAYS: Delays in cargo handling: Rain.

DEVELOPMENT: Private wharf of Sulu Agro Industrial Development Corporation at Southwestern end of Port Limit is due for completion in late 1979.

AUTHORITY: Port Manager, Philippine Ports Authority, Port of Jolo, Sulu.

JOSE PANGANIBAN, Luzon: 14.18 N. 122.40 E. (See Plan Book)

See "General" before first port.

DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 36 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 km. from the wharf aboard a boat displaying a pilot flag.

ANCHORAGE: Within Tanay Strait but not less than 500 m. from existing wharf.

RESTRICTIONS: Present port facilities could only allow vessels at anchorage considering the draft limitation and length of the pier.

MAX. SIZE: LOA – 230 m. Draft – 30 ft.

HEALTH: Vessels clear quarantine on arrival at Jose Panganiban Harbour. Quarantine Officers will normally board the vessel 2 km. from the wharf.

BERTHING: Present port facilities have been damaged by typhoon. Only 75 m. of the wharf is usable for berthing purposes. Length of quay – 75 m. width – 12 m. Max. depth of water – 30 ft. Quay height above sea level – 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging – 18 tons per gang hour. Storage area – 1.15 hectares.

CRANES: The port is not provided with shore cranes. Each vessel calling at the port is required to use her own gear.

STEVEDORES: Bicol Port Services.

MEDICAL: 1 government hospital located in the town about 3 km. from the wharf.

FRESH WATER: Can be provided by means of lorries and pipelines.

FUEL: All grades except premium gasoline obtainable from major oil depots and supplied by lorries alongside.

GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.

HATCHES: Opening and closing of hatches are part of stevedores work or at the Master's option.

REPATRIATION: All facilities available for crew changes; good land and air connections.

AIRPORT: At the capital town of Daet, Camarines Norte.

TIME: GMT plus 8 hours.

HOLIDAYS: New Years Day (Jan. 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I.U.S. Friendship Day (July 4th); Bonifacio Day (Nov. 30th); Special holidays declared by the Prime Minister of the Republic of the Philippines are also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's agent.

SHORE LEAVE: Crews are allowed ashore in company of an Immigration Agent.
DEVELOPMENTS: Repairing of damaged wharf and water pipe-lines.
GENERAL: Vessels intending to call at Jose Panganiban shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come-first-served basis.
AUTHORITY: The Supervising Officer, Philippine Ports Authority.

LEGAZPI: 13.10 N. 123.45 E. (See Plan Book)

See "General" before first port.
DOCUMENTS:
Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.
PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 24 hours before vessel's arrival. The vessel is met by the harbour pilot about 2 km. Northeast of the wharf aboard a boat displaying a pilot flag.
ANCHORAGE: Within the Albay Gulf outside the imaginary line within the vicinity of Legazpi Port from San Roque Lighthouse to the East breakwater with depths varying from 80 ft. to 100 ft. with good holding grounds. The bottom is generally of sand and coral.
RESTRICTION: Present port facilities allow for 1 vessel at a time considering the draft limitation and length of the pier.
MAX. SIZE: Legazpi Port: LOA – 120 m.; Draft – 25 ft. Leg Oil Company: LOA – 230 m.; Draft – 35 ft.
HEALTH: Vessels clear quarantine on arrival at Legazpi Harbour. Quarantine officers will normally board the vessel 2 km. Northeast of the wharf.
RADIO: Following Stations are normally used:

RCPI	FILTEL
TELEFAST	CLAVECILLA
CRC	

TUGS: No tugs available. Motor launch is used to attend to mooring and unmooring.
BERTHING: Only the end of the wharf is usable by foreign vessels considering the draft limitation and constricted manouvring area. Legazpi Oil Company, Private Pier is, however, capable of accommodating vessels of any type and tonnage.
Legazpi Port: Length of quay 328 m. Width 30 m. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging 15.95 tons per gang hour.
Legazpi Oil Company, Private Pier: Length of quay 100 m. Width 10 m. Max. depth of water 60 ft. Quay height above sea level 3 m. at high tide and 6 m. at low tide. Average rate of loading/discharging 83.33 tons per gang hour. Facilities are suitable for handling of bulk copra, pellets, copra cakes and copra crude oil by conveyor and pipe-lines.
CRANES: The port has no shore cranes. Each vessel calling is required to use her own gear.
STEVEDORES: *Legazpi Port:* Provided by Legazpi Arrastre and Stevedoring Corporation (LASCORP) Tel. 2295.
Legazpi Oil Company, Private Pier: Provided by NORLEINCO Arrastre Services.
MEDICAL: 1 government hospital and 6 private hospitals available.
FRESH WATER: Can be provided by means of lorries.
FUEL: All grades obtainable from oil depots and supplied by lorries alongside.
GANGWAY/DECK WATCHMEN: Available but not compulsary or necessary.
HATCHES: Opening and closing of hatches are part of stevedores work or at the master's option.
REPATRIATION: All facilities available for crew changes; good land and air connections.
AIRPORT: 5 km. from port area. Flights to Manila twice a day.
TIME: GMT plus 8 hours.
HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I.U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special holidays declared by the Prime Minister of the Republic of the Philippines is also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's agent.
POLICE/AMBULANCE/FIRE: Police, Tel. 4222; Ambulance, Tel. 4432; Fire, Tel. 2333.
TELEPHONES: Placing of telephones on board can be arranged with the local telephone company (MATELCO).
SHORE LEAVE: Crews can be allowed ashore in company of an Immigration Agent.
DEVELOPMENTS: Dredging of the port basin to an average depth of 25 ft.
GENERAL: Vessels intending to call at Legazpi shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocated is on a first-come first-served basis.
AUTHORITY: The Port Manager, Philippine Ports Authority.

MANILA, Luzon: 14.35 N. 121.58 E. (See Plan Book)

See "General" before first port.
PORT LIMITS: Manila Harbour is defined as that portion of Manila Bay within the following boundaries:

A line extending from the Vitas Estero due west (270°) to its intersection with a line running south (180°) to Sangley Point Light, thence along this latter line towards Sangley Point Light until its intersection with a line running northeast (075°) to the northwest corner of the airport site to the shore to the mouth of the Vitas Estero, the place of commencement. (Philippine Coast Pilot, Part 1, Coast and Geodetic Survey, 1968 edition, p.5–92).

However, Port of Manila jurisdictional district includes that of the Pasig River and the Limay and Mariveles Sub-ports.
DOCUMENTS:
Passenger List
Crew List
Inward Foreign Cargo Manifest
Stowage Plan
Visa for Crew
Smallpox Certificate.
PILOTAGE: Pilotage in and out of Manila Harbour and to the piers and into the Pasig River is compulsory.

Agents or owners of vessels calling at the Port of Manila shall inform the Pilot of their vessel's arrival. Agents can contact the Pilots Association through Channel 13, 24 hours a day including Sundays and Holidays. Pilots are available day and night.

The pilot boat is a white vessel with a big letter "P" and the number of the boat painted red at the forward end of the vessel. It is usually located in the vicinity of quarantine anchorage where port formalities are conducted.

During bad weather, the pilot boat is located inside the breakwater upon the expressed permission of port authorities.

Foreign vessels are boarded outside the breakwater while inter-island vessels at buoy No. 1 near the entrance to the Pasig River and off the lighted buoy north of north breakwater.

Notice of vessel's arrival shall be made at least 24 hours before their arrival.

Lights exhibited when a vessel has a Pilot on board are white over red together with other regular navigational lights. Otherwise, only navigational lights are displayed.

During typhoons and bad weather, Pilots require vessels to rig the pilot or accommodation ladder on the lee side.
ANCHORAGES: Vessels which for any reason do not intend to enter either harbour or the river immediately on arrival may anchor anywhere outside of the entrance channel. There is also deep water anchorage inside the breakwater. Anchorage is regulated by the Harbour Operations, Port of Manila, Philippine Ports Authority.

Quarantine Anchorage: The Manila Quarantine Anchorage is bounded as follows: Beginning at the Manila Outer Harbour Lighted Buoy 1, approximate position Lat. 14° 33′ 09″ N., Long. 120° 54′ 04″ E. thence 000°, 2,360 yards to position Lat. 14° 34′ 23″ N., Long. 120° 54′ 00″ E., thence on a range of 076° 24′ (Customhouse in line with City Hall Tower), 4,000 yards to approximate position Lat. 14° 34′ 50″ N., Long. 120° 56′ 14″ N., Long. 120° 56′ 00″ E., thence 242° 30′, 4,440 yards to the Manila Outer Harbour lighted Buoy 1, the point of commencement.
Forbidden Anchorage: Anchorage is prohibited in that portion of Manila Bay known as the Cable Area which is defined as follows: From a point approximately at Lat. 14° 33′ 42″ N., Long. 120° 59′ 05″ E., the junction of the breakwater forming the south side of the Yacht Basin with the shore of Manila Bay, thence along the breakwater to its end, from its end 255° to 3.65 miles north of Sangley Point Light, thence 66° to the shore of Manila Bay.

Explosives Anchorage: Vessels having gasoline, dynamite or other highly inflammable or explosive compounds onboard are not permitted to berth at piers or wharves until such cargo has been discharged. Such cargo must be discharged into lighters from vessels at the anchorage within the circle with a radius of 175 yards centered in Lat. 14° 35′ 15″ N., Long. 120° 54′ 05″ E.

Other Special Anchorages: Lighters, scows, cascos and similar craft are prohibited from anchoring east of the breakwater, Manila Harbour, except in the following designated places:

(a) South of the new Luneta, inside of vessels' anchorages, but only in cases of urgent necessity and with special permission from the Surveyor of the Port.

(b) Along the east side of the west breakwater and within 85 yards of it, and well clear of the fairway leading to the Engineer Island slipways and well clear of the manoeuvring space ordinarily needed by vessels docking or leaving the oil wharf. No craft shall moor along the breakwater beyond the sharp bend of the breakwater towards the gap.

(c) In the Inner Basin (Engineer Island) east and well clear of the fairway and then only in case of urgent necessity. It is provided that such craft during severe typhoon weather with special permission of the Surveyor of the Port, may anchor temporarily in the Inner Basin west of the fairway, but well clear of the vessels.

Others: 1. No vessel shall anchor or moor in any prohibited anchorage nor use an anchor in that area except for the purpose of assisting in berthing alongside or unberthing.

2. No vessel shall anchor in, or use an anchorage, other than for the purpose for which the anchorage is designated or intended.

3. No vessel shall anchor, berth, moor or lie:
(a) in the approaches to a port.
(b) In any principal fairway.
(c) In such a manner as to obstruct the approach to anchorage or pier/wharf used by other vessels.

(d) In a cable reserve area, or in any special anchorage indicated on the chart of the Port or Port district except for the purpose specified.

(e) In a position which is likely to foul a vessel which is anchored, moored, or made fast to a buoy.

RESTRICTIONS: 1. No explosives or dangerous goods shall be loaded or discharged between the hours 1800 and 0600 without the permission of the Authority.

2. No vessel or harbour craft with explosives or dangerous goods on board shall remain alongside any other vessel or craft, pier or wharf or other physical landing place between the hours 1800 and 0600 without permission of the Authority.

3. No person shall smoke and no fire or naked light, other than navigation or signal lights prescribed by the Collision Regulations, shall be allowed on board any vessel or harbour craft which has or is about to receive on board any explosives or dangerous goods.

MAX. SIZE: The maximum permissible vessel size inside the port is 9.4 m. draft, 450 m. length and 220 m. breadth. Beyond these measurements, vessels can be allowed only during high tide.

HEALTH: There are three types of pratique that can be obtained at the port: Free pratique, provisional pratique and radio pratique.

Foreign vessels calling at the port are inspected by Immigration officers. When all the quarantine rules and regulations are complied with and the vessels found free of any quarantinable or communicable diseases, free pratique is obtained by the vessel.

On the other hand, if some of the conditions above are not satisfied, a provisional pratique is given by the Quarantine.

Radio Pratique is provided to army and navy ships on the following grounds:

1. A doctor is among the crew of the ship.
2. There is no member of the crew sick of any disease.
3. Vaccination certificates of the crew are in order and valid.
4. The vessel is not from a sick area.

For vessels calling at the Port of Manila, but already coming from another port of entry in the Philippines, Pratique is automatic. However, if somebody aboard the vessel is sick during the voyage, pratique shall still be obtained.

RADIO: The particular radio station to be used by a vessel to route ETA cables to agent is at the descretion and selection of the vessel.

VHF: So far, VHF facilities are not yet available at the Port. However, vessels can use Channel 16, the International calling frequency through Radio Manila on the following schedules:

0730–2100 hrs. – on ordinary days
0730–1700 hrs. – on Sundays and Holidays.

RADAR: No existing Port Radar Service.

TUGS: Tugs normally join vessel inside the breakwater.

BERTHING: There are five finger piers at South Harbour.

Pier 3: 4 berths available. Depth of water: Berth No. 1, 2 and 3 – 30 ft. Berth No. 4 – 21–25 ft. cargoes handled – containerized cargoes and general cargoes.

Pier 5: 5 berths available: Berth 1 – 23–28 ft. Berth 2 – 28–31 ft. Berth 3: 31 ft. Berth 4: 28–31 ft. Berth 5: 24–28 ft. cargoes handled – general cargoes and containerized cargoes.

Pier 9: 5 berths available. Berth 1: 23–28 ft. Berth 2: 23–28 ft. Berth 3: 31–30 ft. Berth 4: 23–28 ft. Berth 5: 23–28 ft. cargoes handled – general cargoes and containerized cargoes.

Pier 13: 7 berths available. Berth 1: 27–28 ft. Berth 2: 28–30 ft. Berth 3: 31–32 ft. Berth 4: 32 ft. Berth 5: 25–32 ft. Berth 6: 27–28 ft. Berth 7: 23–28 ft. cargoes handled – containerized and general cargoes.

Pier 15: 5 berths available. Berths 1 and 2: 35 ft. Berth 3: 32 ft. Berth 4: 30–32 ft. Berth 5: 23–30 ft. cargoes handled – general and containerized cargoes.

Both self-sustaining and non-sustaining vessels can be accommodated at South Harbour.

The following are the quay lengths: Pier 3 – 802.53 m. Pier 5 – 825.25 m. Pier 9 – 873.62 m. Pier 13 – 950.28 m. Pier 15 – 888.46 m.

CRANES: None.

BULK CARGO FACILITIES: See "Berthing".

SPECIALIZED CARGO HANDLING FACILITIES:

1. One Roll-on/Roll-off ramp with 50 long tons capacity at Pier 13.
2. Three gantry cranes with 35 tons capacity. One at Pier 3. Two at International Port.
3. One Manitowoc Crane with 70 tons capacity.

Liquid cargoes are not handled at South Harbour.

BRIDGES: None.

STEVEDORES: Arranged by vessel's agent prior to arrival.

MEDICAL: Notice from shipping agents is required at least 24 hours in advance. There is one hospital clinic available at the port – the Roberto S. Oca Hospital Clinic located at Gate 4, South Harbour.

For quarantinable diseases, there is a 12-bed hospital, the Quarantine Isolation Centre is located at the airport.

With regards to certificates, only smallpox certificates are needed.

TANKERS: Tankers are very seldom accommodated at the Port. The Limay and Mariveles Sub-ports received tankers.

Rosario: Filoil refinery sea berth: Is located at the entrance to Manila Bay position: Lat. 14° 26′ 30″, Long. 126° 46′ 40″. This position is 2.5 miles off the shore of Rosario, Province of Cavite.

The mooring area is marked by 6 mooring buoys. A ship's guide buoy marks the point where the ship's starboard anchor will be dropped upon entry into the berth. 4 other buoys inside the berth at midport mark the end of the submarine pipe-line, centre of ship's manifold and the hose ends respectively. The bearing of the centre of the berth is N. 65° E. The depth is 50 ft. at high tide and 45 ft. at low tide approximately.

The weather is quite good during the dry season, but is unfavourable during monsoon season (May to November). Wind and swells are mostly from a S.W. direction and usually prevalent during monsoon season.

It is emphasied that vessels moored at the berth must be in good condition to clear the berth immediately in case of an emergency. Ship's engines and gear must be ready with full power for immediate use. Ship's personnel should be at their stations at all times during mooring, unmooring and cargo unloading operations.

Radio: Filoil Makati office may be contacted by dialling telephone Nos. 87-40-61 and 87-40-71. The Rosario refinery may be contacted by dialling telephone Nos. 47-95-51 and 47-95-53.

Communication from the sea berth with the refinery, Filoil's launch and Filoil representative on board is through VHF radio. If VHF radio fails, the Filoil launch will be despatched to bring the message either way.

Filoil representative on board maintains a radio watch and constant communication with the shore for general purposes and emergencies.

Luzon Stevedoring Company tugboats also maintain a constant radio communication with their representative at the shore. In case of emergency, messages can be relayed via these tugs.

Ship's Agent: All vessels carrying crude or other cargoes for discharge at Filoil refinery sea berth must appoint their local ship's Agent who will provide them with the necessary ship husbandry services.

Notice of Arrival: They must report their estimated time of arrival to Filoil Refinery Corporation, cable address' "Filoil", Manila, Philippines, 3 days after leaving port of loading and 72 hours before arrival at Manila.

Pilot and Boarding Parties: Pilots are arranged for by the ship's Agent. Generally, Pilots board the tanker at the Manila anchorage to assist the Master to moor in the berth and leaves at the sea berth after berthing.

Filoil representative boards the tanker 1 mile before the sea berth, but if it is the first voyage, he boards the tanker together with the Port and Government authorities at Manila anchorage.

Tugs: Tugboat service is arranged for by ship's Agent. Tugs generally come from Manila. Give at least 48 hours notice when ordering tugs.

Quarantine, Customs and Immigration: Manila is the port of entry for the Rosario sea berth. Therefore, entry and clearance must be arranged by the Ship's Agent at Manila. Boarding officers board the vessel in the Quarantine anchorage prior to arrival within the mooring area. Pertinent government officials should be given sufficient time,usually not less than 24 hours Monday to Friday, and 48 hours Saturday and Sunday. Generally, entry and clearance can be arranged by the Agent who should advise Customs well in advance of the vessel arrival.

Ballast, Bilge and Garbage Disposal: There are no ballast facilities at the refinery. Masters are advised that in Manila Bay, the Harbour-Pollution regulations are rigidly enforced. Therefore no bilge water, oil contaminated water, garbage or similar refuse which may pollute the sea water in any way, is to be discharged overboard while the vessel is within Manila Bay and approaches thereto. The staff at Rosario are required to report any violation of this Philippine Merchant Marine regulation.

Launch Service: Regular launch service for crew transportation is not available and has to be arranged through ship's Agent. The Luzon Stevedoring launch is used to run lines, assist in picking up cargo hoses, etc. Filoil's owned or hired launch is for the exclusive use of Filoil representative and personnel boarding the vessel; however, transportation may be arranged through Filoil representative in cases of emergency.

Medical: Medical attention can be arranged by the ship's Agent. There is a clinic at the refinery. The nearest hospital is 0.5 miles from the refinery.

Heading for the Sea Berth: As soon as government clearance (pratique) is granted, vessel lifts anchor and heads for Rosario sea berth, a distance of about 16 land miles from Manila anchorage.

Vessel Mooring Gears and Facilities: The vessel's bow is secured in the moorings by the use of both bower anchors. Therefore, ship must have both bower anchors ready for immediate use, each with a minimum of 150 fathoms of chain. Anchors, chains and anchor windlass must be in good condition and capable of heaving ship ahead with the chain or letting 1 chain go out on the run while heaving in on the other. Mooring buoy No. 6 can be used instead of port anchor if 3 mooring lines are hooked up.

Vessels must be equipped with 10 in. manila or better mooring lines of not less than 8 in. circumference and not less than 90 fathoms in length of each line. 2 lines are required for each of 6 mooring buoys, 5 of which are aft to secure the ship's stern position. Therefore, 5 lines are to be available on the fantail for mooring to buoys Nos. 1, 2, 3, 4 and 5.

Vessels having wire moorings secured on warping winches with surge valve and brake are acceptable. Warping winches must be adequate to handle mooring line under heavy strain. Efficient stopper lines must be readily available to "stop" mooring lines for transfer from winch to bitts without loss of tension.

All chocks other than roller (if free) shall be fitted with chafing gear to protect lines before berthing operation commences, endeavouring to install chafing gear after the ship has been moored has proven impracticable. Old fire hoses or substitute is suggested.

If in the opinion of the Pilot, the vessel's mooring facilities, lines and/or gear are inadequate, he will inform the Master and Filoil representative, and in such event the vessel will not be allowed to enter the moorings until such conditions are deemed satisfactory.

Docking procedure: To moor, the vessel approaches the mooring heading due South. When in proper position, the starboard anchor is dropped and the chain allowed to run until vessel crosses the mooring area to a point where the port anchor is let go or when the mooring lines are dropped to buoy No. 6. Then the engines are backed and the vessel with the assistance of the tug, manoeuvred into the mooring area where after lines are run to the 5 mooring buoys and then the anchor chains are brought tight simultaneously with the securing of the stern to the mooring buoys. The vessel is then heading due West parallel with the tide current flow.

When secured in the berth, vessel should not be closer than 10 m. from the end of the submarine pipe-line. Bower anchor chains should have spread of not less than 30 degrees on either side of the ship's imaginary fore and aft line extended forward. Stern buoy moorings should be set as taut as possible and anchors form an approximate angle of 300° with water line.

Submarine Hose Lifting Gear and Manifold Connection: The derrick on the port side in way of the hose connection must be rigged to lift not less than 5 tons. The topping Lift shall be available to raise or lower the boom as required and the winch and whip shall be of a quality and nature to lift the hose exactly and evenly. The hose and fittings are considered to weigh 3 tons. The hose connecting gang and its supervisor are form Luzon Stevedoring Company and are under contract to Filoil. They will use the ship's machinery to raise the 2×10 in. hoses from the bottom and secure same to the ship's side. They will also disconnect the hoses and lower same to the bottom of the sea after completion of discharging of cargo. The ship's manifold must have 10 in. flanges for connection to 10 in. submarine hoses.

Safety Rules and Regulations:

Mooring lines must be in good condition and kept tight at all times.

Sparking smoke stacks must not be permitted. If for any reason a stack catches fire or emits live sparks, cargo operations must be stopped immediately on this and adjoining vessels.

Throw nothing overboard from deck or portholes while at sea berth.

During cargo and/or ballast operations, vessels shall show red flag by day and red light by night. No smoking amidships during cargo and/or ballast operations.

No chipping, repairs, welding or hot work is allowed on any vessel while at sea berth unless special permission is given and a safety permit obtained. The ship must always be ready to sail out at a moments notice.

Pumping crude oils must be stopped during electrical storms or if lightning appears in close vicinity.

In case of fire, shut down all pumping and sound alarm. Disconnect hoses so as to be ready to shift from berth. All vessels at berth must have main engines ready for use. Water, foamite and steam are never to be used on electrical fires. Use dry chemical or Pyrene. Use foamite, water fog, steam CO_2 or dry chemical on oil fires.

Avoid spilling oil on deck. If any oil is spilled, it must be cleaned immediately. Gasoline or naphtha is not to be used for cleaning.

Only Underwriter's laboratory approved flashlights permissible use in methane and air misures by the U.S. Coast Guard are to be used for loading, discharging, ballasting and/or repair work on vessels.

Ullage screens are to be kept in place during cargo and/or ballast operations.

Tugboats are not to be allowed alongside while discharging cargo or ballast.

No extension cord or portable cables which are connected to an electric power source shall be used on deck in way of cargo or fuel tanks unless vessel is certified gas-free.

Fire hose shall be laid out and suitable fire extinguishers available. Failure to comply with any of the above rules will result in the vessel being shut down. Sufficient copies are to be presented to the Master so that they may be posted in various places about the vessel. It is the Master's responsibility to see that these rules and regulations are enforced.

Discharge of Cargo; After hoses are connected the Filoil representative will, after communication with the refinery, advise commencement of pumping. In the beginning the rate is to be slow and the Filoil representative will advise when pumping rate is to be increased to maximum. Discharge of cargo may be stopped due to adverse weather conditions. In which event, the hoses are disconnected and the submarine hose lowered to the sea bottom. Cargo discharge will be resumed when the adverse weather moderates.

Crude oil discharge through 2×10 in. hoses 255 ft. long through a 10 in check valve and 10 in. gate valve then into the 24 in. pipe-line which is 2.5 miles in length. The height of the shore tanks (foundation) above sea level if 15.5 ft. Pressure at the ship's side must not be less than 60 lb. Maximum pressure allowed is 120 lb. at the ship's side.

Stripping – Tank Draining: To keep a discharge time to a minimum, tanks should be stripped into one of the ship's tanks and the final stripping shall be from only one tank.

Board and Lodging Accommodation: Sufficient accommodation and meals are requested to be available and prepared for the Filoil's representative in the officers' quarters. He will remain with the vessel until casting off or until relieved to be of assistance to the crew.

DENSITY: Variable.

FRESH WATER: Fresh water is available from floating barges.

FUEL: This depends upon the requirement of the vessel. However, as to the quantity, the Philippine Government can only sell vessels sufficient for it to reach the next port of call.

FIRE PRECAUTIONS: Except for the "Absolutely Non-Smoking Area", there are no other regulations.

REPAIRS: Only minor repairs possible.

DRY DOCKS: No drydock at the Port of Manila. There is one however at a nearby sub-port, also within the jurisdictional area of the Port of Manila, at the Bataan Shipyard and Engineering Corporation.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: This service is available whenever needed.

HATCHES: Stevedores usually open and close hatches. In special cases, when the vessel is of a different model and the hatches are constructed differently, crew members are requested to assist stevedores.

CUSTOMS ALLOWANCES: The only allowable quantity of goods to be held out of bond is that which the member of the crew can use personally. Usually, one or two bottles of wine and a pack of cigarettes. Those brought out from the vessel beyond this will be considered for commercial consumption and will therefore be charged.

CARGO GEAR: See "Specialized Cargo Handling facilities".

REPATRIATION: Shipping Agent can arrange this with the Bureau of Immigration.

AIRPORT: The nearest airport is the Manila International Airport, about 8 kms. from the Port of Manila. This is served by regular airlines.

TIME: GMT plus 8 hours (Summer Time GMT plus 9 hours April–June).

HOLIDAYS: There are about 11 national holidays in the Philippines. Working days are from Monday to Friday, for government employees, and Monday to Saturday, for private employees. However, the Port of Manila does not observe any of these holidays or non-working days. Operations at the port are on a day-to-day basis and no holidays.

POLICE/AMBULANCE/FIRE: Police: 59-90-11; 59-43-44; 59-63-36; 59-64-49. Ambulance: 59-60-61;50-30-11. Fire: 47-77-17; 88-00-58; 25-56-80; 87-21-20.

TELEPHONES: Arranged by vessel's agent from the Philippine Ports Authority.

SERVICES: Apart from the usual services of the port, others are ship salvage, laundry and container leasing.

SHORE LEAVE: Crew members are allowed ashore as long as sufficient members of the crew are left onboard to manage the vessel in case of unforeseeable incidents. This is necessary in order that the vessel can be removed from berth or anchorage.

IDENTIFICATION CARDS: Shore passes are issued by the Bureau of Immigration.

REGULATIONS: No particular or unusual regulation are observed at the port.

DELAYS: The expected delays are: During inclement weather, some difficulty may be encountered in berthing.

And when some of the specialized cargo handling facilities have failures.

DEVELOPMENTS: An additional three berths at the International Port (94 hectare area) will be in use by 1979. This will become the container terminal and bulk cargo complex for the port. It is expected to handle not less than 17,000 containers daily when in full operation.

Two giant gantry cranes have been installed at the International Port. A further gantry crane will be installed in the area in 1979.

AUTHORITY: Philippine Ports Authority (PPA).

MASAO (Including Nasipit): 09.06 N. 125.22 E. (See Plan Book)

See "General" before first port.

PORT LIMITS: First proposal: From Bolo-bolo Point to Carmen, Agusan Norte.

Granted: Bolo-bolo Point up to Anakan area.

Pending approval: Bolo-bolo Point to Sipaca Point.

DOCUMENTS:

4 Crew Lists
4 Passenger Lists
2 Store List
4 Stowage Plan
2 Personal Effect List
2 Inward Cargo Manifest
1 Ship's Information.

PILOTAGE: Telegraphic address: Masao Pilots Butuan City.

ETA: Ocean going vessels – 24 hours notice. Coastal vessels – 12 hours notice.

Pilot boat description: Upper structure white; lower structure, black with a letter "P" at the bow. During night time, when a vessel requires a Pilot, particular light used is permanent red at the uppermost portion of the boat and a flashing white light.

Location of Pilot Station: In Masao, but they have office at San Francisco St., Butuan City near the Butuan R. C. Wharf.

No alternative area in the event of bad weather as it is an open sea.

Location of anchorage for vessel awaiting a Pilot is at Quarantine Anchorage Area 9° 00′ 30″ N. and 125° 28′ 15″ E.

ANCHORAGES: Depth of safe anchorage: 75 m. deep along the shore line.

Masao Anchorage Berth:
Anchorage No. 1: 9° 01′ 05″ N., 125° 29′ 50″ E.
Anchorage No. 2: 9° 01′ 00″ N., 125° 29′ 40″ E.
Anchorage No. 3: 9° 00′ 55″ N., 125° 29′ 30″ E.
Anchorage No. 4: 9° 00′ 45″ N., 125° 29′ 20″ E.
Anchorage No. 5: 9° 00′ 35″ N., 125° 29′ 00″ E.
Anchorage No. 6: 9° 01′ 15″ N., 125° 29′ 45″ E.
Anchorage No. 7: 9° 01′ 10″ N., 125° 29′ 35″ E.
Anchorage No. 8: 9° 01′ 04″ N., 125° 29′ 25″ E.
Anchorage No. 9: 9° 00′ 55″ N., 125° 29′ 05″ E.
Anchorage No. 10: 9° 00′ 50″ N., 125° 28′ 55″ E.

RESTRICTIONS: None.

MAX. SIZE: Masao: No limit.

Nasipit: Maximum possible length of vessels is 550 ft., breadth, 65 ft., maximum mean draft is 25 ft.

TUGS: Tug assistance is only available at the port of Nasipit, if needed.

BERTHING: No berthing facilities available. All vessels anchor at specified anchorage areas. Also see "Max. Size".

CRANES: None.

BULK CARGO FACILITIES: None.

STEVEDORES: The Arrastre/stevedoring contractor for the Port of Masao is the Masao Integrated Port Services, Inc. (MIPSI). Its area of operation starts at Masao anchorage and along the coastline 125° 25′ East of the municipality of Buenavista, Barrio Masao, Lumbocan, Magallanes, Cabadbaran, Tubay up to Agusan-Surigao coastline boundaries including Magallanes Bay up to Kayukanan Creek.

ETA advise required to arrange gangs at least 4 hours before arrival.

MEDICAL: Hospital facilities available:
1. Butuan General Hospital
2. Butuan Maternity and Children's Hospital
3. City General Hospital and Medical Centre.

DENSITY: Average salinity of water in the port and surrounding anchorage area is 1.010–1.012.

FRESH WATER: Supply of fresh water can only be made possible through the use of barges. Water supply is also available at the sub-ports of Nasipit and Butuan.

REPAIRS: Only minor repairs can be undertaken.

HATCHES: Opening or closing of hatches is normally carried out by stevedores.

AIRPORT: A few kilometers from the city is the Bancasi Airport which caters to domestic flights to and from Cebu and Manila; while the Philippines Aero Transport Inc., has a daily flight to and from Cagayan de Oro City.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday, Good Friday and Easter Sunday; Labour Day (May 1st); Independence Day (June 12th); Fil-American Friendship Day (July 4th); National Heroes Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th).

POLICE/AMBULANCE/FIRE: Police: 22-224; 115; Fire: 114; Ambulance: 24-14.

TELEPHONES: Not possible to place telephones on board.

SERVICES: Ship chandling service available at Lumbocan and Butuan city.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

AUTHORITY: The Philippine Ports Authority; Port Management Unit; Port of Masao, Butuan City.

MASBATE: 12.35 N. 123.61 E. (See Plan Book)

DOCUMENTS:
Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 36 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 kms. from the mouth of the channel of Masbate Bay aboard a boat displaying a Pilot's flag.

ANCHORAGE: Within Masbate Pass, but not greater than 500 m. from the mouth of the channel leading to Masbate Bay. The area within the Masbate Bay could only be used during emergencies and typhoons.

RESTRICTIONS: Present port facilities can only accommodate 1 vessel at a time due to draft limitation and physical length of the wharf.

MAX. SIZE: LOA – 300 m.; Draft – 28 ft.

HEALTH: Vessels will clear quarantine on arrival at Masbate harbour. Quarantine officers will normally board the vessel once it is inside Masbate Bay.

BERTHING: The entire berth length of the wharf could be utilised for the loading or unloading of cargoes. Length of quay 180.0 m. Width 10 m. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 4 m. at low tide. Average rate of loading/discharging 20 tons per gang hour.

CRANES: None available.

STEVEDORES: Provided by Masbate Consolidated Arrastre, Inc.

MEDICAL: One government hospital and three private hospitals.

FRESH WATER: Available by special arrangements.

FUEL: All grades obtainable from Caltex depot in the area and supplied by lorries alongside.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

HATCHES: Opening and closing of hatches are part of the stevedores work or at the Master's option.

REPATRIATION: All facilities available for crew changes; good sea and air connections.

AIRPORT: Three kilometres from port area. One flight to Manila daily.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I.U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special Public Holidays declared by the Prime Minister of the Republic of the Philippines is also included.

If any other legal holiday falls on a Sunday the following day is observed as a Holiday. Cargo work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: Police and ambulance can be contacted through the local PPA office.

TELEPHONES: Placing of telephones on board can be arranged with the local telephone company (PILTEL).

SHORE LEAVE: Crews can be allowed ashore in company of an Immigration Officer.

DEVELOPMENTS: Extension of the wharf by 80 linear metres.

GENERAL: Vessels intending to call port at Masbate shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come first-served basis.

AUTHORITY: The Supervising Officer, Philippines Ports Authority.

PUERTO PRINCESA: 09.44 N. 118.43 E. (See Plan Book)

See "General" before first port.

Puerto Princesa, a large irregular inlet between Bancaobancaon Point and Panagtaran Point, is 2 miles wide at the entrance, extending about 6 miles in a Northwesterly direction. Coral reefs about 0.5 mile wide making out on the entrance points narrow down the navigable width of the channel to about 1 mile, depths of 34 fathoms (62.2 m.), shoaling to 9 fathoms (16.5 m.) in the vicinity of the pier. The major portion of the Northwestern and Western part of the bay is mostly shoal. The shoreline is generally fringed with mangroves and fronted by mud flats. The surrounding land consists of extensive wooded plain, backed by a high mountain chain. Several small rivers navigable by launches and small boats empty into the bay. The inner part of the harbour is a good typhoon anchorage.

PORT LIMITS: About 1 mile South of the pier. This is the entrance to the inner harbour of Puerto Princesa.

PILOTAGE: Pilots can be contacted by radio message through the shipping Agent not less than 24 hours of ETA indicating among others the following information:
1. Name of vessel
2. Name of shipping lines
3. Country vessel is registered
4. Type of vessel
5. Overall length
6. Draft
7. GRT
8. Volume of cargo to be discharged and storage required
9. Nature of cargo
10. Passengers disembarking, transit and embarking if any.

When Pilot is aboard the pilot boat, an international flag "P" will be seen flying at her foremast.

ANCHORAGE: Vessels not going alongside the T-shaped pier may anchor Southwestward of Princesa Point in 12 to 16 fathoms (21.9 to 29.2 m.), mud bottom. A better protected anchorage may be had in 9 to 10 fathoms (16.5 to 18.3 m.) about 400 yards Northward of the end of the pier.

RESTRICTIONS: At night, in approaching Puerto Princesa from offshore, the lights in the vicinity of Canigaran, Northward of the entrance, may cause some confusion to strangers as they are visible long before the Puerto Princesa Light can be seen. The port light which is fixed red, visible 7 miles over an area of 041°, only becomes visible close in and just off the mouth of the harbour. At daytime a course Southward of the range Thumb Peak-Tidepole Point clears the reef on the North side of the entrance. Mount Beaufort on range with Tidepole Point clears the reef on the South side.

MAX. SIZE: Vessels not going to dock alongside the pier may anchor at 9 to 10 fathoms or 12 to 16 fathoms. For vessels going to dock alongside the T-shaped pier, permissible length and draft are the following: Length – 126 ft. (39.4 m.) draft – 27 ft. (8.2 m.)

HEALTH: Quarantine doctors are assigned in the Port to board the vessel and check any suspected disease or fever.

RADIO: Vessels at sea usually send their radio messages through the Association of International Shipping Lines in Manila to their Agents.

VHF: Not available.

RADAR: No radar station in the port.

TUGS: Tug service can be availed of by communicating with the local shipping Agent.

BERTHING: The town has a T-shaped concrete pier with a berthing face of 126 ft. (38.4 m.) Depths are 27 ft. (8.2 m.) alongside and 31 ft. (9.4 m.) about 6 yards off the face. The Northern and Southern ends of the "T" have depths of 11 ft. (3.3 m.) and 15 ft. (4.5 m.) respectively. The inshore arms of the T has depths of 11 ft. (3.3 m.) at each berth. Sailboats and other shallow vessels berth on each side of the concrete approach. The wooden piles, are 8 ft. (2.4 m.) and very close together, are about 120 yards N.E. of the offshore end of the pier. Vessels coming alongside should exercise caution to avoid these piles. Typhoon signals are exhibited from a pole at the foot of the pier.

CRANES: No cranes available.

STEVEDORES: Advise Agent on volume of cargo to be discharged, storage required and nature of cargo.

TANKERS: May drop anchor at anchorage area.

FRESH WATER: Water supply on a limited quantity.

FUEL: Diesel oil, gasoline and kerosene may be purchased in drums and tins.

FIRE PRECAUTION: No smoking is allowed when vessels are refuelling within a radius of 100 m.

CONSULS: Consuls from foreign countries in Manila.

REPAIRS: No repair facilities.

DRY DOCKS: For small boats only.

SURVEYORS: Lloyds and other classification societies in Manila.

GANGWAY/DECK WATCHMAN: Watchman can be hired from local Security Agencies of the Port.

HATCHES: Opening/closing of hatches is usually done by stevedores.

CUSTOMS ALLOWANCES: Quantity permitted for each crew member to be held out of bond are the following: Cigarettes – 5 packs. Liquor – 1 bottle.

CARGO GEAR: Loading/unloading is effected by ship's gear.

REPATRIATION: No facilities.

AIRPORT: The airport is about 2 miles from the pier with a schedule of two flights from Manila and back daily.

HOLIDAYS: The following are the Philippine National Holidays: January 1 – (New Year's day), Maundy Thursday, Good Friday, April 9 – (Bataan Day), May 1 – (Labour Day), June 12 – (Independence Day), July 4 – (Fil-Am Friendship Day), November 30 – (National Heroes Day), December 25 – (Christmas Day). Cargo handling operations may be arranged on these days at overtime rates.

POLICE/AMBULANCE/FIRE: Puerto Princesa town has all these facilities. There is a provincial hospital in Puerto Princesa. Private practising physicians and drugstores are available.

TELEPHONES: The town is connected to Manila by postal and radio communication but no telephone shore connection facilities for vessels docked at the pier is available.

SERVICES: No special services available.

SHORE LEAVE: Crew members are allowed ashore provided they always carry with them their Seaman's book or Passport.

IDENTIFICATION CARDS: Seaman's Book is sufficient for crews to identify them when ashore.

DELAYS: Due to lack of some Port facilities, delay in berthing, loading, discharging and bunkering is sometimes experienced.

DEVELOPMENTS: A proposed extension of 30 m. on the Northern end of the pier and 47.57 m. on the Southern end. Reclamation at the Southern foot of the causeway.

AUTHORITY: The Collector of Customs.

SAN FERNANDO, Luzon: 16.37 N. 120.18 E. (See Plan Book)

See "General" before first port.

APPROACHES: Vessels enter the harbour through a channel marked by 2 buoys and 2 range lights 144.5° (fixed green and red light flashing every 3 seconds.).

PILOTAGE: Pilotage is compulsory. Vessel is met at mouth of harbour by Pilot boat that flies a red flag with letter "P" in white. Pilot then brings the vessel to Quarantine Anchorage. Conventional signals are used to call Pilots.

ANCHORAGE: Located at centre of the bay with 8 to 9 fathoms and good holding ground. In the event of rough weather or strong moonsoon wind, vessels in the harbour are brought here for safety.

RADIO: No direct radio communication system with vessels at sea is available in the locality. Ship Masters report ETA to agent in Manila who relay message to San Fernando by telex or commercial radiogram. The PMU San Fernando may be reached by Long Distance telephone 25-57 or SSB radio transceiver 8776.5 kHz.

Arrival advance: 48 hours before ETA, ship agent files request for berth at PMU office indicating: ETA, draft, LOA and breadth, consignee or shipper, type of cargo and stowage, dangerous cargo, (if any). Heavy lifts, (if any), number of hatches to be worked, vessel is self sustaining or not.

24 hours before arrival or earlier, upon receipt of Master's advice by telegram, a berthing schedule is issued by the PMU. Copies are furnished to: Pilot, consignee/shippers, Arrastre-stevedoring contractor, ship agent.

MAX. SIZE: Size of vessels that could be serviced is controlled by depth along quay:

Pier	Depth Pier Head	Depth Shore End	Length	Width
Gov't. RC	54 ft.	12 ft.	600 ft.	60 ft.
Shipside, Inc.				
Timber	60 ft.	30 ft.	850 ft.	80 ft.
Philex Conveyor	32 ft.			

HEALTH: Immediately after vessel anchors at Quarantine Anchorage, quarantine officers board and clear vessel. Imported grain will be fumigated on board vessel at anchorage.

Boarding formalities: Members of party are BOC inspector and guards, Immigration, Philippine Coast Guards, pratique is then issued to indicate vessel as "arrived" and subject to Charter Party terms, laytime will commence.

TUG: 1 tugboat owned by Shipside, Inc. of 1,100 h.p. engine equipped with Kort Nozzle, is available for assisting, docking and undocking and launch service. Tug assistance during docking and undocking at the Shipside Pier is compulsory while its use at the Government and Philex Piers are at the option of the harbour pilot. A shipping company may bring in tugboat to assist its own vessel.

Tug lines are available at no extra cost. Conventional signals are used by Pilot and Master of tugboat.

Tug assistance rates: 0800 to 1700 hrs, regular time – others, overtime.

BERTHING: See "Max. Size".

STEVEDORES: Stevedores, longshoremen, checkers and watchmen for the 2 piers are provided by:

Government Pier – Northern Carriers Corp. Shipside pier – Shipside, Inc.

Stevedores, checkers, etc. are non-union members. Any number of gangs can be ordered on 3 hours notice. Stevedores work on 3 shifts:

1st Shift – 0000 hrs. to 0800 hrs.
2nd Shift 0800 hrs. to 1600 hrs.
3rd Shift – 1600 hrs. to 2400 hrs.

Sundays, holidays and nights, stevedores are paid overtime rates. Christmas, New Year's Day, Easter Sunday, Good Friday and Maundy Thursday, stevedores will work on double pay.

TANKERS: The 4 oil terminals maintaining tank farms in the port zone are Petrophil, Caltex, Shell and Mobil. They operate a common set of pipe-lines for white and black oil product passing under the government and Shipside Piers. PMU policy is 1 tanker discharging at 1 pier at a time. A "boom" is available at the quay side.

MEDICAL: 3 modern hospitals staffed by trained physicians and specialists and half a dozen clinics. These are open 24 hours.

FRESH WATER: Fresh water available at both piers along side the quay via pipe-lines. Pumping rate: 8 t.p.h. – Summertime. 12 t.p.h. – Rainy days.

Water samples are tested weekly at the Wallace US Air Force Station at Poro, San Fernando.

FUEL: Bunker and other, POL product obtainable and supplied by lorries.

FIRE PRECAUTION: Water pipe-line alongside the quay can be converted to a fire hydrant by manipulating the valves to suck sea water. The oil terminals in the area maintain chemical fire fighting equipment, a "boom" to contain oil spillage and "light water". Voice of America, Wallace US Air Force Station, and the Airport all within a 3 kms. radius to the piers, maintain modern fire trucks.

REPAIRS: Atlantic Gulf and Pacific Co. of Manila operates ship repair facilities including 2 drydocking slipways. A 100 ton floating crane and a fleet of mobile cranes from 25 to 80 tons capacity are among their equipment.

GANGWAY/DECK WATCHMEN: Available from Arrastre contractor upon request of ship agent.

SURVEYORS: Available from Manila, 270 km.

HATCHES: First open and last close normally carried out by crew. Stevedores operate the hatches when it rains.

CARGO GEAR: Arrastre operators maintain complete loading/discharging gear for bulk, general cargo and heavy lifts. Also available are:

11 units — Forklifts, 1 to 8 tons capacity.
2 units — Mobile crane, 25 tons capacity.
1 unit — Floating crane, 100 tons capacity.

IDENTIFICATION CARDS: For control of persons inside the port zone and for security, I.D. should be available when requested by guards.

AIRPORT: San Fernando Airport is 3 km. South of Pier. Philippine Air Lines serve the port with 3 flights weekly.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday, Good Friday; Labour Day (May 1st); Independence Day (June 12th); RP-US Friendship Day (July 4th); All Souls Day (November 1st); Bonifacio Day (November 30th); Christmas (December 25th); Rizal Day (December 30th).

POLICE/AMBULANCE/FIRE: Police, Tel. 25-77. Hospitals/Ambulance, Tel. 28-44, 23-55, 26-16; Fire Dept. Tel. 24-88; Phil. Constabulary Tel. 25-28.

TELEPHONES: Vessels docked at Shipside Pier may request telephone connection.

GENERAL: *Discharge of ballast.* No dirty ballast may be dumped into the territorial waters of the Republic of the Philippines.

Rat guards: Rat guards shall be placed on all mooring lines to the wharf.

Refuse: May be collected by a truck at P25.00 per trip.

Accessibility: Port is accessible by road, rail and air transportation.

Provisions: Fresh vegetables can be supplied directly from the vegetable capital of the Philippines (Baguio City).

Rest, Recreation: Beach resorts with miles of clean beach just minutes away by car. First class hotels with swimming pools, air conditioned rooms. Baguio City, Summer Capital of the Philippines is 70 kms. East and 5,500 ft. above sea level. A golf course at Camp John Hay, the R & R centre of US Servicemen can be used by civilians.

SHORE LEAVE: Crew members are allowed to go ashore without special permission.

AUTHORITY: PPA, PMU San Fernando.

TABACO: 13.41 N. 123.68 E. (See Plan Book)

DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advice should be sent to the Harbour Pilot Association, Legazpi City at least 24 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 kms. from the wharf aboard a boat displaying a Pilot's flag.

ANCHORAGE: Within the Tabaco Bay but not less than 500 m. from the existing facility.

RESTRICTIONS: Berthing space is limited due to its physical length and the existence of a shipwreck at the Northern end of the wharf.

MAX. SIZE: LOA – 300 m.; draft – 28 ft.

HEALTH: Vessels clear quarantine on arrival at the Tabaco Harbour. Quarantine officers will normally board the vessel 2 kms. from the existing wharf.

BERTHING: The existing facility can accommodate two foreign-going vessels of regular size at one time. Length of quay 270 m. Width 12 m. Storage area 2 hectares. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging, 22 tons per gang hour.

CRANES: 2 shore cranes available with capacities of 20 and 25 tons. For heavy lifts, vessels are required to use their own gear.

STEVEDORES: Provided by Tafworks Arrastre Corporation.

MEDICAL: 1 government hospital and 2 private hospitals.

FRESH WATER: Can be provided by pipe-line or hoses from the port facilities.

FUEL: All grades obtainable from major oil depots at Legazpi City which is approximately 27 kms. from the port area and supplied by lorries alongside.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

HATCHES: Opening and closing of hatches is part of the stevedores work or at the Master's option.

REPATRIATION: All facilities available for crew changes.

AIRPORT: At Legazpi City.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day; (May 1st); Independence Day (June 12th); P.I.U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special Holidays declared by the Prime Minister of the Republic of the Philippines are also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: Police and Fire, Tel. 222; Ambulance, Tel. 215.

TELEPHONES: Placing of telephones on board can be arranged with the branch office of the local telephone company (MATELCO).

SHORE LEAVE: Crew can be allowed ashore in company of an Immigrations Agent.

DEVELOPMENTS: Salvaging of the shipwreck at the Northern end of the wharf, extension of the existing facility by 120 m.

GENERAL: Vessels intending to call at the port of Tabaco shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come first-served basis.

AUTHORITY: The Supervising Officer, Philippines Port Authority.

TACLOBAN: 11.15 N. 125.00 E. (See Plan Book)

See "General" before first port.

PILOTAGE: Notice of ETA of vessel must be given at least 24 hours in advance and must be sent through cablegram direct to Collector of Customs, Tacloban City.

ANCHORAGES: Safe anchorage: low tide, 17 ft. draft; high tide, 19 ft. draft; area for anchorage, 300 ft. length.

ENTRY RESTRICTIONS: At the discretion of the Collector of Customs.

MAX. SIZE: Permissible length 300 ft. Draft low tide, 17 ft.; high tide, 19 ft.

HEALTH: Pratique is only necessary and required in the first port of entry; it is automatic when entering ports in the same country or state.

RADIO: Radio communication of the Philippines, Inc., Manila.

TUGS: Ship's Agent arranges tug's lines with watchmen.

BERTHING: Inform Customs Collector at least 24 hours before ETA of vessel so that berthing space can be reserved.

STEVEDORES: ETA advices should be furnished to stevedores through ship's Agent.

MEDICAL: Advance notice of required medical attention to ship's Agent essential.

FRESH WATER: Fresh water available delivered by water-tank truck.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Necessary for safety of vessel. Ship's Agent makes all necessary arrangements.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: All documents required by International Shipping Rules and Regulations.

CUSTOMS ALLOWANCE: One carton cigarettes per week for each man. Wines/spirits at the discretion of the Collector of Customs.

IDENTIFICATION CARDS: Needed for inspection by Immigration Officer.

REPAIRS: Not possible.

REPATRIATION: Immigration Officer effects crew exchanges and arranging necessary repatriations.

AIRPORT: Distance from airport, 9 km., and is regularly served by airlines.

TIME: GMT plus 8 hours. No alterations during the year.

HOLIDAYS: Depending upon agreement with stevedores, work may be performed during holidays.

POLICE/AMBULANCE/FIRE: All departments are within one minute's call from the harbour.

TELEPHONES: Can be connected on board if required.

AUTHORITY: Collector of Customs.

TANAUAN: 11.06 N. 125.01 E. (See Plan Book)

SHIPMASTER'S REPORT: 1976

N.I.D.C. Coconut Oil Pier: Location of berth 11° 06′ 15″ N. 125° 01′ 30″ E. The berth is 7 miles from the Pilot boarding point. Least depth of water in channel from sea to berth, 32 ft. At berth bottom is mud and sand. Density 1025. Docking and undocking in daylight only at any stage of tide.

Anchorage 1.5 miles North of Mariquitdaquit Light. Terminal Information: Use shore hoses. Length of pipe-line – 3,000 ft. connection at manifold – 8 in. Shore-booster pump not used. No steam. Product handled, coconut oil.

Port Information: Pilotage compulsory. Pilot requires 12 hours and 24 hours notice. Pilot boards 1 mile North of Mariquidaquit Island and comes from Tacloban. It is unsafe to enter and leave after dark. Vessels can enter and leave any state of tide. Max. LOA 1,000 ft. Max. beam 90 ft. Max. draft 31 ft. No tugs available. Vessel able to berth and unberth without aid of tugs.

Facilities available: Fresh provisions available from Tacloban, a small town, 20 km away. Chandler requires payment in cash for goods.

Airport at Tacloban. Doctor and hospital available. Groceries, meats and laundry available.

No fresh water, repairs, Lloyds surveyor or fuel available.

ZAMBOANGA: 06.54 N. 122.04 E. (See Plan Book)

See "General" before first port.

PILOTAGE: Vessels approaching the port use International Code Signals for calling Pilot.

Pilot Station: Telegraphic address is Zamboanga Pilots, Zamboanga City. Estimated time of arrival (ETA) must be radioed 24 hours in advance. Pilots always on duty. Pilot boat is wooden launch painted white with red trimmings and displaying the pilot flag. The exact area where a Pilot will board vessel is in the vicinity of Little Sta., Cruz Island, for vessels coming from West, and near the vicinity of Rio Hondo for vessels coming from East. Alternative area in the event of bad weather is in the vicinity of Zamboanga Pier at a distance of at least 1 mile either way. Vessels awaiting Pilot should not necessarily drop anchor, provided 24 hours notice of their ETA is given by local Agents or the Master, to the Zamboanga Pilots, for a Pilot is *always* on duty.

ANCHORAGES: Owing to the steep bank, strong currents and hard, uneven bottom, there are no good anchorages off Zamboanga. However, anchorage may be made anywhere Southward of the wharf at a distance of about 3 cables from shore Eastward of an imaginary line from the Tide Indicator, at a depth of between 25 and 30 fathoms and giving 7 shackles of chain in the water. This will hold vessel even at strongest current of 6 knots. In the event of very bad weather the vessel should transfer her anchorage to Caldera Bay, which is approximately 7 miles West of the anchorage area.

MAX. SIZE: No limits for anchoring. For berthing, up to 32 ft. draft.

HEALTH: Quarantine Officer will board the vessel for the necessary inspection of all crew on board. Thereafter he issues pratique, if and when he finds that there is no disease or fever on board. The pratique is valid until after the vessel departs to a foreign port.

RADIO: Universal Telecommunication Service, the Capitol Radio Telecommunication, the Telefast Radio Communication, the Radio Communications of the Philippines and the Telecom, operated by the National Government for receiving and transmitting radio messages. Night and day services.

TUGS: The position where tugs normally join the vessel is in the stream and the usual ship's lines or tug's lines are used. There is no charge collected for the use of the tug's lines.

BERTHING: The Zamboanga Government wharf is about 800 ft. long with a depth at the latest survey of the following: East end 30 ft.; mid-section 25 ft. and West end 21 ft. There is a private wharf at Baliwasan and vessels of 15,000 g.r.t. can dock there with the following limitations: Draft forward must not exceed 32 ft.; draft aft must not exceed 36 ft., upon completion of loading. Vessels docking at this wharf can only be docked at *flood* tide (current running East to West) and can only be undocked in the same manner.

2 anchors must be used in berthing and vessels lay alongside the concrete pier port-side-to. This wharf in Baliwasan is for loading coconut oil and copra pellets only.

TANKERS: There are 4 oil depots at Gavilan Pt. and at Baliwasan. (Shell, Mobil, Esso and Caltex.) Max. tonnage of 4,000 gross with a draft of not more than 18 ft. can be moored for discharge.

STEVEDORES: The Master of the vessel shall wire to the local Agents of the vessel so that a contract could be made with the shipper to arrange gangs.

MEDICAL: It is necessary for Agents to receive advance notice of required medical attention. Hospital facilities are available at all times. Inoculations are also required by the Quarantine Officer upon boarding a vessel.

FRESH WATER: Fresh water can be obtained only at night-time due to low pressure. If there is no available space at the Zamboanga Pier the vessel has to wait at the anchorage for a berthing space to get water supply.

FUEL: Fuel, diesel, and crude oil available.

FIRE PRECAUTIONS: Smoking is entirely prohibited on board a tanker entering this port. The Master must advise all persons boarding his vessel.

DEVELOPMENTS: Improvements are carried out every year to the local wharf adding additional berths and dredging to increase draft.

GANGWAY/DECK WATCHMEN: The services of watchmen are necessary to foil looters from boarding the vessel.

OPENING/CLOSING HATCHES: Normally opening and closing of the hatches are done by the crew, and if the job is done by stevedores the vessel has to pay.

CUSTOMS ALLOWANCE: 200 cigarettes per man. Upon arrival in port the cigarettes are sealed in a bonded store by the Customs authorities, and can be opened only upon permission granted by the Collector of Customs.

IDENTIFICATION CARDS: All crew members to have identification cards for immediate identification in case of trouble while the crews are on shore.

CONSULS: None available.

REPATRIATION: Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship Agent and the foreign Embassy concerned.

AIRPORT: Distance from Zamboanga Pier to the airport is 3 km. Served by regular airlines. There is a daily flight from Zamboanga to Manila by Philippine airlines. Airport open to International flights.

TIME: Local Civil Time is 8 hours ahead of GMT. This time reckoning is constant throughout the year.

HOLIDAYS: Cargo work can be arranged with the Stevedoring Company through the shipper to work during holidays, including Sundays.

POLICE/AMBULANCE/FIRE: Police Department, tel. 06; Ambulance, Zamboanga General Hospital, tel. 08; and Fire Department, tel. 00.

TELEPHONES: Telephones cannot be installed on board when docked at the pier as is not allowed by the City Government.

SERVICES: Special services may be available, e.g. tank-cleaning equipment, facilities for discharge of tank-washings, compass adjusting, through representations to be made with the shipper or local Agent of the vessel.

AUTHORITY: The Collector of Customs.

NOTES

Please also advise Shipping Guides Ltd.

Poland

GDANSK: 54.21 N. 18.39 E. (See Plan Book)

ICE: Efforts made to keep port open all year round. Only in very severe winter are difficulties experienced.

DOCUMENTS:
12 Copies Cargo Manifest.
2 copies Bills of Lading.
Discharge Books to be collected for presentation.
Ship's Register.
Maritime Declaration of Health.
Ship's Articles/Crew List.
Deratisation Certificate or exemption from Sanitary Certificates, covering food cargoes and/or of animal origin, destined for discharge here.
Specification of Dangerous Cargo even if in transit.
2 Stowage Plans.

PILOTAGE: Compulsory. Boarding in Gdansk road. Gdansk Pilot station available on VHF, Channel No. 14.

ANCHORAGE: Gdansk roads up to buoys NP1, NP2. No tides.

RESTRICTIONS: Approaches 36 to 40 ft. depth.

MAX. SIZE: Max. size of vessels permitted to enter: draft, 33 ft. brackish water; Max. LOA 220 m. Also see "Tankers" and "Bulk Handling Facilities".

HEALTH: Maritime Declaration of Health to be presented on arrival. In the event of suspected disease, the vessel should wire to "Quarantine Gdandsk", or via Agents.

RADIO: Messages should be sent via Gdansk Radio.

RADAR/VHF: Port Radar Service acting with Pilot station, contactable on VHF Channel No. 14.

TUGS: Join in Gdansk roads. Vessel's lines must be used. Tugs compulsory for all vessels over 2,000 g.r.t.

BERTHING: Max. draft mentioned below is to be taken as normal water level. No tide.

Name of quay	*Length*	*Max. Draft*
King Wladyslaw IV Basin	1,190 m.	29 ft. 06 in.
Defenders of Westerplatte	1,442 m.	33 ft. 06 in.
Oliwskie	1,278 m.	31 ft. 00 in.
Defenders of Polish Post Office	330 m.	33 ft. 06 in.
Ziolkowski (Ro-Ro)	123 m.	20 ft. 00 in.
Iron Ore and Coal Quays	1,612 m.	32 ft. 02 in.
Administration Quay	80 m.	19 ft. 02 in.
20th Anniversary Quay	1,076 m.	32 ft. 00 in.
Timber Terminal	510 m.	25 ft. 09 in.
Chemist's Quay	250 m.	32 ft. 00 in.

CRANES: Floating cranes of 26–100 tons capacity. Many portal cranes up to 8 tons capacity.

BULK HANDLING FACILITIES: Bulk and liquid sulphur handled at Post Office Defenders Quay.

Coal/Ore quays equipped with 7×16-ton cranes and 10 ore bridges of 15 tons capacity. Grain elevator at Anniversary of the Republic Quay.

A conveyor system for fertilisers in bulk 20 ton grab cranes at Chemists Quay.

In the event of no accessible berth and/or grain elevator not being available, such bulk cargoes discharged by grabs. Vessels should be suitable for grab discharge.

North Port Bulk terminal: Coal-handling facilities capable of receiving vessels up to 100,000 d.w.t. max. daily loading rate 50,000 tons. Max. draft 49 ft. 03 in.

STEVEDORES: As gangs for the following day must be ordered before 1100 hrs., vessel's ETA should reach the Agents relevantly in advance.

Stevedores work 24 hours per day, which is considered to be between 2300 to 2300 hrs. following day. First shift from 2300 to 0700 hrs., second shift from 0700 to 1500 hrs., third shift from 1500 to 2300 hrs. Port works Sundays nd holidays at premium rates.

MEDICAL: No special notice required. Full hospital facilities available.

TANKERS: Oil Terminal at North Port.

Location: Southern part of the Gulf of Gdansk, Latitude 54° 21′ N. and Longitude 18° 40′ E. approximately. Vessels to use the roads between the end of peninsula Hel and anchorage South of Latitude 54° 25′ N., approximately 0.5 mile North of the terminal. Imports crude oil, exports fuel and refined oils, as well as other products of the Gdansk Refinery. No facilities for handling liquified gases.

Facilities: One L-shaped jetty for berthing consists of one main platform and four main dolphins, fitted with quick release hooks. The main platform is fitted with gangway tower and seven movable handling arms for loading and discharging purposes. Only one mooring place available. The jetty accessible for vessels having minimum 260 ft. (about 35,000 d.w.t.) and maximum 1,000 ft. length and 49 ft. draft. For towing purposes there are available two 2,500 h.p. and two 1,650 h.p. diesel tugs, if necessary further 1,200 h.p. tugs are at hand. All tugs equipped with fire fighting equipment.

Cargo Handling Equipment: The seven mobile handling arms, Luceat Production, are used as follows: No. 2, 3 and 4 for discharging of crude oil, speed about 10,000 cu.m/hr. No. 1 and 5 for loading bunker oil and water, efficiency about 2,000 cu.m./hr. No. 6 and 7 loading liquid fuels and refined products 2,000–2,500 cu.m./hr. Loading pressure of vessels pumps should not exceed 14.5 kg./sq.cm. at any time.

For the time being, as terminal is still under construction, no facilities for handling of vessels ballast water available.

Services: Marine diesel and fuel oil available at the jetty. Storage tanks located in the neighbourhood of the terminal and connected with central pipe-line system of Poland. Laboratory, for testing purposes and repairing facilities available.

DENSITY: Salt content: 0.54%

FRESH WATER: Available at hydrants.

FUEL: Heavy, intermediate and thin fuels, marine diesel oils and gas oils available ex-shore installation or lighter. 48 hours notice required.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, crew allowed to handle.

CERTIFICATES:
Load Line Certificate.
Cargo Gear Certificates.

CUSTOMS ALLOWANCE: For 3 days – 160 cigarettes or 30 cigars or 150 gm. tobacco per crew member. Master is allowed double ration. 1 bottle wine and 1 bottle of spirits per crew member for each 3 days. Master is allowed double ration.

IDENTIFICATION CARDS: Each member must be in possession of a valid Discharge Book/Sailor's Book, and will receive a separate shore permit issued by the Immigration Authorities, entitling him to go ashore within the area of Gdynia/Sopot/Gdansk.

CONSULS:
Chinese People's Republic Consulate General, tel. 41-64-76.
German Democratic Republic Consulate General, tel. 41-43-66.
Soviet Consulate General, tel. 41-06-13.

REPAIRS: All types of deck and engine repairs performed by specialised ship repair yard.

Floating docks: No. 1, 6,400 tons lifting capacity, dim. 135×25.20 m. No. 2, 8,000 tons lifting capacity, dim. 156×27.20 m. No. 3, 11,000 tons lifting capacity, dim. 176×28.00 m. 1 floating jack of 1,700 tons capacity and 3 minor docking pontoons.

REPATRIATION: Crew change and repatriation can be arranged.

AIRPORT: Gdansk Airport.

TIME: Middle European Time, which is 1 hour ahead of GMT throughout the year.

HOLIDAYS: New Year's Day (January 1st); Easter Sunday (movable); Easter Monday (movable); Labour Day (May 1st); Corpus Christi (movable); National Holiday (July 22nd); All Saints' Day (November 1st); St. Barbara, only for workers loading coal. (December 4th); Christmas Day (December 25th); Second Christmas Day (December 26th). On Christmas Eve and New Year's Eve, work is generally suspended at 1500 hrs. In justified and approved cases, overtime on Sundays and holidays is arrangeable.

TELEPHONES: Available on most general cargo quays.

GENERAL: Cargo is handled around the clock in 3 shifts of 8 hours each. Saturdays are full working days. Sunday and holiday interruptions last from 2300 on Saturdays or days before holidays, and terminate at 2300 on Sundays or holidays.

POLICE/FIRE/AMBULANCE: Police: Gdansk-Nowy Port, Wladyslawa IV-3, tel. 31-48-61; Ambulance: Gdansk-Wrzeszcs, Al. Zwyciestwa 49, tel. 41-10-00; Fire: Gdansk-Nowy Port, Na Zaspy 57, alarm phone tel. 41-22-22.

AUTHORITY: The Port of Gdansk Authority.

AGENT: Morska Agencja, Harbour Office Gdansk, Oliwska 35 – Gdansk-Nowy Port. Tel. 430-921 (day and night service). Telex: 051-641.

NOTES

Please also advise Shipping Guides Ltd.

Portugal

AVEIRO: 40.39 N. 08.45 W.

PORT LIMITS: A vessel is considered "arrived" when she is 2 miles from the roads entrance.

DOCUMENTS: Health Certificate.
5 Crew Lists.
4 Lists of Passengers Disembarked.
2 Lists of Passengers in Transit.
5 Cargo Manifests.
1 Manifest of Cargo in Transit.
1 Provision List and Spares.

PILOTAGE: Send ETA to Agent by cable, 24 hours before arrival. Entrance depending on sea conditions and ship's draft. Contact Aveiro Pilots frequency 2182 and listen on frequency 2132 on the following periods: 0905/0915, 1105/1115, 1505/1515, 1705/1715 hrs. local time.

Pilots can be contacted by VHF Channel 16 during the same periods.

Pilot boat displays white flag, surrounded by narrow blue stripe, with black "P" in the centre. Pilot to be taken on board about 1 mile West of harbour entrance; vessel awaiting Pilot can anchor there, if weather permits.

Pilot station, located close to Aveiro lighthouse, hoists black cylinder on signal mast when entry not possible due to bad weather or any abnormal cause. Pilot boat has radar that can assist vessels during approach to harbour entrance.

ANCHORAGES: Anchor W. of North Pier, at a distance of more than 0.75 mile.

RESTRICTIONS: Subject tide and bar conditions. Entering and sailing only during daylight.

MAX. SIZE: Max. draft between 16 to 18 ft. dependent on tide. Max. length 90 m.

HEALTH: Free pratique automatic for vessels coming from other Portuguese and Continental ports. Vessels coming from other countries; Health Certificate must be delivered to Agent.

RADIO: Call Aveiro Pilots during the hours above indicated, under "Pilotage". Radio station is Lisboa Radio.

TUGS: 2 tugs. 1 of 200 h.p. and 1 of 500 h.p.

BERTHING: A quay with 1,300 ft. length for handling general cargo; 10 gangways in concrete for ocean fishing boats; 4 electrical cranes of 3, 6 and 12 tons and 11 mobile cranes for cargo-handling up to 8 tons.

SPECIALISED CARGO-HANDLING FACILITIES: A terminal for handling wine, chemicals and turpentine, another for handling liquid combustibles and chemicals.

STEVEDORES: Advise Agent 24 hours before vessel's arrival.

MEDICAL: Hospital and clinics in town. Advance notice not required. Required vaccination certificate, and when ship comes from affected regions, also yellow fever certificate.

TANKERS: Private quay of SACOR used by small-sized tankers.

DENSITY: About 1028.

FRESH WATER: Supplied by barges or tank-car or water net system. 20 t.p.h.

FUEL: Only diesel available. Smaller quantities supplied from trucks. Otherwise, from SACOR's private quay (pipe-line).

DEVELOPMENTS: Dredging harbour entrance.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Work usually done by crew.

CUSTOMS ALLOWANCE: 125 grams tobacco, and 1 bottle wine/spirits for each man.

CREW IDENTIFICATION CARDS: Crew members going ashore will need a special card issued by State Police. Ship's agent takes these cards aboard, where they are filled in accordance with crew list. See "Lisbon".

CONSULS: Nearest Oporto, 60 km.

REPAIRS: All repairs can be carried out.

DRY DOCKS: 1 Drydock (100 m.×18 m.) for vessels up to 3,000 d.w.t. and 1 floating dock for vessels up to 1,200 d.w.t.

REPATRIATION: No difficulties for crew repatriations.

AIRPORT: Pedras Rubras (Oporto Airport) at about 60 km., with 2 flights per day to Lisbon and 1 flight per week to London.

Lisbon Airport at 250 km. is served by regular airlines covering all the world.

TIME: From 1st October to 1st April – GMT. From 1st April to 1st October – GMT plus 1 hour.

HOLIDAYS: New Year's Day; Liberty's Day (25th April); Portugal's Day (10th June); Workers' Day (1st May); 16th May (Municipal holiday); Corpus Christi (movable); Proclamation of the Republic (5th Oct.); All Saint's Day (1st Nov.); Independence of Portugal (1st Dec.); Immaculate Conception (8th Dec.); Christmas Day. No work allowed on Christmas Day and New Year's Day.

POLICE/FIRE/AMBULANCE: Police 22022; Ambulance 115; Fire 22333.

TELEPHONES: None available on board.

SHORE-LEAVE: Crew allowed ashore.

DELAYS: As a tidal port, arrivals respectively sailings subject tides. Delays may occur owing to bad weather especially the Winter months.

AUTHORITY: Capitania do porto de Aveiro. Junta Autonoma do Porto de Aveiro.

AGENTS: A. J. Goncalves de Moraes, Lda, 49 Av. Dr. Lourenco Peixinho, Aveiro. Tel. 24550. Telex 22690. Cables: Amoras. After hours Tel. 24666. Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

FIGUEIRA DA FOZ: 40.09 N. 08.52 W.

DOCUMENTS:
Health Certificate (the Pilot supplies form).
5 Crew Lists.
4 Lists of Passengers Disembarking.
2 Lists of Passengers in Transit.
5 Cargo Manifests.
1 Manifest of Cargo in Transit.
Provision and Spares List.
2 copies each Bill of Lading.

PILOTAGE: Compulsory. Send ETA to Agent by cable 24 hours before arrival. Convenient try arrive 1 hour before high tide. Call Figueira-Pesca frequency 2182 and listen on frequency 1785 or 1834. Await Pilot 0.5 mile from the piers. VHF Channel 16 is being used experimentally.

ANCHORAGES: South of N.W. Azimuth of North Pier, at a distance of more than 0.5 mile.

RESTRICTIONS: No services during night.

MAX. SIZE: Max. draft 12 ft. Max. length 65 m.

HEALTH: Free pratique authorised for vessels coming from other Portugese Continental ports. For vessels coming from other countries, Health Declaration supplied by the Pilot must be filled in.

RADIO: Figueira — Pesca listens on 2182 Khz permanently, except between 1900 hrs. (on Saturday) till 0100 hrs. (On Monday).

TUGS: 2 tugs available, 200 h.p. and 120 h.p.

BERTHING: The port is in the mouth of the Mondego River. The anchorage is on sand and outside the harbour.

Concrete Quay: Length 360 m. Depth 6 m. Cranage: 3 electric – 2×6 ton at 20 m. and 1×3 ton at 16 m. 4 mobile – 1×1.8 ton at 12 m. and 3×1.5 ton at 8 m.

Wood Quay: Length 140 m. Depth 3 m. Cranage: 1×6 ton crane.

Tidal Harbour: Water area 6 ha. Length of quayage 600 m.

Depths on Bar: M.H.W.S.T. 3.8 m. M.H.W.N.T. 3.00 m.

There is about 320 m. of quayage for small ships and fishing craft.

STEVEDORES: Advise agent 24 hours before arrival.

MEDICAL: No prior advice is necessary. All medical facilities available.

DENSITY: About 1028.

FRESH WATER: Each quay has its own installations.

FUEL: Only diesel available.

DEVELOPMENT: Dredging in progress.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Work usually done by crew.

CUSTOMS ALLOWANCE: No limit, but must be declared.

IDENTIFICATION CARDS: See "Lisbon".

CONSULS: France, Spain and Great Britain.

REPAIRS: There is a shipyard and repair facilities, also a shipway for ships up to 4,000 tons.

REPATRIATION: No difficulty in crew repatriations.

TIME: From last Sunday in September till last Sunday in March (GMT) and the rest of the year GMT plus 1 hour.

HOLIDAYS: New Year's Day; Good Friday; 25th April; 1st May; Corpus Christi (movable); 10th June; 15th August; 5th October; All Saint's Day (1st November); 1st December; 8th December; 24th December; 25th December.

Also holiday on 24th June.

POLICE/FIRE/AMBULANCE: Police 22022; Ambulance 22122; Fire 22122.

SHORE LEAVE: Crew allowed ashore.

DELAYS: As a tidal port, arrivals and sailings subject tides. Delays may occur owing to bad weather especially during Winter months.

AGENTS: A. J. Goncalves de Moraes, Lda., 262-Rua da Republica, Figueira da Foz — Portugal. Tel. 22584. Telex: 13207. Cables: Amoras. After office hours: 25016 and 24666 ("Aveiro" network). Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

LEIXOES and OPORTO (Douro River):

(See Plan Book)

Leixoes: 41.11 N. 08.43 W. Oporto: 41.09 N. 08.37 W.

DOCUMENTS:
Health Certificate.
5 Crew Lists.
Provision List — ship and individual.
Tobacco Declaration and Entrance Forms supplied by Agent on arrival.
5 Manifests and 2 copies of each B/L concerning cargo to be discharged.
1 Transit Manifest if cargo in transit exists.

PILOTAGE: Available day and night in Leixoes, but in Oporto only between sunrise and sunset, and then dependent upon sea conditions. Vessels must communicate their ETA a minimum of 12 hours ahead and confirm again 4 hours in advance. Departures must be communicated 2 hours ahead between 0800 and 1800 hrs. This must be done via the Radar Station.

Pilot boat recognition:

By day – black hull, with the letter "P" painted in white. Also a flag may be hoisted which is white, lined in blue, and with a black letter "P" in the centre.

By night – a white light at the top of the mast forward and lower down a red light.

Call-up signals by ship's siren:

To call Pilot – Letter "G" in morse, or Letter "O".

To call pilot launch – Letter "O" in morse.

ANCHORAGES: Leixoes in the roads or outer-harbour. Douro in the roads or river.

RESTRICTIONS: Douro: subject tide and bar conditions.

MAX. SIZE: Douro River: Max. draft 14 ft. and length about 60 m. subject to Bar and weather conditions.

Leixoes: Can accommodate tankers up to 52 ft. (However this may be reduced until a wreck has been removed, also max. LOA 200 m. until wreck removed) and cargo ships of 31 ft.

HEALTH: Free pratique authorised for vessels coming from other Portuguese Continental Ports. For vessels coming from other countries Health Declaration supplied by the Pilot must be filled in, and delivered to the Agent.

RADIO: Leixoes Naval Radio Station listens 2182 kHz and works on 2182, 2097, 2566, 2657, 4474.5 and 7510 kHz, or through Lisbon Radio Station.

RADAR/VHF: Estacao da Radar de Leixoes, Contacts radar/VHF. Range 50 miles. Channel 16, 13, 12 and 29.

TUGS: Normally join the vessel: *At Leixoes:* 6 tugs, 875–2,800 h.p. In the outer harbour up to 700 g.r.t., no tug required; from 700 up to 1,800 g.r.t. 1 tug compulsory. Over 1,800 g.r.t., 2 or more tugs required.

At Douro River: as a rule service necessary on arrival/sailings. Thus join the vessel after passing the bar.

BERTHING *Outer Harbour:* The depth of water at the entrance and in the centre of the outer harbour is 10.00 m. at MLWST; Maximum rise of tides 3.99 m.; Minimum rise of tides 0.07 m.; Total water area 117.36 ha.; Breadth of entrance (harbour) 220.05 m.; Breadth of entrance (Dock No. 1) 113.00 m.

Dock No. 1: Length of North Quay 487 m.; South Quay 551 m.; Maximum draft 29 ft.

Dock No. 2: Length of North Quay 670 m. and South Quay 743 m.; Maximum draft 30 ft.

South Mole: Length of Quay 370 m.; Maximum draft 22 ft.

Dock No. 2 South Container Terminal: This facility has a quay length of 125 m. with a depth of water alongside of 30 ft. There is a total area of 5.5 hectares (13.59 acres) of which 4.5 hectares (11.12 acres) are used for container marshalling and storage. It is equipped with one 30-ton Liebherr container gantry crane with an outreach of 24.38 m. (80 ft.), four 30-ton Karricon 3043 straddle-carriers, capable of stacking three high, two 35-ton side-loaders, capable of stacking two high, and two 12-ton container transporters.

CRANES: *Dock No. 1:* One 94-ton crane, two 5-ton cranes, eight 3-ton cranes and one 15-ton crane.

Dock No. 2: Two 15-ton cranes and thirty-one 5-ton cranes.

South Mole: Six 5-ton and one 2.5-ton crane.

BRIDGES: Bridge at Leixoes between Dock 1 and Dock 2 opening regularly.

STEVEDORES: Ordered by Agents according berth and cargo.

MEDICAL: Masters to advise by radio prior to arrival if medical attendance is required on board. Hospital facilities available.

TANKERS: *Berth A:* This is outside the outer harbour; depth of water 17.00 m.; deadweight capacity 120,000 tons. Max. draft 52 ft. Also see "Max. Size".

Berth B; This is within the outer harbour; depth of water 9.70 m.; deadweight capacity 27,000 tons. Max. draft 29 ft.

Berth C: Located within the outer harbour; depth of water 5.70 m.; deadweight capacity 5,000 tons. Max. draft 17 ft.

DENSITY: 1026.

OPENING/CLOSING HATCHES: Work always done by crew.

CERTIFICATES: Ship register.

Safety Radio.

Safety Equipment.

Load Line and Derating Certificates.

IDENTIFICATION CARDS: See Lisbon.

LISBON: 38.43 N. 09.11 W. (See Plan Book)

PORT LIMITS: A vessel is considered to be an "arrived vessel" when, after entering the Tagus Estuary, she has left behind the alignment between the Torre of S Juliao and the Torre of Bugio.

DOCUMENTS:

Health Certificate.

6 Crew Lists.

10 Passenger Lists.

2 Lists of Articles held by the crew: cameras, binoculars, radios, cigarettes, spirits, etc.

2 Stores Lists.

All to be signed by ship's Master.

Certificates for vessels up to 500 tons: – tonnage register, loading and navigation certificates. For vessels over 500 tons: – tonnage register; loadline; radio; safety equipment and navigation certificates.

Cargo Documents:

10 Manifests.

3 sets of Bills of Lading.

For cargo in transit: 2 Manifests.

PILOTAGE: Compulsory. Pilot boat anchored outside the river at Cascais Bay, day and night, but Pilot can also board vessel inside the river at Belem Station.

Pilots are to be requested not less than 6 hours or more than 24 hours prior to the ship's arrival, by a radiogram addressed to "Pilotos Lisboa", or by a radio call direct to the pilot boat stating ship's name, estimated time arrival at the pilotage area, the station where ship wants to take Pilot, and vessel's draft. Any vessel failing to correct her ETA or arriving more than 2 hours after her ETA may have to wait at Cascais before a Pilot is available to board.

Pilots can be contacted by VHF Channels 13 and 16, on permanent watch, and by radio-telephone 2182 kHz.

MAX. SIZE: Depth alongside piers varying between 15 and 34 ft.

HEALTH: Ordinary visit made at central area with vessel anchored, from 0800 hrs. to sunset. Master may ask for free pratique to get ship moored immediately on arrival. For this, necessary to cable the Health Authorities, addressing cable as follows: Estacao Maritima de Lisboa, Rocha do Conde de Obidos, max./min. respectively 15/6 hours prior to the ship's arrival. Text of cable: "ship's name, nationality, code (MIBDU), day and time of arrival" signed by the Master.

RADIO: ETA to be advised by Master, to Agent, 24 and 12 hours before ship's arrival. Lisboa Radio: call sign CUL, medium and short waves by code 720, 22, 24. By VHF Channels 5, 9, 21, 16 and 19.

BERTHING: Subject to berth availability.

SPECIALISED CARGO-HANDLING FACILITIES: *Container Terminal* at Santa Apolonia equipped with two portainers of 30 tons each, side loaders, semi trailers, tractors, etc., depth 8.5 m.

Roll-on/roll-off Terminal at Alcantara for ferry boats and cargo.

Grain Elevators and Silos at Poco do Bispo operated by Instituto dos Cereois. Unloading by elevator up to 400 t.p.h.

Ore Terminal: At Barreiro there is a terminal for unloading ore from railway wagons to lighters, intended for carrying ore, in particular, to the national steel works (Siderurgia Nacional).

Cement Storage Terminal: This is at Poco do Bispo and is operated by Secil.

STEVEDORES: Ordered by Agents according berth and cargo.

MEDICAL: Masters to advise by radio prior arrival if medical attendance required on board. Hospital facilities available.

TANKERS: Shell and Petrogal berths exposed to 9 knots HWST current. Essential to use good new mooring lines.

Cabo Ruivo Terminal: This is operated, on a concession basis, by Soponata and has depths of 11 m., capable of mooring tankers up to 65,000 d.w.t. alongside its jetty.

Fuel Oil Facilities: The port of Lisbon fuel oil installations belong to private companies and are concentrated along both banks of the Tagus at the following points:

Sacavem and Cabo Ruivo (with oil refinery facilities), Montijo, Barreiro, Santa Iria, Porto Brandao, Porto dos Buchos.

DENSITY: 1025.

FRESH WATER: Usually supplied by barge unless vessel lying alongside a pier where water provided.

FUEL: Shell, Esso, Petrogal. These companies can supply through their own barges or alongside their private bunkering stations on pier.

IDENTIFICATION CARDS: Crew members going ashore will need a special yellow card issued by Agent and stamped with police visa. The cards are supplied by Agent to be completed on board in accordance with crew list particulars. With these shore passes Crew members may circulate between Lisbon and Cascais, and Lisbon and Sintra.

Master and/or Owners will be fined Esc. $1,000 for any Crew member found ashore without that card. A double fine will be imposed in case of recurrence.

Similar cards, but white, are required for passengers in transit.

CONSULS: Practically all countries are represented in Lisbon.

REPAIRS: There are several repair work-shops. The biggest is Lisnave Shipyard with several docks, one for vessels up to 300,000 tons and a new dock where vessels up to 1,000,000 tons can be repaired.

AIRPORT: Within the Lisbon area. Regular International services.

REPATRIATION: No difficulties for crew changes or repatriation.

POLICE/AMBULANCE/FIRE: Maritime Police 608104; Ambulance 115; Fire 322222.

TIME: September 24th–March 26th – GMT. March 26th–September 24th – GMT plus one hour.

HOLIDAYS: 1st January; 24th March; 25th April; 1st May; 25th May; 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December.

DEVELOPMENTS: In a second stage of the Santa Apolonia container terminal there will be a new wharf of 500 m. length, with water depths of 13.5 m. and a close levelled paved ground area of nearly 50,000 sq. m. which is in advance phase of construction. This terminal will have, when completed, an 850 m. long wharf and a close paved area of 75,000 sq.m.

This second stage will also include two roll-on/roll-off berths, as well as lift-on/lift-off equipment. It is operated by the Port Authority.

AUTHORITY: Administracao Geral do Porto de Lisbon.

AGENTS: A. J. Goncalves de Moraes, Lda., 22, Rua do Alecrim – Lisbon-2. P.O. Box 2772. Tel. 364943-366671. After hours Tel: 2750594. Telex 12296/7/8. Cables: Amoras. Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

SETUBAL: 38.30 N. 08.55 W.

DOCUMENTS:

5 Crew Lists.
5 Passenger Lists.
Personal belongings of the Crew (portable radio, binoculars, cameras, etc).
Store List.
Health Declaration.

For cargo: Dangerous Cargo List. Cargo Manifest. Transit Cargo Manifest (if any). Copy of B/L.

PILOTAGE: The pilotage service is supplied exclusively by the "Corporacao de Pilotos do Rio e da Barra de Setubal" which runs a permanent service.

To assure prompt attention requests for Pilots must be made in the following manner:

Entries: To send at least 6 hours beforehand a radiotelegram or a radiotelephone message preferably on S.S.B./AM to Pilotos de Setubal giving the name of the ship, ETA and draft.

This information must be confirmed on VHF or IF two hours before the ship arrives at the bar.

Departures and movement in the River: Between 0800 hrs. and 1800 hrs. on weekdays and 0800 hrs. and 1300 hrs. on Saturdays. Sundays and holidays, to communicate by telephone or on VHF with the "Estacao de Pilotos de Setubal" at least one hour beforehand, giving the name of the ship, the time and place where the Pilot is required and the service needed.

Only in cases of emergency will requests be accepted outside these hours.

To effect requests for Pilots, the Corporacao de Pilotos de Setubal use the following means of communication:

VHF — Listening permanently on Channel 16 (156.80 m/cs.) being able to reply on any of the following Channels as requested: 6, 8, 13, 16, 18, 22, and 73.

IF — Listening in permanently on 2182 kc/s., replying Pilotos de Setubal on 2132 kc/s., their working frequency. Once contact has been established ships must change to this frequency. Communications can be made in SSB or AM according to the equipment of the ship.

Telephone of CTT — No. 22914.

The Pilots embark by motor launch based in Setubal and waiting near the fort at Portinho da Arrabida when necessary and the weather permits.

To increase speed and safety on embarking and disembarking, ships of more than 4,000 tons gross, when light, and those of greater capacity in any condition, unless they have a door in the side or other modern means for Pilots to board and leave, and if the weather permits, should lower the gangway to about 3 m. above sea level and fix a rope-ladder so that it stays alongside the lower platform of the gangway.

Bad weather from the South, causing breaking waves at the edge of the shoals, sometimes prevents the pilotage service from operating.

In such conditions, ship must contact the Pilotos de Setubal to discover the state of the bar and limitations imposed on the pilotage service.

ANCHORAGE: Only inside harbour with a Pilot aboard.

RESTRICTIONS: No restrictions on night entry. At low tide vessels only up to 22 ft. draft. Max. draft 27 ft., length/breadth no restrictions.

HEALTH: Free pratique automatically given when ships come from other Portuguese port. Otherwise, Health Certificate is to be handed over to Health Authorities during clearance procedures.

RADIO: Call through Lisbon Radio.

TUGS: 5 available.

STEVEDORES: Ordered by the Agent some time in advance.

MEDICAL: Prior to arrival and in order not to delay ship's clearance, Master should inform by radio if medical assistance required, this only in case of contagious or epidemic diseases.

TANKERS: Shell Maritime installation with private pier. Discharge lines 4 in., 6 in. and 8 in.

DENSITY: About 1026.

FRESH WATER: Supplied from shore to all piers.

FUEL: Ordinary fuel available at Shell Installation to ships holding contract with Shell; or fuel supplied from lorry if ship holds contract with other company.

FIRE PRECAUTIONS: No smoking on deck or piers.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: By crew unless otherwise specified in C/P. Stevedores usually help.

CUSTOMS ALLOWANCE: About 200 cigarettes and 2 bottles of spirits per man.

CARGO GEAR: Supplied by stevedores.

IDENTIFICATION CARDS: Supplied and filled in by the Agent. Crew members cannot leave Three Castles area (Setubal-Palmela-Sesimbra) without a special permit from Customs Guards obtained through Agency.

CONSULS:

Finland	tel. 26018
France	" 24612
Spain	" 22018

REPAIRS: All types available. Lisnave shipyard and dry docks at Lisbon within about 50 miles.

DEVELOPMENT: Setenave is presently building a Shipyard for new building and repairs for very large ships in the estuary of Setubal.

The facilities will consist of: 1 repair dock for ships up to 1,000,000 d.w.t. 1 repair dock for ships up to 350,000 d.w.t. New building berth for ships up to 700,000 d.w.t.

REPATRIATION: All facilities.

AIRPORT: Nearest at Lisbon, about 50 miles away.

TIME: From September 26th to March 26th — GMT. From March 26th to September 26th — GMT plus 1 hour.

AUTHORITY: Junta Autonoma do Porto, Setubal.

AGENT: — A. J. Goncalves de Moraes, Lda., 281, Av. Luisa Todi-Setubal. Tel. 22399. Telex 16212. Cables: Amoras. After office hours: 2750594. Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

VIANA DO CASTELO: 41.41 N. 08.50 W.

DOCUMENTS: Health Declaration.

3 Crew lists.
Provision list (ships and individual).
Tobacco Declaration and Entrance Forms supplied by Agents on arrival.
2 Manifests and 1 copy of each Bill of Lading concerning cargo to be discharged.
1 Transit Manifest if cargo in transit exists.

PILOTAGE: Always compulsory. ETA should be given to Agent with ample notice. Signals; during the day Flag "G" of International Code, and at night 3 long whistles. Boats black with white cabins. Pilots to be taken on board in outer or inner harbour respectively with bad or good weather.

ANCHORAGES: Outer or inner harbour according to weather conditions.

RESTRICTIONS: Entering and sailing only during daylight unless exceptionally good weather.

MAX. SIZE: Max. draft 15 ft. on HWST and 13 ft. on HWNT, with good sea conditions. Max. breadth 13 m.

HEALTH: Free pratique authorised for vessels coming from other Portuguese Continental ports. For vessels coming from other countries Health Declaration must be filled in and delivered to the Agents.

RADIO: Call Viana do Castelo Pilots frequency 2182 kc/s. and listen on 2132 kc/s.

TUGS: No tugs.

BRIDGES: 1 bridge which allows entrance/sailing at any time.

STEVEDORES: Ordered by Agents 8 hours in advance.

MEDICAL: No prior advice is necessary.

FRESH WATER: Supplied by shore installations.

FUEL: Only small quantities of gas-oil can be supplied.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Work usually done by crew.
CUSTOMS ALLOWANCE: No limit, but must be declared.
IDENTIFICATION CARDS: Required.
CONSULS: France 22412. Spain 23018.
REPAIRS: All types of deck, engine and electrical repairs can be carried out.
DRY DOCKS: Three dry docks available.

	Length	*breadth*	*draft*
Dock 1	203 m.	34.0 m.	18 ft.
Dock 2	127 m.	18.5 m.	18 ft.
Dock Eng. D. Pacheco	104 m.	11.0 m.	16 ft.
Fitting Dock	190 m.	65.0 m.	21 ft.

No special equipment for tank washing is available.
REPATRIATION: No difficulties for crew repatriation.
AIRPORT: Nearest Oporto airport at 55 km.
TIME: From September 26th to March 26th – GMT. From March 26th to September 26th – GMT plus 1 hour.
HOLIDAYS: 1st January; Holy Friday; 25th April; 1st May; Corpus Christi; 10th June; 15th August; 5th October; 1st November; 1st, 8th, 24th and 25th December.
POLICE/AMBULANCE/FIRE: Tel. 115.
SHORE LEAVE: Crew allowed ashore.
AUTHORITY: Junta Autonoma dos Portos do Norte.

VILA REAL DE SANTO ANTONIO:
37.10 N. 07.26 W.

DOCUMENTS:
- 2 Health Certificates.
- 3 Crew Lists.
- 1 List of Passengers in Transit.
- 2 Lists of Passengers Disembarking.
- 2 Dangerous Cargo Lists.
- 1 Ship's Register.
- 1 Tonnage Certificate.

PILOTAGE: Black boat, wooden hull, white "P" at bow. Stationed near buoy No. 1 (harbour entrance). All sea-going vessels entering or leaving harbour are obliged to avail themselves of the services of a Pilot. Latest 24 hours before prior arrival cable "Corporacao dos Pilotos de Vila Real de Santo Antonio" or to Agent. Departing vessels should apply for their Pilots at least 6 hours before the time of departure.
MAX. SIZE: Entrance channel 4,000 m. long, has a depth of 4 m. (12 ft.) at LW. Vessels drawing up to 5.5 m. (16 ft.) can enter under normal circumstances 1 hour before HW, a keel clearance about 1 ft. will be maintained.
TUGS: Tugs up to 105 h.p. available.
BERTHING: 1 pier 300 m. long. Depth at pier 20 ft.
STEVEDORES: Ordered by Agents. ETA to stevedores is necessary. No work allowed on Sundays.
MEDICAL: Inoculations in hospital Marques Pombal -Vila Real de Santo Antonio.
FRESH WATER: Obtainable alongside quay.
FUEL: Gas-oil can be supplied in small quantities.
GANGWAY/DECK WATCHMEN: Compulsory.
OPENING/CLOSING HATCHES: Crew allowed open and close.
CUSTOMS ALLOWANCE: About 200 cigarettes and bottle of spirits per man.
CONSULS:
Britain, Falconer, Rua Dr. Oliveira Salazar, No. 4
Netherlands, Matias Gomes, Avenida da Republica, 73
France, Santiago Ponce Medeiros, Avenida da Republica, No. 114
Finland, Emilio Garcia Ramirez, Avenida da Republica, No. 133
Greece, Jose Rodrigues Marques, Avenida da Republica, No. 109
Italy, Mario Parodi, Avenida da Republica, No. 11
REPAIRS: There is 1 small ship-repair yard at Vila Real de Santo Antonio.
HOLIDAYS: 1st January; Holy Friday; April 25th; 1st May; 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December.
POLICE/AMBULANCE/FIRE: Police 66; Ambulance 202; Fire Brigade 202.
AUTHORITY: Junta Autonoma dos Portos and Delegacao Aduaneira de Vila Real de Santo Antonio.

NOTES

Puerto Rico

AGUADILLA: 18.26 N. 67.10 W.

DOCUMENTS:

1 copy of Inward Foreign Manifest (U.S. Customs Form 5727-A), Cargo for San Juan.
1 Stores List.
1 Crew Purchase List.
1 Passenger List (if any).
1 Crew List (U.S. Form 1-418).
1 copy of Ships in Transit Cargo Manifest.
Clearance from Last Port.

PILOTAGE: Mayaguez's Pilots provide service in Aguadilla. Advise ETA in good time to Aguadilla Terminal.

RESTRICTIONS: Open port, very deep, safe in good weather. Cold fronts from North cause very heavy swells. Cannot berth during this kind of weather.

MAX. SIZE: 600 ft. long, 36 ft. draft.

HEALTH: Advise arrival to Aguadilla Terminal Inc. for free pratique.

BERTHING: The Aguadilla Shipping Terminal operates a bulk sugar-loading facility. Sugar-loading vessels tie-up on mooring buoys. There is 40 ft. or more depth at the outer end of the bulk sugar-loading berth. Ship ties up to 4 buoys and two bollards at main tower. Spring lines needed for shifting. Terminal boat handles lines, no charge; ship's lines not less than 600 ft. long.

MEDICAL: 24 hours notice preferred; 90 miles for nearest hospital except emergencies.

TANKERS: Molasses tankers -10 in. connection (loading only). Only sugar and molasses loaded at the only loading facility available. Rate 66 t.p.h. sugar; 500 t.p.h. molasses.

There is also a mooring buoys and pile clusters berth for the tanker traffic that supply aviation gas for Borinquen Airport.

FRESH WATER: Available. 2 in. pipe-line with meter, 40 c/ton.

GANGWAY/DECK WATCHMEN: Usually crew members are used.

OPENING/CLOSING HATCHES: Performed by stevedores.

CERTIFICATES/CUSTOMS ALLOWANCE: U.S. Customs regulations.

IDENTIFICATION CARDS: Required to go ashore.

CONSULS: No local representation.

REPATRIATION: Can be arranged.

AIRPORT: 20 minutes drive. Regular airlines.

TIME: Atlantic Std. Time, 4 hour less than GMT. No alterations during year.

HOLIDAYS: Refer to "San Juan".

SHORE LEAVE: Allowed.

DELAYS: No delays unless another ship is already berthed.

AUTHORITY: Puerto Rico Ports Authority, Harbour Master.

GUANICA: 17.57 N. 66.54 W.

DOCUMENTS/GENERAL INFORMATION: Refer to "Ponce".

PILOTAGE: Port operations are under the control of the Captain of the port. Pilot services are available day and night, by previous arrangement with Guayanilla Pilots.

ANCHORAGE: Harbour is located 8 miles Westward of Guayanilla Bay. Though small, it is one of the best hurricane harbours in Puerto Rico.

TUGS: Available from Guayanilla.

BERTHING: Pier facilities are owned by the Guanica Central and used for bulk sugar shipments and limited general cargo operations. On the East side of the harbour entrance there is a reinforced concrete bulkhead wharf 700 ft. long with depths of 28 ft. alongside for the handling of bulk fertilisers. Small craft landings and facilities are along the boulevard fronting the beach.

FRESH WATER: Available in limited quantities for emergencies only.

FUEL: Available by trucks from Ponce.

MEDICAL: Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.

CONSULS: None available locally, nearest at Ponce, Puerto Rico.

AUTHORITY: Port Captain, Puerto Rico Ports Authority.

GUAYANILLA: 18.00 N. 66.46 W. (See Plan Book)

Oil Terminal owned by Commonwealth Oil Refining Co.

DOCUMENTS/GENERAL INFORMATION: Refer to "San Juan".

PILOTAGE: Port operations are under the control of the Captain of the port and pilot services are available day and night.

ANCHORAGE: It is the largest hurricane harbour and one of the best in Puerto Rico. Available for vessels of any draft. The harbour is protected at its entrance by extensive reefs which extend a mile or more offshore. The entrance channel between these reefs is about 1.5 miles long and about 0.4 mile wide.

MAX. SIZE: Tankers up to 680 ft. LOA, with max. draft 35 ft. 6 in. forward and 38 ft. aft.

TUGS: Available 24 hours daily, as requested by vessel.

BERTHING: Fuel dock. 2×680 ft. berths with 36 ft. 06 in. depth alongside. Mooring buoys placed to assist in clearing dock and mooring dolphins. No slop disposal facilities. The Union Carbide Company has berthing facilities for barge operations.

New port facilities for Commonwealth Oil Refining Co. and Pittsburgh Plate Glass are owned by the Puerto Rico Ports Authority.

FRESH WATER: Available whenever requested by the vessel.

FUEL: Available only whenever arranged by owners of the vessel and/or charterers prior to arrival.

MEDICAL: Medical service is available; hospitalisation at Ponce, which is only 15 minutes distance.

CONSULS: None available locally; nearest at Ponce, Puerto Rico.

AUTHORITY: Commonwealth of Puerto Rico — Harbour Master. Port facilities are operated and owned by the oil refinery.

JOBOS (Aguirre): 17.56 N. 66.13 W.

DOCUMENTS/GENERAL INFORMATION: Refer to "Ponce".

PILOTAGE: The Port of Jobos is served by the Pilots of Port Ponce. Services must be arranged in advance.

ANCHORAGE: A fine land-locked harbour, located on the South coast, approx. 42 nautical miles Eastward of Ponce and 20 miles West of Point Tuna. Anchorage inside the bay is Southward of the pier in depths of 19–24 ft. soft mud bottom.

RESTRICTIONS: The principal entrance is from Westward between Morrillo Cay and Ratones Cay.

TUGS: No tug-boats available.

BERTHING: To the West of the sugar pier (not in use) is a concrete barge dock 632 ft. in length with a buoyed access channel for the receipt of fuel oils for the Water Resources Authority.

FUEL: No bunkers are available.

MEDICAL: Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.

CONSULS: None available locally; nearest available at Ponce.

AUTHORITY: Puerto Rico Ports Authority.

LAS MAREAS: (Guayama) 17.55 N. 66.10 W. (See Plan Book)

The Puerto de las Mareas Terminal is located on the South side of the island of Puerto Rico. It is located approximately 26 nautical miles East of the port of Ponce. The nearest city is Guayama. All vessels calling at Phillips Puerto Rico Core Inc., Puerto de las Mareas Terminal should be consigned to Phillips Puerto Rico Core Inc., and all official documents for such ships should show them so consigned. In conformance with port regulations, no vessel will be allowed to tie up alongside a pier without having first obtained a berthing permit from the Ports Authority Captain of the port.

DOCUMENTS: The following documents are required by the Customs and Immigration Authorities for entry and clearance:

Master's Oath (Original and 1 copy).
Stores List (Original and 2 copies).
Crew Purchasing List (Curio List) (Original and 2 copies).
Inward Foreign Manifest (Original and 3 copies).
Quarantine Free Pratique (will be furnished by Doctor).
Deratisation Certificate (in date).
Crew List (1 certified and 2 not certified copies).
Clearance from Last Port (depends on sailing port).
Crewmen Landing Permits (for each Crew member without the plastic Form I-189).
Passenger List (if any passengers).

The Passenger List must show full names, sex, age, nationality, and occupation of passengers landing at Puerto de las Mareas. The ultimate destination of in-transit passengers must also be shown in the passenger list.

Deratisation Certificates can be renewed at the port.

In most cases, outward clearance and cargo documents can be delivered on board by the Ship's Agent, making it unnecessary for Masters to obtain such clearance in person from the U.S. Customs Office.

PILOTAGE: The use of Pilots is compulsory for all vessels, with the exception of American Flag vessels bound to or arriving from a U.S. port which may dispense with Pilots provided the vessel has on board a deck officer qualified and licensed by the United States Coast Guard, as a harbour Pilot for Puerto de las Mareas. Vessel's Agent will arrange for Pilot, upon notification in the arrival notice, who will board inbound vessels off the entrance to the harbour about 1 mile off-shore.

When approaching the dock and channel, vessels must have one anchor, to be designated by the Pilot, free of the hawse pipe and ready for quick release if necessary to stop the vessel.

Every vessel requiring a Pilot must provide, properly rigged and secured, a pilot ladder which conforms to international safety standards. When picking up or dismissing the Pilot, the vessel must heave-to and provide a lee with the pilot ladder rigged on the lee side.

Pilotage services available day and night.

APPROACHES: The harbour is entered through a channel 250 ft. in width and its narrowest portion, bearing N. 25° E. It is protected on the Eastern side by a rubble mound breakwater extending approximately 700 ft. from the shore line. The dredged channel extends out to the 40-ft. depth contour and has a width at this contour of approximately 900 ft., narrowing to 250 ft. approximately 2,100 ft. inshore from the 40-ft. contour. The 250-ft. wide portion of the channel is approximately 1,000 ft. long. At the inshore end of the 250-ft. wide channel, the harbour itself extends for a length of 2,300 ft. and a maximum width of 950 ft. The harbour has a depth of 38 ft. below mean low water. The above dimensions are given to the bottom of the channel; the sides of the channel and the harbour are sloped at 1 in 3.

NAVIGATIONAL AIDS: (A) Seabuoy: The Seabuoy is located 300 ft. West of the centre line of the channel 2 miles offshore from the end of the rubble mound breakwater. It displays a white light through 360° flashing 0.4 second on and 3.6 second off. The buoy is painted with black and white vertical stripes and is fitted with a radar reflector.

(B) Channel Marker Buoys: 2 lighted channel marker buoys are provided, located 550 ft. on either side of the centre line of the channel, 2,024 ft. offshore from the end of the rubble mound breakwater. These are lighted and marked as follows:

(i) Port-to (inbound vessels). This buoy has a 360° green light, flashing 0.5 second on and 2.0 seconds off. It is equipped with day-boards 3 ft. square, and painted black with green reflective perimeter.

(ii) Starboard-to (inbound vessels): This buoy is a 360° red light, flashing 0.5 second on and 2.0 seconds off. It is equipped with triangular day-boards 4 ft. by 4 ft., painted red.

(Both these buoys are located at the 40-ft. depth contour.)

(C) Channel Marker Navigation Lights: There are 4 channel marker navigation lights, 3 of which are located on piling, and 1 on the end of the rubble mound breakwater.

(i) Port-to (inbound vessels): This marker is located on piping 400 ft. from the centre line of the channel, 2,024 ft. inshore from the channel marker buoys. The light is located 20 ft. above MLW, and is displayed through 360°. It is a green light, flashing 0.5 second on, 2.0 seconds off. The marker is fitted with 3 ft. square day-boards, painted black with reflecting green perimeter.

(ii) Starboard-to (inbound vessels): This marker is located on a tower at the end of the rubble mound breakwater, 50 ft. above MLW. The light is displayed through 360°, red, flashing 0.5 second on and 2.0 seconds off. The marker is equipped with 4 ft. by 4 ft. red triangular day-boards.

(iii) Port-to(inbound vessels): This marker is located 175 ft. from the centre line of the channel 1,000 ft. inshore from the end of the rubble mound breakwater. It is equipped with a green light showing through 360°, flashing 0.5 second on and 2.0 seconds off. The light is located 20 ft. above MLW. The marker is equipped with 3 ft. square day-board, painted black with green reflective perimeter.

(iv) Starboard-to (inbound vessels): This marker is located 175 ft. from the centre line of the channel, 1,295 ft. from the end of the rubble mound breakwater, and is mounted on piling with the light 20 ft. above MLW. It is equipped with a 360° red light, flashing 0.5 second on and 2.0 seconds off. The marker is equipped with red day boards 4 ft. by 4 ft. triangular in shape.

(D) Obstruction Light: This light is mounted on the turning dolphin and displays a 360° steady red light.

(E) Range Lights: The front range light is mounted on a tower located on the centre line of the channel. It consists of a set of double red aircraft warning lights 75 ft. above MLW. It is fitted with 4 ft. by 8 ft. day-boards, painted with red-orange reflective coating. The light is located 3,500 ft. inshore from the end of the rubble mound breakwater.

The back range light is located on the centre line of the channel, 5,500 ft. inshore from the end of the rubble mound breakwater. The light consists of a set of double red aircraft warning lights, 110 ft. above MLW. The tower is fitted with 6 ft. by 12 ft. day-boards painted with red-orange reflective coating with a 3 ft. white stripe down the centre.

RESTRICTIONS: The entrance channel has a depth below MLW of 40 ft. and the harbour itself has a depth of 38 ft. below MLW. Shipmasters are cautioned that swells in the approach channel can increase the draft of their vessels, therefore caution must be exercised in entering the channel in periods of heavy weather.

RADIO: Agents of vessels or owners or its representatives should advise Phillips Puerto Rico Core Inc. by telex, cable or telephone, 72 hours, 48 hours, and again 24 hours before their expected arrival at the sea buoy.

ITT Telex No. 385347 "Philcorgya".
Puerto Rico Communication Authority-Telex No. 347.
Telephone (809) 864-1515.

Incoming vessels should advise the Agent by radio 48 hours and again 24 hours before their expected arrival at the sea buoy. Coast stations available for such advice are:

Lantana Radio (WOE) -Lake Worth, Florida. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco, California and Washington, D.C.)

New York Radio (WNY) -New York City. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco, California, Washington, D.C. Also equipped with teletypewriter (TWX) for direct communication with steamship companies in the United States having this equipment.)

Chatham Radio (WCC) -Chatham, Massachusetts. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco, California, Washington, D.C.)

San Juan Radio (WCT) -Radio Corporation of Puerto Rico Marine Station, Transmits at 2530 kc/s., receives at 2134 kc/s., watch at 2182 kc/s.

In addition to the above commercial radio facilities, incoming vessels may contact the port through facilities on tug stationed at the port. These facilities are as follows:

HF radio: range 2 to 300 miles. 2182 kc., working frequencies 2638 and 2738.
VHF radio: range 30 miles. Channel 16 (156.8 Mc/s), working frequency Channel 14 (156.7 Mc/s).
SSB radio: 12 Mc/s, 8 Mc/s, 4 Mc/s.

Vessels diverted to Puerto de las Mareas must furnish the required 48-hour and 24-hour notices of arrival, unless notice of diversion is received when less than 48 hours before anticipated arrival, in which case the notice of arrival will be given as soon as notice of diversion is received. In such cases, however, Phillips Puerto Rico Core Inc. reserves the right to refuse to load or unload such vessels if tankage is not available for the cargo, or if cargo is not available to loading.

TUGS: As a safety measure, Masters of vessels calling at Las Mareas are advised to engage tugboat assistance on arrival, turn ship around, and tie up alongside the pier, heading bow out to sea. Arrangements for the use of tugboats should be made well in advance of vessel's arrival of the sea buoy.

BERTHING: The dock at the terminal consists of a finger pier approximately 1,122 ft. in length inside the harbour with a tanker loading berth on each side. The finger pier consists of a cargo platform 45 ft. by 90 ft., with fitted fender piling and dolphins. The cargo platform is connected to shore by a driveway 12 ft. 6 in. wide. The mooring and breasting dolphins outboard of the cargo platform are connected to each other and to the platform by a walkway. No launches are required to handle mooring lines. The top of the cargo platform is 12 ft. above MLW level. Water depth alongside the finger pier is 38 ft. at MLW. There is no current at the dock or in the harbour.

The fender system and breasting dolphins are designed to withstand the forces exerted by a vessel of 81,300 tons displacement approaching the dock with a velocity component perpendicular to the dock face of 0.30 ft. per second.

Bollards for mooring lines are provided on the breasting dolphins, the mooring dolphins and the turning dolphins. Each of the bollards and their associated dolphins are designed to withstand 120,000 pounds of mooring line tension.

Vessels will be required to vacate berths promptly on completion of loading or discharging cargo. Permission to use a berth when not loading or discharging cargo may be granted under special circumstances, and must be requested in writing to captain of the port.

Vessels will be allowed 1 hour in which to vacate the berth after completion of cargo handling, to start when the last hose is disconnected.

Three hours will be allowed for ballasting at the berth after completion of discharging cargo. Vessels awaiting cargo papers and/or Customs clearance must vacate the berth on expiration of allowed time and move to anchorage to wait for delivery of the papers.

If the vessel fails to vacate the berth on the expiration of the allowed time, it will be held liable for payment of any demurrage and/or damages incurred by Phillips Puerto Rico Core Inc., as a result of delays to other vessels waiting berths, or for any other consequence of its failure promptly to vacate the berth.

Turning basin 1,100 ft. wide and 1,060 ft. long, outboard of the turning dolphin, is provided. The turning basin has a depth over its entire area of 38 ft. at MLW. The turning dolphin at the end of the finger pier is designed to assist vessels in turning in the basin. Normal procedure will be for vessels to enter the harbour and turn prior to docking. In the case of loaded vessels entering the harbour, they may, at the Master's discretion, wait until they have discharged, and turn just prior to leaving the harbour.

HURRICANES: The South coast of Puerto Rico is subject to winds of hurricane force, accompanied by abnormally high tides, during the late Summer and Fall. In the event of such abnormal conditions, vessels may be required to put out additional moorings, or if necessary, to suspend all operations and put to sea until normal conditions prevail.

MEDICAL: U.S. Public Health Service doctors will be available for attendance on vessels at Puerto de las Mareas, upon receipt of notice 48 hours prior to arrival. If hospitalisation is required for any crew member, arrangement could be made through the ship's Agent with hospitals located in the municipality of Guayama. Ambulance service can be furnished through request to Agent.

TANKERS: The various cargoes available at the Puerto de las Mareas terminal include motor fuel, cyclohexane, benzene, paraxylene, orthoxylene, mixed xylenes, paraffinic naphtha, and other special products. Feedstock for Phillips Puerto Rico Core Inc. facilities is naphtha, and there is a fuel oil unloading line. Cargo handling is accomplished through various sizes of lines, as follows:

Product	Hose size (in.) (each side of dock)	Line size (in.)	Loading/ discharging rate with one pump
Naphtha feedstock	4-8	20	13,700 bph
Motor fuel	3-8	20	12,000 bph
Motor fuel	2-8	12	5,700 bph
Benzene	1-8	12	2,000 bph
Cyclohexane	1-8	10	3,000 bph
Mixed xylene	1-8	12	3,400 bph

Toluene	1-8	8	2,000 bph
Fuel oil	1-8	12	2,000 bph
Ballast	1-8	8	3,000 bph
Domestic water	1-2	2	7 tph

CONNECTING/DISCONNECTING HOSES: A crew will be provided by the terminal to connect and disconnect hoses on the ship. Vessels are requested to have blanks removed from the cargo lines and hose handling booms rigged on arrival at the dock.

READINESS: Notice of Readiness to load or discharge is warranty that the vessel is in all respects ready to receive or discharge cargo, and that the vessel's equipment is ready and capable of loading or discharging petroleum or petrochemical products. Phillips Puerto Rico Core Inc. reserves the right to refuse to accept such notice of readiness if, upon inspection, the vessel is found not to be ready to receive or discharge cargo. Vessels will be accepted loading or discharging on a "first come, first served" basis. Vessels may tender notice of readiness upon arrival, berth or no berth, according to the terms of the charter party or contract of affreightment under which they have been engaged.

BALLAST: Ship's Masters are reminded that they are prohibited by Puerto Rico law from pumping dirty ballast overboard when within the Puerto Rican limits. Facilities are provided for disposing of dirty ballast ashore at Puerto de las Mareas. Vessels provided with separate clean ballast systems completely segregated from the cargo system and reserved for clean ballast only, may pump ballast overboard from such systems while at the dock, provided the tanks are inspected and approved for such pumping by the Dockmaster. Heavy fines are enforced for any discharge of dirty ballast, and due to the limited area of harbour, any violations will be quickly detected and reported.

Ballast is pumped ashore through an 8-in. line, capable of receiving at a pressure at the ship's rail of 100 psi. The ballast facilities are sufficient to accommodate 30,000 barrels of dirty ballast. Vessels are requested to arrive with minimum of dirty ballast.

FRESH WATER: Available at the dock in limited quantities.

FUEL: No bunkers available at Puerto de las Mareas. In an emergency, bunkers may be delivered by barge from Ponce. In such cases, however, special permission must be obtained from the Harbour Master to take bunkers from the barge while loading or discharging cargo. Lubricating oils may be obtained from Ponce.

STORES: May be ordered through the ship's Agent for delivery at the terminal, but must be ordered at least 48 hours prior to vessel's arrival.

CONSULS: Consular representatives of the following nations are available in Ponce:

Venezuela	Dominican Republic	Spain
France	Netherlands	Sweden
Panama	Honduras	

Further information can be obtained through the Agent.

REPAIRS: Complete repair and dry dock facilities are available in San Juan. Limited facilities for emergency repairs are availabe at Ponce. Requests for such services should be made to the Agent 24 hours prior to arrival.

SURVEYORS: There are no classification society surveyors stationed at Puerto de las Mareas, but they are available on call from Ponce or San Juan. Requests for survey services should be made through the vessel's Agent at least 24 hours prior to arrival.

CARGO INSPECTION: Representatives of Chas. Martin Inspectors of Petroleum Inc. will be available for cargo quantity and quality inspection as required. Address: POB 1017, Guayama, Puerto Rico 00654. Telephone: (809) 864-0428, 864-1515.

CUSTOMS: U.S. Customs and Immigration Authorities will board vessels at the dock, except in unusual circumstances, in which case they will board the vessel at anchor outside the harbour. The vessels will be required to furnish an accommodation ladder.

American Flag vessels will not require Customs entry or clearance unless arriving or departing to a foreign port.

HEALTH: The usual regulations concerning sanitation apply to the Harbour of Puerto de las Mareas. The use of rat guards on all lines is compulsory, under penalty of fines for failure to comply. Trash and galley refuse may not be dumped into the waters of the harbour and must be kept on board until the vessel has sailed. Discharge of toilets and bathrooms into waters of the harbour is prohibited. Sanitary facilities are provided on the dock for use by Crew members while their vessels are at berth.

FIREARMS: All firearms and ammunition should be shown on the stores list and may not be removed from the vessel during its stay in Puerto Rican waters. Any violations of this regulation will result in fines and confiscation of firearms and ammunition.

SAFETY: The provisions of Part 35 "Operations" of the Rule and Regulations to Tankvessels, Subchapter D (CG-123) published by the U.S. Coast Guard are in force at Puerto de las Mareas, and must be observed under penalty of fine and imprisonment as provided therein.

Particular attention is called to the following safety precautions:

(1) Vessels must be, and remain, in readiness to sail from the dock at any time. In the event of engine repairs, which might interfere with such readiness to sail, being required, written permission must be obtained from the Harbour Master before such repairs may be undertaken.

(2) Scuppers must be plugged during cargo-handling operations.

(3) Absolutely no smoking or open lights will be permitted on the dock or open decks.

(4) Screens in good conditions must be used over gauging hatches when not actually gauging.

(5) Operations may be suspended at the discretion of the Master, or may be required to be suspended by the Harbour Master, during severe electrical storms.

(6) In the event of a breakdown of communications between dock and the shore terminal during loading operations, and the need to shut off the flow of cargo to the vessel, an emergency signal consisting of a continuous sounding of the ship's whistle shall be given. The signal shall not be discontinued until the flow of the cargo has been shut off.

(7) An electrical bonding cable will be provided from the dock to the ship. This bonding cable must be firmly secured to a clean metal surface of the vessel's hull or cargo piping before hoses are connected, and must remain in place until the hoses are disconnected.

Violations of these and other safety regulations, as described in Parts 35 of Subchapter D will result in the suspension of cargo-handling operations by the Harbour Master, or the PPRC dock personnel or safety inspectors, without recourse. Such suspension of cargo operations will continue until the violations are corrected or the safety hazards removed.

MAIL: Official and personal mail may be addressed to the vessel in care of the Agent, and will be delivered to the vessel by the Agent on arrival. The Agent will accept official and personal mail from the vessel, and will ensure its delivery to the local U.S. Post Office, upon receipt of a mail transmittal slip to support disbursements.

SHORE LEAVE: Normally, there are no restrictions on shore leave. In order to avoid sailing delays, due to late return of Crew members, Masters are requested to ensure that all Crew members are aboard at sailing time.

Crew of foreign vessels must present valid passports, current individual International Vaccination Certificates, and a copy of Form I-95, properly filled out, in order to be passed through the terminal gates.

Taxi service is available from Guayama and may be called from the gate.

AUTHORITY: Puerto Rico Ports Authority; port facilities operated by Phillips, P.R. Core, Inc.

MAYAGUEZ: 18.13 N. 67.12 W.

DOCUMENTS: If vessel staying less than 24 hours:

Crew List.
Stores List.
Cargo Manifest.
Crew Purchase List.
Valid Load-line Certificate.
Ship's Register.
Clearance from Previous Port.

Vessels working cargo. 2 sets of documents to be prepared as follows:

Original:
1 copy of Inward Foreign Manifest (U.S. Customs Forms 5727-A), Cargo for San Juan.
1 Stores List.
1 Crew Purchase List.
1 Passenger List (if any).
1 Crew List (U.S. Form 1-418).
1 copy of Ship's in Transit Cargo Manifest.
Clearance from Last Port.

Duplicate:
Same as original except the in-transit Cargo Manifest.
If vessel has on board cargo for another American port, an extra copy of the original Cargo Manifest is required.
Crew members to declare individually all articles such as souvenirs, etc.

Agents require:
3 sets of Bills of Lading.
2 copies of Manifest (for San Juan only).
1 copy of Crew List.
1 copy of Stores List.
1 copy of Crew Purchases List.
1 copy of Narcotics List.
1 copy of Passengers List.

Certificates:
Valid Load Line Certificate.
Ship's Register.
U.S. Tonnage Tax Certificates (if any).

PILOTAGE: Ships Agents must make arrangements with Captain of the Port Office at Mayaguez Pier well in advance, not less than 24 hours, of arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside) as required, showing the letter "P" on each bow. Pilots board 1 to 2 miles offshore of sea buoy depending on weather conditions. Pilot service available day and night.

ANCHORAGES: Close to the entrance channel and boundaries. Sufficient depths for larger vessels.

RESTRICTIONS: The bay is easily entered day or night and is a good harbour in any weather, except in a hurricane. The harbour is 3.8 miles wide, and offshore is protected by shoals which extend across the harbour entrance in a general North by West direction.

The principal channel is about 0.4 mile wide, with depths at the entrance of about 47 to 120 ft. and it is marked by lighted buoys and the range. Depth in the inner channel is approximately 30 ft. and close alongside the pier from 28 to 29 ft.

MAX. SIZE: Cargo vessels 600 ft. or more in length call at the port. Safe draft for operations at the wharf is 27 ft.

RADIO: Communication to all points, including ships at sea, is available through commercial systems. Cables-Telex via RCA Communications, Inc., a global service of Radio Corporation of America. ITT World Communications, Inc., tel. 830-3316. Puerto Rico Telephone Company, local and overseas communications services, 129 and 128.

TUGS: Not used at Mayaguez Port.

BERTHING: Berthing permit required from the Ports Authority. The Puerto Rico Ports Authority operates the terminal facilities which consist of a bulkhead wharf approximately 1,200 ft. long, apron width, 30 ft., and transit sheds. There are other berthing facilities in the port which are owned by the tuna packing plants.

STEVEDORES: Arrangements are made by the ship's Agents or representatives.

MEDICAL: The Agent should know in advance any medical needs so that he can make the necessary arrangements with the U.S. Public Health Service. Good medical and hospital services available.

TANKERS: See "Port of Guayanilla". Regular calls from Esso and Texaco to unload fuel by means of barges in order to supply tanks on land by means of pipes located at berthing facilities.

FRESH WATER: Available at pier facilities alongside the berth in 4 outlets to supply any amount required at any time. Hose connections of 2.5 in. or less, maximum pressure.

FUEL: All grades available.

FIRE PRECAUTIONS: Standard fire and safety precautions throughout. U.S. Coast Guard regulations.

DEVELOPMENTS: it is planned to locate a heavy lift crane on the berth facility.

GANGWAY/DECK WATCHMEN: Ship provides own gangway watchmen.

OPENING/CLOSING HATCHES: By stevedores.

IDENTIFICATION CARDS: Required to go ashore.

CONSULS: Dominican Republic, France, tel. 832-4322. Others at San Juan.

REPAIRS: Call San Juan facilities where complete salvage equipment is available. Service to other ports of the island.

REPATRIATION: Arranged by ship's Agents.

AIRPORT: Mani Airport, 15 minutes from pier, served by regular airlines daily from Mayaguez to San Juan.

TIME: GMT minus 4 hours all year round.

HOLIDAYS: Refer to "San Juan".

POLICE/AMBULANCE/FIRE: Telephone numbers: Police, 343-2020, 832-2300; Ambulance, 832-0496, 832-3212; Fire, 343-2330, 832-2330.

TELEPHONES: Can be arranged by Puerto Rico Telephone Company.

SHORE LEAVE: Allowed.

AUTHORITY: Puerto Rico Ports Authority.

PONCE: 17.58 N. 66.37 W. (See Plan Book)

DOCUMENTS: If vessel staying less than 24 hours:
Crew List.
Stores List.
Cargo Manifests.
Crew Purchase List.
Valid Load Line Certificate.
Ship's Register.
Clearance from Previous Port.

Vessels working cargo: 2 sets of documents to be prepared as follows;

Original:
1 copy of Inward Foreign Manifest (U.S. Customs Form 5727-A), Cargo for San Juan.
1 Stores List.
1 Crew Purchase List.
1 Passenger List (if any).
1 Crew List (U.S. Form 1-418).
1 copy of Ship's in Transit Cargo Manifest.
Clearance from Last Port.

Duplicate:
Same as original except the in-transit Cargo Manifest.
If vessel has on board cargo for another American port, an extra copy of the original Cargo Manifest is required.

2 copies of Manifest (for San Juan only).
1 copy of Crew List.
1 copy of Stores List.
1 copy of Crew Purchases List.
1 copy of Narcotics List.
1 copy of Passengers List.

Certificates:
Valid Load Line Certificate.
Ship's Register.
U.S. Tonnage Tax Certificates (if any).

PILOTAGE: Port operations are under the supervision of the Captain of the Port and pilot services are available day and night.

ANCHORAGE: Harbour is protected from the prevailing Easterly trade winds by enclosing reefs. To the Southward the harbour is exposed and for this reason is not safe in a hurricane.

RESTRICTIONS: Depths: Entrance channel 36 ft.; turning basin, 31 ft.; anchorage, 40 ft.

MAX. SIZE: Max. draft 29 ft.

BERTHING: The municipal pier is a concrete and steel construction 430 ft. long by 100 ft. wide, with a steel and cement transit shed. The municipality has also built a concrete bulkhead wharf extending East-West for 2,260 ft. from the pier. To the North of the bulkhead wharf there is a manoeuvring basin 30 ft. deep. Depth alongside: Pier 1A, 30 ft.; Pier 2, 29 ft. 6 in.; Pier 3, 30 ft.; Pier 4, 30 ft.; Pier 5, East-side, 33 ft.; Pier 5, West-side, 32 ft.

FRESH WATER: Water is available whenever ordered in advance for 24 hour daily service or at request during office hours.

FUEL: Available by pipe-line: (Texaco only) diesel, gas oil, No. 6 fuel oil. By trucks (Chevron, Shell, Esso).

MEDICAL: Ambulance permanently available at dock area, hospital and doctors service available as requested to the Agent.

CONSULS:
Colombia
Denmark
Dominican Republic
France
Honduras
Holland
Panama
Spain
Sweden
Switzerland

REPATRIATION: Arranged by ship's Agents.

TIME: GMT minus 4 hours.

HOLIDAYS: Refer to "San Juan".

DEVELOPMENTS: The expansion of the 260 ft. N.-S. bulkhead is completed and length increased to 600 ft. There is a 76 ton gantry crane in operation.

The Trailer wharf is completed. A container crane will be installed early 1979.

The Port Board is working on the development of a dry dock for ship repair.

AUTHORITY: Captain of the Port. Muelles Municipales de Ponce.

SAN JUAN: 18.28 N. 66.07 W. (See Plan Book)

DOCUMENTS: Foreign vessel calling for fuelling purposes and staying less than 24 hours:
Crew List. (Form I-418).
Stores List. (C.F. 1303).
Cargo Declaration. (C.F. 1302).
Crew Effects Declaration. (C.F. 1304).
Valid Load Line Certificate.
Ship's Register.
Clearance from Previous Port.

No Customs formal entry or clearance is required if vessel departs before 24 hours and transacts no other business related to cargo or passengers.

Vessels working cargo. 2 sets of documents to be prepared as follows:

Original:
1 copy of Inward Foreign Manifest (U.S. Customs Form 5727-A), Cargo for San Juan.
1 Ship's Stores Declaration. (C.F. 1303).
1 Crew Effects Declaration. (C.F. 1304).
1 Passenger List (if any).
1 Crew List (U.S. Form I-418).
1 copy of Ship's in-transit Cargo Manifest. (C.F. 1302).
Clearance from Last Port.

Duplicate:
Same as original except the in-transit Cargo Manifest.
If vessel has on board cargo for another American port, an extra copy of the original Cargo Manifest is required.
Crew members to declare individually all articles such as souvenirs, etc.

Agents require:
3 sets of Bills of Lading.
2 copies of Manifest (for San Juan only).
1 copy of Crew List.
1 copy of Stores List.
1 copy of Crew Purchases List.
1 copy of Narcotics List.
1 copy of Passengers List.

U.S. Customs clearances: Documents required:
Cargo Declaration Outward with Commercial Forms C.F. 1302-A.
Crew List in duplicate (American vessels only).
(Functions of admeasurement and documentation of American

vessels are performed by the office of Marine Inspection, U.S. Coast Guard Base, San Juan, Puerto Rico).

Consular clearances for the Dominican Republic:

- 5 copies of Crew List.
- 5 copies of List of Weapons and Ammunitions on board.
- 5 Lists of Passengers.

Consular clearances for Venezuela:

- 6 copies of Store List.
- 8 copies of Crew List.
- 7 copies of Passengers List.

Purser shall supply the Agents with necessary information to fill the inward and out bound cargo reports which have to be filled at Customs House after departure of the vessel.

Customs Inspector requires:

- Valid Load Line Certificate.
- Ship's Register.
- U.S. Tonnage Tax Certificates (if any).

PILOTAGE: Compulsory. Pilots available day and night. Ships' Agents must make arrangements with Pilot station well in advance – not less than 24 hours – of arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside). Show the letter "P" on each bow. Pilots board 3 miles offshore of sea buoy. Call Pilot station on Channel 16 VHF. There is no inner anchorage for incoming vessels to wait for the Pilot.

ANCHORAGES: Deep draft anchorage "E", on the S.W. shore of Isla Grande, is for vessels awaiting Customs or quarantine, and no vessel shall remain more than 24 hours without a permit from the Puerto Rico Ports Authority and U.S. Coast Guard Captain of the Port. Restricted Anchorage "F" (Fox), shoreward of the West margin of Anegado Channel, is for vessels discharging explosives. No vessel shall anchor without a permit from the Captain of the Port. Anchorage "D", East end of San Antonio Channel, is for yachts, schooners and small craft.

RESTRICTIONS: Besides the harbour entrance channel (Bar Channel) and the main ship channel (Anegado Channel) with depths of 42 ft. and 36 ft., respectively, there are 4 other navigable channels in the inner harbour:

The Army Terminal Channel, which runs in a straight North to South direction is approximately 1 mile long and 300 ft. wide. Charted Depth in the Army Terminal Channel and alongside Piers 1 and 3 is 35 ft., safe draft 33 ft. Depth in other channels varies 30 to 32 ft. and alongside pier facilities 28-30 ft.

The Puerto Nuevo Channel, approximately 1 mile long, 300 ft. wide, with an average depth of 32 ft.

The Graving Dock Channel, approximately 1 mile long, 300 ft. wide, with an average mid-channel depth of 30 ft.

San Antonio Channel, approximately 1.5 miles long, 300 yards wide, mid-channel average depth 35 ft.

MAX. SIZE: Cargo vessels 750 ft. in length call regularly at the Port of San Juan. Channel to tanker's berth, 36 ft.

RADIO: Radio communication to all points, including ships at sea, is available through commercial systems. Cables, Telex via RCA Communications, Inc., a global service of Radio Corporation of America, tel. 723-6170, San Juan, Puerto Rico.

The signal station at Fort San Cristobal in San Juan harbour is manned around the clock for radio-telephone communication with incoming and outgoing ships traffic. Transmitting vessels can communicate with the station through 156.8 mHz (Channel 16) for call and reply and working Channel 14, 156.7 mHz.

Vessels approaching to enter San Juan Harbour shall remain outside not less than 3 miles Northerly of the harbour entrance to pick up the Pilot, and vessels about ready to depart shall inform the signal station via radio-telephone of their intentions.

TUGS: Caribe Tugboat Corp., tel. (809) 723–6164, and Port San Juan Towing Company, tel. 724-2360, operate a fleet of tug-boats. Tugs join vessel just inside harbour entrance. Tugs available day and night with sufficient notice.

Use of tug-boats compulsory for docking and undocking vessels 8,000 tons displacement and over unless equipped with bow or side thrusters.

BERTHING: All vessels must request and obtain well in advance before arrival a berthing permit from the Ports Authority.

Pier 1: North shore of the harbour, in the Old San Juan waterfront, East of Customs Building and next Westerly to the ferryboat landing. Modern twin berth, 770 ft. long, double deck, cruise and passenger vessels terminal, pierside passenger and baggage gangways, elevators, parking and shopping. Water and light facilities available.

Ferry Terminal: Next Easterly to Pier 1. Ferry terminal for the San Juan-Catano ferry fleet.

Pier 3: North shore of the harbour, Old San Juan waterfront next Easterly to the ferry terminal. Tourists ships terminal similar to Pier 1. Depths in the approaches and alongside tourist piers 35 ft.

Wharf No. 6: An extension of the open bulkhead Easterly of Pier 3 marginal wharf, 940 ft. long, accommodates cruise and passengers vessels. Water and light facilities available.

Pier 7: Northerly continuation of Pier No. 6; 472 ft. long, 1 berth, general cargo pier. 15,000 sq.ft. transit shed area.

Pier 8: East of Pier 7, finger pier, 3 berths, general cargo pier. Transit shed area and other covered storage 175,508 sq.ft. open area 40,000 sq.ft. Water and light facilities available.

Pier 9: East of Pier 8. Finger pier, 3 berths, general cargo pier. Net storage space pier shed 133,738 sq.ft. open area 40,000 sq.ft. Water and light facilities available. South berth is a tug–barge terminal.

Pier 10: North shore of San Antonio Channel. East of Pier 9. Finger pier, 1 berth, tug and barge terminal. No transit shed space. Water, fuelling facilities and light available.

Wharf No. 11: East of Pier 10, marginal wharf, 1 berth, 580 ft. of bulkhead, general cargo pier. Transit shed area 100,000 sq.ft. ample back area. Water and light facilities available.

Wharf No. 12: An extension of Wharf No. 11 Bulkhead 550 ft. long, wide apron, 15,000 sq.ft. transit shed area, 37,000 sq.ft. open storage. General cargo wharves. Water and light facilities available.

Wharf No. 13: Prolongation of Wharf No. 12: 28,000 sq.ft. transit shed area, 55,000 ft. open storage area, general cargo wharf. Water and light facilities.

Pier 14: Extension of Piers 12–13 bulkhead; marginal wharf, general cargo pier, wide apron. 446 ft. long, 40,000 sq.ft. transit shed area, ample marshalling area. Water and light facilities available.

Frontier Base Pier: Navy facility operated by the Puerto Rico Ports Authority under contract. 2 berths for sea-going vessels. Depth alongside 30 ft. Principally used for berthing of cruise vessels and conventional ocean carriers handling open storage cargo.

Isla Grande Terminal: South shore of San Antonio Channel. General cargo wharf. 1,500 ft. long bulkhead. Wide aprons. Transit shed 32,000 sq.ft. with 240,000 sq.ft. of paved open area. Easterly section of bulkhead for shallow draft vessels.

Container terminals:

(a) In Westerly section P.R. Maritime Shipping Authority lift-on-lift-off trailership terminal; bulkhead wharf 1,320 ft. long. Wide apron, ample trailers marshalling yards. 2×45 tons capacity container handling cranes. Paved marshalling area approximately 1,800,000 sq.ft.

(b) On the South shore, berthing facilities, 300 ft. bulkhead wharf with adjacent areas for TMT's roll-on/roll-off operations. Shoreside concrete ramp extending out seaward. Tug-barge operation, loading and unloading through bow and side ramps. Max. draft approximately 18 ft.

(c) Interisland Intermodal Inc. roll-on/roll-off shoreside ramp, barge-tug operation; loading and unloading at bow. Max. draft 18 ft.

U.S. Navy property under lease and operated by the Puerto Rico Ports Authority.

Pier 15/16: General cargo pier. Dry dock, floating dock, ship repairs, foundry. 1 wooden floating dry dock of 1,000 tons capacity. Floating crane 25 tons lifting capacity. 4 mobile cranes 45 tons capacity. Reinforced concrete graving dock. Fuel and water available. United States Navy installation under lease to Abarca Dry Dock and Marine Terminals for commercial ship repair and dry-docking operations. Bulkhead wharf and finger pier used by commercial vessels.

Puerto Nuevo Docks: Terminals "A" and "B" marginal wharves. 2×500 ft. berths. 102,000 sq.ft. transit shed area. 2 cargo sheds. 30 ft. depth alongside. General cargo piers. Limited open storage area.

Trailership Terminals: (3 at Isla Grande port zone, above, 10 at Puerto Nuevo port zone. Berths C, E, F, G, H, J, K, L, M and N and West side Army Terminal).

Berth "C": P.R. Maritime Shipping Authority's roll-on/roll-off terminal. Shoreside movable ramps for side loading and unloading. Extra wide pier platform, ample trailer marshalling yards. 30 ft. depth alongside, approximately. Length 600 ft. Width of apron 40 ft.

Berth "D": 100,000 sq. ft. of transit shed space for break-bulk operations and cargo stripping. Marginal wharf 40 ft. wide, 600 ft. long. Ample cargo shed used for distributing cargo coming in trailers for different consignees. Ample trailer marshalling yard. 30 ft. depth alongside, approximately.

Berths "E", "F", "G", "H", "J", "K", "L", "M" and "1/2 N": 600 ft. each, continuous bulkhead wharves, lift-on/lift-off operation. Max. draft alongside 30 ft. Extra wide pier platforms. Ample trailer marshalling yards. Five 25 ton capacity pierside cranes are installed at Berth "E" to "H".

Army Terminal Pier: Finger pier; 3 berths. Approximately 50,000 sq. ft. transit shed area. East and West berths 600 ft. each. North berth 200 ft. Under the control of the Ports Authority. West side, ramp for roll-on/roll-off operation.

Isla de Cabras Pier: Explosives handling pier at Isla de Cabras. Ports Authority property.

Bulk Grain Handling Facilities: Berthing, silos and other shoreside installations for the receipt of shipments of bulk grains (Nebraska Mills, California Rice Mills, Red Seal, etc.).

STEVEDORES: Arranged by the ship's Agents.

MEDICAL: Medical attendance and services are available for seamen at the United States Marine Hospital in San Juan (out-patients). The Presbyterian Hospital handles internal cases.

TANKERS: Caribbean Oil Refinery pile clusters berth, max. permitted draft 33 ft.; Navy Oil Pier, max. permitted draft, 29 ft.

FRESH WATER: Most of the piers have adequate installations to supply water.

FUEL: Served in barges either alongside the vessel at the pier or at anchor. Other combustible liquids are delivered in tank trucks by Shell, Esso and Texaco.

REPAIRS: Abarca Dry Dock and Marine Terminals handles dry docking and major vessel's repairs. San Juan Shipyard and Marina, at Isla Grande, and Vaello Shipyard at La Puntilla, Catano, operate marine railways for dry-docking and repairs of small vessels. The Puerto Rico Lighterage Company handles minor ship repairs.

DEVELOPMENTS: 2 additional trailership berths are under construction at the Puerto Nuevo port sector.

GANGWAY/DECK WATCHMEN: Ship provides own gangway watchmen.

OPENING/CLOSING HATCHES: By stevedores.

IDENTIFICATION CARDS: Required to go ashore.

YABUCOA: 18.02 N. 65.48 W. (See Plan Book)

Man-made harbour and channel located at the S.E. corner of Puerto Rico. Berthing facilities for deep draft tankers and a barge dock. Port and shoreside installations for the receipt and shipment of fuel oils and liquid chemicals for the Puerto Rico Sun Oil Company, a petro-chemical complex and barge dock and shoreside facilities for Union Carbide Graphite of Puerto Rico.

Facilities consist of the following: Ship channel 500 ft. wide, 40 ft. depth. Turning Basin. Dock and operating platform for a max. of 100,000 d.w.t. tank vessels. Mooring, breasting and turning dolphins. Catwalks. Additional dock appurtenances (fire-fighting equipment, protective jetty, etc.). Pilot services available day and night and tugboats available.

AUTHORITY: Captain of the Port, Puerto Rico Ports Authority.

NOTES

Please also advise Shipping Guides Ltd.

Qatar

DOHA: 25.17 N. 51.32 E.

DOCUMENTS: The following documents will be required at this port:

Agents:
1 copy of the Arrival Report (Supplied by the Agent on boarding).
1 copy of the Crew List.
1 copy of the International Declaration of Health.
1 copy of the Passenger List (if applicable).

Port Health:
1 copy of Crew List.
1 copy of Dates and Types of Inoculations.
1 copy if the International Declaration of Health.

Immigration:
4 copies of Lists of Passengers Landing (if applicable).

Customs:
Bonded Store List (Bond will be sealed but issues are available).
Port Clearance Certificate should be procured before the vessel sails.

PILOTAGE: Application for a Pilot should be made through the Agent in Bahrain at least 24 hours before arrival.

Pilot station keeps a VHF watch 24 hours a day on Channel 16. Call sign DOHA PORT. Similar watch kept on R/T 2182 K/cs.

Pilot boat proceeds to the vicinity of the Doha Outer Buoy, position 25° 17′ 06″ N. 51° 41′ 26″ E. when the pilot is required. Pilot launches are painted white. When the vessel is underway the Pilot requires a pilot ladder complete with manropes. When the sea is calm and the vessel is at anchor the accommodation ladder may be used.

ANCHORAGES: Near the Outer Buoy and Southerly from it only. Min. depth of water 5 fathoms.

RESTRICTIONS: Compulsory pilotage for all vessels of 14 ft. draft or more. Naval vessels exempted. Depth of water in entrance is 27 ft. plus tide and the min. depth of water required under the keel for manoeuvring in the channel is 3 ft.

Max. draft for normal or average high waters is 28 ft. 9 in.

MAX. SIZE: Max. length 525 ft., max. breadth 75 ft. max. draft 28 ft. 9 in. Vessels of 560 ft. have been accepted in favourable conditions.

HEALTH: The International Flag signals for pratique must be flown and remain up until the vessel is cleared by the Port Health Authorities. A Port Health Official will board the vessel in the anchorage or at the Deep Water Jetty when the vessel is alongside. There is no automatic or radio pratique available.

RADIO: ETA and Agents messages should be routed through Bahrain Radio. Radio-telephone communications through Doha Port signal station. Calling and listening 2182 kHz. Working frequencies, 2638 kHz, 2738 kHz, 2570 kHz.

TUGS: 7 Government tugs are normally available to assist in berthing operations. The only exception being when the tug is under repair.

BERTHING:
5 Berths – Total length 960 m.; Depth alongside 9.1 m.
5 Berths – Total length 893 m.; Depth alongside 7.5 m.

Outer and inner dredged approach channels, 8.2 m. and 9.1 m. Depth (C.D.). Wharves for smaller craft: West Inner Wharf 207 m., Collins Jetty 135 m.; Country Craft Jetty 287 m.; Fish Factory Wharf 60 m. Depths 2.5 m. to 6.0 m. (C.D.).

Transit storage areas at landward end of approach causeway with extensive paved open storage and transit sheds giving 16,722 sq.m. cover.

New transit storage area under construction, on extended main quay with extensive paved open storage, 5 transit sheds giving 30,000 sq.m. cover, a cold store of 500 tonnes capacity, and services. Completion late 1978 into mid-1979.

Normally berthing and unberthing to and from the deep water jetty is not at any time without certain reservations:
(*a*) Draft and trim of vessel.
(*b*) Height of tide.
(*c*) Visibility from Navigation Bridge.
(*d*) Prevailing weather conditions.

The duty Pilot has the option to berth or unberth a vessel at his discretion after consultation with the Senior Pilot, when the above mentioned conditions are unfavourable.

STEVEDORES: ETA advice is required on the number of gangs workable. Advance notice is required for any heavy lifts (say in excess of 10 tons) and the consignees name if possible as special arrangements have to be made for handling. Average discharge rate is 75 tons per hook day.

MEDICAL: Unless an emergency no advance notice is required. Hospital facilities do exist and a doctor will visit on request. Current Vaccination and Cholera Certificates are required.

DENSITY: The density of the water is salt (1025) at all states of the tide.

FRESH WATER: Fresh water is available in small quantities (50 tons) at the anchorage and larger quantities when alongside the jetty and is supplied by motor tankers.

FUEL: At present time no fuelling available.

GANGWAY/DECK WATCHMEN: The Public Security Department (Police) post a guard at each gangway, but it is advisable the ship also supplies a watchmen. Before landing *every* crew member must lodge his passport or seamen's identity card with the guard when alongside the jetty and at the dock Police Station when at the anchorage.

OPENING/CLOSING HATCHES: This work may be carried out by either crew or stevedores, but usually by the latter.

CUSTOMS ALLOWANCE: Qatar is ''dry'' and no official allowance is made. The bond is sealed on the ship's arrival.

CARGO GEAR: No additional requirements apart from those required by International Law.

IDENTIFICATION CARDS: Discharge Books or Passports are required to be handed to the Police before any crew member may proceed ashore.

CONSULS: The following countries maintain embassies in Qatar:

Iran	U.S.A.	Jordan
Great Britain	Egypt	Yemen
Saudi Arabia	France	Netherlands
Kuwait	India	Tunisia
Iraq		

REPAIRS: Only minor repairs can be carried out. Metal-locking, bottom brushing and underwater welding.

REPATRIATION: Crew changes can be carried out. The Agents will require to know the names, discharge book or passport numbers and necessary information of dates, etc. well in advance for the authorities. Repatriation is normally by air, but Asian crews can be repatriated to Pakistan and India by sea.

AIRPORT: It is about 3 miles from the port to the airport. There are regular flights to Europe, U.K. and India by British Airways, M.E.A. Air India, P.I.A. etc.

TIME: The standard time in Qatar is GMT plus 3 hours.

HOLIDAYS: The holidays in Qatar are usually religious and therefore fall on movable dates. As far as shipping is concerned there are only two days when work is not possible under any circumstances.

POLICE/AMBULANCE/FIRE: Police 4646; Ambulance 5151; Fire 5252.

TELEPHONES: Telephone available at the new Jetty. No. 25782.

GENERAL: Particular attention must be paid to:
(1)The Qatari flag must be flown at all times at the fore mast.
(2) Liquor is not allowed ashore and it is a serious offence to offer alcohol to a Qatari.
(3) Smoking is not permitted in any public places during the month of Ramadan.

SHORE LEAVE: Shore leave is permitted after the Immigration Authorities have cleared the ship and given permission, in writing, on the Crew List. Seamens' documents or passports must be deposited with the police at the gangway and retrieved on returning aboard.

AUTHORITY: Port Department, Ministry of Communications & Transport.

AGENTS: Gulf Agency Co. (Qatar) Ltd., P.O. Box 326, Doha, Qatar. Tel: 25138, 25139. Telex: 4259,

HALUL ISLAND: 25.38.55 N. 52.25.33 E.

Halul Terminal S.B.M. **(See Plan Book)**

Qatar national flag should be flown during hours of daylight.

DOCUMENTS: Master required provide 2 copies of crew list and show Light Dues receipt. All other necessary papers will be supplied on arrival, by Berthing Master.

PILOTAGE: Berthing Master will board incoming vessels in approximate position with Halul lighthouse bearing 270°×2.5 miles (that is to the Eastwards of the island) only. Vessels are requested *not* to pass to the Westwards or the Southwards of the island when approaching the anchorage or pilot cutter, as this is a hazardous area due to numerous underwater pipe-lines. Masters requested provide a good lee for the launch to facilitate boarding of Berthing Master and the lifting on board of equipment.

ANCHORAGE: To the Eastwards of Halul Island centred in a position with Halul lighthouse bearing 270°×2.3 miles. Depth about 80 ft. and bottom sand.

MAX. SIZE: SBM No. 1 up to 65 ft. draft (240,000 tons). SBM No. 2 up to 100 ft. draft (500,000 tons).

HEALTH: If sickness on board, details should be included in ETA message. No Doctor on Halul. In emergencies the services or advice of Company's Medical Officer based in Doha may be obtained. If Medical Officer or patient has to be flown to or from Doha, the tanker concerned will be charged for helicopter hire. Round trip is approximately £80.

RADIO: Vessels should establish communications with Q.P.P.A. (Offshore Operations), Doha, at least 48 hours before arrival Halul Terminal, giving ETA local time and quantity of cargo required in metric tons. Message to ''Petroqat Doha'' via Bahrain Radio. Any changes in ETA should be passed via Bahrain Radio, or if within range through station ''A7S'' (see below).

A private radio station, call sign''A7S'', operated by Q.P.P.A. (Offshore Operations) situated in position 25° 17′ 12″ N. 51° 34′ 39″ E. A continuous listening watch maintained on 500 kHz. Incoming tankers should listen for the ''A7S'' traffic list which is transmitted on 438 kHz at 0400, 0800, 1200 and 1600 hrs. GMT after first calling on 500 kHz. Other details shown in Admiralty List of Radio Stations Volume 1.

A standard information cable is passed to all incoming tankers by station A7S (Alpha-seven-Sierra).

Ship's radio station must not be used while tanker moored to SBM.

VHF: A VHF station on Halul Island, call sign ''Halul Control'', maintains a continuous watch on the International Marine Band, Channel 6. The station has a range of approximately 50 miles and incoming tankers should establish communications with this station as soon as possible. Ship-to-shore communication during loading is by portable VHF Radio telephone provided by the terminal.

TUGS Not available.

BERTHING: Approach is from the open sea, passing to the Eastwards of Halul. There are 2 single buoy moorings. No. 1 SBM in position 25° 39′ 00″ N., 52° 25′ 55″ E. fitted with 2×810 ft.×16 in. floating hose strings and connected to 1×30 in, shore submarine and one double 15 in.×150 ft. nylon floating mooring lines from the buoy. This berth will primarily accommodate vessels up to 120,000 d.w.t., but however, may be used for larger vessels if required. Loading rates of up to 8,000 cu.m. may be given. No. 2 SBM in position 25° 38′ 36″ N., 52° 27′ 35″ E. fitted with 2×885 ft.×24/20 in. floating hose strings and connected to 2 double 15 in.×150 ft. nylon mooring lines from the buoy. This berth will accommodate vessels of over 120,000 d.w.t. with up to a draft of 100 ft. Loading rates of up to 15,000 cu.m. will be given. In both berths, mooring lines from the buoys are secured on the forecastle head using equipment provided by the terminal. A suitable messenger rope should be ready for use. No moorings are used aft. The Berthing Master will advise in detail the mooring procedure.

Hose Connections: No. 1 SBM amidships port side 2×16 in. hoses. Hose derrick should be rigged to lift at least 10 tons and 2×16 in. reducers should be fitted on the port side only.

No. 2 SBM amidships, starboard, side 2×20 in. hoses. Hose derrick must be rigged to lift at least 10 tons and 2×20 in. reducers should be fitted on starboard side only.

Hose connection carried out by ship's personnel with advice from Berthing Master. Tankers *not* permitted to immobilise main engines or auxiliaries whilst moored to SBMs.

DENSITY: At berth, 1028/1030 (approximately).

CARGO: Flash point below 32° Fahrenheit.

H_2S content. Masters should refer to the International Oil Tanker and Terminal Safety Guide Section 1. 4. 2. on the subject quoted here for easy reference.

1.4.2. Hydrogen Sulphide – H_2S. Hydrogen sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour.

If exposure to hazardous concentrations of this gas is likely to occur, appropriate safety precautions should be taken. Suitable respiratory protection should be available during ullaging and sampling.

The TLV is given as 10 p.p.m. but concentrations in enclosed spaces should be reduced as far below this level as practicable and if men are to work without breathing apparatus, a nil concentration should be achieved before entry is permitted and effective ventilation should be maintained.

On tankers regularly committed to the carriage of sour crude, H_2S gas indicators should be provided.

It is important to realise that the concentration of H_2S can be measured and expressed in two different ways.

the p.p.m. in the liquid, by weight;

the p.p.m. in the air, by volume.

Producing and processing departments at terminal often use the liquid measure for H_2S content, and this could be confusing to tanker officers who usually think of H_2S as expressed in air volume measure. There can be a vast difference between the two measures. The measure in air is higher and can be very much higher. For example, chemists have measured a concentration of 7,000 p.p.m. (deadly) in the vapour stream coming out of ullage opening when a tank is being topped off with a crude oil containing only 70 p.p.m. H_2S in the liquid. Therefore, it is of vital importance to appreciate that a sour crude can release a lethal concentration of H_2S into the air.

The following guide to the effects on exposed persons of various atmospheric concentrations of H_2S gives some indication of its dangers:

Measured in air by volume	
50 to 100 p.p.m.	Eye and respiratory tract irritation after exposure of 1 hour.
200 to 300 p.p.m.	Marked eye and respiratory tract irritation after exposure of 1 hour.
500 to 700 p.p.m.	Dizziness, headache, nausea, etc., within 15 minutes; loss of consciousness and possible death after 30 to 60 minutes exposure.
700 to 900 p.p.m.	Rapidly produces unconsciousness and death occurs a few minutes later.
1000 to 2000 p.p.m.	Death is apparently instantaneous.

Apparent death from H_2S is not irreversible as prompt and efficient artificial respiration may restore life.

The terminal should advise the Master if the cargo to be loaded contains H_2S in concentrations which cause the gases vented during loading to be hazardous if inhaled. When handling cargo with noticeable H_2S content or when ballasting after discharge of such cargo, it is recommended that the following precautions should be taken.

The officer supervising the operations should keep a sharp watch on personnel for signs of fatigue or distress.

Lifelines, breathing apparatus and resuscitator should be readily available.

Loading through the pumproom should be avoided where possible to reduce the possibility of H_2S contamination of the pumproom atmosphere.

Gas should be vented through the cargo tank venting system and, if open ullaging is necessary, the ullage plugs should be kept open only for a minimum period of time.

When ullaging tanks, personnel should work in pairs and stand at right angles to the wind direction in relation to the ullage opening.

Personnel should not enter a pumproom without first starting the ventilation, checking that there is no gas present, and without someone else standing by. If any gas concentration is recorded, a self-contained breathing apparatus should be worn.

Other spaces into which H_2S may have been drawn should be ventilated and checked before entry.

Persons overcome by H_2S should be moved to a gas free area immediately and artificial respiration should be administered at once.

Gas tests should be made on deck and in accommodations at regular intervals and particularly during the topping-off periods. If concentrations exceed 10 p.p.m. inside the accommodations or 50 p.p.m. on deck more than 10 ft. from a gas outlet, the loading rate should be adjusted and if this does not result in a decrease of the gas concentration, loading should be stopped until conditions have improved or other suitable measures are taken.

During discharge, the pumproom bilges should be kept dry.

During loading or ballasting operations, conspicuous notices warning of potential danger should be posted on deck and at pumproom entrance, and at the entrance to any other space which could be affected.

TIME: Local time is GMT plus 3 hours.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS/STORES/LAUNDRY: Not available.

TANK CLEANING: No facilities available and ships must arrive with clean ballast, lines and pumps.

CUSTOMS: Trading in liquor is *strictly* prohibited and no alcoholic drink should be offered to Arab nationals.

SHORE LEAVE: Not permitted.

AUTHORITY: Qatar Petroleum Producing Authority (Offshore Operations).

UMM SAID: 24.54 N. 51.34 E. (See Plan Book)

DOCUMENTS:

Health Declaration.
Crew Lists.
Light Dues Receipt.
Other necessary papers supplied on arrival.

BUOYED CHANNEL: All vessels wishing to navigate the Umm Said buoyed channel must obtain prior clearance from Umm Said Control who can be contacted on VHF Channels 14 or 16 or by Telex via Bahrain Radio, addressed to Petroqat Umm Said. This precaution is essential to avoid unexpected encounters with deep-laden oil tankers.

APPROACHES:

Umm Said Approaches

Approach to Umm Said Terminal: With Halul Island peak astern steer 235° for a distance of 31.5 miles to (K) 'Kareinein' light buoy in position Lat. 25° 24′ 18″ N., Long. 51° 56′ 16.4″ E., thence 226°, 12 miles to (M) 'Mishut' light buoy in position Lat. 25° 15′ 51″ N., Long. 51° 46′ 43.4″ E.

From 'Mishut' light buoy steer 214° for a distance of 8 miles to (W) "Wakrah" light buoy, leaving this light buoy on the port hand.

From "Wakrah" light buoy steer 180° for a distance of 6.4 miles, to (H) "Hul" light buoy leaving this buoy to port.

From a position of two cables West of (H) "Hul" light buoy, steer 164° for a distance of 1.9 miles to pass between Nos. 1 and 2 Outer Channel buoys, thence 158° 30', 0.3 miles to pass between Nos. 3 and 4 Outer Channel buoys, thence 178°, 0.9 miles to leave No. 6 Outer Channel buoy on port hand, thence 173°, 1.6 miles to pass between Nos. 7 and 8 Outer Channel buoys, thence 191° 30', 1.6 miles to pass between Nos. 9 and 10 Outer Channel buoys, thence 176°, 0.8 miles to pass between Nos. 11 and 12 Outer Channel buoys.

From a position midway between Nos. 11 and 12 Outer Channel buoys, steer 157° for a distance of 2.2 miles, leaving "S.E. Arrif" buoy on the starboard hand, thence 217° for a distance of 3.25 miles, leaving "S. Arrif" buoy on the starboard hand.

After rounding "S. Arrif" buoy, steer 335° for a distance of 1.7 miles, passing close West of No. 1 Inner Channel buoy, thence 003°, 1.1 miles, passing close East of No. 2 inner Channel buoy.

From a position close East of No. 2 Inner Channel buoy, steer 348°, 0.5 miles to pass between Nos. 3 and 4 inner Channel buoys thence 323° to round "Turning" buoy, leaving this buoy on the port hand.

From "Turning" buoy steer a course to enter either the "Large Tanker Anchorage" or "Small Tanker and Freighter Anchorage" as applicable. The Northern limit of the Large Tanker Anchorage is a straight line joining the "Turning" buoy and "East Anchorage" buoy positions.

Masters of vessels are requested *not* to anchor outside these areas and to keep the fairway clear at all times.

Outward Passage: The reverse track is followed as for the inward passage described above.

Speed must be reduced before rounding the "Turning" buoy and the passage in the Inner Channel must be made at slow speed to avoid increase of draft due to "draw down" or "heel under helm".

The Outer Channel should also be taken at moderate speed to avoid "draw down" and "canal action" when passing close to shoal patches.

Charts: Admiralty Chart No. 3787 – Ras Abu al Mishut to Fasht al Arrif.

Admiralty Chart No. 3950 – Fasht al Arrif to Ras Laffan.

Depths: In the Outer Channel there are least depths of 37 ft. (11.28 m.) in the vicinity of Nos. 1 and 2 buoys, 3 and 4 buoys and Nos. 9 and 10 buoys.

Between the Outer and Inner Channel the depth varies from 40 ft. (12.2 m.) at Nos. 11 and 12 Outer Channel buoys through 72 ft. (22.0 m.) and 78 ft. (23.8 m.) between "S.E. Arrif" and "S. Arrif" buoys to 47 ft. (14.3 m.) close to No. 1 Inner Channel buoy.

In the Inner Channel the least depth is 38 ft. (11.6 m.) between Nos. 3 and 4 Inner Channel buoys.

From the Inner Channel to the Anchorage the depths vary from 43 ft. (13.1 m.) between the Channel and "Turning" buoy to 48 ft. (14.6 m.) at the Anchorage.

Tidal Conditions: In general the flood stream sets to the S.S.W. and the ebb stream to the N.N.E. the rate being up to two knots at Springs.

Cross sets will consequently be experienced in the channel, more particularly in the Northern part of the Outer Channel, between the Outer Channel and "S.E. Arrif" buoy and between "S. Arrif" buoy and the "Turning" buoy. It should be noted that at the Outer Channel entrance the flood stream continues to set to the Southward for some time after the tide has started to fall.

Tides: The tides in this area have a large diurnal component and at times there is only one high water and one low water in the twenty-four hours. This irregularity is more pronounced at Umm Said than at the Outer Channel entrance for which predictions are made.

In December the higher high water, or the only high water during periods of single day tides, occurs between 0500 and 1400 hrs.; in March between 2200 and 0900 hrs.; in June between 1800 and 0100 hrs. and in September between 0900 and 2100 hrs.

At Umm Said there are a few days in the year when the tide does not rise above 5 ft. (1.52 m.) and there are considerable periods each day when the predicted height of the tide is greater than 3 ft. (0.91 m.).

In the vicinity of Nos. 3 and 4 Inner Channel buoys, High Water occurs about 1 hour after High Water at the Outer Channel entrance and the rise of tide is slightly more than at the Outer Channel entrance.

The Higher High Water is normally 5 ft. (1.52 m.) or better rising to 8 ft. (2.44 m.) at exceptional Springs.

Abnormal Meteorological conditions may affect all the above tides by ±2 ft. (0.61 m.).

PILOTAGE:

Inward: Except on special request Pilots are not provided for the inward passage. Vessels should proceed to the appropriate anchorage, having first received clearance from Umm Said Terminal to enter channel. This is to ensure that all outward bound vessels are aware of traffic movements in channel. Pilot will board incoming vessels at "W" Wakrah Buoy, if requested.

Outward: Compulsory for all vessels carrying flammable, toxic, or dangerous cargoes.

Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above the water. This can be adjusted to suit conditions. A Pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend Pilot ladder clear of launch, and then step on to lower platform of accommodation ladder. Vessels should comply with the current U.K. Merchant Shipping (Pilot Ladders) Rules.

When automatic Pilot hoists are used for embarking and disembarking a responsible English-speaking officer must always be in attendance.

Pilotage is compulsory for dry cargo ships bound for Umm Said anchorage. Pilotage performed by Doha Pilots.

ANCHORAGE: Eastern Anchorage. Depth 48 ft.

RESTRICTIONS: Mooring and unmooring normally restricted to daylight hours.

MAX. SIZE: Draft of laden tankers leaving Umm Said controlled by depth at outer end of Outer Channel. This is 3~~7~~6 ft. (11.28 m.) below Chart Datum and Zero of Predictions. Tide rarely falls below 1 ft. above datum, so that there is normally 3~~8~~7 ft. (11.58 m.) or more in the channel.

Experience shows that even under the worst weather conditions there is no appreciable movement on larger ships in Outer Channel. As deep-draft vessels always reduce speed between Nos. 3 and 4 Inner Buoys and in Outer Channel, there is very little "draw down". Deep-draft vessels should endeavour to pass between Nos. 1 and 2 Outer buoys at higher high water for the Outer Channel entrance. In general, limitations are as follows:

(*a*) Ships drawing 35 ft. (10.67 m.) or less can sail at any time on any day.
(*b*) Ships drawing 36 ft. (10.97 m.) will rarely have to use tides.
(*c*) Ships drawing 37 ft. (11.28 m.) will usually have to use tides.
(*d*) Ships drawing 38 ft. (11.58 m.) always have to use tides.
(*e*) Ships drawing 39 ft. (11.89 m.) will occasionally be neaped.
(*f*) Ships drawing 40 ft. (12.19 m.) will be neaped 120 days ± a year.
(*g*) Ships drawing 41 ft. (12.15 m.) can sail occasionally. The best months are June and July.
(*h*) Ships drawing 42 ft. (12.80 m.) are not worth programming as on the few days when predictions indicate they could sail, meteorological conditions may well cut the tides.

Underkeel Clearance: The following table stipulates the *minimum* underkeel clearance for vessels using the Umm Said Channels entering inward and departing outward.

Vessels up to 99,999 d.w.t.	—	3 ft. Clearance
Vessels from 100,000 to 149,999 d.w.t.	—	4 ft. Clearance
Vessels over 150,000 d.w.t.	—	5 ft. Clearance
L.P.G. Carriers (all sizes)	—	5 ft. Clearance

Navigation in shallow waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Pilot/Mooring Masters and Masters of ships should be guided by the following:

(*a*) Due consideration should be given to the effect of draw down at speed on vessel's draft in shallow water, bearing in mind vessel's trim.
(*b*) If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.
(*c*) Ensure accuracy of vessel's draft reading, including the midship drafts, having in mind the tendency of vessels to sag and the adverse effect of a small list.
(*d*) Reduce to a minimum safe speed to pass over and near shoal areas.
(*e*) Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.
(*f*) Note that list can mean an appreciable increase in draft.
(*g*) When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid-channel.

HEALTH: (Quarantine and Medical Clearance). The Medical Officer of Qatar Petroleum Company Ltd. will carry out these duties. Medical attention to Masters and crews of ships provided by Q.P.P.A. Medical Officer when asked for by Master.

RADIO: When advising their ETA ships must state their last port of call within the previous 21 days and report any sickness on board. If the last port of call is Bahrain or Ras Tanura, the previous port must be stated.

Vessels are requested to inform Petroqat, Umm Said by cable of their ETA at (W) Wakrah Light buoy and whether or not Pilot required, 72 hours and confirm 24 hours prior to their arrival. It should be clearly indicated that times quoted are in GMT. They should also state the quantity of cargo, in long tons, and the maximum loading rate required.

These cables should be addressed to Petroqat, Umm Said, and passed via the Bahrain Coast Radio Station.

VHF: The Umm Said Terminal is equipped to operate on five channels of the International Maritime Mobile Telephone Service as follows:—

Channel No.	Transmit/Receive Frequency mc/s
9	156.45
11	156.55
12	156.60
14	156.70
16	156.80

A continuous listening watch is maintained on Channels 16 and 9, the call sign being "Umm Said" and the range of station is approximately 50 miles.

Berth Radio Frequency: Tanker berthing/loading operations are carried out using Pocketfones on a frequency of 155.975 mc/s transmit and receive. These Pocketfones are classed intrinsically safe and also have the facility of use on Channels 14 and 16.

TUGS: Given sufficient prior notice a tug can usually be made available on request.

BERTHING: Pilots act in same capacity as Mooring Masters in the berthing of vessels, after which they supervise raising of flexible hoses and connection to ship's manifold. During loading operation they act as company's representatives.

Vessel's crew are expected to assist with hose connecting.

North Berth is a Single Point Mooring in Position 24° 53′ 37.2″ N., 51° 34′ 54″ E. connected to the shore installation by a 36 in. submarine pipe-line. The seaward end of the pipe-line and buoy terminates in two 16 in./12 in. flexible floating hoses. Vessels are moored by a single hawser from bow to buoy.

The following equipment should be carried by each vessel:

(i) One 4 in. circumference × 40 fathom messenger rope ready for use at the bow together with mooring lines of suitable size ready for use.

(ii) One good boat rope at least 200 ft. long ready at accommodation ladder position.

(iii) Derrick or crane rigged over the starboard side manifolds should be capable of lifting 16 in./12 in. floating hose to a height of up to 30 ft. above deck (S.W.L. 10 tons).

(iv) Reducers or adaptors if necessary to be bolted to 2 ship's flanges so as to take 12 in. hoses.

Warning: Ship's anchors must never be used within 0.5 mile of this berth or the 36 in. submarine pipe-line and must therefore be well secured at all times.

The South Berth consists of a Conventional Buoy Mooring, connected to the shore by a 24 in. submarine pipe-line. The seaward end of the pipe-line terminates in two 12 in. flexible hoses. Vessels are moored at this berth by ship's anchors and mooring buoys. The following equipment should be carried by each vessel.

(i) Port and starboard anchors to be fitted with marker buoys and sufficient line. This will facilitate recovery of anchor in the event of loss.

(ii) 2 good boat ropes at least 200 ft. long ready for use on each side.

(iii) A good line by the pilot ladder for hauling on board equipment such as hose clamps, wrenches, reducers and elbows.

(iv) 4 good mooring lines aft, of a suitable size for the vessel on which they are used. Each line should consist of 120 fathom hawser, tailed by a similar hawser and ready to run out when required.

(v) 2 good mooring lines forward similar to the after lines for use on breast buoy.

(vi) 2 good rope stoppers to be available forward. 4 good rope stoppers to be available aft.

(vii) Derricks or cranes reaching over the hose connection should be capable of lifting 12 in. flexible hose from the sea-bed to a height of up to 30 ft. above deck (S.W.L. 5 tons).

(viii) Reducers or adaptors to be bolted to ship's flanges, so as to take 12 in. hose.

(ix) Carpenter's stoppers are provided on loan by Q.P.P.A. for use with Authority's 4.75 in. wires, and chain stoppers should not be used.

Note. Where a vessel has 2 or more loading connections, the ship's flanges should not be less than 4 ft. apart.

TERMINAL INFORMATION:

Berth	*Max. t.p.h.*	*Fixed sea-line*	*Overrall hoses*
North (SPM)	4,300	One – 36 in.	Two – 12 in.
South (CBM)	3,800	One – 24 in.	Two – 12 in.

Depth of water: Available depth of water at seaward end of sea-line is as follows:

North Berth (SPM)	65 ft. (19.6 m.)
South Berth (CBM)	44 ft. (13.41 m.)

An allowance of 8 ft. for South Berth has been made for height of sea-line end cradle above the sea bed.

Berth limitations:

North Berth (SPM) –	Bow to manifold 590 ft.
South Berth (CBM) –	Head North – All vessels under 900 ft.
	Head South – All vessels under 1,100 ft.

After the vessel has been securely moored in berth, the hoses are lifted and connected to the ship's manifold.

The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs should be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the vessel as to any signals needed for local requirements.

The Mooring Master brings a portable radio to the ship.

The radio may not be used for private conversation. Use of the ship's radio while at the loading berth is strictly prohibited.

When loading is completed, hoses will be disconnected and lowered, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the Mooring Master or direct to sea.

L.N.G. Jetty: This is a 'T' type jetty with breasting dolphins flanked either side by 2 mooring dolphins. Water depth at the berth is 42 ft. Chart Datum.

BULK HANDLING FACILITIES: A Government Jetty has been constructed in Umm Said Bay connected to a Fertiliser Production Plant and grain mill. There are facilities alongside the quay for loading bulk urea and bagged urea; for loading refrigerated liquid ammonia; discharging bulk grain.

Vessels up to 60,000 d.w.t. may be accepted alongside.

The jetty is 700 ft. long, 100 ft. wide; the deck level being 20 ft. 3 in. above. Admiralty Chart datum. There is a least depth of 40 ft. alongside.

Government Pilots provide berthing assistance. See "Doha".

Operational Equipment:

Ammonia Arm: One 10 in. liquid ammonia loading arm and one 6 in. vapour loading arm at a fixed point serving the North berths.

Ship Loaders: 2 loading mobile machines (ship loaders) serving the whole of South side of the jetty, one of which is capable of loading bulk urea.

Grain Unloading: 6 unloading points for connecting 2 mobile grain unloading machines.

Conveyor: System for export of bagged and bulk urea and import of grain.

Crane: 10-ton swl dockside mobile crane serving the whole of the North side of the jetty.

Also see "Developments"

CARGO:

1. Flash Point. Flash point of Qatar crude is below 32° Fahrenheit.

2. H_2S Content. Qatar crude contains concentrations of H_2S (sulphuretted hydrogen). This is an evil-smelling poisonous gas which can be lethal depending on concentration of gas in the air inhaled. It can be detected normally by smell, but a high concentration of the gas rapidly paralyses sense of smell and may lead to a false sense of security. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned must be left with all possible despatch until adequate ventilation can be carried out. *The explosimeter will not detect this type of gas.* The foregoing should be dealt with in the light of experience where large quantities of crudes of this type have been carried without accident and we do not wish to exaggerate the dangers. The under-noted precautions have been evolved as necessary to provide against a possible accident.

(a) During loading gas should only be allowed to escape via the agreed venting arrangements.

(b) When ullaging tanks, personnel should keep windward of the tank opening and avoid breathing fumes as much as possible. If H_2S is inadvertently inhaled the man should leave the area and not return until his sense of smell has been restored.

(c) No one should enter any pump room or any compartment where gas could collect unless another person is standing. by.

(d) Lifelines, breathing apparatus and resuscitator should be readily available.

(e) As a precautionary measure, the gas ejector for the pump room should be put into operation at any time entry is made into this space whilst the possibility of H^2S gas entering pump room from cargo or empty tanks exists.

LOADING:

Readiness. Notice of Readiness will be received by Authority Representative provided vessel ready to load. Lay time will commence as stipulated in the export agreement between purchasers and vendors. A full cargo is deemed to be the maximum cargo which can be loaded in your ship at Umm Said consistent with safe underkeel clearance on sailing, as advised by Mooring Master.

The Authority will make every effort to load tanker on arrival provided berth available and weather permitting.

Advice from vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading. To prevent excessive pressure from surge to ship/shore connections, ship's valves should be operated slowly.

Full cargo is deemed to be the maximum cargo which can safely be loaded in the vessel at Umm Said. Completion of loading is subject to the normally accepted tolerances above or below the required cargo.

Tank Dips. During loading, hourly checks of vessel's tanks shall be made by ship personnel to determine cargo loaded for comparison with shore figures if required. This is to prevent loss of oil through a leaking hose and particularly applies at night when seepage of oil can remain unobserved.

Inspection of vessel's tanks will be made by a ship's officer before loading and, if required, by a Q.P.P.A. Representative. Opening dips and closing ullages will be taken by ship's personnel and the quantity of cargo calculated.

Particular care must be exercised by ship's personnel, towards completion of loading, in the "Topping off" of tanks to ensure that the Terminal is given timely advice of any decrease in pumping rate required. Adequate "Stand-by" notice should be given before the final "Stop".

Loading Pumps. Two 1,200 h.p. pumps are used to load crude oil and it is important to note that any rapid changes in the oil velocity may cause pressure surges in the loading system. A pressure surge may rupture the flexible hoses connected to your vessel spilling dangerous quantities of crude oil onto the decks or surrounding areas. To avoid these risks, valve operations and tank switching should be done with extreme care. Please ensure that 15 minutes notice is given for "Slow Speed" and/or "Stop" instructions.

BALLAST: When a vessel enters port waters in ballast, the ballast water for overside discharge *must be clean* and a declaration signed by the Master and delivered to the representative of the Terminal to this effect. Oily wastes, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

The attention of Masters is drawn to the volume entitled "International Conference on Prevention of Pollution of the Sea by Oil" 1962 and subsequent publications issued by the International Maritime Consultative Organisation.

Vessels are subject to heavy fines and liabilities for claims arising from pollution of the sea and shore areas.

In Umm Said the "load on top" system is normal procedure and Masters of all tankers are required to certify quantity of slops on board and their intention of "loading on top". If "load on top" system is not used the Master will be required to certify adequate reasons for not doing so, e.g., vessel drydocked in last port, etc.

(a) Essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with Mooring Master's requests as to ballast quantity and disposition.

(b) Umm Said is an open roadstead and subject to sudden changes in weather. On occasions it is of great advantage to commence loading whilst discharging ballast or prior to completely deballasting to avoid having the vessel in a flying light condition.

(c) All pump-room seacocks must be closed before commencement of loading.

FUEL: Bunkers not available.

FRESH WATER: Not available.

CUSTOMS ALLOWANCE: The State Laws of Qatar are very strict about the import of liquor and its consumption both on the mainland and on vessels in the harbour. No employee, whether senior or junior, is permitted to import any liquor direct or to bring any liquor ashore from vessels, and under no circumstances should liquor be offered for consumption on your vessel to any Q.P.P.A. employee unless he is of senior staff status. At the present time vessels enjoy the privilege of not having to seal their liquor stocks whilst in port, but you will readily appreciate that this privilege would be withdrawn if the above rules are not strictly observed whilst vessel is at Umm Said.

REPATRIATION: Immigration/Transit facilities for arriving or departing ship personnel are good. Ample notice should be given on passport details to ensure minimum delay to travelling personnel.

DERATISATION: No facilities.

DISCHARGE CERTIFICATE: The Master of every vessel loading at Umm Said is handed a Discharge Certificate for completion by the Customs or Port Authority at port of discharge and return by air mail to Qatar Petroleum Producing Authority (Onshore Operations), P.O. Box 10070, Umm Said within 40 days of sailing from Umm Said. Instructions regarding the cable to be sent after discharging a cargo loaded at Umm Said must be strictly followed. It must be emphasised that failure to comply with this requirement may result in delay or even boycott of the vessel upon return to Qatar. It is therefore in best interest to ensure that Agent at port of discharge attends to despatch of this certificate with least possible delay. Airmail should be used for Certificate posting.

SECURITY: The Government of Qatar and the Authority are anxious to ensure that unauthorised persons do not board vessels loading at Umm Said. Vessel's co-operation is requested in checking the identity of all persons boarding.

Vessels are particularly advised to keep all points of access to vessel under surveillance at all times, and to provide maximum night illumination of vessel insofar as the safety regulations permit.

A State Police Launch is present in the area and may be available for assistance if required.

DEVELOPMENTS: The new Umm-Said port, opened in 1977, has a total water frontage of 4.5 km. of which 2.5 km. has been developed to provide deep-water berths and a harbour for small craft. Three berths at the Northern end having 15.5 m. minimum depth of water at MLLW are reserved mainly for the requirements of Qatar Steel Company and two berths at its Southern end having 13.0 m. minimum depth of water are reserved mainly for the requirements of Qatar Petrochemical Company. Three additional berths having 13.0 m. and two berths having 10.0 m. minimum depth of water at MLLW are available for specialised and general cargoes.

Inner approach channels and manoeuvring areas have been dredged to serve all berths in the new Port.

In addition there are wharves under construction which will be used by general cargo vessels, Ro/Ro vessels, car carriers and container vessels.

A chemical plant is also being constructed.

AGENT: Agency carried out by Qatar Petroleum Producing Authority.

NOTES

Please also advise Shipping Guides Ltd.

Reunion Island

POINTE DES GALETS: 20.55 S. 55.17 E.

(See Plan Book)

PILOTAGE: Compulsory for all vessels of over 50.0 m. LOA. Pilot is normally ordered by ship's Agent, or in particular cases by the Harbour Master if contacted by VHF beforehand. Pilot launch carries regulation pilot signals. Pilot boards at the entrance to the port about 1 mile from the breakwaters.

APPROACHES: *Channel and Buoyage:* The leading line 102° 30' for entry is determined by day, but 2 rectangular white signs, bordered in red with a thick black line denoting the centre line. At night the leading line is 2 red lights. In the channel the depth is 10 m., 70 m. wide and is buoyed by 4 spars, 2 on each side.

The leading marks for access to the North Port, South and Fishing Port, respectively 009°, 189° and 260°, are marked as shown below:–

North Port:– by day, 2 red rectangular signs, with a thick white line marking the centre line, at night, 2 fixed red lights.

South Port and Fishing Port:– 2 rectangular white signs with a black vertical line marking the centre line by day. 2 fixed green lights by night.

ANCHORAGE: There are 3 anchorages in the roads near the port.

(*a*) In Baie de St. Paul in depths of about 40 m., well marked and safe except in very strong swell.

(*b*) South of the port entrance in the immediate approaches, depths of 40 m., only used in fine weather and calm sea.

(*c*) In Roads of La Possession unmarked anchorage and little used.

If vessel requires a Pilot for anchoring, then anchorage dues are incurred. Vessels anchoring by their own means do not incur charges.

RESTRICTIONS: Manoeuvring is best done in the evening because during the day a wind can make movement difficult. The current in the channel varies in strength (between 1 and 2 knots) and direction. Its direction can only be determined by careful observation during the approach. As a consequence ships should be ready to anchor on instruction from the Pilot while transiting the channel. Vessels swing in the outer port using starboard anchor.

MAX. SIZE: Under certain conditions, the topography of the port and jetties access is limited to the sizes below:–

North Port: length 173 m., draft for entry 7.5 m. with preliminary agreement of the Harbour Master, after a first call at South Port. Departure draft fixed by the Harbour Master.

South Port: length 180 m. if draft less than 7.50 m.
175 m. if draft less than 8.50 m.
160 m. if draft less than 9.00 m.
(On departure only)

Fishing Basin: length 55 m. draft 4.50 m.

Otherwise entry or departure will depend on the pilots advice. Normally entry only occurs at the following times depending on the season.

Maximum daylight 0500 hrs. – 1845 hrs.
Minimum daylight 0600 hrs. – 1800 hrs.

RADIO: Saint Denis Radio. Harbour Master's Office equipped with VHF. Call on Channel 16.

TUGS: Only used to assist vessel manoeuvring in the port. Tugs join vessel in outer harbour. Ship's lines always used.

BERTHING: Berth assigned by Harbour Master, basis vessel's length and draft. Tankers berth in the outer harbour at dolphin berth. No slop facilities.

Fore Port: (Channel: 70 m. usable width. Turning circle 300 m. Dredged to 10 m. Berth H, 175 m. long, dredged to 10 m.).

North Port: Access lock: 30 m. width, 10 m. depth.
Berth 1: 160 m. length, 8.50 m. depth.
Berths 2, 3, 4: total length 366 m., 9.00 m. depth.
Berth 5: 150 m. length, 8 m. depth.
Berth 6: (National Marine Berth) 140 m. length, 6 m. depth.
Berth 7: 210 m. length, 9 m. depth.

South Port: Berths 8, 9: Each 190 m. length, 10 m. depth.
Berth S: 120 m. length, 10 m. depth.

Fishing Basin: 6 berths, 70 m. length, 5 m. depth.

The depths above are dredged depths.

Facilities for handling 22 ton containers.

CRANES: No shore cranes. Floating cranes with 100 tons capacity available.

STEVEDORES: Normal working hours 0700–1700 hrs.

DENSITY: 1025.

FRESH WATER: Available by pipe-line at the quays. Rate 10 t.p.h. Not available at tanker berth.

FUEL: All grades of fuel and marine diesel available at berths Nos. 8 and 9.

MEDICAL: Doctor and hospital facilities available.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally performed by ship's crew.

REPAIRS: Only minor repairs can be effected.

REPATRIATION: All facilities available for crew change and repatriation.

AIRPORT: 30 km. away, daily connections to Africa and Europe.

TIME: GMT plus 4 hours. No alterations during the year.

HOLIDAYS: No cargo work on May 1st or November 1st. Can be worked at overtime rates on January 1st, Easter Monday, Whitsun, July 14th, August 15th and December 25th.

TELEPHONES: Police 22.00.17, 22.08.22. Ambulances 18 or 22.03.16 (Private), Fire 18, Harbour Master 22.08.22. Telephones can be placed onboard at all berths.

IDENTIFICATION CARDS: Seaman's Book sufficient.

DELAYS: General cargo rates 500–1,000 tons per day depending on category and conditions.

SHORE LEAVE: Crew are allowed to go ashore.

SHIPMASTER'S REPORT: September 1978.

Documents: 1 Crew personal effects list, 1 Crew list, 1 Bonded stores list. Declaration of Health (Supplied on arrival).

Pilotage: Pilotage compulsory. Pilot boards 1 mile off breakwater, minimum of 24 hours notice required.

Anchorage: At Saint Pauls Bay, 5 cables offshore in depth of 20 fathoms – the water is too deep further offshore.

Restrictions: Vessels can enter and leave at any stage of the tide during daytime. Max. beam for North Port 22 m.

Max. Size: Length 180 m. with draft 7.15 m., length 175 m. with draft 8.5 m. and length 160 m. with draft 9.0 m.

Tugs: 1 tug available and required for berthing and unberthing in the North Port.

Radio: Radio station – Saint Dennis Radio "FFD".

VHF: Pilot and Port Authority Channel 16.

Special Bulk Facilities: Bulk sugar berth – rate 400 t.p.h. No quay cranes – no Ro/Ro facilities. Facilities for handling containers. Storage space for containers under construction.

Fresh Water: Available.

Repairs: Limited facilities.

Services: Provisions, Bunker fuel, diesel available.

AUTHORITY: Capitain du Port.

AGENT: SCAC La Reunion P.O. Box 705, 97474 Saint Denis De la Reunion, Tel. 21.01.32., Telex 0961 37.

NOTES

Please also advise Shipping Guides Ltd.

Romania

CONSTANTZA: 44.12 N. 28.41 E. (See Plan Book)

DOCUMENTS: As soon as vessel is boarded by the border control commission, the Master fills in a form of declaration in 4 copies, which together with Stowage Plan, Cargo Manifests, Sanitary Certificates, is handed to representative of the Agency. Also following documents are to be handed over at Harbour Master's Office:

Derating Certificate.
Certificate of Nationality.
Tonnage Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-telegraph Equipment Certificate.
Ship's Register.
Safety Construction Certificate.

N.B. These documents will not be returned to the vessel until sufficent funds, in U.S. dollars, have been deposited by Owners to cover all vessel's disbursements.

Crew Lists and Passenger Lists must be typed in several copies (up to 7).

Purser's Report: 1976.

The Authorities require all the ship's certificates, discharge books, health declaration, and vaccination certificates. At least 10 copies of crew list, personal declaration and 2 copies of stores list containing all items of foodstuff, bonded goods and canteen.

PILOTAGE: Upon arrival in roads, a cable must be sent through radio coast station to Agent, stating hour of arrival and asking for Pilot. If entrance is not possible immediately due congestion Agent will call back the vessel advising when Pilot may board near the port entrance in order to berth vessel.

A pilot is required for shifting in port, even for warping along the quay. Pilot-boat has black hull with "Pilot" in white on sides, and white upperworks. Pilots operate 24 hours a day on VHF Channel 14 only.

MINEFIELDS: Danger Area No. 3B (Constantza South). The area enclosed by the coast and by lines joining the following positions:

(a)	44° 09.81′ N.	28° 38.25′ E.	*(b)*	44° 08.99′ N.	28° 39.96′ E.
(c)	44° 08.50′ N.	28° 39.96′ E.	*(d)*	44° 08.50′ N.	28° 54.01′ E.
(e)	44° 00.17′ N.	28° 54.01′ E.	*(f)*	44° 00.17′ N.	28° 39.88′ E.

Danger Area No. 3A (Constantza North). The area enclosed by the coast and by lines joining the following positions:

(a)	44° 21.79′ N.	28° 41.19′ E.	*(b)*	44° 21.79′ N.	28° 52.69′ E.
(c)	44° 21.14′ N.	28° 54.01′ E.	*(d)*	44° 10.19′ N.	28° 54.01′ E.
(e)	44° 10.19′ N.	28° 42.18′ E.	*(f)*	44° 10.48′ N.	28° 42.16′ E.
(g)	44° 10.99′ N.	28° 40.76′ E.	*(h)*	44° 09.77′ N.	28° 39.55′ E.

ANCHORAGE: Anchorage areas in Constantza roads are just near the new port works in an area up to 44 ft. depth. Length and breadth have no special restrictions. Actual official permitted draft for tankers 30.6 ft. will be soon improved in new tanker berths. Constantza anchorage – East approach Nr. 2. Approach is between limits of Danger Areas Nos. 3B and 3A. Width 1.7 miles, length 15.3 miles, direction 270°–090°. Centre line joins following positions.

C1: 44° 09.35′ N. 29° 02.20′ E. At 17.5 miles on bearing 091° 12′ from Constantza main lighthouse (nr. 1.5).

C2: 44° 09.35′ N. 28° 41.00′ E. At 2.25 miles on bearing 099° 12′ from Constantza main lighthouse (nr. 1.5).

On this approach non-degaussed vessels with a max. draft 12 m. may navigate.

MAX. SIZE: Vessels up to a max. draft 35 to 36 ft. may berth in Constantza. See "Tankers".

TUGS: Tugs normally join vessel near port entrance assisting them until berthing.

RADIO: Constantza coast radio station, call sign YQ1, frequency 462 kc/s. Operation – daily starting at 0650, 1250 and 1850 hrs. GMT.

TANKERS: 5 oil wharfs under construction capable of berthing tankers up to 80,000 d.w.t.

MEDICAL: Crew members are offered medical assistance on all working days between the hours of 0900–1200 and 1300–1700 hrs.

GANGWAY/DECK WATCHMEN: Watchmen recommended for special general cargoes. Cost will be arranged through Agent.

CUSTOMS ALLOWANCE: Small quantity permitted for each crew member out of bond but may be renewed if vessel stays longer in port.

REPAIRS: Largest dry dock in Constantza has 15,000 tons lifting capacity, second dock up to 8,000 tons.

TIME: Local time is GMT plus 2 hours.

HOLIDAYS: Official holidays in Romania: New Year's Days (1st and 2nd January); Easter Orthodox Monday (April); Labourer's Days (1st and 2nd May); Liberation Days (23rd and 24th August); Anniversary of Socialist Revolution (7th and 8th November); Christmas (25th and 26th December); Proclamation of the Republic (30th December).

STEVEDORES: Working hours 0800–1700 and 2000–0500 hrs. Saturday afternoons, afternoon of days before holidays, Monday mornings and days after holidays until 0800 hrs. usually exempted in C/P although work may be effected. Loading and discharging are generally effected by shippers and receivers, respectively at their own expense and they may work also on holidays, Sundays and Saturday afternoons, no overtime expenses being charged to the vessels for shore labourers but without payment of overtime to vessel's crew and without counting the time.

SHORE LEAVE: On completion of border inspection, crew can go ashore taking their Seaman's Books (or Passports) and the permits they receive from the soldier at the gangway. The permits must be returned to soldier upon coming back on board. In the event that crew members desire to visit another place outside Constantza they must inform Agent.

GENERAL: From the time a vessel enters the territorial waters of Romania until she leaves the respective zone, i.e. 12 miles, it is compulsory to fly the Romanian flag. Ships that call at Constantza for the first time and have not got the Romanian flag on board must have it ordered through the Agent immediately upon berthing.

SHIPMASTER'S REPORT: Rate of exchange is "Tourist Rate" which is approximately 3 times official rate. It is illegal to take Romanian money into or out of the country, any money which has not been spent must be returned to Agent in front of Customs when clearance is being given.

Any stages, gantlines or painting scows must be taken inboard at night. First opening and closing of hatches are for ship's account. Motor-boats operate a "taxi" service in harbour at a cost of 8 Lei per person per trip.

Bunkering barge *nr Monteoru* delivers oil at approximately 60 metric t.p.h. Control will only issue clearance after all cargo work, bunkering, etc., is completed.

At Mineral Berth iron ore is discharged by 2 large Gantry Cranes operating grabs, each working at approximately 200 t.p.h. Rate of discharge is frequently disrupted by shunting of railway trucks – 2 tracks serve five berths.

GENERAL: Following is an extract from "Notice to Sailors" issued by authorities at Constantza:

1. Crew members are required to observe international rules covering work protection, port sanitation and customs regulations, and in addition, Romanian law, both within the port and outside that area.

2. In order to avoid accidents concerned with port equipment, cranes, trucks, tractors and trains etc., crew members walking inside the port area are permitted to walk only on the main streets and between the berths where their vessels are moored, and/or to entrance/exit No. 1, the Navlomar Agency, the Harbour Station, the Navlomar tax-free shop or the Seamen's clinic.

3. Crew members are required to enter or leave the port area at gate No. 1.

4. Crew members are required to be back aboard their vessels by 0400 hrs.

5. Crew members wishing to visit other zones in the country are required to obtain a visa from the ship's Agent.

6. Transportation with the port by motor-boat which leaves the Harbour Station every fifteen minutes and calls at all berths in the port, is available subject to crew members being in possession of the proscribed ticket issued by ship's Agent and duly signed and stamped by the ship's Master.

7. The tax-free shop is located next to the Harbour Station. All purchases must be retained aboard under customs control until the vessel has sailed.

8. It is forbidden, either to bring-in or to take-out Romanian currency. Such currency is obtainable from Navlomar Agency at Master's request and for Owner's account. All Romanian currency remaining in crew members possession must be returned to the Master before sailing, and the Master is required to return the currency to Navlomar.

9. The port Polyclinic is available for medical attention to crew members at the following times: Monday, Wednesday and Friday, between 1300 and 1600 hrs. Tuesday, Thursday and Saturday, between 0800 and 1300 hrs. In cases of emergency, assistance is obtainable by telephoning 16528.

10. Crewmail and messages are delivered daily by ship's Agents, and outgoing crewmail is collected for despatch at the same time.

AGENT: Navlomar Shipping Agencies, Telex 014-259. Cables "Navlomar Constantza".

SULINA (including Galatz and Braila): 45.09 N. 29.39 E.

DOCUMENTS: Within maximum 1 hour from fulfilment of arrival formalities the Master or Chief Mate reports at the Harbour Master's Office where he hands the following documents:

Certificate of Nationality.
Tonnage Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-telegraphy Equipment Certificate.
Safety Construction Certificate.
Cargo Gear Certificate.

The above certificates are to be valid and not to expire before ship's sailing the port, Load Line Certificate and Cargo Gear Certificate not to be older than 12 months, and same remain with the Harbour Master until ship's departure when returned through the representative of the Agency that accompanies the Control Commission on departure.

PILOTAGE: Notice of arrival to Pilot station at Sulina is to be sent in due time through Navlomar Sulina.

Sulina – S.E. approach nr. 5. Width 1.6 miles. Length 7 miles. Direction 146°–326°. Centre line joins the following positions:

S1: 45° 03.01′ N., 29° 53.4′ E. At 11.5 miles on bearing 124° 24′ from Sulina lighthouse (nr. 1.20).

S2: 45° 08.9′ N., 29° 47.9′ E. At 5.75 miles on bearing 095° 42′ from Sulina lighthouse (nr. 1.20).

Thence on the No. 01 Sulina black light and whistle buoy, and afterwards on the line of Sulina Entrance leading lights (301° 12′) into Sulina Channel and so to harbour. On this approach non-degaussed vessels with max. draft 7 m. may navigate.

The port of Galatz is situated on the left side of the Danube 79 miles from the Black Sea.

RESTRICTIONS: Vessels calling at Danube ports are obliged to wait in roadstead of Sulina, at least 1 mile away from the black buoy (a black floating cylinder marked "01" in white, which is lighted at night by green flashing light). All vessels both entering and going out of Sulina channel as well as during navigation in the channel and Danube, are obliged to have on board a Danube Administration Pilot. As a rule, entering and leaving the Sulina channel, as well as navigation in the channel, is prohibited after night-fall.

MAX. SIZE: The draft at Sulina bar is 23 ft. passable. Any other changes of official draft are broadcast daily, at 1150 hrs. on 1935 m. long wave. Galatz: Max. passable draft River Danube is 23 ft. (7.01 m.) for vessels up to 180 m. LOA.

MINEFIELD: Danger Area nr. 7 A (Sulina). The area enclosed by the coast and by lines joining the following positions:

(a)	45° 13.27′ N.	29° 40.42′ E.	*(b)*	45° 11.77′ N.	29° 41.42′ E.
(c)	45° 09.17′ N.	29° 57.22′ E.	*(d)*	45° 07.37′ N.	29° 57.22′ E.
(e)	40° 03.07′ N.	29° 54.82′ E.	*(f)*	45° 03.07′ N.	29° 39.34′ E.

CLEARANCE: On arrival in Sulina harbour vessel has to stop to complete border and sanitary formalities and after vessel has completed same, with Danube Administration Pilot on board, proceed to destination. After the vessel has completed manoeuvring to come alongside berth, she is boarded by the sanitary commission. If the vessel has passed the sanitary inspection she is boarded by border control commission which includes a representative of the Agency, the latter assisting the Master in fulfilling arrival formalities and facilitating meeting of any requirements on ship's part. The Master fills in a form of declaration in 3 copies which together with the Stowage, Plan, Cargo Manifest, etc., are handed to representative of the Agency upon his leaving ship. A supplementary declaration is to be completed by the Master, stating: 1. Who supports disbursements expenses (name, mail address, telegraphic address, number of telex). 2. Who supports the supplies of bunkers, provisions other services, etc. (name, mail address, telegraphic address, number of telex).

RADIO: Constantza – coast radio station. Call signal YQ1, frequency 462 kc/s. Operation daily, starting with 0650, 1250 and 1850 hrs. GMT. Contents of transmission: meteorological and navigation notices. Weather forecasts are broadcast in clear English or codified; radio notices to mariners and navigation warnings are broadcast in Romanian, Russian and English.

BERTHING: After arrival in Galatz roads and port Pilot boarded, the berthing of the vessel is done as ordered by the Port Authorities according to the possibilities of operation (loading/discharging) and to the availability of berths.

MEDICAL: Crew members are offered medical assistance if necessary when the Master requests, and they have to come to the Agency Office between 0800 and 0900 hrs. every day, except Sundays and holidays.

STEVEDORES: Working hours: 0700–1500 and 1500–2300 hrs.

CUSTOMS ALLOWANCE: For releasing cigarettes from Customs seal it is necessary to notify the Agent who, in turn, will arrange with the Customs House. Attention is drawn to the fact that bringing into or taking Romanian currency out of the country is prohibited. According to requirements of crew, the Master gets from Agent any sum of Romanian currency. The respective sum is charged in the disbursements account at official exchange rate +200% premium granted to seamen. Before departure from port the Master is obliged to return to Agent the sums of Romanian currency unspent against receipt. The sums are returned in front of the representative of the Customs during the control for departure.

OPENING/CLOSING HATCHES: Opening and closing of the hatches is to be performed by crew whenever requested due to weather conditions.

CARGO GEAR: Rigging of derricks, the good working condition of the winches and derricks, are permanent obligations of the vessel according to requirements of working gangs. The hatch ways must be opened or closed to their full size. The removable beams or covers shall always be stowed on deck on the side where work is not being carried on, so that they may not hinder working gangs or cause accidents. During operations, the vessel is recommended to close the hatches with rain tents, ship's property, if bad weather. If cargo handling gear gets out of order during operations, the waiting time of workers is charged against vessel and such time lost for breakdown of winches not to count as laytime.

SHORE LEAVE: On completion of border inspection crew can go ashore taking their Seamen's Books (or Passports) and the permits they receive from the soldier at the gangway. The permits must be returned to the soldier upon coming back on board. In the event that Crew members desire to visit another place of Galatz they shall inform the Agent.

GENERAL: From the time a vessel enters the territorial waters of Romania until she leaves the respective zone, i.e. 12 miles, it is compulsory to fly the Romanian flag. Ships that call at Galatz for the first time and have not got the Romanian flag on board must have it ordered through the Agent immediately upon berthing at Sulina Harbour. Throwing garbage overboard or pumping out dirty ballast or bilge water is allowed only beyond the territorial waters of Romania. Non-observance of these rules may result in fines varying between 3,000 and 10,000 lei imposed by the Harbour Master.

AGENT: Navlomar Shipping Agency.

Galatz: 20, 13 Junie. Telex 225. Cables "Navlomar Galatz".

Braila: 2 Imparatul Traian. Telex 10. Cables "Navlomar Braila".

NOTES

Please also advise Shipping Guides Ltd.

St Lawrence Seaway

ST. LAWRENCE SEAWAY (See Plan Book)

DOCUMENTS: For Agent in Montreal, 3 unfreighted copies of Complete Manifest for Seaway Toll purposes covering all cargo to be discharged in the Great Lakes.

The St. Lawrence Seaway Authority requires one Transit Declaration Form. Also for cargo to or from overseas one unfreighted copy of the complete Manifest is required.

In first U.S. port, a "Traveller" is made up by the Customs Inspector with the following documents:

2 complete sets of U.S. Cargo Manifests, plus 6 copies for Agents.
1 set Manifest of Cargo for first U.S. port.
4 Stores Lists.
4 Personal Effects Lists.
4 Firearms and Ammunition Lists.
4 Crew Lists, Form 1–418.
4 Narcotics Lists.
4 Vessel's Itinerary Lists.
Vessel's Registry and copies of Paid Tonnage Tax Certificates.
Health Pratique.
Clearance from previous port.
2 sets Bills of Lading.
3 copies Stowage Plan.

In subsequent U.S. ports the following are required:

5 sets Manifest of Cargo for that port.
The Traveller and Permit to Proceed issued in previous port.
2 Stores Lists.
2 Personal Effects Lists.
2 Firearms and Ammunition Lists.
2 Crew Lists.
2 Narcotics Lists.
2 Sets Bills of Lading.
3 copies Stowage Plan.

Vessels navigating St. Lawrence Seaway are required to complete applications for:

(1) Certificate of financial responsibility.
(2) Certificate of Insurance, form FMC 225,
(3) Oil discharge assurity Bond, form FMC 226,
(4) Guarantee in respect of liability for discharging oil, form FMC 227.

These applications have to be filed with the Secretary of the Federal Maritime Commission before a certificate is issued. The oil pollution liability certificate should be retained aboard the vessel.

ICE ADVISORY SERVICE: Ships inbound from seaward between December 15th and April 15th should advise the Ice Information Officer, Sydney, 36 hours prior to entering Cabot Strait, stating their position, destination, whether loaded or in bulk. This procedure will facilitate the passing of ice information to the ship as necessary. Ice information is also available from radio stations at Halifax, Seven Islands, Wirringate and Grindstone. The Canadian Broadcasting Corporation Maritime Network also broadcasts ice information daily during the winter navigation season. Supplementary ice information may also be obtained from the Canadian Marine Service Icebreakers.

During the ice season, radio broadcasts of ice information are made twice daily from Marine radio stations as follows: Cape Race, Newfoundland; Fox River, Quebec; Mont-Joli, Quebec; Halifax, Nova Scotia.

PILOTAGE: The first Pilot station when entering the St. Lawrence River is at Les Escoumins, 80 miles West of Father Point. This Pilot will take the ship to the Quebec Pilot station 121 miles to the West. Off Quebec a new Pilot boards to take the ship to Trois Rivieres, where there is another change of Pilot for the remaining trip to Montreal.

Pre-clearance: Vessels intending to transit the St. Lawrence Seaway must be pre-cleared by a representative who shall assume responsibility to the authority for payment of all tolls and charges to be incurred.

Application for pre-clearance Form SLS 429 may be obtained from the St. Lawrence Seaway Authority, Cornwall, Ontario, or from the St. Lawrence Seaway Development Corp., Massena, New York.

RESTRICTIONS: The average navigation season in the Montreal–Lake Ontario section of the St. Lawrence River is from April 1st to December 18th.

Locks Nos. 1 to 7: length 262.13 m., width 24.38 m., depth 9.14 m., channel depth 8.23 m.

Welland Canal Locks: No. 1: length 263.65 m., width, 24.38 m. Nos. 2 to 7: length 261.82 m.; width, 24.38 m. No. 8: length, 420.62 m.; width, 24.38 m.; channel depth 8.23 m.

St. Mary's River Locks: MacArthur: length, 243.84 m.; width, 24.38 m. Poe: length, 365.76 m.; width, 33.53 m.; depth, 9.75 m. Davis: length, 411.48 m.; width, 24.38 m. Sadin: length, 411.48 m.; width, 24.38 m. Canadian: length, 274.32 m.; width, 17.98 m. The channel depth (lower end) to the Canadian Lock is 6.10 m., with a normal depth of 5.56 m. over the sill. As Easterly gales raise, and Westerly gales lower the water levels below the Lock temporarily, it is recommended that Masters of larger vessels ascertain the available depth from the canal office prior to locking.

Speed Limits: 8.6 knots upbound, 10.4 knots downbound in the Beauharnois Canal; 7.7 knots Port Weller Harbour and Welland By-Pass Channel; 6.1 knots in all other canals. The speed limits vary from 8.6 knots to 15.5 knots in most remaining sections of the St. Lawrence River; Lower Detroit River 10.4 knots; St. Clair River 7.7 knots to 10.4 knots, St. Mary's River 8.6 knots to 13.0 knots. Speed limits are detailed in a seaway notice issued early in the year.

MAX. SIZE: Length 222.5 m., beam 23.16 m. (including permanent fenders), draft 7.92 m. Masts must not exceed 35.66 m. above water level.

HEALTH: All ocean-going vessels must obtain a free pratique before entering the Seaway. Vessels entering the Seaway direct may receive quarantine inspection and clearance from the Canadian authorities at Montreal while at anchor awaiting entrance to the Seaway.

RADIO: *Notice of Arrival.* Master must give at least 24 hours notice to commander, 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours notice of ETA at first U.S. discharge port is required.

Welland Canal: Whenever an approaching vessel arrives at calling-in-point (CIP) 15 or 16 it must call Seaway Welland on Channel 14, 156.7 mHz. It shall inform the Traffic Control Centre of its destination. The Traffic Controller will obtain the particulars required before transit is permitted and will give the necessary dispatch information to the vessel.

Great Lakes: It is recommended that vessels within a radius of 30 nautical miles of a shore station use their FM transmitting and receiving equipment to ensure better connections. This pertains especially to vessels at anchor or in the proximity of a port or berth.

Radio Stations: Buffalo, New York, marine operator. Port Burwell, Ontario, marine operator. Geneva, Ohio, marine operator. Loraine, Ohio, marine operator. Rogers City, Michigan, marine operator.

IDENTIFICATION CARDS: In the first U.S. port, the immigration officer requires an alphabetical crew list made up on Form 1–418 and visaed by the American consul in the last overseas port. This crew list should contain the name of every crew member on board. Also needed are 3 copies of this crew list on the same form. The Immigration Officer will require all seamen's books and passports, to issue the completed crew landing permits made out on Form 1–95A. The Master will be given a crew list receipt which will indicate the names of crew members detained on board, if any. In case a crew member is detained on board, he cannot go ashore, and at irregular times an officer of the Immigration Service will check if the crew member is on board. A fine of $1,000.00 will be imposed on the vessel for each detained Crew member who is not on board.

TUGS: Whistle signals differ from those in international usage and are as follows:

1. Ship to Tug: 1 Long and 1 short (—.) = ship ready to proceed, O.K. or all right. 1 Long and 2 Short (—..) = let go the bow tow-line. 1 Long and 3 Short (—...) = let go the stern tow-line.
2. Both Ship to Tug and Tug to Ship: 1 Short(.) = work propeller ahead when stopped, *or,* stop propeller when working, either ahead or astern. 2 Short (..) = work propeller astern. 3 Short (...) = slow down or check. 4 Short (....) = work propeller strong in the same direction it is working at the time the signal is blown. 5 or more Short blasts (.....) = the standard danger signal.

SEAWAY EQUIPMENT: *Radio-telephone Equipment:* All vessels, other than pleasure craft of less than 19.81 m. in overall length, must be equipped with VHF radio telephone equipment, in addition to the FM equipment otherwise required. The radio transmitters must have sufficient power output to enable the vessels to communicate with Authority Stations from a distance of 26 nautical miles and must be fitted to operate from the wheelhouse and to communicate on 156.55, 156.6, 156.65, 156.7 and 156.8 mc/s.

Stern Anchors: Every vessel of more than 106.68 m., the keel of which was laid after January 1, 1975 is required to be equipped with a stern anchor.

Propeller Direction in Alarms: Vessels in excess of 79.25 m. in overall length shall be equipped with propeller direction and shaft r.p.m. indicators or visible and audible wrong-way propeller direction alarms located in the wheelhouse and in the engine-room.

Sewage and Galley Waste Disposal Systems: Sewage retention tanks and galley waste grease traps are required for vessels not otherwise equipped with containers for ordures. At Montreal, or at Port Colborne, vessels without retention tanks intending to call at Chicago must put on board chemical toilets which are offered for rental by 2 chemical companies. 2 to 10 chemical toilets are required for each ship at a rental charge of $75.00 each per trip into the Lakes.

Oily Water separators: Vessels which cannot contain waste oil products are required to be equipped with oily water separators or other such equipment for the extraction of oil products from waste water before discharge.

Rudder Angle Indicators: Vessels in excess of 79.25 m. in overall length shall be equipped with rudder angle indicators located in the wheelhouse.

Gyro Compass: It is recommended that vessels be equipped with a gyro compass.

Radar Equipment: It is recommended that vessels be equipped with radar.

Vessels not fitted for the Seaway as prescribed above, will incur expenses for the rental, installation and removal of compulsory fittings.

REGULATIONS: For additional information on regulations and procedures, Masters and Owners are urged to refer to the Seaway Handbook and Seaway Notices.

AUTHORITY: The St. Lawrence Seaway Authority.

St. Pierre and Miquelon

ST. PIERRE: 46.47 N. 56.10 W. (See Plan Book)

DOCUMENTS: Formalities completed on arrival. Advise Port Service beforehand of vessels ETA, length, tonnage and draft.
Declaration of Health.
Derat Certificate.
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests of any cargo to be discharged.
2 Crew Declarations (tobacco, liquor, souvenirs).
Certificate of Registry.

PILOTAGE: Contact Pilot 1 hour before arrival calling TXU by radio telephone on 2182 kc/s. or VHF Channel 16. Permanent watch kept. Pilot boats equipped with VHF Channel 12, radar, and radio-telephone. Pilot launch available at entrance to N.E. channel in position 46° 48′ N. 56° 08′ W. in the vicinity of the Land Fall Buoy.

Pilot launch named *Radar*, length 45 ft. The hull is black and superstructure white with "Pilote" painted on each side. Pilot launch carries the International Signals for pilot launch day and night.

When the weather is bad contact Pilot on Channel 12 for instructions.

Pilot is compulsory for vessel of 150 g.r.t. and over.

ANCHORAGE: In the roads, depth 13 m., not secure in strong East winds.

Shipmaster's Report: The anchorage in the roads where fish is loaded ex-trawlers is absolutely not secure, even with moderate winds from any direction, and engines should be on stand-by continuously. Several ships have gone on the rocks in a matter of minutes.

MAX. SIZE: Max. draft 8 m. New Port: max. length 110 m. Old Port: max. length 70 m. Channel depth 5 m. below chart datum.

HEALTH: If suspected disease on board contact St. Pierre Health Service, tel. 279.

Masters of vessels arriving at St. Pierre may obtain free pratique via TXU. Message to be sent to Harbour Master Saint Pierre 12 hours before arrival.

In the message the Master has to specify name of vessel, total number of crew member,. where ship coming from, and if everybody on board healthy; in these conditions flag "Q" is not necessary on arrival, but if any suspected disease or fever on board, advise Health Authority as well as Agent, and stand by instructions for berthing. Flag "Q" has to be flown on arrival in the roads.

RADIO: St. Pierre Radio, call sign TXU, receiving on 2182 kc/s. transmitting on 2410 kc/s.

Masters of vessels arriving are requested to send their ETA to Harbour Master Saint Pierre 12 hours before arrival and corrected by a further message if necessary. The ETA should be GMT. Also advise maximum draft and length.

Saint Pierre Radio is equipped with VHF Channels 16, 24 and 26 and maintains permanent watch on Channel 16.

TUGS: No tugs available but the pilot launch (230 h.p.) will assist on Master's request.

BERTHING: Mole du Commerce; length 170 m., depth alongside 8.50 m.

Quai de Peche: length 135 m., depth alongside 6 to 7 m.

Mole Frigorifique: 3 berths, No. 1; 120 m. length, 7 m. depth. No. 2; 85 m. length, 6 m. depth. No. 3; 120 m. length, 5.5 m. depth.

Old Port: Quai de la Douane: length 123 m., depth 6 m.

Quai de l'Alysse: length 50 m., depth, 6 m.

Pilot will inform Master of berthing prospects and any special requirements.

STEVEDORES: ETA notices are to be sent to Agent 24 hours prior arrival. Stevedore in Saint Pierre is Paturel Freres (tel. 604 and 295). Cable Address "Reltupa Saint Pierre". Telex Reltupa 20 QN.

Approximately 100 men are available for working on board vessels when loading/discharging or transhipping in the port. Crew are allowed to work only when no gangs are available.

One normal shift 0730 to 1600 hrs. every week-day, Saturday 0730 to 1200 hrs.:

Day overtime, Saturday 1200 to 1600hrs.

Night overtime, every day after 1600 until 2400 hrs.

Extra overtime, night after 2400 until 0700 hrs., and Sundays and holidays.

Work done with ship's derricks.

It is requested that a net be put under the gangway before starting work.

Pallets, slings, fork-lift and crane (5 tons) available at a charge.

TANKERS: 1 berth alongside dolphins in depth of 8.50 m.

MEDICAL: All facilities available.

FRESH WATER: Available at berths. Supplied by hoses, rate 25 cu.m./hr.

FUEL: Only diesel oil SG 825/840 at 15° C available at all berths.

OPENING/CLOSING HATCHES: Normally carried out by crew.

IDENTIFICATION CARDS: Each man to carry passport or seamen's book.

CONSULS: Local representatives for Canada, Netherlands, Norway, Portugal and Spain.

REPAIRS: Small repairs can be effected. Floating dock, capacity 750 tons, for vessels up to 13 ft. 6in. draft.

REPATRIATION: Can be arranged.

TIME: GMT minus 3 hours all the year round.

AMBULANCE: Telephone: 279.

AIRPORTS: Connections from St. Pierre to Sydney (Nova Scotia) International Airport.

TELEPHONES: Not possible to place telephones on board. It is possible to contact the shore on Channel 16 via Saint Pierre Radio.

SERVICES: Compass adjusting, radar repairs, radio, Decca, Loran and gyro-compass repairs and maintenance possible.

AUTHORITY: Officier de Port.

NOTES

Please also advise Shipping Guides Ltd.

Saudi Arabia

TRAVEL FROM BAHRAIN: Travel is permitted from Bahrain to Saudi Arabia, *provided* travellers *(a)* hold a valid International Vaccination Certificate showing that the holder was immunised at least 5 days before travelling to Saudi Arabia, but not more than 3 months previously; *(b)* that any traveller proceeding to Saudi Arabia from Bahrain should have taken the prescribed doses of Tetracycline over the 48-hour period immediately before travelling. The fact that the passenger has taken the Tetracycline should be certified by the Bahrain Health Department.

DAMMAM: 26.30 N. 50.12 E. (See Plan Book)

LOCATION: Situated on the East coast of Saudi Arabia, in the Arabian Gulf.

FLAG: In addition to the quarantine signals which are to be shown until pratique is granted, the Saudi Arabian Flag must be flown from vessel's foremast while in port of Dammam.

DOCUMENTS: In order to cope with Port, Customs and Agent's requirements, following documents should be submitted to the Port Management at least 48 hours prior to arrival of vessel at Dammam port:

12 copies of Cargo Manifest for each port of loading, all typed, stamped and signed.
2 copies of Freight Manifest.
3 copies of Hatch List.
3 copies of Stowage Plan.
1 copy of each non-negotiable Bill of Lading.
List of Dangerous Cargo on board, if any.

The particulars of the certificates required by the SOLAS regulations are entered on the Ports Form on the arrival of the vessel at the anchorage and the certificates are sighted after berthing. Also see "Health".

PILOTAGE: Pilotage at Dammam port is compulsory. Manoeuvring of vessels in the vicinity of pier or in anchorage will always be performed under supervision of a Dammam port Pilot.

The Dammam port Pilot will board vessels off No. 1 Buoy which is located in position 26° 33′ 53″ N., 50° 11′ 36″ E. and will then pilot vessels to anchorage or berth at pier.

ANCHORAGE: The approach anchorage area is situated South of parallel 26° 34′ 00″ N., and may be demarcated on the East by the 6 fathoms contour starting in proximity of Buoy No. 1 coming up to Buoy No. 3, and thereafter remaining West of line drawn from light Buoy No. 3 to Beacon No. 6. On the West, the approach anchorage area extends within the 6 fathom contour, starting from Beacon No. 4 and Beacon No. 6.

The vessels anchored in approach anchorage are required to keep fairway clear for access to and from port.

WEATHER: The peninsula of Saudi Arabia is almost of an equatorial climate. In Winter the temperature is rather low but in Summertime it rises over 50 degrees Centigrade. Rain is generally scarce. During major part of year, but especially during Summer, the relative humidity is high. From July to September it frequently exceeds 85%.

Winds in this area are not predictable for more than a few hours. They vary in strength and direction, although prevailing winds are from N.W.

TIDE: The Diurnal tide rise at port of Dammam is approximately 8 ft. at springs, and 5 ft. at neaps. Currents generally drift with tide, and run in or out of the port in counter clockwise rotation. Depending on weather conditions and other contributing factors, these currents are slow moving at all times, speed reaching maximum of 3 knots.

MAX SIZE: See "Berthing".

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dammam port. These signals shall be displayed continuously until pratique granted. Such signals are the following: Sunrise to sunset – Quarantine Flag; Sunset to sunrise – Signal Lights – red over white.

The Quarantine Officer will board the vessel either at anchorage or at pier. Documents required for immediate inspection are the following:

International Maritime Health Certificate (from the last port).
Valid Deratisation or Deratisation Exemption Certificate.
Crew List (3 copies).
Passenger List, if any.
Valid Smallpox Vaccination Certificates (of a date not exceeding 3 years) for all crew members and passengers.
Valid Cholera Certificates (of a date not exceeding 3 months) for all crew members and passengers.
Valid Yellow Fever Certificates for all crew members and passengers.
Certificates of Inoculation against any communicable diseases prevailing at the ports of departure.
Ship's Log Books.

RADIO: (Also see "Agents"). Vessels bound to Dammam are required to notify their Agents 72 hours steaming-time prior to arrival, giving ETA in GMT, total weight tons of cargo for discharge at Dammam, number of workable hatches, Max. arrival draft and overall length of the ship. ETA notice should then be confirmed 48 hours and again 24 hours before arrival.

Vessels' messages to Agents can be given by contacting via wireless Aramco Radio Station "HZY" on 500 kc/s, which station provides free of charge service.

Shipmaster's Report (1978): "Agents request that the following information be included in the 24 hour ETA radio message so they can prepare entry papers before the vessel's arrival:

1. Master's Name.
2. Port of Registry.
3. Nationality of Ship.
4. Gross and Nett Tonnages.
5. Length Overall.
6. Total Crew.
7. Last Port of Call.
8. Next Port of Call.
9. Tonnage of cargo to be discharged Dammam.
10. Number of 20 ft. containers to discharge.
11. Number of 40 ft. containers to discharge.

VHF: VHF system has been installed in the Port Control Tower. Its international calling and answering frequency is on Channel 16. Working frequencies are Channels 19, 6 and 13. Masters of vessels on approaching Dammam are required to obtain permission from the Port Control prior to entering the Port Limits.

The limits of Dammam Port begins from Buoy No. 1 extending to the whole of inner harbour.

The Masters of vessels are required to give the following information to the Port Control before dropping the anchor.

(a) Name of the Vessel
(b) Type and visual markings
(c) Draft and Length
(d) Nationality of the Vessel
(e) Agent in Dammam
(f) Details of Cargo

TUGS: In all there are 10 high powered Tug Boats available in the port. Two of them are 1450 h.p. and two 1350 h.p. The remaining are between 800 to 950 h.p. They are available to assist vessels in mooring or unmooring. Whenever such assistance is provided, Master and crew of tug shall, in the performance of such services as they render to the vessel, become and be deemed to be the Agents and servants of the Owners and/or charterers of the vessel assisted.

BERTHING: The Port has 22 working berths. Their lengths and depths are as follows:

	Length m.	*Depth m.*
Berths 1, 2 and 3	240	14
Berths 4, 5, 11, 12 and 13	180	12
Berths 6, 7 and 8	150	9
Berth 9	178	9
Berth 10	215	11
Berths 14 to 20	180	12
Berths 21 to 22	240	14

Other Port Facilities: Tugs – 10, barges – 36, from 600 tons to 150 tons capacity, forklifts – 349, lifting capacity 25 tons to 2 tons, mobile cranes – 96, lifting capacity 155 to 15 tons. Trailers – 96, 25 tons each. Shore cranes on Berths 6 to 9 – 12 having the lifting capacity of 3 tons each and 3, lifting capacity of 6 tons each.

For the present the remaining 18 berths have no shore cranes, however 48 new electric cranes are under the process of installation. 24 will have 15 tons lifting capacity and the remaining 24 will have 6 tons lifting capacity.

A floating crane of 200 tons, lifting capacity has been recently acquired by the port.

Priority: It is the policy of the Port to berth vessels at available berths in order of each vessel's arrival and registration at Dammam Port on the basis of "First come first served".

However, at the sole discretion of the Port Authority, deviation from this rule can be made in order to place a particular vessel in the berth best suited to the kind of cargo to be discharged from that vessel. The criteria for making decisions to berth vessels out of turn will be:

1. The vessel is carrying cargo such as livestock or fresh fruits and vegetables (not frozen) which would be damaged or impaired by a berthing delay.
2. To best accommodate vessels in those berths which result in the most efficient utilisation of port facilities to the end that total port discharge rate will be maintained at the highest practical level.
3. Car Carriers:– Provided the Agents have obtained clearance from the Customs. One car carrier at a time will be given priority berthing.
4. Ro-Ro Vessels:– Will be berthed within 24 hours of arrival subject to the berth not being used by another Ro-Ro vessel (1 Ro-Ro vessel at a time will be given priority berthing).

Registration. Incoming vessels are assigned berth on a "first come, first served" basis. Every possible effort is made to berth vessels immediately upon arrival. If no berth available, vessels will be listed "in turn" in accordance with time of arrival at anchorage, pratique granted and presentation of cargo documents to the Port Authorities.

In the event of long delay in berthing due to port congestion or otherwise, vessels once "in turn", may be allowed to register and proceed for any other Gulf port for any intended purpose, and return thereafter to Dammam still keeping their position "in turn". In order, however, that a registered vessel may be still considered in turn, is necessary that she return to Dammam within the time limit intimated to the Master at time the ship was cleared out. Failure to return to Dammam within such time limit, will automatically result in loss of ship's turn and being listed at the bottom of waiting list.

Special Berths: Berth No. 14 is earmarked for handling Ro-Ro ships and has special arrangements for stern docking ships. The ramp limitations for stern docking ships is 9.75 m. Berth No. 22 is earmarked for handling container ships. Two travelling gantry cranes of 40 tons lifting capacity have been installed on it for handling containers.

Covered Storage Area: At present there are 14 covered warehouses at the main pier and East port. Area of 6, 7, 8 and 9 warehouses is 4,800 sq. m. each, and area of 4, 5, 12, 13, 14, 15, 16, 18, 19 and 20 warehouses is 5,600 sq. m. each. In addition to these there are 14 storage sheds in the old customs area, their total floor area is 22,031 sq. m.

Open Storage Areas:

2 and 3 zones	85,000 sq. m.
4 and 5 zones	40,000 sq. m.
6, 7, 8, 9 and 12 zones	70,000 sq. m.
Customs, tie yard	778,350 sq. m.

There is no refrigerated store in the port.

DISCHARGE RATES:

Commodity	*D.W.T./Gross/hr*
(a) Bags Cements	20.41
(b) Other Bagged Cargo	9.92
(c) General	11.17
(d) Steel Works	15.38
(e) Bundles of Steel Bars	16.00
(f) Pre-Slung Units	22.41
(g) Pre-Pallitised Units	15.00

STEVEDORES: Stevedoring operations at Dammam are performed by licenced Stevedoring Companies. Charges are levied on weight/measurement basis, in accordance with current tariff.

MEDICAL: Masters may obtain medical attention for ship's personnel from port doctor who may in case of serious illness or injury recommend treatment to local hospitals. The port doctor ordinarily will treat minor illness or injuries on board ship.

Masters of vessels at sea may use services of Aramco Radio Station "HZY" without charge to obtain medical advice at any time.

WATER: Well water is obtainable at certain piers.

Both well water and distilled water in limited quantities, may be also obtainable in Ras Tanura but only in conjunction with and during bunkering operations. The maximum quantity of distilled water obtainable is 15 tons per vessel.

Fresh water also available from private barge.

FUEL: Vessels requiring bunkers have to call at nearby port of Ras Tanura where bunkers facilities are operated by Aramco. No bunkers supplied however unless a nomination is made available at Ras Tanura through Aramco New York. To obtain such nomination, Owners/Charterers/Operators are required to handle the necessary arrangements in advance of time directly with Aramco New York or one of its off-takers.

Fuel oil and marine diesel available from private barges.

CUSTOMS: All materials to be either exported from or imported into Saudi Arabia are subject to examination by Customs Authorities. The importation of the following articles is completely banned.

(a) Alcoholic beverages, including beer and wines.
(b) Narcotics.

Trafficking of the above items between ship and shore is strictly prohibited, regardless of whether they are alongside the piers or at anchor.

The following articles can be imported after obtaining permission from the authorities concerned.

(1) Explosives
(2) Fire Arms
(3) Antiques
(4) Religious material not pertaining to the Muslim faith.

CONSULS: Except for the U.S. Consulate-General residing in Dhahran, no other foreign consulates are available.

DEVELOPMENTS:

Plans and Projects: Under phase 4 programme 16 more berths will be constructed (22 – 38) at West port, 9 berths will be 180 m. long, 12 m. deep and 7 berths will be 240 m. long and 14 m. deep.

3 berths (23, 24 and 25) have been designated for handling container vessels. 2 berths (35 and 36) will have stern ramp facilities and designated for Ro-Ro vessels.

Under phase 4 programme is also included construction of 6 covered warehouses, floor area of each will be 41×40 m. and 6 open side warehouses with similar floor area will be constructed.

Proposed Container Terminal: The container facilities planned to be provided on berth No. 23 and 25 will have 4 wharf mounted cranes of 40 tons capacity capable of lifting containers up to 40 ft. in length and their travel will extend up to full length of berths 23 to 25. The terminal area varies in length from 380 m. to 450 m. and will be about 30 acres.

Berth No. 23 is to be provided with retaining quay wall to handle Ro-Ro vessels with stern ramps. Berth 26 will have sufficient depth and is suitably located in relation to berths 23 – 25, to be utilised as container berth if required.

Shore cranes are being installed on berths Nos. 23 – 26 and will commence operation by January 1979.

REPAIRS: Relatively limited repair service is available from local business concerns and replacement parts are practically unavailable.

Deep-sea divers, operating from modern and well-equipped diving boats, are available at Dammam.

A Lloyds representative is available in Dammam.

AIRPORT: Very good airlines facilities available. Daily departures for any part of the world.

TIME: GMT plus 3 hours all year round.

POLICE/AMBULANCE/FIRE: Emergency Numbers: Ambulance (Port Hospital) – 3151. Port Fire Station – 2111. Police – 97.

SHORE LEAVE: Ship's personnel and passengers are not permitted ashore until permission is granted by immigration and police authorities. The necessary arrangements can be made by ship's Agent on Master's request. While in port, the vessel's personnel is under jurisdiction of the Law of Saudi Arabia.

AUTHORITY: Port Director-General, Dammam Port Management.

AGENT: Gulf Agency Co. Saudi Arabia, POB 86, Airport Post Office, Dhahran, Saudi Arabia, Cables "Confidence Bahrain" stating for Dammam or "Confidence Dammam". Telex: 601069 ("GAC SJ"). Telephone: Normal working hours 22238 and 23426. After office hours 23526 and 23822.

Vessels equipped with VHF, can communicate, when within range, with Agent on stand-by Channel 16 by calling "Confidence Dammam". Voice contacts may be also established via VHF, on the same channel as above, with Ras Tanura office, by calling "Confidence Ras Tanura". Once contact is established on Channel 16, communication will continue by switching on available working Channels as directed.

JEDDAH: 21.28 N. 39.11 E.

LOCATION: The port stands to S.W. of the city, on an island called Jazirat al Mafsaka approximately 600 acres in area. The island is connected with mainland by a causeway.

The harbour is sheltered by several long lines of coral reefs and islands. The access is through 2 narrow channels.

PORT LIMITS: The limits encompass all waters, islands, channels, passages, piers, wharves, jetties, landing-places, sheds, warehouses, workshops, basins, slipways and bridges, etc., contained within the parallels extending from shore seaward to 39° 06′ East Long. and between 21° 27′ and 21° 31′ North Lat. including Qaham and the approach beacons, Mismari and Shib el Kabir.

CLIMATE: Tropical desert, hot climate. Humidity very high during Summer months, but Winter is mild and pleasant. Rainfall is negligible and does not exceed more than 3 to 4 in. per annum.

General direction of wind is mostly N.W., mild in intensity. Winds of gale force occur very rarely. The effect of high winds when they do occur in the harbour is not felt due to barrier reefs breaking force of waves. Waves inside harbour not generally above 1 to 2 m., although waves up to 6 m. may sometimes occur beyond outer reef.

Tides of Indian Ocean do not affect Red Sea due to construction of the Bab-el-Mandab. There is, however, a local semi-diurnal tidal oscillatory motion of the sea along its length, giving a high tide at one end and at the same time a low tide at the other. Jeddah Port is hardly affected by these tides and there are almost no currents produced by these movements.

The variation between Summer and Winter water levels is approximately 50/60 cm. only.

Visibility in the port area is generally good, occasionally obstruction to vision occurs due to dust, but such occurrences are seldom of long duration.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
Last Port Clearance.
Vaccination Certificates.
Stores List.

Prior to the vessel's arrival the following documents are required for translation and submission to the various authorities:

7 copies Cargo Manifest.
1 copy Freight Manifest.
2 copies Stowage Plan.
2 copies Hatch List.
1 copy each non-negotiable Bill of Lading.
7 Lists of Dangerous Cargo, whether for discharge or in transit.

Cargo Documents:

1. All vessels calling at Jeddah Port are, from 1st March, 1977, required to produce 5 copies of Manifest in English and 10 copies in Arabic, together with 2 copies of a complete cargo Stowage plan and 2 copies of Hazardous Goods List to the Customs Authority Jeddah Port. These documents shall be presented as early as possible as no permission to discharge will be granted until the completeness and accuracy of the documents have been checked.

2. All cargo for Jeddah discharge shall be manifested in the name of the vessel actually carrying the cargo to Jeddah. Where transhipment has taken place the name and port of loading of the original carrier shall be incorporated in the Manifest and the relevant Bill of Lading.

3. All Manifests lodged in the port of Jeddah shall be identical copies of the same Master Manifest. Should supplementary Manifests or corrected Manifests need to be lodged the same number of copies in both languages as the original Manifest shall be produced.

4. In respect of barge carrying vessels the Manifests, Stowage Plans and Hazardous Cargo Lists shall be accompanied by a list stating the registered number of each barge to be off-loaded. This shall be produced prior to the discharge of barges from mother ship.

5. All parties are asked for their co-operation in respect of the depositing of all the above mentioned documents in order that the congestion free situation in Jeddah Port may be maintained.

Vessels are requested to provide the following information together with cargo Manifests.

1. Detailed statements covering alcoholic drinks shipped onboard for other destinations also their stowage particulars onboard.

2. In case of no alcoholic drinks shipped onboard for other destinations owners requested also to telex Agents this effect.

This information required 48 hours prior to vessels arrival.

PILOTAGE: The Pilot station is off Kaham Beacon (Lat. 21° 27′ 02″ N., Long. 39° 06′ 32″ E.). Pilotage is compulsory and available 24 hours a day. Pilots do not usually keep station unless expecting a vessel.

ANCHORAGE: If vessel arrives Pilot station too late for entry, anchorage may be made 0.5 mile North or South of the Kaham Beacon.

Arriving vessels will remain at Outer Anchorage until turn for berthing, or proceeding into Inner Anchorage for discharge into lighters.

RESTRICTIONS: No navigational aids marking approaches to port, and therefore there is no night navigation. A lighthouse and lighted marker buoys are scheduled for positioning in the development of the new port.

Only Saudi nationals are allowed to board vessel.

HEALTH: Doctor boards vessel before arrival at berth and grants free pratique.

(a) Cholera: All arrivals from infected or endemic areas are required to possess a certificate showing 2 injections made not less than 7 days and not more than 30 days before arrival. For re-vaccination carried out within 6 months of a recorded vaccination or re-vaccination, a single injection renders the certificate valid for a further 6 months.

In addition, arrivals must submit a certificate dated not more than 7 days before their departure recording the negative results of stool culture. This certificate must be delivered by a licensed laboratory and attested by the Health Authority.

(b) Smallpox: All arrivals are required to submit a valid vaccination certificate in accordance with International Sanitary Regulations.

(c) Yellow Fever: All arrivals from infected or endemic areas are required to submit a valid vaccination certificate in accordance with International Sanitary Regulations.

(d) Mecca: All Muslim crew members who wish to visit Mecca and Medina should have in their possession 2 recent passport-size photos. These should bear the crew member's name and C.D.C. number to enable Agent to obtain permission for the pilgrimage. Crew members must also have in their possession the above-mentioned medical certificates, otherwise permission may not be granted to them to visit Mecca and Medina.

RADIO: Masters should give their Agents an ETA not later than 48 hours before arrival. Jeddah Radio "HZH" operates on 500 kc/s. with limited working hours.

TUGS: There are 2 port department tugs 1 of 1,000 and 1 of 700 h.p. These tugs are supplied free for assisting berthing/unberthing of vessels.

REGISTRATION: System in effect.

BERTHING: Berthing Priority. Generally priority in order of arrival, but also following priorities:

(a) Vessels in distress.
(b) Vessels carrying pilgrims and passengers.
(c) Vessels carrying army stores and equipment.
(d) Vessels instructed to have a special priority by the Ministry of Communications.
(e) Vessels carrying livestock.
(f) Vessels carrying explosives and other dangerous goods.
(g) Vessels carrying freezer cargo, fruit, vegetables and perishable goods, foodgrains and flour.
(h) Vessels carrying less than 100 tons of cargo.
(i) Regular mail vessels.

In the inner harbour there is a finger pier connected to the main quay by a Trestle Bridge. The pier accommodates large vessels with a draft of 29 ft. on the Southern side and 32 ft. on the Northern side.

The main quay consists of 8 berths for large vessels with a depth of 30 to 34 ft. alongside. These berths have large warehouses adjacent to each berth. There are 3 more berths which are used by coasting vessels.

Reefer container facilities expected to be available in January 1979 - Maximum capacity 192 TEU.

Facility available only to users of MTI Terminals at Berth Nos. 16, 35 and 36. - Fittings are carrier Kheops Type E 816–129 with socket type R3211, 440–460v., 60 cycles.

Roll-on/Roll-off: Max. draft 8.0 m. Length of berth, 170 m. (4 vessels can berth at one time). Height of Quay, 7.0 m. No linkspan, no tide.

Container Vessels: Berth No. 36 equipped with two container gantry cranes.

The following is part of a Jeddah Port Administration Circular to all Agents in the port.

1. Cellular Container vessels, if self-sustained by ships gear and required shore handling equipment can be considered for preferential berthing on Fridays, when general cargo vessels are not being worked. If a general cargo vessel is displaced by a preferential vessel on a Friday, the general cargo vessel must be back on the berth and working by 0800 hrs. Saturday whether or not the preferential vessel has completed.

There are presently 10 berths available. Vessels are assigned priority by the Government on the basis of national requirements and generally includes vessels carrying passengers, animals, foodstuffs, reefer cargoes and national defence items. There is also a commitment to discharge lift-on/lift-off automobile carriers on Fridays.

In this respect kindly note that Ro/Ro vessels are given preferential berthing — not priority — on the basis that they occupy only a short length of quay, if their cargo is on some form of trailers, or in Containers which can be rapidly placed on trailers, or is wheeled equipment which can be rapidly transported to the Ro/Ro park without congesting the berth.

2. Containers may be handled from barges fitted with ramps, capable of working in a similar manner to Ro/Ro vessels.

3. The operator must supply sufficient lift trucks of required capacity to handle loaded Containers of the vessel and the shore area, as well as sufficient road transport to move the containers from the vessel to the allocated shore area.

4. Allocated shore areas for transit cargoes and not for storage.

5. The Head of Jeddah Customs has instituted a procedure for the rapid clearance of full Containers for one consignee, destined to Jeddah or up-country. Agents are requested to familiarize themselves with this procedure.

6. Failure to move Containers rapidly from an allocated shore area could result in delay in berthing a following vessel of the same line.

7. Kindly note that for several months to come, operators will be required to provide lift trucks for loading Containers on to road transport for delivery to consignees.

8. The Port is preparing suitable land area for the handling and distribution of loaded Containers and a separate area for empty Containers. Handling equipment has been ordered, but, until further notice please be guided by this Circular.

9. Lines presently shipping Containers to Jeddah are requested to confirm their frequency of service and number of units per voyage.

Lines planning expansion of existing services, or the introduction of new services are requested to send details to the Jeddah Port Administration in order to allow proper planning and discussion with the Line concerned to ensure maximum utilization of space and facilities and avoid lengthy delays.

BULK HANDLING FACILITIES: *Grain:* Facilities for handling and storing grain will be available early 1979. Storage capacity 120,000 tons. Discharge rate 500 t.p.h. and loading rate 120 t.p.h. Facilities located adjacent to Berth No. 9.

Cement: Will be handled at Berth No. 18 (Rolaco) and Berth No. 19 (Redec). Capacity about 14,000 tons per day.

STEVEDORES: *Working Hours:* Normally every day except Friday, first shift 0700–1600 hrs., second shift 1800–2400 hrs. Arrangements can be made to work overtime outside these periods. Discharging on barges can be continuous.

BARGES: The Port Department operates about 16 barges of capacities 200 to 400 tons. These are supplied free to the vessels and are used for off-loading steel, drums, heavy lifts and marble.

Sambouks are used for discharging timber and are supplied free but private barges may be used to expedite for which a charge will be made.

TANKERS: The Petromin Jetty can take 2 vessels at its floating pipe-lines. Vessels moor to 2 anchors with stern moorings to buoys. This is solely an oil berth used for discharging/loading tankers and bunkering other vessels.

Also see "Shipmaster's Report No. 2".

CRANES: There are sheerlegs situated on the tip of the finger pier with a lifting capacity of 40 short tons. Vessels can use this appliance for the discharge of heavy lifts.

In addition there are several port department mobile cranes with capacities from 3 to 200 tons used for rehoisting cargoes discharged on barges and handling cargo in the storage areas. These are not normally available to ships. With the exception of heavy lifts discharged by sheerlegs all cargo is handled by ship's gear.

Floating crane 200 ton capacity available.

MEDICAL: Doctors, dentists, eye specialists and hospitals are available.

FRESH WATER: Only available alongside berths as no water barges are available. Rate about 25 t.p.h.

FUEL: Owners requiring bunkers should ask their normal suppliers to arrange the stem through Arabian-American Oil company, New York. The latter will advise their Jeddah office who will in turn confirm the stem with Petromin. Spot bunkers are usually available on cash payment. If the Petromin Jetty is occupied by tankers, vessels requiring bunkers will have to wait until the berth is vacant. Private barges can also supply bunkers and prices are reasonable with no shifting expenses incurred.

Also see "Shipmaster's Report No. 3 and No. 4".

FIRE PRECAUTIONS: A fire-float is available.

REPAIRS: Very limited, due to the difficulty of enabling non-port workers to enter the port area. Facilities exist for repairs to Decca radar.

GANGWAY/DECK WATCHMEN: 2 coastguards are stationed permanently on board and require accommodation and food. Coastguards keep constant check on liquor seals and may search personnel going ashore.

CUSTOMS ALLOWANCE: The consumption of alcohol including beer is prohibited. Ship's bonded stores are sealed by the Coastguard after the vessel has been granted free pratique. Any alcohol found after this will be confiscated and a fine imposed of Riyals 1,000.00 per bottle and possible imprisonment for the offender(s).

REPATRIATION: Several flights daily from Jeddah. A visa is required for entering or leaving the country.
AIRPORT: Situated close to the city. A new airport is under construction about 40 km. to the North.
TIME: GMT plus 3 hours.
HOLIDAYS: Every Friday is a holiday, although vessels can be worked from 0700 to 1000 hrs. to finish, at overtime rates.
SERVICES: Good laundry and ship-chandlering facilities.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Discharge books or passports must be left at the gate, and collected when re-entering the port area.
GENERAL: The Saudi Arabian flag (in good condition) must be flown from 0600 hrs. to sunset.

Communications by cable are lengthy, and about 3 days should be allowed to receive a reply to a cable. Exterior telephone calls require 1 day's notice.

Vessels carrying explosives for discharge Jeddah or any other port are not permitted to berth inside harbour. Such vessels will be discharged at the Outer Anchorage and must be capable of discharging all cargo with ship's gear.
DEVELOPMENTS: By 1982 a total of 45 berths will be available. New facilities will include 7 berths with depths of 14.0 m., enabling the port to handle bulk carriers up to 80,000 d.w.t. (1980) and Third generation container vessels (1978). The approach channel is to be dredged to 16.0 m.

SHIPMASTER'S REPORT No. 1: 1975
Berths: These are good, well fendered, and have depths of 33 ft. alongside most of them.
Anchorages: These are both protected and restricted by the series of coral reefs off the port. Due to congestion, the anchorages are very crowded and it is necessary for ships to moor rather than lie to single anchor. Holding ground is not good and when the afternoon breezes blow strongly it is sometimes prudent to have engines on stand by. At night it is frequently calm and fenders are required as ships make contact.
Bunkers: Bunkers are available by barge. On this vessel's last call ships calling at Jeddah for bunkers only were waiting up to 3 days. On our first call, although bunkers were ordered in good time, they were not delivered at all.
Tugs: There seems to be 2 harbour tugs and a number of smaller ones for towing lighters etc. They seldom appear when ordered, this was confirmed by the pilots.

On our last call, although ship was manoeuvring with difficulty, tugs were not available either for entering port or berthing.
Pilots: Pilots are excellent. Pilot boat waits in El Hariq, North of Qaram Reef. Under no circumstances will Pilot meet ships further out. Departing, Pilot leaves in "Middle Gateway" or before.
Navigation Aids: Port only operates in daylight and there are no lights. The airport radio beacon is very useful especially as in the reduced visibility so often encountered in the Red Sea, nothing is seen visually until the ship is inside the outer dangers.

There are a number of chimneys and water towers visible to the North of the port, but these are not marked on the charts.

The radar picture can be misleading when compared with the coastline on the chart. The strongest echo is given by the anchored ships.

Qaram beacon is lying on its side at present. The wreck on the next reef to the South, which looks like a small ship under way, is usually seen first.
Agency Service: All requests for water, cash, shore labour etc. must be made in good time. At anchor, Agent's launch visits only infrequently. On vessel's last call, Agents did not board ships in the anchorage at all, even though the ship was in a certain amount of trouble. The normal practice seems to be for the Master to go to the agency office himself to chase things up. The office staff are all most pleasant and helpful.

There is good telex communication, except on Fridays, but telephone calls to UK are all but impossible. By local custom, the agency closes at 1400 hrs., reopens at 1900 hrs. daily.

SHIPMASTER'S REPORT No. 2: 1976. Report on New Clean Oil Terminal.
Charts Required: BA 2599 Approaches to Jeddah BA 2577 Jeddah Harbour.
Pilot Station: Lat. 21° 27′ 15″ N. Long. 29° 06′ 00″ E.
Position of New Clean Oil Terminal: Lat. 21° 26′ 55″ N. Long 39° 09′ 20″ E.
Approach to Terminal: Through Middle Gateway, Inner Gateway then South for 10.5 cables.
Depths: Least depth in approach channel 50 ft. and at berth 40 ft.
Moorings at Berth: Both anchors down with 6 shackles of cable on each. 8 Stern lines to buoys, viz 2 lines on each quarter to stern buoys. 2 Quarter lines on Starboard side to Starboard Quarter buoy. 1 line from main deck to Starboard Quarter buoy. 1 line from main deck to Port Quarter buoy.
Cargo Hoses: 3×8 in. Floating cargo hoses connected to Port side manifolds, viz, one for Mogas/Jet fuel, one for A.D.O./Kero and one for Fuel oil. Shore ends of hoses connected to manifolds on causeway. Shore line sizes given as Mogas/Jet Fuel 8 in. A.D.O./Kero 12 in. and Fuel Oil 12 in.
Back Pressure: Back pressure allowed 100/115 p.s.i. giving the following discharge rates. Mogas/Jet Fuel 160 m/t.p.h., A.D.O. 320 m/t.p.h., Kero 340 m/t.p.h. Fuel Oil 300 m/t.p.h.
Bunkers: Fuel Oil and Diesel Oil are shipped at berth after discharge of cargo.
Fresh Water: Not available at berth.
Accommodation Ladder: Rigged on Port side.
Shore Leave: By boat, takes 20 mins to cover the 1 mile distance. No one is allowed to land on the causeway.
Seamens' Identification: To leave dock area seamen must deposit their Seamans I.D. Card, C.D.C. Book or passport at the dock gate. Documents are picked up on return to dock gate.
Communications: Jeddah Radio H.Z.H. can be contacted on 500 kHz. and no traffic lists are sent.

Jeddah Port is now operating a VHF Station "Jeddah Signal Station" which can be contacted on VHF Channel 16, but meantime is only concerned with berthing of dry cargo ships. This VHF station is British manned, but is not in contact with Pilots by radio or telephone.
Tanker Operations Communications: Jeddah Oil Refinery can be contacted on VHF Channel 11 when approaching Pilot station and will pass messages to Agent and inform Pilot when requested to do so. Unfortunately information supplied by using this method is not always reliable as sometimes they don't know what tanker movements are scheduled. Usually Pilot will take vessel into anchorage if discharging berth is not available. No berthing operations are conducted in the Port of Jeddah between the hours of sunset and sunrise.

SHIPMASTER'S REPORT No. 3: July 1977. Bunkering Large Tankers:

The bunker vessel was calling us on Channel 16 as soon as we were clear of the Gulf of Suez. We contacted him about 300 miles away and gave an ETA. Despite these long ranges it was very difficult to contact him when we were approaching the port. The Master speaks reasonable English, and said he was coming out to us and would come alongside on our starboard side.

Our vessel was stopped in the water and the bunker vessel was soon sighted coming towards us. The "Al Jawhara" about 3,000 d.w.t. is registered at Jeddah and manned by South Koreans. They have air-fired heaving lines with soft padded weights at the end. They have adequate fenders and mooring lines and the berthing operation took only 15 minutes. The weather conditions were ideal with no wind or swell. They advised their maximum pumping rate was 800 long t.p.h. During the 8 hours we were bunkering we did not drift any appreciable amount, despite a force 3 wind blowing most of the afternoon from the N.N.W.

The Master of the bunkering vessel intimated that he would not come outside in the future. A vessel of our size, LOA 886 ft. and draft 59 ft. would, in my opinion, have to anchor well South of Qaham beacon. The anchorage area to the West of Qaham beacon was fairly crowded although there were, apparently, fewer ships there than usual.

The Agent boards the vessel and requires a copy of the Crew list. No other officials boarded.

SHIPMASTER'S REPORT No. 4: May 1977.

Vessel anchored in the Outside anchorage (Qaham beacon bearing 137° True × 1.1′) brought up with 6 shackles on the port anchor in 35 fathoms of water, and in a stiff Northerly breeze this seemed to suffice.

Contact was made with the Jeddah signal station when about 30 miles away. Approaching from the South the high rise buildings of Jeddah show clearly at 48 miles on the radar screen. The first visual object sighted was the beacon on Mismari Reef. There is also a wreck on the reef which comes into view at the same time. On this passage along the coast we remained outside 100 fathoms at all times. The coastline South of Jeddah is very sandy and low and does not show readily on the radar. The aero beacon at Jeddah gives a strong signal on the D.F. and can be recommended for an approach bearing. The high rise buildings of the city came into view at about 20 miles.

We were ordered to anchor and await the Pilot outside Quham Reef. The Agents representative arrived unannounced at about 1500 hrs. by launch. He collected the papers for entry and brought with him copies of the papers in Arabic which are required for the Port Authority, Customs and Doctor. He explained that when he received the clearance he would inform the Pilot station. It is necessary to have a Pilot to enter the outer gateway which lies between Jahan Reef to the North and Quham Reef to the South. There is no pilotage from 1800 hrs. to 0700 hrs. in the morning. Our Pilot arrived on board with very little notice at 1100 hrs. He took the ship to the S.W. anchorage and anchored her with Quham Reef beacon bearing 307°(T)×0.82 miles. He explained that with only 14 Pilots employed and with cargo vessels taking priority over bunkering vessels that would account for our delay in entering the harbour. We anchored in 18 fathoms with six shackles on the starboard anchor.

The bunker vessel "Vitoria" arrived alongside at 1515 hrs. with heavy oil only. She commenced bunkering at 1610 and completed at 2210 hrs. for 740 tonnes H.O. The "Vitoria" is quite a sizeable craft with the appearance of a small coaster. She has tyre fenders over the side and in the stiff Northerly breeze ranges freely, however with ample fuel hose there was no movement at the ship's fitting.

The diesel fuel was delivered by a small barge which tied up alongside our port side. The barge arrived at 1630 hrs. and commenced pumping at 1715 to 2030 hrs. for 132 tonnes. The barge then returned to base for a new load and returned to the vessel at 0635 hrs. He bunkered from 0705 to 0855 hrs. for 74 tonnes. His maximum lifting is 150 tonnes. This was not made clear to us by the Agent so any vessel requiring more than 150 tonnes of D.O. will require two lifts plus. The name of the bunkering firm was El Howi. We did not require any fresh water and as it costs 20 U.S. dollars a ton it is not recommended.

There was no shore leave from the anchorage and no cash was drawn. Bum boats are not allowed in the harbour by the Harbour Authorities. A providore called by in his boat but we required no stores.

The pilot boat is a large white craft with raised cabin three-quarter length and has "Pilots" written in black on the side of the cabin. A traffic list is broadcast at 0700 hrs. each morning for ship's berthing. They use Channel 16 for calling and Channel 12 for relaying messages. The Agent states they are not allowed to have a VHF Channel. It would be much better if they did have their own channel for direct communication. The ship's radio station must close when the papers are signed for entry. It is a very busy port with a lot of commercial traffic and also bunkering ships are increasing in number. There were approximately 65 ships at anchor and alongside. The Pilot informed me it was optional to have a Pilot for sailing and as it was very straight forward I sailed on completion of bunkering without having a Pilot. We were under way at 1000 hrs. for a total detention time of 44 hours 3 minutes.

Our vaccination certificates were all in date for three years. But we had no cholera or yellow fever certificates. With going to the outside anchorage I do not think they are too concerned but I think if the vessel had to go alongside for cargo work the authorities would be stricter about the certificates.

The Authorities normally call on board but with the wind blowing fresh they allowed the Agent to come out to collect the papers. The Agent's representative, spoke excellent English and was most helpful. He endeavoured to obtain a Pilot for us after clearing the ship inwards but was unable to do so in the time remaining before 1800 hrs. Therefore I think it is important to be off the port before 1000 hrs. if the vessel is to enter the port. The roadstead anchorage is about 4 miles from the piers and the launch that is used for transporting the Agent is slow. The Agent delivered the clearance before the bunkers were delivered and was in attendance prior to our departure.

ETA's and information sent via Aden Radio 72 hours in advance of arrival. Jeddah only has medium wave station and can be contacted 24 hours in advance of arrival.

Messages sent to Agent and Port Health Jeddah Port Administration: Sample message to Port Health: Vessels name, call letters, British ship ETA 1500 Saturday 7th for bunkers only gross tonnage 7,740 nett, 4234 Last port Lyttelton N.Z. Sailed 16th April Next port of call Patras Greece Crew 42 All well Doctor onboard All crew have smallpox vaccination certificates Stop Vessel has not called at any port infected with cholera or yellow fever.

Master

Documents: Papers required at Port of Jeddah.

Agent assists with Saudi forms and has spare copies. Ship's radio must be closed down after signing forms.

AUTHORITY: Saudi Government Railroad Organisation.

AGENT: Gulf Agency Company (Saudi Arabia) Ltd., King Abdul-Aziz Street, POB 2038, Jeddah, Saudi Arabia. tel. 31481, after hours 39434. Telex: 401047 ("GACSHIP SJ"). Cables: "GULFAGENCY".

Copies of correspondence to the Jeddah Office should be sent to Ras Tanura Office.

JIZAN (Gizan): 16.54 N. 42.31 E. (See Plan Book)

ARRIVAL ADVICE: Send ETA's to Agents at Jeddah, also to Jeddah Port Management or Saudi Ports Authority in Riyadh stating "Please forward to Jizan Port Management immediately".

MAX SIZE: Max. draft alongside 19 ft. Max. draft at anchorage 26 ft. Roll-on/Roll-off vessels accepted up to a length of 140 m.

BERTHING: 2 berths available each length 125 m. Roll-on/Roll-off vessels have to discharge with ship's own gear.

BARGES: 2 self-propelled barges with capacity of 400 tons available.

PORT REGULATIONS: *Cement in bags.* Stowage shall be in the square of the hatch, from the bottom layers to the top all bags must be left in pre-slung state in nylon straps having either a canvas or polyethylene base capable of withstanding the load. At least 25% of a bagged cement shipment must be pre-slung.

Financial penalties will be imposed on any vessel failing to comply with these instructions. In addition to these financial penalties Jizan Port Management has authority to expel any vessel and forbid from ever again entering any port of the Kingdom of Saudia Arabia, or can remove any ship from the berth until corrective measures are completed to the satisfaction of Jizan Port Management.

STEVEDORES: Working hours 0730 hrs – 1500 hrs.

CRANES: 4×5 tons, also 2 floating cranes with capacity of 500 tons.

FRESH WATER: Available.

FUEL: Diesel oil available.

DEVELOPMENTS: Dredging of the harbour, outer basin, and approach channel, and reclamation of surrounding land. Construction of 2 berths with a total length of 320 m. and a depth of 10 m. Construction of 2 breakwaters, 3,000 m. in length. Erection of a transit shed, a power substation, port and customs building and other necessary facilities. The 2 berths will be completed by the end of 1978 thus enabling port to receive large ships. When the new berths have been constructed the existing berths will be destroyed. A temporary berth has been built in order to provide berth facilities for barges during construction time.

AUTHORITY: Jizan Port Management – Saudi Ports Authority.

AGENT: See "Jeddah".

JU'AYMAH: 26.56 N. 50.03 W. (See Plan Book)

Also see "Ras Tanura" for Repatriation, Medical, Shore Leave, etc.

OPERATORS: Arabian American Oil Co.

FLAG: In addition to the quarantine signals which are to be shown until pratique is granted, the Saudi Arabian flag must be flown from the vessel's foremast while at Ju'aymah. Vessels should provide themselves with this flag before arrival but, if circumstances render this impossible, such flag may be purchased from the vessel's Agent.

The Saudi Arabian flag is properly displayed when the writing appears on top and the sword on the bottom.

CHARTS AND PUBLICATIONS: Surveys conducted by both American and British authorities in recent years have resulted in the publication of a number of charts of the Port of Ras Tanura and its approaches. The U.S. Defence Mapping Agency hydrographic charts are as follows:

No. 62414 – Approaches to Ras Tanura.
No. 62415 – Channels to Ras Tanura.
No. 62416 – Anchorages of Ras Tanura and Ad-Dammam.

Vessels making for Ras Tanura should be equipped with the latest issue of the above-mentioned charts or the corresponding British Admiralty charts. In addition, it is advisable to supplement the information shown on these charts with other charts of the Gulf and publications such as Sailing Directions and List of Lights.

Current hydrographic information may be obtained by radio from "Middle East Navigation Aid Service (MEGULITE), Bahrain".

IMPORTANT FEATURES:

Ras Tanura Port – General:

1. Aramco Harbour Pilots and Mooring Masters moor, unmoor and supervise the movement of all vessels in the vicinity of the piers, sea islands and buoy mooring berths. Normally, no charge is made for this service.

2. Safety rules are strictly enforced. Receipt of "Instructions to Vessels and Conditions of Use of Port" must be acknowledged before a vessel will be berthed. A thorough vessel inspection will be performed prior to loading to ensure conformity with safety requirements.

3. Aramco maintains a radio station (call letters HZY) for the exchange of messages with ships. All incoming tankers should establish early contact with this station, at least 72 hours before arrival, in order to exchange ETA data, traffic lists, weather advice, port closure advice, etc.

4. When a vessel is scheduled to load cargo at both the Ras Tanura Terminal and the Ju'aymah Terminal, Aramco reserves the right to advise the vessel at which berth the loading shall start and finish.

5. Display of quarantine signals on approach to Ras Tanura or Ju'aymah Terminal must be maintained until pratique has been granted. Ships cannot be berthed until the radio quarantine message has been received. The flag of Saudi Arabia must be flown both day and night throughout the vessel's stay in port.

6. To permit more rapid ship turnaround, an Early Departure Procedure is available. This service provides for a quick departure of the vessel after loading, without the necessity of waiting for the delivery of documents at anchorage. This special service should be requested from the ship's agent at the earliest opportunity.

7. The possession and/or consumption of alcoholic beverages is prohibited within the Kingdom of Saudi Arabia. All alcoholic beverages including beer, table wines and liquors are to be under lock and key during the vessel's stay. Vessels anchored at the anchorages or moored at the piers, sea islands or SPM's are considered to be in the Kingdom of Saudi Arabia. Local officials may carry out inspections to confirm that all alcoholic beverages are kept in locked ship's stores during the vessel's stay.

8. Saudi Arab Government regulations prohibit the taking of photographs of *any* installation at the Port of Ras Tanura. Considerable delay to vessels may be incurred due to governmental investigations of violations of this regulation.

9. No medical facilities are available at the Ju'aymah and Ras Tanura Terminals. Requirements for medical assistance or hospital service should be addressed to the ship's Agent. The Aramco radio station HZY may be used at any time, without charge by vessels at sea, to obtain medical advice.

Ju'Aymah Terminal:

1. The Ju'aymah Terminal loading facilities are located approximately 20 miles N.N.W. of the Ras Tanura Terminal and 7 miles offshore in Saudi Arabian waters. These facilities consist of an oil metering and manifolding platform, a terminal control platform and 6 single point mooring berths.

2. Line handling during mooring and unmooring and connecting and disconnecting of the cargo and bunker hoses are to be performed by the crew of the loading tanker under instructions from the Pilot/Mooring Master.

3. Unless otherwise instructed, vessels must arrive at Ju'aymah with propellers almost covered, and trimmed not more than 8 ft. by the stern.

4. Water, galley fuel and diesel fuels are not available at the Ju'aymah Terminal loading buoys.

5. Small craft are not allowed in the vicinity of the tanker and no one is permitted to board or leave a tanker *while cargo loading operations are in progress.* Should it become urgent to board or leave a tanker for any reason during cargo loading, the Pilot/Mooring Master must be contacted to request permission to shut down the cargo loading operation while the small craft is alongside.

DOCUMENTS: Some of the tankers which will load at Ju'aymah will have called at Ras Tanura first and will have been cleared by Saudi Arabian Government authorities there. The Ras Tanura Quarantine, Customs and Coast Guard clearances will continue in effect at Ju'aymah and no further Goverment formalities will be required. *Seals placed on ships stores at Ras Tanura must remain intact until the tanker has completed loading at Ju'aymah and been completely cleared for departure.*

Those tankers which call only at Ju'aymah will require appropriate arrival clearances. After loading operations are completed at the time of unmooring the tanker must have on board port clearance documents, bill of lading and export manifest. (See "Ras Tanura").

To permit more rapid ship turnaround, an Early Departure Procedure is available by which a ship may clear the port and depart without the necessity of waiting for the delivery of documents at anchorage. Use of this special service is encouraged and it should be requested and arrangements with the Agent should be made at the earliest opportunity. *When operating under Early Departure Procedure, it is imperative that, after departure, HZY Traffic Lists be copied until cargo quantities are resolved and the ship's Agent is authorised to approve documents.*

Arrival Documentation:

The following documents are required for immediate inspection by the boarding Saudi Arab Government officials:

(a) International Maritime Declaration of Health (1 copy from last loading to be surrendered).

(b) Valid deratization or deratization exemption certificate.

(c) Crew list.

(d) Passenger list.

(e) Smallpox vaccination certificates, of date not exceeding 3 years, for all passengers and Crew members.

(f) Certificates of inoculation against any communicable diseases prevailing at the ports of departure.

(g) A complete set of log books covering the period since the vessel's last call at Ras Tanura. In the case of a first visit, Saudi Arab Government officials may require that log books cover the period from the date the vessel's first sailing or from April 25, 1952, whichever date is most recent.

Port Clearance and Cargo Documents: The port clearance documents consist of the following:

(a) Permit of Departure: This form (in English) is filled out with information supplied by tankers in their quarantine radio message.

(b) Port Clearance Application. This form (in Arabic) is filled out with information from the Permit of Departure form.

(c) Saudi Arabian Government Port Clearance. This official port clearance form (in Arabic) must be filled out with information provided by the Port Clearance Application.

Both the Permit of Departure and Port Clearance forms are to be aboard the tanker at the time of unmooring.

The cargo documents consist of the following:

(a) Bill of Lading. This is an Aramco prepared document. The required information, except for the cargo quantity, will be filled prior to the arrival of the tanker and a copy will be given to the Master by the ship's Agent upon arrival of the ship. After the ship finishes loading, Shipping and Documentation Unit will radio the cargo quantities to the Master who will fill in these quantities on this copy of the Bill of Lading and will instruct his Agent to sign, on the Master's behalf, the original Bill of Lading.

(b) Export Goods Manifest. This is a Saudi Arabian government document required for every ship which has loaded cargo in Saudi Arabia. The Master will receive from the ship's Agent the original export goods manifest forms covering each consignment of cargo loaded. It is imperative that the Master deliver these papers to the consignee upon arrival at the discharge port(s).

PILOTAGE/ANCHORAGE: The Northern Holding Anchorage and Ju'aymah Pilot Boarding Area have been laid out to expedite shipping and provide ready access to the Ju'aymah berths. The anchorage area varies in depth from 12 to 28 fathoms (72 to 168 ft.) and holding ground is only fair.

Arriving vessels which have anchored at the Northern Holding Anchorage should immediately advise Aramco, via radio HZY, of the following information:

(a) Time of arrival at the anchorage area (in GMT).

(b) Approximate position in the anchorage area.

They should then contact Aramco Terminal Planning office and Ras Tanura Pilot Office by VHF radio Channel 16 if vessel is equipped with VHF.

NAVIGATION AIDS:

Light Beacon: "J1" – black and white Gp. Fl. (3) every 8 secs. Radar reflector position: 27° 02.0′ N. 50° 07.8′ E.

"JD" (Departure buoy) – Can red – flash white every 4 sec. Position: 27° 10.5′ N. 50° 24.2′ E.

Red light float: marked "Ju'aymah"

Red – flash white every 10 sec. Racon x-bands (3 cm.) – code response Morse letter Zulu – response pulse length is 22 ml, sweep time is 48 sec. Position: 27° 10.5′ N. 50° 36.0′ E.

Ras Tanura Channel

Light buoy: (Mid-Channel Marker at Caution Area):

"RT 1" – Spherical black – intermittent quick flash white. Position: 26° 56.2′ N. 50° 12.6′ E.

A Northern holding anchorage: area bounded by:

	North	*East*
(a)	27° 08.5′	50° 13.5′
(b)	27° 08.0′	50° 20.0′
(c)	27° 02.05′	50° 17.0′
(d)	27° 03.0′	50° 11.5′

Ras Tanura channel caution area: area bounded by:

	North	*East*
(e)	26° 58.7′	50° 13.0′
(f)	26° 57.0′	50° 15.2′
(g)	26° 54.7′	50° 13.0′
(h)	26° 56.6′	50° 10.7′

Ju'aymah Pilot boarding area: area bounded by:

	North	*East*
(i)	26° 58.7′	50° 13.0′
(j)	26° 56.5′	50° 10.7′
(k)	26° 58.0′	50° 09.5′
(l)	27° 01.0′	50° 10.7′

INBOUND TRAFFIC PROCEDURES: Arriving tankers which will be loading at Ju'aymah, should proceed as follows:

(a) Vessel with no Special Instructions: The vessel should make for a position approximately 2 miles North of Ras Tanura Light Float position 27° 05.6′ N. 50° 57.5′ E. and then enter the inward channel. This will take the vessel past the Approach Buoy to the Entry Buoy. The vessel should then proceed to the Northern Holding Anchorage. The anchor time and position should be passed to the Aramco Terminal Planning Office and Ras Tanura Pilot Office.

(b) Vessel Proceeding to Ju'aymah: The vessel should make for a position approximately 2 miles North of the Ras Tanura Light Float position 27° 05.6′ N. 50° 57.5′ E. and enter the inbound channel. Proceed past the Approach Buoy and Entry Buoy and make for a point approximately 2.5 miles N.E. of Buoy 3A position 26° 56.3′ N. 50° 11.5′ E., and proceed into the Ju'aymah Pilot Boarding Area. The vessel should notify Ras Tanura Pilot Office on passing the Ras Tanura Light Float and will in turn be advised of berthing prospects. Should the Pilot not be boarding immediately on the vessel's arrival, the vessel may be instructed to anchor in the Pilot Boarding Area, and to pass the anchoring time and position to the Ras Tanura Pilot Office.

(c) Vessel Proceeding from Northern Holding Anchorage to Ju'aymah: On receiving instruction to proceed to Ju'aymah, the vessel should heave up anchor and re-enter the inbound channel making for a point approximately 2.5 miles N.E. of Buoy 3A position 26° 56.3′ N. 50° 11.5′ E. and proceed to the designated Ju'aymah Pilot Boarding Area. If the vessel has been advised that the Pilot will not board immediately on arrival, it may be instructed to anchor in the Pilot Boarding Area and await further instructions. The anchoring time and position should be passed to the Ras Tanura Pilot Office.

(d) Vessel Proceeding from Ras Tanura to Ju'aymah: The vessel should depart Ras Tanura and follow the departure channel towards the mid-channel marker buoy, R.T.1, position 26° 56.2′ N. 50° 12.6′ E. The vessel should proceed into the Ju'aymah Pilot Boarding Area, *exercising due diligence in this area.* If the vessel has been advised that the Pilot will not board immediately on

arrival, it may be instructed to anchor in the Pilot Boarding Area and await further instructions. The vessel should inform Ras Tanura Pilot Office of its anchor time and position.

(e) Vessel Proceeding from Ras Tanura to Northern Holding Anchorage: The vessel should leave Ras Tanura and follow the departure channel observing the separation scheme to the Approach Buoy, 27° 06.5′ N. 50° 42.0′ E. and then proceed to the Northern Holding Anchorage. The vessel should inform Ras Tanura Pilot Office of its anchor time and position and await further instructions.

DEPARTURE FROM JU'AYMAH: A separate departure channel has been provided for all vessels using the Ju'aymah facilities. The Pilot will disembark and the vessel will proceed via the departure channel between Light Beacon J 1, 27° 02.0′ N. 50° 07.8′ E. and J 2 buoy 27° 01.9′ N. 50° 10.8′ E. The vessel should then proceed towards the exit buoy JE 27° 10.5′ N. 50° 12.6′ E. and from there set an Easterly course North of JD buoy 27° 10.5′ N. 50° 24.2′ E. to the Ju'aymah Light Float, 27° 10.5′ N. 50° 36.0′ E.

MAX. SIZE: 750,000 d.w.t.

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Ju'aymah. The following signals must be displayed continuously until pratique is granted:

Sunrise to sunset – Quarantine flag
Sunset to sunrise – Signal lights, red over white

Radio Pratique: A modified radio pratique procedure is in use at Ju'aymah. Port conditions permitting, vessels supplying requested quarantine information (see "Radio" 50 word message) may be berthed on arrival and proceed with normal cargo loading operations prior to arrival on board of a Quarantine Officer. Extensive delay can be incurred by vessels failing to supply requested information promptly.

The Quarantine Officer may board vessels awaiting berth in the prescribed anchorage area; however, vessels proceeding directly to a berth will be boarded after being tied up.

Pier personnel are normally allowed on board prior to arrival of the Quarantine Officer.

Vessels at anchor awaiting berth should not rig an accommodation ladder, but instead should be prepared to provide, at short notice, an accommodation ladder rigged in conjunction with a pilot ladder. At night, adequate lighting must be provided.

RADIO: It is required that vessels contact "Aramco Ras Tanura" via HZY and provide a minimum of 3 notices of ETA information at about 72, 48 and 24 hours "steaming time" from the Northern Holding Anchorage. Shorter notices may result in delays and failure to give at least 24 hours notice will result in an addition to allowable laytime in the event a demurrage claim is filed against Aramco.

When it has been determined that a vessel will be loading at the Ju'aymah Terminal, the vessel may be contacted via HZY providing supplementary instructions and requesting any required additional information.

It is imperative that vessels departing under Early Departure Procedure monitor HZY and copy traffic lists after departure until cargo quantities are resolved and the Agent is authorized to approve documents.

Also see "Ras Tanura".

Radio Communications and Messages: The Arabian American Oil Company owns and operates a marine radio station whose call letters are HZY. Radio station HZY is maintained for the purpose of transacting Company business with "in-or-outbound vessels" and is open 24 hours daily. Station HZY will also accept and forward messages concerning ship's agency matters to Agents. However, agency messages to Masters are not permitted. There is no charge for either incoming or outgoing messages.

The marine transmitting antenna of HZY is located at:

Latitude – 26° 18′ 36″ N.
Longitude – 50° 07′ 12″ E.

Due to its inland location Masters are strongly advised NOT to use this antenna for radio direction finding purposes since inaccurate bearings will be obtained due to coastal refraction.

All vessels must endeavour to keep HZY fully advised regarding estimated times of arrival at Ras Tanura, as well as times of actual arrival and position in the anchorage. It is required that vessels provide HZY with a minimum of 3 notices of ETA information, at about 72, 48 and 24 hours "Steaming Time" from Ras Tanura. Shorter notices may result in berthing delay. If loading part cargoes at other Arabian Gulf ports prevents a vessel from furnishing an accurate ETA, steps should be taken to dispatch a message either direct or through the ship's Agent giving the best estimate possible at the time. This message should then be followed by an accurate ETA immediately upon departure for Ras Tanura. Failure to give at least 24 hours notice will result in an addition to allowable laytime in the event a demurrage claim is filed against Aramco.

Upon first contact with all inbound tankers HZY will transmit the following 2 standard messages of 188 and 50 words:

188 Word Message:

Master Rastanuraradio/HZY

Contact HZY soonest advising One ETA GMT Rastanura Two any later changes Three Agents name and requirements Four arrival departure draft fore and aft Five arrival displacement tonnage Six deballasting hours Seven maximum loading rate full-stop Vessel urged to accept highest possible loading rate stop Vessels loading cargo advise previous cargo and if cargo or residue aboard to be co-mingled with Rastanura cargo fullstop If VHF aboard call Aramco pilot station for anchoring, boarding and berthing instructions when 100 miles out on 156.8 Channel 16 or 156.7 Channel 14 stop If no VHF aboard contact HZY 500 kHz and copy traffic lists on odd hours for berthing instructions stop On arrival anchorage advise HZY official readiness time and anchored position stop Radio messages without charge fullstop Pilots require sufficient clean ballast for manoeuvring with propellors almost covered and trim limited to 15 feet for Ras Tanura terminal and 8 feet for Ju'aymah terminal stop Imperative all ships operating under early departure procedure copy Aramco HZY traffic list after departure until cargo quantities are resolved and Agent is Authorized to approve documents.

ARAMCO

50 Word Message

Master Rastanuraradio/HZY

Please advise any epidemic diseases or illness onboard and status of crews international certificates of immunization and all ports called past thirty days also destination stop Agent stop Flag stop Net registered tonnage stop Vessel will not be allowed to berth until this information is received.

ARAMCO

It is important that the Master send a reply to the above 2 messages soonest after receipt.

Traffic list transmitting times and frequencies of HZY are as follows:

Transmits on 12811.3 kHz on even-hours GMT from 0600 to 1400 GMT, and on 8480 kHz on even-hours GMT from 1600 to 0400 GMT.

Listens on 12 mHz common Channels 5 and 6 or 8 mHz common Channels 5 and 6 after traffic list transmissions, until all calls have been cleared. HZY then maintains watch on 12 or 8 mHz common Channel 5 until the next scheduled traffic list.

Transmits on 16960 kHz at 1000 GMT and picks up calls in the 16 mHz band until all traffic is cleared.

Transmits on 430 kHz on all odd-hours GMT after call-up is made on 500 kHz. An alternate working frequency of 521 kHz may also be used during busy periods.

Ras Tanura local time is GMT plus 3 hours.

Weather advice, port closure information, hydrographic notices and traffic lists are "dualled" on 430 kHz and 8480 kHz at 0430 GMT and at 1630 GMT. It is requested that all vessls forward their local weather observations to this station, either in code or plain language, to assist in preparation of the Arabian Gulf forecasts.

There is no charge for incoming traffic or for weather observations from vessels.

Messages to ship's Agents are handled by HZY, free of charge. However, the shipping Agents are not permitted to use HZY for outgoing traffic. Address the message to Aramco and indicate the Agent's name as the first word of the text.

There is an aircraft radio beacon, call sign RT, which transmits on 335 kHz and is located at:

Latitude – 26° 37′ 36″ North
Longitude – 50° 09′ 47″ East.

VHF radiotelephone Channel 10 for radar advisory service, and Channels 14 and 16 are available for ship-to-shore communication at Ras Tanura. Channels 14 and 16 are monitored 24-hours-a-day in the Aramco Terminal Planning Office which is located in Dhahran, approximately 25 miles South of Ras Tanura. Harbour Pilots can be contacted on Channels 14 and 16. VHF equipped vessels should try to contact the Aramco Terminal Planning Office when they are within 100 mile range of the port and while at anchor. Use of VHF while alongside the oil piers to contact the Aramco Terminal Planning Office, Pilots, or Agents is permitted.

To facilitate contacting a vessel after departure, it is important that vessels copy HZY traffic lists for several days after leaving Ras Tanura.

There is a Saudi Arabian wireless station located in Dammam; however, this station does not handle marine traffic.

Radio Silence at Piers: The main wireless and radar equipment of any ship must not be operated while the vessel is alongside the oil piers. Use of VHF while alongside the oil piers to contact the Aramco Terminal Planning Office, Pilots, or Agents is permitted.

VHF: See "Radio"

RADAR: *Radar Surveillance Advisory System.*

A Radar Surveillance Advisory System is available to provide informational assistance and to monitor the movements of all ships calling at the Port of Ras Tanura. All ships entering the Ras Tanura Traffic Separation Scheme shall contact the Ras Tanura Pilot Office on VHF Channel 16 and maintain continuous VHF watch on Channel 10 during their entire stay in the Ras Tanura Port and anchorage areas.

In addition to identifying, tracking and monitoring ship movements to and from the Ras Tanura and Ju'aymah Terminal areas, the following services may be provided to vessel's Masters:

(a) Advise upon channel and port conditions, congestion, weather, tides, navigational aides, etc.
(b) Advise upon the movement of other vessels, dangerous manoeuvring situations, and vessels violating port regulations.
(c) Advise upon port regulations pertaining to movement of deep draft departing vessels and priority of vessels movements. (It may be necessary for incoming vessels to reduce speed to permit safe passage of outgoing deep draft vessels.)
(d) Advise upon berthing prospects and anchoring conditions.

The Radar Surveillance Advisory System has been established in order to increase the safety of ships navigating in the Ras Tanura and Ju'aymah areas. However, it is an information and advisory service only, and in no way assumes control of or responsibility for ships navigating in the area.

TUGS: There are two mooring launches available.

BERTH DESCRIPTION AND FACILITIES: Ju'aymah is an Aramco crude oil and fuel bunker loading facility designed for loading and topping-off deep-draft tankers. The port area is located approximately 20 miles N.N.W. of Ras Tanura and 7 miles offshore in Saudi Arabian waters.

The offshore platforms consist of the following:

(a) An Oil Platform (130 ft. by 390 ft.) located in 50 ft. of water at Lat. 26° 54.8′ N. and Long. 50° 01.2′ E. This platform receives crude oil and fuel bunkers from the onshore storage tanks through 4×56 in. submarine crude pipe-lines and 2×24 in. submarine bunker pipe-lines, each being about 35,770 ft. long. The crude oil and bunkers are metered on this platform. The platform is well lighted with general purpose lighting. In addition, 1 fixed white light has been established on each corner of the platform, with a range of visibility of approximately 5 miles.

(b) A control platform (70 ft. by 70 ft.), located 150 ft. North of the Oil Platform and connected to it by a walkway bridge, houses the communications and radar equipment, testing laboratory, offices, control system and meteorological equipment. This platform is marked by a fixed red aircraft warning light.

6 single point mooring buoys have been established. Crude oil and bunkers are received at each buoy from the oil platform through 1 bunker and 2 crude oil submarine lines which are connected to the buoy by flexible submarine hoses. The floating hoses, which extend approximately 1,100 ft. from each buoy, consist of 2×24 in. crude loading hoses with 16 in. tail hoses, except for Berth No. 34 which has 20 in. tail hoses. Each berth has 1×12 in. bunker loading hose, each with ANSI flanges for connection to the ship's manifold. The max. loading rates through each buoy are 110,000 b.p.h. for crude oil and 5,000 b.p.h. for bunkers, except Berth No. 34 where the loading rate for crude is 130,000 b.p.h. Each buoy is marked by a flashing light with a range of visibility of approximately 5 miles.

The 6 mooring berths at Ju'aymah are as follow:

(a) Ju'aymah Berth No. 31 located at Lat. 26° 55.6′ N. and Long. 50° 02.4′ E. Min. water depth in the berth is 93 ft.

(b) Ju'aymah Berth No. 32 located at Lat. 26° 56.4′ N. and Long. 50° 02.1′ E. Min. water depth in the berth is 102 ft.

(c) Ju'aymah Berth No. 33 located at Lat. 26° 57.0′ N. and Long. 50° 02.7′ E. Min. water depth in the berth is 103 ft.

(d) Ju'aymah Berth No. 34 located at Latitude 26° 56.6′ N. and Longitude 50° 04.3′ E. Minimum water depth in the berth is 124 ft.

(e) Ju'aymah Berth No. 35 located at Latitude 26° 55.6′ N.aand Longitude 50° 03.6′ E. Minimum water depth in the berth is 112 ft.

(f) Ju'aymah Berth No. 36 located at Latitude 26° 55.6′ N. and Longitude 50° 04.9′ E. Minimum water depth in the berth is 122 ft.

The tank farm with all its associated facilities is located along the coast of Ras Al Ju'aymah, 11 miles N.W. of the Ras Tanura Refinery. A small boat pier for the use of pilot boats, mooring launches and Agents' launches is located 8 miles N.W. of the Ju'aymah Tank Farm.

BERTHING PROCEDURE: A Pilot and a Mooring Master will board the arriving tanker asssigned a berth at Ju'aymah at the Pilot Boarding Area located approximately 8 miles East of the Ju'aymah berths. They will carry portable VHF radio sets to be used while on board the tanker for communications with the Ju'aymah Control Platform and the mooring boats. They will advise the Master on all manoeuvres and operations relative to berthing, connecting and disconnecting the hoses and unberthing.

The services of the Pilot and Mooring Master and of the mooring launches and their crews are provided without charge and upon the express understanding that they become the Agents and servants of the Owners and/or charterers of the vessel in every respect. Aramco shall not be responsible and shall be held harmless from all liability for any damage resulting from or caused by any action taken, order given or decision made (or any omission thereof) by the Pilot, Mooring Master or launch crew, or in any respect to the handling of such vessel. Damage or injury to any Aramco facility, equipment or personnel by any vessel calling at any loading terminal of the Port of Ras Tanura shall be the responsibility and liability of the Owners and/or charterers of the vessel.

Mooring equipment and other equipment supplied at Ju'aymah will be lifted aboard the tanker from the mooring launch which transports the Pilot and Mooring Master to the Pilot Boarding Area. This equipment will include such things as special mooring gear to be used at the bow, various gaskets, bolts, tools, adapter spool pieces (when required); and portable radios to be used for communications with the Ju'aymah Control Platform during loading operations.

A number of forms related to the oil loading operation will be carried aboard the tanker by the Pilot and Mooring Master. These include a form for description of pertinent parts of the tanker's loading manifold, an ullage calculation sheet for use by the First Officer of the loading tanker and forms for maintaining a log of the berthing, loading and unberthing operations. One form entitled "Instructions to Vessels and Conditions of Use of Loading Facilities" outlines the conditions of the use of the loading facilities and must be signed by the Master of the tanker prior to the start of the berthing operation.

During the approach and while mooring, the tanker's anchors *must* be secured by stoppers to prevent accidental dropping with subsequent damage to the loading buoy mooring chains or the undersea pipe-lines. Mooring boats will normally assist in the berthing, mooring and hose handling operations. A boat will approach the tanker's bow, take the messenger line and secure it to the end of a 10 in. polypropylene "pickup" line from the mooring arrangement. The "pickup" line will be hove through the centre of port mooring chock until the chafing chain is in the chock. A 15 in. nylon strop which previously will have been secured to the tanker's bollards will then be secured to the chafing chain using a 3 in. bow shackle between the strop and the chafing chain. On tankers equipped with a Smit's towing bracket or brackets, the chafing chain will be secured to an open link in the bracket using a bow shackle. *Mooring and unmooring, connecting and disconnecting of the cargo and bunker hoses is to be performed by the crew of the loading tanker under the direction of the Pilot and Mooring Master.* Communications between the Pilot and the Mooring Master or the bridge and forecastle will be by means of portable VHF radio.

PRELOADING PROCEDURE: Upon completion of berthing, a Pilot/Mooring Master, who will remain on board throughout the loading and unberthing of the tanker, will carry out activities related to Aramco safety requirements and planning, and monitoring of the loading operation.

In order to avoid delays in connecting hoses, tankers scheduled to load cargo and bunkers at Ju'aymah should have an adequate number of reducing spools to fit 20 in., 16 in. and 12 in. standard 150 lb. ANSI flanges on the portside manifold.

Aramco is a member of the Oil Companies International Marine Forum and participates vigorously in a programme developed to ensure adequate safety aboard tankers during the time they are at Aramco piers or berths. A part of this programme involves use of a check list by the Mooring Master to make a thorough inspection of tankers both prior to and during loading operations. This programme is in effect at Ju'aymah, and Mooring Masters who board tankers will be making necessary inspections, posting authorised smoking locations, issuing letters of protest for violations, and shutting down loading or refusing to load a tanker if unsafe conditions are not adequately corrected.

BALLAST REQUIREMENTS: Due to the exposed location of the Ju'aymah berths, tankers scheduled to load crude at Ju'aymah should arrive with adequate clean ballast for safe handling having due regard for existing weather and sea conditions. Tankers will be required to arrive with propellers almost covered and sufficient clean ballast tanks available to allow a trim of 8 ft. by stern. Masters should contact Ras Tanura Pilot Office for weather conditions at the loading facilities.

Aramco is particularly interested in having vessels complete the deballasting operation promptly after berthing in order to minimise time at berth. Simultaneous loading and deballasting is encouraged on properly equipped vessels. Owners/operators or charterers of vessels requiring time to deballast in excess of what Aramco considers standard will be so notified by letter with a copy to the Master.

Discharge into the sea of oil or oil base products in combination with ballast water is not allowed. Since the Ju'aymah Terminal does not have facilities to receive any oil residues or oily ballast water, tankers arriving with such materials on board will be sent to anchorage to await further orders unless the vessel agrees to load on top of such material or unless the ship's Master agrees to segregate such materials in a separate tank. Ships which release oil or oil residues including oily ballast water in either berth or anchorage area will be held responsible for all clean up costs.

LOADING PROCEDURES: The oil loading operation will be controlled by VHF radio voice communications between the Mooring Master on the loading tanker and the Ju'aymah control platform. All operations including switching of tanks and topping off must be directly and personally supervised by a ship's officer. The max. crude loading rate at any of the berths will be 130,000 b.p.h.

Upon being informed by the loading tanker's personnel that the tanker is ready to start loading, the Mooring Master will request the loading operation to proceed according to previously agreed plan with respect to start-up rates, max. loading rates and topping off rates. Need for emergency shut down of loading aboard the tanker must be communicated via VHF from the loading tanker to the Ju'aymah control platform.

In the event of the failure of the VHF communications system, the tanker will sound 5 long blasts on the ship's whistle followed by 1, 2, 3, 4, 5, or 6 short blasts for a tanker at berth 31, 32, 33, 34, 35 and 36 respectively. Loading operations will be stopped and will not be resumed until communications have been re-established.

UNMOORING PROCEDURE AND DEPARTURE: Upon completion of loading, documentation procedures, disconnection and removal of hoses, the tanker will be unberthed by the Mooring Master. To unmoor from the buoy, the pickup rope is taken to the winch and the weight is taken off the chain. The chain is then unshackled and the rope is slacked as the tanker backs out of the berth. The end of the pickup rope is cast off and floats free.

Upon completion of unmooring, the tanker will make a lee, the mooring and hose connecting equipment will be transferred to the mooring launch and the Pilot/Mooring Master will disembark.

The tanker will then be free to leave the port via the Ju'aymah Departure Channel if the Early Departure Procedure is being followed and all cargo and port clearance documents are completed and on board. Otherwise, the tanker must proceed to the Northern Holding Anchorage to await port clearance and document delivery by ship's Agent.

FUEL: Bunkering facilities are operated by Aramco, and fuel bunkers are available at all berths at Ju'aymah Terminal. Vessels are expected to provide adequate advance notice of bunker requirements in order to avoid possible delays.

Vessels taking only bunkers are urged to call at Ras Tanura *prior* to loading cargo elsewhere to avoid delays caused by draft and berth assignment problems.

Masters employing the services of the various bunkering services from the Port of Dammam are not permitted to bunker their vessels within the operating area of the Port of Ras Tanura.

DENSITY: 1025.

POLLUTION: Discharge into the sea of oil or oil base products either alone or in combination with ballast water is not allowed. Since the terminal does not have facilities to receive any significant amount of oil residues or oily ballast water, tankers arriving alongside with such materials on board will be sent to anchorage to await further orders unless the vessel has prior clearance to load on top of such material or unless the ship's Master agrees to segregate such materials in a separate tank. Ships which release oil or oil residues including oily ballast water in either berth or anchorage area will be held responsible for all clean-up costs. The ship's Master shall be expected to acknowledge by his signature receipt of a Pollution Letter of Protest, informing him that a pollution incident attributable to his ship has occurred and that clean-up cost will be billed to the ship Owners.

All incidents of oil discharge to the sea are investigated and documented and these reports are provided to the Saudi Arabian Government officials in accordance with their requirements.

GENERAL: *Oil Inspection:* Independent oil inspection service is available at Ras Tanura and Ju'aymah by the following agencies:

(a) B & R Redwood, Orchard Sea, Winkfield, Nr. Windsor, Berks., England.

(b) Charles Martin, Inspectors of Petroleum, Inc., 61 Broadway, New York, New York 10006, U.S.A.

(c) E. W. Saybolt and Co., S.A., 400 Swenson Drive, Kenilworth, New Jersey 07033, U.S.A

(d) G. Watson Grey, Harrisons Wharf, London Road, Purfleet, Essex, England.

The American Bureau of Shipping, Norske Veritas, and Lloyds of London maintain a marine surveyor at Manama on Bahrain Island.

Ship Agencies: Vessels calling at Ju'aymah should address all ship's business messages to their Agent through "Aramco HZY". Matters concerning provision supply, minor repairs, local medical or hospital services, mail, crew changes, etc. are to be handled by the ship's Agent.

Time Zone: The company generally bases its local time on the 45th meridian (3 hours East of Greenwich). In order to avoid any confusion, all communications should be quoted in GMT.

Arab League Ban: All member states of the Arab League prohibit the export through their ports of any material consigned to Israel. Further, all ships having called at Israeli ports subsequent to April 25, 1952, are banned from Saudi Arabian ports.

Security Patrol Boat: An Aramco Security Patrol Boat will patrol the Ju'aymah offshore area.

Saudi Arabian Government Regulations: Saudi Arabian Government Regulations are strictly enforced, and Masters having any doubts concerning the interpretation of these regulations are urged to consult their Agent. While in port, whether at anchorage or at berth, the vessel's personnel are under the jurisdiction of Saudi Arabian laws.

The taking of photographs while the ship is in the Port of Ras Tanura is prohibited by the Saudi Arabian Government.

All alcoholic beverages, including beer, table wines and liquors are to be under lock and key during a vessel's stay in port. The possession and/or consumption of alcoholic beverages is prohibited in Saudi Arabia. Penalties are severe and major delays to vessels can be incurred by Government investigations of violations.

Port Officials: Saudi Arabian Government Authorities – Customs, Quarantine, Coast Guard, and Port Officials – have offices at various locations at the Ras Tanura Terminal, Ju'aymah Terminal and Rahima. The ship's Master shall make all necessary contact with the Saudi Arabian Government authorities through the ship's Agent.

A United States Consulate General is established near Dhahran, approximately 50 miles South of Ras Tanura.

A British Embassy is established on Bahrain. It is very difficult, however, to contact Bahrain by shore telephone from Ras Tanura or Ju'aymah, and Masters having business there usually arrange to call at the Port of Sitrah (sometimes spelt Sitra).

Inbound Clearance: The ship's Agent will develop information necessary to fill in clearance application and port clearance forms. Cargo requirements will be reconfirmed, and information required to expedite mooring, hose connection and other operational details will be exchanged with the Ras Tanura Pilot Office on VHF radio prior to the tanker's arrival at Ju'aymah.

Import – Export Customs: All materials to be either exported from or imported into Saudi Arabia are subject to examination by customs authorities. The importation of certain articles is strictly prohibited. Such articles include:

— Explosives and firearms, including air rifles.
— Implements of war of any kind, including antiques.
— Alcoholic beverages, including beer and wines.
— Religious matter not pertaining to the Moslem faith.
— Playing cards and gambling devices.
— Narcotics.

Trafficking in these items between ships also is strictly prohibited, whether the ships are at anchor or at berth. The Saudi Arabian Government forbids trafficking between ship crews and shore personnel.

Swimming: Or other activities involving life boats in the vicinity of a tanker are not permitted.

SAFETY REGULATIONS: *General:* The Port of Ras Tanura (including the Ju'aymah Loading Facilities) maintains a vigorous safety programme. Aramco is a member of the Oil Companies International Marine Forum and as such follows the procedures recommended by this organisation. As is done at other Gulf oil ports, the Pilot/Mooring Master as terminal safety representative will discuss in detail with the tanker Master, each item of the "Declaration by Master" which reviews safety requirements and procedures. Prior to start of loading cargo and at several times during the loading, the Pilot/Mooring Master, in company with one of the ship's officers, will check to ensure that safe loading practices are being observed.

Emergency Procedures: In the event of a fire or explosion on board a vessel which is berthed at a Ju'aymah buoy, the course of action to be followed will depend upon the particular facts and circumstances of the incident. It is impossible to indicate exactly what practices will be applied before an evaluation of the specific emergency situation can be made by the Pilot/Mooring Master. His decisions will be based on the following principles:

(*a*) An evaluation of the particular emergency will be made by the Pilot/Mooring Master. His decision as to course of action will be based on the location, type and extent of fire, or explosion, taking into account tide and wind conditions, buoy location and proximity of other vessels.

(*b*) Circumstances permitting, a burning vessel will not be permitted to remain moored to the buoy, and the Master will unmoor the vessel when directed to do so by the Pilot/Mooring Master.

(*c*) Assistance will be rendered by available launches, tugs and other craft to the extent possible, as requested by the Pilot/Mooring Master.

(*d*) Prime consideration governing action to be taken will be to protect personnel, terminal facilities and other vessels, and to contain and control the emergency.

Should a fire or explosion occur at a buoy mooring, the oil loading platform or control platform, all cargo operations will be stopped and all vessels should stand by to disconnect and unmoor when so instructed by the Mooring Master, or when the need to take such action becomes self evident.

The signals for emergency are a continuous ringing of the ship's alarm bells supplemented by 6 short blasts followed by 1 long blast of the ship's whistle or siren. Assistance may be summoned on VHF Channel 16. Location, nature of emergency and type of assistance required should be given.

It is the responsibility of the tanker's personnel to watch its tanks at all times and to give ample warning to reduce the loading rate or shut off the pumping.

Precautions Against Static Ignition: Tanks must be gas-free within 0.4 of the lower flammable limit before loading kerosene, kerosene-type jet fuel, and white diesel. Crude oil and all other products except RLPG may be loaded into tanks which are either gas-free or non-gas-free. Ships' tanks and lines must be free of water. Splash filling is prohibited. Loading rates for kerosene and kerosene-type jet fuel will be reduced as follows:

(a) Loading is commenced at a rate not to exceed 1,000 b.p.h. per cargo tank, until the liquid in each tank has reached a level of 20 ft.

(b) Above the liquid level of 20 ft., the loading rate is limited to 1,500 b.p.h. per cargo tank, maximum.

No ullage gauges, temperature readings or samples shall be taken until at least 30 minutes after loading has been stopped to that tank to allow static charges to dissipate. No loose floating objects are permitted in tanks to be loaded. Automatic tank gauges and non-conductive ullage sticks may be used at any time.

Under certain conditions, the above restrictions will also apply to loading of heavy naphtha and gasoline-type jet fuel (JP-4).

Hydrogen Sulphide Hazards: Aramco crudes may contain dissolved hydrogen sulphide (H_2S) in concentrations which would cause the gases vented during tanker loading to be hazardous if inhaled. We recommend that Masters review the instructions issued by the Owners/charterers about hydrogen sulphide hazards. If the loading of H_2S bearing crude oil is not covered by such instructions, Aramco has available, upon request, a list of recommendations to aid the Masters.

DEVELOPMENTS: A new LNG terminal is presently (July 1978) under construction at Ju'aymah, approximately 2 miles Southward along the coast from the existing Ju'aymah crude export terminal facilities.

The onshore LNG terminal facilities consist of a fractionation centre, propane, butane and natural gasoline storage tanks and refrigeration systems. The offshore loading facilities consist of a 2-berth sea island, located approximately 4 miles offshore. A 32,000 ft. long pipe-line trestle connects the sea island with the onshore tank farm. The sea island is located approximately 3 miles South of the Ju'aymah crude offshore platform and SPM berths.

Until completion of this project in January 1980, all ships, especially those calling at the Ju'aymah crude terminal, are advised to exercise caution as numerous work boats and construction barges may be manoeuvring in the area.

APPENDIX:

Appendix IV:

Arabian American Oil Company
Instructions to Vessels and Conditions of Use
of Ju'aymah Loading Facilities
Ras Tanura, Saudi Arabia

Master S/S – M/V:

1. Vessel will be moored at Ju'aymah Berth No......................
2. Discharge into the sea of oil or oil base products in combination with ballast water is not allowed. Ships which release oil or oily ballast water in either the berth or anchorage area will be held responsible for all clean-up costs.
3. Prior to loading, the Pilot/Mooring Master will inspect the vessel for conformity with safety requirements and will review in detail each item on Aramco Form 5626 "Declaration by Master". This form will be acknowledged and signed by the Master.

Mooring and Manoeuvring:

1. Full power must be available for manoeuvring in and out of the berth. Manoeuvres with other than full power available shall be performed only after the consent of both the Port Captain and Pilot/Mooring Master have been obtained.
2. The Pilot/Mooring Master will advise the Master during the mooring and unmooring of the tanker and will supervise the connecting and disconnecting of cargo and bunker hoses by the tanker's crew. The loading operation will be performed to the complete satisfaction of the Pilot/Mooring Master.
3. Mooring will be accomplished with the assistance of marine craft assigned to the vessel by Aramco.
4. All tank tops, ullage plugs and sighting ports shall be closed before berthing.
5. The vessel's Master shall notify the Mooring Master of any special conditions, difficulties, defective equipment or gear which could impose special hazards when mooring, unmooring or loading cargo.
6. All navigational equipment such as the engine, telegraph, whistle, steering gear, etc., shall be tested prior to getting underway to moor and unmoor. Testing of the tanker's engine when berthed shall be done only after the Pilot/Master has been duly informed and his consent has been obtained.
7. The Mooring Maste. may decline to moor a vessel with unsatisfactory mooring equipment.
8. No repairs are permitted while the vessel is berthed. The engine and deck machinery will be kept ready to permit the vessel to get underway on an emergency basis.
9. Any vessel delay resulting from failure to comply with any of the provisions of this document shall be for the vessel's account.
10. Upon completion of loading and the disconnection of hoses, the vessel will be unmoored and, if using Early Departure Procedures, the Master should make ready to depart as soon as possible. Otherwise, vessels are to await cargo and port clearance documents while lying in stream.

Saudi Arabian Government Port Regulations:

1. Quarantine signals must be displayed upon entering the coastal waters of Saudi Arabia and approaching Ju'aymah in accordance with international practice and shall be continuously displayed until pratique is granted. These signals shall be as follows:
   Sunrise to Sunset – Quarantine Flag.
   Sunset to Sunrise – Quarantine Signal Lights
   (Red over White).
2. The Saudi Arabian flag must be flown from the foremast while your vessel is in the coastal waters of Saudi Arabia. Such flags are available from the ship's Agent. The Saudi Arabian flag is properly displayed when the writing appears on top and the sword on the bottom.
3. Importation and/or use of liquor or contraband items, or trafficking in such items, is absolutely prohibited. The Saudi Arabian Government rigidly enforces these regulations and penalties are severe. In the event of violation considerable delay to the vessel involved could occur.
4. Ship's personnel are not permitted to leave their vessel.

Conditions of use of port.

1. The Master of the vessel shall remain solely responsible for the safety and proper operation of the vessel at all times. Neither Aramco nor its personnel shall be responsible for any loss or damage arising in consequence of any assistance, instructions or advice given or tendered in respect to the vessel.
2. The use of Aramco premises, facilities and equipment is subject to the express understanding and condition that Aramco and its personnel shall be held harmless from all liability, loss or claim thereof arising out of such use.
3. The Pilot/Mooring Master is supplied upon the condition that when boarding or assisting the vessel he becomes the Agent and servant of the Owners and/or charterers of the vessel in every respect. Aramco shall not be responsible and shall be held harmless from all liability for any damage resulting from or caused by any action taken, order given, or decision made (or any omission thereof) by the Pilot/Mooring Master or in respect to his handling of the mooring or cargo loading operations.
4. When the assistance of small craft is supplied (mooring launches and/or a utility boat), the craft, Master and crew thereof shall, in the performance of such services as they render to the vessel, become and be deemed to be the Agents and servants of the Owners and/or charterers of the vessel assisted. Aramco shall not be responsible and shall be held harmless from all liability for any damage that may be done by or to the craft or their crews while assisting the vessel, whether occasioned by any act of omission of the crafts or their crews or by any defect or inadequacy of the craft or the craft's machinery or gear. This shall not give the tanker's Master the right to detain such craft for duties other than mooring, unmooring or hose work nor shall this prevent the craft from being reassigned during mooring, unmooring or hose work.
5. No vessel may berth without an Aramco Pilot/Mooring Master on board.
6. Pilots/Mooring Masters will not assist in the mooring of any vessel unless they have the Master's signature on the acknowledgement below.

Master's Acknowledgement.

I hereby acknowledge receipt of a copy of this document and agree to the Instructions and conditions set forth therein.

....
(Date) (Master)
.... GMT ....
(Hours) (Vessel)

AGENT: Gulf Agency Company Saudi Arabia Aramco Mail Box 621, Ras Tanura, via Dhahran. Cable Address: Confidence Bahrain, stating "for Ras Tanura". Also see "Ras Tanura".

Agent will be responsible for all ships business, which includes obtaining inward and outward clearance, pratique, medical facilities, provisions, repatriation, repairs and diving services.

JUBAIL: 27.05 N. 49.40 E. **(See Plan Book)**

New (Commercial) port under construction.

PILOTAGE: Pilot available.

ARRIVAL/DOCUMENTS: All vessels carrying cargo for Jubail now call directly at Jubail Anchorage for inward clearance and cargo clearance.

Principals/Agents have to provide the following information to the Port Authority prior to call of any vessel at least 15 days before arrival;

Vessel's name
Cargo Quantity: Package/Weight/Measurement
GRT/NRT
Flag
Crew Nationality
Date Built
Consignee
Operator's name
ETA
Whether vessel will discharge at berth or onto barges in anchorage
Draft

If cargo for discharge at berth, then the following information/Documents should be provided:

Berthing application 15 days before the vessels arrival to Port Authority/Harbour Master/Customs Director.
Cargo Stowage Plan/Manifest/Hatch List to Harbour Master.
5 copies Arabic and 5 copies English of Manifest should be submitted to Customs Jubail for cargo clearance.
Also provide information to Coast Guard/Health.

To facilitate processing and approval of request for clearance and berth at the Jubail Commercial Port please include in information the length overall of the vessel, also please provide three (3) copies each of Inward Cargo Manifest. Cargo Stowage Plan and Hatch List (if any).

RESTRICTIONS: Daylight berthing and unberthing only.

TUGS: 2 tugs. 900 h.p. and 1,300 h.p.

VHF: Tugs fitted with VHF and keep watch on Channel 16 and act as "Port Control".

Vessels or Agents can call them under the following call sign for further guidance/anchoring position/berthing instruction and other information:

Call sign: "Jubail Commercial Port Control."

BERTHING: Commercial Port (under construction):

Berth Length	Berth No. 1 to 8 – 212.5 m.
(Containers)	Berth No. 9 to 10 – 300 m.
	Berth No. 11 to 14 – 250 m.
Future Draft:	Berth No. 1 to 6 – 12 m. (11.5 m. allowable draft)
	Berth No. 7 to 14 – 14 m. (13.5 m. allowable draft)

Strength of Jetty: 6 tons per sq. m.
Tide range: 2 m.
Jetty height: 5 m. from LW
3 m. from HW
Project Work: Another 6 berths will be finished by December 1978

The whole commercial port project will be finished at the end of 1979, and container berth will be ready at the end of 1978.

Facilities available: (End January 1979).
5 berths available with depth alongside 14 m. However present draft allowable 9.5 m. at HW and 9 m. at LW.

Cargo sheds and Customs formalities available. A further 2 container berths will be available in June 1979.

The Port Authorities must receive all cargo details and ships particulars well in advance of arrival in order to book berth.

CRANES: 4 × 40 tons, 6 × 20 tons and 2 × 100 tons.

STEVEDORES: 1st shift: 0700–1900 hrs. 2nd Shift: 1900–2400 hrs. 16 gangs available to work 3 vessels at one time.

22 fork lifts available: 10×5 tons, 10×3 tons and 2×20 tons capacity.

MEDICAL: Doctor available.

AIRPORT: Dhahran Airport 120 kms.

DEVELOPMENTS:

Commercial Port: Port for containers and general cargo.

No. of Berths	*Length (m.)*	*Depth (m.)*	*Cargo*	*Completion Date*
2	450	12	General	September 1977
6	1,275	12	General	November 1978
2	500	14	Container	November 1978
6	1,600	14	General	November 1979

Industrial Port:

The Ports Authority has already executed 45% of the construction works in Jubail Industrial Port (March 1978).

The West Pier, consisting of berths No. 1 and 2, with length of 500 m. and a water depth of 6 m., will be completed at the end of 1978. At the same time operations will commence on the first 3 berths of the East Pier (Nos. 3, 4, and 5), with a water depth of 14 m.

The remaining 6 berths of the East Pier, which will be equipped for special cargo throughput, and will be completed at the end of 1979.

The 2,400 m. long open sea terminal for the handling of liquid cargo will allow 4 tankers of up to 300,000 d.w.t. each, to berth simultaneously.

No. of Berths	*Length (m.)*	*Depth (m.)*	*Cargo*	*Completion date*
2	550	6	Salt and Chemicals	December 1978
3	700	14	Raw Material	December 1978
2	600	14	Raw Material	July 1979
4	975	14	Raw Material	December 1979
4	2,400	30	Bulk Liquids	December 1979

AGENT: See "Dammam".

RAS-AL-KHAFJI: 28.25 N. 48.32 E.

Ras-al-Khafji is situated in divided Neutral Zone approximately 60 miles South of Kuwait, this area is under joint jurisdiction of the Saudi Arabian and Kuwaiti authorities; vessels are therefore required to fly the flags of both Governments from the foremast, Saudi Arabia starboard side. Kuwait port side of mast. Onshore base situated in approximately 28° 25′ North, 43° 31′ East, and within a distance of 6 miles (10 km.) offshore, the Company has laid 2 conventional sea-berths and 2 single-buoy moorings for loading tankers and also an anchorage area for cargo ships working cargo. Outside this distance is an anchorage area for tankers.

In addition to exporting crude oil, fuel oil and naphtha are also exported.

OPERATORS: The Arabian Oil Co. Ltd. (Japan).

APPROACHES: Approaches to Ras-al-Khafji marked on appropriate U.S.H.O. and British Admiralty Charts, and are deep enough for majority of vessels using the port to proceed with normal caution using the buoys as centreline markers. A single patch with a depth of 56 ft. (17.07 m.) exists North of courseline between Buoys Nos. 2 and 3, and this necessitates caution on the part of large tankers leaving Ras-al-Khafji in loaded condition.

For tankers arriving Ras-al-Khafji without necessary charts, the full information will be given by telegram if request is sent to "Arabia-oil Kuwait" (via "9KK", Kuwait Radio Station) a few days before arrival. Alternatively, if vessel has VHF, the buoy positions will be given to them upon request to "Ras-al-Khafji" as the vessel approaches, but prior notice of requiring this service should be given in vessel's arrival message.

NAVIGATIONAL AIDS: All geographical positions given although approximately correct, are intended for reference purposes only as certain differences are known to exist between these positions and those shown on the U.S.H.O. and British Admiralty Charts of the area.

Conspicuous Marks. Flare stacks in offshore field and ashore normally visible at a great distance, but may occasionally be extinguished.

No. 1 Flare	Lat. 28° 28.3′ N.	Long. 48° 57.0′ E.

11.	B.	4.2	7.0	
12.	R.	4.2	3.5	Shoal

All buoys have radar reflectors.

Khafji Channel:
With the installation of No. 4 sea berth, Khafji Channel for ocean tankers entering to and leaving from AOC berths has been established in a water area North side of the old channel which was removed. The channel area Eastward of Light Buoy No. 2 has never been changed.

For the purpose of securing safe navigation of 250,000 ton tankers with normal caution using the above aids to navigation, sufficient depth of water, 73 ft. at least, and passable channel breadth, 2,100 ft. as minimum corresponding to two times overall length of the mammoth tanker, are allowed.

A "Z" formed patch with the least depth of 70 ft. (21.30 m.) exists at the centre of the channel S.S.E. of Light buoy No. 8, hence deep tankers sailing from berth No. 4, especially under the condition of prevailing tide current, should take caution to the shoal.

If required, a Mooring Master on duty will guide a deep tanker to the favourable position in the channel.

DOCUMENTS: *(a)* Clearance. Master should submit following documents to Saudi Arabian Government through Agent (2 copies each):

Maritime Declaration of Health.
Health Condition of Crew.
Details of Air-conditioning.
Crew List.
Vaccination List.
Passenger List (if any).

Note Forms 1–3 are supplied by the Agent.

(b) Cargo. All cargo documents and shore figures are usually prepared on shore, and this takes about 1.5 hours with a further 30 minutes before the documents arrive at the ship. Ship's Statement osf Cargo is, however, prepared on board. Wherever necessary Mooring-Master will sign documents on behalf of the Company.

Following cargo documents are to be completed after loading:
Notice of Readiness.
Bill of Lading.
Time Sheet.
Ship's Statement of Cargo*.
Certificate of Delivery‡.

Note: *Ship's Statement of Cargo includes the items for "clean ballast declaration" and "dry inspection" altogether in one form.

‡Certificate of Delivery should be handed to ship's Agent at port of discharge for certification by Customs Authorities. Agent should then return Certificates to the Company as soon as possible. Non-compliance with this requirement could involve vessel in serious difficulty. Masters therefore advised to ensure that their Agents at each discharging port return the Certificates at the earliest possible moment.

All certificates are to be sent direct to Arabian Oil Company and the Agents should be notified accordingly. It is understood that Arabian Oil Co. do not require legalised certificates and only certificates attested by the Customs at discharging ports will suffice.

EARLY DEPARTURE DOCUMENTATION: This documentation system aims to assist ships to depart early from this port after they complete loading by saving time awaiting documents. For this reason, relevant tanker documents will be signed previously by ship's Master or signed by their Agents at this port, depending on Master's choice on the request sheet. Completed tanker documents, therefore, will not be despatched to ships after completion of loading.

It must be noted that this system is not compulsory at this port, but it is at Master's option on condition that ships can communicate on Harbour Service VHF Radio or Marine Communication Band 2150 mc/s. to receive shore figures and time after departure.

READINESS: Master should present Notice of Readiness to load to Company's Mooring Master who will sign it on behalf of the Company. The Notice should be tendered as the time of the vessel's arrival at tanker anchorage area, which is, in principle, understood to be either time of dropping anchor in anchorage, or if vessel does not anchor, the time that Mooring Master boards to commence berthing.

MOORING MASTER: Compulsory for berthing and unberthing at Ras-al-Khafji, and Company's Mooring Masters will board vessels at anchorage area to take them to allocated berths. After berthing, Mooring Master will remain on board vessel until it is unberthed and cargo documents are completed. During this time he will act as the Company's representative in charge of all operations and shore personnel where the Company is concerned.

Notwithstanding presence of Company's Mooring Master on board, the Master of the vessel remains responsible for his vessel at all times and in all respects. In event of any emergency, however, the necessary steps should be taken by joint action between the Master and the Mooring Master.

The Master of each vessel shall give to Mooring Master all information necessary for safe handling and safe operation of vessel while it is in berth.

BALLAST: All vessels required to have on board sufficient clean ballast to give safe draft for manoeuvring purposes. Vessel arriving with too little ballast may be required to increase quantity, should Mooring Master feel that it would not be safe to berth vessel in its arrived condition. Recommended arrival condition is with propeller completely or almost completely immersed and vessel trimmed not more than 10 ft. (3.05 m.) by stern.

In good weather conditions, Mooring Masters will normally permit vessels to start deballasting as they approach the berth in order to save ship's time.

BOARDING: All vessels required to provide safe means of access for personnel boarding and leaving and should have accommodation ladder rigged on port side. In the case of vessels assigned to Berth No. 3, an accommodation ladder which leads down forwards is liable to be blocked by floating hoses, and in such cases the ladder should be rigged on starboard side. A ladder aft is always suitable on the port side.

For the benefit of people boarding at the anchorage area, vessels should provide a safe means of access on the lee side.

ANCHORAGE: *(A) Tankers:* Within 1 mile radius of position 28° 29.5′ N. 48° 39.0′ E. The Western extremity of tanker anchorage is marked by No. 10 Lighted Buoy. The depth of water varies from 65 ft. (19.81 m.) to 79 ft. (24.08 m.), the major depth of water is more than 70 ft. (21.33 m.), with a generally good anchor holding ground of clay mud. Vessels should anchor as close as possible to this lightbuoy to await berthing.

(b) Dry-cargo. Anchorage for dry-cargo ships located about 4 miles to West of tanker anchorage, and is centred in position 28° 26′ 08″ N., 48° 33′ 04″ E. and marked by a flashing white buoy. Cargo ships should anchor within 0.5 miles radius of this buoy, where depths are between 36 ft. (10.97 m.) to 50 ft. (15.24 m.) in good holding ground of clayey mud.

(c) Prohibited Area. An area bounded by straight lines joining following points is prohibited to anchoring and fishing due to presence of well-heads, Flow Stations, Gathering Station, etc. and numerous pipe-lines and power transmission cables on the sea bed. Additionally, the area bounded by 5 light-buoys is prohibited to navigation by all vessels or craft except those operating on direct instructions from the Company.

MAX. SIZE:

Berth	*Depth of water at ISLW* (ft.)	*Max. Permitted draft* (ft.)	*Designed tanker size* (d.w.t.)
No. 1	53	47	100,000
No. 2	56	50	100,000
No. 3	59–64	54*	165,000
No. 4	69–73	64‡	250,000

*56 ft. permissible using rise of tide.

‡66 ft. permissible using rise of tide.

Largest tanker so far handled at Ras al Khafji Port:

"Maasbracht" (313,755 d.w.t.) loaded some 224,000 long tons of crude oil at Berth No. 4.

HEALTH: No radio pratique will be given. Vessels must be cleared by quarantine office on arrival. (In the past, tankers were given free pratique at the request of Agents and on the production of the copy of telegrams from vessels confirming that all crew members possess valid cholera and vaccination certificates and that there is no sickness on board. This procedure has changed recently and all vessels are boarded by quarantine officer and pratique is given only after checking the documents concerned.)

RADIO: (Also see "Approaches"). Advise ETA Khafji at least 4 days, and again 1 day, before arrival through normal radio services. As an alternative to the route through Kuwait Radio Station (call sign: 9KK), vessels may send their first message through Singapore, Bombay or Bahrain Radios. Confirmation of ETA should be made a few hours before arrival by calling "Ras-al-Khafji" on Channel 16 VHF. All cables should be addressed to "Arabia-oil Kuwait".

The first message should be sent according to following form, but any items which are the same as a recent previous voyage to this port may be omitted.

1. ETA Ras-al-Khafji
2. Last port
3. Deballasting time
4. Quantity and type of cargo and bunkers required
5. Maximum loading rate
6. Diameter of cargo and bunker connections
7. Distance from manifold to ship's side
8. Derrick capacity
9. Whether Ras-al-Khafji is first or second port (when taking part cargo)

Note: Item (9) should only be answered in cases where vessels are taking part cargo at Ras-al-Khafji. If second port, the first loading port should be mentioned.

Communications between shore and loading berth mainly sent and received by means of FM wireless telephone, which is brought on board tankers at time of arrival.

VHF: Short-range communication can be made with Terminal Office by calling "Ras-al-Khafji" on VHF Channel 16. Working Channels are 9, 11, 12, 13 and 14. Vessels should call Ras-al-Khafji several hours before arrival to confirm ETA and receive berthing instructions. After anchoring they should advise their anchoring time and then maintain watch on Channel 16 until the Mooring-Master boards. Terminal VHF normally operative between 0400–1400 hrs. GMT, and is used outside these hours by special arrangements with individual ships.

TUGS: The undermentioned tug-boats are available for mooring and unmooring purposes: "Chiyoda Maru No. 2" 200 g.r.t., 1,320 b.h.p.; "Chiyoda Maru No. 3" 175 g.r.t., 1,320 b.h.p.; "Chiyoda Maru No. 4" 236 g.r.t., 2,200 b.h.p.

One of these tugs stands by near the berths as long as any vessel remains moored. Two mooring boats are used for handling ropes and hoses.

BERTHING: 1. Personnel. After vessels berthed, Company's Loading Operator and Mooring Crew will board. Loading Operators work shifts and there will always be one on board vessel while in berth. This man acts as assistant to Mooring-Master, and should be treated as such at all times. In particular he will carry out Safety Inspections and handle communications between ship and shore, particularly those communications regarding cargo.

Ship's personnel requested to give Loading Operator all required information and necessary assistance to allow him to do his job properly. Any disputes arising from his actions should be referred to Mooring-Master for final decision.

Mooring Crew will connect and disconnect hoses as required, but may at any time be transferred to another vessel for the same purpose. While they remain on board, vessels are requested to provide them with following: use of Smoking Room, toilet and washing facilities; hot and cold drinking water; utensils for eating and drinking (it is not normally necessary to supply food).

2. Description of berths.

(a) Sea-Berth No. 1

Position: 28° 26′ 10″ N., 48° 34′ 57″ E.

Depth: 53 ft. (16.15 m.) at ISLW.

Permitted draft: 47 ft. (14.33 m.) max.

Type of berth: conventional 4-buoy system where vessel moors to 2 anchors and 1 buoy forward and to 3 buoys aft.

Length: Designed for tankers of 800 ft. (245 m.) length but can be used by tankers of any size, although tankers of less than 650 ft. (200 m.) overall length sometimes experience difficulty in mooring if their lines are less than a full 720 ft. (220 m.).

Submarine Pipe-lines and Hoses: From the ex-Loading Dock one 26 in. crude oil line and 1×18 in. fuel oil line have been laid to the manifold position. 2×10 in. rubber hoses for crude oil and 1×12 in. rubber hose for fuel oils are connected to ship's manifold. These hoses approximately 225 ft. (69 m.) long and maximum lifting weight of the 2 crude oil hoses together is 4.5–5 tons. For bunkering purposes 1 section of 6in. hose is attached to the end of the 12 in. fuel oil hose.

(b) Sea-Berth No. 2

Position: 28° 25′ 55″ N., 48° 35′ 28″ E.

Depth: 56 ft. (17.07 m.) at ISLW.

Permitted draft: 50 ft. (15.24 m.) max.

Type of berth: As Berth No. 1.

Length of berth: As Berth No. 1.

Submarine Pipe-lines and Hoses: From the ex-Loading Dock 1×26 in. crude oil line, 1×10 in. bunker line and 1×4 in. marine diesel line have been laid to the manifold position. 2×10 in. rubber hoses for crude oil, 1×6 in. rubber hose for bunkers and 1×4 in. rubber hose for marine diesel oil are connected to ship's manifold. All these hoses approximately 225 ft. (69 m.) in length, and the maximum lifting weight of 2 crude oil hoses together is 4.5–5 tons.

(c) Loading Rates at Berths No. 1 and No. 2
Crude oil rate is 30,000 bbls/hr. or 4,000 tons/hr.
Fuel oil loading rate at Berth No. 1 is 7,000 bbls/hr. or 1,000 tons/hr.

(d) Preparation on board before Berthing at Berths No. 1 and No. 2
Vessels should have ready:

(i) Both anchors.

(ii) 3 ropes forward and 9 ropes aft.
Some wires are acceptable in place of equivalent number of ropes. No shore wires used from buoys to ship. All ropes and wires should be in good condition and preferably without splices.

(iii) Port derrick rigged for minimum lifft of 5 tons, using a wire runner and a hook.

(iv) 2×10 in. ASA 150 hose connections for crude oil, and 1×12 in. ASA 150 for fuel oil cargo (at Berth No. 1 only), at the ship's port side manifold.
If ASA 150 is not available, the Company should be advised before arrival.

(e) Mooring and Unmooring at Berths No. 1 and No. 2
On approaching berth a ship's line is passed to one tug from centre fairlead aft. This line should be of good strength and well made fast on board.

When in position off berth, starboard anchor is let go and slacked away easily to about 9 or 10 shackles on deck. Port anchor is then let go and paid out easily as vessel swings round into berth using tugs and engines as required. At same time, starboard anchor is hove-in to about 6 or 7 shackles on deck and then made ready for slacking away again.

As vessel backs down berth the anchors are slacked away as necessary, and ropes sent to forward (No. 4) buoy. When stern passes close to starboard quarter (No. 1) buoy, ropes are sent away to this buoy, hove-in tight and put on bitts ready for slacking if necessary. Ropes then run to port quarter (No. 3) buoy, hove tight, and lateral position in berth adjusted between port and starboard quarter buoys. Lastly, ropes are run to the stern (No. 2) buoy and tug line also passed to this buoy. The fore-and-aft position is then adjusted between the anchors and the sternlines. A second tug is used to assist in lateral positioning of the vessel, and 2 mooring boats are used for running lines to buoys, normally taking 2 ropes at a time.

In Wintertime 3 ropes are used to each buoy, but in Summer 2 of these may be dispensed with at Mooring Master's discretion.

When properly positioned in berth, distance from ship's side to manifold marker buoy should be about 50-66 ft. (15–20 m.).

When hose disconnection completed, vessel unmoors by letting go all lines on buoys No. 3 and No. 4, followed by those on buoy No. 2 and lastly those on buoy No. 1. Vessel then heaves both anchors as necessary until they are up and clear, and vessel can leave berth.

Tugs used as required to keep vessel away from manifold marker and mooring buoys.

Mooring-Master may vary this procedure according to prevailing weather.

(f) Hose Connection and Disconnection at Berths No. 1 and No. 2
After completion of mooring, mooring boat will pull hosemarker buoys to ship, and connect to ship's port derrick runner. The 2 crude oil hoses are lifted together from seabed by ship's derrick, and connected directly to manifold by Company's Crew.

Fuel oil hose at Berth No. 1 is lifted separately and connected in similar manner.

Time taken for hose connection about 1–1.5 hours depending on number of hoses connected. Hose disconnection takes about 1 hour, and is done in reverse manner to connection.

(g) Loading Restriction at Berths No. 1 and No. 2
Due to there being only 1 cargo pipe-line between ex-Loading Dock and the shore, it is not possible to load vessels in berths No. 1 and No. 2 simultaneously. Therefore, when these berths both occupied, 1 vessel will be loading while the other is deballasting; the latter arranging to finish ballast about 1 hour before the other vessel finishes cargo.

(h) General Description of Berth No. 3
Position: 28° 27′ 06″ N., 48° 36′ 28″ E.

Depth: 62–64 ft. (18.90–19.51 m.), but 59 ft. (17.98 m.) over pipe-lines, at ISLW.

Permitted draft: Normally 54 ft. (16.46 m.), but 56 ft. (17.07 m.) permissible using rise of tide.

Type of berth: Single-buoy-mooring system consisting of a buoy 30 ft. (9.14 m.) in diameter, moored to 8 pendant legs of 3.5 in. high strength chain shackled to anchor piles at a radius of 575 ft. (175 m.), and having a rotating deck carrying pipe-line and mooring connections.

Moorings: Attached to mooring connections on the buoy are 2×12 in. nylon ropes (97 mm. dia., breaking strain 150 tons). These ropes are 120 ft. (37 m.) long, and have at their free end a length of stud link chain which includes a "sister-plate" for receiving the shackles used on deck of tanker. From outer end of this chain is connected a 10 in. polypropylene "pick-up" rope about 180 ft. (55 m.) in length. Rope supported by "doughnut" floats, and chain hung by large plastic buoys 5 ft. in diameter, coloured red and green.

Submarine pipe-lines and hoses: 1×36 in. crude oil line and 2×12 in. fuel oil lines have been laid approximately 30,000 ft. (9 km.) from shore to position close under buoy. From underwater manifold the crude oil goes to the buoy through 20 in. underwater hose; fuel oil lines joined at manifold and fuel oil led to buoy through 1×10 in. submarine hose. From deck to buoy 20 in. crude oil hose and 10 in. fuel oil hose are supported by floats, and have a length of 690 ft. (210 m.) to a hose raft, at which position the 20 in. hose is divided into 3 strings of 12 in. floating hose. These, together with the 10 in. fuel oil hose, extended for a further 180 ft. (55 m) making a total length of 870 ft. (265 m.) including the raft. At their free end the hoses are paired and connected to 2 large plastic buoys each 4 ft. in diameter.

Loading Rate: Maximum loading rate of crude oil is 45,000 b.p.h. or 6,200 t.p.h. The fuel oil loading rate is 5,000 b.p.h. or 700 t.p.h.

(i) Preparation on Board before Berthing at Berth No. 3
Before arriving at anchorage, vessels assigned to Berth No. 3 should have ready:

(a) 2 mooring ropes forward, together with rope stoppers, and also 1 or 2 steel crowbars.

(b) Port derrick rigged for 10 tons, or maximum lift if 5–10 tons.

(c) 3×12 in. ASA 150 hose connections for crude oil, and 1×10 in. ASA 150 for fuel oil cargo, at the port side manifold. If ASA 150 is not available, the Company should be advised before arrival.

(j) Mooring at Berth No. 3
Mooring Master will board from tug which carries mooring and hose connection materials. Vessels should have crew standing-by ready to receive these materials, and should maintain a lee until this is completed.

Mooring Master will instruct crew in setting-up of forward mooring, where 2×12 in. nylon ropes are made fast round port and starboard bitts with their attached shackles about 12 ft. (3.66 m.) inboard from the fairleads of panama leads as far forward as possible. Size of fairlead opening should be at least 12 in. to prevent chain jamming in fairleads.

Approaching berth, tanker should lower a mooring rope from each bow as a messenger. Mooring boat will take port rope first, and connect it to the port "pick-up" rope which should then be hove-in while the boat returns to take the starboard rope for connection to its "pick-up" rope. These two ropes are then hove-in until the chains come into the fairleads, and the shackles can be made fast in the "sister-plates". The "pick-up" ropes are then slacked back until the nylon ropes have the weight.

Usual time from sending away first line until all fast is about 20 minutes.

(k) Unmooring from Berth No. 3
After hose disconnection completed, the weight is taken on "pick-up" ropes, nylon ropes are unshackled, and as vessel backs off berth the "pick-up" ropes are slacked off and then dropped into the water. The tug will come alongside either before or after vessel backs off berth, whichever is convenient, and the nylon ropes and the 2 big shackles are passed to the tug. Unmooring time usually 10 minutes.

(l) Hose Connection and Disconnection at Berth No. 3
After completion of mooring, the mooring boat which has been holding the hoses clear during berthing, will bring the hoses to the ship and connect the derrick runner to the buoy having 2×12 in. crude oil hoses. These are usually lifted aboard together and connected directly to ship's manifold, making any necessary separation of hoses as may be required according to lifting capacity of ship's derrick.

The hoses are hung off on 2 in. diameter nylon ropes and lashed to the rail to prevent shock loads due to wave action being transmitted to manifold flanges.

After the first pair of hoses have been connected, the second buoy is lifted and the remaining crude oil hose and the fuel oil hose connected in similar manner to the first 2 hoses. If a vessel requires a loading rate of 5,000 t.p.h. or less, only 2 crude oil hoses are connected. According to the number of hoses to be connected, connection takes 1.5–2.5 hours.

Hose disconnection is done in a reverse manner to connection, and takes about 1–1.5 hours.

(m) Berth No. 4 (S.B.M.).
The S.B.M. is located in a position Lat. 28° 27.9′ N. Long. 48° 38.6′ E., approx. 12,300 ft. E.N.E. of Berth No. 3.

Tanker manoeuvring area is designated within 2,000 ft. (609 m.) radius from the S.B.M. Since 2 loading pipe-lines are trenched under sea bed, the area is imposed on prohibition of vessels' anchoring.

The water depth in the area has been recorded 70 – 73 ft. (21.33 – 22.25 m.) except 69.5 ft. (21.18 m.) above the pipe-lines by precise echo-sounding.

The deepest draft of tanker is normally 64 ft. (19.50 m.), but 66 ft. (20.10 m.) is permittable using rise of tide.

Berth Loading Control Platform: An oil-well jacket type Berth Loading Control Platform with a rotating light-beacon, atypical of offshore valve station, is located in a position Lat. 28° 27.0′ N., Long. 48° 35.8′ E., about 3,600 ft. (1,500 m.) Westward of Berth No. 3. The light, Fl. R. ev. 10 sec. 16 M. (Ra. Ref.), is visible at a great distance.

Crude floating hose: From S.B.M. to floating manifold length 810 ft., diameter 24 in., test pressure 200 p.s.i., 1 line weight 3,460 kg.

From floating manifold to hose line close to tanker: Number of hoses 3. Nominal size 14 in., length 150 ft. Test pressure 200 p.s.i., weight 2,080 kg.

Floating Bunker Hose: One line of 10 in. diameter. Length 260 ft., test pressure 200 p.s.i., weight 1,210 kg.

Loading rate: Crude 40,000 – 60,000 b.p.h. Bunker light fuel min. 1,860 b.p.h., heavy fuel min. 2,000 b.p.h.

Weight of Hose Lines:

Height of Loading Deck above sea surface	*Hose Length*	*Weight 1×14 in. Hose Line (kg.)*	*1×14 in. + 1×10 in. Hose Lines (kg.)*
30 ft. (9.14 m.)	40 ft. (12.2 m.)	3,600	5,500
40 ft. (12.20 m.)	50 ft. (15.2 m.)	4,600	6,100
50 ft. (15.24 m.)	60 ft. (18.3 m.)	5,600	6,700
60 ft. (18.29 m.)	70 ft. (21.3 m.)	6,600	7,300

Note: The above figures include the weight of crude oil, marker buoy, lifting chains and fittings.

LOADING: Loading crude cargo on top of oily residue is acceptable.

(a) Dry Inspection. Upon completion of deballasting the Mooring-Master will inspect the tanks.

If the tanks are not satisfactory, he may require further pumping until such time as they reach the required standard.

(b) Loading Operations. When ship is ready for loading, ship's officer must inform Loading Operator who will transmit necessary orders to Control Room on shore.

Loading is started by booster pump, and after everything has been checked and found satisfactory on board loading rate will be gradually increased by starting further booster pumps and then main pumps in sequence until the required loading rate is reached; provided always that required rate is within capacity of the pumps.

Loading rates can be varied at any time during loading upon 5-10 minutes notice to the Mooring-Master or Loading Operator on board.

In emergency, the immediate stopping of all loading can be accomplished.

When loading is completing, the rate is gradually reduced first by stopping the main pumps and latterly the booster pumps, one by one according to the request of the ship's officer. At the final stage of loading only booster pumps should be on the line, and the ship's officer should tell the Loading Operator to "Stand-by" at least 5-10 minutes before finishing cargo.

Shore pumps will stop about 15 seconds after their control buttons are pressed, but the oil will continue to flow for several minutes, depending on amount of time since main pumps were stopped.

All stops for cargo completion must be given by the ship, as "shore-stop" is *NOT* practised at this port.

(c) Overflows and Spillage. In the event of overflow or spillage during loading, cargo will be stopped immediately and will remain stopped until such time as Mooring Master considers it safe to resume loading. This will normally be when all the overflowed oil has been cleared off the deck and there is no longer any unusual danger involved. It is ship's responsibility to clear oil away as soon as possible after occurrence.

(d) Ullaging and Gauging. After loading completed, Mooring Master will witness final ullaging on board so that ship's figures can be calculated.

On shore a group of Government and Company gaugers will take manual gauges of the shore tanks before and after loading, and from these gauges the Bill of Lading figures will be calculated.

(e) Saybolt Inspection. The oil inspectors of E.W. Saybolt & Co., S.A., based in Mina Abdullah, Kuwait, are available at this port upon consignee's special request. They will carry out or witness gauging of the shore tanks, dry inspection and ullaging of the ship's tanks, calculation of shore and ship's figures, analysis of oils, etc., issuing the necessary certificates according to consignee's requirements.

STEVEDORES: Dry-cargo vessels calling Ras-al-Khafji to give at least 72 hours notice to Agents to arrange labourers. Stevedores will be arranged from Kuwait. Ship's gear used for discharging which takes place at anchorage into barges.

MEDICAL: Company operates a clinic and a hospital at Ras-al-Khafji. Medical and dental treatment can be given in cases of emergency or serious illness or injury. Epidemic diseases or cases of serious injury or disease requiring operations, etc. are normally transferred to State hospitals in Kuwait. Company's doctor will not normally attend on board unless patient is incapable of attending clinic. Requests for medical attention should be given to ship's Agent as early as possible before arrival.

FRESH WATER: Not available except in cases of extreme emergency.

FUEL: (Also see "Berthing").

(a) Grades. Marine diesel oil (MDO), light bunker oil (LBO) and heavy bunker oil (HBO) are supplied. Each loading berth has pipeline which can deliver light and heavy bunker oils, but only Berth No. 2 has marine diesel line. At Berths No. 1 and No. 3, marine diesel oil supplied from barge for which no extra charge made.

"Bunkering Information" booklet, which gives full details of bunkering services at this port, is available from the Company upon request.

(b) Bunker Nomination. Owners, Operators or Charterers should nominate their vessels' bunker requirements *to the Company's Head Office in Tokyo.*

Vessels requested confirm grade and quantity of bunkers required *direct to "Arabia-oil Kuwait"* (via "9KK") through normal radio services at least 4 days before arrival; or in cases where vessels receive instructions less than 4 days away, they should advise bunker requirements as soon as possible.

(c) Bunkering Operation. Bunkers normally supplied to vessels in berths while they are discharging ballast or loading crude oil. At Berths No. 1 and No. 3 MDO supply from a barge will be done usually before loading cargo.

Except in special circumstances when previously agreed, bunker supply is Stopped Onshore when requested quantity has been pumped according to shore tank gauging.

Berth	*Marine diesel oil*		*Light and heavy bunker oils*	
No. 1	4″	80 t.p.h.*	6″	400/300 t.p.h.
No. 2	4″	40	6″	400/300
No. 3	4″	80*	10″	400/300

Note: *(a)* *Supply from a barge with 4″ rubber hose.

(b) In Winter time the rates for light and heavy bunker oils decrease due to the low sea-water temperature increasing the viscosity of these oils.

Bunkering for Cargo Vessels.

Bunker supply to cargo ships from a barge or a coastal tanker is available.

CUSTOMS: Upon arrival Master required submit to Customs a manifest of any cargo to be landed at Ras-al-Khafji and to sign a declaration that no intoxicating liquors or drugs will be landed. After loading completed, Customs will sign an Outward Manifest and issue Port Clearance. These will be handed to Master by Agent.

In normal circumstances Customs Officers do not board tankers, but board cargo ships and leave a Customs Guard on board throughout vessel's stay.

Import of following articles forbidden:

Alcoholic beverages.

Pornographic literature, photographs, pictures and films.

Explosives.

Firearms or implements of war of any kind.

Religious matters not pertaining to the Moslem faith.

Playing cards and other gambling devices.

REPAIRS: Some minor repairs may be made on board using shore assistance in case of extreme emergency, but such repairs must be made only with prior permission of Company's Terminal Office should it be required to do them in berth. Preferably all repairs should be carried out at anchorage. In all cases when shore assistance is required Master should notify ship's Agent well in advance.

DRY DOCKS: None.

REPATRIATION: May be accomplished by making special arrangement through the ship's Agent, well in advance of vessels arrival.

Marine Superintendent of Owners, or Owners Representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

AIRPORT: Crew joining must be routed through Dhahran. Kuwait Airport 110 km. Dammam 325 km.

TIME: GMT plus 3 hours throughout year.

TELEPHONES: No facilities for placing on board.

SERVICES: Swedish Welfare for Seamen, Lloyd's Surveyor, Butterworth Tank Cleaning Machines and Equipment and Underwater cleaning.

Provisions and deck stores are available from ship chandlers in Kuwait in limited kinds and quantities. Prices at Khafji may be a little more expensive than in Kuwait due to the transportation charges made. In all cases the ship's Agent should be advised of the requests at the earliest possible time before arrival.

SHORE LEAVE: Not normally permitted by Authorities except by arrangement through the ship's Agent.

AUTHORITY: Arabian Oil Company.

AGENT: See "Ras Tanura".

RAS AL MISHAB: 28.13 N. 48.43 E.

PILOTAGE: Compulsory. Await Pilot at Buoy No. 5.

APPROACHES: Do not use the old recommended track to Bandar Mishab shown on British Admiralty Chart No. 3774 and U.S. Hydrographic Chart 62422 unless corrected. Ships arriving should follow Ras al Khafji approach channel Buoy No. 1 (Lat. 28° 36′ N. and Long. 49° 10′ E.) and Buoy No. 2 (Lat. 28° 36′ N. and Long. 49° 00′ E.). From Light Buoy No. 2 proceed on a course of 253°(T) for approximately 5 miles and the following is the new approach channel to the anchorage and entrance channel of Ras al Mishab.

Buoy No. 1C – 28° 34.7′ N. 48° 55′ E. Characteristic – Quick Flashing White.

Buoy No. 2D – 28° 30.0′ N. 48° 49.0′ E. Characteristic – Flashing White 10 Sec.

Buoy No. 3F – 28° 25.0′ N. 48° 47.2′ E. Characteristic – Flashing White 15 Sec.

Buoy No. 4F – 28° 19.0′ N. 48° 45.2′ E. Characteristic – Flashing White 5 Sec.

Buoy No. 5G – 28° 13.0′ N. 48° 43.0′ Characteristic – Quick Flashing White.

Buoy No. 5 is designated the pilot station. Vessels should not proceed beyond this point without a Pilot.

ANCHORAGE: Anchorage area is between Buoy Nos. 4 and 5.

RESTRICTIONS: Daylight berthing and unberthing only.

VHF: Radio watch is maintained at Port Control Ras al Mishab on VHF radio Channel 16 from 0600 hrs. to 1700 hrs. daily Saturday throughout Thursday and for 12 hours prior to arrival of a vessel at Ras al Mishab.

After establishing communications on Channel 16, communications will normally be conducted on harbour frequency Channel 9.

BERTHING: The Sea Island at Ras al Mishab has 3 general cargo berths and 1 bulk cement berth which is equipped with an automated unloader and 4 pier mounted storage silos.

Depth of water alongside berths is 36 ft., (ISLW) Indian Spring Low Water. The inner harbour approach channel has been dredged to 36 ft. depth, and is 125 m. wide.

The Sea Island runs in a North-East by East direction from shore connected to the shore by a causeway 1.5 km. long. Berths are numbered as "North One" and "North Three" and "South Two" and "South Four" from shore to seaward. The berthing area on the North and South side of the Sea Island is 380 m. length overall.

The port cannot accommodate stern unloading for Ro/Ro vessels. Side unloading is available. The deck of the Sea Island berths is approximately 20 ft. above LW.

The port is currently a daylight port, working one 10-hour daylight shift per day. No night time navigation is allowed. All berthing will be accomplished in hours of daylight. Vessels will not be cleared by Saudi Arabian Customs for cargo operations if vessel is berthed after 1300 hrs. on Thursday or before 0900 hrs. on Saturday. Vessels scheduled to arrive at the port on or about the Saudi Arabian weekend – Thursday and Friday – should arrive at pilot station Buoy No. 5 not later than 1100 hrs. Thursdays and be ready for Pilot.

Commercial cargo for commercial consignees or importers is not allowable for discharge or transhipment through Ras al Mishab. Discharge at anchorage is not permitted.

FRESH WATER: Not available.

FUEL: Not available.

AGENT: See "Dammam".

RAS TANURA: 26.38 N. 50.10 E. (See Plan Book)

OPERATORS: Arabian American Oil Company ("Aramco").

FLAG: The Saudi Arabian flag must be flown from the vessel's foremast while in the Port of Ras Tanura. Masters should obtain this flag before arrival but, if circumstances render this impossible, a flag may be purchased from the vessel's Agent.

The Saudi Arabian flag is properly displayed when the Arabic writing appears on top and the Sword on the bottom.

DESCRIPTION OF TERMINAL: Ras Tanura Terminal, which consists of 2 piers, and 4 sea islands, has a total of 18 loading berths. Crude oil and product cargoes may be loaded in smaller tankers with drafts up to a max. of 33 ft. at the South Pier's 4 berths. At the North Pier, in addition to crude and products, RLPG is available and water depths at these 6 berths range from 40 to 49 ft. at ISLW. 4 Sea Islands, each consisting of 2 berths, are located approximately 5,600 ft. N.E. of the North Pier. The Sea Islands are inter connected with a walkway and are equipped with breasting and mooring dolphins. Water depth at the 8 Sea Island berths is 85 ft. at ISLW.

IMPORTANT FEATURES:

Ras Tanura Port:

1. Aramco harbour Pilots and Mooring Masters moor, unmoor and supervise the movement of all vessels in the vicinity of the piers, sea islands and buoy mooring berths. Normally, no charge is made for this service.

2. Safety rules are strictly enforced. Receipt of "Instructions to Vessels and Conditions of Use of Port" must be acknowledged before a vessel will be berthed. A thorough vessel inspection will be performed prior to loading to ensure conformity with safety requirements.

3. Aramco maintains a radio station (call letters HZY) for the exchange of messages with ships. All incoming tankers should establish early contact with this station, at least 72 hours before arrival, in order to exchange ETA data, traffic lists, weather advice, port closure advice, etc.

4. When a vessel is scheduled to load cargo at both the Ras Tanura Terminal and the Ju'aymah Terminal, Aramco reserves the right to advise the vessel at which berth the loading shall start and finish.

5. Display of quarantine signals on approach to Ras Tanura or Ju'aymah Terminal must be maintained until pratique has been granted. Ships cannot be berthed until the radio quarantine message has been received. The flag of Saudi Arabia must be flown both day and night throughout the vessel's stay in port.

6. To permit more rapid turnaround, an early departure procedure is available. This service provides for a quick departure of the vessel after loading, without the necessity of waiting for the delivery of documents at anchorage. This special service should be requested from the ship's Agent at the earliest opportunity.

7. The possession and/or consumption of alcoholic beverages is prohibited within the Kingdom of Saudi Arabia. All alcoholic beverages including beer, table wines and liquors are to be under lock and key during the vessel's stay. Vessels anchored at the anchorages or moored at the piers, sea islands or SPM's are considered to be in the Kingdom of Saudi Arabia. Local officials may carry out inspections to confirm that all alcoholic beverages are kept in locked ship's stores during the vessel's stay.

8. Saudi Arabia Government regulations prohibit the taking of photographs of *any* installation at the Port of Ras Tanura. Considerable delay to vessels may be incurred due to governmental investigations of violations of this regulation.

9. No medical facilities are available at the Ju'aymah and Ras Tanura Terminals. Requirements for medical assistance or hospital service should be addressed to the ship's Agent. The Aramco radio station HZY may be used at any time, without charge by vessels at sea, to obtain medical advice.

Ras Tanura Terminal:

1. The Ras Tanura Terminal facilities consist of 2 T-head piers and a Sea Island complex of 4 individual sea islands providing a total of 18 berths. In addition, a small single-berth pier used by small craft and coastal tankers is located on the West side of the Ras Tanura peninsula.

2. Vessels arriving at the Ras Tanura Terminal shall retain sufficient clean water ballast on board to permit safe handling of the vessel from the anchorage area to the berths in the prevailing weather conditions. Every effort should be made to reduce the quantity of ballast on board to a minimum and to have the ballast in as few tanks as practical in order to reduce time spent deballasting. Ballast pumping equipment should be ready to commence discharging ballast as soon as the vessel is secured in berth.

3. The "Deep Water Departure Channel" has a clear swept depth of 69 ft. at ISLW. A minimum 5 ft. keel clearance is required for all vessels transitting this channel during departure.

LOCATION: Aramco's crude and products shipping terminals at Ras Tanura and Ju'aymah comprise the Port of Ras Tanura, which is located on the Saudi Arabian coast of the Arabian Gulf. The *Ras Tanura Terminal and Refinery* are located on a 13 mile long peninsula known as Ras Tanura. On the sand spit at the Southern extremity of the Terminal are located the Company's piers, export tank farm and terminal offices.

There is a survey reference point located at the Southern tip of the peninsula, over which a beacon tower has been erected. The exact position of this beacon is:

Latitude: 26° 37′ 25″ North
Longitude: 50° 09′ 50″ East.

All bearings are referenced to this point, which is officially known as Ra's at Tannurah. The name "Ra's at Tannurah" (variously spelled) appears on most charts and publications.

The Ras Tanura Refinery and its storage tanks are located about 7 miles to the North.

The *Ju'aymah Terminal* tank farm is located on the coast approximately 20 miles to the North of the Ras Tanura Terminal. The metering and manifolding platform and the single point mooring berths are situated approximately 7 miles offshore.

The Port of Ras Tanura is a roadstead and there are only open anchorage areas for oil tankers and other vessels. Some protection is afforded by the land on the West and the shoals to the North, East and South. These shoals tend to keep the sea down to such an extent that vessels do not ordinarily register heavy movement.

An anchorage – "Northern Holding Anchorage" – has been established at approximately Lat. 27° 03′ N. and Long. 50° 15′ E. and is shown on U.S. D.M.A. No. 62415 and B.A. 3777. During periods of port congestion, arriving vessels may be requested via VHF radio to anchor in the holding anchorage. Vessels waiting in the holding anchorage shall continuously monitor VHF Channel 16 to receive instructions concerning berthing.

DOCUMENTS:

Arrival Documentation: The following documents are required for immediate inspection by the boarding Saudi Arabian Government officials:

(a) International Maritime Declaration of Health (1 copy from last loading to be surrendered).
(b) Valid deratisation or deratisation exemption certificate.
(c) Crew list.
(d) Passenger list.
(e) Smallpox vaccination certificates, of a date not exceeding 3 years, for all passengers and crew members.
(f) Certificates of inoculation against any communicable diseases prevailing at the ports of departure.
(g) A complete set of log books covering the period since the vessel's last call at Ras Tanura. In the case of a first visit, Saudi Arabian Government officials may require that log books cover the period from the date of the vessel's first sailing or from April 25th, 1952, whichever date is most recent.

Port Clearance and Cargo Documents: The port clearance documents consist of the following:

(a) **Permit of Departure:**
This form (in English) is filled out with information supplied by tankers in their quarantine radio message.
A port clearance application is filled out (in Arabic) with information from the Permit of Departure form.

(b) **Saudi Arabian Government Port Clearances:**
This official port clearance form (in Arabic) must be filled out with information provided by the Port Clearance Application.

Both the *Permit of Departure* and *Port Clearance* forms are to be aboard the tanker at the time of unmooring.

The cargo documents consist of the following:

(a) **Bill of Lading:**
This is an Aramco prepared document. The required information, except for the cargo quantity, will be filled prior to the arrival of the tanker and a copy will be given to the Master by the ship's Agent upon arrival of the ship. After the ship finishes loading, Shipping and Documentation Unit will radio the cargo quantities to the Master who will fill in these quantities on the Bill of Lading and will instruct his Agent to sign, on the Master's behalf, the original Bill of Lading.

(b) **Export Goods Manifest:**
This is a Saudi Arabian Government document required for

every ship which has loaded cargo in Saudi Arabia. The Master will receive from the ship's Agent the original export goods manifest forms covering each consignment of cargo loaded. It is imperative that the Master deliver these papers to the consignee upon arrival at the discharge port(s).

PILOTAGE: The channels of the Ras Tanura Separation Scheme are well marked by lighted, radar-reflecting beacons and buoys. Presently, for this reason, channel Pilots are not provided.

Pilotage is compulsory for all vessels calling at the Port of Ras Tanura to use the terminal facilities. Aramco Harbour Pilots moor, unmoor and supervise the movement of all vessels in the vicinity of the piers, subject to the conditions detailed in Appendix III, "Instructions to Vessels and Conditions of Use of Port", which see. Aramco Harbour Pilots are on duty continuously and at present their services are provided without charge although the Company reserves the right to charge for these services.

On departure from the Ras Tanura berths, Masters of VLCC vessels of 150,000 d.w.t. and above which have a draft of 60 ft. or more, may request additional pilotage assistance to line up to transit the "Deep Water Departure Channel". (Also see "Shipmaster's Report".) In such instances, the Harbour Pilot will remain on board until the vessel is aligned on a safe course with the departure channel, providing the Pilot can disembark safely. The additional pilotage is also available when it is necessary for a VLCC to proceed to anchor to await a favourable tide or make repairs. The Pilot will remain on board until the vessel arrives in the anchorage; however, the Master will be responsible for the actual anchoring of the vessel. During adverse sea and weather conditions, a proper lee shall be made so as to allow the Pilot to safely disembark. In order to permit the Harbour Pilot to safely embark and disembark from the vessel, a Pilot/accommodation ladder will be provided in accordance with the following requirements:

1. The ladder should be kept in good order and cleaned, and should be of adequate length and strength.
2. The vertical distance between steps should not exceed 15 in. The outboard edge of the step should project from 5 to 6 in. from the hull. Ladders must be so constructed that the steps will remain flat or at right angles to the hull while supporting the weight of a person.
3. Spreaders at suitable intervals should be provided to prevent the ladder twisting and the ladder should be properly secured with the steps level.
4. The deck in the vicinity of the ladder should be clean and free of oil and grease.
5. When possible, on vessels so equipped, the pilot ladder shall be made fast alongside of an area where there is a break in the rail or an opening in the bulwark. This allows a person to step directly on the deck and is considered most desirable. The boarding position should be as near midships as possible.
6. During the hours of darkness, it is necessary that the Pilot ladder be adequately lighted. It is emphasized that not only the ladder, but the deck area close by the head of the ladder should be illuminated.
7. A man rope or safety line should be rigged in the close proximity of the ladder.
8. Responsible deck department personnel are to be in attendance when the Pilot boards or leaves the ship.

Only double-drum, double-wire pilot hoists will be permitted on inspection and approval of Ras Tanura Pilots.

Aramco Harbour Pilots will pilot vessels to berth at all piers. All manoeuvring of vessels in the vicinity of or at the piers will be under the supervision of an Aramco Harbour Pilot.

Under normal operating conditions, no towboat or other craft is to come alongside any vessel before the Harbour Pilot boards the vessel. Should the Harbour Pilot deem the assistance of a tug to be necessary, he will then give the proper signal and secure same. Ship's personnel must not signal for tugs or boats to come alongside except as directed to do so by the Pilot.

Vessels will not be moored if they are not equipped with satisfactory mooring equipment, lines, gear, etc., or if they are not sufficiently ballasted. It is the responsibility of the Master to notify the Harbour Pilot of any special conditions, difficulties or peculiarities, such as engine or boiler deficiencies, defective navigational equipment, mooring lines, tackle, gear, or lack of necessary equipment, which might impose hazards in connection with the handling, mooring, unmooring, discharging or loading of the vessel.

Most vessels will be loaded using all-metal loading arms. The use of nylon or other highly elastic line is prohibited. Mooring lines should be checked frequently and kept tight to prevent excessive movement of the vessel in berth.

All vessels moored with automatic tension winches shall set the manual brakes on these winches.

The services of the Harbour Pilot and of the mooring tugs and their crews are provided without charge and upon the express understanding that they become the Agents and servants of the Owners and/or Charterers of the vessel in every respect. Aramco shall not be responsible and shall be held harmless from all liability for any damage whatsoever resulting from or caused by any action taken, order given or decision made (or any omission thereof) by the Pilot, or tug crew, or in any respect to the handling of such vessel. Damage or injury to any Aramco facility, equipment or personnel by any vessel calling at any loading terminal of the Port of Ras Tanura shall be the responsibility and liability of the Owners and/or Charterers of the vessel.

VHF radio contact may be made between ships and the Aramco Terminal Planning Office and Pilot's office at frequencies listed. See "VHF".

ANCHORAGES: The anchorages in the Port of Ras Tanura have been laid out to facilitate shipping and expedite ship movements to and from the Ras Tanura and Ju'aymah Terminals.

The *Northern Holding Anchorage* is located on the Northern side of the Ras Tanura Separation Scheme, due West of the Entry Buoy. This anchorage is intended as an initial holding area for incoming vessels which, because of berthing prospects or other reasons, will not be brought to berth on arrival. This recommended anchorage covers an area of approximately 30 square miles and varies in depth from 12 to 28 fathoms (22 to 51 m.). Holding ground is only fair, and it is recommended that anchored vessels lie to a long scope of chain whenever the weather is unfavourable.

The *Tanker Anchorage* at the Ras Tanura Terminal lies approximately 2 miles due East of the Sea Islands and Piers. This anchorage is used as a final holding area for vessels which have immediate berthing prospects or for vessels awaiting cargo clearance, documents etc., and whose draft does not exceed 60 ft. Vessels whose draft exceeds 60 ft. and which are required to anchor upon completion of loading, must normally do so in the area approximately 0.7 miles North of the Sea Islands. This anchorage area ranges in depth from 8 to 17 fathoms (14.6 to 31 m.) and holding ground is only considered fair due to variations in character of the bottom. It is recommended that anchored vessels lie to a long scope of chain during adverse weather.

INBOUND TRAFFIC PROCEDURES: All inbound vessels shall establish early radio contact with Aramco Ras Tanura via station HZY for the exchange of information, berthing prospects and arrival instructions. Arriving vessels which will be loading at the Ras Tanura Terminal shall proceed as follows:

(a) Vessels Proceeding to the Northern Holding Anchorage

The vessel shall make for a position approximately 2 miles North of the Ras Tanura Light Float position 27° 05.6′ N., 50° 57.5′ E. and then enter the inward channel of the Ras Tanura Separation Scheme. This will take the vessel past the Approach Buoy to the Entry Buoy. The vessel shall then proceed to the Northern Holding Anchorage and anchor. After anchoring, vessel shall immediately advise Aramco, via Radio HZY, of the following:

(i) Time of arrival at the Northern Holding Anchorage (in GMT).
(ii) Approximate position in the anchorage area.

Vessel shall then contact Aramco Terminal Planning Office and Ras Tanura Pilot Office by VHF radio, Channel 16, if vessel is equipped with VHF.

(b) Vessels Proceeding to Ras Tanura Terminal

The vessel shall make for a position approximately 2 miles North of the Ras Tanura Light Float position 27° 05.6′ N. 50° 57.5′ E. and then enter the inward channel of the Ras Tanura Separation Scheme. The vessel shall continue in the inward channel, past the approach buoy, entry buoy and all channel marker buoys to the Ras Tanura Terminal area, just South of Buoys No. 17 and 18, and proceed according to instructions from Aramco Terminal Planning and Ras Tanura Pilot Officer either to the Tanker Anchorage or to prepare for berthing.

HEALTH: *Radio pratique and quarantine:* A modified radio pratique procedure is in use at the Port of Ras Tanura. Port conditions permitting, vessels supplying requested quarantine information (see "Radio" – "50 Word Message") may be berthed on arrival and proceed with normal cargo loading operations prior to arrival on board of the Quarantine Officer. Extensive delay may be incurred by vessels failing to supply requested information promptly.

In accordance with international practice, quarantine signals must be displayed by all ships approaching Ras Tanura Port. These signals must be displayed continuously until pratique is granted. These signals are:

Sunrise to sunset – Quarantine flag
Sunset to sunrise – Signal lights – red over white

The Quarantine Officer may board vessels awaiting berth in the prescribed anchorage area; however, vessels proceeding directly to a berth will be boarded after being tied up.

Pier personnel are normally allowed on board prior to arrival of the Quarantine Officer.

Vessels at anchor awaiting berth should not rig an accommodation ladder, but instead should be prepared to provide, at short notice, an accommodation ladder rigged in conjunction with a pilot ladder. At night, adequate lighting must be provided.

RADIO: It is required that vessels contact "Aramco Ras Tanura" via HZY and provide a minimum of 3 notices of ETA information at about 72, 48 and 24 hours "steaming time" from the Northern Holding Anchorage. Shorter notices may result in delays and failure to give at least 24 hours notice will result in an addition to allowable lay-time in the event of a demurrage claim is filed against Aramco.

It is imperative that vessels departing under Early Departure Procedure monitor HZY and copy traffic lists after departure until cargo quantities are resolved and the Agent is authorised to approve documents.

The Arabian American Oil Company owns and operates a marine radio station whose call letters are HZY. Radio station HZY is maintained for the purpose of transacting Company business with "in-or-outbound vessels" and is open 24 hours daily. Station HZY will also accept and forward messages concerning ship's agency matters to Agents. However, agency messages to Masters are not permitted. There is no charge for either incoming or outgoing messages.

The marine transmitting antenna of HZY is located at:

Latitude – 26° 18′ 36″ North Longitude – 50° 07′ 12″ East

Due to its inland location Masters are strongly advised NOT to use this antenna for radio direction finding purposes since inaccurate bearings will be obtained due to coastal refraction.

All vessels must endeavour to keep HZY fully advised regarding estimated times of arrival at Ras Tanura, as well as times of actual arrival and position in the anchorage. It is required that vessels provide HZY with a minimum of three notices of ETA information, at about 72, 48 and 24 hours "steaming time" from Ras Tanura. Shorter notices may result in berthing delay. If loading part cargoes at other Arabian Gulf ports prevents a vessel from furnishing an accurate ETA, steps should be taken to dispatch a message either direct or through the ship's Agent giving the best estimate possible at the time. This message should then be followed by an accurate ETA immediately upon departure for Ras Tanura. Failure to give at least 24 hours notice will result in an addition to allowable laytime in the event a demurrage claim is filed against Aramco.

Upon first contact with all inbound tankers HZY will transmit the following two standard messages of 188 and 50 words:

188 word message

Master Rastanuraradio/HZY

Contact HZY soonest advising One ETA GMT Rastanura Two any later changes Three Agent's name and requirements Four arrival departure draft fore and aft Five arrival displacement tonnage Six deballasting hours Seven maximum loading rate full-stop Vessel urged to accept highest possible loading rate stop Vessels loading cargo advise previous cargo and if cargo or residue aboard to be commingled with Rastanura cargo fullstop If VHF aboard call Aramco pilot station for anchoring, boarding and berthing instructions when 100 miles out on 156.8 Channel 16 or 156.7 Channel 14 stop If no VHF aboard contact HZY 500 kHz and copy traffic lists on odd hours for berthing instructions stop On arrival anchorage advise HZY official readiness time and anchored position stop Radio messages without charge fullstop Pilots require sufficient clean ballast for manoeuvring with propellors almost covered and trim limited to 15 ft. for Ras Tanura terminal and 8 ft. for Juaymah terminal stop Imperative all ships operating under early departure procedure copy Aramco HZY traffic list after departure until cargo quantities are resolved and Agent is authorised to approve documents.

ARAMCO

50 word message

Master Rastanuraradio/HZY

Please advice any epidemic diseases or illness on-board and status of crews international certificates of immunisation and all ports called past thirty days also destination stop Agent stop Flag stop Net registered tonnage stop Vessel will not be allowed to berth until this information is received.

ARAMCO

It is important that the Master send a reply to the above two messages soonest after receipt.

Traffic list transmitting times and frequencies of HZY are as follows:

Transmits on 12811.3 kHz on even-hours GMT from 0600 to 1400 GMT, and on 8480 kHz on even-hours GMT from 1600 to 0400 GMT.

Listens on 12 mHz common Channels 5 and 6 or 8 mHz common Channels 5 and 6 after traffic list transmissions, until all calls have been cleared. HZY then maintains watch on 12 or 8 mHz common Channel 5 until the next scheduled traffic list.

Transmits on 16960 kHz at 1000 GMT and picks up calls in the 16 mHz band until all traffic is cleared.

Transmits on 430 kHz on all odd-hours GMT after call-up is made on 500 kHz. An alternate working frequency of 521 kHz may also be used during busy periods.

Ras Tanura local time is GMT plus 3 hours.

Weather advice, port closure information, hydrographic notices and traffic lists are "dualled" on 430 kHz and 8480 kHz at 0430 GMT and at 1630 GMT. It is requested that all vessels forward their local weather observations to this station, either in code or plain language, to assist in preparation of the Arabian Gulf forecasts.

There is no charge for incoming traffic or for weather observations from vessels.

Messages to ship's Agents are handled by HZY, free of charge, However, the shipping Agents are not permitted to use HZY for outgoing traffic. Address the message to Aramco and indicate the Agent's name as the first word of the text.

There is an aircraft radio beacon, call sign RT, which transmits on 335 kHz and is located at:

Latitude – 26° 37′ 36″ North
Longitude – 50° 09′ 47″ East

To facilitate contacting a vessel after departure, it is important that vessels copy HZY traffic lists for several days after leaving Ras Tanura.

There is a Saudi Arabian wireless station located in Dammam; however, this station does not handle marine traffic.

Radio Silence at Piers: The main wireless and radar equipment of any ship must not be operated while the vessel is alongside the oil piers. Use of VHF while alongside the oil piers to contact the Aramco Terminal Planning Office, Pilots, or Agents is permitted.

VHF: VHF radiotelephone Channel 10 for radar advisory service, and Channels 14 and 16 are available for ship-to-shore communication at Ras Tanura. Channels 14 and 16 are monitored 24-hours-a-day in the Aramco Terminal Planning Office which is located in Dhahran, approximately 25 miles South of Ras Tanura. Harbour Pilots can be contacted on Channels 14 and 16. VHF equipped vessels should try to contact the Aramco Terminal Planning Office when they are within 100 mile range of the port and while at anchor. Use of VHF while alongside the oil piers to contact the Aramco Terminal Planning Office, Pilots, or Agents is permitted.

RADAR: *Radar Surveillance Advisory System:*

A Radar Surveillance Advisory System is available to provide informational assistance and to monitor the movements of all ships calling at the Port of Ras Tanura. All ships entering the Ras Tanura Traffic Separation Scheme shall contact the Ras Tanura Pilot Office on VHF Channel 16 and maintain continuous VHF watch on Channel 10 during their entire stay in the Ras Tanura Port and anchorage areas.

In addition to identifying, tracking and monitoring ship movements to and from the Ras Tanura and Ju'aymah Terminal areas, the following services may be provided to vessel's Masters:

(a) Advise upon channel and port conditions, congestion, weather, tides, navigational aides, etc.
(b) Advise upon the movement of other vessels, dangerous manoeuvring situations, and vessels violating port regulations.
(c) Advise upon port regulations pertaining to movement of deep draft departing vessels and priority of vessel movements. (It may be necessary for incoming vessels to reduce speed to permit safe passage of outgoing deep draft vessels.)
(d) Advise upon berthing and anchoring conditions.

The Radar Surveillance Advisory System has been established in order to increase the safety of ships navigating in the Ras Tanura and Ju'aymah areas. However, it is an information and advisory service only, and in no way assumes control of responsibility for ships navigating in the area.

TUGS: Aramco operates five 4,000 h.p. tugs, bollard pull capacity of 55 tons each, and one 6,000 h.p. tug with bollard pull capacity of 70 tons. Two pilot boats and 3 or 4 Pilots are on duty at all times.

Mooring and unmooring assistance is provided by these tugs, regularly stationed in the immediate vicinity of the piers. At present no charge is made for these tugs when employed in normal mooring and unmooring operations, but a charge is made for additional or unusual services. These tugs are fitted with fire-pumps and water/foam monitors to assist in fighting fires.

When the assistance of the tugs is provided, the Master and crews of the tugs shall, in the performance of such services as they render to the vessel, become and be deemed to be the Agents and servants of the owners and/or Charterers of the vessel assisted, and Aramco shall not be responsible and shall be held harmless from all liability whatsoever for any damage that may be done by the tugs or their crews while assisting the vessels, whether occasioned by any act or omission of the tug Master or crew or by any defect or inadequacy of the tug, machinery or gear.

BERTHING: Tankers calling at Ras Tanura are assigned berths based on various factors including, but not limited to, the following: nomination date, time of arrival, product to be loaded, vessel size, available berths and loaded draft.

Whenever possible, endeavours are made to berth vessels immediately upon arrival, and to this end the Master should establish early contact with station HZY and maintain VHF radio contact with the Aramco Terminal Planning Office on the frequencies listed. (See "Radio and "VHF")

If there are no immediate berthing prospects, vessels will be directed to proceed to and anchor in the "Northern Holding Anchorage" and maintain radio contact with Station HZY or the Aramco Terminal Planning Office or the Ras Tanura Pilots' office by VHF radio.

If a berth is available, and the vessel's quarantine message and notice of arrival and readiness have been received by radio an Aramco Harbour Pilot will board the incoming vessel while it is underway. The point of boarding will be South of Buoys 17 and 18 and East of the Sea Island complex. The Harbour Pilot will direct the manoeuvring of the vessel to the assigned berth.

Gangways: All vessels are required to furnish their own gangway which should be made "ready" prior to berthing at the North or South Pier. At the Sea Islands, gangways are available at each berth.

Mooring Lines and Arrangements: In order to ensure the safety of personnel, tankers and loading facilities, and to prevent accidental oil spillages, Ras Tanura Port Authorities strongly recommend that tankers 75,000 d.w.t. and larger which moor at Aramco piers and sea islands utilise a minimum of 8 to 12 wire mooring lines (breast and springs) in accordance with the following schedule:

Vessel Size	*No. of Wires*
75 to 160 MDWT	8 Wire lines
161 to 250 MDWT	10 Wire lines
Greater than 250 MDWT	12 Wire lines

For vessels equipped with both wire and synthetic lines, mixing types must be avoided to the extent possible, thereby keeping the same type lines in the same service.

During periods of unsettled weather, arriving vessels fitted with sufficient wires are preferentially berthed whereas vessels equipped with synthetic lines or too few wire lines are held out in stream until the weather improves and it is safe to moor them. If a ship with synthetic lines is already moored and squall conditions arise, loading to that vessel will be stopped and the loading arms disconnected until weather conditions improve and it is judged safe to resume the loading operation. The use of nylon or other highly elastic line is prohibited.

At the piers, vessels must be moored to the entire satisfaction of the Harbour Pilot. When, in the Harbour Pilot's judgement, additional mooring lines are required and are not available on the vessel, such lines will be furnished by Aramco on a loan basis. Vessels must be ready at all times to put out more lines as requested by the pier personnel, or as indicated by weather changes. All vessels moored at the piers must have deck winches in readiness for immediate use. All vessels moored with automatic tension winches shall set the manual brakes on these winches.

Loading Arm Hook-up: Pier crews are on duty continuously to handle oil hoses/arms and mooring lines. Mooring lines on board vessels will not be handled by Aramco personnel.

All loading connections are equipped with electrical insulating flanges. Therefore ship to shore bonding cables are not required.

OIL LOADING PIERS AND SEA ISLANDS: There are 2 "T" head piers that accommodate oil tankers. These piers project from the Eastern face of the Ras Tanura peninsula and are commonly referred to as the South Pier and the North Pier.

South Pier: The South Pier is connected to the peninsula by a causeway and trestle, 2,300 ft. in length. This pier has 4 berths and is 1,200 ft. long and 105 ft. wide.

Depths at the South Pier are as follows:

Berth 1	33 ft. at ISLW
Berth 2	33 ft. at ISLW
Berth 3	32 ft. at ISLW
Berth 4	31 ft. at ISLW

North Pier: The North Pier is located about 0.75 miles to the North of the South Pier, and has a causeway and trestle that extends some 3,600 ft. from the peninsula. This pier is 2,645 ft. long and 110 ft. wide, and comprises 6 berths.

Depths at the North Pier are as follows:

Berth 6	46 ft. at ISLW
Berth 7	40 ft. at ISLW
Berth 8	49 ft. at ISLW
Berth 9	42 ft. at ISLW
Berth 10	49 ft. at ISLW
Berth 11	48 ft. at ISLW

Sea Islands: A complex of 4 sea islands interconnected by walkways is located approximately 5,600 ft. N.E. of the North Pier. Each of the 4 sea islands consists of 2 berths with a loading station on the platform and water depth at each berth is 85 ft. at ISLW.

Each of Sea Islands 1, 2 and 3 consists of 2 berths, 4 mooring dolphins, and a platform with a loading station and 4 bresting dolphins per berth. Sea Island 4 consist of 2 berths, 6 mooring dolphins, and a platform with a loading station and 2 breasting dolphins per berth. The length of the berths between outer mooring dolphins at Sea Island 1 (Berths 12 and 14) is 1,250 ft., at Sea Island 2 (Berths 15 and 16) and Sea Island 3 (Berths 17 and 18) is 1,400 ft. and at Sea Island 4 (Berths 19 and 20) is 1,750 ft.

The Sea Island loading facilities are serviced by 8 submarine loading lines which have a combined maximum rated capacity of 668,000 b.p.h. one bunker fuel oil line with a rated capacity of 12,000 b.p.h. and 1 black diesel bunker oil line with a rated capacity of 900 b.p.h.

The loading stations at each of the Sea Island berths are equipped with steel, hydraulically-operated loading arms as follows:

		Crude Arms		*Bunker Arms*	
Sea Island	*Berths*	*No.*	*Size*	*No.*	*Size*
1	12 & 14	3	16 in.	1	10 in.
2	15 & 16	4	16 in.	2	10 in.
3	17 & 18	4	16 in.	2	10 in.
4	19 & 20	4	24 in.	2	16 in.

All Sea Island berths are equipped with quick release hooks.

Vessel traffic in the vicinity of the Sea Island must pass to the East of the Sea Islands.

Refrigerated LPG Loading: Facilities for loading refrigerated LPG are located at the North Pier, Berths 6, 8 and 10. These facilities are not designed for loading pressurised cargoes and no LPG will be loaded onto a tanker which does not have adequate shipboard refrigeration capacity and chilled tanks. Ships arriving for refrigerated LPG cargo must have their tank bottoms cooled to minus 38°F. maximum for A-140 Propane loading, and plus 32°F. maximum for A-160 Butane loading. Tank top temperatures must be within 20 – 25°F. Of the bottom temperaturre and pressure must not exceed 1.0 p.s.i.g. Appendix V (which see), entitled "Special Regulations for Loading Refrigerated LPG (RLPG) at Ras Tanura", provides detailed information on requirements and procedures for loading LPG at Ras Tanura.

LPG is loaded through 12 in. loading arms at a maximum rate of 30,000 b.p.h. for Butane and 30,000 b.p.h. for Propane.

Safe Loading Depths: The diurnal tidal rise is approximately 8 ft. at Spring and 5 ft. at neaps. If at any time a ship's draft approaches to within about 3 ft. of the depth of water at the berth, loading will be suspended until an incoming tide increases the depth to permit resumption of loading and provide for safe draft of the fully loaded ship on departure.

The deep water departure channel has a clear swept depth of 69 ft. at ISLW.

A minimum 5 ft keel clearance on all vessels shall be kept when transitting this channel. This is an exercise of prudent judgement and seamanship that minimises the probabilities of groundings.

Loading Rates: The following table shows the products available at each berth and nominal loading rates:

Cargo	*Available at Berths*	*Barrels per Hour*
Crude Oil	12, 14, 15, 16, 17, 18, 19, 20	40,000 to 280,000
Crude Oil	6, 7, 8, 9, 10, 11	15,000 to 90,000
Crude Oil	1, 2, 3, 4	12,000
Fuel Oil	6, 7, 8, 9, 10, 11	12,000 to 22,000
Fuel Oil	1, 2, 3, 4	12,000 to 22,000
Black Diesel	1, 2, 3, 4	5,000
White Diesel	8, 9, 10	12,000
White Diesel	1, 2, 3, 4	8,500 to 15,000
Gasoline	1, 2, 3, 4	6,000
Kerosene (See Note)	1, 2, 3, 4, 8, 9, 10	6,500
Jet Fuel (See Note)	1, 2, 3, 4	10,000
Bunker Fuel Oil	1, 2, 3, 4	5,000
Bunker Fuel Oil	6, 7, 8, 9, 10, 11	5,000
Bunker Fuel Oil	12, 14, 15, 16, 17, 18, 19, 20	12,000
Bunker Diesel	1, 2, 3, 4	1,400
Bunker Diesel	6, 7, 8, 9, 10, 11	1,200
Bunker Diesel	12, 14, 15, 16, 17, 18, 19, 20	900
Refrigerated LPG	6, 8, 10	8,000 to 30,000
Naphtha	6, 7, 8, 9, 10	30,000

Note: See "Safety" — Precautions against static ignition.

Products can be loaded simultaneously at the respective berths if shown above as being available.

It is expected that most ships will be able to receive any cargo, except crude oil, as fast as it can be delivered. Officers in charge of loading must have due regard for all safety precautions as well as for individual ship hazards. If loading of crude oil or products is too slow, Aramco will so advise the vessel. Should a demurrage claim be filed against Aramco the slow loading may result in an addition to allowed lay time.

To prevent ignitions by static electricity the loading rates for kerosene, jet fuel and similar white products will be reduced.

Manifold Loading Connections: Cargo loading arms at the North Pier have 12 in. and 16 in. standard 150 lbs. ANSI raised face flanges.

The refrigerated LPG loading arms at North Pier Berths 6, 8 and 10 have 8 in. and 12 in. standard 150 lb. ANSI raised face flanges.

Cargo loading arms at the Sea Islands have 16 in. and 24 in. standard 150 lb. ANSI flanges.

Cargo loading hoses at the South Pier have 8 in. standard 150 lb. ANSI raised face flanges.

All vessels calling at Ras Tanura terminal should be equipped with reducing spools to fit these loading connections. These fittings should be in place prior to berthing to help expedite ship turnaround time.

Responsibility: All operations in connection with the starting of loading, discharging, switching of tanks and topping off must be directly and personally supervised by the ship's officer.

Upon completion of loading, the vessel will normally be required to leave the berth immediately after disconnecting hoses/arms to await clearance in the Tanker anchorage.

It is the responsibility of the vessel to advise the pier operators to shut down bunker delivery when the requirements of the vessel have been filled.

Emergency Procedures: The course of action to be followed by Aramco terminal personnel in the event of a fire or explosion on board a vessel while berthed alongside at this terminal will be dictated by the particular facts and circumstances of the incident. Although it is impossible to indicate exactly what practices will be applied during an emergency before an evaluation of the specific situation can be made by the responsible Terminal representative, his decisions will be based on the following principles:

(1) An evaluation of the particular emergency will be made by the responsible terminal representative to determine the course of action to be taken. His decision as to the course of action will take into account the location, type and extent of fire or explosion, the berth location and proximity of other vessels, and the tidal and wind conditions.

(2) A burning vessel will not be permitted to remain alongside the berth. Where possible, the fire will be fought with available berth fire-fighting facilities until the arrival of tugs. After hook-up of the tugs to the vessel's fire wires, if the fire is not controllable or extinguished, the vessel will be released or cut free ano removed from berth under controlled conditions.

(3) Where communication facilities permit, the Master or responsible ship's officer, will be advised prior to releasing or cutting free a vessel from the berth. The Master should designate a responsible senior ship's officer with whom the senior terminal representative present can communicate in case of a fire or explosion aboard the vessel. Where possible, this officer will be advised of the actions to be taken in releasing or cutting the vessel free from the jetty.

(4) Although a vessel may have no power it may be released or cut free from the berth prior to arrival of the tugs and hook up to the vessel's fire wires, if in the opinion of the senior terminal representative present it is a greater hazard at the berth than drifting free. Normally, however, a burning vessel will be removed by tug boats under controlled conditions.

Note: The above mentioned Principles are intended to provide the guidelines of action to protect personnel and facilities, and other vessels at the Aramco loading piers.

EARLY DEPARTURE PROCEDURE: To permit more rapid ship turnaround an *Early Departure Procedure* is available. This service provides for a quick departure of the vessel after loading, without the necessity of waiting for delivery of documents at anchorage. This special service should be requested and arranged for with the Agent at the ship's earliest opportunity.

When the vessel is ready to leave the port, a Ministry of Health permit and required port clearance documents will be given to the Master by the ship's Agent.

BALLAST: Vessels should arrive at Ras Tanura with minimum clean ballast to enable manoeuvring under prevailing weather conditions.

Masters are encouraged to take advantage of the favourable weather which prevails much of the time, particularly during the Summer and fall months, to minimise ballast in order to reduce vessel turnaround time. Masters should maintain radio contact with HZY or ship-to-shore communication by voice radio in order to obtain latest weather information and advice on appropriate ballast.

Aramco is particularly interested in having vessels complete the deballasting operation promptly after berthing in order to minimise time at berth. Simultaneous loading and deballasting is encouraged on properly equipped vessels. Owners/operators or charterers of vessels requiring time to deballast in excess of what Aramco considers standard will be so notified by letter with a copy to the Master.

POLLUTION: Discharge into the sea of oil or oil base products either alone or in combination with ballast water is not allowed. Since the terminal does not have facilities to receive any significant amount of oil residues or oily ballast water, tankers arriving alongside with such materials on board will be sent to anchorage to await further orders unless the vessel has prior clearance to load on top of such material or unless the ship's Master agrees to segregate such materials in a separate tank. Ships which release oil or oil residues including oily ballast water in either berth or anchorage area will be held responsible for all clean-up costs. The ship's Master shall be expected to acknowledge by his signature receipt of a Pollution Letter of Protest, informing him that a pollution incident attributable to his ship has occurred and that clean-up cost will be billed to the ship Owners.

All incidents of oil discharge into the sea are investigated and documented and these reports are provided to the Saudi Arabian Government officials in accordance with their requirements.

MEDICAL: No medical services are available at the Ras Tanura or Ju'aymah terminals. Requirements for medical assistance or hospital service must be addressed to the ship's Agent.

When necessary, the Master may obtain medical attention for the ship's personnel from the port doctor (quarantine officer), who may, in the case of serious illness or injury, recommend treatment at the Dammam Government Hospital, government or private clinics in Rahima, or the Ash-Sharq Hospital in Al-Khobar. The port doctor ordinarily will treat minor illnesses or injuries on board ship. A charge is made for medical attention or supplies furnished by the port doctor or other private sources.

The medical facilities of Aramco are made available in emergencies only when referral is warranted medically. A charge is made for medical attention or supplies furnished by the Company. The Aramco radio station, HZY, may be used without charge by vessels at sea to obtain medical advice at any time.

FRESH WATER: Both natural well water and drinking water are available but *only* at the North and South Piers, Berths 1 to 11.

Natural well water is quite brackish and is used mainly for washing. Well water can be supplied at a rate of 50 t.p.h., up to a limit of 100 tons and at a cost of approximately U.S. $1.20 per ton.

The drinking water is treated by a membrane process and meets all the requirements of the U.S. Health Standards. However, due to the significant amounts of calcium, magnesium, carbonates, sulphates and silica, it is *not recommended* as feed to marine boilers. Drinking water is available at a rate of 20 t.p.h., up to a limit of 25 tons per vessel, at a cost of approximately U.S. $12.00 per ton.

FUEL: Bunkering facilities are operated by Aramco, and fuel bunkers are available at all berths at the Ras Tanura Terminal and Ju'aymah Terminal. Vessels are expected to provide adequate advance notice of bunker requirements in order to avoid possible delays.

Vessels taking only bunkers are urged to call at Ras Tanura *prior* to loading cargo elsewhere to avoid delays caused by draft and berth assignment problems.

Masters employing the services of the various bunkering services from the port of Dammam are not permitted to bunker their vessels within the operating area of the port of Ras Tanura.

Lubricating Oils: Lubricating oils are available in limited drum quantities if ordered in advance through the ship's Agent.

SURVEYORS: Independent oil inspection service is available at Ras Tanura by the following agencies:

(a) B & R Redwood, Orchard Sea, Winkfield, Nr. Windsor, Berks., England.
(b) Charles Martin, Inspectors of Petroleum, Inc., 61 Broadway, New York, New York 10006, U.S.A.
(c) E. W. Saybolt and Co., S.A., 400 Swenson Drive, Kenilworth, New Jersey 07033, U.S.A.
(d) G. Watson Grey, Harrisons Wharf, London Road, Purfleet, Essex, England.

The American Bureau of Shipping, Norske Veritas, and Lloyds of London maintain a marine surveyor at Manama on Bahrain Island.

REPAIRS: Relatively limited repair service is available from local business concerns. Aramco will assist in making emergency repairs on vessels only if approved by the Aramco Marine Department Manager and Port Captain. It is suggested that the Master discuss repair charges with the ship's Agent prior to authorizing or requesting any repair work.

TIME: Local time is based on the 45th meridian (3 hours East of Greenwich). In order to avoid any confusion, all communications references to time should be quoted in GMT.

AIRPORT: Ras Tanura terminal about 50 miles from Dhahran Airport. This airport is serviced by many international airlines.

REPATRIATION/SHORE LEAVE: All matters pertaining to crew changes, repatriation of crew personnel, or shore leave are to be arranged through the ship's Agent.

There is no Seamen's Recreation Centre at either terminal of the port of Ras Tanura.

DEVELOPMENTS: See "Ju'aymah".

SAFETY: *Tanker Loading Safety Regulations:* The port of Ras Tanura maintains a vigorous tanker loading safety programme. Aramco is a member of the Oil Companies International Marine Forum (O.C.I.M.F.) and as such follows the procedures and safety practices recommended by this International organization.

As is done in other Arabian Gulf ports, each ship's Master is presented with a form entitled "Declaration by Master" which lists the Aramco Safety Regulations. After a detailed review of each safety item with the pier safety representative, the Master must sign this form. Prior to start of loading and later at several times during the loading, the pier safety representative accompanied by one of the ship's officers will visit the vessel and check to ensure that safe loading practices are being observed by both the ship and the shore crews.

The following list of safety items contains the safety regulations and requirements of the port of Ras Tanura:

Smoking Regulations: No Smoking will be allowed on board while the vessel is at the berth except in places in the accommodation aft, which have been jointly approved in writing by the Master and the Representative of the terminal superintendent.

Galley Fires: No galley fires will be used unless permission has been obtained in writing, from a representative of the terminal superintendent.

Naked Lights: Only vapour-proof/explosion-proof electric lights will be used on deck during the loading.

Electric Cables: Portable electrical equipment on deck will be disconnected.

Radio/Radar Transmitters: Radar and radio transmitting aerials will be switched off and grounded. If servicing of radar and radio units is required when at berth concurrence of the terminal representative will be obtained.

Hand Torches: Hand torches will be of an approved type certified to be safe in hazardous locations.

Portable Radio Transceivers: Portable radio transceivers will not be permitted on deck while loading without a certificate from a recognised authority certifying that the radio is intrinsically safe.

Doors and Ports Amidship Accommodation: All external doors and ports in the amidships accommodation will be kept closed during loading and every effort will be made to prevent entry of gas into this accommodation.

Doors and Ports After Accommodation:

(a) All doors, ports and openings in the aft accommodation that overlook the cargo loading deck will be kept closed.
(b) Portholes and doors downwind of loading deck which might take in gas will be closed. If requested by terminal representative such other action as is necessary will be taken to ensure that no hydrocarbon vapour shall enter a normally non-hazardous area of the vessel where ignition sources could exist.

Ventilators: Ventilators will be kept suitably trimmed at all times with regard to tank vents and prevailing wind conditions to prevent entry of flammable vapours.

Central Air Conditioning Intakes: Any central air-conditioning or fresh air intakes which might take in gas will be closed. All intakes within a combined total of 100 ft. vertically and horizontally of cargo tank openings and/or venting points will be closed.

Window Type Air Conditioning Units: All window type air conditioning units will be kept disconnected when loading low flash oils.

Mooring Lines: Mooring lines must be tended to keep vessel in position and lines taut at all times. Tension winches will be on manual brake.

Cargo/Bunker Hoses: The Master will inspect and ensure to his satisfaction that cargo loading hoses or arms are in good condition.

Loading Connections: The Master will ensure that the oil loading line connections between the shore and ship will be inspected and will be made to his satisfaction.

Unused Cargo Connections: Unused cargo and bunker connections will be blanked and fully bolted.

Stern Discharge Line: The stern discharge line, if any, will be blanked and fully bolted, forward of the after accommodation if possible.

Sea Valves: All ship's sea and overboard discharge valves will be blank flanged or sealed closed.

Scuppers: Scuppers will be plugged and cemented, and plugs will not be removed until loading is completed.

Ship/Shore: A responsible member of the crew will be stationed on the loading deck and will maintain communications or remain in visual contact with the shore operator during loading. He will advise the operator when changes in loading rates are required. VHF radios are placed aboard ship at the loading manifold at North Pier and Sea Island berths.

Cargo Tank Lids:
(a) Before berthing all tank tops, ullage plugs, and sighting ports will be closed and dogged down unless vessel is certified by the Master to be gas-free and all ballast is clean.
(b) Cargo and bunker tank lids will be kept closed but not dogged down throughout the period of loading. This also applies to permanent ballast tanks.

Gas Venting:
(a) Agreement on Method of Venting: Unless specified otherwise on the "Agreement on Method of Venting" signed jointly by the Master and the Representative of the terminal superintendent, all ullage or sighting ports will be kept completely closed (not secured) throughout the loading except for intermittent periods for the purpose of ullaging or sighting ship's tanks.
(b) Flame Arrestors:
Whether open or closed, all ullage ports will be protected by clean, well-fitted flame arrestors of wire gauze screens of an approved type with no defects.

Fire Fighting Equipment: Fire and emergency equipment will be kept in readiness at all times while at berth. Ship's fire hose will be uncoiled and laid out, one forward and one aft, unless fire monitors can be substituted for this requirement.

Emergency Towing: Towing wire (fire wires) for emergency use will be lowered to the water's edge from the offshore bow and quarter bitts and will be tended to keep the eye above the water's edge during loading.

Engines: Engines will be kept ready and vessel kept trimmed so it can leave the piers under short notice.

Ballast: The water ballast which is to be discharged must be clean ballast as defined by current IMCO conventions, free from oil and other hydrocarbons which might pollute the local water of this port.

Gas Freeing: No gas freeing or tank washing will be done at berth.

Restrictions on Tankership Shutoff: Many new tankers are equipped with motor operated valves, some of which are operated from a central location. It is imperative that these devices never be operated to close off against full crude oil delivery rates unless the valve closure action takes at least 60 seconds. Closure times less than 60 seconds may result in surge and hammer of sufficient force to rupture the loading arm. This restriction does not apply to normal topping operations at reduced rates.

Gangways: Gangways will be tended and kept safely rigged as loading progresses.

Repairs: No repair or maintenance work of any kind involving the risk of sparks or other means of ignition shall be undertaken while at berth without written permission from a representative of the terminal superintendent.

Boiler Tube Cleaning: Boiler tubes must not be cleaned while the vessel is at berth, and every precaution must be taken so that sparks do not escape from the funnel.

Emergency Signal: In the event of fire or other emergency, the ship will sound a series of 10 short blasts on the vessel's whistle.

Suspension of Loading: Aramco's terminal personnel are authorized to suspend oil handling operations in the event any of the foregoing safety rules are not observed, or if any other danger is believed to exist, by Aramco personnel supervising loading operations. Tankers are expected to follow all safety regulations generally accepted and practised in the marine transport industry.

The Master has the right to shut down loading in the event that he feels shore operations are unsafe provided adequate advance notice is given to pier personnel.

Precautions Against Static Ignition: Tanks must be gas-free within 0.4 of the lower flammable limit before loading kerosene, kerosene-type jet fuel, and white diesel. Crude oil and all other products except RLPG may be loaded into tanks which are either gas-free or non-gas-free. Ships' tanks and lines must be free of water. Splash filling is prohibited. Loading rates for kerosene and kerosene-type jet fuel will be reduced as follows:
(a) Loading is commenced at a rate not to exceed 1,000 bbls.p.h. per cargo tank, until the liquid in each tank has reached a level of 20 ft.
(b) Above the liquid level of 20 ft., the loading rate is limited to 1,500 bbbls.p.h. per cargo tank, maximum.

No ullage gauges, temperature readings or samples shall be taken until at least 30 minutes after loading has been stopped to that tank to allow static charges to dissipate. No loose floating objects are permitted in tanks to be loaded. Automatic tank gauges and non-conductive ullage sticks may be used at any time.

Under certain conditions, the above restrictions will also apply to loading of heavy naphtha and gasoline-type jet fuel (JP-4).

Hydrogen Sulphide Hazards: Aramco crudes may contain dissolved hydrogen sulphide (H_2S) in concentrations which would cause the gases vented during tanker loading to be hazardous if inhaled. We recommend that Masters review the instructions issued by the Owners/charterers about hydrogen sulfide hazards. If the loading of H_2S bearing crude oil is not covered by such instructions, Aramco has available, upon request, a list of recommendations to aid the Masters.

Action in Case of Oil Spills: In the event of an oil spill the vessel will notify the terminal operator on duty at the berth.

Penalty for Failure to Comply: Disregard of, or failure to fully comply with any of the Safety Regulations will result in stopping all loading operations and the vessel being ordered off the berth for appropriate action to be taken by the charterers and owners concerned.

APPENDICES:
Appendix III

Arabian American Oil Company
INSTRUCTIONS TO VESSELS AND CONDITIONS OF USE OF PORT
Ras Tanura, Saudi Arabia

Date:................. Time:...............GMT

THE MASTER S/S – M/V

Please have your vessel ready for berthing by Aramco Harbour Pilot at .... hours Greenwich Mean Time..............(Date).

1. Vessel will be moored to Berth No. ...... North/South Pier/Sea Island Port/Starboard side to the Wharf as shown on attached diagram.
2. The berth is presently occupied/unoccupied.
3. If a delay occurs, please maintain an alert watch and keep vessel in readiness to move as quickly as Pilot comes aboard.
4. Local Time is GMT plus ....hours.
5. Low Water will be at approximately .... Hours GMT and will be approximately ....feet above ISLW as indicated in U.S. Coast & Geodetic Tide Tables.
6. To avoid delay, please maintain minimum ballast for safe manoeuvring in prevailing weather.
7. Ballast water being discharged while in port MUST BE FREE OF OIL.
8. Immediately following completion of berthing and granting of pratique, an Aramco inspector will board your vessel with Form Aramco 3032-1 Declaration by Master and physically inspect the vessel for conformity to safety requirements and check off certain items required.

MOORING AND MANOEUVRING

1. Full Power must be available for manoeuvring to and from wharves.
2. An Aramco Pilot will pilot vessel to berth assigned.
3. All manoeuvring in vicinity of, or at piers, will be under supervision of an Aramco Pilot.
4. Aramco tugs will assist in mooring and unmooring.
5. All tank tops, ullage plugs and sighting ports will be closed before berthing.
6. Vessel's Master must notify the Pilot of any special conditions, difficulties or peculiarities such as defective equipment, lines or gear which might impose special hazards in connection with handling, mooring or loading of vessels.
7. Steering gear, engine room telegraph, whistle and all navigational equipment must be tested before any manoeuvring to or from piers is started.
8. Pilot will decline to moor vessel with unsatisfactory equipment, lines, gear, etc.
9. Aramco will loan additional mooring lines if Pilot deems them necessary.
10. Vessels must be moored to entire satisfaction of Pilot.
11. Vessels must be ready to put out more lines as required by weather changes or at request of Pilot or oil loading personnel.
12. Winches must be ready at all times for immediate use.
13. Except in emergency, no mooring lines will be let go without permission of the Pilot.
14. While alongside wharves, maintain engines and propulsive machinery ready at all times to leave wharf on short notice under full power.
15. No repairs are permitted that will delay or interfere with this manoeuvring.
16. Non-compliance with 13 and 14 constitutes a serious safety hazard. Any towage and delay resulting from non-compliance will be for vessel's account.
17. If fire or other grave emergency occurs or danger appears imminent on either the vessel or pier, do not await arrival of Pilot — immediately let go mooring lines and personally remove vessel from pier in such manner as to best avoid damage to pier of other vessels.
18. Upon completion of loading and/or bunkering and immediately after disconnection of hoses, vessel must leave berth and await clearance in stream.

SAUDI ARABIAN GOVERNMENT PORT REGULATIONS

1. Quarantine signals must be displayed upon entering the coastal waters of Saudi Arabia and approaching Ras Tanura, in accordance with international practice, and shall be continuously displayed until pratique is granted. These signals shall be as follows:
   Sunrise to Sunset — Quarantine Flag.
   Sunset to Sunrise — Quarantine Signal Lights (Red over White)
2. The Saudi Arabian flag must be flown from the foremast while your vessel is in the coastal waters of Saudi Arabia. Such flags are available for loan and may be obtained from the vessel's Agent.
3. Importation of liquor or contraband items, or trafficking in such items between vessels, is absolutely prohibited.
4. Ship's personnel are *NOT* permitted ashore nor on the wharves *FOR ANY PURPOSE WHATSOEVER* (this includes the reading of the ship's draft) until pratique is granted and then are allowed on the wharves only if actually engaged in duties in connection with operations of discharging ballast, or loading.
5. All shore leave is contingent upon compliance with Saudi Arabian Quarantine and Passport Regulations. For current details concerning these regulations and shore leave

restrictions, ship's Agents must be consulted. Failure to comply with 4 and 5 may result in severe penalties.

CONDITIONS OF USE OF PORT

1. The Master of the vessel shall remain solely responsible for the safety and the proper operation of the vessel at all times. Neither Aramco nor its personnel shall be responsible for any loss or damage arising in consequence of any assistance, instructions or advice given or tendered in respect of the vessel.
2. The use of Aramco premises, facilities and equipment is subject to the express understanding and condition that Aramco and its personnel shall be held harmless from all liability, loss or claim thereof arising out of such use.
3. All vessels transitting the "DEEP WATER DEPARTURE CHANNEL" must maintain a minimum 5 ft. keel clearance.
4. The Harbour Pilot is supplied upon the condition that when boarding or assisting the vessel he becomes the Agent and servant of the Owner and/or Charterers of the vessel in every respect. Aramco shall not be responsible and shall be held harmless from all liability for any damage resulting from or caused by any action taken, order given, or decision made (or any omission thereof) by the Harbour Pilot or in respect to his handling of such vessel.
5. When the assistance of tugs is provided, the Master and crews of the tugs shall, in the performance of such services as they render to the vessel, become and be deemed to be the Agents and servants of the Owners and/or Charterers of the vessel assisted, and Aramco shall not be responsible and shall be held harmless from all liability for any damage that may be done by the tugs or their crews while assisting the vessel, whether occasioned by any act or omission of the tug Master or crew or by any defect or inadequacy of the tug, its machinery or gear.
6. Pilots will not moor any vessel to Aramco wharves unless they have the Masters signature on acknowledgment below.

MASTER'S ACKNOWLEDGMENT

I hereby acknowledge receipt of a copy of this document and agree to the instructions and conditions set forth therein.

Appendix V

SPECIAL REGULATIONS FOR LOADING REFRIGERATED LPG (RLPG) AT RAS TANURA

MASTER

Refrigerated LPG is loaded at Ras Tanura (North Pier) berths Nos. 6, 8 and 10. The water depth at ISLW in all 3 berths is 46, 49 and 49 ft. respectively.

RLPG is loaded via 12 in LPG loading arms. The maximum loading rate for butane is 30,000 b.p.h.; and for propane 30,000 b.p.h. Each berth is equipped with 4 LPG loading arms which may be used for butane liquid, propane liquid or vapour return. The LPG loading arms at berth No. 10 are fitted with Quick Connect/Disconnect Couplers (QCDC). Each LPG loading line has an associated pier circulation and vapour return line. Loading lines must be on circulation at least 4 hours prior to LPG ship start up. No 2 ships are loaded from 1 loading line simultaneously. Vapour line *must* be connected to the vessel before loading commences. This also includes those loading coolant.

Butane and propane may be sub-cooled at Plant 59 by means of Freon-Chillers.

The following specific regulations will be followed for every LPG vessel loading at North Pier:

1. Prior to starting any RLPG cargo loading, the NGL Shift Coordinator shall confer with the vessel's Master and/or Responsible Loading Officer to determine the following:
   1.1 Quantity and type of product in each ship tank and whether it is part cargo or residue required for cooling.
   1.2 Temperatures and pressure of each ship tank.
   1.3 Product to be loaded in each ship tank.
   1.4 Residue in the ship tanks will be measured by the Independent Inspector assigned to the ship and witnessed by an Aramco Inspector or NGL shift co-ordinator.
2. Facilities at Ras Tanura *are not* designed for loading pressure LPG and *no* LPG will be loaded into ships' tanks that are not equipped with refrigeration facilities and are not adequately chilled.
   2.1 Ship tank bottoms must be cooled to minus 38° F. maximum for A-140 propane loading and plus 32° F. maximum for A-160 butane loading. Top temperatures should be within 20-25° F. of the bottom temperature.
   2.2 Tank pressure is not to exceed 1.0 p.s.i.g. or 0.07 kg/cm^2.
3. Butane may be loaded into ship tanks containing butane residues up to 10% of the cargo to be loaded.
4. Propane may be loaded into ship tanks containing propane residues up to 10% of the cargo to be loaded.
5. Propane may be loaded into ship tanks containing part cargo of the same grade only by authorization of the off-taker. This authorization shall be obtained through Manufacturing and Oil Supply Department of Aramco Services Company. Quantities of over 10% of the cargo to be loaded shall be considered part cargo.
   5.1 Part cargo on board at the time of the ship arrival must be measured by the Independent Inspector and witnessed by an Aramco Inspector or NGL Shift Co-ordinator regardless of whether Aramco cargo is to be loaded on top or not.
   5.2 To confirm that the part cargo is the same as A-140 propane or A-160 butane, the ship's propane part cargo must be (−38°F) maximum and the ship's butane part cargo must be (+32°F) maximum.
6. Should the vessel be unable to comply with the provisions of paragraphs 3 and 4, Aramco operations and engineering management representatives shall confer with the vessel's Master and/or Responsible Loading Officer to develop a loading plan/procedure for the safest possible loading for the tanks containing dissimilar residue. The plan shall be in writing, agreed to by both parties and take into consideration loading rates, temperatures, pressures and all possible safeguards to ensure minimizing the dangers to ship and shore installations. It must be understood that this procedure will involve delays to the vessel and will impose additional workloads on both shore and ship personnel.
7. *In no case will loading be permitted into ship tanks containing liquid product of a different grade in excess of 10 tons.*
8. When a vessel requires special handling, as described above, the vessel shall be given a letter of protest, with copies to owners and operators. The letter shall state that the vessel has been handled on a *one-time only basis* and advise that upon its next arrival at Ras Tanura it will have disposed of any residual cargo or have a nomination which will preclude loading dissimilar products.
9. RLPG vessels with warm cargo tanks are not normally handled at Ras Tanura. When special circumstances warrant, new ships and other vessels with warm tanks may be accommodated under the following conditions.
10. Ship tanks must be inerted. A sample must be taken by Aramco personnel from each of the vessel tanks to ensure that it has been properly inerted. Test must indicate a reading of 7.5% oxygen or lower taken by Orsat analysis or J-W oxygen indicator.
    10.1 Vapour returned during chilling operations will be sent to the shore flare system.
    10.2 The loading rate during the chill down period will be kept low and may be reduced if deemed necessary to minimize the amount of vapour sent to the flare or otherwise lost.
    10.3 The amount loaded for chilling purposes will be measured in the ship tanks by the Independent Inspector assigned and witnessed by an Aramco Inspector or NGL Shift Co-ordinator.
    10.4 After cargo for chilling tanks has been loaded aboard, the ship must proceed to anchorage and complete chilling of the other ship tanks before returning to berth to load cargo. No transfer of coolant from one tank to another shall be carried out at Berth.
    10.4.1 In case the cooling operation involves cooling of these additional tanks with an oxygen content (over 7.5%), the vessel must leave the port anchorage area.
    10.5 Upon return to berth for continuation of RLPG cargo loading, all tanks which are to receive cargo will be ullaged by the Independent Inspector and witnessed by an Aramco Inspector of NGL Shift Co-ordinator.
11. During loading of refrigerated A–140 propane or A–160 butane, shipboard readings of loading compartment temperatures and pressure by grade of cargo loaded shall be witnessed several times routinely by the NGL Shift Co-ordinator to ensure that the ship stays within the safe loading limits for temperature and pressure for each grade listed in regulations 2.1 and 2.2.
12. At completion of loading, the designated Independent Inspector will measure all cargo tanks. These ullage measurements will be taken on all ship tanks regardless of whether cargo was loaded into these tanks at Ras Tanura.
13. Vessels with part cargo on board of products other than A-140 propane or A-160 butane must be equipped to keep any liquid or vapour from those cargo parcels completely self-contained. There must be neither any return of non-compatible vapour to shore recovery system nor any venting of such vapour to atmosphere whilst at berth. No mixing of dissimilar refrigerated liquids is allowed at berth.
14. Vessels loading either propane or butane are expected to use the appropriate shore vapour return line, but only for *excess* vapour which the vessel's vapour recovery equipment cannot handle. Should excessive vapour be returned to shore and the situation cannot be corrected promptly aboard ship, the loading shall be shut down. Loading shall be resumed only after the loading plan has been reviewed with the Master or Responsible Loading Officer by the NGL Shift Co-ordinator and corrective action has been agreed upon.
15. In the event of a spill of liquid propane or butane on board the vessel, shore loading shall be shut down until proper corrective action to clean up the spill and to avoid future recurrence has been agreed upon by the Master or Responsible Loading Officer with the NGL Shift Co-ordinator.
16. There are no facilities at Ras Tanura for the return of either liquified propane or liquid butane cargo. Vessels must pay *strict* attention not to overload either of these grades.

Appendix VI

PORT REGULATIONS

The following regulations and special notes are promulgated for the use of ship's Master entering and leaving Ras Tanura and Dammam ports:

Inbound Vessels:

1. Vessels fitted with the appropriate VHF radio equipment are requested to monitor Channel 16 when in the vicinity of Ras Tanura channel and anchorage area.
2. Vessels shall report time of passing Beacon No. 3 to Ras Tanura Pilot Station.
3. Vessels shall report time of passing Buoy No. 7 to Ras Tanura Pilot Station.
4. Vessels proceeding within the area bound by Channel Buoy No. 9 and the Southern extremity of Ras Tanura anchorage should limit speed to a maximum of 5 knots.
5. No overtaking is permitted in the Ras Tanura arrival channel after passing Buoy No. 9.
6. A minimum distance of 1 mile shall be maintained between vessels proceeding in the same direction after passing Buoy No. 9.
7. Vessels passing Buoy No. 17 must navigate with extreme caution and give way to vessels departing from the berths.
8. Freighters transmitting the Ras Tanura port area, bound for Dammam, should alter course Eastward after passing clear of Buoy No. 17 and keep to the Eastern sector of the tanker anchorage.
9. Under no circumstances shall inbound vessels navigate in the buoyed deep water departure channel.

Outbound Vessels:

1. All vessels are to monitor Channel 16 when in the vicinity of Ras Tanura channel and anchorage area.
2. Vessels departing from Ras Tanura anchorage must advise Ras Tanura Pilot Office of their intentions 30 minutes before departing.
3. Freighters outbound from Dammam shall, when passing Dammam Channel Beacon No. 1, alert Ras Tanura Pilot Office of their estimated time of arrival at the Southern extremity of the tanker anchorage. Freighters should keep to the Eastern sector of the tanker anchorage and avoid the manouevring area from the anchorage to the piers.
4. Vessels manoeuvring within the area bound by the Southern extremity of the Ras Tanura anchorage and the entrance to the departure channel (Buoy 17 and 18) should limit speed to a maximum of 5 knots.
5. Any departing vessel shall not overtake any vessel ahead until both vessels have passed clear of Buoy No. 5.
6. A minimum distance of 1 mile is to be maintained between vessels proceeding in the same direction until clear of Buoy No. 5.
7. Under no circumstances shall outbound vessels navigate in the arrival channel.

Special Notes:

1. *Separation Zone (Arriving Vessels)*
   a. All arriving vessels must stay within the IMCO designated arrival lane.
   b. From the approach buoy, or entry Buoy No. 4, the width of separation zone is 0.75 mile.
   c. From Buoy No. 4 to Buoy No. 5, the separation zone is 0.5 mile.
   d. From Buoy No. 5 to Buoy No. 7, the separation zone decreases to nil.
   e. From Buoy No. 7 to Buoy No. 17, all arriving vessels must keep to the West of Buoys Nos. 7, 9, 11, 13, 15 and 17.
2. *Separation Zone (Departing Vessels)*
   a. All departing vessels must stay within the IMCO designated departure lane.
   b. From Buoy No. 17 to Buoy No. 5 all departing vessels are to keep to the East of Buoy Nos. 17, 15, 13, 11, 9, 7 and 5.
   c. The separation zone starts at Buoy No. 7 and increases to a width of 0.5 mile at Buoy No. 5.
   d. From Buoy No. 5 to Buoy No. 4 the separation zone width is 0.5 mile.
   e. From Buoy No. 4 to the entry buoy or approach buoy the separation zone width is 0.75 mile.
3. *Inner Channel*
   The inner channel at Ras Tanura Port has been buoyed for the safe navigation of deep draft outward-bound vessels where marine navigation aides have been installed in accordance with international standards. The channel has a certified depth of 69 ft. at ISLW.
4. **Keel Clearance.**
   No vessel may transit either channel unless it has at least 5 ft. of keel clearance.
5. **Communication – VHF Radio.**
   Maintaining a continuous radio watch aboard all vessels in the Ras Tanura vicinity cannot be over emphasized, particularly in the event of unforeseen circumstances developing in the port area. A two-way exchange of information is an essential prerequisite to a safe, efficient port operation. Vessels in the Ras Tanura anchorage that are not fitted with VHF radio are requested to maintain a radio watch with the local station HZY.

GENERAL:

Charts and Publications:

Surveys conducted by both American and British authorities in recent years have resulted in the publication of a number of charts of the Port of Ras Tanura and its approaches. The U.S. Defence Mapping Agency hydrographic charts are as follows:

No. 62414 – Approaches to Ras Tanura
No. 62415 – Channels to Ras Tanura
No. 62416 – Anchorages of Ras Tanura and Ad-Dammam

Vessels making for Ras Tanura should be equipped with the latest issue of the above-mentioned charts or the corresponding British Admiralty charts. In addition, it is advisable to supplement the information shown on these charts with other charts of the Gulf and publications such as Sailing Directions and List of Lights.

Current hydrographic information may be obtained by radio from "Middle East Navigational Aid Service (MEGULITE), Bahrain".

Tides and Currents:

The depths quoted in "Sailing Directions" and those shown on charts of the Arabian Gulf are based on Indian Spring Low Water (ISLW).

Locally, the diurnal tide rise is approximately 8 ft. at Springs and 5 ft. at neaps. The "Sailing Directions" present a more detailed description of the tides and currents of the locality.

Due to the peculiar configuration of the coastline at the Port of Ras Tanura, a local system of tidal currents prevail in the vicinity of the berths.

Winds

The winds in this area are not predictable for more than a very few hours. Winds of varying strength may come from any quarter. The prevailing wind, however, is from the NNW.

Winds of any strength tend to create a sharp but short, choppy sea coming up very quickly and calming down just as rapidly. Easterly winds, however, may cause heavy seas and swells lasting for a considerable period.

For a more complete description of the winds in the Arabian Gulf, refer to the "Sailing Directions".

Visibility:

The visibility in this area of the Arabian Gulf is generally fair to excellent, but at times, fine dust is held in suspension in the atmosphere and visibility is reduced to a very short distance.

These phenomena are more deceptive than fog, in that mariners are apt to believe visibility to be greater that it actually is. Fogs, with or without sand or dust, may occur in the morning hours.

Weather:

The local weather of Ras Tanura is comparatively favourable for the Arabian Gulf. The exposed position of the port permits the winds to mitigate the heat of the Summer. Temperatures usually range from a low of 45°F in February to a high of 110°F in August.

During most of the year the relative humidity is high and during the late Summer and Fall it frequently exceeds 85%.

Proper precautions should be taken to avoid sunstroke and heat prostration, particularly during the Summer and early Fall months.

Provisions;

Ship's chandlers are available for provision resupply through the ship's Agent.

Divers:

Deep sea divers, operating from modern and well-equipped boats are available. Ship's Agent must be contacted for this service.

Galley Fuel:

Galley fuel is available only at the North and South Pier, Berths 1 to 11, at approximately U.S. $107.69 per metric tonne. No galley fuel or water is available at the Ras Tanura Sea Islands, Berths 12 to 20, nor at the Ju'aymah SPM's, Berths 31 to 36.

Dry Cargo and Freight:

All Aramco dry cargo is received either at the Saudi Arabian Government piers at Dammam, about 7 miles South of Ras Tanura, or is lightered from vessels at anchorage and transported to piers as designated by the Dammam Port Officials. The dry cargo and freight piers at Dammam are owned and operated by the Government of Saudi Arabia and are entirely independent of Aramco.

Vessels bound for and departing from Dammam are to use the East Channel which is marked with 8 light buoys fitted with radar reflectors. This channel is limited to ships not exceeding 35 ft. in draft.

Currency:

The Saudi Arabian unit of currency is the Saudi Riyal (SR). As of October 1978 the official exchange rate was 3.300 Saudi Riyals to 1 U.S. Dollar, and 6.544 Saudi Riyals to 1 Pound Sterling.

Ship Agencies:

Vessels calling at either terminal of the Port of Ras Tanura should address all messages concerning ship's business to their Agents through "Aramco HZY". Matters concerning provision supply, minor repairs, local medical or hospital services, mail, crew changes, etc. are to be handled by the ship's Agent.

Import – Export Customs:

All materials to be either exported from or imported into Saudi Arabia are subject to examination by customs authorities. The importation of certain articles is strictly prohibited. Such articles include:

- Explosives and firearms, including air rifles
- Implements of war of any kind, including antiques
- Alcoholic beverages, including beer and wines
- Religious matter not pertaining to the Moslem faith
- Playing cards and gambling devices
- Narcotics

Trafficking in these items between ships also is strictly prohibited, whether the ships are at anchor or at berth. The Saudi Arabian Government forbids trafficking between ship crews and shore personnel.

Saudi Arabian Government Regulations:

Saudi Arabian Government Regulations are strictly enforced, and Masters having any doubts concerning the interpretation of these regulations are urged to consult their Agent. While in port, *whether at anchorage or at berth*, the vessel's personnel are under the jurisdiction of Saudi Arabian laws.

The taking of photographs while the ship is in the Port of Ras Tanura is prohibited by the Saudi Arabian Government.

All alcoholic beverages, including beer, table wines and liquors are to be under lock and key during a vessel's stay in port. The possession and/or consumption of alcoholic beverages is prohibited in Saudi Arabia. Penalties are severe and major delays to vessels can be incurred by Government investigations of violations.

Port Officials:

Saudi Arabian Government authorities – Customs, Quarantine, Coast Guard and Port Officials – have offices at various locations at the Ras Tanura Terminal, Ju'aymah Terminal and Rahima. The ship's Master shall make all necessary contact with the Saudi Arabian Government authorities through the ship's Agent.

A United States Consulate General is established near Dhahran, approximately 50 miles South of Ras Tanura.

A British Embassy is established on Bahrain. It is very difficult, however, to contact Bahrain by shore telephone from Ras Tanura or Ju'aymah, and Masters having business there usually arrange to call at the port of Sitrah (sometimes spelled Sitra).

SHIPMASTER'S REPORT: 1977.

I have just loaded at the above port on a 263,000 d.w.t. vessel to a draft of 67.5 ft. As the vessel was loading to a draft that meant navigating the departure channel on a rising tide, and also my first visit to the port, I requested the assistance of a Pilot for the departure channel.

I made this request 8 hours before departure to the port office and was informed it was not provided.

When the Berthing Master came to sail the ship he told me that Aramco did not provide this service irrespective of what was said in any publication and he left the vessel before it entered the departure channel.

AUTHORITIES: The Arabian American Oil Company, Dhahran, Saudi Arabia. Cable Address, Aramco, Dammam. Port Officials: Saudi Arabian Government Port Authorities located in Customs House, Port Office, and Quarantine Office at Ras Tanura.

AGENTS: Mail Address: Gulf Agency Co. Saudi Arabia, Aramco Mail Box 621, Ras Tanura, via Dhahran, Saudi Arabia. Telephones: 33171, 33132 (24-hour service). Telex: 651011, answerback "GAC RT SJ". Cables: "Confidence Bahrain". Stating "For Ras Tanura". Radio: Vessels can communicate with SSB radio station, frequencies 3539 and 6910, call-sign "Confidence Ras Tanura".

For ship to shore communication, Ras Tanura office is also equipped with VHF radio, call-sign "Confidence Ras Tanura", on Channel 16, switching to Channels 13, 6, 9 or 14 for communication.

Tanker Crew mail: To be directed to: c/o Gulf Agency Co. (Saudi Arabia) Ltd., Rahima P.O. Box, Ras Tanura, via Dhahran, Saudi Arabia, The Gulf.

YENBO (Yembo): 24.05 N. 38.03 E.

FLAG: Saudi Arabian flag must be hoisted.

LOCATION: On Red Sea coast, about 218 nautical miles North of Jeddah.

CHANNEL: Ships entering port pass a channel of the following measurement: Length 1647 m., width varying between 70 to 130 m., width at entrance between beacons 310 m.

BEACONS: 11 miles outside port, beacon at Al-Sharm. Height 23 ft. White flash every 10 seconds. At entrance of port channel 2 beacons, height 15 ft. Starboard-hand beacon (black), green flash every second. Port-hand beacon (red), red flash every second.

795 m. from channel entrance on port hand is another beacon, height 15 m. (black and white squares), white flash every second.

BUOYS: Channel is buoyed with red and green port and starboard-hand buoys.

PILOTAGE: Compulsory. Vessels requiring Pilot should exhibit code flag or International light signal.

DOCUMENTS: All vessels calling Yenbo should provide authorities with the following:

Passenger Vessels

Certificate of Registry.
International Safety Certificate (issued and validated from one of the signatory states of the pact).
Radio-telegraphy Safety Certificate.

Cargo Vessels

Certificate of Registry.
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Wireless Certificate for vessel of 1,600 tons d.w.t. or more
Safety Wireless and Telephone Certificate for vessels of 300 tons to 1,600 tons d.w.t.

Requirements of Cargo and/or Pilgrim Documents:

For Doctor

2 copies Passenger List – Landing.
2 copies Passenger List – Transit.
2 copies Crew List.
2 copies Declaration of Health.

For Customs

2 copies Passenger List – Landing.
2 copies Passenger List – Transit.
2 copies Crew List.
2 copies Ship's Bond (tobacco, spirit, wine and beer).

For Immigration

6 copies Passenger List – Landing.

For Agents

6 Copies Passenger List – Landing.
1 copy Crew List.

Prior to the vessel's arrival the following documents are required for translation and submission to the various authorities:

7 copies of the Cargo Manifests.
1 copy of Freight Manifest.
2 copies of Stowage Plan.
2 copies Hatch List.
1 copy each non-negotiable Bills of Lading.
1 List of dangerous cargo whether for discharging or in transit.

MAX. SIZE: Max. draft 34 ft.

HEALTH: All incoming vessels should abide by health regulations and present necessary documents to the authorities in accordance with international laws, i.e. as under: Q if the health condition is clean. QQ if there is a suspicious case in the vessel. QL if there is an infectious or epidemic case on board.

RADIO: Until the implementation of a Beacon Station for navigation all ships entering port before passing the channel should contact Port Department by radio/telephone during following times: 0500 to 0600 hrs. GMT; 1000 to 1100 hrs. GMT; 1400 to 1500 hrs. GMT.

These are the decided times during normal days, but during the Hajj Season a new publication is issued to cover additional times.

BERTHING: Presently there are 9 berths available at Yenbo port including 2 old berths. Length of berths are as follows:

Berth No. 1	170 m.
Berth Nos. 2, 3, 4	525 m.
Berth Nos. 5, 6, 7	800 m.
Berth No. 8 and 9	450 m.

Max. draft permissible 34 ft.

Length restriction: no restriction depending of berth availability.

Beam: No restriction.

Barges: 8 propelled barges having capacity of 300 tons and 5 barges of 200 tons each are available.

Private mobile cranes with a capacity of up to 50 tons are available. There is also a supply of fork-lifts to meet with present port requirements. Discharge is mostly carried out by ship's own gear.

STEVEDORES: Like Jeddah, stevedoring at Yenbo, is based on daily paid basis. There are no stevedoring companies and labour is engaged on day to day basis.

There is one custom warehouse at the moment (at Easterly berth) which can accommodate about 10,000 tons of cargo. This shed is near quay and can receive cargo direct into shed from vessel.

FRESH WATER: Available by barge and truck in small quantities up to 100 tons.

CUSTOMS ALLOWANCE: Each crew member may have 200 cigarettes or 0.5 lb. tobacco, but all alcohol and wine, beer, etc., must be sealed. This applies to all persons on board. For each flask/glass/bottle containing alcohol found by the customs, there is a penalty of £100 sterling.

SHORE LEAVE: Passengers may only go ashore if they have a valid visa. Crew may go ashore if they have written permission from Master and leave their passports with passport office at the port.

DEVELOPMENTS: Contracts have been signed for the construction of 5 quays and 5 mobile platforms.

SHIPMASTER'S REPORT: January 1979.

Pilotage: Pilot boards 1 mile off harbour entrance. Pilot requires 4 days, 2 days and 24 hour notice of arrival. Pilotage compulsory.

The Pilot boards from one of 3 modern fast launches, painted white, with "Pilot" on the side. (Not to be confused with about 6 fast naval launches of similar size which are seen in the port.

Restrictions: Vessels may enter and leave at any stage of the tide during daytime only.

Max. Size: Length, no limit. Beam, no limit. Max. draft, 34 ft. Depths by echo sounder in the entrance channel indicate depths greater than 39 ft.

Tugs: Available. 3×1300 h.p. (Voith-Schneider type). Also 2 additional tugs available. Ships ropes used. No VHF facilities available.

Health: Quarantine formalities carried out alongside. Advise Jeddah Agents of quarantine particulars.

Consuls: In Jeddah.

Medical: Doctor and hospital available.

Fresh Water: Not available at time of visit.

Berthing: Berth located adjacent Yenbo town. Berth No. 1 is for small craft, berths Nos. 2–7 for large vessels and berths Nos. 8 and 9 in use but not yet completed. There is good rubber fendering on all berths.

Bulk Handling Facilities: Cement only.

Special Cargo Handling Facilities: None. However, Ro/Ro vessels with starboard quarter doors discharge at ordinary berths which are very low, being about 1 m. above the water. There is adequate storage space for handling breakbulk cargoes. Pallitised cargoes handled. There is no equipment for handling containers. There are no lighters, however, native craft are reported to be available.

Density: 1025.

Anchorage: There is no anchor outside the port.

Harbour Plan: The plan in the corner of Chart 63 is quite accurate except that a beacon has been erected now on the N.W. side of the entrance. The S.W. beacon flashed green, and is good and bright. The N.W. beacon flashes red, and is poor and weak. The channel buoys are unlit.

Cargo sheds have now been erected at berths 2, 4, 5, 6 and 7. The conspicuous minaret to the N.E. and the Water Tower at the entrance were not seen. If in existence then they are not 'Conspic'. The land to the S.E. of the entrance channel has now been fully reclaimed, and the seaward corner of it is radar conspicuous. Reclamation work is still taking place on the other area to the N.E. and a narrow causeway has been built to join the 2 reclaimed areas.

The Town: The population is said to be 40,000. The town is being rebuilt. The surrounding land is utterly flat for many miles, and entirely destitute of vegetation. The port's chief activities are imports. No known exports. Pilgrims land here to visit Medina. The port handles 25/30 ships a month, and 45 ships per month during the Pilgrim season. However, I only saw 3 ships in port. Fresh water cannot be obtained. However, if about 2 weeks notice is given water can be trucked in from about 50 km. distant.

Communications: It is 354 km. by road to Jeddah. There is no airport, or rail link. Telephone calls can be made to Jeddah with some difficulty. There is no telex link.

Name of Port: The correct spelling appears to be Yenbo, as used on the chart, and not Yanbu as used in the List of Radio Signals Vol. 6, or Yembo as used occasionally.

In furtherance of this please note that the tugboats are named Yenbo 1, 2 and 3.

Directions: Chart No. 63 is grossly inadequate for the approach to Yenbo. For call at Yenbo in January 1979 a home-made chart covering area from 23° 39′ N. to 24° 21′ N., and from 37° 28′ E. to 38° 06′ E. was made, at a scale of about 1:145,000 (i.e. 5 times larger scale than Chart No. 63).

Under no circumstances would I consider an approach to this port with the chart referred to (No. 63), which is to the scale of 1:750,000. No other Admiralty chart exists.

The Red Sea & Gulf of Aden Pilot, Supplement No. 7 – 1977 states that Ras Baridi may lie 3 miles to the North of Position charted. In fact I believe that it lies about 1.5 miles North only, but the point of land at the entrance of Sharm al Khaur (The West entrance) is correctly plotted as regards latitude, although the wrong shape.

The area of land from the entrance to Sharm Yenbo to a point about 5 miles to the West lies about 1 mile further North than charted.

The "Pilot" on P.313 advises passing at least 2.5 cables Northward of Schermo beacon. In fact this vessel passed 5.0 cables North, and the soundings found decreased in the space of 0.5 mile from 380 fathoms to 13 fathoms, then dropped off to over 300 fathoms equally abruptly. On departure we passed 1 mile off and the same ledge was found, this time with 15 fathoms over it.

The rock marked Schermo is charted as being awash, but was not sighted at 0.5 miles in daylight. Schermo beacon lies 1.8 miles Westward of this rock, and consists of 3 concrete blocks joined by catwalks, with 1 block toppled. A 30 ft. mast is erected on the centre block. Visible by radar as a very weak echo at 11 miles, as a good echo at 6–8 miles, and at 3 miles the echo can be resolved into 3 echoes. Visually, when approaching the port at 0800 hrs. the beacon could only be identified at 2 to 3 miles. On departure at dusk the light could be clearly seen at 8 to 9 miles.

Schermo beacon is the only navigation aid in the entire area. The coast in the area of Ras Baridi is radar conspicuous. The coast from Sharm al Khaur Southward to Yenbo does not show up on the radar in an identifiable manner until the vessel is within 4 to 5 miles. The echo sounder is no help, as 150 to 200 fathoms is found 1 mile off the port entrance, and apart from the 15 fathom ledge off Schermo, the rest of the inward track was over depths of 340 to 380 fathoms, with a generally level even bottom.

Recommended inward route: Steer a course of 090° along the parallel of 24° 06′ North. If on the track Ras Baridi will be found 12 miles to the North, and 5 miles further along the West side of Sharm al Khaur will be found 10 miles to the North. This course will pass 1 mile North of Schermo Beacon. When passing Schermo Beacon the cement silo in the Port of Yenbo can be seen, being the only conspicuous object bearing East. After passing Schermo steam at least 1 mile 090° before altering to 105°. Under no circumstances approach closer than 1 mile from the entrance, when embarking the Pilot.

AGENT: See "Jeddah"

ZULUF TERMINAL: 28.23 N. 49.14 E.

TERMINAL CLOSED DOWN APRIL, 1976. THE STORE BARGE HAS LEFT. NO FURTHER OPERATIONS WILL TAKE PLACE AT ZULUF.

Senegal

DAKAR: 14.40 N. 17.26 W.

PORT LIMITS: *North:* from the point of Bel-Air by a parallel from N.E. of the N.E. Jetty of the harbour, to 1 mile N.E. by a meridian passing 2,900 m. East of the Round-Point determined by the crossing of Felix Eboue and Avenue de la Jetee Nord and by the parallel passing 2,060 m. North of Goree Island.

East: By the meridian passing 1 mile East of Goree.

South: By a line joining the Cape Manuel from the South point of Goree prolonged until it encounters the meridian passing 1 mile East of Goree.

DOCUMENTS:

5 Crew Lists.
2 Lists of Vaccinations.
6 Lists of Passengers in Transit.
6 Lists of Passengers Disembarking.
4 Lists of Crew Personal Effects.
4 Lists of Ship's Stores.
1 Maritime Declaration of Health.
2 Lists of Ports of Call.
5 Ship's Report Inwards.
1 Hatch List.

PILOTAGE: Pilots meet vessels off the North point of the Island of Goree in a naturally sheltered area.

RESTRICTIONS: During the rainy season, all vessels with a draft of more than 32 ft. 6 in. could be delayed due to the effects of swell to stay at anchorage in outer-roads and await meteorological conditions permitting their entry into the harbour.

Use of whistle signals to call Pilot is forbidden between 2200 and 0600 hrs. The harbour area is dredged to a depth of 10 to 11 m.

MAX. SIZE: Ships of 33 ft. draft are able to enter at all stages of the tide by day and night. Vessels up to 36 ft. draft may enter at high tide except possibly during the stormy season, between mid August and mid October.

HEALTH: Health Officials board vessel immediately after berthing alongside. For passenger vessels, these formalities are effected before berthing to avoid delays. Vessels at sea may obtain medical advice by VHF via Dakar Radio.

Inoculation/Vaccination can be arranged through Agent during weekdays.

Free pratique can be granted via radio by Agent, by using international Code Words "MIBDU/MIJMA".

VHF: The Port Captain's Office, pilot station and tugs are equipped with VHF, with the following channels: Channel 16 used by vessels approaching to contact pilot station or Port Captain's Office; Channel 12 used during manoeuvres for communications between Pilots and tugs; Channel 6 used only by the tug station.

TUGS: Operated by a private company, 4 tugs available up to 2,000 h.p. Compulsory for loaded tankers.

BERTHING: 9,000 m. of quay length available of which more than half has depths of 8 to 12 m. alongside.

Mole D'Escale: 6 berths, depth alongside 10 m., can be used for vessels refuelling simultaneously with cargo operations.

Pier 718 Phosphate quay (Pechiny). 215 m. long, max. draft of 25 ft. 7 in., loading average of 200 T/hour.

Pier 52 Phosphate quay (TA IBA). 170 m. long, max. draft of 36 ft., loading average of 1,000 T/hour.

The South area has three wharves with a depth of 26-33 ft.

Dock I is 460 m. long.

Berth No.	12	Draft	26 ft. 3 in.
,, ,,	13	,,	28 ft. 7 in.
,, ,,	14	,,	28 ft. 7 in.
,, ,,	15	,,	33 ft.
,, ,,	17	,,	33 ft.

Dock II

Berth No.	21	Draft	27 ft. 3 in.
,, ,,	22	,,	26 ft. 11 in.
,, ,,	24	,,	26 ft. 3 in.
,, ,,	25	,,	25 ft. 11 in.

Dock III 360 m. long. Max. draft of 32 ft. 10 in.

TANKERS: The Petroleum Basin is dredged to a depth of 10 to 11 m. Two jetty berths can receive tankers up to 200 m. length, max. draft 32 ft. 6 in. Petroleum Wharf: 4 berths, depth alongside 12 m. (depth in approaches 11 m.) can receive tankers up to 250 m. length with a draft of 36 ft.

STEVEDORES: Normal working hours, weekdays from 0800 to 1200 hrs. and from 1400 to 1800 hrs. Saturdays from 0800 to 1200 hrs. Overtime, weekdays from 0500 to 0800 hrs.; from 1200 to 1400 hrs.; from 1800 to 2200 hrs.; from 2200 to 0500 hrs. Holidays and Sundays from 0000 to 0500 hrs.; from 2200 to 2400 hrs.

MEDICAL: *Vaccinations;* Possible from 0800 to 1200 hrs. and 1500 to 1700 hrs. Sundays and holidays excluded. *Doctors:* All kinds of specialists available. *Hospitals:* With qualified doctors and good equipment.

FRESH WATER: All quays are fitted with water hydrants. Water supplied by 3 hoses simultaneously, with a rate from 60 to 100 cu. m.p.h. Can also be supplied by barge up to 400 tons capacity.

FUEL: All grades can be supplied from the quays up to 1,000 t. p.h. Fuel can also be supplied by barge. Also see "Shipmasters' Report".

REPAIRS: All types of repair can be effected by the Naval Arsenal or by private companies.

DRY DOCK: At the Naval Arsenal, one dry dock length 189 m., width 23 m., depth up to 9.50 m. See "Developments".

REPATRIATION: Seamen can be repatriated to Europe without delays by air.

AIRPORT: International airport with regular services to Europe.

TELEPHONES: All berths are equipped with telephone apparatus which is placed on board vessels without charge.

HOLIDAYS: New Year (1st January); Tabaski (Variable Date); National Day (4th April); Easter (Variable Date); Labour Day (1st May); Ascension Day (7th May); Whit Monday (Variable Date); Maouloud (Variable Date); National Day (14th July); Assumption (15th August); All Saints' Day (1st November); Korite (Variable Date); Christmas (25th December);

SHIPMASTER'S REPORT: With a draft in excess of 15 m. it is not possible to anchor in the inner roads due to the swell. The swell is worst from July to October (rainy season).

The Pilot directed us to an anchorage 0.5 miles N.E. of I. de Goree but in my opinion it is a little too close. However, the nearer a vessel can anchor N.E. of Goree the better. The holding ground is very good.

It is possible to talk to Mory Fuel Company direct on VHF Channel 2 . They have a barge which is able to deliver fuel oil and diesel oil, capacity 500 tons.

Three tugs available, be sure to order one well in advance before completion of bunkering or the vessel may have to wait. Bunkering undertaken day and night.

DEVELOPMENTS: A 30,000 d.w.t. (metric) capacity dry dock is under construction in Norway for the port and is expected to be towed to Dakar in the Spring of 1980.

AUTHORITY: Port Autonome de Dakar.

AGENT: Socopao Senegal, 47 Avenue Albert Sarrault, B.P. 233. Tel. 51195. Telex 521.621.622. Cables "Freight Dakar".

KAOLACK: 14.09 N. 16.06 W.

DOCUMENTS:

2 Crew Lists.
2 Store Lists.
2 Manifest pacotille (tobacco, wine, etc.). Agents deposit to Customs office.

PILOTAGE: Pilot taken on board, and lands in Dakar. When vessels do not require tank-washing, the Pilot disembarks in roadstead.

ANCHORAGES: Sufficient for three vessels only. About 6 m. deep.

RESTRICTIONS: Night navigation forbidden in River Saloum.

MAX. SIZE: Length 105 m. (because of River Valor).

HEALTH: Agent signals to Harbour Master. Provisionally vessels quarantine in Dakar. No hospital.

TUGS: No tugs. (Only from Dakar.)

BERTHING: Signals by flag when berth available. Vessels enter at flood tide so that they can turn at anchorage to be ready for sailing.

MEDICAL: Yellow fever vaccinations only at Dakar. No hospital facilities.

DENSITY: August to December: sea water. January to July: 1.55.

FRESH WATER: Available at 10 t.p.h.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Arranged by Agent.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCE: Tobacco, No restrictions, but Customs control on board (declaration on manifest). Crew going ashore only allowed cigarettes marked "Vente au Senegal". Wine and/or Spirit, Not limited, Customs controlled.

IDENTIFICATION CARDS: Not necessary.

CONSULS: None (Dakar only). French Consulate Agent: Mr Jean Guillemot. UTRAM. Tel. 87. Telex Mafic 781 SG.

REPAIRS: None (only Dakar).

REPATRIATION: Not possible (Dakar only).

AIRPORT: None.

TIME: GMT Permanent.

HOLIDAYS: Independence Day (4th April) no loading. Tabaski (dependent on moon phase).

FIRE: Tel. 324.

TELEPHONES: Not possible to place on board.

SHORE LEAVE: Crew members allowed ashore.

REGULATIONS: Vessels must hoist Senegalese flag and notify Agent before entering port.

AUTHORITY: Harbour Master.

AGENT: Socopao Senegal, B.P. 202, Kaolack. Tel: 87.025. Telex: 7460 Freight SG.

Seychelles

PORT VICTORIA, Mahe: 04.37 S. 55.28 E.

DOCUMENTS:

Maritime Declaration of Health – forms obtainable from Medical Officer.

Deratisation Certificate.

5 Crew Lists and Passengers' Lists.

Dangerous Cargo List.

Ship's Register.

Crew Declaration Form.

Declaration of Stores.

Parcels List.

Firearms List.

List of Animals remaining on board.

Un-manifested Cargo List.

Cargo Manifests.

PILOTAGE: Compulsory in inner and outer harbour for any vessel of or exceeding 150 tons net burdened register.

24 hours notice, giving draft and length. Telegraphic address "Demarine" through Cable & Wireless (on schedule 500 kc/s. and 8714 mc/s. Schedule published in Radio list. Harbour control equipped with VHF Channels 16, 12 and 6).

Pilot Boat: White hull with blue cabin, with "H" flag.

Signals for Pilot: "G" by flag and/or whistle and by night "G" by morse. Pilot boat stationed inshore and proceeds to sea to meet approaching vessels. Pilot can board in any weather. While awaiting Pilot; vessel can anchor in any suitable anchorage in the pilotage area. Vessels should call "Harbour Control" on VHF, Channel 16, two hours before arrival between 0700 and 1800 hrs. Between 1800 and 0700 hrs. the station may not be manned.

ANCHORAGES: (1) Anchorage A. In depth of 66 to 72 ft., fine sand and shells. Good holding, 9.75 cables, 058 degrees from Victoria Lighthouse.

(2) Anchorage B. In depth of about 64 ft., sand and coral. Good holding, 8.25 cables, 074 degrees from Victoria Lighthouse.

(3) Anchorage D. In depth of 78 ft. coral and sand. Good holding, 3 cables, 048 degrees from Victoria Lighthouse.

(4) Anchorage E. In depth of about 78 ft., sand and shells. Good holding, 1.25 miles, 089.5 degrees from Victoria Lighthouse. Super tankers and large vessels anchor outside the Fairway Buoy in any suitable anchorage. The Master should always contact Harbour Master for anchorage instructions.

RESTRICTIONS: All shipping movement in Inner Harbour to take place during daylight hours only. In Outer Harbour, night movement at discretion of Master. No tide restrictions.

HEALTH: "Q" Flag or international red over white. Medical Officer boards vessels at anchor and before entering Inner Harbour. Crew Lists with vaccination dates against smallpox, yellow fever and cholera if vessel from infected places. Health clearance given at Port Victoria only. Hospital facilities available. Vessels proceeding to the inner harbour may be disinsectised.

RADIO: Cable and Wireless, Port Victoria, Mahe. Call sign ZCQ. Harbour Control equipped with VHF, Channels 16, 12 and 6.

TUGS: One twin-engine 2,000 b.h.p. tug in full operation. Vessels of up to 650 ft. are able to berth alongside.

BERTHING: Due to limited space no berth can be reserved either alongside or at anchorage. All assistance given to position every ship in best available place.

Mahe Quay (New deep water port) is now in full operation. Two vessels can berth alongside. Berth No. 1 is allocated to oil and cement tankers and Berth No. 2 to cargo and passenger ships. Maximum depth of water at all berths is 35 ft. There are connections for fuel, fresh water and telephones at all berths. Passenger terminal, Port Offices and Customs are situated at the New Port area.

A tanker berth at Seychelles International Airport supplies fuel to the Airport.

STEVEDORES: ETA advice required two to three days before ship's arrival in port. Loading and Discharging: General Cargo: average 8 to 10 t.p.h. per gang (subject weather conditions). Bagged Cargo: average 10 to 15 t.p.h. per gang (subject weather conditions).

TANKERS: Usual safety requirements. Max. length 400 ft. No night discharge at present. Discharge line 6 in.

DENSITY: Average 1025 at all states of tide.

FRESH WATER: In good supply. By mains when alongside and steel barges when at anchor. All water supplied is chlorinated. Two special steel water barges with capacity of 100 and 80 tons each with pumping capacity of 40 t.p.h. per barge. Vessels should request water at least 72 hours before arrival.

FUEL: Marine diesel, viscosity Redwood 42 secs. at 100° F. Gas oil viscosity Redwood 35 secs. at 100° F. Due to limited stock, it is advisable to give one week's notice, preferably through Shell International, London.

GANGWAY/DECK WATCHMEN: Customs Officer on duty at all times if vessel is discharging cargo.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCE: At Custom Officer's discretion.

CARGO GEAR: All cargo slings and gears supplied by ship.

IDENTIFICATION CARDS: See "Shore Leave".

CONSULS: Madagascar, Netherlands, Norway, Sweden, Denmark, Finland and Iceland.

REPAIRS: Only minor repairs to deck: gas welding, pipe bending, etc.

DRY DOCKS: None.

REPATRIATION: Crew changes for British ships and nationalities represented. Repatriations for same by Agents.

AIRPORT: In operation. Several flights weekly.

TIME: GMT plus 4 hours, throughout year.

HOLIDAYS: New Year (1st and 2nd); Good Friday; Corpus Christi (15th August); Labour Day (May 1st); Liberation Day (June 5th); Independence Day (June 29th); Assumption Day (August 15th); All Saints' Day (November 1st); Immaculate Conception (December 8th); Christmas Day (December 25th).

POLICE/AMBULANCE/FIRE: Police 22011; Fire 2555; Ambulance 2555.

A telephone is placed on board ships alongside. Rate as follows: Warships Rs 40/-per day. Other ships Rs 30/-per day.

SERVICES: No tank-cleaning equipment, no facilities for discharge of tank washing, no compass adjusting, radar or radio engineer available for small repairs.

SHORE LEAVE: All members of the crew are allowed ashore. No limit to shore leave. Crew to be in possession of identity card or discharge book.

DELAYS: Berthing: limited berth. Loading or discharging: weather conditions. Bunkering: space alongside.

REFUSE: No refuse to be dumped in the harbour and approaches. When alongside Mahe Quay, adequate bins for garbage collection are available on the quay.

AUTHORITY: Port Department, Ministry of Transport.

NOTES

Sierra Leone

FREETOWN: 08.30 N. 13.14 W (See Plan Book)

DOCUMENTS:

5 Crew Lists.
5 Ports of Call Lists.
5 Passengers in Transit Lists.
5 Passengers Landing Lists.
1 Crew Declaration (signed by Crew members).
1 Store List.
1 Arms Ammunition List.
1 Port Health Declaration.
1 Vaccination List (smallpox, cholera and yellow fever).

Port Health Declaration, Crew Declaration Form and Arms and Ammunition List, all special forms, which obtained from boarding party or, if required, mailed in advance to ship's owners.

1. *For vessels working cargo (discharging):*

(a) From each port of loading, by air mail to vessels Agent: 2 copies of Cargo Manifest, 1 copy of Freighted Manifest.

(b) On arrival: 5 copies of Cargo Manifests, 1 copy each Bill of Lading (non-negotiable).

Note: Customs and Port Authority insists on documents in English, and that Manifests should show weights and measurements. Non-compliance with these instructions places vessel's Agent in difficult position, and vessel may not discharge without payment of fine.

2. *Required by Port & Stevedores for vessels working cargo:* 4 copies Stowage Plan, 4 copies Hatch Lists. List of all lifts over 3 tons.

PILOTAGE: Vessels can enter and leave port anchorage without Pilot. Pilotage only compulsory for vessels berthing alongside Queen Elizabeth 2nd Quay or Kissy Oil Jetty. Upon Master's request, Pilot available at Fairway Buoy with 24 hours notice. Normally only at daylight hours. Port entrance is between Cape Sierra Leone to South and Fairway Buoy to North. Is approx. 1 mile wide and min. draft 36 ft. To West harbour is protected by sand shoals, nearest to entrance is O'Farrell Shoal about 1.5 mile North of Cape Sierra Leone.

Pilots board from a launch painted black, with white superstructure, with letter "P" on each bow.

Aberdeen Signal Station will give an anchorage to every vessel arriving or, if a vessel is berthing on arrival, will advise where the Pilot is boarding. This is normally off the quay. The Signal station is equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication.

The Pilot Office, Queen Elizabeth II Quay, is also equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication. The Port Operations Manager is available on this link.

ANCHORAGE: With Falconbridge Point Beacon bearing as follows (all bearings true): Note: Falconbridge Point Beacon circular steel tower 8 ft. high, painted white with 2 horizontal black bands; Fl. white every 2 seconds.

Anchor Berth	*Bearing (T)*	*Distance (Cables)*

With Cline Point bearings as follows

Anchor Berth	*Bearing (T)*	*Distance (Cables)*
D. 1	232	5.5
D. 2	253	7
D. 3	253	3
D. 4	273	5.5
C. 1	244	4
C. 2	270	5
B. 3	280	7.25

With Kissy Oil Jetty bearing as follows (T):

Anchor Berth	*Bearing (T)*	*Distance (Cables)*
B. 2	235	1 mile

No draft restriction at anchorage, also no length and beam restrictions and vessels can arrive and sail any hour day and night.

RESTRICTIONS: *Draft Limits for Deep Laden Vessels:* (Draft Limits: 38 ft. (11.6 m.) plus height of tide to a maximum of 48 ft. (14.6 m.).

Time Limits:

1. From 5 hours flood tide to high water.
2. From low water to 1 hour Flood Tide.
3. During hours of daylight only.

Vessels of 36 ft. draft and over must keep to the time limits.

Vessels of under 36 ft. draft may navigate the channel at any time but attention is drawn to the strong cross currents.

(H.M.S. Hydra has commented strongly on this danger).

HEALTH: Pratique by radio or on boarding. See "Agents Cable Requirements"

RADIO: *Freetown Radio, Coast Station:*

Watch is maintained on 500 kc/s from 0700–2200 hrs. GMT on week-days, and 1200–1400 hrs. GMT on Sundays and Public Holidays.

The working frequency is 421 kc/s and traffic lists are broadcast on this frequency after preliminary announcements on 500 kc/s at 0730, 0830 hrs., etc.: up to 2130 hrs. GMT. On Sundays and holidays, traffic lists are broadcast at 0800, 1200 hrs. and 1700 hrs. GMT.

Time GMT	*9LL Freq.*	*Search-band for reply*

1530–1700 hrs.		

On Sundays and other holidays the H.F. Schedules are as follows:—

0830–0900 hrs.	8710	8354 to 8374 kc/s
0930–1000 hrs.	13042.5	12531 to 12561 kc/s
1330–1400 hrs.	6411	6 mc/s
1600–1630 hrs.	13042.5	12531 to 12561 kc/s
1700–1730 hrs.	8710	8354 to 8374 kc/s

Traffic lists are broadcast at the commencement of every HF Schedule and repeated at intervals during the Schedule.

Ships Radio telephone and Harbour Service: Watch is kept on 2182 kc/s for casual R/T traffic from 0800–2000 hrs. GMT on weekdays, and 0800–1730 hrs. GMT on Sundays and holidays.

Ships are advised to arrange their calls in advance by W/T where possible so it can be ensured that the called party is available. Calls can be connected to or from any number on the Freetown Telephone Exchange. Longer range contacts should be in the 8 mc/s maritime band, the frequency of 9LL in this band being 8768.9 kc/s.

Other Services: Navigational warnings issued from time to time by the Harbour Master are broadcast on W/T. Spoken telegrams are accepted at ordinary W/T rates on RT.

VHF: *Freetown Radio:*

A 24-hour watch is kept on Channel 16 switching to Channel 26 for communication. Calls can be connected to the Freetown Exchange. Masters are advised the fullest use should be made of this service, particularly after office hours and during the early hours of the morning or late at night when no cable service is available. The Authority tugs are also equipped with VHF, watch being kept on Channel 16 switching to Channel 12 for communication. The same is applicable to the Lighterage service, which keeps watch and communicates on Channel 12.

Signal Station	Channel 16
Pilot Office (Freetown Pilot)	Channel 16
Harbour Master	Channel 16
Operations Manager (OPMAN)	Channel 16

AGENTS CABLE REQUIREMENTS: Masters requested cable ETA as early as possible. Following information required:

(a) For vessels working cargo: 1. Discharge or Loading Hatch distribution. 2. Gangs required. 3. If Explosives on board for Freetown or in transit.

(b) For vessels bunkering: Bunkers and water required.

(c) For Tankers discharging: 1. Total Displacement. 2. Draft. 3. Cargo particulars (quantity and grade).

(d) For vessels embarking/disembarking krooboys: 1. If krooboys provisions required and for how long. 2. Cash requirements. 3. If service on arrival if arriving between 2200 hrs. and 0700 hrs., bearing in mind the high costs for Customs overtime and port service.

(e) In general: 1. Cash requirements. 2. Water requirements. 3. Medical attendance, if required on arrival.

When ETA received and confirmed agent will cable vessel informing despatch prospects and if not berthing on arrival, anchor berth.

Note: For vessels returning to Freetown from round trip to coast, information should be cabled if any over-carried cargo, etc., to be discharged.

TUGS: Two tugs available, *Sewa* (2,200 h.p.) which is sea-going and *Bintimani* (2,200 h.p.). Both are twin-screw with diesel engines and are equipped for salvage having fire-fighting equipment and a 10-ton derrick. Normally 1 tug used for berthing and unberthing operations, but 2 if necessary. Charges for berthing and unberthing include use of 1 tug, whether required or not. Tugs' lines £3.50.

BERTHING: All alongside berths: between hours of 0630 and 2330. Kissy Oil Jetty; vessels of 15,000 tons and upwards, berthing flood-tide only.

Queen Elizabeth II Quay No. 1: Berthing length: no restriction; breadth: no restriction; max. draft 31 ft. 6 in. At this draft vessels must be 180 ft. from steps East end of quay. Vessels up to draft not exceeding 24 ft. may berth as far East as steps. Unberthing not permitted from 1 hour after high water until 1 hour after low water. Pilots may at their discretion, under favourable conditions, extend these times.

Berth No. 1A: As for Berth No. 1, max. draft 31 ft. 06 in.

Berth No. 2: Berthing and unberthing, length and breadth no restrictions. Max. draft 31 ft. 06 in. No tidal restrictions.

Berths No 3 and 4. Max. draft 32 ft. 06 ins.

Berths No. 5 and 6. Max. draft 30 ft.

Temporary draft restriction of 24 ft. at Berth No. 6. Expected to be removed before the end of 1978 when dredging completed.

Facilities for loading Palm Kernel Oil available only at Berth No. 1.

Bulk Grain: No. 1 Berth is equipped for discharging grain in bulk through a conveyor built on No. 1 Shed to the Flour Mill. The actual discharge is effected by mobile vacuvators. Four such units are available with total potential of 80 t.p.h., though a more realistic figure would be in the region of 60–70 t.p.h. Grain vessels are worked around the clock.

Pilotage also undertaken to and from Kissy Cold Store Jetty, a private jetty, but pilotage not compulsory.

King Tom Jetty: Berthing *not* allowed.

Kissy Cold Store Jetty: Berthing and unberthing in daylight hours only, restricted as follows: Length of vessel 290 ft. Breadth, no restriction. Max. draft, 14 ft. 06 in. Favourable weather conditions. Berthing Port side alongside Pontoon/lighter; Starboard anchor to be used. Berthing: 30 mins. to H.W. Unberthing: 1 hour after H.W. Tug must be used for both operations.

Dispensation will only be granted in exceptional circumstances to berth or unberth vessels before 0600 hrs. and after 2330 hrs.

During discharging and/or loading, Customs Officers, normally 2, as well as 2 Port Authority Discrepancy Clerks (only when discharging) will be on board. In accordance with regulations same should be provided with food during normal meal hours. Recommended that vessels provide food in order not to encounter unnecessary delays.

Sherbro River: Anchorage daylight only. Length of vessel up to 470 ft. Breadth, no restrictions. Max. draft, 24 ft. 06 in. The passage between No. 1 Buoy and No. 8 Buoy and between No. 1 Buoy and Yangsai anchorage must be navigated in daylight hours only.

The Channel between Buoy Point and Yangsai must be navigated only during period 2 hours to H.W., and on a rising tide, buoy point being area which restricts draft. Bagru River Anchorage Buoy 8, length and breadth unlimited. Max. draft 24 ft. 06 in. Limitations as regards vessel's dimensions, drafts and times at which movements may be carried out should not be deviated from without prior permission of the Harbour Master.

MECHANICAL EQUIPMENT:

Type	*Capacity*	*Complement*
Portal Quay Crane	3 tons	2
Portal Quay Crane	5 tons	1
Mobile Crane	15/30 tons	1
Mobile Crane	3 tons	2
Mobile Crane	4 tons	9
Mobile Crane	5 tons	1
Mobile Crane	7 tons	2
Fork Trucks	10 tons	3
Fork trucks	4,000/5,000 lbs.	34
Tractors	—	11
Trailers	6 tons	12
Trailers	8 tons	1
Trailers	10 tons	16
Trailers	20 tons	18
Trailers (Pole)	10 tons	4
Landrover Fire Engine	—	2
Lancer Boss Fork Lift Truck (Contaner Handler)	26 tons	1

Berths 3 to 6 are not equipped with Portal Cranes.

DANGEROUS CARGO: Dangerous cargo, explosives, small arms, ammunition, *must not* be unloaded either alongside or into lighters unless Port Authority has been notified on approved form, and has given permission for cargo to be discharged. Vessels should cable prior arrival if dangerous cargo for discharge on board.

LIGHTERAGE: Lighterage operations have now virtually ceased to exist. 1 covered lighter of 100 d.w.t. 5,000 bale capacity is available if required.

A specially fitted pontoon (PM2) is also available for the disembarkation/embarkation of Kroo labour for vessels at anchorage. This service is available throughout the day and night, as is the water supply by barge.

STEVEDORES: (See "Agents Cable Requirements") ETA as soon as possible. Discharge/loading hatch distribution. Gangs required. Bunkers and water requirements information re explosives. For tankers discharging — total displacement and draft. Work ashore undertaken by Sierra Leone Ports Authority on cargo quay, Queen Elizabeth II Quay, whilst work on board as well as discharging and/or loading to or from lighters at stream undertaken by Sierra Leone National Shipping Co., stevedoring division.

Working hours alongside quay: Normal working hours from 0800 to 1200 hrs., from 1300 to 1700 hrs., Saturdays: from 0800 to 1200 hrs.

No meal-break but the hour 1200 to 1330 hrs. counts overtime.

Working at Stream: Discharging and/or loading to or from lighters effected 24 hours a day. Gangs can be arranged at anytime between 0730 hrs. and 1800 hrs. week-days. On Sundays and holidays work must be arranged on the previous day.

MEDICAL: Hospital facilities available.

TANKERS: No special requirements. 2 berths, max. length 600 ft. (may be extended by arrangement with Pilot). Max. draft 32 ft.

Berth 6: There is a draft restriction of 24 ft. See "Berthing". Crude Oil tankers at this draft discharging through the temporary facilities must berth on the first of the ebb tide (Starboard side alongside). Other ships at this draft must berth from 1 hour prior to H.W. to H.W. slack (either side alongside).

Kissy Oil Jetty: The following Rules and Regulations on Berthing and Unberthing are now in force. No deviation under any circumstances from these is permitted.

Mooring Buoys: Berthing and Unberthing are restricted as follows:— Vessels are to moor to head, stern and starboard quarter mooring buoys off Kissy Oil Jetty. Vessels anchor to be used. Vessels are only allowed to berth/unberth beginning of Flood Tide in favourable weather conditions between hours of Sunrise and Sunset. Pilots are to ensure that a Berthing or Unberthing operation must be completed before darkness. No Unberthing during hours of Darkness or Ebb Tide.

Distance between Head (West) and Stern (East) buoys 1,100 ft. Length of vessel to within this limit allowing safety factor for length of mooring ropes to Head and Stern buoys. Breadth no restriction. Max. draft 32 ft. Mooring restricted to vessels up to and not more than 27,000 tons displacement.

Under no circumstances are vessels allowed to rest against any part of Kissy Oil Jetty centre section or East and West Dolphins.

Moorings from vessel to Shore Bollards can be used to position vessel as close to Kissy Oil Jetty as possible. No moorings are to be used on any part of Kissy Oil Jetty.

Also see "Developments".

DENSITY: 1018 to 1025.

FRESH WATER: Good fresh water is available at all quay berths and at Kissy Oil Jetty. There are also 3 water barges with a total capacity of approximately 400 tons.

(Supply Rates:—	Old berths	Approx: 20/25 t.p.h.
Dependent on	New berths	Approx: 40/50 t.p.h.
Ships intake)	Kissy Oil Jetty	Approx: 15/20 t.p.h.
	Barges	Approx: 25/30 t.p.h.

FUEL: A 24 hour Shell/Mobil bunkering service is available at all berths. The supply rate is up to 200 t.p.h. dependent on ships intake.

The supply rate at Kissy Oil Jetty is 100 t.p.h. Thin fuel oil is not available at the latter jetty but is obtainable at Queen Elizabeth II Quay.

A limited supply of Gas Oil (Shell) is available ex-bowsers on the Quay berths. Sufficient notice should be given to the Oil Company for this service.

Texaco/BP supply bunkers to vessels at anchorage with 3 barges of 750 tons capacity each supply rate 200 t.p.h. 1 of their tugs also has a storage capacity of 40 tons.

A 24-hour Pilotage service is available (including Pilotage from the Fairway Buoy if requested) for all vessels requiring bunkers only.

GANGWAY/DECK WATCHMEN: Strongly recommended, available through Agent.

OPENING/CLOSING HATCHES: By stevedores, except mechanical hatches.

CERTIFICATES:

Ship's Register.

Deratisation Certificate.

Deck Passengers Certificate.

Radio Certificate.

CUSTOMS ALLOWANCE: Tobacco, 40 cigarettes *or* 0.25 lb tobacco. Wine and/or Spirits, 0.25 bottle of spirits. Master — 200 cigarettes and one opened bottle of spirit.

IDENTIFICATION CARDS: Not required.

CONSULS:

REPAIRS: All repairs if spares supplied.

DRY DOCKS: No dry docks in Freetown. Slipway of 600 tons capacity.

REPATRIATION: Can be arranged.

AIRPORT: By bus and ferry to Lungi Airport, 1 hour journey. Served by regular airlines.

TIME: GMT throughout year.

HOLIDAYS: Several religious and anniversary holidays. Port works every day except Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: For all emergencies dial 009.

TELEPHONES: Not available for placing on board.

GENERAL: Always confirm time of entering harbour with the Aberdeen Hill Signal Station to ensure turn for berthing. Draft should be indicated.

SERVICES: Tank cleaning. Tank and hull scaling.

SHORE LEAVE: Allowed. Identity cards must be carried.

DELAYS: Berthing, loading or discharging — up to 1 day. Bunkering — up to 12 hours.
DEVELOPMENTS: A new oil jetty at Kissy may be in operation during latter half of 1979. Any rules and regulations for the new jetty will be promulgated in due course. When the oil jetty is completed the temporary oil lines to Berth No. 6 will be removed.

It is the Port Authorities intention to surface the front and rear stacking areas at Berth Nos. 5 and 6 for use as a container park.
AUTHORITY: Sierra Leone Ports Authority. Managers: Waportman International Ltd.

PEPEL: 08.34 N. 13.04 W.

IMPORTANT: SEE "AUTHORITY".
LOCATION: On Sierra Leone River, 15 miles upstream from Freetown. Approach Channel between Freetown anchorage and Pepel is fully buoyed. No night navigation.
DOCUMENTS: See "Freetown".
PILOTAGE: Private pilotage undertaken by mining Company's Pilots who board Freetown anchorage, 48 hours ETA required, cable "Mags Freetown Sierra Leone", giving ETA Fairway buoy, quantity water/fuel required, asking free pratique, and if Pilot required to Freetown anchorage.
ANCHORAGE: See "Freetown".
RESTRICTIONS: Draft only, decided at discretion of berthing master. Entry daylight hours only. Channel between Pepel and Freetown is now deepened so that depth in channel is 38 ft. plus height of tide. According official tide tables, range of high tides is approximately 7 ft. to 11 ft. above Admiralty Chart Datum.
MAX. SIZE: Length 840 ft., beam 128 ft., depth water 38 ft. plus height of tide which ranges from 7 to 11 ft. above Chart Datum. September to December additional draft restrictions due channel silting.
HEALTH: See "Freetown". 48 hours advance warning for free pratique.
TUGS: Not used.
BERTHING: Milton Margai Pier only. Loading up to 3,000 t.p.h. according to size of vessel.

New dolphin mooring system installed to permit handling larger ships. Depth alongside 45 ft.

Shiploader max. boom height when in horizontal position is 71 ft. above Chart Datum, with max. outreach 87 ft. from berthing line. Loading rate now increased to 4,000 t.p.h.

Under the new conditions, limiting dimensions for ships (which must be equipped with satisfactory mooring equipment): Length overall 840 ft. Moulded breadth 128 ft.

Allowance must be made for safe navigation, permissible sailing draft of all ships will, as at present, remain absolutely at discretion of Berthing Master at Pepel or his deputy. It is possible that yearly during the months of September to December an additional draft allowance will have to be imposed by reason of seasonal silting of the channel, but it is intended to carry out annual maintenance dredging.

Company will be prepared to consider acceptance of ships having dimensions in excess to those above but only after specific approval of fully detailed plans of each ship concerned and, in any event, not in excess of dimensions Length overall 870 ft. Moulded breadth 136 ft. Moulded depth 73 ft.

Berthing displacement 63,000 tons on an even keel ballast draft of 23 ft. forward and aft on berthing.
STEVEDORES: Available.
FRESH WATER: Available, 48 hours notice required.
FUEL: Limited supplies available, 48 hours notice required.
GENERAL: See "Freetown" for all general information.
TIME: GMT throughout year.
TELEPHONES: None available.
SHORE LEAVE: Not allowed. Customs and Immigration regulations prohibit any member of crew from disembarking at jetty or other works.
DELAYS: First come first served.
AUTHORITY: The Sierra Leone Development Company Limited (In Liquidation), P.O. Box 491, Freetown, Republic of Sierra Leone. Telephone Freetown 24139.

(The Sierra Leone Development Co., Ltd. went into voluntary liquidation on the 31st October, 1975. A Care and Maintenance Party is stationed at the Port of Pepel maintaining the shiploading plant in operational condition).

At the time of liquidation, the conditions above existed.

NOTES

Please also advise Shipping Guides Ltd.

SINGAPORE (incl. Jurong, Pulau Bukom, Pulau Ayer Chawan, Sembawang and Tanjong Penjuru): 01.16 N. 103.50 E. (See Plan Book)

DOCUMENTS:

6 Ship's Passenger Lists.
5 Crew Lists.
5 Cargo Manifests.

Customs Declaration of duty free liquor and tobacco Form (C and E 117) to be furnished by Master to Customs boarding officers. Master, mate, or authorised officer required to furnish information asked for by Officer i/c of Customs Boarding Party for Boarding Officer's Report (this only required if ship is to be searched).

Immigration: 4 copies Crew List and 2 copies each of Disembarking and Through-passenger Lists on arrival. At departure, 2 copies Crew List and 2 copies Passenger List.

Declaration regarding presence on board of any stowaway, unauthorised person and/or repatriate.

PSA: All vessels: General Declaration on arrival or departure.

Port Health: Entry Declaration. Deratisation or Exemption Certificate. Vaccination Certificate requirements. Smallpox: from all countries, except children under 1 year of age if they arrive from a non-infected area or under 6 months of age if they arrive from an infected area.

Crew Lists. Passenger List.

PSA (The Port of Singapore Authority): Arms and Explosives, and Dangerous Goods and Petroleum Declaration.

TRAFFIC LANES:

Inwards only

1. *The Sisters Fairway* is the navigable water bounded by the line drawn from Selegi Beacon (Terembu Selegi) to the Northern extremity of Pulau Tekukor, thence from the Southern extremity of Pulau Tekukor to the Northern extremity of West St. John's Island to position Lat. 01° 12′ 33″ N., Long. 103° 50′ 30″ E., thence to Selegi Beacon (Terembu Selegi).

2. *The Middle Channel* is the navigable water bounded by the line drawn from the charted position of Sisters Buoy to position Lat. 01° 12′ 09″ N., Long. 103° 49′ 19″ E., thence to position Lat. 01° 12′ 16″ N., Long. 103° 49′ 41″ E., thence to position Lat. 01° 13′ 09″ N., Long. 103° 48′ 41″ E., thence to the charted position of Sisters Buoy (Lat. 01° 13′ 02″ N. Long 103° 48′ 04″ E.).

Outwards only

3. *The Jong Fairway* is the navigable water bounded by the line drawn from the charted position of Sisters Buoy to position Lat. 01° 12′ 09″ N., Long. 103° 49′ 19″ E., thence to Sebarok Beacon, thence to Pulau Jong Triangulation Station, thence to the charted position of Sisters Buoy. Only those vessels which are inward bound and owing to their draft and other considerations preclude the safe use of the above mentioned *inward channels* may use the Jong Fairway.

Eastbound and Westbound

4. *The Southern Fairway* is the navigable water bounded by the lines drawn from Sebarok Beacon to the Southern extremity of West St. John's Island, thence to Temborkul Beacon, thence with Seringal Beacon in transit witth Peak Island Light Beacon to the Southern port limit, thence Westwards along the port limit until Sebarok Beacon bears 313°, thence along that line to Sebarok Beacon. The Southern Fairway is to be considered sub-divided by a median line extending from the Western limit to the Eastern limit of the fairway.

The Southern Fairway is designated for the passage of vessels as follows:

(a) Vessels from sea East/Eastern sector of the port proceeding to the Western sector to keep Northwards of the median line:
(b) Vessels from the Western sector of the port bound for the Eastern sector to keep Southwards of the median line;
(c) Vessels from the Western sector of the port bound for the sea East to keep Southwards of the median line and to proceed beyond the Easternmost limit of the Southern Fairway. Vessels after having proceeded beyond the Easternmost limits of this Fairway shall enter Main Straits only when it is safe and practicable to do so.

Vessels proceeding from/to the following areas need not follow the Southern Fairway but may proceed as stated:

(a) Vessels from sea Westbound for the Western sector of the port via the Middle Channel or Sisters Channel may cross the Southern Fairway when it is safe and practicable to do so.
(b) Vessels from the Western sector of the port bound for sea West may cross the Southern Fairway and on reaching the port limit enter the Main Straits when it is safe and practicable to do so.

PILOTAGE: Compulsory in Keppel Harbour, including East Lagoon, the Western sector and Sembawang from Johore Shoal Buoy to the Causeway. Request for Pilot must be made not less than 6 hours before arrival. Confirmations of arrival and amendment of ETA must be further notified to "Singapore Port Operations" not less than 2 hours before arrival. Telegraphic Address: PORTMASTER SINGAPORE. VHF Singapore Port Operations Channel 20 or 12.

Pilot Boarding and Disembarkation Grounds:

(a) *Eastern Boarding Ground:* 2.5 miles East of Sekijang Beacon (St. John's Island Lighthouse).

(b) *Western Boarding Ground:* 1 mile S.W. of Sultan Shoal Lighthouse;

(c) *Southern Boarding Ground:* 1 mile S.W. of Sebarok Beacon (used only by special arrangement); and

(d) *East Johore Straits Boarding Ground:* S.E. of Johore Shoal Buoy in position 01° 18′ 00″ N., 104° 05′ 30″ E.

ANCHORAGES: Masters are required to notify "Singapore Port Operations" on Channel 12, their final anchoring positions giving bearings and distances from the following positions: Fullerton Lighthouse (Eastern sector), Tg Rimau Light (Rimau Beacon) – (Western sector), Sultan Shoal Lighthouse – West Jurong Anchorage. Ships changing their location within port limits are also required to report their new positions. Ships leaving should report their departure time prior to leaving.

Orders for Pilots will be declined to vessels in the anchorages which have not reported their positions.

USE OF ANCHORAGES FOR VESSELS ARRIVING FROM EAST AND WEST:

1. Vessels arriving from the East and requiring Health and/or Immigration Clearance must make use of the Eastern Immigration/Quarantine Anchorage.
2. Vessels arriving from the West and requiring Health and/or Immigration Clearance must make use of the Sultan Shoal Immigration/Quarantine Anchorage.
3. After Immigration/Quarantine Clearance, vessels arriving from the East are to make use of the appropriate Eastern Anchorage and vessels arriving from the West are to make use of the appropriate Western Anchorage.
4. Vessels that do not require to be cleared at the Immigration/Quarantine Anchorages (i.e. Radio Provisional Pratique/Advance Immigration Clearance) and require to proceed to an Anchorage/Berth, shall on arrival, proceed directly to the appropriate Eastern Anchorage if they arrive from the East or to the appropriate Western Anchorage if they arrive from the West.

N.E. Monsoon (Approximately December to March).

5. The use of the Eastern Immigration/Anchorage will cease.
6. Vessels arriving from the East are to make use of the Western Immigration/Quarantine Anchorage.
7. Vessels arriving from the West are to make use of the Sultan Shoal Immigration/Quarantine Anchorage.
8. After Immigration/Quarantine Clearance:—
   (a) Vessels have the option to work cargo in the Eastern or Western Anchorages.
   (b) The Western Working Anchorage is reserved exclusively for vessels working cargo or waiting to go alongside within 24 hours of arrival.
   (c) All other vessels not working cargo must proceed to their proper anchorage in the Eastern Anchorages.
9. Owners/Agents of vessels who are unable to comply with the requirements stated above due to draft and length restrictions or any other constraints are requested to refer to Port Operations for an alternative Anchorage for their vessels.

MAX. SIZE: Length, no restrictions. Breadth, no restrictions. Draft, Keppel Harbour 33 ft. at zero tide; Empire Dock 28 ft. at zero tide; Jurong Wharves being dredged to 38 ft. at zero tide.

Oil Installations: see "Tankers".

CLEARANCE: The Master of any vessel entering Singapore may apply for radio pratique to the Port Health Office through his local Agent, not less than 12 hours or more than 24 hours prior to arrival in Singapore (exceptions allowed).

All applications should be accompanied by answers to the Port Health Questionnaire.

Free Radio Pratique will not be granted in the following cases:

(a) Vessels with a case or suspected case of infectious disease on board.
(b) Vessels with a dead body on board.
(c) Vessel which has visited plague-infected ports during the current voyage.
(d) Passenger vessels, other than those approved by Public Health Officer.

The provisional pratique by radio is a quarantine clearance by the Port Health Officer on duty. The clearance permits a vessel to proceed directly to berths or working anchorages and begin normal business activities without the inspection of the Port Health Officer.

The granting of radio pratique clears the vessel only as far as the Port Health Officer is concerned, and it neither exempts the vessel from the requirements of other government agencies prior to commencing operations, nor a vessel from quarantine inspection and other control measures, subsequently deemed necessary by the Port Health Officer.

Vessels wishing to communicate with the Port Health Officer should do so on VHF Channel 14.

All ships other than gazetted mail ships, arriving within 5 days of departure from a smallpox infected port, or from a plague infected territory, should await health clearance at Quarantine Anchorage displaying appropriate signals.

All ships with suspected infectious disease on board should radio information to Port Health Officer and await clearance at Quarantine Anchorages. All vessels from infected ports upon arrival are required to anchor in Eastern Quarantine Anchorage or Sultan Shoal Quarantine Anchorage, where appropriate (alternatively Western Quarantine Anchorage during the N.E. monsoon, approx. December to March), unless Health and Immigration exemption have previously been granted. Vessels from non-infected ports can obtain free pratique. Vessels from infected ports must fly "Q" flag for Port Health. Vessels must also fly pennants 2 over 5 (alternatively 3 over 4 when there are passengers aboard) for immigration.

Corresponding night lights red over white for Port Health and 2 green for Immigration. Once vessel has been cleared by Port Health and/or Immigration she must proceed to appropriate berth/anchorage. On sailing, unless exemption granted, vessels must return to Principal Anchorage for Immigration Clearance; 2 hours notice required of departure.

The Port Master, Port of Singapore Authority has issued the following regulations regarding vessels requesting Immigration and Port Health Clearance:

(1) All Masters, Owners and Agents are reminded that vessels when requesting Immigration and Port Health Clearance must anchor in the designated Immigration and Quarantine Anchorage and exhibit the appropriate signals.

(2) The Senior Health Officer has advised that delays have occurred due to ships not anchoringg at the designated anchorage or not displaying quarantine signals.

(3) Failure to comply with the above may result in action being taken against the vessels.

RADIO: Medium range (HF) telephone service is available continuously and normally provides satisfactory communication up to a range of about 800 miles. Ships wishing to contact Singapore radio may do so on any of the following carrier frequencies:

Station	*Call sign*	*Frequency kHz Coast*	*Frequency kHz Ship*	*Hours*	*Remarks*
Singapore Radio	9VG4	2182	2182	24	Call, reply and Safety
	9VG40	4434.9	4136.9		
	9VG8	6204	6204		
	9VG5	2760	2527	24	Working
	9VG38	4364.7	4066.1		
	9VG43	8751.2	8217.2		

After establishing contact, the call will be booked and both stations will change to one of the following Frequencies prior to connection with the Subscriber:

Station	*Call sign*	*Frequency kHz Coast*	*Frequency kHz Ship*
Singapore Radio	9VG39	4377.4	4078.8
	9VG44	8757.6	8223.6
	9VG45	8799.2	8265.2

Public Correspondence	24	26	For connection to Singapore Telephone Exchange
Public Correspondence	24	28	For connection to Singapore Telephone Exchange

TUGS: PSA operates 13 tugs – 3 of 3,000 b.h.p., 3 of 1,000 b.h.p., 2 of 1,200 b.h.p., 4 of 2,500 b.h.p. and 1 of 650 b.h.p. Shell operates 2 tugs approximately 1,500 b.h.p. A number of privately owned salvage tugs make the port their base.

Tugs join anywhere in port limits by pre-arrangement with Pilots. Normally ship's line used. All PSA and Shell tugs carry tow ropes for use if required. PSA charge for use of tow rope.

BERTHING: Vessel's Agents should submit to Authority a Schedule "A" (Application for Berth) giving overall length, maximum draft alongside, ETA and ETD of, and Schedule "B" listing out dangerous cargo on board vessel at least 48 hours before berth required.

CARGO HANDLING FACILITIES: *Keppel Wharves:* Vessels working only general cargo will normally be berthed at the Keppel Wharves. This is the largest of the six gateways of Port of Singapore Authority, having marginal wharves of 4.8 km. that are capable of accommodating 30 vessels at one time. There are well-ventilated transit sheds and warehouses totalling 158,472 sq.m., and 83,336 sq.m. of concrete hardstanding for open storage.

Container Terminal: Length of 5 main berths 1,554 m., depth 13.4 m. at zero tide. Able to handle 5 third-generation vessels at one time. 10 container quay cranes of 35 tonnes lifting capacity available. Feeder berth length 213 m., draft 9.16 m. for coastal vessels and a cross berth of length 213 m., draft 10.4 m. There are also three freight stations covering an area of 22,100 sq.m. for consolidation and unstuffing of containers. The stacking yard of approximately 14 hectares can accommodate 14,000 containers (20 ft. equivalents) stacked 2 to 5 high.

Bunkering facilities available. Bunker fuel pumped at the rate of 1,000 tonnes per hour through 18 in. (4.6 dm.) diameter mains. There are 11 outlets along the quay with 10 in. (2.5 dm.) tap-offs. Marine diesel and fresh water also available.

Sembawang Wharves: The Port of Singapore Authority operates 5 berths, at the Sembawang Wharves, situated North of Singapore. The length of the berths totals 807.72 m. with minimum depth of 10.4 m. at zero tide covered storage space available totals 51,100 sq.m. It is geared towards handling of low-value, high volume homogeneous cargoes like bulk sawn timber and logs.

Jurong Port: The Port is a bulk-handling facility to serve the Jurong Industrial Estate. The marginal wharves of 1,792 m. with draft 10.92 m. can accommodate 10 ocean going vessels. In addition, there is a 172 m. wharf with minimum depth of 3.1 m. for coastal shipping. There are 75,723 sq.m. of covered storage and 226,568 sq.m. of open storage space.

The terminal has facilities for the discharge of grain (by elevator), sugar, fertilizers, cement, clinker, sulphur, etc. Shore bulk-handling cranes are used.

The equipment includes a kangaroo crane conveyor, unloading capacity of 304 tonnes per hour.

Two gantry type unloader cranes each with capacity of 457 tonnes per hour.

An iron ore hopper/conveyor loading system with a capacity of 304 tonnes per hour.

Grain silos with capacities up to 20,320 tonnes (20,000 tons).

Bulk grain suction – conveyor unloading system with discharge rate of 203 tonnes per hour and loading rate of 101 tonnes per hour.

Pasir Panjang Wharves: 1,361 m. of wharves with minimum depth of 2.3 m. – 6.4 m. which can accommodate 21 lighters, 6 LASH (Lighters-Aboard Ship) barges, and 7 coastal vessels at any one time. There are 4 large modern transit sheds covering 38,000 sq.m., 1 back up shed 22,296 sq. m., 7 warehouses 1,120,401 sq. m. (of these 48,000 sq. m. are outside the free trade zone) and some 240,000 sq.m. of covered storage space.

Telok Ayer Wharves: This gateway caters for coastal vessels and lighters/barges. There is a total of 744 m. of wharves for lighters and coastal vessels. With land reclamation carrying on at this place, 5 new berths can accommodate vessels with a draft of up to 6.4 m.

STEVEDORES: Labour should be ordered by 0900 hrs. for 2nd shift (1500 to 2300 hrs.) on same day and by 1300 hrs. for 1st shift (0700 to 1500 hrs.) for next day, by 1100 hrs. for 3rd shift (2300 to 0500 hrs.) on same day.

No work is performed during meal hours, 1100–1200 hrs. and 1830–1930 hrs.

MEDICAL: When infectious disease not suspected, permission will be granted by Port Health Officer to Agent to take doctor on board and remove the case, if necessary, to hospital. Preferably as much notice as possible. Several hospitals, General hospital, Gleneagles, Mt. Alvernia to name a few. Cholera, smallpox, plague, etc., are not endemic in Singapore.

FIRE PRECAUTIONS: Normal precautions with respect to cargo vessels, vessels under repair, etc. Fire boats available. Oil companies apply own regulations at installations.

GANGWAY/DECK WATCHMEN: Recommended, particularly in Roads. Agents normally arrange. Cost varies.

OPENING/CLOSING HATCHES: Conventional hatches by stevedores. Mechanical hatches usually by ship's crew.

CERTIFICATES: If dangerous drugs on board, an export authorisation from country of origin and an import authorisation from country to which drugs being conveyed should be available for sighting and endorsement.

All vessels	Certificate of Registry or Tonnage Certificate. International Load-line Certificate or equivalent.
Passenger ships	Passenger Safety Certificate issued under international Convention for Safety of Life at Sea 1960 or the Simia Rules 1931.
Cargo ships	Safety Equipment Certificate (if over 500 tons gross) or equivalent. Radiotelegraphy Certificate or Radiotelephony Certificate whichever is applicable.

CUSTOMS ALLOWANCE: Tobacco: for crew and transit adult passengers. First day of arrival 50 cigarettes or 15 cigars or other tobacco 60 gms.; and for each subsequent day to the maximum of 7 days. 25 cigarettes or 7 cigars or other tobacco 30 gms.

Wines: 1 bottle per day to maximum of 8 days. Spirits: 0.875 reputed quart (in opened bottles) on first day of arrival and 0.125

reputed quart per day for rest of 7 days. Malt liquors: 1 bottle (beer, stout, etc.).

CARGO GEAR: Possession of valid test certificates. At PSA wharves, if gear appears faulty, an inspection by competent Port Officer may be required.

TANKERS: Bunkering and discharge facilities available at Eastern and Western petroleum anchorages or installations at Pulau Bukom. Pulau Ayer Chawan, Tanjong Penjuru, Tanjong Berlayer, Jurong and Pulau Merlimau.

PSA operates a Slop and Reception Treatment Centre at Pulau Sebarok with facilities for the discharge of slops from crude oil, black oil, white oil, tank cleaning and ballast water.

Smoking not permitted during period tanker alongside PSA wharves. Grades permitted for discharge along PSA wharves: (a) marine diesel oil, (b) fuel oil.

Shell

Pulau Bukom – 10 berths and conventional buoy mooring.

Berth	*Draft* (m.)	*Max. length* (m.)	*Max. displacement* (tons)	*Remarks*
1	9.75	173.7	33,000	Continuous Jetty
2	9.75	91.4	33,000	
3	10.95	82.3	33,000	
4	12.19	189.0	43,000	
5	12.50	193.6	45,000	
6	14.63	243.8	92,000	
7	12.34	185.9	65,000	
8	12.95	230.1	65,000	
9	13.10	198.1	33,000	
10	15.54	265.0	84,000	Min. length acceptable 172.2 m.
SBM	22.36	—	352,990	

Esso

Refinery on an island Pulau Ayer Chawan 2.4 km. South of Jurong Industrial Complex. Refining capacity of 231,000 barrels per day. Lubricant plant 5,000 barrels per day. The jetty has an overall length of 982.1 m. and consists of 4 loading and bunkering berths.

Berth 1	length 82.4 m.	draft 7.6 m.
Berth 2	length 189.1 m.	draft 10.7 m.
Berth 3	length 225.7 m.	draft 12.8 m.
Berth 4	length 250.1 m.	draft 15.9 m.

Caltex

Operates berths (No. 1 and No. 2) at Tanjong Penjuru which can accommodate vessels alongside up to 133.71 m. max. draft. No. 1 Berth (4 breasting dolphins) capable of handling vessels of any size. No. 2 Berth (4 breasting dolphins) can handle any vessels exceeding 91.4 m. flat sides, up to 32,000 tons displacement and length not exceeding 182.8 m.

Mobil

Provides 4 berths 713 m. long for vessels up to 85,000 d.w.t.

Berth 1	14.3 m. LWOST
Berth 2	12.8 m. LWOST
Berth 3	6.7 m. LWOST
Berth 4	6.1 m. LWOST

B.P. Refinery

Refinery with 3 berths situated at Pasir Panjang. Small jetty inside harbour known as Jetty No. 2 can receive small vessels up to 1,000 tonnes as water depth only 6.1 m. below ACD.

No. 1 Jetty at S.W. side of Tanjong Berlayer can accommodate vessels up to 33,000 tons at off-shore mooring where dredged channel 10.97 m. below ACD. Berthing cannot be effected for 43 days of year due strong tidal currents.

At Jetty No. 1A which is Northwards extension from Jetty No. 1 trunkway, vessels up to 5,000 tonnes can be berthed; water depth 7.62 m. below ACD. Simultaneous mooring of vessels at Jetties No. 1 and 1A not allowed as floating hose used to connect Jetty No. 1 to ship at mooring buoys.

Singapore Petroleum

Provides 3 berths for bunkering and other services on Pulau Merlimau, an island off the S.W. coast of Singapore. The marine berth can accommodate vessels up to 90,000 d.w.t. and 15.5 m. draft, refining capacity 65,000 barrels per day.

Gatx Terminals: Vessels berth at marine trestle 1,400 ft. (427 m.) offshore. One berth for vessels up to 85,000 d.w.t. and 1 for vessels of 5,000 d.w.t. 32 operating pipe-lines serve the main berth. The terminal handles chemical, petrochemical and vegetable oils. Total capacity 287,910 barrels in 55 tanks.

Docklines 2× 75 mm. dia.
1×100 mm. dia.
26×150 mm. dia.
3×200 mm. dia.

DENSITY: Usually between 1019 and 1022 unaffected by tide or temperature variations. Variation due to periodic heavy run-off of rain water.

FRESH WATER: Fresh water available at any point of PSA's wharves. PSA also has a fleet of 10 waterboats to supply fresh water to ships anchored within the port limits.

FUEL: All grades available alongside PSA wharves and ex installation, otherwise by barge. Marine diesel oil 40 sec. to 100 sec. Heavy fuel oil 700 sec. to 1,000 sec. Thinned fuel 433 sec. to 450 sec. Blended fuel 200 sec. to 430 sec.

IDENTIFICATION CARDS: Sect. 22 (1) (c) of Ordinance provides for issue of Seamen's Identification Card as set out in First Schedule to the Immigration Regs. 1966, but rarely issued nowadays. Normally accept passports, discharge books or any identification cards issued by Masters of vessels for purpose of granting shore leave to Crew members, provided these documents sufficiently identify person concerned

Gate Passes issued against crew list at wharves and installations. No passes required from roads, although some form of identification advisable.

CONSULS: Consuls, Embassies and High Commissions. Arab Republic of Egypt, Argentina, Australia, Austria, Bangladesh, Belgium, Brazil, Bulgaria, Burma, Canada, Czechoslovakia, Denmark, El Salvador, Finland, France, Democratic Republic of Germany, Federal Republic of Germany, Great Britain, Greece, Hungary, India, Indonesia, Iran, Ireland, Israel, Italy, Japan, Democratic People's Republic of Korea, Republic of Korea, Malaysia, Nepal, Netherlands, New Zealand, Norway, Pakistan, Philippines, Poland, Romania, Spain, Sri Lanka, Sweden, Switzerland, Thailand, Trinidad and Tobago, Turkey, Union of Soviet Socialist Republic, USA, Yugoslavia.

REPAIRS: All types of repairs (hull, engine and electrical including navigational aids) carried out. Facilities also available for repairs out afloat while vessel in anchorages.

DRY DOCKS: Several shipyards offering building, repairing and engineering facilities, for example:

Jurong: 2 dry docks: No. 1, length 270 m.; breadth, 40 m.; capacity 90,000 tons d.w.t. No. 2 length 350 m.; breadth 56 m.; capacity 300,000 tons d.w.t. 1 floating dock length 86 m.; breadth 18 m.; lifting capacities 2,000 tons.

Keppel Shipyard: 7 dry docks, the largest of which (301 m.×52 m×10.1 m. depth) can accommodate vessels up to 120,000 d.w.t.

Sembawang Shipyard: 400,000 d.w.t. super graving dock, 100,000 d.w.t. graving dock, 4 floating docks from 5,000 d.w.t. to 30,000 d.w.t. capacities. 1,330 m. of repair berth with 12 m. of water.

REPATRIATION: Ships' Agents responsible for repatriating seamen. Mercantile Marine Office undertakes repatriation of distressed British seamen on behalf of Board of Trade, United Kingdom, whenever necessary. Seamen who hold proper documents which ensure entry into their countries of origin, citizenship and destination are normally granted Special Passes after discharge for purpose of repatriation.

AIRPORT: 11.2 km. from city. Regular and frequent services to all parts of the world.

TIME: Singapore time, GMT plus 7.5 hours. No seasonal change.

HOLIDAYS: Work can be arranged on all 11 Public Holidays. New Year's Day; Chinese New Year; Hari Raya Haji; Good Friday; Labour Day (1st May); Vesak Day; National Day (9th August); Deepavali; Hari Raya Puasa; Christmas Day.

POLICE/AMBULANCE/FIRE: City Police 999; Fire/Ambulance only, 328111; Flag signal: CB3. VHF Channels 12 or 16. PSA Police 2712211 ext. 2222; Fire ext. 2209 or ext. 2333; Ambulance 2712211.

Police assistance at anchorage:

For your information we quote the contents of Port Circular No. 28/73 issued by the Port of Singapore Authority:

(1) In circumstances arising on board ships at anchor within port limits which require the assistance of Marine Police, ships suitably equipped with VHF radio-telephony in the 156-174 mHz frequency band are to communicate this requirement on Channel 21 to "Marine Police" which maintains a continuous listening watch.

(2) In order to facilitate and arrange for police assistance to the ship, the following information shall be transmitted by the ship when radio contact has been established on Channel 12:
(a) Name of ship.
(b) Location (from a reference point).
(c) Brief description of incident.

(3) The ship making this request for police assistance shall also as soon as possible hoist up the appropriate flag signals by day and light signals by night. Day signal: International Code Hoist "CB3". Night signal: Red-Red-White (Red at top).

(4) The ship is required to sound on her whistle or siren at intervals of about 1 minute 3 long blasts so that the police on patrol duties and other ships in the vicinity are alerted.

(5) Adherence to the procedures described in the above will enable assistance being given to the ships in the quickest possible manner.

TELEPHONES: Available on board vessel at PSA wharves only.

GENERAL: Master of any vessel in territorial waters of Singapore shall obey any signal from a preventive vessel and any instruction from officers of Customs. Customs officers shall have free access to any part of vessel and have powers to mark, lock or seal any dutiable goods on import including sea stores.

SERVICES: Following additional services available: Cleaning and preparing ship's tanks. Cleaning, scaling and painting. Insulation. Interior decorating and furnishing. Refrigeration and air-conditioning. Chemical cleaning of boilers, etc. SCAMP underwater cleaning service.

Services of following Classification Societies available: Lloyds Register of Shipping. Det. Norske Veritas. American Bureau of Shipping. Bureau Veritas. Nippon Kaiji Kyokai. Germanischer Lloyd. Polski Register Stratkow. China Corporation Register of Shipping.

Compass adjusting and DF Calibration. Radar and Radio servicing depots.

SHORE LEAVE: No restriction on crews landing after Immigration and Health formalities have been satisfactorily completed. With rare exception (e.g. CPG Crew), all *bona fide* crew of a vessel allowed shore leave on strength of their passports, discharge books or identification cards.

The following circular was issued in May 1973 by the Singapore Port Authority.

"In line with the Government's decision that action should be taken to deal with the 'long-hair' problem as part of a campaign against undesirable alien influences, the Port of Singapore Authority would be most grateful for your co-operation in implementing this decision by advising all your employees, including ships' officers and Crew members, wishing to come ashore to be more tidy in their general appearance.

"To assist you to decide whether an individual's hair is long, the following definition of long hair may be used as a guide:

(i) Hair reaching below an ordinary shirt collar;
(ii) Hair covering the ears;
(iii) Hair falling across the forehead and touching the eyelashes."

POLLUTION: No oil or mixture containing oil shall be discharged into Singapore waters from any vessel. The Master or person in charge of the vessel committing such an offence shall be liable on conviction to a fine not less than 500 dollars and not exceeding 500,000 dollars or to imprisonment for a term not exceeding 2 years or to both such fine and imprisonment.

No refuse, garbage, waste matter, substance of a dangerous or obnoxious nature or trade effluent is to be discharged from any vessel into Singapore waters. The Master or the person in charge of the vessel committing such an offence shall be liable on conviction to a fine not exceeding 10,000 dollars or to imprisonment for a term not exceeding 2 years or to both such fine and imprisonment.

Any person who puts, throws, cast or deposits into Singapore waters, or causes to be put, thrown, cast or deposited there into, any oil mixture containing oil, refuse, garbage, waste matter, carcase, substance of a dangerous or obnoxious nature, or trade effluent, shall be guilty of an offence and shall be liable on conviction to a fine not exceeding 10,000 dollars or to imprisonment for a term not exceeding 2 years or both such fine and imprisonment.

If any oil or mixture containing oil is discharged into Singapore waters:

(a) for the purpose of securing the safety of the vessel or of preventing damage to the vessel or her cargo, or of saving life; or

(b) is found to be escaping, or to have escaped into Singapore waters from a vessel in consequence of damage to the vessel, or by reason of leakage, the Master or the person in charge of the vessel shall report the occurrences to the Director of Marine and the Port Master. Failure to do so shall be an offence and shall be liable on conviction to a fine not exceeding 5,000 dollars.

Slop Reception: The P.S.A. Slop Reception and Treatment Centre at Palau Sebarok has a total tank capacity of 62,000 cu.m. (395,000 barrels).

Berthing facilities consist of 4 piers – Piers 1 and 2, Sludge Pier and Utility Pier.

The depths of water alongside the piers are 7.6 m. (25 ft.), 12.8 m. (42 ft.) and 9.7 m. (32 ft.) at LWOST respectively.

The Centre can accommodate vessels up to an overall length of 264 m. and a displacement of 45,800 tonnes

The average rate of discharge to the storage tanks through the Centre's 0.3 m. (12 in.) pipe-lines is 500 tonnes (490.2 tons) per hour at an operational pressure of 10.6 kg./sq.cm. (150 p.s.i.).

Communications: VHF Station Channel 21. Mobile Radiotelephone – Kapal 57.

Safety and security at the island is well provided and maintained by both the Authority's Police Force and Fire Brigade.

DELAYS: Normally none. Occasional congestion due to prolonged rainy weather or other abnormal conditions.

AUTHORITY: Port of Singapore Authority (PSA).

AGENT: Intrasea (Pte) Ltd., Faber House, 234E Orchard Road, Singapore 9. Tel. 2352611 Cables: Freight Singapore. Telex: RS 24010.

NOTES

Please also advise Shipping Guides Ltd.

Society Islands

BORA BORA (Vaitape): 16.31 S. 151.45 W.

DOCUMENTS: All vessels arriving in French Polynesia must first call for clearance at Papeete, or at Uturoa, or at Taiohae. See "Papeete" for documents required.

PILOTAGE: There is no pilotage station at Bora Bora; a Pilot will be provided at Papeete. Vessels are requested to advise their Agents at least 15 days before arrival of their ETA, length and draft of ship. In addition, Masters should confirm their ETA to the Port Captain of Papeete at least 3 days before arrival. Telegraphic address is Capitaine de Port, Papeete.

ANCHORAGE: Vessels may anchor in the port roads in depths of 34-21 m. Good holding ground in sand and coral.

RESTRICTIONS: Night pilotage is impracticable due to the absence of lighted navigation marks.

MAX. SIZE: Lengths 220 m., beam 30 m., draft 9.60 m.

HEALTH: Vessel should ask for free pratique by radio message to Sante Maritime Papeete, via coast station Mahina. This message to be sent 24 hours before arrival.

RADIO: Mahina Radio, call sign FJA, operating 24 hours a day on 500, 2,182 and 8,230 Khz.

TUGS: No tugs available at Bora Bora.

BERTHING: One quay, (Quai de Farepiti) 132 m. length, situated in Faanui Bay. Depth alongside 7.30 m. This quay was constructed during the 2nd World War and is in poor condition, only used by small warships and yachts. One other quay (Quai de Vaitape) 40 m. long and with depth alongside 4 m. Situated at Vaitape. Used by barges.

MEDICAL: No doctor available, but there is a local infirmary.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCE: No restrictions for crew members, but all tobacco and alcohol must be declared. Crew men going ashore may not take more than 2 packets of cigarettes.

AIRPORT: Situated 7 kms. from Vaitape, only inter-island services.

TIME: GMT minus 10 hours. No change during the year.

HOLIDAYS: See "Papeete".

SHORE LEAVE: Allowed.

AUTHORITY: Chef de Post, Bora Bora.

PAPEETE: 17.33 S. 149.34 W. (See Plan Book)

DOCUMENTS:

Required by Port Health:
- Maritime Declaration of Health (form provided by the Pilot).

Required by Police:
- Crew List.
- List of Passengers Disembarking.
- List of Passengers in Transit.

Required by Customs (2 copies of each):
- Manifest of Cargo for Discharge.
- Provisions List.
- Mail List.
- Crew Personal Effect List.
- Bonded Stores List.
- Ship's Spares List.
- Crew List.
- List of Passengers Disembarking.
- List of Passengers in Transit.
- List of Animals Disembarking.
- List of Animals in Transit.
- Complete Cargo Manifest.

Required by Port Captain:
- Entry Declaration (form supplied on arrival).
- Crew List.
- List of Passengers Disembarking.
- List of Passengers In Transit.

PILOTAGE: Vessels are requested to advise their Agents at least 3 days before arrival giving their ETA, length and draft of the ship, amount of cargo for discharge and any other requirements. In addition, Masters must give their ETA 24 hours before arrival to Capitaine de Port, Papeete. Pilot station and pilot launches are equipped with VHF and may be contacted on Channel 16 when within 30 miles. Pilot launches have grey painted hull with a white band, with wheelhouse on the fore part. The pilot flag is described as the colours of code flag "W" upside-down. International code flag signals may be used to call Pilot. Pilot boards about 1.5 miles from the entrance channel. There is no anchorage outside the port for ships awaiting a Pilot.

Pilotage is effected from 0500 to 2200 hrs. for entering vessels. For departing vessels, pilotage available up to 2400 hrs.

ANCHORAGE: Vessels up to 170 metres length can anchor in the port roads in depths of 18-25 metres. Good holding ground in mud.

MAX. SIZE: Length 250 m., beam 32 m., draft 10.30 m. The Q.E. II, length 294 m. entered and docked in February 1978.

HEALTH: Vessels should ask for free pratique by radio to Sante Maritime Papeete, via Coast Station Mahina Radio. This message should be sent 24 hours before arrival. Pratique is automatic for vessels coming from another Polynesian port.

RADIO: Mahina Radio, call sign FJA, operating 24 hours per day on 500, 2,182 and 8,281.8 kHz.

G.M.T. 01-18 hrs. —	8.461 kHz	FJA 8	A1	W/T
G.M.T. 07-33 hrs. —	17.040,8 kHz	FLA26	A1	W/T
G.M.T. 04-33 hrs. —	8.461 kHz	FJA 8	A1	W/T
G.M.T. 05-03 hrs. —	17.040,8 kHz	FJA26	A1	W/T
G.M.T. 09-03 hrs. —	4.298 kHz	FJA41	A1	W/T
G.M.T. 09-33 hrs. —	8.461 kHz	FJA 8	A1	W/T
G.M.T. 13-33 hrs. —	8.461 kHz	FJA 8	A1	W/T
G.M.T. 17-33 hrs. —	4.298 kHz	FJA41	A1	W/T
G.M.T. 20-18 hrs. —	8.461 kHz	FJA 8	A1	W/T
G.M.T. 20-48 hrs. —	17.040,8 kHz	FJA26	A1	W/T

VHF: The Port Captain's Office is equipped with VHF. Watches are kept on Channel 16 when a ship is expected.

TUGS: Tugs join ships as soon as they are in the entrance channel. Generally, tow-lines are not required, as tugs push the vessels only. There are three tugs available up to 1,200 h.p. belonging to the Port Authority, and in addition, there are two naval tugs up to 700 h.p. which may assist if required.

BERTHING: Passenger Quay: 233 m. length, two berths, depth alongside 9 m.

Cargo Quay: 450 m. length, depth alongside 10.50 m.

STEVEDORES: Cargo information should be confirmed to the Agents with ETA 48 hours before arrival.

MEDICAL: Advance notice required if medical attendance needed on board. Two hospitals available. Passengers disembarking must present a valid vaccination certificate.

TANKERS: One tanker berth, 105 m. long. Max. allowed draft 9.60 m. Discharging hoses are: Mobil Oil 8 in., Standard Oil 6 in.

FRESH WATER: Available from pipe-lines on all quays. Loading rate is 50 t.p.h. at passenger and cargo quays and 30 t.p.h. at the tanker berth.

FUEL: Diesel available subject to 1 week's notice.

DEVELOPMENTS: Construction of a new quay for passenger vessels up to 300 m. length.

Dredging harbour entrance to widen channel to 160 m. width 12.50 m. depth.

A quay is to be constructed in the fishing harbour, length 100 m., depth 6 m.

A Container Quay is to be constructed, length 200 m., depth 12 m. (1977-78).

GANGWAY/DECK WATCHMEN: Services of shore watchmen are necessary.

OPENING/CLOSING HATCHES: Hatches opened and closed by crew if they are of mechanical type, otherwise the stevedores will perform this operation.

CUSTOMS ALLOWANCE: No restrictions for crew members but all tobacco and alcohol must be declared. Crew members going ashore must not take more than two packets of cigarettes. Passengers disembarking may take 200 cigarettes or 50 cigars or 400 grammes of tobacco and one bottle of alcohol.

CONSULS: The following countries maintain representatives at Papeete:

Austria
Belgium
Chile
Denmark
Italy
Finland
Netherlands
Norway
Sweden

REPAIRS: Woodwork, electrical and welding repairs can be effected. There are 2 floating docks for vessels up to 3,800 tons.

REPATRIATION: Can be effected.

AIRPORT: Tahiti — Faaa Airport is situated 6 kms. from the port. Regular international flights.

HOLIDAYS: 1st January, Easter Monday, 1st May, Ascension Day, Whit Monday, 14th July, 15th August, 1st November, 11th November, 25th December. No work is carried out on Sundays or on 1st May. All other holidays can be worked on double overtime rates.

TIME: GMT minus 10 hours. No alterations during the year.

POLICE/FIRE/AMBULANCE: Police 17; Fire 18; Ambulance 2 96 74.

TELEPHONES: Can be installed on board vessels at all quays.

SHORE LEAVE: Allowed without restriction.

AUTHORITY: Capitaine de Port.

1 Crew List.

PILOTAGE: 24 hours notice ETA stating number of passengers, dangerous cargo, etc., to Harbour Master, Honiara, via Honiara Radio. Usual signals. Pilot boards from launch about 0.75 mile N.E. Pelope Shoal. Vessels normally berthed port side to. Pilot uses port gangway in calm weather.

ANCHORAGES: East of Port Main Leading Lights. F1. white and fixed green, in about 20 fathoms; coral bottom.

Local boats are available for transporting crew from anchorage to the shore. The landing stage is at Joanna Jetty on the East side of the main pier at Point Cruz. Height above water level is 2 ft. at high tide and 4 ft. at low tide.

APPROACHES: Approaches free from dangers provided vessels keep at least 2 cables off Point Cruz Beacon, identified by quick flashing red light. On foreshore in front of Shell Oil Storage Tanks is beacon with fixed green light, and above on Vavaya Ridge is white light flashes every 5 seconds from Tower on radio station building. When in line these 2 lights give correct approach to anchorage in 20 fathoms on, or East of, the line. Prevailing winds during S.E. season blow from N.E'ly direction sometimes reaching force 4 to 5 in early afternoon. During N.W. season direction and force variable generally between North and West up to force 4 and occasionally force 5.

RESTRICTIONS: Berthing in daylight hours only - departure any time.

MAX. SIZE: New Wharf, up to 650 ft. long and max. 29 ft. draft. Old Wharf, up to 200 ft. long and max. 13 ft. draft. Tankers, mooring at buoys, 600 ft. long and 27 ft. 6 in. draft.

HEALTH: Pratique can be obtained by radio. Cable Port Health. Suspect vessels should inform Health Authorities and Harbour Master by radio for doctor to board on arrival.

Cable to Quarantine Officer Honiara between 12 and 4 hours before arrival the following message: "Request Radio pratique negative answers all health questions maritime declaration of health Master." Normally, the P & T Radio Officer may grant pratique immediately whilst he is in radio contact with the ship. After arrival the Health Officer will check for rhinocerus beetle and will clear.

RADIO: Radio Honiara VQJ (Vee Kiu Jay). Watch continuous. kHz 6204, kHz 2182, kc/s 500. GMT Schedule 0020–0030 transmits 11560 kHz receives 8 or 16 mHz.

TUGS: There is a small 100 h.p. tugboat assisting with mooring when necessary.

BERTHING: At Point Cruz, berth length 235 ft., depth alongside 30 ft. Vessel berths port side alongside.

STEVEDORES: At least 24 hours notice, usually 3 gangs, indicate any extra gangs required. To facilitate quick turn around advisable have cargo in middle holds evenly distributed not at extreme end or massed in one hold only.

MEDICAL: Notice should be given in advance if medical attendance required on board. Smallpox vaccination required by all arriving on ship. Inoculations available at clinic on Fridays only. Limited hospital facilities available.

Cholera: required if arriving from infected area. Vaccination certificates are checked individually by those passengers permanently disembarking.

For all other passengers and the crew ship's doctor must provide a statement advising that all passengers and crew comply with the health regulation and vaccinations required.

In case some passengers have for health reasons not been vaccinated, a letter from their doctor giving reason why no vaccination given must be produced. Passengers will be allowed to go ashore.

Central Hospital, tel. 09–61.
Emergency and Ambulance, tel. 09–33
Doctors, tel. 09–44
Dentist, tel. 09–43

All medical facilities are provided from the Hospital. One private doctor available: Dr. M. Strickland, tel. 770.

TANKERS: Tanker buoys, 8 in. pipe-line, max. draft 32 ft. New Wharf, 4 in. pipe-line, max. draft 27 ft. 6 in. Old Wharf, 4 in. pipe-line, (ADO), max. draft 13 ft.

DENSITY/TIDE: Approx. 1025. Tidal range about 3 ft.

FRESH WATER: At wharf by hoses. 40 t.p.h.

FUEL: Diesel and gas oil available. 48 hours notice, butane gas.

FIRE PRECAUTIONS: Normal fire precautions, with gang standing by with fire pump.

GANGWAY/DECK WATCHMEN: Watchmen to be recommended. Customs provide a preventive office for duty at a charge.

OPENING/CLOSING HATCHES: Stevedores assist crew. Crew to rig gear.

CERTIFICATES: Certificate of Registry.

CUSTOM ALLOWANCE: 200 cigarettes or 0.5 lb. tobacco per crew member. 3 quart bottles of beer per crew member.

IDENTIFICATION CARDS: Required.

CONSULS: Australian.

REPAIRS: Limited facilities only.

GANGWAY/DECK WATCHMEN: Ship's Agent makes necessary arrangements.
OPENING/CLOSING HATCHES: Mechanical hatches opened/closed by crew. Other types of hatches by stevedores.
REPAIRS: All types of repairs can be undertaken.
DRY DOCKS:
Sturrock Graving Dock: Situated at S.E. end of Duncan Dock:

Dimensions—	Overall docking length	360.0 m.
	Length on keel blocks (first to last keel block)	338.3 m.
	Length on bottom (dock floor)	350.4 m.
	Width at coping	47.5 m.
	Width at entrance top	45.1 m.
	Maximum width at bottom	38.4 m.
	Depth on entrance sill, HWOST	13.7 m.
	Depth on inner sill, HWOST	15.1 m.

A docking length of 369.6 m. can be obtained by placing the caisson in the emergency stop at the entrance.

The dock can be divided into 2 compartments of either 132.5 m. and 216.1 m. or 205.7 m., and 142.9 m. respectively.

One 50 ton and one 10 ton electric crane on 7.6 m. gauge track, two 5 ton electric cranes on 4.9 m. gauge track and three 4 ton electric cranes on 4.9 m. gauge track are available.

The dock can be emptied in 4 hours.

A landing wharf 548.6 m. in length is provided on the port side of the graving dock to facilitate the dry-docking of ships.

A repair pier 457.8 m. in length with a depth of 10.7 m. on one side and 12.0 m. on the other side at LWOST is provided off "M" berth. One 15 ton electric crane on 9.1 m. gauge track is available.

Robinson Graving Dock: Situated in Alfred Basin:

Dimensions—	Overall docking length	161.2 m.
	Length on keel blocks (first to last keel block)	142.6 m.
	Length on bottom	152.4 m.
	Width at coping	27.4 m.
	Width at entrance top	20.7 m.
	Maximum width at bottom	17.2 m.
	Depth on entrance sill, HWOST	7.9 m.

Three 4 ton electric cranes on 4.1 m. gauge track and one 15 ton electric crane, on 4.1 m. gauge track are available.

The dock can be emptied in 3 hours.

Floating Dock No. 2:

Dimensions—	Extreme length	62.8 m.
	Length on bottom	61.0 m.
	Length on keel blocks	58.2 m.
	Extreme width	19.2 m.
	Width at entrance	13.7 m.
	Height of keel blocks	1.2 m.
	Draft on keel blocks, HWOST	5.6 m.
	Lifting capacity	1,016 tons

A 4 ton electric crane is mounted on a side wall of the dock.

Syncrolift Situated in Alfred Basin:

Dimensions—	Lifting capacity	1,778 tons
	Maximum length of vessel	61 m.
	Maximum width of vessel	15 m.

Slipways:
There are 4 boat slips for yachts and small craft.
REPATRIATION: All facilities available.

1. *Vessels docking*
   - *(a)* Any personnel arriving to join a vessel at Capetown should possess a valid travel document and a brief letter of introduction. Entry Permits can be extended if the vessel is late in arriving.
   - *(b)* Application to spend time (longer than 48 hours) in South Africa prior to repatriation should be made to the local immigration authorities.
2. *Vessels calling off Port Limits*
   - *(a)* The same requirements apply as for 1(a) with the exception of personnel who have entered the country from a vessel calling off Port Limits.
   - *(b)* The following applies to all personnel disembarking from vessels calling off Port Limits.
     - (i) Repatriation must be made within 48 hours from time of signing off.
     - (ii) In order to comply with local immigration authorities the Agent requires the following details, for each individual, at least 72 hours before disembarkation:
       - *(a)* Full name and nationality.
       - *(b)* Rank and, if Technician, name of employers.
       - *(c)* Passport number, place and date of issue.
       - *(d)* Place and date of birth.
       - *(e)* Destination and class of travel.
       - *(f)* If air ticket held on board, full details of routing.
       - *(g)* Reasons for disembarkation.

In the case of personnel transferring from one company vessel to another, the same conditions apply except the maximum time permitted for such transfer is 78 hours. If they have not joined the vessel within this period, repatriation must be arranged forthwith.

There are no difficulties for any personnel disembarking for medical reasons.

AIRPORT: D.F. Malan Airport – 20 km. from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.
TIME: GMT plus 2 hours.
HOLIDAYS: New Year's Day (1st January); Good Friday, Easter Monday, Ascension Day (date varies); Republic Day (31st May); Settlers' Day (1st Monday in September); Kruger Day (10th October); Day of the Covenant (16th December); Christmas Day (25th December); Boxing Day (26th December). Cargo is not worked on Christmas Day and New Year's Day.
POLICE/AMBULANCE/FIRE: Police, 438-3471; Ambulance, 51-5151; Fire, 438-3431 or 22-2222.
TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.
SHORE LEAVE: Allowed.
DEVELOPMENTS: An outer harbour is to be constructed initially providing 8 berths for dry cargo ships with a depth alongside of 42 ft. at LWOST.
SHIPMASTER'S REPORT: Off limits launch (and helicopter) service.

Port, Immigration, Customs and Health Authorities have made it clear that this service is a privilege and not a right. It is therefore of the utmost importance that the regulations are strictly adhered to.

The Agent must apply to the Port Captain for permission to service the vessel and the following details must be submitted. Name of vessel, time and date of arrival, draft, where from, where to, stores required and other reasons for call.

Launch is only allowed to be alongside vessel for 1 hour maximum otherwise vessel will have to enter port limits and incur port dues. Tariff R.15.00 per half hour, minimum R60.00.

If personnel embarking, Immigration Authorities require name of vessel, tonnage, whether ballast or loaded and names of persons embarking. If persons disembarking then full names, dates and places of birth, nationality, passport or discharge book number and expiry date, whether South African visa held and comprehensive reason for leaving vessel, arrangements made for departure from South Africa (usually 24/48 hours allowed), and flight number. This does not apply to medical cases. Guarantee from Agent accepting full responsibility and liability regarding maintenance and repatriation expenses. Persons disembarking must report immediately to Passport Control. Failure to report or leave South Africa on the booked flight is an offence and in addition to any fine or imprisonment the Owners will be refused any further off limits service for *any of their vessels.*

Port health require application for radio pratique 48/24 hours before arrival. Customs require all bonded stores loaded to be signed for and ship's stamp applied. Stores or spares being landed must have prior notification to Agent and an accompanying letter giving full description and disposal instructions.

Agents require 168, 96, 48, 24, and 12 hours' notices followed by any amendment to ETA. Stores requirements should be sent at least 96 hours before arrival. Three copies of Crew List to be sent ashore with launch (or helicopter).

Services operate 24 hours per day and usual rendezvous position is 5 miles West of Green Point lighthouse for launch (and 12 miles West for helicopter). Launch can carry up to 30 tons stores (and helicopter up to 2,000 lb.). Vessels should not anchor but provide a good lee and have derrick rigged. Contact should be made with the launch (or helicopter) 1 to 2 hours before arrival rendezvous point using Channel 16.

AUTHORITY: South African Railways, Port Captain, Table Bay Harbour.
AGENT: Freight Services Ships Agency Co., 210 Cape Town Centre, Heerengracht, POB 702, Cape Town 8000. Tel: 45-4011. Telex: 577614/577932. Cables: Seafreight Cape Town.

DURBAN (Port Natal): 29.53 S. 31.02 E.
(See Plan Book)

PORT LIMITS: The area of sea bounded by: (1) to the North, a line drawn from the coast in position: 28° 48′ 42″ S. 31° 02′ 32″ E. in a 090° (True) direction to position 29° 48′ 42″ S. 31° 7′ 30″ E.; (2) to the South, a line drawn from the coast in position; 29° 54′ 06″ S. 31° 02′ 30″ E. in a 090° (True) direction to position 29° 54′ 06″ S. 31° 7′ 30″ E.; (3) to the East, a line joining the seaward positions in (1) and (2).
DOCUMENTS: See "Cape Town".
PILOTAGE: Compulsory. As much advance notice as possible to be given to Port Captain through VHF radio – Port Operation – calling Channel 16, working Channel 12. Call Pilot by Aldis lamp if necessary. Pilot boats fitted with multi-channel VHF. Motor pilot boat – black hull, white housing. "Pilot-Loods" painted in black on housing. Steam pilot boat – black hull, brown housing and yellow funnel. Pilot taken aboard at outer anchorage.
RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. Oil tankers and ships carrying explosives or dangerous goods restricted to daytime hours. The depth of the inner and outer channels is 12.8 m. at LWOST.
MAX. SIZE: The draft permitted is 40 ft. (12.10 m.) The length of 800 ft. is also exceeded with the Port Captain's approval. Vessels over 600 ft. length berth daylight only.
HEALTH: Pratique granted at first port in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for smallpox and yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.
Shipmaster's Report: Valid Yellow Fever Certificate not required.
RADIO: Durban Radio – ZSD.
TUGS: 8 first-class tugs available. Join vessels in entrance channel. Tug's wires used at no extra charge.

*In course of erection, second unit to be commissioned in August 1979.

*81 ton crane can move at right angles to quay only.

CRANES: *Floating Cranes:* 3, lifting capacities of 25 tons, 40 tons and 125/200 tons, respectively.

Mobile Cranes: Diesel-electric road cranes: One 6.5 tons, four 12.5 tons, four 15/35 tons, one 15/43 and one 33-ton crane. Two 25-ton side-loaders (for container handling).

BULK HANDLING FACILITIES: *Grain elevator:* 1 terminal elevator of 38,100 tons storage capacity, with shipping gallery. Intake capacity of elevator, 1,000 t.p.h.; shipping capacity 1,271 t.p.h.

Privately owned facilities:

(1) Manganese Ore Loading Facilities. Electrical conveyor plant at Congella. Shipping capacity 318 t.p.h.

(2) Sugar Terminal. At Maydon Wharf. Storage capacity of 520,000 tons and shipping rate of 711 tons to 762 t.p.h.

(3) Alumina Handling Facilities. At the Crossberth. Storage capacity of 33,000 tons and conveyor system with discharge rate of 300 t.p.h. Max. size 45,000 d.w.t., max. draft 38 ft.

(4) Bulk Soda-Ash Facilities. At Maydon Wharf. Storage capacity of 20,865 tons and conveyor system with discharge rate of 91 tons to 136 t.p.h.

(5) Bulk Shipping Terminal for pelletised maize products, ground nuts and soya beans located at Dolphin Berth No. 3 Island View.
Storage capacity 18,000 tons. Shipping rate 400 to 700 t.p.h. This terminal is currently being developed to export vegetable oils.

(6) Multi-purpose Bulk Handling Facility for pelletised maize and wheat products, ground nuts, barley malt, rice, soda ash and fluospar located at Berth No. 5 Maydon Wharf.

Storage capacity:	agricultural products	30,500 tons
	mineral products	60,000 tons
	soda ash silos	12,000 tons
Shipping rate:	500 tons to 1,000 tons per hour	
Discharge rate:	200 tons to 300 tons per hour	

(7) Bulk Handling Facilities for the export of wood chips located on Berth 109 Crossberth, together with alumina facilities mentioned in (3) above.

Storage capacity:	50,000 tons
Shipping rate:	600 tons per hour

Bulk-loading Facilities: Electrically-driven appliances for the loading of coal, pig iron, manganese ore, iron ore, etc., are provided at the Bluff. There are 3 dumpers with capacity of 1220 tons, 711 tons and 1,220 t.p.h., respectively. 2 belt loaders capable of loading at the rate of 610 t.p.h. and 3 bucket transporters with an aggregate capacity of 1,220 t.p.h. are available. The overhead storage bins have a capacity of 10,160 tons, while concrete bins are provided for ground storage with the following capacities:

1. Anthracite throughout–64,630 tons.
2. Mixture of anthracite and pig iron: Anthracite–48,000 tons.
Pig iron–43,345 tons.

Anthracite Storage Facilities: Concrete ground storage bins of 18,290 tons capacity at Salisbury Island.

CONTAINER HANDLING FACILITIES: A major container terminal comprising 5 deep sea berths (201-205) and 2 coaster berths (108-109) is nearing completion. The deep sea facility will be equipped with 7×40 ton wharf container cranes and 1×35 ton unit will be provided at Berth 108.

The entire complex covers some 125 hectares and provides very substantial stacking areas backed up by a large terminal building with computer control, workshop complex and a road/rail transfer terminal to handle unit trains conveying 80 t.e.u.'s. This rail terminal is served by 2 modern 35-ton container gantry cranes covering 3 rail tracks and 2 traffic lanes. The back up system operates on a combined trailer/straddle carrier system comprising 34×30 ton, 8-wheeled straddle carriers augmented by a substantial fleet of terminal haulers and trailers as well as a large cartage fleet operated by the Port Authority for the local delivery of containers.

A very modern stuffing and re-stuffing depot located on a 13 hectare site immediately adjacent to the harbour terminal is operated by private enterprise (Messrs. S.A. Cargo Depots). The depot is fully equipped with re-stuffing sheds and container handling equipment to cater for LCL traffic.

STEVEDORES: Stevedoring undertaken by private enterprise stevedores appointed by ship's Agent.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agents.

TANKERS: Off-shore Single Buoy mooring suitable for tankers up to 300,000 tons situated in position 30° 0′ 30″ S., 30° 58′ 29″ E.

Mooring Master boards in position 5 km. East of SBM. Rope messengers should be available on forecastle, and manifold prepared to connect two 16-in. hoses ASA 150 flanges. Stores launch can be arranged for up to 30 tons stores, provided that vessels anchor outside port and territorial limits. No bunkers, no fresh water, and no shore leave for vessels at single buoy mooring.

In harbour 4 tanker berths, for vessels of max. length 800 ft., max. draft 12.3 m. Slop tanks available. Crude discharge through 10 in, hoses, white oil 8 in. hoses, loading products through 8 in. hoses.

Additional Crude Oil Discharge Berth with depth alongside of 42 ft. under construction, but maximum permissible draft 12.3 m.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. Rate of delivery 40 t.p.h.

FUEL: All grades of fuel available. 48 hours notice required. Fuel may be obtained alongside berths or by barge. No barging outside harbour area.

OPENING/CLOSING HATCHES: Mechanical hatches opened/closed by crew. Other types of hatches by stevedores.

CERTIFICATES:

Safety Certificates in respect of construction and gear.
Radio Certificate.
Load-line Certificate.
Deratisation Certificate.
Certificate of competent officers (passenger ships only).

CUSTOMS ALLOWANCE: The following are allowed for Master, officers and crew respectively: Tobacco in any form, 8 oz., 6 oz., 4 oz. Spirits: 26.7 fl. oz., 26.7 fl. oz., nil. Wine: 106.6 fl. oz. each. Beer: 106.6. fl oz., 106.6 fl. oz., nil.

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection.

IDENTIFICATION CARDS: Required, otherwise National Identity Cards, if available.

CONSULS:

Austria	tel. 69512	Netherlands	tel. 20387
Belgium	,, 25968	Norway	,, 21694

REPAIRS: All types of repairs can be undertaken.

DRY DOCKS: *Prince Edward Graving Dock:*

Dimensions—	Overall docking length	352.044 m.
	Length on keel blocks	327.660 m.
	Length on bottom	352.044 m.
	Width at coping	42.215 m.
	Width at entrance top	33.528 m.
	Maximum width at bottom	33.528 m.
	Depth on entrance sill HWOST	12.497 m.
	Depth on inner sill HWOST	13.106 m.

A docking length of 364.44 m. can be obtained by placing the caisson in the emergency stop at the entrance.

The dock can be divided into 2 compartments:

Outer 206.906 m. and inner 138.684 m.

One 25 ton electric crane with 27.342 m. radius and one 10 ton crane on 7.925 m. gauge track and one 10 ton and two 5 ton electric cranes on 4.572 m. gauge tracks are available. The dock can be emptied in 4 hours.

Floating Dock No. 3:

Dimensions—	Extreme length	106.680 m.
	Length on bottom	106.680 m.
	Length on keel blocks	104.546 m.
	Extreme width	26.822 m.
	Width at entrance	19.482 m.
	Height on keel blocks	1.219 m.
	Draft on keel blocks, HWOST	5.334 m.
	Lifting capacity	3,629 tons
	Crane	4 tons

REPATRIATION: All facilities available.

AIRPORT: Louis Botha Airport – 15 miles from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday, Easter Monday, Ascension Day (date varies); Republic Day (31st May); Settlers' Day (1st Monday in September); Kruger Day (10th October); Day of the Covenant (16th December); Christmas Day (25th December); Boxing Day (26th December). Cargo is not worked on Christmas day and Good Friday.

POLICE/AMBULANCE/FIRE: Police, 310-2714; Ambulance, 62333; Fire, 4123222 or 62333.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.

GENERAL: A copy of the Regulations for the Republic of South Africa and of South West Africa supplied gratis to Masters on arrival.

SERVICES: Tank-cleaning facilities, compass adjustments and repairs to all electronic gear can be undertaken.

SHORE LEAVE: Allowed.

AUTHORITY: South African Railways, Port Captain, Durban.

AGENT: Freight Services Ships Agency Company Limited, 16th/17th Floor – Durban Bay House, 333 Smith Street, P.O. Box 1020, Durban; Tel. No. 318174/80; Telex: 6–2540/6-0185; Cables: Seafreight Durban.

EAST LONDON: 33.02 S. 27.55 E. (See Plan Book)

PORT LIMITS: These are defined in the "Regulations for the Harbours of the Republic of South Africa" as follows:

The area of the sea bounded by a line drawn from the Nahoon Point in position 32° 59′ 50″ S. 27° 57′ 07.5″ E. in a 114° direction for 1 sea mile to a position 33° 00′ 13.9″ S. 27° 58′ 12.8″ E. thence in a 216.5° direction to a position 33° 03′ 14.46″ S. 27° 55′ 37.18″ E. and thence in a position 295° direction to the coast in position 33° 02′ 36″ S. 27° 53′ 57″ E. (All bearings are true.).

For Charter Party purposes: An "arrived ship" is when she enters the port limits.

For Harbour Revenue purposes, a vessel "arrives" when it passes into the harbour proper or upon first contact at anchorage whilst waiting for berth.

DOCUMENTS: See "Cape Town".

Immigration: Produce their own forms which are:

(a) Arrival and Departure forms.
(b) Prohibition Notice – which states all crew must sail with vessel unless officially signed off through Immigration.
(c) Medical Certificate.
(d) Advice letter from last South African port – if applicable.

They require Crew Lists and the "I" Flag to be flown until vessel cleared by Immigration Officer.

PILOTAGE: Compulsory. One hour advance notice to be given to Port Captain through VHF radio – Port Operation – calling Channel 16, working Channel 12. Pilot boats fitted with multi-channel VHF. Motor pilot boat – black hull, white housing "Pilot-Loods" painted in black on housing. Steam pilot boat – black hull, brown housing and yellow funnel. Pilot taken aboard at outer anchorage. Pilots prefer Pilot ladder and manrope system for boarding and disembarking.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Port operates from: 0600 to 2200 hrs. Mondays to Fridays 0600 to 1300 hrs. Saturdays 0600 to 1900 hrs. Sundays. Tankers are handled in daylight only.

MAX. SIZE: Tankers: max. length 204 m. overall, draft 9.9 m.

Passenger and dry cargo vessels: max. length 239 m. overall, draft 9.9 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for smallpox and yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

Vessels will not be brought into harbour until radio pratique has been requested/granted, if this is first port of call on the South African range.

RADIO: East London Radio, call sign ZSA.

TUGS: Three tugs available. Join vessel in entrance channel. Tug's wires used at no extra charge.

CARGO HANDLING FACILITIES: One berth equipped for bulk loading of maize. One berth equipped for discharging bulk petroleum products. All other berths for general cargo. Grain elevator: Storage capacity 75,986 tons; loading rate 1,633 t.p.h. through 4 spouts.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agents.

TANKERS: One tanker berth suitable for vessels of 204 m. length with maximum draft 9.9 m. Diameter of hoses, 300 mm.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. Rate of delivery 60 t.p.h.

FUEL: 48 hours notice required. Heavy Oil and Gas Oil available.

OPENING/CLOSING HATCHES: Mechanical hatches opened/closed by crew. Other types of hatches by stevedores.

CERTIFICATES:
Safety Certificates in respect of Life Saving Equipment and gear.
Radio Certificate.
Load-line Certificate.
Deratisation Certificate.
Certificate of Competent Officers (passenger ships only).

CUSTOMS ALLOWANCE: *Officers and Petty Officers:* 200 cigarettes every 4 days; 1 litre spirits; 3 litres each of beer and wine; *Crew:* 200 cigarettes every 4 days. In cases of wine drinking nations, this allowed with meals.

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection.

IDENTIFICATION CARDS: Required, otherwise National Identity Cards, if available.

CONSULS:
Belgium
Denmark
France
Germany
Italy
Netherlands
Norway
Portugal
Sweden
United Kingdom

REPAIRS: All types of repairs can be undertaken.

DRY DOCKS: *Princess Elizabeth Graving Dock:*

Dimensions—Overall docking length	198.5 m.
Length on keel blocks	193.1 m.
Length on bottom	198.5 m.
Width at coping	31.2 m.
Width at entrance top	27.2 m.
Maximum width at sill level	22.9 m.
Depth on entrance sill, HWOST	10.2 m.
Depth on inner sill, HWOST	10.2 m.

A docking length of 209.2 m. can be obtained by placing the caisson in the emergency stop at the entrance.

Two 15-ton and one 5-ton electric cranes on 4.9 m. gauge track are available.

The dock can be emptied in 4 hours.

Slipway:

Extreme length	222.5 m.
Length of cradle	63.4 m.
Draft on keel blocks, HWOST:	
Forward end	3.5 m.
Aft end	6.7 m.
Capacity	100 tons

REPATRIATION: All facilities available.

AIRPORT: Ben Schoeman Airport 8 km. from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Durban".

POLICE/AMBULANCE/FIRE: Police 2–5555; Ambulance 2–1212; Fire 2–1212. National Sea Rescue 22555. Harbour Police 442032.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.

SHORE LEAVE: Allowed. No shore pass required.

DEVELOPMENTS: Ro/Ro berth under construction, the first stage will be completed early 1979.

AUTHORITY: South African Railways. Port Captain, East London.

AGENT: Freight Services Ships Agency Company Limited, 2nd Floor, Union Arcade Building, Cnr. Union & Buffalo Streets, P.O. Box 2, East London 5200; Tel. No. 26787/8; Telex: 75–761; Cables: Seafreight East London.

MOSSEL BAY: 34.10 S. 22.09 E. (See Plan Book)

PORT LIMITS: Within a line drawn from Cape St. Blaize lighthouse to the mouth of the Little Brak River, thence along the highwater mark so as to include the foreshore between these points, together with Seal Island, the estuary of the Little Brak River as far as the tide flows.

DOCUMENTS: Refer to "Cape Town".

PILOTAGE: Compulsory. 1 hour advance notice to be given to Harbour Master and Pilot through VHF radio. Port operation calling Channel 16, Working Channel 12. Motor pilot boat – black hull, white housing "Pilot-Loods" painted in black on housing. International pilotage signals used. Pilot boards about 2 miles North of Cape St. Blaize Light.

ANCHORAGE: Open anchorage with unlimited depth.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. No night berthing for tankers.

MAX. SIZE: Anchorage: no restrictions. Tankers: up to 32,000 d.w.t.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared.

Valid certificates must be held for smallpox and yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Cape Town Radio, ZSC. Port Elizabeth Radio, ZSQ.

TUGS: 1 Pilot tug of 300 h.p. available.

TANKERS: Conventional buoy mooring designed for 32,000 d.w.t. vessels up to 204 m. length. Situated offshore at Voorbaai. No slop facilities.

Vessels use both anchors (approx. 9 shackles on each). There are 5 mooring buoys which are kept underwater when not in use. Vessels should have 10 full coils of rope. They should be well ballasted at all times as there is very little warning of strong winds which may suddenly come up.

BERTHING:

	Dimensions		Depth at LWOST		Cranes (electric)	
Wharfage	Length (m.)	Cope Level above LWOST (m.)	Max. (m.)	Min. (m.)	No.	Lifting capacity (tons)
No. 1 Jetty (2 sides) each	107	5.6	4.6	3.0		
*Low Level Wharf	61	2.6	1.7	1.7		
*No. 1 Quay	44	4.4	1.7	1.7		
*No. 2 Quay	50	4.4	2.7	2.7		
No. 3 Quay	213	3.5	6.7	5.5		
No. 4 Quay	274	3.7	7.3	7.3	3	4

*Suitable for small fishing craft only.

DENSITY: S.G. 1025.

FRESH WATER: Available along Nos. 3 and 4 quays.

FUEL: Limited supplies of Gas oil along Nos. 3 and 4 quays.

MEDICAL: Cape St. Blaize lighthouse on 24-hour watch. Requests for medical assistance passed through lighthouse to Harbour Master and Pilot.

Hospital facilities available. Vessels in port should arrange medical facilities through Agent.

CUSTOMS ALLOWANCE: See "Cape Town".

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection.

IDENTIFICATION CARDS: Required. Otherwise National Identity Cards, if available.

REPAIRS: Only minor repairs can be undertaken on a 500 ton capacity slipway.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st Jan.); Good Friday, Easter Monday, Ascension Day (dates vary); Republic Day (31st May); Settler's Day (1st Monday in September); Kruger Day (10th October); Day of the Covenant (16th December); Christmas Day (25th December); Boxing Day (26th December). Cargo is not worked on Christmas Day and Good Friday.

AIRPORT: George Airport, 40 km.

SHORE LEAVE: Allowed.

AUTHORITY: South African Railways. Harbour Master and Pilot, Mossel Bay.

AGENT: See "Cape Town".

PORT ELIZABETH: (Algoa Bay): 33.57 S. 25.39 E. (See Plan Book)

PORT LIMITS: Bounded on the Southward by a line drawn from Cape Recife, East (true) to a point in the Indian Ocean, distant 1,609 m. on the Northward by a line drawn from the extreme point of the East bank of the Zwartkops River, East (true) distant 1,609 m.; on the Eastward by a line drawn between these 2 points, and shall embrace the foreshore between high and low water marks from Cape Recife lighthouse to the aforesaid line at East bank of the Zwartkops River, including that portion of the said river which lies on the seaward side of the bridge carrying the railway line to Allicedale.

DOCUMENTS: *Customs*
Form DA.1 Report Inwards/Outwards for ships.
Form DA.3 Certificate of clearance for ships.
Form DA.4 Transire – for a destination in the R.S.A.
Form DA.5 List of sealable goods on board ship.
Ships Crew List (Customs Department).
Livestock Form (Customs Department).

Post Office
P.160 Notification of departure of vessel.
P1/27 Certificate of departure of vessel.
P1/149 Ship mail declaration.
P.21 Post Office Certificate.

Port Health
Maritime Declaration of Health.
Crew List with last vaccination dates.
Deratisation Certificate.

Port Authority
T.958 Report of Arrival.
T.962 A Departure/Shifting Notification.
Ship's Manifest.

PILOTAGE: Pilotage is compulsory. Messages addressed to Port Captain, Port Elizabeth. Initial ETA together with draft, 72 hours prior to arrival, updated 12 hours prior to arrival and confirmed with Port Control when within VHF range. VHF radio calling on Channel 16. Working frequency Channel 12.

Pilot boats fitted with multi-channelled VHF. Pilot boats black hull with white superstructure, "Pilot-loods" painted black on white. Pilot boat stationed inside harbour and meets ship on arrival approximately 2 miles East of breakwater. Boarding requirements consist of pilot ladder together with 2-manropes or pilot hoist. Pilot ladder usually rigged on starboard side of docking. Algoa Bay is considered a safe anchorage for all sizes of ships, the bottom consisting mainly of sand. Usual anchorage for ships awaiting Pilot is 2 miles Eastward of breakwater, in the outer anchorage.

Predominant winds are Westerly all the year, with East/South Easterly during the Summer months. The Westerly winds are the stronger of the two but are off land and cause little difficulty. Easterly's being from the sea are inclined to cause an uncomfortable sea.

ANCHORAGE: See "Pilotage".

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Dry-cargo ships 0600 to 2200 hrs. Pilot must be aboard by 2030 hrs.

Vessels which are considered *not gas free* are restricted to daylight entry only.

MAX. SIZE:

	Max length	*Draft*
Passenger and dry-cargo vessels	Subject to Port Captain's prior approval	10.6 m.
Tankers	203.3 m. overall	9.8 m.
Ore carriers	251.5 m.	11.6 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If radio pratique not granted "Q" flag to be flown until ship has been cleared.

Valid certificates must be held for smallpox and yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Port Elizabeth Radio. Call sign ZSQ.

VHF: See "Pilotage".

TUGS: Three "Z-Peller" diesel tugs available, fitted with radar and VHF. Tugs join between anchorage and harbour entrance. Tug's wires used at no extra charge.

BERTHING:

Wharf	*Dimensions* *Length (m.)*	*Cope level (m.)*	*Depth at LWOST* *Max. (m.)*	*Min. (m.)*	*Cranes* *No.*	*Lifting capacity (tons)*
Charl Malan Quay	423	5.2	11.0	11.0	16	4

Fish wharf	101	3.4	4.0	0.9	—	—

Developments:

2 container berths with combined length of 635 m. are in use along Charl Malan Quay. The container wharf cranes have been commissioned.

Back-up area 22 ha with 3,800 ground positions for deepsea container traffic and 7 ha with 1,000 trailer positions for coastwise container traffic available since 1978.

10 straddle carriers and 16 haulers and trailers commissioned.

A rail terminal for forwarding and receiving containers to and from inland destinations will form an integral part of the container terminal.

Entire project due for completion in October 1980. Ro-Ro facilities for end-loading of coastwise traffic in use.

Facilities for side-loading of deepsea Ro-Ro traffic available.

BULK HANDLING FACILITIES: *Ore Loading Plant:* Storage capacity approx. 460,000 tons. Rated loading capacity 1,360 t.p.h. Ore loaders:

Maximum outreach from quay face	19.35 m.
Extreme elevated height of loaders above HWOST	13.92 m.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agent.

TANKERS: Diameter of lines 1×300 mm; 2×250 mm and 2×150 mm. Max. length 203.3 m. Max. draft 9.8 m.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex wharf hydrants. 160 t.p.h.

FUEL: 48 hours notice required. Bunker fuel and gas oil available at ore berth. Fuel oil only available at Tanker Berth.

CUSTOMS ALLOWANCE: 200 cigarettes per man. Only officers allowed 1 bottle spirits.

CARGO GEAR: Undertaken by shore cranes. No floating crane available.

STEVEDORES: To be arranged through ship's agency.

IDENTIFICATION CARDS: Required. Otherwise National Identity Cards, if available.

CONSULS:

Belgium	Tel.	46561	Italy	Tel.	52 1461

France	,,	531505	U.K.	,,	52 2160

REPAIRS: Minor deck and engine room repairs.

DRYDOCKS: Nil. Electrically operated 1,200 ton slipway; depth on keel blocks F. 3.7 m.; A. 7.5 m. HWOST; telescopic cradle 75.4 m. long, minimum length 44.3 m. Max. length of ship 82 m. and max. beam 12 m.

SURVEYORS: All classification societies represented.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Shipmaster to liaise with stevedores.

REPATRIATION: All facilities available.

AIRPORT: 4 km. from harbour. Regular daily S.A. Airways flights to and from all major centres.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday, Easter Monday, Ascension Day (dates vary); Republic Day (31st May); Settlers' Day (1st Monday in September); Kruger Day (10th October); Day of the Covenant (16th December); Christmas Day (25th December); Boxing Day (26th December). Cargo is not worked on Christmas Day and Good Friday.

POLICE/AMBULANCE/FIRE: Police (City) 10111, Police (Harbour) 520-2280; Ambulance 2-22311; Fire 2-1555.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.

IDENTIFICATION CARDS: No passes issued.

SHORE LEAVE: Allowed.

DEVELOPMENTS: See "Berthing".

AUTHORITY: South African Railways. Port Captain, Port Elizabeth.

AGENT: Freight Services Ships Agency Company Limited, African Eagle Centre, Main Street, P.O. Box 1108, Port Elizabeth. Tel. No. 523620. Telex: 574–7181. Cables: Seafreight Port Elizabeth.

RICHARDS BAY: 28.48 S. 32.06 E. (See Plan Book)

LOCATION: The port is located some 200 km. North of Durban. Mid point of the bay is approximately 28° 48′ S. and 32° 02′ E.

DOCUMENTS: The following documents should be prepared and ready on berthing:

Port Health:
1 Maritime Declaration of Health.
1 Vaccination List.
1 Crew List.
1 Valid Derat Certificate.

Immigration:
3 Crew Lists.

Customs:
2 Crew Lists.
1 Ship's Stores List.
1 Crew Declaration of Bonded Stores, etc.

Agents:
2 Crew Lists.
Loading Certificate.
Safety Radio Certificate
Safety Equipment Certificate.

Customs: All vessels using the port, will be subject to Customs Inspection and must obtain a Customs Clearance.

PILOTAGE: Pilotage is compulsory and Pilots are provided by the Marine Department of South African Railways and Harbours.

Boarding points are determined by the Pilot, but generally speaking will be within an area approximately 5 km. East of the Harbour Entrance.

At the present time vessels can only enter and leave during daylight. Later this position will be reviewed to consider a 24 hour service.

Vessels with freeboard in excess of 30 ft. must have accommodation ladder rigged in addition to the pilot ladder.

ANCHORAGE: 3 to 5 miles off Port but not opposite Entrance (precise area not yet demarcated).

Quality of Bottom: Sandy.

Note: Anchorage is similar to Durban and in high S.W. winds anchorage is safe, but in high N.E. winds caution should be exercised.

MAX. SIZE:

LOA Max. 314 m. Beam max. 47.25 m. Draft max. 17 m. D.W. Limit max. 150,000 d.w.t.

Minimum Ballasted Condition on Entry:

Length	*Draft – Fore*	*Draft – Aft*
600 ft.	20 ft.	24 ft.
700 ft.	25 ft.	28 ft.
800 ft.	26 ft.	30 ft.
900 ft.	27 ft.	32 ft.
over 900 ft.	28 ft.	34 ft.

HEALTH: Radio Pratique can be obtained by cabling Port Health – Durban using the standard international procedure for working. See "Radio".

RADIO: *Arrival Advice:*

To "Porthealth Richardsbay" – direct through Durban Radio – 24 to 48 hours prior arrival – advising ETA, last port, date sailed, number of crew, full inoculation/vaccination status, and state of health of crew, and requesting Radio Pratique. Porthealth will cable vessel directly, either granting pratique or requesting further details. These messages are free of charge.

To "Portcaptain Richardsbay" – direct through Durban Radio – 48 hours prior arrival, advising ETA, draft, freeboard and reason for call at Richards Bay.

VHF: Vessels can communicate with Port Control, on Channel 16 VHF watch is maintained continuously. When at anchor, listening watch should be kept to receive berthing instructions.

TUGS: Tug attendance is compulsory.

Tugs are owned and operated by South African Railways and Harbours and consist of the following:

1. Voigth Schneider	4,200 h.p. Bollard Pull 43 tons.
2. Diesel Electric	2,270 h.p. Bollard Pull 30 tons.

BERTHING: Line boats are provided by the Harbour Authorities, as are berthing gangs.

Coal Terminal:

Berths No's 301 & 302 are used solely for the export of South African Steam Coal. The plant is owned and operated by the Richards Bay Coal Terminal Company (Pty.) Ltd.

Length	700 m.
Depth	19 m.
Quality of bottom	Sandy to hard
Density of sea water	Between 1000/1025 (Fresh to salt)
Height of quay above HWOST	3.2 m.

Shiploaders: Two. (Dimensions apply to one machine)

Loading capacity (nominal)	6,500 m/t.p.h.
Loading capacity (average)	3,500 m/t.p.h.
Loading capacity of Trimmer	3,000 m/t.p.h.
Working Range of Boom	15° up to 15° down
Height of Boom above HWOST with Loader in best working position	21.0 m.
Height of Boom above HWOST with Loader at max. working elevation	21.6 m.

Clean Cargo Berth:

On the North side of the harbour 1,300 m. of quay wall has been constructed and commissioned (Berths 609 and 701 703: height of quay above HWOST 3.2 m. Quality of bottom, sandy.)

Berth 609	length	300 m.
	depth	12.8 m.
Berth 701	length	300 m.
	depth	12.8 m.
Berths 702/703	length	700 m.
	depth	19 m.

Berths 701–703 have been equipped with 8×4 ton wharf cranes and 5×15 ton cranes as well as rail tracks and adequate back-up areas.

A phosphoric acid terminal with a storage capacity of 36,000 tons is located behind the quay and tankers are loaded at a rate of 1,200 tons per hour via means of pipe manifolds at Berth 703.

A very substantial multi-purpose bulk handling facility is being developed behind Berths 701-703 for the import of sulphur, petroleum coke and alumina. The terminal, which is partially completed, and comprises truck tipplers, silos, open and covered storage, conveyors, etc. is at present handling the export of zircon, rutile, titanium slag and pig iron by means of the wharf cranes. Large modern bulk off-loading facilities as well as a belt loader are planned.

Berth 609, which is served by rail tracks and an adequate surfaced area is currently being used for the import of heavy lift cargoes.

Berth 703 has been provided with a pipe-line to load bulk phosphoric acid ex-storage tanks. Max. pumping rate 2,000 t.p.h.

MEDICAL:

Hospital: There is a modern and well equipped hospital at Empageni. (Approx. 25 km. from the berth).

Doctor/Dentist: Usual port services available on 24 hour basis.

DENSITY: 1026.

FRESH WATER: Fresh water is available at the berth. Rate approx. 25 t.p.h.

FUEL: Heavy and Medium Fuel Oil. Diesel Oil and Gasoil are available by pipe-line at the berths 301 and 302 only. Bunkering can take place concurrently with loading.

Stems for bunkers should be placed with normal bunker suppliers who will arrange delivery through the Bunker Supply Company at Richards Bay. All vessels calling for bunkers must either be gas free or inerted before they will be permitted to enter the port.

CONSULS: In Durban.

REPAIRS: Written approval must be obtained from the Port Authorities, via the Agents for vessel to immobilise engines to carry out repairs. Repairs may be carried out at the berth.

SURVEYORS: Lloyds, ABS, BV and NV in Durban.

GANGWAY/DECK WATCHMAN: Recommended.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCE: Customs, on vessels berthing, allow each member of the crew 200 cigarettes. They normally allow also 1 part bottle spirits and 8 cans (or dumpy bottles) of beer to each officer. No alcohol allowed for rated crew members except in the case of vessels belonging to countries where provision is made for wine in the statutory list of rations.

REPATRIATION: Possible.

AIRPORT: There is an airport at Richards Bay 26 km from the Coal Berth, and there are 2 flights per day to Durban, where international connections can be made.

HOLIDAYS: *Local Holidays:*

New Year's Day, 1st January; Good Friday; Easter Monday; Ascension Day; Republic Day, 31st May; Settler's Day, 6th September; Kruger Day, 10th October; Day of the Covenant, 16th December; Christmas Day, 25th December; Family Day, 26th December.

Where such a holiday falls on a Sunday, the Monday following becomes a Public Holiday.

TIME: GMT plus 2 hrs.

POLLUTION: The Port Authorities demand that no vessel using the port shall discharge any garbage, refuse, vegetable or food matter, deck cleanings polluted bilge water, oil or rubbish of any description in the vicinity of or in the port of Richards Bay.

Heavy penalties will be imposed for breach of the regulations.

Vessels arriving in Ballast must have clean ballast on board, as deballasting takes place alongside the berth. Dirty ballast pumped into the harbour will incur heavy penalties for pollution.

TELEPHONES: Telephones are available at the berth. Application for the service should be made through the Agents in advance.

All telephone calls made will be charged to the vessel's account.

Caution: With direct dialling available internationally it is strongly recommended that telephones are placed in the custody of a responsible officer to avoid abuse.

SHORE LEAVE: There are no restrictions on shore leave for crew. Entertainment in the Richards Bay area is very limited. Durban, 2.5 hours drive away, however, can offer very much more.

IDENTIFICATION CARDS: Seaman's Book sufficient.

DEVELOPMENTS: The development of the town and surrounding areas is taking place rapidly together with large scale industrial and commercial developments.

Apart from the development of the extensive multi-purpose bulk handling terminal behind Berths 701-703 the Richards Bay Coal Terminal Company are expanding their handling and storage facilities behind Berth 302 and this company will have an export capacity of 20 million tons of coal per annum by 1979.

The construction of a chemical tanker berth immediately North of the coal terminal has commenced. The tanker berth, to be known as Berth 209 will have a designed depth of −12.8 m. and will be capable of handling 50,000 d.w.t. tankers. The berth is scheduled for completion in September 1979 and will initially be confined to the import of butadiene.

GENERAL: The harbour and the quays are owned by South African Railways and Harbours.

Provisions: Stores and provisions can be obtained through local Ships Chandlers.

Game Parks: National Parks Board Game Reserves (Hluhluwe and Umfolosi) are within easy reach of Richards Bay by car.

Car Hire: Cars can be hired, through the Agents at reasonable cost to officers and responsible crew members only. An International Driving Licence is required to make use of this service.

Navigational Aids: Lighthouse (500,000 candlepower) to be constructed North of the harbour at position 28° 48′ S., 32° 06′ E.

Leading lights – Front 28° 47′ 24.725″ S., 32° 02′ 44.711″ E.

Breakwater tip lights (2 flashes per 5 secs.) South light Red, North light White.

Tides: Tidal change between HWOST and LWOST is approximately 2 m.

Prevailing Winds: South Westerly; North Easterly.

SHIPMASTER'S REPORT: December 1978.

Pilotage: Compulsory.

Restrictions; At the present time vessels cannot enter or leave during the hours of darkness. However, 24 hour service is under consideration. Vessels able to dock and un-dock at any stage of the tide.

Max. Size: 155,000 d.w.t. LOA 314 m., beam 47.25 m., and max. draft 17 m.

Tugs: Three tugs available.

1. Voight .Schneider 4,200 h.p. Bollard pull 43 tons.
2. Diesel electric 2,270 h.p. Bollard pull 30 tons.
3. Steam, Bollard pull 25 tons.

Radio: Richard's Bay Signal Station and Port Control.

VHF; Channels used 16, 9, 11, 12, 13 and 14. Pilot and Port Authority on Channels 16 and 12.

Berthing: Distance from entrance to berth 3.5 miles. Maximum size 155,000 d.w.t., length 314 m. and max. draft 17.1 m.

Hours of movements within the port, 0600 hrs. to 1630 hrs. A multi-purpose bulk handling appliance is presently being erected. There are 8 cranes of 4 tons capacity and 5 cranes of 15 tons capacity available. No Ro/Ro facilities. No floating crane available. Port not geared to handle palletised cargoes.

Consuls: Nearest Consuls in Durban.

Facilities Available: Fresh water; Fresh provisions; Repairs (limited); Machine ship (limited); Airport; Lloyd's Surveyor; Salvage Surveyor (from Durban); Laundry service; Bunker fuel oil and diesel oil (at coal berth); Lubricating oils; Doctor and hospital; Groceries and Meats.

AUTHORITY: South African Railways, Port Captain, Richards Bay.

AGENT: Freight Services Ships Agency Company Limited, P.O. Box 247, Richards Bay. 3900. Telephone 5225, 5319. Telex: 6–0434. Cables: Baybulk.

SALDANHA BAY: 33.02 S. 17.58 E. (See Plan Book)

DOCUMENTS: *Port Health:*

1 Maritime Declaration of Health.
1 Vaccination List.
1 Crew List.
1 Valid De-ratting Exemption Certificate.

Immigration:

3 Crew Lists only.

Customs:
1 Crew List
1 Ship's Stores List.
1 Crew Declaration.
Agents:
2 Crew List.

Customs: Arrangements have been made with Customs that loading shall commence before Customs Entry is completed. Customs will normally board on arrival for the purpose of checking and sealing Bonded stores, etc.

Immigration: On arrival at the port, any vessel which is not cleared by Immigration shall show the 'I' flag. No persons may disembark or embark without the express permission of the Immigration Officers until such time as Immigration formalities have been completed.

PILOTAGE: Pilotage is compulsory at Saldanha Bay, and is undertaken by fully qualified Master Mariners employed by the South African Railways and Harbours.

APPROACHES: Masters of vessels are warned not to proceed too close to the shore line in the vicinity of Saldanha Bay harbour, nor to enter the S.B.H. limits without a Pilot. The Wasserfall Bank situated between Jutten and Malgas Islands across the entrance to the outer bay constitutes an unmarked hazard. The recommended position to embark the Pilot is North Head light × 050°T (ships in ballast only). Distance 2 nautical miles but *not* in any circumstances closer to the Saldanha Bay harbour limits.

Ships in loaded or part loaded condition should board Pilot in position North Head light 030° distance 3 nautical miles.

MAX. SIZE: LOA, 350 m. Draft, 21.25 m.

HEALTH: Vessels requesting free pratique should cable Port Health, Cape Town, via Cape Town Radio (ZSC) at least 24 hours before arrival. There is no charge for messages addressed to Port Health. When free pratique cannot be granted, then the vessel will be required to show the 'Q' flag on arrival and will be boarded by Port Health Inspectors at the anchorage in Saldanha Bay.

RADIO: Saldanha Bay will be served by Cape Town Radio (ZSC).

Arrival: Vessels calling at Saldanha Bay to load ore will be required to send their ETA 96 hours prior to arrival, stating the approx. tonnage of ore required, the type of ore and the loading programme. Further messages will be required to be sent at 48 hours and 24 hours prior to arrival, updating the ETA. These ETA's are to be sent via Cape Town Radio (ZSC) addressed to Port Captain, Iscor Maritime Co-ordinator and also to the Agent. In addition, VHF contact on Channel 16 or MF on 2182 kHz must be established as soon as possible with Port Control. As pilotage is lengthy, arrangements to dispatch pilot vessel must be made at least 3 hours before ETA.

Vessels calling at Saldanha Bay after leaving Cape Town will be required to send by telex their ETA 24 hours before the expected time of arrival at Saldanha Bay, together with their final tonnages of cargo required, type of ore and loading programmes.

With the final 24 hour ETA the Master will be required to provide the draft forward and aft, and the de-ballasting time required on arrival. If there is any change to this programme a further message should be despatched as soon as possible after any such change is known.

48 hours prior to arrival, in addition to the updated ETA, the vessel must indicate her requirements, i.e. fuel, fresh water, other services to Port Captain, Iscor Maritime Co-ordinator and the Agents. Final advice of loading programme:

1. Quantity
2. Grading
3. Sequence

to be provided at least 24 hours before Notice of Readiness is given. Failure to provide this information may result in a delay of 12 hours before loading commences. Vessels are to request docking instructions from Port Control 6 hours before arrival. Instructions will be given promptly and concisely.

Vessels will be loaded in regular turn subject to cargo availability and Charter Party Lay Days, providing they berth with hatches open and are ready for loading in all respects.

VHF: *Port Control:* Saldanha Bay Port Control is equipped with VHF and contact can be made direct using Channels 16, 12, 11, also MF 2182.

Tugs: The tugs operate with VHF Channels 1 – 28 and 60 – 88, and radio telephone.

TUGS: There are 3 tugs stationed in Saldanha Bay Harbour operated by the S.A.R. & H. Each tug is propelled by Voith Schneider gear, and is of 4,000 h.p. and 42 ton bollard pull.

BERTHING: The jetty construction is of the caisson type, spanned with a deck construction between the caissons. The total jetty length is 991.65 m. and the total mooring length available will be 650 m. for iron ore loading vessels and 310 m. for oil tankers at a depth of 23 m. below chart datum. Vessels can be accommodated on both sides of the jetty and the jetty is equipped with adequate quick release hooks and fenders.

The design of the jetty makes provision for the mooring of 350,000 d.w.t. loaded vessels with a max. theoretical approach speed of 18 cm./sec. In practice, the approach speed of a vessel will be limited to between 10 and 12 cm./sec. as a maximum. The approach speed and relative position of a vessel to the jetty will be measured by docking sonar equipment, suitably positioned on the jetty and information will be relayed to the Pilot by means of light indication, radio and a portable instrument.

The width of the dredged area is 260 m. maximum on either side of jetty, tapering to 220 m. at the oil jetty, 380 m. at No. 4 Buoy and 400 m. at No. 1 and 2 Buoys.

A turning basin with a diameter of 580 m. and a depth of 23.20 m. below CD is provided in the navigational channel, seaward of the jetty.

From the turning basin seawards the depth of the navigational channel increases to 23.45 m. CD and eventually to 23.70 m. CD in the section marked by buoys. From the outer buoys the depth increases from 24 m. to 45 m. at the outer harbour approaches.

Loading: Bulk ore loading will be effected by means of two luffing, slewing and travelling ship loaders, together capable of loading continuously at a rate of 8,000 t.p.h. average, with a peak rate of 10,000 t.p.h.

MEDICAL: *Hospitals:* There is a fully equipped hospital in Vredenberg, 13 km. from Saldanha Bay. Serious medical cases, however, will normally be referred to one of the hospitals in Cape Town.

Doctors: There are several doctors available in Saldanha Bay and nearby Vredenberg. To expedite appointments, however, and to arrange for attendance on board, Agents should be consulted.

Dentist: There are several dentists available in the area, and in order to expedite appointments, Agents should be consulted.

AIRPORT: International Airport near Cape Town. Military airport locally but special landing rights have to be applied for.

FRESH WATER: Fresh water will be delivered at the rate of 35 t.p.h., and at a cost of 45 cents per kilolitre. Application for the supply of water should be made to Port Captain through the Agents.

FUEL: Bunkers, not yet available ex jetty.

CONSULS: There are no Consulates established in Saldanha Bay, but the following countries are represented at Cape Town:

Argentina
Australia
Austria
Belgium
Bolivia
Brazil
Canada
Chile
China (Taiwan)
Denmark
El Salvador
Finland
France
Germany
Greece
Holland
Italy
Japan
Monaco
Norway
Panama
Peru
Portugal
Rhodesia
Spain
Sweden
Switzerland
United Kingdom
U.S.A.
Uruguay

CUSTOMS ALLOWANCE: Customs normally allow 200 cigarettes per person. No alcohol allowed for crew but one part bottle and 8 cans of beer allowed for each Officer on arrival. Re-issues are made every 4 days.

HOLIDAYS: The following are recognised Public Holidays in the Republic of South Africa:

New Year's Day, January 1st; Good Friday; Easter Monday; Ascension Day; Republic Day, May 31st; Settlers' Day, September 4th; Kruger Day, October 10th; Day of the Covenant, December 16th; Christmas Day, December 25th; Boxing Day, December 26th.

Should any of the abovementioned days fall on a Sunday, the following Monday is observed as a Public Holiday.

These do not affect Ore/Oil Cargo operations, working 24 hours per day, 365 days per year.

TELEPHONES: Telephone facilities are available from the jetty. In order to obtain a telephone, however, arrangements will have to be made by the Agents. In this respect we would point out that many foreign countries have direct dialling facilities with South Africa, and in all cases arrangements should be made for lockable telephones to be placed on board, and the use of that telephone placed under the control of the Master.

GENERAL: *Removal of Rubbish:* Arrangements are available for the removal of rubbish and can be made through the Agents.

Weather: The climate is temperate. Average high temperatures year round are 20°C (68°F) and average low temperatures are in the region of 11°C (52°F). Sea water temperatures average 16°C. Prevailing winds in Summer are SSE'ly and in Winter NW'ly. Rainfall figures are approximately 300 m.m. per annum. Saldanha Bay is a Winter rainfall area. Fog occurs generally in the March to August period. Currents – there are no sea or thermal currents in the harbour area. Tidal currents generally will not exceed 0.05 km./hr.

Currency: The standard unit is the Rand. One Rand divided into 100 cents. Exchange rates vary, but for practical purposes at the time of writing, one can use the figure of $1.12 equals R1.

Electricity: Can be made available ex jetty on application to S.A.R. & H. via the Agents.

Compressed Air: Will be available ex quay on application to S.A.R. & H. via the Agents.

Cranes: A mobile crane will be made available through S.A.R. & H. via the Agents.

Ship Chandlers: Local Chandlers now operating.

Sporting Facilities: Can be arranged for all sports through the Port Captain in co-operation with Military and Naval Authorities in area.

DEVELOPMENTS: New 250 m. quay to be constructed on West side of causeway for shipping ore concentrates and general cargo. Cranes will be available. Due completion January 1980.

Dredging works in progress on approach channel to new quay which will be at 12.50 m. Quay will handle ships of 30,000 d.w.t. initially.

SHIPMASTER'S REPORT: 1977 (Vessel – 150,000 d.w.t. OBO)

Port Limits: A line drawn between North Head and South Head lighthouse. Vessel considered arrived after passing these limits. Notice of Readiness accepted when first hatch open ready for loading or when berthing completed if vessel docks with open hatches.

Documents: Request Radio Pratique 48 hours before arrival giving (1) Name and Nationality of Vessel (2) Last Port (3) Destination (4) Health condition on board (5) Number of crew and passengers (6) Type of cargo or in ballast (7) ETA.

Pre-arrival cable via ZSC Capetown to Iscor Vredenburg, Port Captain Saldanha and the vessel's Agents.

Advise ETA 96, 48 and 24 hours out and if any changes. With 24 hours ETA, or earlier if available advise Agents:–

(a) Final stowage required and types of ore. (Hatch Totals).
(b) Loading sequence. (Hatch Runs, Trimming stops, etc.).
(c) Deballasting time required.
(d) Drafts on arrival, estimated drafts on sailing.
(e) Whether OBO vessel and whether or not in possession of gas-free certificate.
(f) On vessel's first call – Summer d.w.t., LOA, breadth from foremost hatch coaming to bow, aftermost hatch coaming to stern, distance upper gangway platform to stern and whether leading forward or aft. Advise agents all requirements 48 hours pre-arrival.

Port Papers: 4 copies Crew and Passenger list.
3 copies report inward DA1 to DA3 (Agents supply).
1 Crew declaration.
1 Store list.
1 Slop chest list.
1 Livestock list if applicable.
1 Gasfree Certificate.

If vessel's last cargo oil and no gasfree certificate on board, Agents will arrange if pre-advised, chemist comes from Capetown.

Pilotage: Compulsory. Pilot boards off North Head but in practice comes some way to seaward to meet vessel. Cutter is a rakish red craft capable of 23 knots, fitted VHF, all normal Channels. IMCO regulation pilot ladders required complete with manropes. There is only 1 Pilot in the port.

Anchorage: Vessels are not permitted to anchor in the bay and swell and depth of water make the area to seaward unsafe: Pilot advises anchoring in Saint Helena Bay if extended anchorage is anticipated.

Restrictions: Vessels with drafts up to 21.00 m. can be handled at high tide and the ports largest vessel to date (9/77) was a 250,000 tonner. When the developments are complete it is expected that vessels of at least 350,000 d.w.t. can be handled.

Pratique: See "Documents".

Radio: ZSC Capetown for messages, and the Port Radio Service on arrival.

Radar: Decca 50S surveillance radar system in Port Control Office, manned 24 hours – VHF communication.

Tugs: 3 Voith Schneider tugs of 3,960 b.h.p. each. Tugs connect to vessel in berth approaches. Tugs lines at no extra charge.

Berthing: Vessels berth against Yokohama fenders on either East or West side of quay. Ordinary moorings but extra moorings available on hire during infrequent heavy swell conditions. Vessels are always swung to berth head out. There is apparatus for indicating vessel's approach velocity.

Handling Facilities: 2 ore loaders nominal capacity 10,000 t.p.h., 1 loading and the other placed for next run. Actual load rate about 7/8,000 t.p.h.

Medical: Services available. Advise through Agents pre-arrival. Small hospital at Vredenburg and extensive facilities in Capetown, 1.5 hours away.

Tankers: No facilities. VLCC berth being constructed to seaward on continuation of ore jetty.

Density: Salt – 1025.

Fresh Water: Available ex-jetty at about 40 t.p.h. Ship's crew connect hose.

Fuel: Not available at present. Small stocks of diesel and gasoil. Presume heavy oil could be supplied by coaster ex-Capetown if pre-arranged.

Repairs: Small repairs are possible locally. Major repairs can be handled from Capetown, Globe Engineering have a branch at Saldanha. If vessel has urgent repairs pre-arrange attendance with Agent. *Note:* Permission is required to immobilize main engine. Also advantageous to pre-arrange.

Surveyors: Available on request from Capetown for all Societies.

Watchmen: Not required, but readily available.

Customs Allowance: (Period of 4 days) – Local officer enforces allowances.

Master: 230 gm. tobacco (any form), 1 litre spirits (any form), 3 litres of wine, 3 litres beer or stout.

Officers and Petty Officers: 173 gms. tobacco, 1 litre of spirits, 3 litres wine, 3 litres beer.

Crew: 115 gm. tobacco, no spirits, no beer, 3 litres wine.

Wine only permitted on ships where wine is part of rations – French, Italian, Spanish vessels etc.

Repatriation: Readily available, 1.5 hours in car to Capetown, thence by International air network. Due regularity of crew changes off Capetown there are competing courier services etc., so very few delays. Hotel accommodation is available Saldanha if required.

Time: South African Standard.

Holidays: Port operates through 365 days a year.

Police/Ambulance/Fire: Through loading foreman's Walkie Talkie.

Telephones: Not available.

Services: Cleaning gangs, riggers, watchmen, etc. readily available.

Shore Leave: Saldanha town 10 miles from dock.

Identity Cards: Not required.

B/L Figures: By survey of ship's drafts. Vessels are not permitted to submerge their Plimsoll Lines, avoid sag or shortshipment inevitable.

General: Provisions and laundry available from Capetown, cable in, lorries permitted on dock provided no interference with operations. Service technicians also available from Capetown.

Trip to and from Capetown regularly and routinely undertaken by all and sundry involved at Saldanha, but to avoid time loss and delay ensure that wherever possible contractors and Agent are aware of requirements.

AUTHORITY: The South African Railways and Harbour Administration.

AGENT: See "Capetown".

WALVIS BAY (South West Africa): 22.57 S. 14.30 E. **(See Plan Book)**

PORT LIMITS:

The area bounded on the West by a line drawn from Pelican Point Lighthouse to a point North (true) for a distance of 4 km; on the North by a line from this point drawn East (true) to the mainland; together with the foreshore therein and the jetties, harbour works and harbour lands vested in the Government of the Republic of South Africa. For the purposes of calculating port charges a vessel is regarded as an "arrived ship" when it enters the dredged channel in Walvis Bay Harbour or when the vessel anchors in the port limits.

DOCUMENTS:

Customs:
Form DA. 1 – Report Inwards/Outwards for ships;
DA. 3 – Certificate of Clearance for ships;
DA. 4 – Transire – for a destination in R.S.A.;
DA. 5 – List of Sealable goods on board ship;
Ship's Crew List (Customs Department);
Livestock Form (Customs Department).

Post Office:
Form P. 160 – Notification of Departure of Vessel;
P. 1/27 – Certificate of Departure of Vessel;
P. 1/149 – Ships Mail Declaration;
P. 21 – Post Office Certificate.

Port Health:
Maritime Declaration of Health;
Crew List with last vaccination dates;
Deratisation Certificate.

Port authority:
Form T 958 – Report of Arrival;
T 962 – Departure/Shifting Notification;
T 942 – Clearance Certificate;
Ship's Manifest.

PILOTAGE: Pilotage is compulsory. The vessel's Master must radio his ETA to his local Agent, who completes form T.958 for submission to the Port Authority.

Channel 16 on VHF radio can be used to call the Port Control Office. Pilot boats are normally black with a white superstructure and have a yellow funnel with horizontal green stripes.

The Pilot boards at a point approximately 1 km. from the Fairway Buoy (entrance channel buoy) in the direction of the Bell Buoy (Pelican Point Spit Buoy).

The Pilot will inform the Master by means of the VHF on which side the pilot-boarding ladder and manropes are required.

ANCHORAGE: Varying in depth from 9 – 14 m. at LWOST. Bottom – sand and silt. (Please also see "Africa Pilot" Vol. II).

RESTRICTIONS: The movement of Oil Tankers and vessels carrying explosives or dangerous goods are restricted to daytime hours. The maximum permissible draft is 9.4 m.

MAX. SIZE: Draft of vessels is the major restricting factor (9.4 m.). The maximum permissible length at the tanker berth is 192 m.

HEALTH: Same procedures apply as at R.S.A. ports.

RADIO: Call sign ZSV. VHF radio in Port Captain's Office.

VHF: VHF Radio is used by Pilots and Channels 11, 12 and 13 are available.

RADAR: Radar is fitted to the harbour tugs and pilot boats. The Port Captain's Office is awaiting installation of port operations Radar.

TUGS: Two first-class tugs equipped with radar, wireless telegraph and telephone direction-finding apparatus and salvage and fire-fighting appliances; 2 Pilot boats and 1 launch.

Tugs normally join a vessel in the entrance channel and are secured by means of the tugs' wires. There is no charge levied for the use of the tugs' lines.

BERTHING:

Wharf	*Length*	*Depth at LWOST*	*Cranes No.*	*Cranes Capacity*
Berths 1, 2 & 3	487.68 m.	10.06 m.	5	4 tons
(Working Portion 457.2 m.)			1	15 tons
Berths 4–8	926.6 m.	10.67 m.	22	4 tons
			1	15 tons

BULK-LOADING FACILITIES:

(i) Travelling ore loader for handling zinc, lead and copper concentrates for export. (This appliance is privately owned).

(ii) Privately-owned Bulk Fishmeal Loaders.

(iii) A fish-oil pipe-line at Berths 1, 2 and 3.

SPECIALISED CARGO-HANDLING FACILITIES: Ro/Ro berth will be introduced early 1979. Container stacking area and 2 container stacking cranes presently under construction for completion October 1978. Ships gear will still be required for loading and unloading containers. Liquid chemicals are handled in tank containers.

STEVEDORES: Stevedoring is undertaken by private enterprise and stevedores are appointed by Ships' Agents.

MEDICAL: Hospitals are available but prior arrangements have to be made with Agents for medical assistance.

TANKERS: See "Max. Size" and "Restrictions".

Tankers up to 192 m. in length can be accommodated. Depth alongside 10.06 m. at LWOST.

Storage and pumping facilities are privately owned.

DENSITY: 1025.

FRESH WATER: Available and delivered by hose ex-wharfside – hydrant at 15 t.p.h.

FUEL: Diesel fuel is available but heavy oil is only available if special arrangements are made with the local oil companies.

FIRE PRECAUTIONS: When berthed alongside a wharf or jetty, a ship having explosives or any other goods of a dangerous nature, the Master shall, if the Port Captain so directs, have a fireman in attendance, the cost whereof shall be borne by the Owner of the ship and the Master of any such ship shall also, at the expense of the Owner of the ship, adopt such other or further precautionary measures as the Port Captain may consider reasonably necessary for ensuring the safety of the harbour, the ship or the cargo.

CONSULS: Norwegian and Belgian Consulate.

REPAIRS: Undertaken by private enterprise on a small scale.

DRY DOCK: There are no dry-docks available at this port. A syncrolift with a lifting capacity of 2,000 tons, maximum permissible length of 80 m. and a depth of 10 m. is operated and owned by the Department of Sea Fisheries.

SURVEYORS: Available for various classification societies.

GANGWAY/DECK WATCHMEN: Arrangements have to be made with vessel's Agents to secure services of gangway/deck watchmen.

HATCHES: Arrangements have to be made with stevedores in connection with opening/closing of hatches.

CUSTOMS ALLOWANCE: As per Customs Tariffs.

CARGO GEAR: Loading/discharging of cargo is effected by means of shore cranes.

REPATRIATION: All facilities available.

AIRPORT: The nearest International Airport is at Windhoek 445 km. from Walvis Bay.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; Ascension Day; Republic Day (31st May); Settlers Day (first Monday in September); Kruger Day (10th October); Day of Covenant (16th December); Christmas Day; Boxing Day (26th December).

Cargo is now worked on Saturdays, Christmas Day and Good Friday.

POLICE/AMBULANCE/FIRE: South African Police Tel. 2055; Ambulance Tel. 3441; Fire Department; Municipal: Tel. 3117; South African Railways: Tel. 8-200.

TELEPHONES: Arrangements have to be made with Post Office to have a telephone connected.

SERVICES: Tank-cleaning, compass adjustments and minor-repairs can be undertaken.

SHORE LEAVE: Allowed.

REGULATIONS: A copy of the Regulations for the Republic of South Africa and of South West Africa are supplied gratis to Masters on arrival.

DELAYS: Dependant on weather conditions.

AUTHORITY: South African Railways and Harbours Administration, Port Captain, Walvis Bay.

AGENT: W. Woker Freight Services (Pty) Limited, 166 Third Street East, P.O. Box 4, Walvis Bay. Tel. 2211/8; Telex: 56-747; Cables: Freights Walvis Bay.

NOTES

Please also advise Shipping Guides Ltd.

South Atlantic Islands

ASCENSION ISLAND, GEORGETOWN:

07.55 S. 14.20 W.

DOCUMENTS: Crew and Passenger lists, Health documents, Manifests and Bills of lading if discharging cargo.
PILOTAGE: No pilots are available and not required as it is an open anchorage. Require 48 hours notice of ETA. Ascension Radio operated by Cable & Wireless will reply.
RESTRICTIONS: None – but if vessel has not been here before it would be advisable to wait until daylight.
ANCHORAGE: Only 1 ship can anchor at a time. There is 14 fathoms of water in the anchorage and vessels of 28,705 tons have used this anchorage. The other anchorage used by tankers is at English Bay and there is a special berthing procedure which the Oil Company give to Captains of tankers.
HEALTH: Pratique should be requested when giving the ETA and will be granted by either Cable or VHF.
RADIO: If coming from the North via Freetown Radio, and from the South via Cape Town. VHF Channel 16 available.
TUGS: No tugs available.
BERTHING: Open anchorage only, no berthing alongside.
MEDICAL: Facilities available, if possible 48 hours notice required. There is a 12-bed hospital in Georgetown and a second for American personnel at the U.S.A.F. Base. Inoculation, vaccination and yellow-fever certificates not required. Other than Government personnel no one is allowed to land on Ascension without an entry permit.
TANKERS: Only 1 berth available at anytime.
FRESH WATER: None available.
FUEL: None available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Usually done by stevedores.
CONSULS: No Consulates. British Administrator attends to all requirements.
REPAIRS: Only minor repairs can be effected.
REPATRIATION: No facilities for crew changes. Repatriation can be arranged but only in the case where a person has been hospitalised. If a ship puts in with a medical case on board an M.O. will visit the ship. Fees paid to the Cable & Wireless representative. If the patient is hospitalised the Master must guarantee in writing that all hospital fees and the air fare to Antigua will be honoured by his shipping line Agent. As so few ships call at Ascension no hospitalised patients can be evacuated by sea. All patients received from ships are evacuated on M.A.C. flights to Antigua. These flights are run weekly.
AIRPORT: Airport 2 miles. U.S.A.F. No civil airlines call here.
TIME: Always GMT.
HOLIDAYS: Cargo vessels are discharged during public holidays – no night work.
GENERAL: There are no facilities for visitors on the island. Anchorage must be vacated when a mail vessel is due.
SHORE LEAVE: Not permitted.
AUTHORITY: The Administrator.

FALKLAND ISLANDS, PORT STANLEY:

51.50 S. 58.56 W. **(See Plan Book)**

PORT LIMITS: West of the line joining Mengeary Point and Cape Pembroke.
DOCUMENTS: Crew Lists, Passenger Lists, Customs, Health Documents, Manifests, Bills of Lading, Ship's Papers, Ship's Certificates.
PILOTAGE: Pilotage should be requested via Cable & Wireless Radio Station. 24 hours notice of arrival required. Frequency 2182.
ANCHORAGES: For large vessels, the anchorage is somewhat confined; except S. of Navy Point, where there is good swinging room in depths of from 8.2 m. to 10.4 m. (27 ft. to 34 ft.), it is necessary for a long vessel to moor. There is good anchorage N.N.E. of the cathedral, but, owing to the prevailing strong W. winds, a vessel may have some difficulty in turning, when leaving this position. The best time to leave is after 1800 hrs. or before 0800 hrs. as, unless there is a widespread area of bad weather over the islands, the wind, which is local, is seldom strong between these hours. The holding ground is good, and vessels have not dragged during winds of up to force 8, though a second anchor is often necessary.

The bottom of the harbour is stiff mud, which is very noisome and sticky; it is necessary to allow plenty of time for cable washing when weighing.

Two oil barges and numerous small boats, none of which exhibit a riding light at night are moored at the South side of the harbour.
RESTRICTIONS: No restrictions on entry.
RADIO: Cable & Wireless Ltd.
RADAR: No port radar service.
TUGS: No harbour tugs.
BERTHING: Falkland Islands Company jetty with a depth of 1.5 m. at its head. T shaped Head.
CRANES: 1 × 5-ton crane.
BULK CARGO FACILITIES: Nil, drummed cargoes only are handled.
STEVEDORES: 1 week's notice required. If Falkland Islands Company charter vessel (4 voyages a year) is being worked then stevedores will not be available until work on the charter vessel has been completed.
MEDICAL: Advance notice required.
TANKERS: Advance information should be sought.
DENSITY: Full salt water.
FRESH WATER: Available at night. Delivery by direct hose. Cost £1 per ton +33% of the cost of the labour involved.
FUEL: Fuel is available only by special arrangement with the Ministry of Defence. Grade 47 Cetane (viscosity cSt 100° F – 1.8; s.g. at 15° C – 0.840). Delivery by lighter and pump.
FIRE PRECAUTIONS: Normal safety requirements.
CONSULS: Norwegian, Uruguayan.
REPAIRS: Minor repairs to machinery.
DRY DOCKS: Nil.
SURVEYORS: Not available.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCE: Quantity permitted by crew is one bottle of spirits, 200 cigarettes or 1 lb. of tobacco, 6 bottles of wine, 1 case (24 cans) beer.
CARGO GEAR: There is 1×5-ton crane. Ships gear may be used.
REPATRIATION: With a twice weekly Air Service repatriation could be arranged.
AIRPORT: 5 miles from Port. Feeder airlines connect with Comodoro Rivadavia, Argentina.
TIME: GMT minus 4 hours. Summer time from October to end of March.
HOLIDAYS: Cargo can be handled on the 10 public holidays.
POLICE/AMBULANCE/FIRE: Police – 95; Fire – Exchange; Ambulance 54 (2 rings).
TELEPHONES: Connection possible at rate of £20 a year.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Seamans book sufficient.
REGULATIONS: No particular or unusual regulations.
DELAYS: Delays may be experienced if berthing alongside only commercial jetty if firms charter vessel is being handled. Four voyages a year: – turn around 1 week.
DEVELOPMENTS: No port developments under way.
AUTHORITY: Harbour Master.

ST. HELENA, JAMESTOWN: 15.56 S. 05.40 W.

PORT LIMITS: Within 3 miles radius of the port. Laytime commences at the anchorage.
DOCUMENTS:

3 copies of Crew List.
3 copies of Passenger List.
10 copies of Manifest.
1 Health form.

PILOTAGE: No official pilot. Agents sometimes hire a Pilot for ships requiring one.
ANCHORAGE: The harbour consists of an open roadstead with anchorages shown on charts.
MAX. SIZE: Any size vessel can enter the Port. There is little rise and fall of tide and current negligible.
HEALTH: Pratique will be granted by the boarding party or by telegram from Port Health Officer. If suspected disease or fever, the Port Health should be informed by telegram in advance of anchoring so that the necessary precautions can be taken.
RADIO: Name: St. Helena Radio. Call sign for W/T working – ZHH. Frequencies: 500 and 461 kHz. A2, A1. 12963.5 kHz. A1. Working Hours: 500 and 461 kHz – Weekdays from 0800 to 2000 GMT. Sundays from 0800 to 1300 GMT. 12963.5 kHz – Daily except Sundays from 1200 to 1300 GMT. Listening watch on Channel 5 and Channel 6.

Call sign for R/T working – St. Helena Radio. Frequencies: 2182 and 3162 kHz A3H, A3J and A3A. 4397.7, 8737.5 and 13150.4 kHz. A3J A3A. Working Hours: 2182 and 3162 kHz – Weekdays from 0800 to 2000 GMT. Sundays from 0800 to 1300 GMT. 4397.7, 8737.5 and 13150.4 kHz are only operated on request and ships should answer on Channels 414, 807 and 1217 respectively.
TUGS: None. There are 3 towing launches (from 16 to 28 h.p.) for harbour use only.
BERTHING: Vessels anchor in 18–20 fathoms offshore, in open roadstead. There is deep water (sufficient for ocean-going vessels) right into the area where cargo lighters and other small craft are moored.
STEVEDORES: 48 hours notice required by Agent, also particulars of tonnage of cargo.
MEDICAL: Agent should be notified if medical attention required. A resident staff of three doctors, plus nursing staff, in a well-equipped modern hospital. The basic requirements for intending visitors is a certificate of vaccination against smallpox.
FRESH WATER: Delivered by floating pipeline at a rate of approximately 14 t.p.h.
FUEL: No stocks of marine fuel. Ordinary diesel oil is available in drums of 45 gallons (supplied ex South Africa) and only limited stocks for local needs are held.
OPENING/CLOSING HATCHES: Stevedores can do this, but preferable for crew to open on arrival so that work can start as soon as stevedores arrive on ship.

NOTES

Please also advise Shipping Guides Ltd.

CERTIFICATES: Vaccination certificates required for all crew. Derating certificate should be valid.
CUSTOMS ALLOWANCE: No restrictions. Free use on board.
CARGO GEAR: All discharge carried out by vessels derricks into lighters. Agents provide own cargo nets, etc. There is one 30-ton shore crane.
CONSULS: French Consul. Appointed representatives for Denmark and Norway.
REPAIRS: Small repairs can be carried out (welding or turning pipes, etc.).
REPATRIATION: No facilities for crew changes. Only for those left behind for hospitalisation.
AIRPORT: No airport on St. Helena.
TIME: GMT throughout the year.
HOLIDAYS: New Year's Day (1 January); Good Friday; Easter Monday; St. Helena Day (21 May); Whit Monday; Queen's Official Birthday; August Bank Holiday; Christmas Day (24 December); Boxing Day (25 December). Cargo work can be arranged except on Christmas holidays.
POLICE/FIRE/AMBULANCE: No telephone numbers. Must ring exchange.
SHORE LEAVE: Allowed. No restrictions provided vessel has free pratique.
DELAYS: No delays in berthing. Loading or discharge can be delayed by bad weather due to swell alongside wharf.
AUTHORITY: Harbour Master.

Spain

AGUILAS and HORNILLO: 37.24 N. 01.35 W. (See Plan Book)

DOCUMENTS: See "Almeria".
PILOTAGE: Hornillo port has no Pilot. The Pilot of port of Aguilas which is less than a mile from Hornillo, does pilotage services of both. To enter both ports Hornillo and Aguilas, anchor mile or a mile and half distance from entrance of Aguilas. Wait for Pilot with engine stopped. To call Pilot give three long blasts several times. Pilot's launch is small motor boat painted white, with letter "P" painted on both sides of boat. During night it carries white light on top of mast, and 8 ft. lower a red light, besides the usual lights.
RESTRICTIONS: It is not possible to enter Hornillo port during dark. Wait till dawn outside Aguilas.
MAX. SIZE: Length up to 145 m., draft about 29 ft.
HEALTH: See "Almeria".
TUGS: None in port. Not necessary for either port.
BERTHING: Aguilas port has a commercial quay with a berth area about 265 m. and depths of between 8–12 m. Hornillo port has a pier to handle minerals with berth area of 90 to 100 m. and depths between 6–10 m.
BULK HANDLING: Two conveyor belts each of 100 tons grain per hour capacity. May be used for other bulk cargoes.
STEVEDORES: Team of stevedores who belong to "Port Workers' Trade Unions" (Sindicato de Obreros Portuarios).
MEDICAL: Captain can send cables to consignee requiring this kind of service. There are a number of doctors and a hospital.
FRESH WATER: Available by pipe-line at berths.
FUEL: There are no supplies of fuel in either port.
GANGWAY/DECK WATCHMEN: Not necessary, usually this is done by crew.
OPENING/CLOSING HATCHES: Usually this is done by crew.
CONSULS: There is only Vice-Consul of Norway in Aguilas. Tel. 411035.
REPAIRS: No facilities.
REPATRIATION: Facilities for effecting crew changes exist. Repatriation can be done by train to Madrid and by plane from there.
TIME: GMT plus 1 hour.
HOLIDAYS: See "Almeria".
POLICE/AMBULANCE/FIRE: Ambulance and fire services can be requested from Port Authority. If the police services are required call to "Caseta de Vigilancia" of the Civil Guard in either port.
GENERAL: Hornillo port is used only for loading and discharge of minerals, and for this purpose a pier is provided with a railway. The nearest port of Aguilas, less than a mile distant on the West, is the commercial port, with a quay for loading/discharging and a crane of 10 tons capacity.
SHORE LEAVE: Crew members are allowed ashore.
AUTHORITY: Ayudante de Marina o Capitan del puerto (Port Authority or the Assistant) Aguilas.

ALGECIRAS: 36.07 N. 05.26 W. (See Plan Book)

DOCUMENTS:
Maritime Declaration of Health.
5 Crew Lists.
2 Manifests of Cargo for the Port.
2 Manifests of Cargo in Transit (if coming from Spanish port a Manifest is sent by the Customs officials of that port).
1 Bill of Lading of cargo for the port.
2 Ship's Stores Lists.
2 Lists of Crew Personal Effects.
If the vessel carries passengers the following are required:
8 Lists of Passengers Disembarking with baggage declaration for each passenger.
5 Lists of Passengers in Transit.
2 copies of Arrival Report.
1 Manifest of Vehicles belonging to Passengers Disembarking.
If the vessel is a tanker the following are required:
Certificate of Quantity of Cargo.
Certificate of Quality of Cargo (or Ballast Certificate).

PILOTAGE: Vessels entering the port call Pilot by international code signals, sound or light. Notice of ETA should be radioed to Agent 72, 48 and 24 hours before arrival. Pilots cannot be contacted by radio, and are ordered by Agents on the basis of Master's ETA.

Pilot boat is painted white with a letter "P" in black on both sides. By day they carry a blue flag with the letter "P" in white. By night they carry regulation pilot lights. The pilot boarding zone is a circle of 0.5 mile radius with centre 1 mile East of the Northern breakwater head (red light).
ANCHORAGE: Vessels waiting for a Pilot may anchor North of the parallel of the Barranco beacon in depths of 30 m.
RESTRICTIONS: Vessels may enter by day or night.
MAX. SIZE: Puerto de Algeciras – no length restrictions, max. draft 29 ft. Refineria Gibraltar – maximum length 283 m. Draft up to 65 ft.
HEALTH: Free pratique is obtained automatically when authorities board on arrival and Maritime Declaration of Health is completed. In case of suspected disease or fever on board full details should be sent by radio to Sanidad Maritima, Algeciras, before arrival.
RADIO: Aranjuez Radio and Cadiz radio. Vessels proceeding to Refineria Gibraltar should announce their arrival by VHF to the Capitania of the port using Channel 16 for calling and Channel 13 for communication.
TUGS: Four tugs are available up to 1,500 h.p. and assist according to Pilot's directions. Ship's tow lines used.
STEVEDORES: Ordered by vessel's Agent on basis of Master's ETA.
MEDICAL: Doctors and hospital facilities available. International vaccination certificates only required if vessel is proceeding from an infected area.
TANKERS: Refineria Gibraltar – 5 berths for tankers up to 283 m. length, 2 of which can accept draft up to 65 ft. The other 3 berths can accept vessels up to 57 ft. draft. Loading/discharge lines are 12 in., 10 in., 8 in., 6 in. and 4 in. Refineria Gibraltar has 2 slop tanks each of 600 cu. m. capacity which can accept oily residues.
FRESH WATER: Available from all berths in Algeciras and at Refineria Gibraltar at a rate of 40 t.p.h. Can also be supplied by barge at the rate of 15 t.p.h.
FUEL: All grades can be supplied with 3 hours notice. Loading rate 250 t.p.h. for fuel and 150 t.p.h. for diesel and gas oil. Supply is effected by barge at all quays which are not connected by pipe-line.
DEVELOPMENTS: In Algeciras Commercial Port a new berth is under construction in the South part of the dock for vessels up to 9 m. draft. It is planned to dredge the whole commercial port to 10 m. depth.

A new container terminal has been inaugurated, total length of berth 498 m.
GANGWAY/DECK WATCHMEN: Not available from shore.
OPENING/CLOSING HATCHES: Opened and closed by ship's crew.
CUSTOMS ALLOWANCE: Max. quantity of tobacco permitted in ship's stores is 3 kilos per crew member and 2 kilos per passenger. The quantity that may be held out of bond is 40 grammes tobacco per person per day. Wine/Spirits. 1 decilitre per person per day may be held out of bond.
CONSULS:

Great Britain	tel. 67.14.50	Germany	tel. 67.22.37
Morocco	tel. 67.36.98	Denmark	tel. 67.27.95

Norway, Italy, France, all tel. 67.27.20.
REPAIRS: Small repairs afloat can be effected. No dry docks.
AIRPORT: Nearest is at Malaga, 120 kms. from Algeciras.
TIME: GMT plus 1 hour all the year round.
HOLIDAYS: New Year's Day, 6th January, 19th March, Maundy Thursday, Good Friday, Easter Saturday, 1st May, Ascension Day, Corpus Christi, 29th June, 18th July, 25th July, 15th August, 1st October, 12th October, 1st November, 8th December, 25th December.
POLICE/FIRE/AMBULANCE: *Algeciras:* Police, tel. 67.15.55; Fire, tel. 67.20.20; Ambulance, tel. 67.22.90. *Refineria Gibraltar:* Police, tel. 67.15.55; Fire, tel. 76.17.00; Ambulance, tel. 76.12.47.
SHORE LEAVE: Crew members are permitted to go ashore subject to police control.
AUTHORITY: Comandancia de Marina.

ALICANTE: 38.23 N. 0.28 W.

PORT LIMITS: The line drawn from Cabo de las Huertas and Cabo de Santa Pola.
DOCUMENTS:
3 Crew Lists.
6 Passenger Lists.
2 Manifests for Cargo, including cargo in transit as well as cargo for Alicante. Tobacco and Cargo Manifests to be visaed by Spanish Consulate in port of origin.
3 Stores Lists, for Customs.
For the Agent
4 Manifests of cargo destined for Alicante, with one copy of each Bill of Lading.

PILOTAGE: Pilotage service is permanent and Pilots are summoned by displaying international code flag "G", (same signal at night-time by light), or by sounding three long blasts on ship's whistle. Pilot also on VHF Channel 16.

Pilot launch is a white-painted motor launch with a black letter "P" on both sides. The launch flies a black flag with white letter "P" by day, and shows usual pilot lights at night. The launch will meet arriving vessels about 1 mile from breakwater entrance in good weather.

In bad weather from the East, the launch goes out as far as the breakwater and meets vessel opposite the green light at the breakwater head. Pilot boards on the lee side, which is generally the port side.
ANCHORAGE: Vessels waiting to enter port may anchor at a distance of 0.5 mile East of the breakwater in depths of 16 m.
MAX. SIZE: Vessels of up to 225 m. length and 33 ft. draft can be berthed alongside. For tankers, max. draft. 29 ft.
HEALTH: Report in advance to Pilot if there is any problem. If situation is normal, then after ship berths the health inspector boards and quickly grants pratique. In the event of any suspected disease or fever on board the Pilot (without boarding) will show the anchorage area then Health Inspectors and Authorities will board and give necessary instructions.

Vessels entering after calling at another Spanish port have no problems obtaining pratique.

RADIO: Radio-telephone communication through Radio La Costera, Alicante, medium range approx. 220 miles and short range approx. 40 miles.

Port Radio station situated at the Western end of Muelle B, is equipped only to receive messages by R/T. Messages received by this station are passed to destinations within the port by telephone lines. VHF communication in operation.

TUGS: Only 1 tug available to assist berthing of 176 g.t. and 1295 h.p. Normally ship's lines used for connection with tug.

BERTHING: The breakwater extends in a S.W. direction and vessels berth within the breakwater. Max. depth being available at the outer end of the breakwater, decreasing in the N.E. direction.

Muelle 14: Extends along the length of the N.E./S.W. breakwater and depths vary alongside the berth from 11 m. at the S.W. end to 8 m. at the N.E. end. Depths in the outer port vary from 12 m. at the S.W. end to 9 m. at the N.E. end.

Muelle 12: Depth alongside 7.5 m., depth for the berth 9 m.
Muelle 10: Depths alongside the berth vary from 6 to 8.75 m.
Muelle 9: Depth alongside berth 8.75 m.
Muelle 7: Depth alongside berth 8.75 m.
Muelle 11: A combined tanker and dry cargo berth. Depth alongside berth 8.75 m.

STEVEDORES: Agents should be advised of ETA and shore cargo gear requirements.

Grain Discharge: effected by grabs normally at Muelle 11. Discharge 3 to 4 tons per gang per hour.

General Cargo: discharge about 10 tons per gang per hour.

Bagged Cargo: discharge about 150 tons per gang per hour.

MEDICAL: Many hospitals and medical services available.

TANKERS: Tankers discharge takes place at Muelle 11 (see "Berthing"). There is no refinery and the only products unloaded are fuel oil. diesel oil, gasoline and aviation spirit. There are 3 pipelines available for cargo discharge.

DENSITY: 1025.

FRESH WATER: Available from hydrants at the quays at the rate of 10 t.p.h., per hydrant.

FUEL: Supplied by Campsa. Vessels requiring fuel are requested to berth alongside Muelle 11 and will incur delays if that berth is already occupied. Maximum advance notice is essential. Owners of vessels requiring fuel are required to pay a bank deposit in foreign currency.

GANGWAY/DECK WATCHMEN: Agent normally arranges watchmen.

OPENING/CLOSING HATCHES: Normally opened by crew and closed by stevedores using cranes.

CUSTOMS ALLOWANCE: Total tobacco allowed on board, 3 kilos per crew member, 2 kilos per passenger. All must be declared in ship's provision list and any in excess of these amounts declared in a separate visaed manifest as tobacco in transit (see "Documents").

CARGO GEAR: All berths have cranes, varying from about 6 tons capacity. There is 1 heavy lift crane capacity 30 tons, and 1, capacity 10 tons.

REPAIRS: Only minor repairs available. If dry docking, or undertaking major repairs, vessels should proceed to Cartagena.

AIRPORT: About 8 km. distance from Alicante, and serviced by international flights.

IDENTIFICATION CARDS: Additional identification cards only required by crew members of communist-flag ships.

TIME: GMT plus 1 hour.

TELEPHONES: Telephones may be connected, provided sufficient notice is given, subject to payment of installation costs of about 7,500 Pts. plus the cost of calls.

AUTHORITY: Comandante Militar de Marina.

ALMERIA: 36.52 N. 02.30 W.

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists or negative.
2 Cargo manifests of goods destined to Almeria, as well as other cargoes in transit.
Store List in duplicate, including tobacco, spirits, radios, etc., belonging to vessel.
Details list in duplicate of all personal effects of crew and passengers (tobacco, spirits, cameras, radios, etc.).

Note: Tobacco. In case vessel carries more than 3 kilos of tobacco per man, excess must be declared in a separate manifest, which must be visaed by a Spanish Consul. In absence of Consul, said document will have to be visaed by an Authority of former port of clearance. Otherwise, the vessel would be fined.

PILOTAGE: Compulsory, service is permanent. Pilots board vessels by motor-boat in roads, near entrance formed by two breakwaters. This entrance is 287 m. wide. Pilot boats are painted white and letter "P" is painted in black on each bow. Also boats have a blue flag hoisted on mast, with letter "P" in white on both sides of flag. At night, boats have white light, under this light is a red light. When weather is bad vessels approach as close as possible to entrance so that Pilot can easily board the vessel.

ANCHORAGE: When harbour is congested, vessel can anchor at West Mole while waiting for berth.

MAX. SIZE: Only limitation is draft (max. 30 ft.).

HEALTH: Pratique is obtained immediately after berthing, when Health Officer boards vessel, In case of suspected disease or fever on board Master must send a radio message to Agents, in order that they advise the Health Officer. Following documents are required by Health Officer upon berthing: Maritime Declaration of Health, Deratisation Certificate, 1 Crew List.

RADIO: Nearest important radio stations are Cadiz-Radio and Palos-Radio.

VHF: Call Almeria Radio on Channel 16 for connection with pilot station.

TUGS: One available but not compulsory, is employed according to Master's requirements.

BERTHING: Prior to ship's arrival and in accordance with Master's ETA Agent attends Port Authorities to procure a proper available berth. Commercial quays have a length of 500 m. with double sheds, 360 m. with single shed with max. depth 24–25 ft., and about 700 m. uncovered for goods in bulk with depth between 24–30 ft.

Iron Ore Berth: Max. size 38,000 d.w.t. Max. draft 11.0 m. 1 ship loader, rate 2,000 t.p.h.

STEVEDORES: It is necessary that Master sends ETA so that Agent can inform Receiver's stevedores accordingly and arrange for proper reception of cargo and berth. Timetable of shifts available at the port; Daytime, normal working hours, from 0800–1200 hrs. and 1400–1800 hrs. (1 shift), 0800–1400 hrs. (1 intensive shift), 1400–2000 hrs. (1 intensive shift). Night time, from 1800 to 2400 hrs.; Sundays and holidays, from 0900 to 1200 and 1400 to 1800 hrs.

MEDICAL: Medical facilities are available; only it would be appreciated for Master to send a radio message if a crew member is in need of urgent medical attention.

FRESH WATER: Always available. Deliveries from quay available at all berths, supplying about 30 t.p.h.

FUEL: Ordinary fuel oil and gas oil is available at local refinery of "Campsa". It is advisable that Shipowners stem bunkers through their own Contractors, with an ETA of 48 hours, so that the order can be received in time.

FIRE PRECAUTIONS: Tankers perform their operations at the berth of "Campsa" at East Pier, which has the necessary fire precautions. No special precautions at other piers.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: This work normally carried out by crew.

CERTIFICATES: Vessel should have the usual documents on board, but only the Safety Wireless, Safety Equipment and Deratisation Certificates are required by Authorities.

CUSTOMS ALLOWANCE: The quantity allowed per each crew member is 3 kilos tobacco. (See "Documents".) Wine and/or Spirits: Only one bottle for each crew member.

CARGO GEAR: All commercial piers are served by electric shore cranes able to lift 3/6 tons (18 cranes in total), and one crane with a lifting capacity of 15/25 tons situated on Pier Costa.

IDENTIFICATION CARDS: Not required.

CONSULATES:

Denmark, Alvarez de Castro 22	tel. 212245
Sweden, Alvarez de Castro 22	,, 212245
Belgium, Paseo Generalismo 151	,, 214455
Holland, Paseo Generalismo 151	,, 214455
Finland, Aguilar Martell 7	,, 215954
Italy, Paseo Generalismo 18	,, 215790
France, Avenida Vivar Tellez	,, 220050
Colombia, Navarro Rodrigo 18	,, 213171
Panama, Jaul 27	,, 220073

REPAIRS: All types deck and engine repairs available.

REPATRIATION: Good facilities available.

AIRPORT: Airport is located about 6 km. from town, well served by regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January; 6th January; 19th March; (St. Joseph) Good Thursday afternoon; Good Friday; 1st May (Labour Day); Corpus Christi; 29th June (St. Peter and St. Paul); 18th July (National Holiday); 15th August; (Ascension Day); 12th October; 1st November; 8th December; 25th December and 26th December (second Christmas Day).

POLICE/AMBULANCE/FIRE: Police 214081; Ambulance 215780; Fire 220044.

AVILES: 43.35 N. 05.56 W. (See Plan Book)

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another Manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 3 kilos tobacco per crew member, the excess to be declared in a separate manifest, which must be visaed by the Spanish Consul at the last port, otherwise vessel exposed to heavy fine.

PILOTAGE: Telegrams to be sent to Corporacion de Practicos, San Juan de Nieva – Aviles Tel. 563013 or 566856.

Send ETA 2 hours in advance, confirming by VHF when vessel some 10 miles off. Pilots listen continously on Channels 16 and 12. When vessel in sight of lookout, give preferably audible signals in accordance with International Code. Pilot craft are painted black with a white "P" on each side and cabin. They are equipped with VHF and listen out on Channel 12, having also available Channels

16, 14, and 6. When coming alongside a vessel they hoist the "H" flag. Normally they remain within the port, going out to vessels up to 1 mile from La Forcada.

ANCHORAGE: Outside the port vessels can use the sector between N.W. and W.N.W. of La Forcada and at a distance of 0.5 mile from it, in 15 to 25 m. depth and sandy bottom. There are no sheltered anchorages. When awaiting a berth, vessels must remain at anchorage with one or two anchors.

RESTRICTIONS: Entrance channel 90 m. wide, 1,000 m. long up to San Juan de Nieva Dock. Depth at low water from 6 to 9 m.

MAX. SIZE: Length 150 m., draft 9 m.

HEALTH: Yellow flag to be hoisted, and once Health Authority has boarded, and the Marine Health Certificate completed, provided this is negative, clearance is automatic. This also applies if vessel is arriving from another Spanish port.

Health documents required: Marine Health Declaration if coming from another country, but if from another Spanish port, the Health Clearance Document from that port suffices.

Deratting certificate, or exemption certificate.

If coming from country where epidemic is in force, certificates of vaccination for each crew member.

If sickness on board, patient will be examined immediately and decision taken as as to clearance or isolation.

RADIO: If the vessel has short wave radio, messages can be sent to Aviles, but via Aranjuez Radio, Cadiz Radio, Teneriffe Radio (EAC 2/5) and Vigo Radio (EAF 2/5). If close to the coast, and medium wave radio is available, then messages can be sent to any of the other Spanish coastal stations. Messages sent purely with the telegraphic address "Pilots" are sent on by telephone to the Pilotage Authority.

TUGS: 5 tugs available up to 1,800 h.p.

BERTHING: 10 berths available.

Berth	*Length (m)*	*Depth (m)*
Raices	822.84	8.0
S. San Juan	300.00	6.0
W. San Juan	277.70	3.5
S.W. San Juan	90.25	2.0
New Fish Quay	303.00	5.0
Aviles Fish Quay	515.94	2.0–1.0
E. Ensidesa	300.00	9.0
E. and S. Ensidesa	715.00	7.0
S. Ensidesa	107.50	5.0
Endasa	132.84	7.0

CUSTOMS ALLOWANCE: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed on the stay of ship in port. 1 bottle of spirit per man.

DRY DOCKS: 1 dock at Las Canteres, owned by Entrecanales Y Tavora, length 50 m., width 9.50 m. Capacity 600 tons.

FRESH WATER: Supplies available in the San Juan de Nieva zone and at Ensidesa Quay in San Agustin Dock.

FUEL: Fuel and gas-oil can be supplied by barge at 200 t.p.h.

AIRPORT: Asturias Airport — 15 km. from the port under the control of the Aviles Customs Office at the airport.

TIME: GMT plus 1 hour, except during Summer when GMT plus 2 hours.

HOLIDAYS: Work can be arranged on 6th January, 19th March, 15th April (from 1400 hrs. onwards), 19th April, 28th August, 27th May, 29th June, 8th September, 12th October, 16th July (Mercantile Marine).

No work available on 1st January, 16th April, 1st May, 17th June, 1st November, 8th December, 25th December.

Important notes: The above dates refer to 1976 and does not show, since they fall on Sundays, 18th and 25th July when no work is available. It should be borne in mind that these are movable holiday dates, and amongst those on which no work is available are Good Friday, Corpus Christi, and those when work can be arranged are Holy Thursday, Easter Monday, Ascension Day.

POLICE/AMBULANCE/FIRE: Police 561646 and 561174.

AUTHORITY: Junta del Puerto de Aviles.

BARCELONA: 41.25 N. 02.10 E. (See Plan Book)

DOCUMENTS:

(1) Manifest of Barcelona cargo: 1 set covering all loading ports; make sure that this manifest is in perfectly good order before ship's berthing, as Customs will board the vessel immediately and take it away as it is; thereafter any omission or excess of pages may lead to a fine. It is important that the Master has copies as Manifests mailed by Agents in loading ports sometimes arrive too late or not at all.

(2) Manifest of Transit Cargo: 2 sets (same recommendations as above).

(3) 3 Crew Lists.

(4) 1 Negative of Passengers.

(5) 2 sets of Bills of Lading of the Barcelona cargo.

(6) 2 Provisions Lists.

Of items (3), (4) and (6) above several copies will be required for distribution among various authorities, therefore it would be well for the Master to have at least 3 copies of each ready at hand on arrival. Tobacco allowed per crew member is 3 kg.

All tobacco in excess of the 3 kg. allowed by the Spanish authorities should be manifested and signed by the Spanish Consul at the last port of call before Spain. If there is no Spanish Consul at the last port before calling at Spain, then the consulate of a country friendly to Spain or the port authorities could carry out the same formality. The same procedure must be followed when the vessel loads a cargo of tobacco for discharge in Spanish ports, or when the tobacco cargo is loaded in transit.

If any item of cargo manifested for Barcelona should be discharged in error at any other port in the ship's itinerary before arrival at Spain, there would be a fine imposed here for shortage of goods if no advice of such shortage is given before arrival.

PILOTAGE: Pilot boats painted black, with letter "P" in white on each bow. Telegraphic address: "Pilot Station-Barcelona". Required notice of ETA 24 hours before arrival. Signals to be made by vessels requiring Pilot: the letter "G" in sound and/or light.

Pilot boats have no radar and are reluctant to venture more than just outside port entrance in poor visibility. Pilots give priority to vessels nearest port entrance. Pilotage is compulsory and the service is permanent. In case of port congestion vessels remain at anchor at the roads.

ANCHORAGES: In the Outer port for small vessels only, with depths over 50 ft. Also at the roads 0.5 miles away from breakwaters where vessels usually remain at anchor.

MAX. SIZE: Only limitation is draft: max. 39 ft.

HEALTH: Pratique obtained immediately after berthing, when Health Officer boards vessel. In case of suspected disease or fever on board Master must send a message to Agent, to advise Health Office. Following documents are required by Health Officer upon berthing; Maritime Declaration of Health, Deratisation Certificate, 1 Crew List.

RADIO: Aranjuez Radio, call sign EAD.

VHF: Barcelona Radio can be contacted on VHF Channel 16, 3 hours before arrival and Channel 26 for long distance calls.

TUGS: Tugs join vessel at entrance of port. Usually use ship's lines; if tug's lines used usual charge 10% of official tariff. It is normal for 2 tugs to be used for vessels from 5,000 to 15,000 g.r.t.

10 tugs available, from 800 h.p. to 1,800 h.p.

BERTHING: Commercial quay, length 12,100 m. and depths min. 8 m. max. 14 m. dependent location. Depth alongside Grain Elevator in Pier Contradique is 37 ft. Pier Barcelona, berths for transoceanic maritime passenger traffic, depths 26 ft. and 31 ft. Shore fenders keep vessel about 1 m. off quay.

CARGO-HANDLING FACILITIES: For unloading grain, there is a silo with a 65,000 ton storage capacity, provided with 4 suction pumps capable of unloading vessels at a rate of 400 t.p.h. and loading rail or road trucks at the rate of 200 t.p.h.

Liquid methane reception and gasification plant with a storage capacity for 249,000 cu. m. of liquid gas. Potash reception and loading plant with mechanical loading bridges which can load up to 450 t.p.h. of this product.

General cargo handling is fully mechanised and, apart from the pier cranes, there are fork-lift trucks, truck cranes and a palletisation process.

A container wharf with a berthing frontage of 365 m. increasing to 1,115 m., 14 m. water depth, 9.8 acres surface area, with a capacity for 1,250 20-ft. containers. 2 cranes available at 50 tons and reach of 35 m. There will be a terminal with berthing space for 6 ferries for operating a roll-on/roll-off service.

TANKERS: There are 6 berths for oil tankers, max. size 60,000 d.w.t., discharge rate 1,000 t.p.h., depth alongside 12 m. (2), 11 m. (2), 8.5 m. (2). Diameter of loading lines 4 in. and 8 in., diameter of discharge lines 10 in., 12 in. and some of 18 in.

There is 1 natural liquid gas berth, depth alongside 12 m.

There are 5 berths for inflammable liquids, asphalt, vegetable oil and tallow, depth alongside 12 m.

STEVEDORES: *(a)* Daytime, normal working hours, from 0800–1200 and 1400–1800 hrs. (1 shift); *(b)* 0800–1400 and 1400–2000 hrs. (2 "intensive" shifts). Night-time, from 2000–0200 and 0200–0800 hrs. (2 intensive night shifts). Extra costs are involved for intensive shifts. Nightwork is paid on an overtime basis. Average rates for discharge of grains in bulk are about 7,500/8,000 tons per day of 24 consecutive hours; for general cargo a rate of 100 tons within normal working hours.

MEDICAL: All medical facilities are available; it would be appreciated for the Master to advise in advance if crew member is in need of urgent medical attention. Contact Barcelona Radio in an emergency.

FRESH WATER: All piers have water available by shore pipes or by barge. Rate of delivery about 16/20 t.p.h. Rate 150 t.p.h. by barge.

FUEL: Fuel oil and gas oil available at "Campsa", installation. It is advisable that Shipowners stem bunkers through their own contractors, with advance notice of 48 hours. Delivery either by barge, or at the bunkering pier of "Campsa". Bunker barges allowed alongside vessel during cargo-handling.

DEVELOPMENTS: Lengthening under construction of breakwater Dique del Este, and pier Contradique. A wharf for 6 berths for tankers only, plus 4 berths for vessels loading/unloading crudes in bulk with a depth of 39 ft. Dry dock planned for vessels up to 215 m. length and 40,000 tons.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally carried out by crew, except in liner vessels which is contracted for by stevedores.

CERTIFICATES: Vessels should have all usual certificates aboard but only the Safety Wireless. Safety Equipment and Deratisation Certificates are required by authorities.

CUSTOMS ALLOWANCE: Quantity allowed for each crew member is 200 cigarettes and 1 bottle wine/spirits.

CARGO GEAR:

57	Quay cranes up to 3 tons
55	,, ,, ,, 6 tons

REPAIRS: All types deck and engine.

DRY DOCKS: 1 floating dock, length 111 m., lifting power 6,000 tons; belonging to Port Management.

SURVEYORS: Lloyd's; 2410400. A.B.S.; 2399275. N.V.; 3192906 and 2463164.

REPATRIATION: Good facilities available.

AIRPORT: Located about 7 km. from town, well served by regular airlines.

TIME: always GMT plus 1 hour.

HOLIDAYS: 1st January; 6th January, The Three Kings; 19th March, St. Joseph; Good Thursday, after 1400 hrs.; Good Friday; Resurrection Day; 1st May, Labour Day; Ascension Day; Whit Monday; Corpus Christi; 24th June, local holiday; 29th June, St. Peter and St. Paul; 18th July, National Holiday; 25th July, St. James; 15th August; 24th September, local holiday; 12th October; 1st November; 8th December; 25th December and 26th December, second Christmas Day.

POLICE/AMBULANCE/FIRE: Police 091; Harbour Police 3026367; Ambulance 3171717 (Also 24 hour medical service); Fire 080 and 2535353 (080 is best).

TELEPHONES: Only at Terminal Station.

SERVICES: Carpenters, lashing, hatch and tank cleaning all available.

AUTHORITY: Junta del Puerto de Barcelona.

BILBAO: 43.17 N. 02.55 W. (See Plan Book)

DOCUMENTS:

3 Cargo Manifests.
2 Negative Passengers.
3 Crew Lists.
2 Stores Lists.
2 Crew Personal Effects Lists.

The maximum quantity of tobacco and/or cigarettes allowed per crew member, Master included, is 3 kilos. Any surplus must be separated and manifested as cargo in transit and the manifest duly visaed by a Spanish Consular Representative at the loading port. Should there be no Spanish Consular Representative of a friendly nation, Port Authority (Custom House) or Chamber of Commerce in the sailing port. In case a vessel carrying an excess amount of tobacco or cigarettes and not in possession of a Manifest duly visaed by the competent Authority is diverted at sea to a Spanish port while on voyage to another, the Master should cable to the Administrator de Aduanas of Bilbao, notifying the diversion and the excess of tobacco manifested without offical visa. On arrival the Master should submit the Manifest and other documents to the Custom Authorities.

PILOTAGE: Pilotage is compulsory for vessels entering and leaving Bilbao Port. Pilot will board incoming deep laden or ballast tankers within a radius of 2 miles from the new Punta Lucero Light. The Pilot ladder for boarding is usually rigged off port side. If the Pilot is unable to board on account of bad weather, the Pilot boat will display the signal "follow in my wake" and lead the vessel into sheltered harbour.

Pilots keep on watch 24 hours on Channel 12.

ANCHORAGE: Good anchorage in Outer Harbour inside old breakwaters. Depths of LW about 28-33 ft. Also anchorage outside old breakwaters, between Santurce Breakwater and New Lucero Breakwater, lightening operations sometimes performed when weather good. The recommended anchorage zone for deep-laden vessels is 1.3 miles S.W. of Punta Galea Lighthouse in 12 fathoms, sand.

RESTRICTIONS: None, except when draft exceeds 13-14 ft. and proceeding to berths inside river, which case must await tide. See "Max. Size".

MAX. SIZE: No restrictions length or breadth. Max. advisable draft 30-31 ft. Tankers: Largest vessel entered 323,087 d.w.t. Length 347.94 m. Draft 23 m.

HEALTH: If proceeding direct to berth, pratique obtained immediately after berthing. Otherwise, at anchorage on arrival. Cases suspected disease or fever on board, Master must radio Agent, to advise Health Office. On berthing Health Authorities require Health Declaration, Derat Certificate and Crew List.

RADIO: Cabo Mayor Radio.

TUGS: No tugs required for entering port, only for berthing or shifting inside river. Ship's lines used, the tug employed according Pilot's advice. 28 tugs available, 125 h.p.-4,000 h.p.

BERTHING: Canal de Duesto 26 ft. alongside. Tankers: Vessels will berth day and night, but vessels deep laden must be on Pilot station 2 hours before HW. Mooring lines should be of polypropylene or fibre, etc.; if wires are used they should have a fibre pennant. For average weather conditions 18 mooring lines are recommended, 5 head ropes, 5 stern, 4 breasts and 4 springs.

Operated by the Port Authority:

General Cargo:

800 m. of berthing with depth of more than 12 m.
1,633 m. of berthing with depth between 8 m. and 10 m.
362 m. of berthing with depth between 6 m. and 8 m.
1,798 m. of berthing with depth betweem 4 m. and 6 m.

Bulk Cargo:

543 m. of berthing with depth of more than 12 m.
1,372 m. of berthing with depth between 6 m. and 8 m.
121 m. of berthing with depth between 4 m. and 6 m.

Containers:

250 m. of berthing with depth of more than 12 m.
500 m. of berthing with depth between 8 m. and 10 m.

Passenger:

180 m. of berthing with depth between 10 m. and 12 m.

There are also 2 Ro/Ro ramps available.

CRANES: Gantry Type: 4 with over 12 tons capacity, 9 of 12 tons capacity, 36 of 6 ton capacity, 62 of 3 tons capacity.

Mobile type: 20 mobile cranes with capacity from 3.5 tons to 100 tons.

Floating Cranes: 10 floating cranes with capacity up to 400 tons.

STEVEDORES: Very important send advance messages giving ETA. Agent then informs Shippers or Receivers' stevedores. Official working hours Monday/Saturday 0800–1200;1400–1800 hrs.

MEDICAL: Medical service must be arranged by the Agent. In emergency send cable in advance to Agent.

TANKERS: "Campsa" have private berths at Santurce and Zorrosa. Cargo manifest must be visaed by Spanish Consul, or in absence of Consul by Authority at loading port.

Petronor Refinery: *Location:* The Petronor Refinery is located on the North coast of Spain; the Marine Terminal is situated near the Township of Abanto v Ciervana. Geographical situation is approximately Latitude 43° 22.2′ N. Longitude 3° 05.8′ W.

A lighthouse is located on the extremity of the West breakwater (Dique de Poniente) marking the West side of the port entrance, showing a green light with 2 flashes every 6 seconds.

A temporary red buoy located in Latitude 43° 22′ 31″ N. Longitude 3° 04′ 41″ W., showing a red light with 2 flashes every 5 seconds marks the East side of the port entrance; this buoy marks the starting point of the East breakwater (Dique de Levante). Other lights may also be shown.

Charts: Spanish I. H. M. No. 941-942-1938-1940.
British Admiralty No. 74-2925.

Documents/Customs Allowances: The usual documents required are:

6 Crew Lists.

1 Negative Passenger List; if there are passengers aboard, 4 copies of the Passenger List.

2 Copies of the cargo manifest for Petronor and 2 copies of cargo in transit if any.

2 Copies of the vessel's Store List, including bunkers, vessel's stores, tobacco, spirits, medicine chest, etc.

2 Copies of the crew and/or passenger personal effects.

Crew members are not allowed to keep more than 200 cigarettes (or the equivalent in tobacco) and a bottle (1 litre) of spirits out of bond. The rest must be included in the vessel's store lists, and are to be sealed. The total maximum quantity that any ship can carry in accordance with the Spanish Laws is 3 kgs. of tobacco or 3,000 cigarettes for each person aboard (for instance, 30 crew members the maximum quantity allowed is 90 kgs. of tobacco or 90,000 cigarettes).

Any quantity over these amounts should be manifested as tobacco in transit and this Manifest visaed by the Spanish Consulate in the last previous port.

If a Spanish Consul, is not available in the last port of call, Master is required to send prior to arrival the following cable to:

DIRECCION GENERAL DE ADUANAS-MADRID

Vessel .... Coming from ....

Bound to Bilbao PETRONOR with tobacco Manifest not visaed last port due to Spanish Consul not being available in the last port.

Master ....

....

The text of this cable to be registered in the log book and 1 copy of the same to be given to the Customs Agent when boarding.

Clearance: The Customs Authority will board either when vessel is berthing or at anchor.

Pilotage: Pilotage is compulsory. Vessels must make contact with the Harbour Pilots Office 1 hour before arrival; Masters will make contact again when they are 7 miles from the port entrance.

For large VLCC's tankers, Pilots will board 3 miles off breakwater entrance.

There are no traffic separation schemes or traffic control systems for the Port of Bilbao and approaches.

Arrival Information: The pilot station maintains a permanent radio watch service on VHF Channel 12.

Vessels must send radio advice to Petronor Somorrostro, telephone 4377352 and ETA advice 72, 48 and 24 hours prior to arrival.

The 24 hour advance notice should be updated there after whenever 2 hours delay or more is likely.

If necessary the Refinery Terminal will contact vessels via Aranjuez/EAV, or via Coruna or Cabo Mayor Radio if possible.

Vessels can also make contact through 2182 kc/s with Bilbao Radio for a further phone contact direct.

The arrival cable shall include: Name of the vessel; ETA; Master's full name.

When vessels are coming to load the cable must also specify: the quantity and grade of cargo, loading order when it is more than one grade, tons of ballast and estimated deballasting time, bunkers required and the type. All communications with the Refinery Marine Terminal, do not relieve the Master of keeping the vessel's Agent duly informed.

Anchorage: Masters will be informed by harbour Pilots of the estimated berthing time and any other information in connection with berthing prospects; should need for anchoring arise due to terminal necessities or any others, vessels will be requested to anchor under the control of the harbour Pilots in the usual anchoring places, which must be confirmed by Pilots.

The following recommended anchorages for the different types of vessels are pointed out for information only.

Anchorage "A" (outside the harbour entrance):
Recommended area for vessels with a draft greater than 20 m. or over 150,000 d.w.t. (having a better manoeuvring area in case of an emergency).
Holding ground: Sand.
Depth: 50 m.
Bearings and Distances:
North of the entrance green lighthouse, distance 1.7 miles and 314° from Punta Galea lighthouse, distance 2.7 miles.

Anchorage "B" (inside the harbour entrance):
For vessels with draft less than 20 m. and between 90,000/150,000 d.w.t.
Holding ground: Sand.
Depth: 27 m.
Bearing and Distance:
261° from Punta Galea lighthouse; distance 1.9 miles.

Anchorage "C" (inside the harbour entrance):
For vessels less than 90,000 d.w.t.
Holding ground: Sand
Depth: 24 m.
Bearing and Distance:
229° from Punta Galea lighthouse; distance 1.2 miles.

Anchorage "D" (inside the harbour entrance):
For vessels when anchorage "C" is occupied.
Holding ground: Sand
Depth: 20 m.
Bearing and Distance:
204° from Punta Galea lighthouse; distance 1.2 miles.

Depths: The depth at the entrance and manoeuvring area to berths is 28 to 29 m., the maximum tidal range is 4.5 m. All depths refer to low water equinoctial springs.

Health: The national and international regulations concerning free Pratique are applied in Bilbao.

Free pratique is granted when at berth; in case of being anchored the Agent will be requested to arrange the visit under Master's requirements.

Radio advice to the Health Authorities is not required unless there is contagious sickness on board or if coming from an epidemic zone.

Garbage or trash must not be dumped into the port waters. The area surrounding the vessel shall be kept clean.

VHF: Petronor, Marine Terminal, is provided with a permanent radio watch service through VHF Channel 14 or 12.

Before berthing, Control will monitor VHF Channel 12; when the vessel is approaching the berth, it will change to work on Channel 14. Likewise, Petronor personnel appointed to the berth are constantly in communication with the Port Control through the radio. For internal communications between Berth/Port Control and the Refinery, there is, in addition to radio, a telephone system for restricted use.

Berthing: Speed Reference Lights: Placed inside the West breakwater from its initial point, near the port entrance are vertical blue lights that will help on determining the speed when vessel is proceeding towards berths.

From the initial point of the inside breakwater to Berth No. 1, lights are installed every 200 m. From Berth No. 1 to No. 2 every 100 m.

Berthing Assistance Information; Nereides System: Berths No. 1 and 2 are provided with a radar and sonar system which, by means of a luminous panel placed at berth and easily seen from the vessel, supplies the Master and Pilot with an instantaneous indication of the vessel's speed in cms./sec. of the hull side in connection with berthing at bow and stern; likewise, by means of the sonar, the distance in metres, from the hull to the contact points (fenders) bow/stern, appears on the same panel.

Berth No. 1	HW	LW
Spring tides	15 ft. 6 in.	0
Neap tides	9 ft. 6 in.	4 ft. 11 in.
Currents	None reported	
Depths	31 m.	

Loading arms (Hydraulic speed seal connection)

Crude	4×16 in.
Ballast	2×16 in.
Bunker	1×12 in.

Moorings
2 quick release hooks of 60 tons each.
3 quick release hooks of 100 tons each.
Mooring wires are permitted.

Berth No. 2	HW	LW
Spring tides	15 ft. 6 in.	0
Neap tides	9 ft. 6 in.	4 ft. 11 in.
Currents	None reported	
Depth	19.5 m.	

Loading arms (Hydraulic speed seal connection)

Crude/fuel/ballast	2×12 in.
Clean products/ballast	2×10 in.

Moorings
2 quick release hooks of 60 tons each.
3 quick release hooks of 100 tons each.
Mooring wires are permitted.

Berth Nos. 3-4-5-6
Tides and currents: Same for Berth Nos. 1-2. These berths are under construction. (1977)
Loading arms

Berth No. 3	Fuel/ballast	2×12 in.	Speed seal
	Clean products	1× 8 in.	Speed seal
	Clean products	1× 6 in.	Speed seal
Berth No. 4	Fuel/ballast	2×12 in.	Speed seal
	Ballast/clean prod.	2× 8 in.	Speed seal
Berth No. 5	Fuel/ballast	2×10 in.	No Speed seal
	Clean prod./ballast	1× 8 in.	No Speed seal
	Gasolines	1× 6 in.	Speed seal
Berth No. 6	Fuel/ballast	2×10 in.	No Speed seal
	Clean products	1× 8 in.	No Speed seal

Moorings: Mooring wires are permitted on the quick release hooks; if shore bitts are used the eyes of mooring line must be of manila, synthetic fibre or similar.

Mooring Lines: Vessels must be provided with suitable mooring lines in quality and quantity in accordance with their size. The quantity should not be less than 4 headlines, 4 breast and 4 springs at bow and stern respectively. The vessel's crew must keep the mooring lines taut and to the satisfaction of the Petronor supervisor at all times; the variations of the vessel due to changes of tide and/or vessel operations shall be taken into account constantly. The use of the tension winches will be carried out under Terminal Chief authorisation, in order to have the protection of the loading arms always guaranteed.

The use of mooring wires by the vessel will be allowed on the quick release hooks. If using wires to the bollards ashore, the tail pieces must be of Manila, synthetic fibre or similar with a breaking load at least equal of the wires.

Cargo information:

Heavy Hydrocarbons: Heavy hydrocarbons, such as Fuels, Diesel, Asphalts, etc., with an ignition point higher than 65°C (150°F) will be loaded in accordance with the rates established by the Refinery or limited to the conditions of the vessel lines.

Middle Distillates: Products such as Kerosenes, JP-5, Jet A-1, JP-4, Nafthas, Gasolines, Benzene, Toluene, etc.

The flow loading rate of these products to the vessel tanks will not exceed 1 m./sec. (3 ft./sec.) till the cargo level is 1 m. over the tank bottoms (covering lines, heating coils, etc.), in order to avoid turbulence and splashes.

This loading rate could be increased up to 5 m./sec. once the liquid reaches the mentioned level and it will be decreased to 1 m./sec. whenever the cargo level reaches 1 m. under the upper maximum level (vessel deck.)

The flow loading rate will be according to the following table:

Cargo line diameter	*Velocity flow rate 1 m./sec. bbls./cu.m.*	*Velocity Flow rate 5 m./sec. bbls./cu.m.*
4 in.	168 bbls./h. 27 cu.m.	840 bbls./h. 133 cu.m.
6 in.	380 bbls./h. 60.3 cu.m.	1,900 bbls./h. 301.4 cu.m.
8 in.	675 bbls./h. 107.1 cu.m.	3,375 bbls./h. 535.7 cu.m.
10 in.	1,080 bbls./h. 171.4 cu.m.	5,400 bbls./.h 857 cu.m.
12 in.	1,510 bbls./h. 239.6 cu.m.	7,550 bbls./h. 1,198 cu.m.
14 in.	1,850 bbls./h. 293.6 cu.m.	9,250 bbls./h. 1,467.2 cu.m.
16 in.	2,450 bbls./h. 388.9 cu.m.	12,250 bbls./h. 1,944.4 cu.m.

Medical: Medical services must be arranged through the Agent. In case of emergency this service can be requested through VHF in order to have everything prepared on arrival either at berth or at anchorage.

Petronor will advise the Health Authorities through VHF 16 or 14.

Fresh Water: No fresh water facilities on the berths. Fresh water must be arranged through the Agent in order to be supplied by barges.

Fuel: The fuel-oil/gas-oil requirements will be arranged directly between the vessel's Agent and Campsa. Fuel-oil is only available at Berth No. 1 with fuel-oil and gas-oil at all other berths.

Ballast: All ballast will be discharged into the shore facilities. The Master will report to the terminal when due to bad weather, the ballast quantity is above normal.

The sea suction and overboard discharge valves will be inspected, closed and sealed before starting any operation; representatives from the terminal and the vessel will take part in the inspection of the closing and sealing. The bilge valves of the engine with sea discharge will be also sealed.

Crew landing Permits: There is no restriction.

The Master will receive the Port Control Permits on arrival which will be duly completed before going ashore, each member will give one copy to the Petronor Representative at the berth gate.

Communications: The Marine Terminal is located at a distance of 8 kms. from the nearest rail station in Santurce; the departure frequency of trains is every 10 minutes.

The distance to/from Bilbao is 25 kms. by road.

Bilbao Airport is located in Sondica and it is 35 kms. from the terminal. It is linked daily with several flights to Madrid and Barcelona, and alternatively to Santiago de Compostela. There are also international links to London and Paris alternately.

Air reservation telephone: 429 10 90.

Rail reservation telephones: 421 35 00 and 424 59 42.

Visitors: Access to the terminal is only authorised to those persons who under previous justification should get on board.

The Marine terminal will issue the pass permit, pointing out the authorised area and time limit.

To go on board, under the previous authorisation of the Master, all persons should be provided with the respective permission of the Spanish Coast Guard.

DENSITY: 1025.

FRESH WATER: Always available. Delivery by tugs. Minimum 10 tons.

FUEL: Ordinary fuel oil and gas oil available at local "Campsa" refinery. Advisable that Shipowners stem bunkers 48 hours prior arrival. Delivery by barges, or at the bunkering pier. Bunkers available at Petronor. Advise Agent in advance.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally by crew, except in liner vessels, when contracted by stevedores.

CERTIFICATES: Have usual documents on board, but only Safety Radio, Safety Equipment and Deratisation Certificates required by authorities.

CUSTOMS ALLOWANCE: Normally, Customs permit 200 cigarettes, and 1 bottle wine/spirits per man.

CARGO GEAR: Usually shore cranes employed in loading or discharging but if require lightening then ship's derricks used as only 1 floating crane is available.

IDENTIFICATION CARDS: Not required.

REPAIRS: Good repair facilities, and several important shipyards.

DRY DOCKS: 5 graving docks. Biggest: length 166 m., breadth: 20 m. (naval shipyard).

REPATRIATION: Good facilities.

AIRPORT: About 10 km. from town. Regular services to Madrid and Barcelona. Also direct flights London and Paris.

TIME: GMT plus 1 hour (permanent).

HOLIDAYS: 1st January; 6th January; 19th March (St. Joseph); Good Thursday afternoon; Good Friday; 1st May (Labour Day); Ascension Day; Corpus Christi; 29th June (St. Peter and St. Paul); 18th July (National Holiday); 31st July (local holiday); 15th August; 12th October; 1st November; 25th December.

POLICE/AMBULANCE/FIRE: Police 091; Ambulance (hospital) 41.87.00; Fire 21.30.00.

AUTHORITY: El Comandante Militar de Marina de Bilbao.

BURELA: 43.39 N. 07.20 W.

BERTHING: Sheltered berth for vessels with draft up to 20 ft. Facilities includes 2 silos for bulk cement.

CADIZ: 36.30 N. 06.20 W. (See Plan Book)

DOCUMENTS:

Entrance Declaration.
Health Declaration.
List of Crew on Arrival.
List of Crew on Departure.
List of Passengers on Arrival (if applicable).
List of Passengers on Departure (if applicable).

All vessels must be represented by a local Agent who will be responsible for completing the required Customs, Health and Port Authorities documentation.

PILOTAGE: International Code Signals used to call Pilot. Pilot can be contacted by VHF or through telegraphic address. "Praticos Cadiz". 6 to 8 hours notice of ETA preferred.

Pilots operate a steam launch and a diesel launch both painted black with yellow funnel on which letter "P" is painted in white on both sides. Pilot boat does not remain at station but comes out when ordered. Pilot boards in an area between the Rota light and San Sebastian light. In case of bad weather the Pilot will board nearer Los Cochinos shore and meanwhile signal instructions to the vessel until the Pilot is able to board.

ANCHORAGE: Vessels waiting for a Pilot may anchor in any safe position according to draft and weather conditions. Tankers or deep draft vessels may anchor West of the Diamante buoy in 16-18 m. depth where the Pilot boards at first opportunity.

RESTRICTIONS: Entry is restricted only by the depth of the entrance channel, maximum safe draft 30 ft.

HEALTH: Master should radio, not more than 50 hours and not less than 5 hours before arrival, the following information to the port authority: name and nationality of ship, date and time of arrival, last port of call, number of passengers and crew aboard, if doctor on board and details of any sickness noted on voyage. Message to be addressed to "Sanidad Maritima Cadiz". International code quarantine signals to be shown on arrival when free pratique will be given provided health situation is satisfactory.

TUGS: Normally join vessel off the berths. 7 tugs available, up to 1,500 h.p.

BERTHING:

Mole No. 1. 220 m. length, depth alongside 10 m. L.W.
Mole No. 2. 460 m. length, depth alongside 10 m. L.W.
Mole No. 3. 440 m. length, depth alongside 10 m. L.W.
Generalisimo Franco Mole: 365 m. length, depth alongside 10 m.
Muelle Armamento: 200 m. length, depth alongside 9.50 m.
Muelle Embacadura: 110 m. length, depth alongside 9.50 m.

TANKERS: 3 Tanker berths for vessels up to 27 ft. draft at the piers in the Zona Franca, operated by Campsa. Hoses: Fuel oil 10 in., gas oil 8 in., gasoline 8 in. No slop discharge facilities.

International Terminals Corp. Berth, length 170 m., depth 9.5 m.

FUEL: Fuel, gas oil and several types of marine diesel can be supplied.

REPAIRS: There are 3 shipyards – Astilleros Espanoles SA, at Cadiz and Matagorda. Empresa Nacional Bazan-Carraca, and several workshops of Auxiliar de la Construccion Naval. All types of repairs can be effected.

DRY DOCKS: Largest is 245 m. long, 57 m. wide. In addition Astilleros Espanoles have 2 floating docks, 1 of 231 m. length, 24 m. breadth, lifting capacity 39,400 tons, and the other 100 m. length, 17.54 m. breadth lifting capacity 4,500 tons.

At Matagorda, there is a dry dock of 150.97 m. length, 19 m. width, and 6.23 m. max. draft.

OPENING/CLOSING HATCHES: This work is normally effected by the stevedores.

CONSULS: Argentina, Belgium, Bolivia, Colombia, Denmark, France, Germany, Greece, Italy, Liberia, Netherlands, Norway, Sweden, Finland, Portugal and Venezuela.

CUSTOMS ALLOWANCE: Max. of 3 kilos of tobacco for each person on board. All to be declared. Wine or spirits, 1 decilitre per man per day.

AIRPORT: Nearest at Seville, about 150 kms. away. Daily flights to Madrid, Barcelona and overseas.

TIME: GMT plus 1 hour all the year round.

TELEPHONES: Connection to vessels can be arranged by Agents.

SHORE LEAVE: Crew are permitted to go ashore subject to police control.

DEVELOPMENTS: Astilleros Espanoles is building a new dry dock to accommodate vessels up to 400,000 tons.

AUTHORITY: Comandante Militar de Marina.

CARTAGENA: 37.35 N. 00.59 W. (See Plan Book)

DOCUMENTS:

6 copies of the Crew List.
6 copies of the Passenger List, or 2 negative copies as the case may be.
2 sets copies Manifests covering cargo destined to Cartagena and carried in transit.
Store Provision List, in duplicate, including items such as: tobacco, spirits, radios, coffee, tea, bunkers, and any other items belonging to the vessel.
2 copies of all Personal Effects Lists, from passengers and ship's crew.

The amount of cigarettes allowed for each member of crew/passenger is 3 kilos; any amount over has to be manifested as tobacco in transit, and this manifest must be visaed by a Spanish Consul in the last loading/discharging port. If there is no Spanish Consul in the port of call before Cartagena, the Master is requested to send a cable to: Direccion General de Aduanas, Madrid, quoting as follows: "m.v.' . . . .' coming from . . . order to proceed to Cartagena tobacco manifest unlegalised = Master".

This cable is to be inserted in the radio log-book, and copy of same to be delivered to local Customs Authorities when boarding the vessel.

PILOTAGE: Compulsory. Position of Pilot station 37° 34.6′ N. 0° 59′ W. Position with green light of Dique de Curra bearing 000°, and the white light of Las Losas bearing 090°. This is the position at which the Pilot normally boards.

Vessels bound for Escombreras wait for Pilot in position 37° 34.2′ N., 0° 59′ W., with green light of Dique de Curra bearing 000° and the green light of Dique Bastarreche bearing 090°.

Pilot launch is a motor-boat with cabin, about 9 m. long, white hull, red below water line, black letter "P" painted on both sides.

When bad weather prohibits Pilot boarding in the above position, vessel may be required to embark Pilot inside the harbour breakwaters.

Vessels call Pilot in daytime by code flag "G", or by sounding 3 prolonged blasts on the whistle.

At night, Pilot may be called by flashing code signal "PT", or by 3 prolonged blasts on whistle.

Radio messages, with ETA, may be sent direct to Practicos Cartagena with 24 hours' notice, and confirmed 12 hours before arrival, messages should include vessel's seawater draft and, if calling for the first time, vessel's length overall. Pilot station equipped with VHF.

APPROACHES: Escombreras Bank with datum depth of 9.5 m. situated West of Escombreras Island, extends from 200 to 400 m. West of the Eastern tip of the island. This bank is unmarked.

Area of underwater obstructions exists between the coast, the meridian of Santa Ana buoy, and the parallel of Las Losas beacon.

There is a zone used for submarine exercises which is marked on the charts. Occasionally, naval divers carry out exercises in the vicinity of the port entrance. These are accompanied by naval vessels showing appropriate signals.

Ships bound for Escombreras, to enter the port, should steer for a point situated at the intersection of the N.S. line of the red light at the extremity of Curra Pier, and the E.W. line through the green light at the extremity of the Bastarreche Pier, at which point, approximately, the Pilot boards the vessel.

The least recorded depth in the entrance to the port is 25 m. The approaches to the port of Escombreras do not present any difficulties.

ANCHORAGE: Vessels anchored within the port limits should not carry out repairs affecting main engines as the possibility of sudden storms in Winter may make it necessary to move to a sheltered anchorage North of Cabo Tinoso, or to put to sea.

Vessels under 29 ft. 6 in. draft may anchor inside the breakwater provided they do not obstruct other vessels' movements.

Anchorage for larger vessels in Cartagena Roads, approx. position 37° 35′ N., 0° 59′ 30″ W. in depths of 40 m.

Anchorage for tankers off Escombreras in approx. position 37° 34′ N., 0° 58′ 23″ W., in depths of 42 m.

MAX. SIZE: No length limitations. For Cartagena max. draft 31 ft. 6 in. For Escombreras max. draft 68 ft.

HEALTH: Free pratique is immediately obtained when vessels berth any time from sunrise to sunset. Port Health Officers, require Maritime Health Declaration, Deratisation Certificate, and copy of crew and passenger lists.

RADIO: Cabo Palos Radio, Aranjuez Radio, and/or Gibraltar Radio.

TUGS: 3 tug-boats 500–1,000 h.p. with fire-fighting capabilities. All 3 tugs on duty 24 hours duly equipped, with 2 shifts of crew.

Tugs join vessels in vicinity of port entrance, vessel's lines normally used.

The tugs available to assist berthing tankers in Escombreras are all diesel tugs, equipped with fire-fighting equipment. 5 tugs available of up to 2,400 h.p.

BERTHING: Total length of general cargo quays 679 m. Depth alongside 8–10 m. Solid bulk materials: total length of berthing 717 m. Depth alongside 8–10 m.

CRANES:

No.	*Capacity*	*Type*
7	3–20 tons	Electric Gantry
2	3 tons	Mobile-Diesel
1	6 tons	Mobile-Diesel
2	25 tons	Mobile-Diesel
1	90 tons	Mobile-Diesel

STEVEDORES: In the case of a vessel calling at Cartagena at night time, Sundays or holidays, it is important that Master cable 24 hours in advance to advise his ETA in order that Agents are able to arrange stevedores' operations. Gangs can be called on as follows: on weekly working days 0800 and 1330 hrs. On Sundays/holidays 0800 hrs. (with prior advice to Union by 1200 hrs. on Saturdays or day preceding holidays). The official working hours are: Monday/Saturday 0800 to 1200 and 1330 to 1730 hrs. – Sundays/holidays: from 0800 to 1400 hrs.

MEDICAL: Medical services rendered as soon as requested but, in case of emergency, Master required to send urgent cable in advance.

TANKERS: Tankers call at port of Escombreras 2 miles away from Cartagena port, this port owned by Refineria de Petroleos de Escombreras S.A. Slop discharge facilities available at Escombreras.

For ships of 250,000 d.w.t Berth Number 7, of recent construction, consists of 4 dolphins, in a line parallel to Bastarreche Pier. Between the first and third dolphin is situated a loading platform with loading/discharging lines. The centre of this platform is situated at a distance of 230 m. from the head of Bastarreche Pier, bearing 140°.

The least depth in Berth No. 7 is 21.45 m. or 70 ft. 4 in. at the extreme South of the berth. The rest of the area has a depth of between 24 to 28 m.

The maximum length foreseen for tankers of 250,000 tons d.w.t. is 250 m. or, 1,145 ft., since the total length of the berth is 430 m.

The maximum allowable draft is 21 m. or 68 ft. 1 in.

Shore lines for crude oil are 1 of 40 in. diameter and 3,500 m. length, and another of 24 in. diameter and 3,500 m. length.

The Woodfield hose-handling gantry has 4×16 in. hoses of which the 2 outside hoses should be used for loading bunkers as well as for discharging. Connecting flanges of 16 in. diameter, type 150 ASA.

Fresh water can be supplied by pipe-line at all berths at a rate of 45 t.p.h.

Only vessels up to about 100,000 d.w.t. may be berthed at night.

8 berths suitable for tankers from 29 ft. 6 in. to 43 ft. draft.

2 berths for LPG carriers up to 29 ft. 6 in. draft.

FUEL: At Cartagena, only gas oil available from tank trucks. At Escombreras all grades of fuel available subject to advance notice given.

FRESH WATER: Available from quay by hose connections, only on working days. On Sundays/holidays notification to be required before 1400 hrs. preceding day.

FIRE PRECAUTIONS: The port area has its own Fire Department under supervision of Port Director. Although there is no waterborne equipment available, tug "Brio" will assist as required as well as Cartagena City Fire Department.

DEVELOPMENTS: There is a big programme to increase berthing-places by building new piers close to breakwaters, available for 3 vessels.

CONSULS: The following countries are represented in Cartagena:

Finland
France
Sweden
Panama
Peru
Italy
Denmark
Greece
Norway
Holland
Belgium

GANGWAY/DECK WATCHMEN: Not compulsory, only used when required by Master under Immigration Police Supervision.

OPENING/CLOSING HATCHES: Usually by ship's crew.

CUSTOMS ALLOWANCE: 200 cigarettes per each crew member, out of bond. The excess to be declared as cargo in transit. Wine and/or spirit: 1 bottle for each crew member or passenger.

CREW IDENTIFICATION CARDS: Not required.

REPAIRS: There are very good repair facilities. A private shipyard "Empresa Nacional Bazan" and 2 other private repair shops.

DRY DOCKS: 1 dry dock can accept vessels of 566 ft. length and 73 ft. beam. 2 floating docks for vessels up to 333 ft. in length.

REPATRIATION: All facilities available.

AIRPORT: San Janvier Airport situated 27 miles from Cartagena with daily service to Madrid, Barcelona and Almeria.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January; 6th January; 19th March (St. Joseph); Good Thursday from 1400 hrs.; Good Friday; 1st May (Labour Day); Ascension Day; Corpus Christi; 29th June (St. Peter and St. Paul); 18th July (National holiday); 15th August; 12th October; 1st November (All Saints' Day); 25th December.

POLICE/AMBULANCE/FIRE: Police tel. 501456. Ambulance 503470; Red Cross 510727; Fire Department 501111; Port Fire Department 503100.

AUTHORITY: Capitan de Navio, Comandante Militas de Marina de Cartagena, Comandancia de Marina.

CASTELLON DE LA PLANA: 39.58 N. 00.01 W.

(See Plan Book)

DOCUMENTS:

Manifest of Castellon cargo: 1 set covering all loading ports; make sure that this manifest is in perfectly good order before ship's berthing, as the Customs will board the vessel immediately and take it away as it is; thereafter any omission or excess of pages may lead to a fine.

Manifest of the Transit cargo: 2 sets (the same recommendations as above).

3 Crew Lists.

2 Negative of Passengers.

2 sets of Bills of Lading of Castellon cargo.

2 Provisions Lists.

2 Manifests of personal effects.

PILOTAGE: Compulsory, and service is permanent. Pilots board vessels by a cutter in roads near entrance formed by the 2 breakwaters.

Pilot cutters are painted white and have the letter "P" in black on each bow. Cutters have a blue flag, with letter "P" in white. Signals to be made by vessels requiring Pilot: 3 long blasts. Telegraphic address: "Practicos, Comandancia Marina, Castellon".

ANCHORAGE: Vessels can remain at anchor at the roads. Recommended anchorage: 0.5 mile East of lighthouse in depth of 12 m.

RESTRICTIONS: Max. draft 22 ft. for vessels of about 110–120 m. length. For vessels of more 120 m., to 140 m. length, max. draft is 20-21 ft.

HEALTH: Pratique obtained immediately after berthing, when Health Officer boards vessel. In case of suspected disease or fever on board Master must radio Agent to advise the Health Office. Following documents are required by the Health Officer upon berthing: Maritime Declaration of Health, Deratisation Certificate, 1 Crew List.

RADIO: Aranjuez Radio, call sign EAD, 36–48 hours prior arrival nearest radio station is El Grao Radio, call sign EAV.

TUGS: Tugs join vessels at entrance of port. Vessels of more than 100 m. length normally use 1 or 2 tugs. Ship's ropes used.

STEVEDORES: Very important that Master sends in advance short radio notice regarding vessel's ETA so Agent can inform Shippers or Receivers' stevedores accordingly. Official working hours of port are: Monday/Saturday 0830–1230 and 1400–1800 hrs.

MEDICAL: All kinds of medical services can be arranged. In case a crew member needs medical attendance urgently, it is advisable that Master sends a radio message in advance.

TANKERS: "Campsa" berth in Muelle Serrano Lloberes.

Esso Petroleos Espanoles, S.A. Refinery Terminal. Breasting Island; Lat. 39° 56′ 7″ N. Long. 00° 01′ 6″ E. for tankers with unlimited length. Depth of water in the berth is about 12.5 m. (41 ft.).

Vessels berth heading either East or West The Breasting Island is built on piles. A central platform about 70 m. (230 ft.) long and 15 m. (49 ft.) wide will accommodate the loading arms and the island services. 2 mooring dolphins are located at about 128 m. (420 ft.) from the centre of the platform. They are linked with the main platform by a walkway. The platform elevation from the sea level is an average of 6.8 m. (22 ft.).

Both sides of the Breasting Island central platform and the Eastern dolphin are provided with a resilient fendering system. No fendering system is installed on the Western dolphin. Vessels can be docked at both sides of the Breasting Island.

2 "swamped" breasting wires are anchored about 200 m. (640 ft.) off both sides of the Breasting Island. Quick-release hooks are provided on the platform corners and on both mooring dolphins.

Hoses: 2 loading arms of 10 in.–150 lbs/ASA and 2×8in. loading arms 150 lbs/ASA.

Any vessel from 3,000 d.w.t. through 37,000 d.w.t. can be accepted at the Breasting Island having a deepest draft of 37 ft. 6 in.

Sea berth: For crude oil cargoes with submarine pipe-line: Lat. 39° 56′ 4″ N. Long. 00° 02′ 7″ E. Unlimited length.

Depth of water in the berth is about 25 m. (82 ft.). Vessels berth heading 075°/080° true using both anchors forward, with about 280 m. (900 ft.) of chain out on each anchor and 2 swamped mooring legs if it is necessary.

The stern is secured to 5 Iamgar buoys equipped with 2 release hooks on each. These buoys have flashing lights.

1 navigational range consisting of 2 lighted buoys, is used to proceed to the sea berth and drop the anchors.

Any vessel from 27,000 d.w.t. to 165,000 d.w.t. can be accepted in the sea berth.

Bunkering available. Water available by barge. Provisions available. Pilotage compulsory – Esso Pilots. Tugs: 2 tugs compulsory.

BALLAST: All ballast must be discharged to shore tanks, no exception will be made to this rule. A total of 17,000 cu. m. (110,000 bbls) can be received by the Refinery ballast tanks.

FRESH WATER: All piers have water available by shore pipes. The rate of delivery is about 8–9 t.p.h.

FUEL: Available with 5 days notice and subject to "Campsa" berthing availability.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Vessels should have usual documents on board, but only the Safety Wireless, Safety Equipment and Deratisation Certificates are required by authorities.

CUSTOMS ALLOWANCE: Normally, Customs permit 200 cigarettes per man out of bond and 1 bottle of spirit per man.

CARGO GEAR: All commercial piers served by electric shore cranes able to lift 3, 6 and 8–9 tons.

IDENTIFICATION CARDS: Not required.

CONSULS Italian, postal address Plaza Huerto Sogueros, 2-3-2, tel. 212288; France, Plaza Borull, 9, 220180; Sweden, Maestro Ripolles, 28, 220053; Norway, Trinidad 85, 224511.

REPAIRS: Work shop for small repairs.

REPATRIATION: Good facilities exist.

AIRPORT: Valencia, 70 km. away.

TIME: Always GMT plus 1 hour.

HOLIDAYS: 1st January; 6th January; 19th March, St. Joseph; Good Thursday after 1400 hrs.; Good Friday; 1st May, Labour Day; Ascension Day; Corpus Christi; 14th June, local holiday; 29th June, St. Peter and St. Paul; 18th July, National holiday; 25th July, St. James; 15th August; 12th October; 1st November; 8th December; 25th December; and 2 or 3 local holidays more, variable.

POLICE/AMBULANCE/FIRE: Police: tel. 220516; Ambulance 213944; Fire 221222.

CASTRO-URDIALES: 43.24 N. 03.14 W.

DOCUMENTS:

3 Cargo Manifests. 1 visaed by the consular authority.
3 Cargo Manifests for other ports if the vessel has called at and loaded in other ports.
3 Ballast Manifests (if the vessel has arrived in ballast).
5 Passenger Lists (if passengers are carried).
5 Captain's Certificates to the effect of "No Passengers" if no passengers are carried.
5 Crew Lists.
5 Stores Lists.
5 Crew's Store Lists – cameras, radios, spirits, cigarettes, etc.
Health Certificate.
Certificate of Derating and fumigation against insects.
4 Bills of Lading.
International Freeboard Certificate.
International Safety Certificate.
International Radio Certificate.
Certificate of Stowage of cargo.

PILOTAGE: *To request pilotage:* 1. Advise the arrival of the vessel 24 hours in advance. 2. Hoist flag "G" of the International Flag Code. 3. Anchor within the pilotage limits of the port.

Port pilotage limits: Coastal zone comprised between the Onton meridian and that of the Punta del Rabanal at 1 mile from the coast. The Pilot goes out to a limit of 1 mile outside the port. There are no means of radio communication with the pilot boat or pilot station. ETA to be given 24 hours in advance. Sound signals to summon the Pilot – 3 long blasts. In the event of bad weather, the Pilot does not proceed to sea, and the vessel must enter the port and anchor in the bay.

Anchorage to await Pilot: In the mouth of the port at 1 mile distant. The pilot boat carries a blue flag with the white letter "P" upon it. The pilot boat is blue and is a small motor-launch.

ANCHORAGES: The best anchorage is 045°–800 m. from the green coloured beacon of the breakwater at the port entrance, in a depth of 12 m.

RESTRICTIONS: There are no entry restrictions. Vessels with a draft greater than 6 m. cannot enter the port.

MAX. SIZE: Length 105 m., draft 5 m., depth at the entrance 9.14 m.

HEALTH: The Health Official boards the vessel as soon as it is berthed alongside. In the event of suspected illness or fever, advise Agent by radio and anchor near the port until the Health Doctor authorises entry.

RADIO: The best radio station to pass the ETA telegram to consignees or Agents is Santander radio station call sign "EAS". Frequency 500 kHz.

TUGS: None available.

BERTHING: Irrespective of tide. The S.E. pier has a total length of 980 ft., of which 500 ft. forms the commercial wharf, mainly for coasters sundry cargoes. No cranes. Fresh water supply. Depth 17 ft. at low water.

Iron ore loading tips: Along open coast adjoining Castro-Urdiales are several cantilever piers connected with the Iron Ore Mines, partly sheltered in creeks or small coves. All vessels bound to load iron ore there should clear and apply at Port of Castro Urdiales. Steamers cannot remain at these berths during rough weather but may find good anchorage in roads, or immediate shelter at the port of Castro-Urdiales, or better at Bilbao Harbour 9 miles East.

The Iron Ore Loading berths (no length limit) are as follows:

Name	*Situation*	*Approx. ebbtide draft*	*Loading rate per working hour*
Dicido	1 mile E.	21 ft.	800 tons
Saltacaballo	1.5 miles E.	22 ft.	800 tons
Onton	2 miles E.	21 ft.	1,000 tons

STEVEDORES: Ordered by Agent or Shipper. No ETA to stevedores necessary.

MEDICAL: It is not necessary for Agent to receive advance notice that medical attention is required. In the port there is a corps of doctors and 1 of them is always on duty for any emergency. Futhermore, there is a permanent Spanish Red Cross service with ambulances to transport any patient to a large hospital centre. There is also a hospital in this town.

In the case of serious illness, patients are taken by ambulance to the Cruces Medical Aid Centre (province of Vizcaya-Bilbao) 18 km. from Castro Urdiales.

International Vaccination Certificates are required.

DENSITY: 1016.

FRESH WATER: Water may be taken on board at the San Luis Quay (also known as the Ocharan Mazas Quay). By means of hoses and at a rate of delivery of about 40 t.p.h.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Carried out by Crew.

CERTIFICATES: Safety Wireless, Safety Equipment, and Deratisation generally inspected.

CUSTOMS ALLOWANCE: Normally 200 cigarettes per man. For longer stay, new allotment out of bond obtainable. Wine/and/or Spirit: 1 bottle per man.

CARGO GEAR: At the small commercial wharf ship's derricks are used. At the iron ore loading berths along the coast with Cantilever Piers, conveyor belt employed with spout at the tip.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: Limited.

REPATRIATION: Crew changes and repatriation can be effected, bearing in mind that any consular negotiation must be made in Bilbao, since there are no Consulates in this port.
AIRPORT: Nearest Sondica (Bilbao) 40 km. by road.
TIME: Always GMT plus 1 hour.
HOLIDAYS: Sundays; 1st January; 19th March (Saint Joseph); April, Holy Thursday and Friday (variable each year); 1st, 23rd May; 13th and 29th June; 18th and 25th July; 15th August; 12th October; 1st November; 25th December. On holidays, work may proceed if requested.
POLICE/AMBULANCE/FIRE: Police C.G. Tel. 861146; Ambulance Red Cross 861147 and 861191; Hospital 860196; Fire 861294.
TELEPHONES: No arrangements for placing telephones on board.
SHORE LEAVE: Crew allowed ashore.
DELAYS: The only delays that can normally be expected are those due to bad weather.
AUTHORITY: Military Marine Adjutant – Port Captain.

CEUTA: 32.54 N. 05.17 W.

DOCUMENTS:

Health Declaration.
2 Cargo Manifests.
2 Stores Lists.
4 Crew Lists.
5 Passenger Lists.

PILOTAGE: Radio Agent advising ETA 24 hours in advance. International code signals used to call Pilot, or give 3 long blasts. Sound signal used day and night. Pilot boards within 1 mile of the breakwater. Pilotage compulsory.
ANCHORAGE: N.W. of the harbour in depths from 10 to 12 fathoms, at about 2.25 cables off breakwater but vessels should leave this anchorage with strong winds from East or West. The bottom off the N.W. side of Muelle de Poniente is mostly rocky. The existence of submarine cables is marked by a hemispherical buoy painted in white, moored at about 3.25 cables bearing 74° from the red light at the head of Muelle de Levante. No light is exhibited. For this reason, anchorage is prohibited to the North of a line extending from the root of Muelle de Levante bearing 298° to position of the buoy already mentioned.
MAX. SIZE: Length, 220 m. Max. draft, 33 ft. 6 in.
HEALTH: Pratique obtained immediately after berthing when vessel boarded by health officials.
RADIO: Tangier, or Cadiz Radio.
TUGS: Usually 2 available of 1,200 h.p. Tugs use ship's lines.
BERTHING: West Mole: 5 berths for vessels up to 33 ft. 6 in. draft. East Mole: 2 berths for vessels up to 31 ft. draft. Dato wharf: 2 berths, up to 20 ft. draft.
STEVEDORES: Accurate advance notice of ETA necessary to order gangs required. Gangs are ordered at 0730, and 1630 hrs. For Sundays and holidays, gangs ordered before 1730 hrs. previous day. Average cargo handling rates: General cargo, 7 tons per gang/hour; bagged cargo, 10 tons per gang/hour; drums, 13 tons per gang/hour. Overtime from 2000 hrs., Sundays and holidays, 40% surcharge.
MEDICAL: Advance notice by radio preferred. Hospital facilities available.
DENSITY: About 3.64%.
FRESH WATER: Available, but may be some restriction in Summer months.
FUEL: All grades available, to be ordered in advance.
GANGWAY/DECK WATCHMEN: Available but not essential.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCE: Maximum 3 kilos tobacco for each crew member. Normal daily consumption of wine and spirits allowed.
IDENTIFICATION CARDS: Not required.
CONSULS:

Great Britain,	Tel. 512522	Denmark,	Tel. 512254
France	,, 512521	Italy	,, 511053
Belgium	,, 512521	Netherlands	,, 511408
Sweden	,, 511801	Norway	,, 511700

REPAIRS: Only minor repairs can be effected. Slipways for vessels up to 500 tons.
REPATRIATION: All facilities available.

Seamen's Books, in lieu of passports, accepted by Spanish Immigration Authority for Seamen of the following nationalities only:

Belgium, Federal Republic of Germany, France, Greece, Holland, Italy, Ireland, Luxembourg and Portugal.

Seamen of other nationalities will require valid passports and it is advisable to check with Agent regarding visas required in some cases.
AIRPORT: Nearest international airports at Tangier, 100 km. away, and at Malaga, 137 km. away.
TIME: GMT plus 1 hour in Winter, GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day, 6th January, 19th March, Holy Thursday (afternoon), Good Friday, 1st May, Ascension Day, Corpus Christi, 29th June, 18th July, 25th July, 5th August, 15th August, 12th October, 1st November, 8th December, Christmas Day. All holidays may be worked by voluntary labour.
POLICE/FIRE/AMBULANCE: Police, tel. 513324; Fire, tel. 513333; Ambulance, tel. 514509.
TELEPHONES: No arrangements for placing telephones on board.
AUTHORITY: Harbour Master.
AGENT: Ybarrola, Depositos de Aceite Combustible, S.A. Avenida de Espana, 11. PO Box 46, Ceuta. Tel. 511800. Cables, Ybarrola Ceuta. Telex: 78026 and 78111.

CORUNNA: 43.23 N. 08.22 W. (See Plan Book)

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another Manifest covering Transit Cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.
If vessel carries over 3 kilos tobacco per man, the excess to be declared in separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

PILOTAGE: Compulsory. International code signals used to call Pilot.
RESTRICTIONS: No restrictions on night manoeuvres.
MAX. SIZE: Length and beam not restricted. Cargo vessels 36 ft. draft for berthing.

Tankers: Largest tanker to enter 111,423 d.w.t. Draft on arrival and departure; Forward 15.24 m. Aft. 15.54 m. Depth alongside 17.0 m.
HEALTH: If vessels proceed directly to berth, pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.

If vessel has sickness on board of a contagious nature Master should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted free pratique.
TUGS: 4 Available up to 2,300 h.p.
BERTHING:

Berth	*Length (m)*	*Depth (m)*
Mendez Nunez	250	8.0

CRANES: 24 electric cranes, capacity 3–45 tons, outreach 10–22 m. 2 diesel-electric mobile cranes, capacity 1.5–6.0 tons, outreach 8.0–2.5 m. 1 locomotive crane, capacity 5 tons.
BULK HANDLING FACILITIES: *Private Storage Facilities:*

Cement:	3 silos each of 800 tons capacity.
	4 silos each of 1,000 tons capacity.
Aluminium:	3 silos each of 3,000 tons capacity
	1 silo capacity 4,000 tons.
Fertilizer:	2 tanks each of 7,500 tons capacity.
Unspecified Oils:	2 silos each of 1,000 tons capacity.
	2 silos each of 500 tons capacity
	1 silo capacity 600 tons.
	1 silo capacity 350 tons.
	6 silos each of 500 tons capacity.

TANKERS: 2 berths, depth 13.0 m. for tankers of 45,000 d.w.t. and 60,000 d.w.t.

1 pier, depth 17.0 m. Berthing for 1 tanker of 120,000 d.w.t. and the other 65,000 d.w.t.

Storage facilities:

Campsa: 6 tanks of 3,500 cu.m. each and 3 tanks of 2,500 cu.m. each.

Petroliber; 18 tanks with capacities from 2,500 cu.m. to 35.000 cu.m. Total capacity 220,000 cu.m.

Facilities for reception of dirty ballast.
FRESH WATER: Can be supplied by pipe-line at most berths rate 30-150 t.p.h. or by barge at rate of 150 t.p.h.
FUEL: Can be supplied by pipe-line at most berths. No barges.
CUSTOMS ALLOWANCE: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. 1 bottle of spirits per man.
REPAIRS: Minor repairs can be effected in shore work shops.
AIRPORT: Nearest international airport at Santiago de Compostella 60 km. away.
TIME: Always GMT plus 1 hour.
HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st full day); Epiphany (January 6th full day); St. Joseph (March 19th full day); Easter Thursday (half day); Easter Friday (full day); St. Joseph Artizan (May 1st full day); Patron Saint of Spain (July 25th full day); Ascencion Day (August 15th full day); Holiday of Hispanisicm (October 12th full day); All Saints' (November 1st full day); Immaculate Conception (December 8th full day); Christmas Day (December 25th full day).
AUTHORITY: Junta del Puerto.

FERROL: 43.28 N. 08.16 W.

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another Manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

PILOTAGE: Compulsory. International code signals used to call Pilots. Pilots board off Cape Priorino.

MAX. SIZE: Cargo vessels up to 32 ft. draft. Tankers up to 35 ft. draft.

HEALTH: If vessel proceeds directly to berth, pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessels arrival. If vessel has sickness on board of a contagious nature Masters should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted free pratique.

TUGS: Available up to 1,250 h.p. Also salvage tug normally stationed at Ferrol.

BERTHING: Depth alongside quays 25–32 ft.

TANKERS: Campsa Oil Terminal, 3 berths, can accommodate tankers up to 656 ft. length and 35 ft. draft. Facilities available for discharging slops ashore.

FRESH WATER: Can be supplied from the quays.

FUEL: All grades available at the oil berths.

REPAIRS: All ships' repairs can be effected.

DRY DOCKS: 5 dry docks for building and repairing Naval and merchant ships. Largest dry dock length 1,020 ft., width 155 ft. for vessels up to 80,000 d.w.t.

CUSTOMS ALLOWANCE: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirits per man.

AIRPORT: Alevedro Airport (La Coruna), two services a day to Madrid. Labacolla Airport (Compostela), regular services to Oviedo, Santander, Bilbao, San Sebastian, Barcelona, and Madrid.

TIME: Always GMT plus 1 hour.

HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st, full day); Epiphany (January 6th, full day); January 7th (full day); Saint Joseph (March 19th, full day); Easter (two days); St. Joseph Artisan (May 1st, full day); St. Peter & St. Paul (June 29th, full day); Labour Day (July 13th, full day); July 16th (full day); Patron Saint of Spain (July 25th, full day); Assumption Day (August 15th, full day); Martyrs' Day (August 30th, full day); Holiday of Hispanicism (October 12th, full day); All Saints (November 1st, full day); Christmas Day (December 25th, full day).

AUTHORITY: Junta del Puerto, Comandancia de Marina.

GARRUCHA: 37.10 N. 01.49 W.

SHIPMASTER'S REPORT: 1977

DOCUMENTS: Usual forms required:

4 Crew Lists
1 Crew Declaration
1 Ship's Stores Declaration
Ship's Register
Cigarettes and spirits sealed.

APPROACHES: Coming in from the East the port is easy to find, first sighting is of a small Spanish town at the edge of the sea. On the radar the harbour breakwater begins to show up 12 miles, and is clearly distinguished at 6 miles.

PILOTAGE: The Pilot boards from a small open boat about 2 cables from the end of the breakwater, the boat is painted white and for a short spell shows a blue flag with a white "P" on it to convince you that he is the Pilot and not a local fisherman. The Pilot is competent, though his English was poor. For departure no Pilot is provided as it is a straight run out of the harbour.

ANCHORAGE: On our arrival 1 vessel was anchored in a position off the centre of the town, 2 cables from the end of the breakwater on a line drawn continuing from the breakwater, this appears to be the anchorage mentioned in the Admiralty Pilot Book. We passed close inshore of him and obtained soundings of 14 to 16 m. when passing his position, whilst we were alongside another vessel arrived and anchored 1.5 cables to seaward from the breakwater.

HARBOUR: The harbour is man-made, the outer wall is made of high stone blocks in an "L" shape, the foot of the "L" attached to the land and the outer part running in line with the shore. It is entered from the South with a mole on the port hand enclosing a small fishing harbour. Minimum depth according to the Pilot is 6.3 m. In the N.W. corner on the outer breakwater there is a large concrete apron extending for a length of approximately 100 m. where we loaded, then from the seaward end to the end of breakwater there is an open berth with a large cantilevered loading chute jutting out over the harbour which is fed from conveyors on the seaward side of the breakwater.

BERTHING: The vessel entered the harbour from the South, when the bow was almost level with the end of the inner berth the starboard anchor was dropped to 1 shackle and the vessel swung to starboard on the anchor, a headline was sent away and when the vessel was three quarters swung the anchor picked up. The face of the quay was protected with large roller rubber tyre fenders.

LOADING: The main export of the port is gypsum stone in bulk, we loaded from quay with 2 conveyor belts being fed by dumper trucks into bins on the end of the conveyor belts from the cargo stacked on the quay. The loading rate with the 2 conveyors was up to 500 tonnes per hour, further supplies of cargo were brought down in lorries from a dump at the end of the harbour. The labour was helpful in positioning the conveyors to our requirements, and they have one man who keeps a careful eye on the draft.

SUPPLIES: There is no ship chandler in Garrucha, however, limited supplies can be acquired from the local small supermarkets and close to the market there is a butcher willing to supply what he can, vegetables can be bought in the market. Fresh water is supplied by road tanker and pumped aboard, the tanker holding approximately 4 tonnes.

GIJON: 43.34 N. 05.41 W. (See Plan Book)

LOCATION: The port is located on North coast of Spain on Gijon Bay. The harbour of Gijon has 3 main areas: Commercial area (formerly called Puerto del Musel) on N.W. of Bay; Local Harbour on S.E. of Bay (used by fishing vessels and yachts); Central area, where ship and dockyards are located.

DOCUMENTS: *Cargo Manifests:* A set of manifests (3 copies) has to be handed to the Customs Authorities. This manifest should cover all cargo on board including any transit cargo, that is, covering all cargo bound for any port. If the vessel arrives in ballast at a Spanish port, a "nil" cargo manifest has to be submitted to the Customs Authorities. A special visaed *Tobacco Manifest* is also necessary, in accordance with the following paragraph.

Transit Tobacco Manifest: Please pay special attention to this in order to avoid considerable losses and expenses. The Spanish Customs regulations provide for 3 kilos of tobacco per Crew member to be on board as usual provisions. If the total quantity of tobacco (including cigarettes, cigars, pipe tobacco, and other kinds of tobacco) does not exceed the said average of 3 kilos per Crew member, such quantity may be declared as "provisions" on the usual provisions list, and no further documentation is necessary. For your guidance the Customs consider a carton of 200 American cigarettes to weigh 250 grams. If the total quantity on board exceeds the said average, the excessive quantity must be shown on a special transit manifest. Usual manifest forms may be employed, describing the tobacco in Spanish, as "Tobacco en Transito". The essential point is that this transit manifest is visaed by the Spanish Consulate which must insert a full and complete visa. A simple consular stamp is not sufficient. This point is mentioned especially because it is known from experience that the information given by Spanish Consulates in this respect is often different and erroneous. If there is no Spanish Consulate at the last port of sailing, or nearby the tobacco manifest may be visaed by the local Customs Authorities, or a friendly consulate, but the visa is still essential. The Spanish Customs Authorities are very strict in this respect and the lack of a visa on the tobacco manifest would inevitably entail the confiscation of the excessive quantity, plus severe fines from the Customs.

Provisions and Stores List: Has to be submitted in duplicate to the Customs Authorities. Usual international forms may be employed.

Crew List: Must also be submitted to the Marine Authorities.

Personal Effects Declaration: Has to be submitted in duplicate to the Customs Authorities and must be signed by all the Crew members.

Passenger List: Including passengers in transit, must be presented. When no passengers are on board a "nil" passenger paragraph has to be issued in the cargo or ballast manifest, as follows: "No Pasajeros".

The above mentioned documents must be signed by the Master and should bear the ship's stamp.

PILOTAGE: On approaching the Port of Gijon, Masters are urged to contact the pilot station via VHF Channel 14. The Pilot will board the vessel in the roads, whether scheduled to berth or to remain at anchorage. The Pilot will be instructed beforehand in respect of ship's berthing/anchorage instructions. Pilotage is compulsory.

ANCHORAGE: The Port of Gijon is located in the Bay of Gijon. It is a wide open area with deep water. Large vessels remain at anchor (when berth is not available) outside of the inner port limits. Smaller ships may anchor within breakwaters.

RESTRICTIONS: The mouth of the harbour is 400 m. wide, and depth over 21 m. Tidal range: 4.6 m.

Pier	*Length (m.)*	*Depth alongside (Lowest Spring tide)*
Muelle Norte:		
1st Section	660	14 m. (45 ft. 11 in.)
2nd Section	93	12 m. (39 ft. 7 in.) to 14 m. (45 ft. 11 in.)
3rd Section	348	7.5 m. (24 ft. 7 in.) to 9.5 m. (31 ft. 2 in.)
Muelle de Ribera		
1 Alineacion	288	6.5 m. (21 ft. 4 in.) to 7.5 m. (24 ft. 7 in.)
2 Alineacion	109	7.5 m. (24 ft. 7 in.) to 9 m. (29 ft. 6 in.)
3 Alineacion	156	7.5 m. (24 ft. 7 in.) to 9 m. (29 ft. 6 in.)
Espigon I		
North	220	8 m. (26 ft. 3 in.) to 10 m. (32 ft. 9 in.)
South	314	9.5 m. (31 ft. 2 in.) to 10 m. (32 ft. 9 in.)
Estacion Maritima	114	6.5 m. (21 ft. 4 in.)
Parque de Carbones	225	8.5 m. (27 ft. 11 in.)
Espigon II		
North	300	8 m. (26 ft. 3 in.) to 12 m. (39 ft. 7 in.)
Head	80	12.2 m. (40 ft.)
South 1	180	9 m. (29 ft. 6 in.) to 12 m. (39 ft. 7 in.)
South 2	166	8 m. (26 ft. 3 in.)
Pantalan de Petroleros	360	9 m. (29 ft. 6 in.)
Muelle I. Moliner	313	14.5 m. (47 ft. 7 in.)

HEALTH: It is strongly recommended that Masters send a radio message requesting Free Pratique 24 hours before the vessel's arrival in port, to "Sanidad Exterior" Gijon, also notify Agent.

VHF: *Communications with ships at anchor:* Communication may be established by VHF Channels 16 and 26 via Radio Gijon coastal station. Pilot station may be contacted through Channel 14.

TUGS: "Jove" (500 h.p.), "Torres" (1,000 h.p.), "Penas" (2,500 h.p.). When required, service is complemented with the tugs based at the nearby port of Aviles.

Entrance Regulations: The undersecretariat of the Merchant Marine's General Direction of Navigation has approved the regulations proposed by the Port of Gijon Authority concerning entrance of large vessels in the Port of Gijon (El Musel inner wharves). These regulations will be applicable to all vessels in good manoeuvring conditions. Length is to be understood as overall for bulbous bow ships, and between perpendiculars for all others. Unless otherwise specified, tugs horsepower is to be understood as being not less than 500 h.p.

Group 1:
Length from 215 to 250 m. Max. draft: 45 ft.
Water beneath keel: 5 ft. Tugs: 3 (1 of 2,000 h.p.)

Group 2:
Length from 250 to 260 m. Max. draft: 45 ft.
Water beneath keel: 6 ft. Tugs: same as group 1.

Group 3:
Length from 260 to 275 m. Max. draft: 45 ft.
Water beneath keel: 7 ft. Tugs: 4 (1 of 2,000 h.p.).

Group 4:
Length from 275 to 290 m. Max. draft: 43 ft.
Water beneath keel: 8 ft. Tugs: Same as group 3.

Group 5:
Length from 290 to 305 m. Max. draft: 41 ft.
Water beneath keel: 9 ft. Tugs: 5 (1 of 2,000 h.p.).

Manoeuvring of Groups 2 and 3 will be done during good weather and of Groups 4 and 5 during good weather and preferably in day time. For ships over 305 m. length, entering must be approved by competent authorities, conditions to be determined.

BERTHING: Pier's name, depth alongside, usage and facilities:

Muelle Norte (North Pier)
Total length: 1,101 m.
First Section A:
110 m. length. 14 m. depth. Liquefied Gas discharge.
Connection to gaseoduct.
First Section B:
550 m. length. 14 m. depth. Bulk discharge.
4 portico-type cranes, each discharging 500 t.p.h.
Conveyor belt. 3 cranes of 6 tons each: rate 60 t.p.h. each.
Second Section:
93 m. length. 9.5 depth. Bulk and general Cargo.
2 cranes of 12 tons each handling 90 t.p.h. each.
Third Section:
348 m. length. 6.5/9.5 m. depth. Coal loading berth.
3 railwagon elevators, 20 tons each handling 100 t.p.h.

Muelles de Rivera:
Total length 553 m.
Primera Alineacion
228 m. length. 6.4/7.0 m. depth. General cargo.
2 cranes of 3 tons each handling 25 t.p.h.
2 cranes of 3 tons each handling 28 t.p.h.
4 cranes of 3 tons each handling 30 t.p.h.
Segunda Alineacion
109 m. length. 7.5 m. depth. Bulk cement loading.
Bulk cement loading installation.
1 crane of 3 tons handling 25 t.p.h.
Tercera Alineacion
156 m. length. 7.3/8.5 m. depth. General Cargo.
1 crane of 45 tons handling 140 t.p.h.
2 cranes of 3 tons each handling 25 t.p.h.
1 crane of 3 tons handling 30 t.p.h.

I Espigon (Pier 1):
Total length 534 m.
Alineacion Norte (North Section)
220 m. length. 7.3/10.5 m. depth. Bulk and General cargo.
6 cranes of 3 tons each handling 30 t.p.h.
Alineacion Sur (South Section)
314 m. length. 7/12 m. depth. Heavy cargo and steel goods.
1 crane of 12 tons handling 90 t.p.h.
2 cranes of 25 tons each handling 140 t.p.h.
1 crane of 45 tons handling 140 t.p.h.

Estacion Maritima:
114 m. length. 5.5/7.0 m. depth. General cargo and steel goods.
3 cranes of 3 tons each handling 28 t.p.h.

Parque de Carbones (Coal Berth):
225 m. length. 6.5/8.0 m. depth. Coal loading berth.
A coal loading installation handling 400 t.p.h. each one of the 2 bridges and 1 crane of 45 tons handling rail wagons.

II Espigon (Pier 2):
Total length 646 m.
Alineacion Norte I (North Section 1)
80 m. length. 6.6/8.5 m. depth. Cement loading.
A cement loading installation: 200 t.p.h.
Alineacion Norte II (North Section 2)
220 m. length. 8.5/12.5 m. depth. Oil and Bulk cargo.
6 cranes of 6 tons handling 60 t.p.h. each.
3 connections for oil products.
Alineacion Sur I (South Section 1)
166 m. length. 8.5 m. depth. Oil products.
Connections for oil products.
Tanks for vegetable oil.
Alineacion Sur II (South Section 2)
180 m. length. 8.5/12.2 m. depth. General cargo, oil and steel products.
Connections for oil products.
3 cranes of 6 tons each handling 60 t.p.h.
1 crane of 12 tons handling 100 t.p.h.

Pantalan de Petroleros (Oil Berth):
Total length 360 m.
North Section
180 m. length. 9 m. depth. Oil products.
Connection for discharging oil products.
South Section
180 m. length. 9 m. depth. Oil products.
Connection for discharging oil products.

Muelles de la Osa:
880 m. of length in 3 sections. 8/12 m. depth. Steel cargo.
6 cranes of 6 tons handling 60 t.p.h. each.

Muelles I Moliner:
313 m. length. 14.5/15 m. depth. Bulk and general cargo.
4 cranes of 12 tons handling 90 t.p.h. each.

TANKERS: 1 tanker berth owned by Campsa accommodating tankers of 600 ft. length and maximum draft 29 ft. 6 in. Also see "Berthing".

STEVEDORES: Work in the port is not performed on Sundays or Holidays.

Working Hours.—Monday/Friday 0800-1200, 1300-1700. Overtime from 1700-2100.

Discharge of coal and ore at Dique Norte is carried out 0000-2400 hrs. continually from Monday 0600 to Saturday 1800 hrs.
Saturday: 0800-1200 hrs.
Sunday/Holiday: No work.

MEDICAL: Crew members requiring medical attention, hospitalisation, etc. should be reported by the Master to the Ships Agent for prompt attention. All necessary facilities are available at Gijon.

FRESH WATER: Available ex-wharf or barge. From the wharf connections it is supplied at 20 t.p.h., and from barge at those berths where there is no shore supply facility.

FUEL: Fuel and diesel oil are supplied to ships either directly from shore connection (available only at Espigon II) or by a small tanker in service for the purpose.

CONSULS: The following countries have consular representation in Gijon: Argentina, Belgium, Brazil, Chile, Dominican Republic, Ecuador, France, Guatemala, Italy, Liberia, Nicaragua, Norway, Netherlands, Panama, Paraguay, Portugal, Sweden, El Salvador, Uruguay.

REPAIRS: There are 5 shipyards at Gijon, and work shops specialised in naval works. All types of repairs will be readily attended. It is recommended that advanced notification is given when assistance is required. Electrical power is supplied ex wharf.

CUSTOMS ALLOWANCE: See "Documents".

DRY DOCKS: 3 companies own a total of 6 dry docks at Gijon, the largest of which is 170 m. length, 27.40 m. wide for vessels up to 26,000 tons.

TIME: GMT plus 1 hour.

AIRPORT: The regional airport, named Asturias (in some instances it still is being known as Oviedo) is 45 km. away from the port. There are daily flights linking Gijon with Madrid and Barcelona. There is a bus service for passengers from Gijon to the airport.

HOLIDAYS: Jan. 1st and 6th, March 19th, Maundy Thursday, Good Friday, May 1st and Corpus Christi, June 29th, July 25th, August 15th, September 8th, October 12th, November 1st, December 8th and 25th.

DEVELOPMENTS: New piers are under construction and will be ready for commercial use in 1979.

AUTHORITY: Junta del Puerto de Gijon.

AGENT: Romualdo Alvargonzalez, S.A. Apartado 141, Gijon. Tel.: 344400. Telex: 87366.

HUELVA: 37.16 N. 06.55 W. (See Plan Book)

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined to Huelva.
Another Manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by the Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

PILOTAGE: Compulsory. Services from middle to high tide, depending on draft of vessel on arrival or departure. Pilot's motorboat painted white. Letter "P" in black at both bows. Agent must be in close contact with Pilot Office. Pilots are informed by Agent of ETA at bar. In rough weather Pilots will not be available for entries or sailings. Depths of water depend on location, ranging from 15 ft. to 30 ft. in high tide. Pilot station equipped with VHF Channel 16.

Telegraphic address of Pilots – "Practicos-Huelva", 24 hours notice of ETA required.

At night the regulation lights are exhibited. Contact must be made by VHF to take Pilot on board. Regulation ladder required. In the event of bad weather the Pilot will board at Cascajera.

MAX. SIZE: Max. length for entry to Cascajera, 200 m. Max. length for entry from Punta del Sebo to Tharsis Quay, 180 m. Max. draft, permitted 28 ft. 05 in. up to 32 ft. 05 in. depending on the tide.

The entry to port is always subject to tides and maximum sizes of vessels able to proceed to inner quay berths will depend upon the berth and the tidal constant.

HEALTH: As long as Captains of vessels notify Medical Office by cable that there are no sick on board and that the ship proceeds from an area free from contagious diseases as specified by the International Sanitary Regulations, free pratique will be granted to the vessel, although this does not eliminate all the sanitary measures specified in the Exterior Sanitary Regulations in force.

Notice should be given en-route towards the Port of Huelva and sufficiently in advance to permit the free pratique to be granted.

When there is any sickness on board, no operation will be carried out until the vessel or its personnel have been inspected by the Medical Authorities.

The granting of free pratique does not signify that the Yellow Flag may be lowered. This will be done once the Medical Authorities have carried out their inspection or are in possession of the Maritime Health Declaration Form signed by the Captain.

RADIO: Local coastal radio station Huelva-Radio. Working frequency: 1700 kc/s. on VHF. Listens out permanently on 2182 kc/s. and Channel 16.

Hours of service 24 hours (continuous).

National and International Radio traffic – radio conversation, radio-telegrams, advice to navigators.

TUGS: Only used inside harbour. Ship's lines employed, 4 tugs available. Number required to assist vessels at the discretion of the Pilot in charge.

BERTHING: Mineral loading quay – 435 m. mooring length and 12 m. depth of water at LWST. Has 2 loaders of 1,200 t.p.h. each.

Jetty belonging to "Energia e Industrias Aragonesas S.A." for movement of liquid and solid bulk cargo. Has 150 m. mooring, with 8 m. depth of water at LWST. For movement of solids, a gantry crane of 6 tonnes is available, together with 3 tubes for liquids.

Extension of the Fosforico Espanol S.A. jetty consisting of fitting out liquid quay for movement of solid bulk cargo. Has a 7 ft. depth of water, 3×15 tonnes gantry cranes and pipes for conveyance of phosphoric and sulphuric acids.

"Reina Sofia Quay" of the Union Explosivos Rio Tinto S.A. for the movement of liquid bulk cargoes, is 500 m. long and 8 m. draft at LWST. Has 2 berths for vessels up to 6,000 d.w.t., 1 berth for vessels up to 3,000 d.w.t. and 2 berths for lighters and tugs.

Levante (Eastern) Quay: Length 1,200 m. of which 700 m. is for general cargo and bulk cargo. Depth 8 m. Equipment includes 2×12 ton, 2×6 ton and 11×3-6 ton cranes.

STEVEDORES: 48 hours advice to Agent necessary to engage labour.

MEDICAL: Agent must give at least 24 hours advance notice where medical aid is required. There is a provincial hospital. Vaccination certificates against fevers and cholera are issued by the Provincial Health Authority.

TANKERS: Rio Gulf de Petroleos operate a SBM tanker-mooring 7 miles offshore, about 20 miles distant from Huelva. Mooring is suitable for vessels 900 ft. long with draft up to 70 ft. salt water. Mooring 66 ft. is used for discharging only. Discharge rate is about 1,300 t.p.h. through two 12 in. lines and a 30 in. submarine line.

Within Huelva port, Rio Gulf have 2 tanker berths, and Campsa have 1. The 2 berths at the "Torre Arenillas" quay permit a draft of 12 m. at low water but the max. length permitted at the oil quay is 200 m.

Berth No. 1 (North) loading/discharging:

LPG	8 in. line
Gasoline	10 in. ,,
Naphtha	10 in. ,,
Diesel	10 in. ,,
Fuel oil	10 in. and 12 in. lines

Berth No. 2 (South) loading/discharging:

Benzine	8 in. line
Cyclohexan	8 in. ,,
Gasoline	10 in. ,,
Diesel	10 in. ,,
Distillates	10 in. ,,
Fuel oil	10 in. and 12 in. lines

Residues: there is a receiving station near the oil quay for tank residues, together with a product separator. Connection lines are 10 in.

Product	*S.G.*	*A.P.I.*
Propane	0.507	—
Butane	0.573	
Gasoline 85-Ron	0.693	72.68
Gasoline 96-Ron	0.735	61.02
Campsa G.O.	0.832	38.57
R.D. 2494	0.789	47.84
Industrial F.O.	0.945	18.24

DENSITY: Water at this port is salt water. Fresh water, in quantity of 1 in. to 7.5 in., only present in heavy rainy weather.

FRESH WATER: The supply of drinking water is made at the Eastern (Levante) quay at the rate of 20 t.p.h. per vessel. This can also be provided by means of tugs at a rate of 50 and 30 t.p.h.

FUEL: Fuel oil and diesel available in main port. Not available at offshore tanker terminal.

DEVELOPMENTS: Projects are in being to increase depth of water down to 35 ft. for tankers using the Rio Gulf berths, but this implies dredging of bar and channel, a distance of 8–9 miles; it is not known when the project will be completed.

Sand Retention Mole: Once the access road to the mole has been finished which runs through the islands of Cacuta and Slates (right bank of the rivermouth) with a length of 11.5 kms., the construction of the mole proper, 12 kms. long, will start, as far as the last of buoys 1 and 2 at the port entrance. In this way, after a deepening programme of drafts in the access channel, these will be stable with 10.5 m. of water at LWST. Completion expected 1979.

Ingeniero Juan Gonzalo Quay: 902 m. length and 11.5 m. depth of water. It will be used for bulk and general cargo. Completion expected 1979.

GANGWAY/DECK WATCHMEN: The employment is at the discretion of Masters, who are free to either employ or do without any watchmen.

OPENING/CLOSING HATCHES: Normally effected by crew, liner vessels excepted.

CERTIFICATES: Safety Wireless, Safety Equipment and Deratisation Certificates should be at hand for production if requested.

CUSTOMS ALLOWANCE: 200–300 cigarettes per man out of bond. If necessary permit may be obtained from Customs Authorities to open bond and provide crew with fresh supplies, if stay in port justifies procedure. Wine and/or Spirit Allowances: Two bottles per man.

IDENTIFICATION CARDS: Not necessary.

CONSULS:

Belgium
Denmark
Finland
France
Germany
Greece
Holland
Italy
Norway
Panama
Portugal
Sweden

REPAIRS: Any kind in engine room, and hull above water.

DRY DOCKS: Only 1 small dry dock available for vessels up to 3,500 g.r.t.

REPATRIATION: No difficulty in this respect.

AIRPORT: The nearest is at Seville – San Pablo. A distance of 100 km. from Huelva.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January; 6th January; 20th January; 19th March; Thursday preceding Good Friday as from 1400 hrs. Good Friday; 1st May; Corpus Christi; 29th June; 18th July; 3rd August; 15th August; 1st October; 12th October; 1st November; 8th December; 25th December.

Permit to work on any of the mentioned holidays (1st January Good Friday and 25th December excepted) can be obtained, but sufficient reasons must be given to justify permission.

POLICE/AMBULANCE/FIRE: Police and Civil Guard 215175, 213136; Fire-brigade 214421; Customs 215174.

SHORE LEAVE: Permitted.

TELEPHONES: No arrangements exist, for the time being, to place telephones on board vessels.

AUTHORITY: Marine Military Commandant.

IBIZA: 38.54 N. 01.28 E. (See Plan Book)

DOCUMENTS: *Passenger Liners:*
5 Crew Lists (Customs, Comandancia de Marina, Health, Police and Consignee).
6 Passenger Lists (Customs, Police, Guardia Civil, Obras del Puerto, Health and Consignee).
2 Lists of Crew and passengers personal effects (Customs).
2 Store Lists (Customs).
Health Certificate (Health Department).
2 Cargo Manifest, if any (Customs).
2 Negative Cargo manifest, if no cargo.

Cargo Ships:
5 Crew Lists.
2 Lists of Crew personal effects.
2 Store Lists.
Health Certificate.
2 Cargo Manifests.

PILOTAGE: Pilotage compulsory. No ships allowed to go further than imaginary line between Botafoch lighthouse and Isla Negra del Este, without a Pilot. Advisable to give 24 hours notice of ETA. Shortly VHF will be installed in Pilot station and boats. Pilot's boat is of the canoe type with white sides and letter "P" in black on both sides. Vessels requiring a Pilot must give three long whistles. By night flash morse "G".

Pilot will board between Botafoch lighthouse and Isla Negra del Este. In bad weather vessel should follow Pilot's canoe till he is able to board.

ANCHORAGES: Anchorage area situated inside imaginary line: Botafoch-Negra del Este with depths of 40 to 50 ft. Pilot required to anchor.

MAX. SIZE: Max. length for berthing, 135 m. Maximum draft 21 ft.

HEALTH: Report in advance to pilot if there is any problem. If situation is normal, then, after ship berths the health inspector boards and quickly grants pratique. In event of any suspected disease or fever on board, the Pilot (without boarding), will show the anchorage area, then health inspectors and authorities will board, and give necessary instructions.

Vessels entering after calling at another Spanish port have no problems obtaining pratique.

TUGS: Not available.

STEVEDORES: Available, ETA required 24 hours in advance.

MEDICAL: Civil hospital, military hospital, and 3 private clinics available.

TANKERS: Load/discharge lines 10 in. and 8 in. No facilities for discharging residues. 1 berth. Max. draft of the ship is 21 ft.

FRESH WATER: Available at the quays. 9 m.t.p.h.

FUEL: Available. Notice required 24 hours.

FIRE PRECAUTIONS: Tankers should have a rope over bows, at water level while the ship is berthed.

DEVELOPMENTS: Increasing depths in the port to 7 m. It has also been approved to enlarge berthing quays to 220 m. and 7 m. depth, and build a fishing dock.

GANGWAY/DECK WATCHMEN: Performed by crew.

OPENING/CLOSING HATCHES: There are no fixed rules on this matter: it varies according to the circumstances.

CUSTOMS ALLOWANCE: There is no free allowances.

IDENTIFICATION CARDS: Required.

REPAIRS: There are good work shops and engineers but with limited possibilities. There is a shipbuilder's yard where they build and repair yachts and canoes.

REPATRIATION: Facilities for effecting crew changes and arranging any necessary repatriations.

AIRPORT: 8 km. away, served by scheduled flights daily.

TIME: GMT plus 1 hour.

HOLIDAYS: Cargo work can be arranged on the official holidays with an extra charge of 40% to the workmen.

New Year; Epiphany (6th January); Saint Joseph (19th March); Maundy Thursday: half-day (the evening); Good Friday; Ascension of our Lord (40 days after Resurrection); Saint Joseph the Artisan (1st May); The Holy Heart (last Friday of June); Exaltation to work (18th July); Santiago, Lord of Spain (25th July); Our Lady of the Snows, Lord of Ibiza (5th August); Ascent of Blessed Virgin Mary to Heaven (15th August); Feast of the Hispanicism (12th October); All Saint's Day (1st November); Festival of the Immaculate Conception (8th December); Christmas Day (25th December).

Although not yet official there will be introduced as a holiday Easter Monday and 26th December.

POLICE/AMBULANCE/FIRE: Police 301131; Ambulance 301214; Fire telephone call to the Comandancia de Marina, tel. 301190.

SERVICES: Compass adjusting.

SHORE LEAVE: Crew members are allowed ashore.

AUTHORITY: Comandante de Marina de Ibiza, Comandancia de Marina.

MAHON: Minorca, 39.52 N. 04.18 E. (See Plan Book)

DOCUMENTS: *Health Department:*
Crew List.
Passenger List.
Disinfect and Deratisation Certificates.

Port Authorities:
Crew, Passenger List.
Ship characteristics and other details.
Cargo.
Indication of previous Port and destination.

Customs:
Cargo Manifest.
Bill of Lading (Cargo for this port).
Crew List and Passenger List.

Also the Captain will produce, if required, Log book and passports of crew.

PILOTAGE: Compulsory to take Pilot in entry, departure and any movements within port. On approaching port, during day, ships will hoist flag corresponding to International Code "I need a Pilot". By night, by means of lights, according to International Code.

During day Pilot's boat is recognised by a square blue flag with letter "P" (painted white) in centre of flag. Pilotage area comprises all the estuary, from inside port to outside Capes of La Mola and San Carlos.

ANCHORAGES: Inside are good anchorages, for instance Cala Llorga and Plana de Cala Figueras.

MAX. SIZE: Unlimited length and width, but draft is limited to commercial port, 25 ft.; and to anchorage, 43 ft.

HEALTH: Hoist correct flags of International Signals Code to indicate health situation of ship. Before Pilot boards, he should ask for health situation. If ship suspected, he will lead it to Lazareto anchorage and once anchored Pilot will report by means of Port Authority to Health Department. Port is provided with service of disinfection and means to kill rats. A disinfection certificate can be issued, and although rat killing means are available, no deratting certificate is issued.

Ships coming from Middle East and East Africa should carry certificate of anticholeric vaccination, anti-smallpox, anti-yellow fever and anti-typhus. Also from North Africa and South America. All others only anti-smallpox and anti-typhoid.

BERTHING: Commercial Quay: Length 518 m. average depth alongside 8 m.

Container and Ro/Ro Quay: Length 180 m. depth alongside 6.5 m.

STEVEDORES: Available. Loading and discharge is as follows:

Container Berth: 2 fixed cranes 800 tonnes per day loading and discharge.

Commercial Quay: 2 fixed cranes and 1 mobile crane with a capacity of 1,000 tonnes per day. Priority to regular lines.

MEDICAL: In case of accident or illness of any member of crew medical assistance and hospitalisation will be in civil hospital.

FRESH WATER: Available. 4 points on the Container Quay and 7 points on the Commercial Quay.

FUEL: Available from Campsa at Cala Figueras.

OPENING/CLOSING HATCHES: Carried out by crew before 0800 hrs.

IDENTIFICATION CARDS: Not required.

CONSULS: Italy: Tel. 363393; France: Tel. 363889; Netherlands: Tel. 362703.

REPAIRS: Small repairs possible.

DRY DOCKS: Military dry dock of 2,000 metric tons.

AIRPORT: 5 km. from Mahon – international and national flights.

TIME: GMT plus 1 hour from September to April, and 2 hours from April to September.

HOLIDAYS: Main holidays are: 1st January (New Year), Holy Week (variable), 1st May (Labour Day) Corpus Christi (variable), 24th June – National Holiday, 8th September, local holiday, 25th December – Christmas. Work is possible on all these dates provided the labour force is paid extra.

POLICE/AMBULANCE/FIRE: Police: Tel. 36.37.12; Ambulance: Tel. 36.11.80; Fire Brigade: Tel. 36.39.61.

TELEPHONES: No telephones on the Quays.

AUTHORITY: Capitan de Navio, Comandante Militar de Marina de Menorca.

MALAGA: 36.43 N. 04.23 W. (See Plan Book)

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists or Negative.
1 Cargo Manifest of goods destined to Malaga, as well as of other cargoes in transit.
Store List in duplicate, including tobacco, spirits, radios, etc., belonging to vessel.

Details list in duplicate of all personal effects of the crew and Passengers (tobacco, spirits, cameras, radios, etc.). For vessels bigger than 499 g.r.t., Safety Equipment Certificate.

Note: Tobacco; In case vessel carries more than 3 kilos of tobacco per man, the excess must be declared in a separate manifest, which must be visaed by Spanish Consul. In absence of Consul, said document will have to be visaed by an Authority or Consul of a friendly nation at the former port clearance. Otherwise, vessel may be severely fined.

PILOTAGE: Pilotage is compulsory and service is permanent. Pilots board vessel by cutter in roads, near entrance formed by 2 breakwaters. Pilot cutters are painted white and have letter "P" in black on each bow. Cutters have a blue flag hoisted on mast, with the letter "P" in white, at both sides of flag. At night, cutters have white light, and under this light, red one. Entrance between breakwaters is 320 m. wide and easily accessible. When weather in the roads is bad, which seldom happens, vessels approach as close as possible to entrance in order that Pilot can board easily.

ANCHORAGE: Vessels can anchor outside of breakwaters, in roads in depths of 60 – 70 ft. Anchoring is prohibited in vicinity of tanker moorings, the Pilot will advise best position. Weather is bad occasionally when East wind blows, during Winter.
MAX. SIZE: No restrictions in respect of length or breadth. Max. advisable draft to enter port is 31-32 ft.

The tanker sealine berth can accept vessels up to 300,000 d.w.t.

Largest vessels to enter port: Passenger ship "Oriana" length 245 m. Draft on entering and leaving 9.14 m. Tanker, 49,581 d.w.t. length 225 m. draft 12.48 m.

Largest tanker at buoy mooring 239,786 d.w.t., length 334 m. Draft on entering and leaving 19.81 m.
HEALTH: If vessels proceed directly to berth, pratique can be obtained immediately after berthing. In case of any suspected disease or fever on board, Master must radio to Agents, in order that they can advise Health Office.
RADIO: Nearest important radio station is Cadiz, or Gibraltar and Aranjuez. Master's messages should be received at least 24 hours before arrival.
TUGS: Ship's lines are used, tug-boats are employed according to Pilot's advice, and upon request. 8 tugs available, 450 h.p.–2,250 h.p.
BERTHING: Pilots will advise Masters whether vessel has a free berth or not. Also if she has to anchor in roads. Further particulars can also be obtained from Pilot.

Berth No.	*Length (m.)*	*Depth (m.)*	*Remarks*
1	350	9.4	General cargo,Bulk and Passengers.
	99	8.0	General
2	483	10.5	General Cargo, Bulk and Passengers
3	181	8.0	Passenger Quay
	140	7.0	Passenger Quay
4	477	8.0	General cargo, Bulk and Passengers.
5	101	6.5	Armament
6	215	7.0	Bulk solids and Bulk liquids.
	300	8.0	Petroleum
7	145	9.4	Fish
8	128	5.0	Storage
	135	5.0	Fish

SPECIALISED CARGO-HANDLING FACILITIES: Quay No. 2 includes 15,000 tons silo for grain, loading and discharging capacity 200 t.p.h.

Quay No. 6 can handle all cargo in bulk. Also 3 ton forklifts and a Hyster 620 capable of handling containers up to 26 tons. There are regular car ferries for passengers and cargo, roll-on/roll-off plying daily with Tangiers and weekly with Genoa, Marseilles and Casablanca, all of them direct. For butane gas a special pier built outside the port Westward, along the beach in front of the depot. For LPG and chemicals the inner side of the Western breakwater can be used, though loading and unloading has to be done into tank trucks. 20 ft. containers can be handled with a Hyster forklift with appropriate spreader, eventually 30 ft. containers also.
CRANES: 27 quay cranes with capacity up to 15 tons and 1 mobile crane with capacity of up to 8 tons.
STEVEDORES: It is important that Master sends advance message regarding the vessel's ETA. Agents can inform Shippers or Receivers' stevedores accordingly, to arrange operations properly. Official working hours of port are: Monday/Saturday 0800 – 1200, 1400 – 1800 hrs.
MEDICAL: Any kind of medical service can be arranged. In case a crew member needs medical attendance urgently, it is advisable that the Master radio in advance.
TANKERS: Petroleum handled at Quay Nos. 6 and 7. Depths 8 m. and 9.4 m. respectively. Also at the New Tanker berth, depth alongside 13.50 m. (see "Max. Size").

Quays No. 5, 6 and 7: Operator: Demagrisa. Crude oil discharge pipe-line – 250 t.p.h. Refined oil discharge pipe-line – 300 t.p.h.

Playa Misericordia: Operator: Calvo Sotelo. Sea-line for discharging tankers up to 250,000 d.w.t. Max. discharge rate 6,000 t.p.h. through 2×30 in. pipe-lines.

Operator: Butano. Sea-line for butane which also handles propane. Max. discharge rate 300 t.p.h.

Quays Nos. 6 and 7: Operator: Anomiaco Espanol SA. 4 lines for naphtha discharge. Rate 210 t.p.h.

Operator: Calvo Sotelo. 4 discharge lines for oil. Rate 1,500 t.p.h.

Tanker Quay: Operator: Calvo Sotelo. Crude oil pipe-line, diameter 24 ins. with 2 discharge arms and 1 spare. Discharge capacity 2,000–2,500 t.p.h.

Quay Nos. 6 and 7: Operator: Campsa. 4 pipe-lines available, 2×10 in., 1×12 in. and 1×14 in. maximum pumping rate 800 t.p.h.
DENSITY: 1025.
FRESH WATER: Always available. Deliveries are performed directly from the quay, rate 20–200 t.p.h. or occasionally by tugs. Minimum tonnage, 17 tons, occasionally supplies by tank-barge.
FUEL: Ordinary fuel oil and gas oil are available at local refinery of "Campsa". It is advisable that Shipowners contract bunkers through their own contractors, with anticipation of 48 hours, so that order can be received in time. Delivery can be performed at bunkering pier at a rate of 60 t.p.h. or by car tankers.
FIRE PRECAUTIONS: Tankers perform their operations at the private berths of "Campsa" which have necessary fire precautions.
DEVELOPMENTS: An extensive plan to increase facilities of port, and for building new piers. Other important work being effected at breakwater, to erect new piers for large passenger ships.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: This work effected normally by crew, except in liner vessels, which is contracted by stevedores.
CERTIFICATES: Vessels should have the usual documents on board, but only Safety Wireless, Safety Equipment and Deratisation Certificates are required by authorities.
CUSTOMS ALLOWANCE: Normally, customs permit 200 cigarettes per man out of bond. 1 bottle of spirit for each crew member.
CARGO GEAR: Usually shore cranes of 2-3-6-15 tons lifting power employed in loading or discharging operations, if vessels require any lightening then vessel derricks are employed, as only 1 floating crane is available at the port of 25 tons and 15 m. height.
IDENTIFICATION CARDS: Not required.
CONSULS: Practically all countries have consulates at Malaga.
REPAIRS: Facilities of a limited nature.
DRY DOCKS: There is a floating dock for vessels up to 2,000 tons.
REPATRIATION: Good facilities.
AIRPORT: The airport is about 8 km. from town. Daily services with Madrid, Barcelona, Seville, Valencia, Tangier and Melilla. Also direct flights to London, Paris, Amsterdam, Brussels, Frankfurt, Stockholm, Helsinki, Geneva, Zurich, Nice.
TIME: GMT plus 1 hour.
HOLIDAYS: 1st January; 6th January; St. Joseph (19th March); Good Thursday afternoon; Good Friday; Labour Day (1st May); Ascension Day; Corpus Christi; St. Peter and St. Paul (29th June); National Holiday (18th July); 25th July; 15th August; 12th October; 1st November; 8th and 25th December.
POLICE/AMBULANCE/FIRE: Police, Tel. 211302; Ambulance, Tel. 275250; Fire, Tel. 234567.
AUTHORITY: Junta del Puerto de Malaga.

MOTRIL: 36.43 N. 03.30 W. (See Plan Book)

DOCUMENTS:

Health Certificate.
5 Passenger Manifests (1 Health, 2 Customs, 1 Police, 1 Agent).
4 Crew Manifests (1 Health, 2 Customs, 1 Agent).
2 Store Lists (for Customs).

PILOTAGE: Arranged by Agent basis ETA given 24 hours in advance. Pilot boat distinguished by painted "P". Night pilotage possible approx. 100% extra, on holidays 50% extra. Vessels await Pilot just outside port. Pilot compulsory for all foreign vessels and Spanish vessels arriving from abroad. Pilot should be requested when 1 mile from the port by means of international signals.
ANCHORAGE: Area near port. The roads to the East of the port have very little depth. The sea is rough in this area and vessels can run the serious risk of beaching. The best location for anchorage is outside the port 0.25 miles S.S.W. from the port entrance, in 14 to 25 m. of water, mud bottom.
RESTRICTIONS: None, vessels may enter day or night.
MAX. SIZE: Entrance 33 ft. at LWS. Maximum draft alongside quays, 27 ft.
HEALTH: Free pratique given on board.
RADIO: Harbour tugboats and pilot operate on VHF Channel 12.
TUGS: Available. One tug 500 h.p. One tug, 1,000 h.p. expected at a later date.
BERTHING: There is 470 m. of quayage with a depth of 8.2 m. (27 ft.) at LWS and 107 m. of quayage with a depth of 6.4 m. (21 ft.) at LWS.
CRANES: There are 5 electric cranes of 3.5 to 6 tons capacity; three 6 ton and one 3 to 6 ton mobile crane.
BULK CARGO FACILITIES: Muelle de Levante: 300 m. length. Maximum shipdraft 8.2 m. (27 ft.) at LWS. Three cranes 6 ton capacity for handling bulk cargoes (grain, ore, coal, fertilisers, etc.). Loading/discharge rates: 300 t.p.h. One crane 3.5 to 6 ton for handling general cargoes.
Muelle de Poniente: 110 m. length. Maximum shipdraft 6.4 m. (21 ft.) at LWS. Two cranes 3.5 to 6 ton capacities for handling bulk and general cargoes.
Muelle de Costa: 160 m. length. Maximum shipdraft 8.2 m. (27 ft.) at LWS. Two cranes 3.5 to 6 ton for handling general cargoes.
SPECIALISED CARGO-HANDLING FACILITIES: Muelle de Poniente equipped for handling liquid chemicals and asphalt, by lines.
STEVEDORES: No ETA advice necessary. Agents arrange gangs.
MEDICAL: No advance notice required. All facilities available.
TANKERS: Vessel about 8,000 tons. No special requirements.
DENSITY: Normal Mediterranean.
FRESH WATER: Available alongside all quays.
FUEL: Available at Muelle de Levante. Rates of delivery: 200 t.p.h.
GANGWAY/DECK WATCHMEN: Agent arranges.
OPENING/CLOSING HATCHES: Crew open and close hatches.
CUSTOMS ALLOWANCE: Tobacco: About 100 cigarettes per man. Wine and or spirit. None.
IDENTIFICATION CARDS: Not necessary.
CONSULS: None in Motril. The nearest Granada or Malaga.
REPAIRS: Minor repairs can be affected. There is a slipway for vessels up to 150 tons.
REPATRIATION: Facilities available.

AIRPORT: The nearest airports Malaga 105 km. Granada 70 km. and Almeria 120 km.
TIME: Local time GMT plus 1 hour.
HOLIDAYS: New Year's Day (January 1st), Epiphany Day (January 6th), Vote Day (January 13th), Good Thursday, Good Friday, Wort's Day (May 1st), Santiago Day (July 25th), Assumption Day (August 15th), Pilar's Day (October 12th), Saint's Day (November 1st), Immaculate's Day (December 12th) and Christmas Day (December 25th).

Work can be arranged on above days, however dependent upon permission of the Work Authority.
POLICE/AMBULANCE/FIRE: Police 601221; Ambulance 600200; Fire 600200.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Crew members are allowed ashore.
DEVELOPMENTS: One Roll-on/Roll-off facility on Muelle de Costa. One berth of 150 m. length and 10 m. (33 ft.) depth.
AUTHORITY: Grupo Puertos De Granada-Almeria. Direccion del Puerto. MOTRIL (Granada).

PALAMOS: 41.50 N. 03.08 E.

DOCUMENTS:
3 Crew Lists.
1 Passenger List or negative.
Manifest of goods destination Palamos and in transit.
Store List in duplicate, including tobacco, spirits, radios, etc., belonging to vessel.
Detailed list in duplicate of all personal effects of crew and passengers (Tobacco, spirits, camera, radios, etc.).

Tobacco – any excess over 3 kilos per person must be stated on a separate manifest duly visaed by Spanish Consul.

If on inspection differences are found (more or less), articles removed and heavy fine imposed.
PILOTAGE: Pilotage is compulsory and service is permanent. Often no berths available between 2400 and 0600 hrs. owing to port occupied by fishing boats. Pilot is informed by Agent of vessels ETA given 24 hours in advance. When vessels approach the breakwater, Pilot will board. Pilot boat is white with a black "P" painted on the side.
BERTHING: Depth of water in centre of harbour 42-52 ft. Commercial Wharf length: North 689 ft., depth 18-26 ft. South 246 ft., depth 15-24 ft. Pier Wharf or breakwater: not available for commercial traffic. Length 2,100 ft.
RESTRICTIONS: None but for draft. Vessels carrying dangerous cargo should get authorisation for berthing prior to arrival of the ship.
MAX. SIZE: No restrictions in respect of length. The maximum advisable draft for berthing is 24 ft. stern, 20 ft. bow.
HEALTH: Pratique is obtained immediately after berthing. In case of suspected disease or fever on board the Master must radio to Agent in order inform Health Office in time.
RADIO: Radio Costera of Barcelona.
TUGS: None but Barcelona's tugs could be hired should the vessel's size make it necessary.
STEVEDORES: Information about ETA time is advisable to get gangs ready.
MEDICAL: Any kind of medical services can be arranged if information received in time.
FRESH WATER: Plentiful supply of water by means of hoses from the pier to vessel.
FUEL: Can be supplied if required.
DEVELOPMENTS: Steps are being taken to get the breakwater in condition to berth tankers and liners.
GANGWAY/DECK WATCHMEN: It is not compulsory but advisable at night.
OPENING/CLOSING HATCHES: Normally opened/closed by the crew, otherwise according to Charter Party.
CERTIFICATES: Usual documents on board. Safety Wireless, Safety Equipment, Deratisation and Registered Tonnage Certificates are the only ones required by the Authorities.
CUSTOMS ALLOWANCE: Crew : 3 kilos tobacco per person. Passengers: 2 kilos per person. Any excess on this amount must be declared on a separate Manifest as in transit. Wine and/or Spirit: only 1 bottle per man. Any excess, must be declared on a separate Manifest as cargo in transit and stowed apart from the tobacco and spirits carried under the Provisions List. This Manifest must be visaed by the Spanish Consul at the last port of call. Any infringement of this regulation will subject the vessel to the immediate imposition of heavy fines and confiscation of the excess tobacco.
IDENTIFICATION CARDS: Not required.
CONSULS:

France	Tel. 314472	Portugal	Tel. 320148
Denmark	,, 314400	Sweden	,, 320850
Italy	,, 320200		

REPAIRS: Only small ones.
REPATRIATION: Good facilities exist.
AIRPORT: Gerona Airport situated at 40 km. distance and half an hour time by car from Palamos. Regular flight services with Madrid, Barcelona, Palma Mallorca, London, and all over the world with transhipment at Madrid and/or Barcelona.
TIME: Always GMT plus 1 hour.
HOLIDAYS: New Year's Day (1st January); The Three Wise Men (6th January); St. Joseph (19th March); Good Thursday – afternoon only; Good Friday; Easter Monday; Whit Monday; Labour Day (1st May); Ascension Day; Corpus Christi; Main Holiday (24th June); St. Peter and St. Paul (29th June); National Holiday (18th July); St. James (25th July); Our Lady's Assumption (15th August); Columbus Day (12th October); All Saints Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Second Christmas Day (26th December).
POLICE/AMBULANCE/FIRE: Police 31 41 87; Ambulance 31 43 50; Fire 31 43 50.
AUTHORITY: Captain of the Port.

PALMA, Majorca: 39.34 N. 02.38 E.

PILOTAGE: Compulsory. Order through Agent.
ANCHORAGE; In outer harbour in depths up to 13 m.
RESTRICTIONS: Depth in harbour entrance up to 15 m.
TUGS: Available if required.
VHF: The Spanish Telephone Company has established a station for ship-to-shore communications.
BERTHING: Quays at Puerto Pi with 12 m. depth alongside. Quays at Puerto de Palma with up to 10 m. depth alongside.
FUEL: Supplied at the quays, rate 150 t.p.h.
FRESH WATER: Available at the quays.
AIRPORT: Palma Airport well connected with the Peninsula (mainland) and with foreign airports.

PASAJES: 43.21 N. 01.54 W. (See Plan Book)

PORT LIMITS: In this port a vessel is considered to be an "arrived ship" (subject to C/P Terms) when the Pilot leaves the vessel once she is inside the harbour. Can be on the roads awaiting for berth or alongside the quay. The laytime will commence when the Master has delivered in writing the notice of readiness.
DOCUMENTS:
4 Crew Lists.
2 Passenger Lists or negative.
2 Cargo Manifests with an individual copy of each Bill of Lading for parcels to be discharged at port of Pasajes.
Copy of Manifest covering other cargo on board in transit for other ports.
Stores List in duplicate, including tobacco, cigarettes, spirits, radios, etc., belonging to the vessel.
Detailed Crew's Stores List, in duplicate, of all personal effects pertaining to crew and passengers (tobacco, cigarettes, spirits, cameras, radios, arms, etc.).

For vessels exceeding 499 tons g.r.t. Safety Manifest Certificate; Safety Equipment Certificate, Deratisation Certificate should be on board ready for production.
PILOTAGE: Pilot service is compulsory and permanent. Pilots board vessel in an area about 1.5 miles out from leading lights of port entrance. The telegraphic address is: Corporacion Practicos, Pasajes. Notice should be given 24 hours before arrival; generally Agents keep Pilots informed of vessel's time of arrival when they are advised by Masters. VHF service in operation.

Pilots' cutter is painted in naval-grey with letter "P" painted in white on both sides of bridge; flag with letter "P" in white, is hoisted on cutters' mast.

International pilot signals are used by Pilots, by means of Aldis lamps, when approaching vessel at night. International light and sound signals to be made by vessel when requiring Pilot.

In event of bad weather Pilots cannot board vessel at usual 1–1.5 miles location. Then vessel has to wait for instructions (VHF or radio) for entering port.

With respect to boarding and safety measures the international safety regulations are to be carried out.
ANCHORAGES: A limited number of vessels may anchor in roads inside the port, in good shelter. Depth in area of anchorage is 25–30 ft.
RESTRICTIONS: The entrance channel has a length of 1,200 m., breadth 80–120 m. and a depth of 20 m. LWS. Vessels over 130 m. length must enter at high water and in daylight.
MAX. SIZE: 170 m. length and 28 ft. draft. When dredging works are completed in the entrance channel, the port will be able to accept vessels of up to 180 m. length and 30 ft. draft.
HEALTH: If vessels proceed directly to berth pratique can be obtained immediately upon berthing. If vessels anchored in bay, pratique can be obtained after anchoring. In case of any suspected disease or fever on board, the Master must advise the Agents, by radio, in order they inform the Sanitary Authorities in advance.
RADIO: Nearest Radio Station is Cabo Mayor Radio. Messages by radio-telephone can be transmitted via Radio Arcachon (France). Notice of ETA should be sent to Agent 24 hours before arrival.
TUGS: No tug-boats required for vessels of normal steering when entering port. Tug-boats are required for berthing or shifting to and/or from quays Muelle De Ancho, Muelle De Molinao, Muelle De Capuchinos for vessels from 80 m. length on. Ship's lines are used and tug-boats are employed according to Pilot's advice.

11 tugs available, the largest being 800 and 1,250 h.p. respectively.

BERTHING: Berths are appointed by Port Authorities after notice of arrival and information regarding cargo given by Agent. Pilots inform Masters of location of berth appointed, if any. No tidal difficulties for berthing or shifting inside the port.

Berths belonging to Port Authority.

Name	*Length* (m.)	*Depth* (m.)
Ancho	305.40	10.00
Molinao	348.60	10.00
Capuchinos	298.30	10.00
Petroleos	159.50	10.00
Lezo. 1	298.40	10.00
Lezo. 2	163.20	10.00

1	6–10 tons
7	12 tons
2	30 tons

STEVEDORES: ETA advice should be received by Agent 24 hours before arrival in order arrange loading/unloading operations with stevedores. The official working time in the port is: Monday/Saturday 0800 to 1200 hrs. and 1330 to 1730 hrs.

MEDICAL: Any kind of medical assistance is available. In case urgent surgical or medical assistance required on vessel's arrival, Agent should be informed in plenty of time to make the necessary arrangements.

No particular inoculations required or vaccination/fever certificates to be produced unless epidemic at last or recently visited ports.

TANKERS: Slop discharge to shore possible under agreement. Oil/tallow/asphalt-carriers berth alongside quays with 30 ft. of water. Diameter of discharge shore-lines are 6 in. and 8 in.

FRESH WATER: Fresh water available at all wharves. Rate of delivery 70 cu/m. per hour.

FUEL: Fuel supplied at Ancho, Molinao, Capuchinos and Petroleos Wharves by CAMPSA. Rate 100 t.p.h. Owners should stem the bunkers with CAMPSA 48 hours before delivery.

FIRE PRECAUTIONS: No specific precautions required unless the vessel carries inflammable cargo. Special harbour fire-fighting corps.

DEVELOPMENTS: Extensive developments respecting the construction of new quays and amelioration of the entrance channel are actually under way. The works in the entrance channel will permit a draft and length increase.

GANGWAY/DECK WATCHMEN: Not compulsory. Shore watchmen available.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: To be produced if required, specially Safety Wireless, Safety Equipment and Deratisation Certificates.

CUSTOMS ALLOWANCE: In case the vessel carries more than 3 kilos tobacco per crew member and more than 2 kilos per passenger, the excess must be declared in a separate Manifest which must be legalised by the Spanish Consular Authorities. In absence of Spanish Consular Authorities that Manifest will have to be legalised by an Authority of last port of clearance wherefrom the vessel proceeds. Prudent, limited amount of spirits allowed per man.

IDENTIFICATION CARDS: Not required.

CONSULS: Consulates/Vice-Consulates at San Sebastian and/or Pasajes:

Argentina
Belgium
Brazil
Colombia
Costa Rica
Chile
Denmark
El Salvador
Finland
France
Germany
Great Britain
Greece
Italy
Netherlands
Norway
Panama
Paraguay
Peru
Portugal
Sweden

REPAIRS: Repair shops and shipyards available, where repairs or overhauls may be carried out.

DRY DOCKS: One floating dock 66.27 m. long. 23.25 m. wide, 9.125 m. draft. with lifting power of 1,900 tons. 2 slipways (1 for vessels of up to 1,000 tons – one for vessels of up to 300 tons).

REPATRIATION: Good facilities for repatriation.

AIRPORT: Airport of Fuenterrabia is situated at 15 km. from Pasajes. Regular daily services with Madrid and Barcelona.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January; 6th January; 19th March; Maunday Thursday (afternoon); Good Friday; 1st May; Ascension Day; Corpus Christi; 29th June; 7th July; 18th July; 25th July; 31st July; 15th August; 12th October; 1st November; 8th December; 25th December.

POLICE/AMBULANCE/FIRE: Police 351841; Ambulance 414148; Fire from 0800 to 1930 hrs. tel. 351400, from 1930 to 0800 hrs. tel. 352391; Red Cross (local) 351032; Hospital, San Sebastian, 423632.

TELEPHONES: No possibility of placing telephones on board.

SERVICES: Divers, compass adjusting.

SHORE LEAVE: Crew allowed to land immediately upon arrival.

AGENT: Sobrinos De. M. Camara Y Compania, Telegrams "Camara". Tel. 357045, 357046 and 357047. Telex 36241.

(Shipbrokers, Customs/Forwarding Agents, Chartering Agents, Lloyd's Sub-Agents.)

RIBADEO: 43.33 N. 07.05 W.

DOCUMENTS:

Manifest of Cargo, including cargo in transit.
3 Crew Lists.
2 Passenger Lists or negative.
2 Stores Lists.

If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest which must be visaed by Spanish Consul at last port, otherwise is exposed to heavy fine.

PILOTAGE: Prior advice of ETA required by Pilot, who boards at the mouth of the river at the time advised by Agent. Pilot boat is white-painted motor launch, carrying international pilot signals.

In case of bad weather, Pilot will instruct vessel by signals to proceed to anchorage or to berth.

The Pilot always boards on the lee side, in the latitude of Isla Pancha.

ANCHORAGE: At Ensenada de Arneo, approx. position 43° 33′ N. 7° 01.6′ W. in depth of 9 m. LW.

RESTRICTIONS: Vessels enter night and day, limited only by draft and state of tide.

MAX. SIZE: Length and beam not limited. Max. draft 15 ft.

HEALTH: Pratique given on arrival on production of clean Bill of Health. International quarantine signals to be used. Port Authorities to be advised if any case of suspected disease or fever on board.

RADIO: Messages may be routed through coastal stations at Vigo, La Coruna or Gijon.

TUGS: None available.

STEVEDORES: Stevedores services operated only by Servicio de Trabajadores Portuarios.

BERTHING: Vessels may berth at the mole at any time, or state of tide, according to draft.

MEDICAL: There are 2 clinics and 1 hospital locally. Advance notice not essential.

DENSITY: 1025.

FRESH WATER: Water connections exist along the length of the mole. Rate, 20 t.p.h.

FUEL: There is a gas oil supply for small vessels, rate 5 t.p.h.

GANGWAY/DECK WATCHMEN: None required.

OPENING/CLOSING HATCHES: Performed by crew.

CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle wine/spirits per man.

CONSULS: Nearest at La Coruna.

REPAIRS: Minor mechanical repairs can be effected. Slipway for vessels up to 200 tons.

AIRPORT: Nearest at La Coruna, 150 km. away, or Aviles, 165 km. away, with regular services to Madrid.

TIME: GMT plus 1 hour all year round.

POLICE/AMBULANCE/FIRE: Tel. Ribadeo 110650.

AUTHORITY: Ayudante Militar de Marina.

ROSAS: 42.14 N. 03.10 E.

DOCUMENTS:

Crew List.
Passenger List.
(1 of each) Ship's Papers.

PILOTAGE: No Pilots in this port.

ANCHORAGE: Bay of Rosas is anchorage area.

MAX. SIZE: Draft in Commercial Port is 4 m., which berths cargo ships of about 1,000 metric tons of net register.

HEALTH: Once ship is anchored in the bay it requires pratique by means of signals, and by raising the yellow health flag. When vessel entering after calling at another port in the same country, this procedure is not required; Health Inspector boards at the quay side.

RADIO: No radio station in the port, but can contact Coastal Radio Station of Barcelona (1730 kc/s. – 173.4 m.), power 150 W.

TUGS: None.

BERTHING: Advisable during daylight only.

MEDICAL: Port Health Doctor available. Hospitals 18 km. distance.

FRESH WATER: Available at Commercial Port at rate of 8 to 10 metric t.p.h.

FUEL: None available.

POLICE/AMBULANCE/FIRE: Police Service 25-62-72; Ambulance Service 24-21-20; Fire Service 24-10-00.

AUTHORITY: Ayudante Militar de Marina de Rosas.

SAGUNTO: 39.42 N. 00.14 W. (See Plan Book)

PORT LIMITS: The East/West line through the point of Cape Escollera de Levante.

DOCUMENTS:

2 copies Entrance Manifest.
4 copies Crew List.
Passenger List disembarking at this port.
Passenger List in transit.

Refer to "Barcelona" for other important information concerning Documentation.

PILOTAGE: Port is privately owned, and Pilots employed by Altos Hornos del Mediterraneo S.A. As Pilots are employed in Consignees office no separate ETA is necessary. They are sent out to meet vessels as required. Pilot boat is not fitted with radar or VHF. Boat displays signals in accordance with international regulations.

ANCHORAGE: From 155° to 170° from the Cape Canet Lighthouse in 20 m. of water.

RESTRICTIONS: Delays may be caused by berth being occupied. Larger vessels may be delayed by bad weather (the Levante), as dredged channel is narrow.

MAX. SIZE: Draft 29 ft. 5 in. No other limitations.

HEALTH: Pratique can be arranged at any time by Consignees.

RADIO: Cadiz Radio-EAC, Cabo Palos Radio-EAP and Valencia Radio EAV.

TUGS: Normally join vessel either in anchorage or 0.5 mile from entrance. Ship's lines are used. Tugs should be ordered in ETA message also mentioning vessels length and cargo.

BERTHING: Subject to berth occupation and to berthing priority that Altos Hornos gives to different cargoes. Overnight berthing is allowed, in cases of emegency, or for ship safety.

BULK HANDLING FACILITIES: Ore loading pier for Sierra Menera (approx. 1,700 m. in length). Max. draft 48 ft.

CRANES: 10 at 6 tons on the coal quay, 4 at 20 tons, 4 and 60 tons and a 250 ton winch on the new quay.

STEVEDORES: Employed by consignees.

MEDICAL: Medical assistance should be ordered in advance. All kinds of medical assistance available. One hospital owned by Altos Hornos.

TANKERS: No facilities.

DENSITY: Salt water.

FRESH WATER: Available.

FUEL: None available.

FIRE PRECAUTIONS: Fire service organised by Altos Hornos.

GANGWAY/DECK WATCHMEN: Usually by crew. The Civil Guard keep watch on all ships for contraband.

OPENING/CLOSING HATCHES: Effected by ship's crew.

DEVELOPMENTS: Port to be expanded during the next five years to accommodate 300,000 tonners, at specialised cargo handling facilities. (Delayed for time being).

CUSTOMS ALLOWANCE: 200 cigarettes only. One bottle spirits per man but bottle should be opened. Spanish spirits allowed; one bottle per man. No control of Spanish wines.

IDENTIFICATION CARDS: Passport only.

CONSULS: Nearest at Valencia.

REPAIRS: Small repairs possible.

REPATRIATION: Facilities for effecting crew changes and arranging repatriation.

AIRPORT: Manises Valencia, 40 km. away.

TIME: GMT plus 1 hour.

HOLIDAYS: On religious festivals or Sundays no cargo work can be arranged. These are as follows: Our Lady of the Sea (16th July) no cargo work; National Festivity (18th July) no work; National Festivity (25th July) no work; Hispanic Festivity (12th October) no work; Maunday Thursday, work can be done till 1400 hours; Good Friday, no work.

TELEPHONES: None on board. Telephones placed in Boat house and Pilots' office.

SHORE LEAVE: Crew members allowed ashore.

AUTHORITY: Ayudante Militar de Marina.

SAN FELIU DE GUIXOLS (Gerona):
41.46 N. 03.01 E.

GENERAL: Refer to Palamos for all general information.

PILOTAGE: Pilotage is compulsory. Service between 0700 to 2400 hrs.

ANCHORAGE: Vessels arriving after midnight or due to port congestion are anchored outside the breakwater.

MAX. SIZE: The maximum advisable draft for berthing is 22 ft. and up to 115 m. length.

TUGS: No tugs available.

BERTHING: Due to the fact that a few vessels can work at the same time, it is advisable to know as soon as possible the ETA for berthing arrangements.

Commercial Wharf.	Length 108 m.	Depth 22 ft.
Breakwater	Length 116 m.	Depth 22 ft.

A pier for coasting vessels with a maximum draft of 18 ft.

MEDICAL: Any kind of medical services can be obtained in San Feliu or Gerona hospital.

FRESH WATER: By means of hoses from the pier.

FUEL: Can be supplied in small quantities.

CARGO GEAR: Commercial pier is served by an electric crane able to lift up to 6 tons. Normally vessels derricks are used.

SANTANDER: 43.28 N. 03.49 W. (See Plan Book)

PORT LIMITS: Between Cabo Menor and Punta Galizano.

DOCUMENTS:

5 crew lists.
7 passenger lists, or 3 negative.
3 cargo manifests of the goods destined to the port of Santander, 2 sets of manifests for cargoes in transit.
Store list in triplicate, including tobacco, spirits, radios, etc., belonging to the vessel.
Detailed list in triplicate of all personal effects of crew and passengers (tobacco, spirits, cameras, souvenirs, radios, etc.).
For vessels exceeding 499 g.r.t: Safety wireless certificate and Safety equipment certificate.

Legalisation required for manifests covering tobacco and tobacco products. This legalisation to be effected at the port prior to the first Spanish port of call.

Master and each member of crew of vessel can carry for his own consumption up to 3 kilos of tobacco in whatever form, and, if passengers are carried, up to 2 kilos per passenger, all of which must be declared in provisions list (1 kilo of tobacco = 1,000 cigarettes = 100 cigars). If Masters carry greater quantity than stated above, it cannot be manifested as tobacco for consumption on board, but must be included in Consular Manifest as being in transit, and as such must be separated in the holds from other cargo and hatches or lockers will be sealed by Customs until ship leaves Spanish waters. This Consular Manifest has to be legalised by a Spanish Consul. In the absence of Consul, said document will have to be visaed by an Authority of the former port of clearance. Otherwise, vessel would be severely fined.

PILOTAGE: Compulsory and service is permanent. Pilots board vessel by a cutter at the road, near the entrance off Mouro Island. Pilot cutters are painted white and have the letter "P" in black, on each bow. Cutters have blue flag with letter "P" in white, at both sides of flag. At night cutters have a white light, under this a red one. VHF available.

ANCHORAGES: The harbour consists of a large bay which provides good anchorage.

RESTRICTIONS: Entrance is well marked and there is no bar. Depth at entrance is at max. (dependent on tides) 34 ft.

MAX. SIZE: No restriction in respect of length or breadth, the maximum advisable draft to enter port is 34 ft.

HEALTH: If the vessel proceeds directly to berth, pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.

If vessel has sickness on board of a contagious nature Masters should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted free pratique. If vessel has to be fumigated or deratised a charge is made.

RADIO: Nearest important radio station is Cabo Mayor Radio, and it is advisable that messages received at least 24 hours before arrival.

TUGS: No tug-boats required for entering the port, only for berthing or shifting when in port. Ship's lines are used, and tug-boats are employed according to Pilot's advice.

BERTHING:

Berth	*Length* m.	*Depth* m.
Calderon	270	4
Maura	55.6	6.5
Albareda	267	7.25 to 9.5
Almirante	107.2	9.5
Maliano (Sections 10 and 11)	229.1	10.5
Maliano (Section 9)	129	7
Maliano (Section 8)	106.4	5
Maliano (Sections 1 – 7)	710	8
North Edge	538	9.5
Campsa Quays	280	8.5

All depths of water quoted above correspond to LWOST and 13–14 ft. should be added for depths at HWOST. Bottom is generally soft.

Calatrava Wharf: for discharge of chemicals. Depth alongside 34 ft. with overall length limitation of 980 ft. Up River, at Astillero, beyond the harbour area, there is one spout called Orconera Tip for loading iron ore. Vessels up to 260–270 ft. length are allowed with a maximum draft, fully loaded, of 19 ft. Loaded vessels can only sail from that place at high water. A modern installation for dismantling and scrapping vessels is operating up river, on the way to Astillero.

CARGO-HANDLING FACILITIES: There are berths for handling bulk cargoes, grain, ore, coal, etc. There are also berths for handling bulk liquids, chemicals. Berth available for roll-on/roll-off traffic.

STEVEDORES: It is very important that Masters send advance notice regarding vessel's ETA. With this notice, Agents can inform Shippers or Receivers' stevedores accordingly. Official working hours of port, are: Monday/Saturday: 0800–1200 hrs.; 1400–1800 hrs.

MEDICAL: Any kind of medical services can be arranged.

TANKERS: "Campsa" (Spanish State Monopoly): Installation is served by two identical concrete wharves situated in Nueva Montana Basin, berthing space of which is 500 ft. with a depth alongside of 29 ft.

DENSITY: Sea water.

FRESH WATER: Always available. Supply is performed by tug-boats and from shore connections at various quays.

FUEL: Ordinary fuel, diesel and gas oil are available at "Campsa". Advisable that shipowners stem bunkers through their own Contractors, with an anticipation (at least) of 48 hours. Delivery can be performed either by tank-trucks or at bunkering pier.

DEVELOPMENTS: *Extensions:* The entrance channel has been widened to 200 m. and has some depths between 9.5 and 10.5 m.
GANGWAY/DECK WATCHMEN: Not compulsory but available upon request.
OPENING/CLOSING HATCHES: Effected normally by crew, except in liner vessels, which is contracted by stevedores.
CERTIFICATES: Vessels should have the usual documents on board, but only the safety Wireless, Safety Equipment and Deratisation Certificates are required by Authorities.
CUSTOMS ALLOWANCE: Normally, Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirit per man.
CARGO GEAR: Shore cranes are usually employed in loading/discharging operations.
CRANES:

Maura Quay	1	fixed 30 ton crane (electric)	
Albareda Quay	3	electric mobile cranes –	3 tons
Maliano Quay (Sections 10 & 11)	6	,, ,, ,,	6 tons
Maliano Quay (Sections 1 to 7)	14	,, ,, ,,	3 – 6 tons
North Edge Quay	4	,, ,, ,,	6 tons
	5	,, ,, ,,	12 ,,

Also movable motor cranes, mechanical shovels and similar, available.
IDENTIFICATION CARDS: not required.

POLICE/AMBULANCE/FIRE: Police 222543; Civil Security Guards 232004; Hospital, Casa de Socorro 221214, Valdecilla 231400; Fire 231662; Ambulance Cruz Roja 270235.
TELEPHONES: On very special instances, can be arranged.
SERVICES: Available for tank cleaning, washings, compass adjusting, hull cleaning whilst floating, radio installation repairs, etc.
SHORE LEAVE: Crew allowed ashore at any time.
AGENT: Modesto Pineiro y Compania, S.R.C. PO Box 14, Paseo de Pereda, num. 27, Santander.
Telegrams "Pineiro-Santander". Tel. 220000. Telex 35832. (P & I Club representatives, Shipbrokers, stevedores and chartering Agents, Lloyd's Sub-agents, Car Ferries. Greek, Netherlands and Peruvian Consulates.)

SEVILLE: 37.25 N. 06.00 W.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
2 Cargo Manifest, including cargo for discharge and in transit.
Declaration of Health.
2 Lists of Provisions and Stores.
2 Copies of Bills of Lading.

If vessel carries over 3 kilos tobacco per man the excess to be declared in a separate manifest which must be visaed by Spanish Consul at last port, otherwise is exposed to heavy fine.
PILOTAGE: *At the Bar:* Vessels may commence to enter and leave the river 1.5 hours after low water. Bar Pilots are stationed a Chipiona and come out to board vessels when requested, 2 miles North of Chipiona Lighthouse.

Pilot motor launches about 9 m. long, painted white with black "P" on sides. They carry regulation lights and signals day and night.

River Pilots: Vessels should radio their ETA at least 24 hours in advance to "Practicos Sevilla". River Pilots are stationed at the pier at Bonanza, 36.48 N. 06.20 W. Sound signal to call Pilot is 3 long blasts. Pilot boards from white-painted launch marked by black letter "P" and carrying regulation signals. Pilots require means of embarkation in accordance with International Conventions.
ANCHORAGE: At Bonanza, in depth of 20 ft. below chart datum.
RESTRICTIONS: Navigation in the river above Bonanza is prohibited at night to vessels of more than 115 m. length, and 18 ft. draft, and to tankers or vessels with dangerous cargoes.

Draft is controlled by height of tide and this should be ascertained by Owners or Agents in advance for the probable date of entry.
MAX. SIZE: Length 185 m., beam 24 m., max. draft about 24 ft. dependent on height of tide. Tankers are required to have an additional 1 ft. keel clearance.
HEALTH: Pratique is obtained on arrival at Bonanza, on presentation of International Health Certificates.
RADIO: Coastal stations of Cadiz, EAC, or Aranjuez, EAD 3.
TUGS: Normally join vessel in the anteport. Ship's tow line is used.
BRIDGES: Vessels berthing at Delicias Quay must pass through the Alfonso XIII drawbridge. May be opened at any time of day.
STEVEDORES: 24 hours notice should be given by Agents and confirmed 12 hours before vessels arrival.
MEDICAL: All medical and hospital facilities available.
TANKERS: There are 2 berths, depth alongside 20 ft.
At Quay No. 2, hoses 8-in. diameter.
At Quay No. 3, hoses 8 and 10-in. diameter.
DENSITY: Fresh water. The tide has no influence at Seville.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Not considered necessary. All quays are watched by the Guardia Civil.
OPENING/CLOSING HATCHES: Performed by ship's crew.
CUSTOMS ALLOWANCE: 3 kilos tobacco per crew man, and 2 kilos per passenger; this includes tobacco in bonded stores. No restriction on wines/spirits.
IDENTIFICATION CARDS: Not required.
CONSULS: The following countries are represented at Seville:

Belgium
Bolivia
Colombia
Cuba
Chile
Denmark
Dominican Republic
Germany, Fed. Rep.
Great Britain
Greece
Honduras
Italy
Liberia
Nicaragua
Netherlands
Panama
Peru
Portugal
Sweden
Uruguay
Venezuela
United States

REPAIRS: All types of repairs can be effected.
DRY DOCK: Astilleros Espanoles S.A. have 1 dock, length 149 m., breadth 25 m.
REPATRIATION: All facilities available.
AIRPORT: Situated 12 km. away, regular daily flights to Madrid, Barcelona, other parts of Spain. Some transatlantic flights.
TIME: GMT plus 1 hour, all year round.
HOLIDAYS: 1st January; 6th January; 19th March; Maundy Thursday; Good Friday; 1st May; Ascension Day; Corpus Christi; 29th June; 12th October; 1st November; 8th December; 25th December. All holidays may be worked with overtime.
POLICE/AMBULANCE/FIRE: Police: 091; Fire Brigade: 232123; Ambulance: 231945.
TELEPHONES: Can be installed on board if requested 10 days in advance.
SHORE LEAVE: No restrictions.
SERVICES: Fresh provisions and stores available, refuse collection, correction of compasses.
AUTHORITY: Comandancia Militar de Marina.

SOLLER: Majorca, 39.47 N. 02.46 E.

DOCUMENTS: See "Bilbao".
PILOTAGE: None available. 2 intermittent lights situated on the Mola indicate the Entry Channel.
MAX. SIZE: Advisable length and draft 60 and 4.50 m. respectively.
TUGS: None available.
MEDICAL: It is advisable to give advance notice if medical attention is required. There are no hospitals. Medical service is available 5 km. from the port.
FRESH WATER: Not available at the quay.
FUEL: None available. If required the order should be placed to Campsa through the Agent.
GANGWAY/DECK WATCHMEN: Crew do this operation.
OPENING/CLOSING HATCHES: Crew.
IDENTIFICATION CARDS: It is advisable to have these available.
CONSULS: None.
REPAIRS: No facilities exist.

AIRPORT: The airport is situated 40 km. away; the island is well connected with the Peninsula (mainland) and with foreign airports.
TIME: GMT plus 1 hour.
SHORE LEAVE: Allowed.
AUTHORITY: Jefe Encargo del Despacho de Buques, Oficianas del Destacamento de la Comandancia Militar de Marina en Soller.

TARRAGONA: 41.06 N. 01.17 E.

DOCUMENTS: Cargo Manifest of all goods in ship, stating any foreign port from where those goods come. This procedure should always be done in the first Spanish port.

In first Spanish port ship should produce an Itinerary Manifest; and those ships which carry goods to discharge should produce this Manifest in those ports in which they will discharge the goods.

Supplies Certificate for those ships not having any goods to discharge in any Spanish port, or who have previously been in other Spanish port.

Register of the Supplies and Equipment in ship.
Register of the Crew's Belongings, if the ship comes directly from a foreign port.
Passenger List (if there are passengers). Negative Passenger List (if there are no passengers).
Crew List.
Health Certificate, if the ship comes from another Spanish port.

PILOTAGE: Every ship upon arrival should note following signals: During day, hoist flag letter "G" of International Signals Code. Acoustics signal, three long whistles. During the night, flash signal letter "G" of code or the letters "PT". Cable Address: Practicos Puerto Tarragona. VHF station Channels 16, 14, 12 and 9.

Pilot boats: White colour with letter "P" painted on both sides. Lights: according to International Regulations. Pilotage area begins at a max. distance of 2 miles from port entrance. Ships awaiting for Pilot anchor in the Rada and East of the lighthouse. If weather does not allow, Pilot will meet ship at port entrance. Ladder for Pilot to be placed at leeward side.

ANCHORAGE: The West limit is marked by imaginary line running N./S. at the end of the breakwater. East limit is marked by imaginary line between the Paseo de Sta. Clara with the cathedral tower. Depths in Rada are 16 m. and 30 m.; quite good for anchoring (mud and sand).
RESTRICTIONS: No restrictions to enter port during day or night. No tides.
MAX. SIZE: Max. length 260 m., max. draft 38 ft. 06 in. Outside port the plant of Pantalan de Assesa, 1 mile West of lighthouse, allows berth of tankers up to 30,000 tons d.w.t. Enpetrol, 60,000 d.w.t.
HEALTH: Hospitals and clinics available. There is a doctor service in health department of port, which is authorised to vaccinate, and give certificates against yellow fever authorised by the OMS.
RADIO: No radio station.
TUGS: Six tugs. Tugs join vessel outside port. Ship's lines are used.
BERTHING: All berths are made of stone with rubber protection every 20 m. in the port. In Pantalan de Assesa and Pantalan Enpetrol, quays over iron pillars and berth is on the platform.
STEVEDORES: Advisable to report ETA, in order to have all the necessary equipment and necessary number of workmen required for operations. If there are not enough cranes at a given time, own ship equipment is used.

General Cargo: Estimated speed of 80–100 tons per person in a working day of 8 hours, except in particular cases due to the nature of the cargo.

Cargo in Bulk: Speed varies according to the nature of the goods. For instance:
Minerals: 500–800 tons per person in a working day of 8 hours.
Grains: 400–600 tons per person in a working day of 8 hours.
Goods in bags: 150–200 tons per person in a working day of 8 hours.

GANGWAY/DECK WATCHMEN: Not compulsory, if Master requires them he is provided with specialised staff for this purpose.
OPENING/CLOSING HATCHES: Although this work is normally carried out by crew it can be done as well by the stevedores if required at extra charge.
TANKERS: Outside the port there is berthing for oil carriers at Pantalan of Assesa, Pantalan Enpetrol and monobuoy for large tankers.

Storage of residues: There is a plant for slop (residue) discharge facilities connected with all platforms of the Pantalan and plant of residues disposal is available to all vessels.

There are 3 platforms to berth with the following drafts: Platform "A" – 38 ft. Platform "B" – 29 ft. Platform "C" – 23 ft. In inner port there are berths to discharge refined goods available to the tankers of the Compania Arrendataria of the Oil Monopoly.

Pantalan Enpetrol with 3 platforms; Platform 80S – 49 ft. Platform 35T – 49 ft. Platform 35S – 43 ft.

FRESH WATER: Supply of fresh water by means of an underground pipe in all the commercial quays of the port.
FUEL: Available. The grade of viscosity available is below 20 E. to 50 C. Request of this supply should be done with 24 hours notice through the Commercial Agent of Campsa.
DEVELOPMENTS: Building of quay in Levante Dock, with a length of 550 m. and 12 m. draft, with a probable extension of another 300 m. of quay with 14 m. draft. The draft in the port will then be 12.70 m. and in the entrance channel 13.40 m.
CUSTOMS ALLOWANCES: It is permitted to have a packet of tobacco per person per day. Unlimited allowance with national drinks.
CREW IDENTIFICATION CARDS: Not required.
CONSULS: Various available.
REPAIRS: Small repairs available.
DRY DOCKS: None.
REPATRIATION: Facilities exist.
AIRPORT: The town of Reus 12 km. distance has a military airport that is also used for charter flights and regular flights to Madrid.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police 20–11–29; Ambulance at local hospitals; Fire 20–19–50.
SHORE LEAVE: Allowed.
AUTHORITY: Capitan del Puerto en Comandancia Militar de Marina.

TORREVIEJA: 37.58 N. 00.40. W.

DOCUMENTS:
2 Crew Lists.
Customs Documents.
Health Declaration.
Manifests.
Bills of Lading are done by Agents.

PILOTAGE: Requested by Agent. Permanent service. White-painted boat with letter "P" on sides. Pilot goes out of port as far as 1 mile.
ANCHORAGE: Outside, 0.5 mile off lighthouse of Eastern quay. Inside, according to Pilot's judgement.
MAX. SIZE: Unlimited length and breadth; limiting draft 27 ft.
RADIO: Alicante Coastal Radio.
TUGS: None available.
BERTHING: West quay is 220 m. long with a depth of 10 m. used only for loading salt, 200-400 metric t.p.h.
STEVEDORES: Available, employed by the consignees.
MEDICAL: Hospital situated 45 km. distance. Medical services and Emergency Clinic in port.
DENSITY: 1034.
FRESH WATER: Available at the quay. Price 50 pesetas per metric ton.
FUEL: None available.
GANGWAY/DECK WATCHMEN: If required can be contracted.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCE: 200 cigarettes. 2 bottles of wine.
IDENTIFICATION CARDS: Not necessary but convenient.
CONSULS: Sweden Vice-Consul 101; Norway, Denmark and Liberia Vice-Consul 135.
REPAIRS: Small repairs in engines, electrical, etc.
REPATRIATION: There are no problems in this respect.
AIRPORT: 30 km. distant at Alicante. Regular flights to Madrid.
TIME: GMT plus 1 hour.
HOLIDAYS: See Huelva.
POLICE/AMBULANCE/FIRE: Police tel. 99, Ambulance and Fire tel. 83.
TELEPHONES: There are no connections on board. 1 on the quay.
SHORE LEAVE: No restrictions.
AUTHORITY: Ayudante Militar de Marina and Captain of the Port.

VALENCIA: 39.27 N. 00.19 W. (See Plan Book)

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 3 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.
PILOTAGE: Pilotage is compulsory for this port. Day and night service. The pilot launch is painted black with a letter "P" painted in white on the sides.
ANCHORAGE: There is a good anchorage outside the port, vessels are required to keep the entrance channel clear.
RESTRICTIONS: Entrance to the port faces S.S.E. and is 260 m. wide, with a low water depth of 15 m.
MAX. SIZE: The following size vessels have entered the port.

GRT	*LOA*	*Draft*
32,280 tons	273 m.	10.00 m.
44,992 tons	255 m.	11.58 m.
44,688 tons	257 m.	13.30 m.

HEALTH: If the vessels proceed directly to berth, pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.

If vessel has sickness on board of a contagious nature Master should advise Health Authorities by radio, and they will examine

patients immediately upon arrival, to enable vessel to be granted free pratique.
RADIO: Coastal radio station with international frequencies 1580 kHz. ETA to be sent to Agent in advance.
TUGS: Not compulsory for entering port. 8 tugs available up to 1,800 h.p. Two tugs normally used for berthing and unberthing.
BERTHING: Quays operated by Port Authority:

Name	*Length m.*	*Depth m.*	*Use*
Levante	953.14	9.00	Bulk and general cargo
Transversal of Outer Levante	148.00	7.00	General cargo
Transversal of Outer Poniente	205.90	7.00	General cargo
Poniente Quay – Section 1	186.40	9.00	General cargo & bulk
Poniente Quay – Section 2	160.00	11.00	Logs and bulk cargo
Turia Pier, extension North, Section 1.	62.00	9.00	Containers
Turia Pier, extension North, Section 2.	219.00	11.00	Containers
Turia Pier Head	151.00	11.00	Bulk cargo
Turia Pier, extension South, Section 1	166.50	9.00	Bulk cargo, oil products
Turia Pier, extension South, Section 2	219.00	11.00	Bulk cargo, oil products
Turia	402.00	9.14	Wood & oil products
South	600.00	14.00	General cargo & bulk
Inner Levante Transversal	184.60	7.00	General cargo
Customs	387.00	7.00	General cargo
Landing Quay	255.75	7.00	General cargo & passengers
Station	356.00	7.00	General cargo
Nazareth	175.00	7.00	General cargo
Inner Poniente Transversal	212.25	7.00	General cargo

CARGO-HANDLING FACILITIES: Grain, coal, fertilisers, etc., in bulk are handled at Espigon del Turia and Muelle del Turia. Also at Muelle del Turia is a chemical-handling installation, depth alongside 9.25 m.

Containers: Two berths at the Turia pier, North side, with crane of 30 metric tons capacity, also, and using conventional means, they are discharged at the Western quay.

There are 4 work-points for roll-on/roll-off vessels at the Eastern transversal quay and the Western transversal quay.
CRANES: 2 floating cranes, capacity 60 and 80 tons.

The Port Authority operate 54 gantry cranes with capacity of 3 tons to 30 tons. 6 mobile cranes are also available.
TANKERS: *Pipe-lines:* The port areas equipped for oil traffic are connected to the C.A.M.P.S.A. plant by means of a network of 5 pipe-lines, starting at the Turia pier and quay, and ending at the plant itself. These pipe-lines are 1×10 in. diameter with a capacity of 300 cu.m./hr., and another of 8 in. and 250 cu.m./hr. for movement of fuel-oil.

2×8 in. diameter and 250 cu.m./hr. for gas-oil. There are also means of delivery of aviation paraffin by means of 1 pipe-line 6 in. diameter at the rate of 120 cu.m./hr. Also see "Berthing".
MEDICAL: All medical services available in the port and in the city.
REPAIRS: All types of hull and machinery repairs can be effected.
FLOATING DOCK: 1 floating dock available, owned by Union Naval de Levante. Interior length 143 m., interior width 24.60 m. Lifting capacity 8,000 tons.
CUSTOMS ALLOWANCE: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirit per man.
FRESH WATER: Available at all main berths at the rate of 30 t.p.h.
FUEL: Campsa can supply by pipelines at the Turia berths, at the rate of 100–280 t.p.h.
TIME: Always GMT plus 1 hour.
AIRPORT: Valencia Airport, 15 km. from the port.
CONSULS: The following countries are represented in Valencia:

West Germany
Argentina
Belgium
Bolivia
Brazil
Colombia
Costa Rica
Chile
Denmark
Dominican Republic
Ecuador
U.S.A.
El Salvador
Finland
France
Great Britain
Greece
Guatemala
Honduras
Iceland
Italy
Nicaragua
Norway
Netherlands
Panama
Portugal
Sweden
Switzerland
Uruguay
Venezuela
Yugoslavia

POLICE/AMBULANCE/FIRE: Police 091; Fire 271234; Ambulance 230304.
HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st full day); Epiphany (January 6th full day); Saint Joseph (March 19th full day); Easter (two days); Saint Joseph Artisan (May 1st full day); Saint Peter & St. Paul (June 29th full day); Labour Day (July 13th full day); Patron Saint of Spain (July 25th full day); Assumption Day (August 15th full day); Martyrs' Day (August 30th full day); Holiday of Hispanicism (October 12th full day); All Saints (November 1st full day); Christmas Day (December 25th full day).
DEVELOPMENTS: The entrance channel is to be dredged to 15 m. 2×6 ton and 1×30 ton crane under construction. Installation of 6×12 ton cranes in planned.
AUTHORITY: Direccion del Puerto de Valencia.

VIGO: 42.14 N. 08.40 W. (See Plan Book)

DOCUMENTS:
Maritime Declaration of Health.
Crew List.
Passenger List.
Manifest of Cargo for the Port.
Manifest of Cargo in Transit.
Ship's Stores List.
Crew's Personal Effects List.
Ship's Particulars Declaration.

Note: Tobacco. In case the vessel carries more than 3 kilos of tobacco per man, the excess must be declared in a separate manifest, which must be visaed by a Spanish consul. In the absence of the Consul, said document will have to be visaed by an authority of the former port of clearance. Otherwise the vessel would be severely fined.
PILOTAGE: Pilotage at Vigo is compulsory and the service permanent day and night. Pilots board in auxiliary motor-boats with a letter "P" in white at both sides of the hull and a blue flag with the letter "P" in white, near the entrance of the harbour, in the zone included inside Punta Lameda-Cabo Vicos on the channel of the South entrance and inside Punta Caballo-Subrido, on the channel of the North, both situated to the West of the harbour. At night the pilot boats have a white light visible around the horizon and under this light another red one, also visible around the horizon. International code signals used to call Pilot, or four long blasts on the whistle. Pilot station situated at Transatlanticos Pier 3 Pilot boats normally on station on a line connecting Borneira and Transatlanticos Pier.
ANCHORAGE: Several suitable anchorages in the Vigo river, naturally sheltered, in depths of more than 35 m. The main anchorage opposite the port on the South side of the "Ria" has depths of 15–25 m.
MAX. SIZE: No limitation for length and beam, unlimited deep water approaches.
HEALTH: If vessels proceed directly to the berth, pratique can be obtained immediately after berthing. Otherwise, at the anchorage on vessel's arrival. In case of suspected disease or fever on board, the Master must send a radio message to the Agent in order that they advise the Health Office.
RADIO: The nearest Radio Station is Vigo Radio, situated in the limits of Vigo port.
TUGS: No tug-boats are required for entering the port. Only used for berthing ships from 120 m. length upwards according to Pilot's advice. At Vigo there are 2 modern tugs of 1,000 h.p. each. Tugs join vessel off the berth. Tug's line used at no extra charge.
BERTHING: The commercial piers to load or unload have a depth of up to 36 ft. and the Transatlantic Pier, depth of about 40 ft. at LW. The tide difference between high water and low water is about 3.5 m.

At Rande, in the lower harbour, there are very modern special loading installations for mineral ore, at an average rate of 2,000 t.p.h. The depth alongside this installation is 36 ft. LW.

Containers are handled at Muelle de Arenal by cranes of 15 and 20 tons capacity. Depth alongside 11 m.

Roll-on/roll-off traffic berths, depth 6 m., situated inside Transatlantic Pier.
TANKERS: Tankers berth at a pier depth alongside 11 m. at low water. Tankers up to 300 m. length acceptable. Inner berth suitable for vessels of less than 100 m. length with a draft of 6 m. Discharge lines 12 in., 10 in. and two of 8 in. diameter.
STEVEDORES: It is very important that Masters send advance notice regarding the vessel's ETA. With this notice, Agents can inform Shipper's or Receivers' stevedores accordingly, so that they arrange operations properly. The official working hours of the port are Monday/Friday 0830–1230 hrs. – 1400–1800 hrs. Saturday 0830–1230 hrs.
MEDICAL: Doctors and hospital facilities available. Advance notice preferred in urgent cases.
DENSITY: Average 1026.
FRESH WATER: Available from the quays at the rate of 50–80 t.p.h. Can also be supplied by tugs at 500 t.p.h.
FUEL: Available from the Oil Pier or delivered by barge. 24 hours notice of requirements recommended.
DEVELOPMENTS: Bulk carrier berth under construction suitable for vessels up to 300 m. length and 16 m. draft.
GANGWAY/DECK WATCHMEN: Available from shore if required.
OPENING/CLOSING HATCHES: Opening may be done by crew to avoid delays. Closing hatches usually performed by crew.
CUSTOMS ALLOWANCE: 200–250 cigarettes or three kilos of tobacco and 2 bottles spirits may be held out of bond for each person. Wine not restricted.
IDENTIFICATION CARDS: Shore passes are provided by the Agent.
CONSULS: Practically all countries have consulates at Vigo.
REPAIRS: All types of deck and engine repairs are possible.
FLOATING DOCKS: One floating dock available: length 128 m., breadth 22.40 m.
REPATRIATION: Crew changes and repatriation can be arranged without difficulty.
AIRPORT: Local airport, situated 8 kms. from the port, has at least 1 daily flight to Madrid. International airport of Santiago de Compostela is 100 km. away.
TIME: GMT plus 1 hour all the year round.
HOLIDAYS: 1st January; 6th January; 19th March (St. Joseph); Good Thursday afternoon; Good Friday; 28th March (local holiday, Reconquest Day); 1st May (Labour Day); Ascension Day; Corpus

Christi; 29th June (St. Peter and St. Paul); 18th July (National Holiday); 25th July (St James' Day); 15th August; 12th October; 1st November; 25th December.

POLICE/FIRE/AMBULANCE: Police, tel. 21.00.00; Fire, tel. 21.20.00; Ambulance, tel. 21.25.09.

TELEPHONES: No arrangement for connecting on board.

SHORE LEAVE: Allowed without restriction.

DEVELOPMENTS: New transhipment terminal under construction to the North of Bouzas and the West of the fishing port.

AUTHORITY: Director del Puerto, Junta del Puerto y Ria de Vigo.

NOTES

Please also advise Shipping Guides Ltd.

Spanish Sahara

EL AAIUN (Laayoune): 27.04 N. 13.28 W.

LOCATION: Lighthouse at phosphate terminal in position 27° 03′ 55″ N. 13° 27′ 45″ W.

DOCUMENTS: See "Villa Cisneros".

APPROACHES: There is a light located at the end of the bulk phosphate terminal in position 27° 03.9′ N. 13° 27.7′ W. at the top of mineral silos, at a height of 180 ft. 1 flash every 5 seconds, range 10 miles.

There is also a fixed green light located at the Northern part of the terminal, range 10 miles, and a fixed red light at the Southern part of the terminal, range 10 miles.

The phosphate terminal installations give a good radar target at a distance of 25 miles. Vessels approaching from the North should keep 10 miles off the coast until the pier is bearing 090° and then steer towards the pier.

At nights the installation lights are always visible and with a clear atmosphere can be seen from 25 miles off the coast.

PILOTAGE: Compulsory. Pilot boards about 0.75 miles off the pier head.

ANCHORAGES: Good anchorages can be found in 10 fathoms of water. When waiting for the Pilot it is recommended to anchor 0.75 miles Westward of the pier. No shelter in strong winds. Service of powerful auxiliary boats is available when standing at anchor.

MAX. SIZE: Depth 17.5 m. at LWL at the phosphate terminal berth, and 9.5 m. LWS at the berth for general cargo ships, located at the middle of the pier.

HEALTH: Valid smallpox, yellow fever and cholera certificates are required. Otherwise, usual clearance.

RADIO: Via Tenerife Radio on HF, call sign EAT. Via Las Palmas Radio on MF, call sign EAL.

There is no coast radio station in Spanish Sahara for communication with El Aaiun. VHF radio communication is being placed at the phosphate terminal to work in future on Channels 12 and 16.

Ships calling at the terminal are required to send ETA cables 72, 48 and 24 hours prior arrival to "Cargadero Fosbucraa el Aaiun" and "Fosbucraa Madrid".

TUGS: 2,000 h.p. tugs are called from Las Palmas to assist whenever the ship requires their service. Assistance has to be requested by Master or Owner 60 hours prior arrival.

BERTHING: Aaiun Mineral Terminal located approx. 6.5 miles South of El Aaiun City.

The terminal head is in a North-South direction. Vessels are moored alongside dolphins that cover the three loading stations for 100,000, 40,000 and 20,000 tons d.w.t. ships. The loading pier has a height above water of 50 ft. and the dolphins approx. 20 ft.

Facilities consist of modern equipment available for handling phosphate in bulk at a loading rate of 4,000 t.p.h. in 2 of the stations, and 2,000 t.p.h. at the 3rd. The phosphate is loaded by means of moveable loading machines with telescopic spouts to permit perfect trimming.

Facilities at the general cargo berth available for vessels up to 8,000 tons d.w.t. are 2 cranes of 6 tons each, and 1 derrick of 150 tons capacity.

No gangway to be rigged at this terminal. Communication from ship-to-shore is by means of elevator from the loading machines.

AIRPORT: Aaiun (30 km. from harbour).

REPAIRS: No repairs can be effected at this port.

BUNKERS: No bunkers available.

PROVISIONS: Provisions may be obtained if requested by vessel 48 hours prior arrival.

OPERATORS: Fosfatos de Bucraa S.A. (Fosbucraa), Boix y Morer 6, Madrid 3. Cables: "Fosbucraa Madrid". Telex: 27356. Tel.: 2-33-36-00.

VILLA CISNEROS: 23.42 N. 15.55 W.

DOCUMENTS: *Foreign Vessels*

Crew List.
Health Pratique.
Passenger List.
Cargo Manifest.

Spanish Vessels, in addition to the above:

Safety Equipment Certificate.
Radio Safety Certificate.
Seaworthiness Certificate.

PILOTAGE: Pilot is necessary to cross the bar and for river navigation. Pilot joins at anchorage. Pilotage compulsory for all vessels over 50 grt. Contact Pilot by radio-telephone, via Puerto de Villa Cisneros Radio operating on 2182 and 2626 kHz. from 0800 to 1300 hrs. and from 1500 to 2000 hrs. GMT.

ANCHORAGE: In depths of more than 10 m. about 0.6 mile East of the breakwater head. This situation is well protected from swell from the S.W. but open to winds from the N.E. which are frequently strong creating difficult conditions for very small vessels. There are no mooring buoys.

Vessels loading trans-shipment cargo anchor in position with Punta Galera Light bearing 030° T, 1.2 miles off. The prevailing winds blow mostly from the North up to force 3 with a long low swell mostly from a N.W'ly direction.

MAX. SIZE: Length 100 m., beam 12 m., draft 5 m.

HEALTH: Masters are required to complete a health certificate for the Comandancia declaring that the vessel has not called at any infected ports.

TUGS: None available, only one small launch which may assist.

BERTHING: Breakwater of 750 m. length extends towards the S.E., berths alongside the last 200 m., 1 concrete pier for small vessels, 3 small jetties enclosing 2 docks, can be used by vessels of medium size.

STEVEDORES: Employed by Port Authority and engaged by ship's Agent.

MEDICAL: Hospital available for any kind of medical attention; doctors and ambulance service available.

TANKERS: Moor at jetty No. 2. Pipelines 4 in. diameter.

FRESH WATER: On the quays are 3 hydrants, capacity 3 t.p.h. and 4 of 2 t.p.h.

FUEL: Atlas Company can supply fuel subject to advance notice.

OPENING/CLOSING HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCE: Crew are allowed to take only sufficient tobacco ashore for their own consumption. It is not permitted to take alcohol ashore.

IDENTIFICATION CARDS: Seamen going ashore must taken an identity card or a shore pass, issued by the Master.

CONSULS: No local representation.

REPAIRS: Only facilities for very minor repairs.

REPATRIATION: Can be arranged provided that documentation is in order.

AIRPORTS: Situated 1 km from the port. Iberia Airlines have 5 flights per week. In case of emergency, military aircraft may be used.

TIME: GMT is used all year round.

HOLIDAYS: 1st January; 6th January; Maundy Thursday; Good Friday; Corpus Christi; Ascension Day; 29th June; 16th, 18th and 25th July; 15th August; 12th October; 1st November; 25th December.

Mohammedan Holidays: Aid el Queber (2 days); Aid el Mulud (1 day); Aid el Seguer (2 days).

POLICE/FIRE/AMBULANCE: Police Station situated 100 m. from the quays. Fire: tel. 18. Ambulance: tel. 17.

SHORE LEAVE: Allowed without restriction

AUTHORITY: El Comandante, Militar de Marina.

NOTES

Please also advise Shipping Guides Ltd.

Sri Lanka

COLOMBO: 06.56 N. 79.50 E. (See Plan Book)

DOCUMENTS:

5 each of Crew and Passenger Lists.
8 Manifests.
1 Arrival Report for Pilot.
1 Master's Declaration for Immigration, and same for Police.
2 Private Property Lists of officers and crew for Customs.
2 copies of Preliminary Report by Master for Customs.
1 Maritime Declaration of Health for Port Health Officer.
1 Master's Declaration of Cargo for Quarantine Department.

PILOTAGE: Vessels approaching port apply for Pilot by flying the G flag by day or 2 red lights at night. They can, in addition, flash the Pilot station or use VHF Channel 16. The telegraphic address of Pilot station is "Pilot Station Port Commission Colombo" and a provisional ETA 24 hours ahead is advisable with corrections thereafter. However, these are best channelled through the vessel's Agent. Pilot boat is a wooden motor launch with the word "Pilot" on its side. It flies the H flag by day or red and white lights by night according to the international code. The Pilot boards within an area of about 1 mile of the harbour entrance. Advice of where to anchor can be obtained from the Pilot by VHF or signal light.

ANCHORAGES: The usual anchorage off port is within 3 miles of the harbour mouth where up to 14 fathoms of water is available. 18 fathoms of water is available within 6 miles.

RESTRICTIONS: Entry may take place at all hours of the day and night but it is unusual for the Pilot to board vessel between midnight and 0400 hrs.

MAX. SIZE: For entering harbour, max. draft 36 ft. and a length of 800 ft. is permissible. Beam is not critical. There is no appreciable rise and fall of tide.

Tankers' max. dimensions for berthing alongside: length 750 ft., draft 34 ft.

HEALTH: The vessel entering port must fly the "Q" flag until boarded by the Port Health Officer to grant pratique. Pratique may be granted by radio if there is a doctor on board provided the ship is not calling from a port in India. A radio message should be sent within 24 hours of the vessel's ETA in the following terms "Last port — no quarantinable disease on board – Doctor on board" and the Port Health Officer will reply to the Agent confirming pratique being granted by radio. Pratique is automatic if the vessel enters after calling at another port in Sri Lanka. If any quarantinable disease on board double "Q" flags must be hoisted prior to entering harbour.

RADIO: "Colombo Radio" with a call sign 4PB is the usual channel for communicating with Colombo.

The pilot station is presently available on VHF Channel 16 and the Port (Cargo) Corporation on VHF Channel 11.

TUGS: Tugs normally join the vessel at the harbour mouth and use ship's lines.

BERTHING: There are no specific requirements relating to berthing space but early advice of draft is most advisable.

STEVEDORES: The stevedores at Colombo are the Port (Cargo) Corporation, a nationalised concern having the monopoly of stevedoring and lighterage. ETA at least 24 hours in advance if possible. Gangs for the day shift which commences at 0730 hrs. must be ordered by 0700 hrs. and gangs for the evening shift, commencing at 1630 hrs., by 1600 hrs. This excludes the Poya Day on which only the day shift is worked, and gangs must be ordered by 0930 hrs. on the previous day.

MEDICAL: Although advance notice of medical assistance required is helpful, particularly when port stay is limited, it is not essential. Comprehensive hospital facilities are available either in private nursing homes or the Government hospitals. The following inoculations are required: Smallpox and cholera, yellow fever if calling from ports in East Africa and Mozambique.

TANKERS: There are 3 tanker berths, 1 for importing crude oil suitable for tankers of 750 ft. length, max. draft 34 ft. One berth for white oil tankers with max. draft 33 ft. One berth for fuel oil imports for vessels with a max. draft of 31 ft., and this same berth is used for exports when permissible draft is 33 ft.

The diameter of discharge lines;
Crude oil, 24 in., giving capacity 1,000 t.p.h.
White oil, 10 in., capacity 250 t.p.h.
Gasoline, 10 in., capacity 170 t.p.h.
Furnace oil, 14 in., capacity 500 t.p.h.
Naphtha, 12.75 in., capacity 450 t.p.h.

Pumping will not be commenced after nightfall. No residue discharge facilities are available.

DENSITY: 1025.

FRESH WATER: Fresh water is readily available by barge. The rate of delivery is approx. 40 t.p.h. The water is of good quality.

FUEL: Furnace diesel and gas oil available. Advance notice of at least 24 hours is advisable as the bunker requirements of the port often exceed the ability of the oil companies to supply immediately. Supplies are by barges which can pump at 300 t.p.h.

DEVELOPMENTS: One new alongside dry-cargo berth with a draft of 37 ft.

GANGWAY/DECK WATCHMEN: Watchmen are available and are to be recommended unless members of the crew are available to provide this service.

OPENING/CLOSING HATCHES: This work is normally carried out by the stevedores except in the case of McGregor or similar hatch covers which they will not handle.

CERTIFICATES: Register showing vessels name, port of registry, gross and net tonnages and owner. Safety Equipment Certificates quadrennial and annual, Ship's Articles (British) and clearance from previous port and deratisation Certificate.

CUSTOMS ALLOWANCE: Cigarettes 25 per man per day. Tobacco 1 oz. per man per day. Snuff 1 oz. per man per day. Spirits 0.25 bottle per man per day. Wine 1 bottle per man per day. Beer 2 bottles per man per day.

IDENTIFICATION CARDS: These are not essential but the crew is expected to carry some form of identification with a photograph on it when they leave the vessel.

CONSULS:

Belgium
Burma
China
Czechoslovakia
Denmark
Egypt
France
Germany
Greece
Indonesia
Italy
Japan
Maldives
Netherlands
Philippines
Poland
Rumania
Thailand
Switzerland
U.S.A.
U.S.S.R.
Yugoslavia

REPAIRS: Most main engine and boiler repairs and minor hull repairs can be effected.

DRY DOCKS: No. 1 – 700 ft.×85 ft.×32 ft. over blocks – Max. size 675 ft. LOA, 80 ft. breadth – Deepest draft 29 ft.
No. 2 – 350 ft.×54 ft.×22 ft. over blocks.
No. 3 – 400 ft.×54 ft.×18 ft. over blocks.
Owners and Operators – Colombo Dockyard Limited.

A dry dock of 65,000 d.w.t. complete with workshop facilities is planned for operation by late 1981.

REPATRIATION: There is no difficulty in arranging repatriation and crew change.

AIRPORT: It is 18 miles to the international airport which is served by regular airlines.

TIME: Sri Lanka standard time is 5.5 hours in advance of GMT, and no alterations are made during the year.

HOLIDAYS: Cargo work can normally be arranged on all except the following holidays:

1st January; Sinhalese & Tamil New Year 1 day in April; 1st May; Wesak Full Moon in May; Republic Day 22nd May; 26th September; Christmas Day.

POLICE/AMBULANCE/FIRE: Harbour Police tel. 21075; Ambulance 20428; Ambulance launch: Exhibit "A.L." flags; Port Fire Brigade 32331.

TELEPHONES: None are available for placing on board.

GENERAL: Ships should not discharge oil within territorial waters, dispose any waste into harbour or on to quays, immobilise main engines without prior permission, use radio for transmission in harbour. Ships should hoist national flag during daylight hours.

SHORE LEAVE: There is no restriction on crew members being allowed ashore but advised to carry passport or other identification.

DELAYS: Delays for vessels working cargo are seldom over 24 hours. However, it is very unusual for vessels calling for bunkers, fresh water, stores, etc., to be delayed for more than a few hours.

AUTHORITY: Colombo Port Commission.

GALLE: 06.01 N. 80.14 E.

PORT LIMITS: To the Eastward Unawatuna Point, to the Westward Gindurah Point, to the Southward the usual sea league from the line between these points.

DOCUMENTS: Pilot brings on board:

Arrival Report and Maritime Declaration of Health.

Port Health Officer boards vessel after berthing and collects Crew List, Passenger List, Maritime Declaration of Health. Examines crew, passengers and International Certificates of Vaccination.

Customs. Manifests, Bonded List, Passenger List, Cargo List, List of Currency, Port Declaration.

Immigration. 3 Crew Lists.

PILOTAGE: Apply for Pilots via local Agents. Send ETA not more than 24 hours prior arrival via Colombo Radio. Vessels telegraph direct to Master Attendant, Galle, via Colombo Radio. Vessels advised listen-in on Channel 16, VHF.

Pilot launch about 60 ft. long with white hull carrying word "Pilot". Pilot launch proceeds to vessels from Master Attendant's Office and Pilot will board about 0.25 mile to South of bell buoy. Vessels should anchor until pilot launch arrives and heave-up on approach of pilot launch; due to heavy swell prevalent *essential* vessels provide good lee for Pilot. Proper pilot ladder and two man ropes should be ready. Vessels anchoring should do so to the South or East of bell buoy. See "Anchorages".

ANCHORAGES: Best anchorage lies to Eastward of bell buoy where depth 9 fathoms. To Southward of bell buoy depth increases to 15 fathoms. Vessels should anchor about 0.5 mile from bell buoy.

RESTRICTIONS: Vessels should not proceed North of bell buoy. Entry prohibited after 1700 hrs. and may be delayed by bad weather. Generally a wind force of over 25 knots and a swell of over 4 ft. delays entry.

MAX. SIZE: N.E. Monsoon. 1 vessel of 500 ft. up to 30 ft. draft, 2 vessels of 500 ft. up to 26 ft. draft, 1 vessel of 450 ft. up to 23 ft. draft, 1 vessel of 350 ft. up to 20 ft. draft can be berthed at stream berths. S.W. Monsoon. 1 vessel of 475 ft. up to 25 ft. draft, 1 vessel of 450 ft. up to 21 ft. draft. 1 vessel of 350 ft., up to 18 ft. draft can be berthed at stream berths.

Two alongside berths available for vessels up to 350 ft. length and 18 ft. draft. 750 ft. of quay space available.

HEALTH: The International Declaration of Health, handed to Master by Pilot, must be completed and returned to Port Health Officer, who boards after berthing. PHO also requires 2 Crew Lists, synopsis of Vaccination Certificates, Deratisation Certificate and examines Certificate of Vaccination.
RADIO: Colombo Radio.
TUGS: At present only 1 tug of 250 h.p. available throughout year. If sufficient notice given (over 24 hours) an additional tug could be sent from Colombo (only available during N.E. Monsoon). Tug meets vessel at berth, tugs lines used. Charges for tugs included in port (pilotage) charges irrespective of ownership of towing lines.
BERTHING: Vessel berthing in stream lies to both anchors and picks up 4 to 6 mooring lines from buoys aft. To pick up mooring lines, vessel should have ready at stream 2 messenger wires of 2.5 in. diameter and 60 fathoms length.
STEVEDORES: All stevedoring carried out by Government Corporation. Gangs, lighters etc. are all arranged by Port (Cargo) Corporation. 16 lighters of approx. 15 d.w.t. capacity available for working vessels in stream berths.
MEDICAL: Vessels arriving in Galle and requiring medical attention should cable Agent and Port Health–Galle at least 12 hours in advance.
DENSITY: 1025.
FRESH WATER: In cases of emergency up to 20 tons fresh water could be supplied daily in stream in 400 gallon tanks conveyed by lighters. Alongside main quay up to 50 tons per night could be supplied by Bowser.
FUEL: Bunkering Division of Ceylon Petroleum Corporation, Kolonnawa (off Colombo) can service vessels with small quantities of fuel. 5 days prior notice required.
DEVELOPMENTS: Building of breakwater and all dredging operations stopped indefinitely.

Dredging main quay to 30 ft. deep, and channels to 33 ft. depth.
GANGWAY/DECK WATCHMEN: Ceylon police station 2 policemen aboard every vessel in harbour. For vessels berthed alongside policemen stationed aboard through day. For stream vessels policemen stationed only during hours when cargo worked.
OPENING/CLOSING HATCHES: Shore labour, but there is no objection to hatches being opened prior to labour boarding.
CUSTOMS ALLOWANCE: Present allowance 200 cigarettes per week, 2 bottles beer per day. Others proportionately.
CONSULS: All consular officers in Colombo, 72 miles away, 2 hours by train, 2.5 hours by road.
REPAIRS: No repairs possible as Galle open to S.W., essential that vessels have engines ready at all times. No shutdown permitted.
REPATRIATION: Sub-collector of Customs acts as Shipping Master and will sign on/off properly authorised crew changes.
AIRPORT: Colombo.
TIME: Standard Time GMT plus 5.5 hours.
HOLIDAYS: Non-working days in the port (dates variable yearly): Sinhala and Tamil New Year in April; Good Friday, 1st May; Wesak Full Moon in May; 22nd May; 26th September; Christmas Day.
POLICE/FIRE/AMBULANCE: Harbour Police 3222; Ambulance 2261. No fire brigade available.
TELEPHONES: No telephones available aboard.
SHORE LEAVE: Crew allowed ashore.
AUTHORITY: Master Attendant, Master Attendant's Office.

TRINCOMALEE: 08.36 N. 81.15 E.

DOCUMENTS:

International Maritime Declaration of Health.
6 copies Crew List.
6 copies Passenger List.
Smallpox Vaccination Certificates are compulsory.
Cholera or Yellow Fever Certificates required if vessel is arriving from an infected port.

PILOTAGE: Call Pilot on VHF Channel 16, also send ETA via Colombo Radio to Pilot Station. Vessels should indicate ETA through Colombo Radio, either to Agent or direct to Deputy Master Attendant, Trincomalee, at least 24 hours before arrival. No night pilotage. Pilot boards incoming vessels between hours of 0600 and 1800 hrs. about 2 cables Northward of Round Island (8° 30′ 48″ N. 81° 13′ 24″ E.). Vessels embarking Pilot should whenever possible lower an accommodation ladder; if this is not practicable should let down a pilot ladder and provide 2 man ropes not less than 3 inches in circumference. Vessels awaiting a Pilot should anchor 0.5 miles N.E. of Round Island light tower in depths from 11 to 13 fathoms.

Vessels arriving between 1800–2100 hrs. may be brought in at Deputy Master Attendants discretion if they come to anchorage 5 cables N.E. of Round Island.
ANCHORAGES: Trincomalee Harbour is the only entirely sheltered natural harbour in Sri Lanka. Good anchorage may be found in almost any part of harbour in good weather.
RESTRICTIONS: Vessels may enter during hours of daylight only. Range of tide is very small and does not restrict entry.
MAX. SIZE: Almost unlimited length and draft can be accommodated in anchorage. Only 1 berth which can accommodate up to 600 ft. length, and 36 ft. draft. This jetty used for discharging tankers and bunkering.
HEALTH: The Port Health Officer boards vessels after arrival at anchorage to grant pratique. Pratique automatic for vessels arriving from another port in Sri Lanka.
RADIO: All cables to Deputy Master Attendant, Agents, Receivers, etc., should be routed through Colombo Radio; call sign 4 PB.

Pilot carries a portable VHF set, Channel 16, with about 2 miles range.
TUGS: One tug attends when required. Tow-lines generally not used; but if required tug/ship's lines used.
STEVEDORES: Stevedoring operations have been nationalised and are carried out by the Port (Cargo) Corporation, Trincomalee.
TANKERS: One tanker berth at which vessels of 600 ft. length and 36 ft. draft are discharged.
DENSITY: Salt water.
FRESH WATER: Available, supplied by water lighters and from bunkering jetty.
FUEL: Marine heavy diesel and furnace oil can be supplied at 24 hours notice.
GANGWAY/DECK WATCHMEN: Watchmen are provided by the Port Tally and Security Services Corporation.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCE: Tobacco issued as required. Wine and/or Spirit issued as required.
IDENTIFICATION CARDS: Identity Cards or Passports are required to be carried by crew members ashore.
CONSULS: All Consular officers are in Colombo.
REPAIRS: Only minor repairs can be carried out.
REPATRIATION: Crew changes and repatriation can be effected.
AIRPORT: No International flights through Trincomalee. Internal service of Air Ceylon operates daily flights between Trincomalee and Colombo.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Dates of holidays are not fixed. Cargo work can generally be arranged on any holiday.
TELEPHONES: Police 308; Ambulance 448; Fire 335. There are no telephone connections for ships.
SHORE LEAVE: Allowed.
AUTHORITY: Master Attendant, Port Commission.

Sudan

PORT SUDAN: 19.37 N. 37.14 E.

DOCUMENTS:

Port Sudan Harbour Master's Declaration.
Sudan Customs Declaration.
Quarantine Form.
(All above forms to be filled by Master on arrival).
3 Crew Lists.
3 Passengers Lists.
1 Crew Declaration.
1 Dutiable Stores.
4 copies Manifest.
1 copy B/Lading.
1 Provisions List.

PILOTAGE: 24 hours notice ETA. VHF. Channel 16. Pilot boards South of South Wingate Beacon. Pilotage compulsory.

ANCHORAGES: Towartit Anchorage, approx. 8 km. S.E. of harbour.

RESTRICTIONS: No restrictions providing berth available.

MAX. SIZE: Length 850 ft. Max. draft at Oil Terminal 37 ft., other berths between 28 ft. and 34 ft. 6 in.

HEALTH: Radio pratique obtainable if message sent not more than 24 and not less than 8 hours before arrival to "Quarantine, Port Sudan", with following information: Name of ship and ETA; Name of Agent; Whether surgeon carried or not; Whether illness on board, if so, what illness; Port of departure and last port of call. On receipt the Quarantine Medical Officer will inform ship by wireless whether pratique is granted or not.

RADIO: Port Sudan Radio (call sign STP). Operates daily on High Frequency as follows: 8652 Mcs from 0400 hrs. to 1600 hrs. GMT; 4356 Mcs from 1600 hrs to 0400 hrs. GMT; 500 kcs – continuous listening watch for first 10 minutes of every hour. Radiograms may be handed in at Port Sudan Post Office at all times and at Port Sudan Quays Post Office during office hours.

TUGS: About 1 mile from harbour entrance. Either ship's or tug's lines at Pilot's discretion.

BERTHING:

Berth	*Length*	*Depth*	
		Winter	*Summer*
Nos. 1 to 5 main berths	458 ft.	30 ft.	28/33 ft.
No. 5A	426 ft.	35 ft.	33 ft.
Nos. 6 & 7	606 ft.	35 ft.	33 ft.
Nos. 8 & 9	600 ft.	37 ft.	35 ft.
No. 15	642 ft.	37 ft.	36 ft.
No. 16	230 ft.	37 ft.	35 ft.
Nos. 17 & 18	908 ft.	39 ft.	37.5 ft.

CARGO HANDLING: Grain silo of 50,000 tons capacity situated at Berth No. 15. Heaviest lift normally acceptable is 15 tons; special arrangements necessary for heavier items.

Span of coal transporters is 420 ft.

TANKERS: At berth No. 16, vessels up to 600 ft. length can berth with overhang. Max. draft 34 ft. 6 in.

Berths 17 and 18 accommodate tankers up to 37 ft. draft. Berths connected by pipe-line to refinery 8 km. South of Port Sudan.

Used for discharging crude oil and loading refined products.

STEVEDORES: Require 24/48 hours advance notice of ETA and stowage of cargo. Rate of Discharge and Loading: General cargo, 5–10 tons per hook per hour. Bagged cargo, 15–20 tons per hook per hour.

Exports. Main exports, cotton, cottonseed, gum Arabic, oilcakes, MOP shells, trocas shells, senna, beans, domnuts, oilseed, hides, skins, salt, beeswax, durra, wheat bran, chick peas, karkadeh, ground nuts, livestock, castor seed and edible oil.

Tea. Following exports should not be stowed with tea: castorseed, hides, linseed, edible oil, oilcake. Cottonseed may be stowed with tea with separation of 3 ft. but it is preferable to stow in separate compartment from tea.

Cotton. Gum should never be stowed with cotton.

Transhipment cargo. Is normally not accepted at Port Sudan without prior permission, except in very small quantities.

Weight. Deadweight of cargo is expressed per ton of 1,000 kilos.

MEDICAL: Advance notice advisable. Hospital facilities available. Crew and passengers must have International Health books valid.

DENSITY: 1025.

FRESH WATER: Available ex quay and ex barge.

FUEL: Marine Fuel oil (normally 1000 secs.); marine diesel oil (42/45 secs.); gas oil (35 secs.). 24/48 hours advance notice advisable. Name of suppliers is required.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes per person. Wine and/or Spirit, 2 bottles of different kinds per person. Only personal requirements may be taken ashore.

IDENTIFICATION CARDS: Not required.

CONSULS: A.R.E. (Egypt) and Nigeria.

REPAIRS: Minor deck and engine repairs.

DRY DOCKS: Slipways for 2 vessels up to 500 tons capacity.

REPATRIATION: Not recommended. Formalities take 2/3 days.

AIRPORT: 3 miles away. Flights twice per day Port Sudan to Khartoum. 2 flights per week Port Sudan to Cairo from June 1st, 1978.

TIME: GMT plus 2 hours. In Summer, GMT plus 3 hours.

HOLIDAYS: The following government holidays for the year 1978 will be considered as port holidays. (The dates may vary in other years) January 1st (Independence Day – 1 day), February 19th (Mulid El Nabi – 1 day), March 3rd (National Unity – day), May 1st (Sham el Nassem – 1 day), May 25th (Revolution Day 1 day), September 3rd-6th (Ramadan Bairam), November 10th-14th (Kurban Bairam), December 1st (Mohammedan New Year 1 day), December 25th (Christmas Day).

The port will not work on the following days: January 1st (Independence Day), November 10th–14th (First Day Kurban Bairam), December 1st (Mohammedan New Year), February 19th (Mulid El Nabi) May 25th (Revolution Day), September 3rd (First Day of Ramadan Bairam), December 25th (Christmas Day). Overtime will be worked on all other days.

POLICE/AMBULANCE/FIRE: Police 4888; Ambulance 2400; Fire 5922.

TELEPHONES: No arrangements exist for placing telephones on board.

GENERAL: No foreign currency allowed ashore. Crew are permitted to go ashore with any amount Sudanese Currency.

AUTHORITY: Managing Director's Office, Sea Port Corporation.

AGENT: May Trading and Services Co., PO Box 17, Port Sudan. Telegraphic address: "Mayo" Portsudan. Telex: No. 6. Tel. (during office hours) 2437; 2029, 2389; after office hours 2652, 2040.

NOTES

Suriname

MOENGO: 05.38 N. 54.25 W.

A bauxite mining town about 70 miles up the Cottica river, a tributary of the Commewijne river, which latter joins the Suriname river at Fort Nieuw Amsterdam.

DOCUMENTS/PILOTAGE/GENERAL INFORMATION: refer to "Paramaribo."

TUGS: Two tugs are available, the larger is 1,750 h.p.

MAX. SIZE: Ships of 525 ft. can be accommodated. Ore vessels call daily. Draft depends on bar draft Suriname river.

BERTHING: Moengo has two piers at which ore is loaded by a transporter at the rate of 800/1,000 t.p.h. One pier is 430 ft. long and has a depth of 24 ft. alongside. Both will accommodate ships of 525 ft. length. Tracks are laid on the 430 ft. pier and a 25 ton crane is available.

PROVISIONS: Not available.

FUEL: Small quantities can be supplied.

FRESH WATER: Small quantities can be supplied.

AIRPORT: About 5 km. from docks.

AUTHORITY: District Commissioner acts as Harbour Master.

AGENT: Alcoa Shipping Co.

NEW NICKERIE: 05.57 N. 56.59 W.

DOCUMENTS:

2 copies Crew List.
2 copies Passenger List.
Customs Documents; Crew Declaration Lists; for instance, souvenirs, electric apparatus, etc.
2 copies Ship's Store Lists.
3 copies Manifests of Import.
3 copies Manifests of Export.
copy Transit Manifest.
2 copies Manifests of Coastal Cargo.
Ship's Papers to be shown on request.

PILOTAGE: Pilotage is compulsory for the Nickerie River for ships bigger than 50 gross tons. There is always a pilot available; ETA to be sent 48 hours before arrival and 12 hours before arrival give necessary correction message to the Agent.

Ships can only enter the river at or about the time of high water.

The Pilot boards near the sea buoy (buoy No. 1). The pilot boat is a small wooden, grey and white painted vessel. The Pilot boat does not use the international red-white pilot lights at night. It is possible to make radio telephone contact with the boat (Pilot carries a walkie-talkie VHF equipped with Channel 12). There is a signal lamp on board.

Send ETA-message to Agent who will order the Pilot. Awaiting high water the vessel can anchor about 3 miles N.N.E. of the sea buoy.

ANCHORAGES: With a draft of 15 ft. the ship can safely anchor 3 miles N.N.E. of the sea buoy. It is not advisable to anchor in the Nickerie river for a long time, the river is too narrow.

MAX. SIZE: With springtide the max. draft must not exceed 14 ft. 9 in. and at neaptide 12 ft. The vessel has to use the high-inlet while passing the bar.

Max. permissible length of vessel is 130 m. (426 ft.). At low water ships are seated in the mud without consequence to hull, rudder or propeller alongside the wharf. There are berths for oil-carriers.

HEALTH: There is no pratique-procedure. Only in the event of any suspected disease or fever on board a doctor must be called.

RADIO: Send ETA cables to Paramaribo Radio. The pilot office at Nickerie has a radio telephone transmitter. Frequency 8233.9 kHz; listening hours 0700, 1200, 1800 hrs. local time. SSB and VHF equipment also used.

TUGS: No strong tugs available.

STEVEDORES: The Agent orders the gangs (maximum 3 gangs available).

MEDICAL: No advance notice required for medical treatment. There is 1 hospital in Nickerie with a surgeon.

TANKERS: There are 3 piers in Nickerie: Esso, Shell and Texaco pier. Maximum permitted draft 14 ft. 9 in. at springtide.

DENSITY: In the dry season the density on the river near New-Nickerie is 1015. In the rainy-season the density is 1005 near HW, and 100 near LW. These all depend upon springtide or neaptide.

FRESH WATER: Fresh water is available alongside the wharf of New-Nickerie. It is loaded from shore by hose.

FUEL: Small quantities of fuel available from Esso or Shell, also grease and petrol.

DEVELOPMENTS: In the future a bigger and deeper port will be built in the Corentyne river, about 20 miles up the river.

GANGWAY/DECK WATCHMEN: It is recommended to have a watchman during the night.

OPENING/CLOSING HATCHES: Patent hatches must be opened by the crew, other hatches by the stevedores.

CUSTOMS ALLOWANCE: Captain included: for every 72 hours staying in port: 15 cigars or 60 cigarettes or 30 cigarillos or 150 gm. tobacco plus 0.25 bottle spirits or 5 bottles beer or 1 bottle wine.

IDENTIFICATION CARDS: Not needed.

CONSULS: No consuls in Nickerie.

REPAIRS: Small engine repairs and shaft repairs and some welding repairs can be done.

REPATRIATION: Is possible via Paramaribo.

AIRPORT: The airport is 10 miles from the port of Nickerie. 2 times per day there is a flight to Paramaribo arranged by a local company, called S.L.M.

Daily bus service between New Nickerie and Paramaribo.

TIME: Local time is GMT minus 3.5 hours. No alteration in time.

HOLIDAYS: New Year's Day; Good Friday; Phagwa; Queen's Birthday (April 30); Ascension Day; Labour Day (May 1st); Day of Liberties (July 1st); Idul Fitre; Christmas Day and Boxing Day. On these days work can be done by paying overtime.

POLICE/AMBULANCE/FIRE: Police 356; Ambulance 241; Fire 333.

TELEPHONES: No arrangements can be made for a telephone connection on board.

SHORE LEAVE: Without reserve.

DELAYS: Delays in berthing: there are only 2 wharves with a total length of 700 ft. Banana ships have priority. Delays in loading and discharging: there are only 3 gangs of stevedores. These can be enlarged to 5 "small gangs".

AUTHORITY: District Commissioner acts as Harbour Master.

PARAMARIBO: 05.49 N. 55.09 W.

PORT LIMITS: The seaward boundaries of the port, within which a vessel is considered to be "arrived" is the entrance of the Suriname, Matowijne, Coppename, Corantijn and Nickerie rivers. Laytime commences to count after vessel has anchored or berthed. On the left bank of the Suriname river about 8 miles above New Amsterdam and 21 miles from light-vessel at river entrance.

DOCUMENTS:

5 Incoming Cargo Manifests (if any cargo), otherwise 3 copies.
1 Cargo Transit Manifest.
4 Outward-going Manifests.

These above-mentioned must be sent ahead to the Agent so that they can be translated into Dutch.

4 Crew Lists.
2 Store Lists.
2 Crew Declaration Lists.
6 Passenger Lists.

PILOTAGE: Compulsory. All ships are requested to amend their estimated time of arrival in local time, at least 12 hours in advance by special message through the wireless station to their Agents or to the Harbour Master. Arrival message should include draft of vessel and other requirements. 6 hours prior to arrival the ETA has to be confirmed and if necessary corrected. The Pilot will be dispatched after receiving the confirmed ETA. As there is no shipping but in the Suriname river, the Commenwijned river, the Cottica river and the Nickerie river, all Pilots except one for Nickerie are stationed at Paramaribo. Paramaribo Pilots board the vessels at the light-vessel of the Suriname river. All vessels have to stop off the light-vessel.

ANCHORAGE: Anchorage off town in 18–35 ft. of water at LWS. Government officials board vessels immediately on arrival for inward clearance. Vessels which are required to anchor off the port to wait for berths may be boarded at the anchorage.

RESTRICTIONS: Bar has min. depth of 14 ft. 5 in. Rise neap tide 6 ft. 7 in. spring tide 8 ft. 10 in. Due to the fact that the bar consists of mud, vessels regularly leave the port with drafts between 22 and 23 ft.

RADIO: There is a 24 hours radio telephone service at the Harbour Department on SSB and VHF. The coast station, PZN, also maintains a 24-hour radio telegraph (500 kc.) and telephone service in the 2182 kc. band. The lightvessel *Surinam River* is equipped with VHF Channel 12.

VHF: Harbour office on Channel 12, 24 hours a day. Radio Station "PZN" on Channel 16, 24 hours a day.

HEALTH: Port doctor will visit an arriving ship only if there is a case of contagious disease aboard, or if one of the preceding ports of call has been declared to harbour contagious disease. No bill of health is required. A ship with an infection on board must advise the Harbour Master by special message through the wireless station before arrival.

BERTHING: *O.G.E.M. wharf*, 120 ft. long least depth 18 ft. Oil/gas discharge for public undertakings.

B.E.M. wharf, 110 ft. long, least depth 18 ft. Private cement and gravel discharge wharf, Moorings 450 ft. apart.

Banana export pier, 297 ft. long, least depth 18 ft. Fresh water can be supplied.

New Oil terminal, Moorings 570 ft. apart. Least depth 18 ft.

Flour pier, 36 ft. long. Moorings 160 ft. apart. Least depth 16 ft. Only possible to discharge flour with a grain elevator.

Vensur Cement wharf, 180 ft. long, least depth 14 ft. Moorings 600 ft. apart.

New Wharf Ltd., 1,815 ft. long. Least depth 19 ft. at LWS. Fresh water can be supplied.

Belwaarde: 3 miles above Fort Nieuw Amsterdam on the right bank of the Suriname river. Length of pier: 279 ft., least depth 18–20 ft. Loading sugar.

Shell Oil Terminal: Moorings 540 ft. apart. Least depth at LWS 21 ft. exclusively for oil and gas.

MEDICAL: Excellent medical and dental attention is available to Crew members of all vessels.

FRESH WATER: The water is of excellent quality. Available at most berths as mentioned above.

FUEL: Ship's bunkers are available in most ports of Suriname in limited quantities. Advice regarding quantities and specifications of oil should be given to Agent's representative immediately after docking.

CUSTOMS ALLOWANCE: 60 cigarettes or 15 cigars or 0.5 lb. of tobacco. One-fifth litre of spirits, one-third litre of wine, 2 litres of beer, for each Crew member. All quantities in excess of the above, will be put under seal.

REPAIRS: No facilities for major ship repairs. Local workshops can do repairs of minor nature. There are 2 floating dry docks and 1 floating derrick owned and operated by the Suriname Drydock Co. Lifting capacities dry docks: 400–650 tons.

GANGWAY/DECK WATCHMEN: The customs board the vessel while riding at anchor or alongside one of the docks. All vessels are required to make a proper gangway available to the custom boarding officer.

The local authorities assign one or more custom guards to each vessel during its stay in port. The charges for guarding are for the account of the vessel. These officials must be provided with meals on board at regular meal hours, and rooms if necessary.

REPATRIATION: Under special circumstances vessels may sail without all crew members on board (sickness, etc.). The Master furnishes a letter to his Agent authorising him to accept responsibility for the missing seaman or seamen.

CONSULS:

U.S.A.
Britain
Norway
Venezuela
Brazil
Guyana
Belgium
Denmark
Dominican Republic
West Germany
Indonesia
Ecuador
France
Austria
Portugal
Sweden

TIME: Local time is 3.5 hours slow of GMT. Vessels are required to use local time in ETA messages and when dealing with Agents.

HOLIDAYS: 1st January; Good Friday; Easter Sunday; Queen's Birthday (April 30th); 1st May; 1st July (Freedom Day); 25th and 26th December; Holy Pagwha and Idul Fitre.

SHORE LEAVE: Under normal circumstances no restrictions are imposed by the Government Immigration Authorities on shore leave.

GENERAL: While alongside vessels must maintain engines and propulsion machinery in readiness to leave the pier under full power on short notice. No repairs are permitted which should interfere with this requirement. While alongside, oil tankers should have their offshore anchor out about 50 ft.

All vessels except ships of war, must furnish a statement, of the amount and character of explosives carried, also a certificate to show how they are stored and manner of packing.

Special anchorage areas are provided in the harbour for vessels with dangerous cargo.

All firearms and ammunition must be manifested on store lists and must remain in bond on board during vessel's entire stay in territorial waters of Suriname. Any violation of this regulation renders the vessel subject to fines and confiscation of firearms and ammunition.

BALLAST: Vessels must arrive with sufficient ballast to permit safe handling. All vessels should enter port with clean ballast water that may be pumped overboard while in the harbour, as it is prohibited to pump dirty ballast water or oil residue or sweepings into the harbour.

AUTHORITY: Harbour Master.

PARANAM: 05.38 N. 55.05 W.

Located on left bank of the Suriname River about 40 miles from the entrance, consisting of bauxite mining, alumina refining and an aluminium smelter with facilities for shipping these commodities.

DOCUMENTS/PILOTAGE: and all General Information refer to "Paramaribo."

MAX. SIZE: Vessels up to 40,000 d.w.t. load to outer bar draft (approximately half load) and usually top off at Trinidad.

HEALTH: Health officer does not board unless there are quarantinable diseases aboard.

TUGS: Not generally available.

BERTHING: *General Dock:* Concrete pier of about 350 ft. mooring, 660 ft. apart. Least depth 30 ft. This dock used for loading bauxite or aluminium ingot and for discharging general cargo, oils, caustic and other raw materials,

Alumina Pier: Least depth 30 ft. length 680 ft. Used for loading alumina or discharging oils and caustic.

Equipment: 75 ton Gantry Crane on rails at General Dock.

Loading Capacity: Bauxite at General Dock: 800 t.p.h.
Alumina at Alumina Dock: 850 t.p.h. Loading by conveyor spout trimmed (Telescopic chute).

FUEL: Small quantities of light diesel No. 2 only in emergency.

FRESH WATER: Can be supplied.

REPAIRS: None can be effected.

AIRPORT: At Zanderij, 45 km. from dock.

AUTHORITY: District Commissioner officially acts as Harbourmaster but vessel movements, pilotage, etc. handled by Paramaribo Harbour Master's Office.

SMALKALDEN: 05.38 N. 55.05 W.

A bauxite mining town on the left bank of the Suriname river about 20 miles upstream from Paramaribo.

DOCUMENTS/PILOTAGE: and all General information; refer to "Paramaribo".

TUGS: None available.

BERTHING: Wharf with length of 218 ft. Moorings, 535 ft. apart, least depth 30 ft. Ships can load to outer bar draft. Bauxite loaded by two conveyors with an average of 800 t.p.h.

DEVELOPMENTS: New wharf under construction capable of handling ore ships up to 40,000 d.w.t. Moorings 680 ft. apart.

FUEL: None available.

FRESH WATER: Small quantitites can be delivered by trucks.

REPAIRS: None.

AIRPORT: At Zanderij, 45 km. from dock.

SHIPMASTER'S REPORT: 1978

Documents: Two crew lists, two stores lists and two crew declaration lists.

Customs: Customs board at Smalkalden on arrival and clear vessel. They do not remain on board.

Pilotage: Available and compulsory. Pilot station at Paramaribo.

Anchorage: Safe anchorage available four miles North of the sea buoy, depth of water about 30 ft., nature of bottom, mud.

Approaches: Inwards: There is a direction finding station at Paramaribo. Light vessel not on station. The buoy channel is almost non-existant as some buoys have disappeared and have not been replaced. The light buoys are extremely poor.

On entering the river, it was noticed that the propeller stirred up dense mud. The main engine cooling filters became choked even though the high suctions were being used. Top side ballast tanks were then used to discharge ballast and cool the main engine at the same time.

Vessel anchored at Suzannasdaal on passage up river to await tide, and clearance of another vessel which was on the berth. The anchorage was good, vessel used five shackles. Vessel then proceeded up river to Smalkalden but on passing Domburg, heard that the other vessel could not complete on time, so we had to pass the berth and anchor of Chatillon. The river is very narrow at this point and engines were kept on standby to be used when turning in case vessel became too close to the shore. Vessel docked at Smalkalden just before high water.

Outwards: On completion of loading, vessel sailed 2.5 hrs. before HW Paramaribo and proceeded down river. The vessels draft was 23 ft. 2 ins. and in places the river became very shallow and the vessel slid over mud at various points. The worst place noticed being between beacon "D4" and buoy No. 12 at Sunoza. The vessel again anchored off Suzannasdaal to await the rising tide 6 shackles in the water as the current was very strong. The vessel later sailed for the sea 3.5 hrs. before high water at Paramaribo and again touched bottom at various places whilst proceeding towards the sea. The main engine was cooled using ballast discharge for suction which is higher than normal high suction, whilst on passage beacons "R6" and "R10" were extinguished and 6 of the channel buoys were missing, also buoy lights were of extremely low intensity.

Restrictions: Vessels can enter and leave port day and night.

Max. Size: Agent advised that max. draft was equal to: (4.50 m. + height of tide) – FWA of 4".

However Pilot advised differently as follows:

Safe loading calculation:
Least channel depth . . . ft.
plus Rise of Tide . . . ft.
equals Safe loading draft . . . ft.

*Least channel depth rising tide (from Neap to Springtide 4.50 m.)
*Least channel depth falling tide (from Spring to Neaptide 4.35 m.)

Pilot also advises that the FWA from Sea Buoy to Suzannasdaal is practically nil – so do not take FWA into account.

VHF: Pilots and harbour office maintain a continuous watch on Channel 12.

Tugs: Not available and not normally required. Should vessel experience difficulties tugs can be called from Curacao.

Berthing: Suriname Billiton Bauxite Berth: Maximum permissible draft varies with the tide. Tidal range 1.16 to 2.39 m.

Maximum permissible length and breadth of vessel not known.

Loading-Discharge Gear: There are two shoots approximately 150 ft. apart which are semi-movable. Loading rate varies between 200 and 600 long tons per hour. Cargo operations continue throughout 24 hrs. A gang consists of one foreman and four men.

In addition to the facility at which we berthed, there are general cargo berths alongside the modern quay and a bulk aluminium loading berth with one shoot which is semi-movable.

Density: For the berth, the density is 998. Also see "Max. Size."

Fuel: Not available.

Fresh Water: Delivered by truck with capacity of 7 tons. Delivery is slow and extremely expensive. Arrangements are to be made with the foreman.

Medical: Hospital facilities available.

Shore Leave: Possible, however, crew required on board most of the time as vessel has to be shifted up and down the jetties for loaders.

Gangway: Accommodation ladder not used. Shore ladder is provided.

Provisions: Fresh fruit and vegetables available but of poor quality and very expensive.

Transportation: The town of Smalkalden is about 30 minutes by car from Paramaribo and about one hour by bus (taxi fare, 25 Guilders, bus fare one Guilder).

Publications: BA.517 and BA.99 also South American Pilot Volume 4 No: 7A used. BA Chart 99 does not extend far enough to sea as the sea buoy is not shown on it and the outer anchorage is about three to four miles outside this buoy. The Pilot informed me that the local Dutch Chart is available from the Harbour Master at Paramaribo and is much more satisfactory.

AUTHORITY: District Commissioner acts as Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Sweden

AHUS: 55.56 N. 14.19 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilots meet vessels at Pallagrund. Telegraphic address: "Pilotstation, Ahus". Tel. 044–240027. VHF. Channel 16 call sign: "Pilot station, Ahus." Awaiting Pilot, anchor outside "Pallagrund". Depth 15–20 m. (Also see "Stockholm".)
ANCHORAGE: Anchorage forbidden in dredged entrance channel.
RESTRICTIONS: No special regulations.
MAX. SIZE: Max. length 160 m., max. draft 7.6 m.
HEALTH: No special regulations.
RADIO: Stockholm Radio (SDI) also VHF, Channel 16 and working Channel. Port radio: Ahus Port Radio keeps watch, Monday to Friday 0830 to 1600 hrs. on VHF Channel 16. Working Channel 11. At other times Ahus pilot station.
RADAR/VHF: Radar on pilot station. VHF call sign: Pilot station, Ahus. Channel 16.
TUGS: 1 tug available with advance notice.
BERTHING: Depth alongside (at MW) as follows:

Berth	*Length* (m.)	*Depth* (m.)
Wine Quay	100	4.2
No. 1–4	270	5.8
No. 5–17	740	7.2
No. 18–26A	475	8.2
26B	15	4.2

Depth allowance 0.6 m.

STEVEDORES: Ahus Stuveri AB. Tel. 044–240038. Working hours: Monday to Friday 0700–1600 hrs. Meal breaks 0845–0900 hrs. and 1200–1245 hrs.
FRESH WATER: Delivered from pipe-line.
FUEL: Available day and night.
FIRE PRECAUTIONS: No special regulations.
GANGWAY/DECK WATCHMEN: If wanted, watchmen available.
OPENING/CLOSING HATCHES: Normally by the crew.
CUSTOMS ALLOWANCE: See "Stockholm".
CARGO GEAR: 9 shore cranes, capacity 5–25 tons.
IDENTIFICATION CARDS: Crew list needed. No cards.
CONSULS: Danish Vice-Consul: Vasagatan 17B, 29153 Kristianstad. Tel. 044–114841. Norwegian Vice-Consul Mast. Bonggatan 2, 29154 Kristianstad. Tel. 044–115605.
REPAIRS: Minor repairs only.
DRY DOCKS: No dry dock. Nearest dry dock Solvesborg.
AIRPORT: Nearest airport about 10 miles away. 2 flights per day.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Police 242030; Ambulance 90000; Fire 90000.
TELEPHONES: 2 public telephones on quays.
AUTHORITY: Port of Ahus.

BROFJORDEN: 58.21 N. 11.25 E. (See Plan Book)

PORT LIMITS: Between "Stretudden" (crude oil berth) and the island "Rixo" in Brofjorden.
DOCUMENTS: Documents required for entry and clearance.

Certificate of Registry, Certificate of Tonnage, Derating Exemption Certificate, 3 Crew Lists, 1 Crew Manifest, 1 Declaration of Bonded Stores. Free pratique will be received via Customs on arrival berth. Oil Pollution Certificate.

PILOTAGE: Pilot station VHF Channel 16 around the clock. Channel 16 for calling only, thereafter changing to an agreed Channel. Call: Lysekils Pilots.

According to harbour regulations VLCC's are requested to give 72 hours ETA, and if any changes 48 and 24 hours ETA.

Product tankers are requested to give 48, if any changes 24 hours ETA.

Position where Pilot will board:

VLCC's	58° 13′ 05″ N.	11° 09′ 05″ E.
Product tankers	58° 15′ 01″ N.	11° 13′ 03″ E.

ANCHORAGES:

VLCC's	East Scaw, 57° 42′ N. 10° 49′ E.
	Water depth: 26 m.
	Holding ground: sand, good.

Only for Product tanker (up to 60,000 d.w.t.):

58° 20′ 03″ N.	Water depth: 28 m.
11° 21′ 00″ E.	Holding ground: clay, good
58° 19′ 07″ N.	Water depth: 26 m.
11° 23′ 05″ E.	Holding ground: clay, good

RESTRICTIONS: *For vessels of more than 100,000 d.w.t.* Berthing in daylight only.

Visibility minimum 4 miles, wind force max. 12 m./sec. and current max. 1 knot at the outer buoys (Nos. 1 & 2).

MAX. SIZE: *Crude oil jetty:*

Deadweight:	500,000 tons.
Length overall:	No limit.
Beam restriction:	No limit.
Draft restriction:	25 m. (82 ft.)

Product jetty (Berth 2 and 3):

Deadweight:	50,000 tons.
Length overall:	230 m. (754 ft.).
Beam restriction:	No limit.
Draft restriction:	14.4 m. (47 ft.).

Product jetty (Berth No. 1):

Deadweight:	7,000 tons.
Length overall:	120 m. (394 ft.).
Beam restriction:	No limit.
Draft restriction:	8 m. (26 ft.).

HEALTH: No special papers required. Master informs by radio or on arrival.
RADIO: For ETA cables to Agent and Receivers call Gothenburg Radio.
VHF: VHF stations are installed at the pilot station, the pilot boat, the tug boats and at the Scanraff Harbour office.

When mooring: the Pilot, Harbour Master, mooring boats and the mooring gangs carry portable VHF sets. Channel 69 is usually used.

RADAR: At the pilot station two radar sets are installed for watching the entrance.
TUGS: *For VLCC's:* Tugs made fast after passage of Dynabrott and Brandskars flak light houses.

For Product tankers: Tugs made fast when passing Bubacka Buoy (opposite crude oil berth).

BERTHING:

Instruments:	SAMI-doppler and current meter at crude jetty.
Salinity:	18 – 34% 0
Current velocity:	0.2 – 0.9 knots at entrance.
Nature of bottom:	Clay.

The crude and product jetties are equipped with quick release hooks. The coaster berth has common bollards.

One Safety Tug-boat is always standing-by within the harbour area in case of emergency. When a Crude Carrier is alongside an additional Safety Tug-boat is standing by.

MEDICAL: Hospital available in Lysekil. No particular inoculations required.

TANKERS: Cargo handling facilities.
Crude Jetty:

Size:	*Flange rating*	*Service*
12 in.	150 lb ASA	Bunker "C"
16 in.	,,	Crude oil.
16 in.	,,	,, ,,
16 in.	,,	,, ,,

Product Jetty: (Berth 2 and 3)

Size	*Flange rating*	*Service*
10 in.	150 lb ASA	Reg. gas.
10 in.	,,	Prem. gas.
10 in.	,,	Diesel, F.O. 1.
10 in.	,,	,, ,,
12 in.	,,	F.O. 4, F.O. 5.
12 in.		,, ,, Ballast, bunker

Product Jetty: (Berth 1)

Size	*Flange rating*	*Service*
6 in.	150 lb ASA	Prem. gas, reg. gas, naphtha.
6 in.	,,	Diesel, F.O. 1.
8 in.	,,	F.O. 4, F.O. 5 Ballast.
10 in.	,,	Molten sulphur.

Max. discharge rate at Crude Oil Jetty 18,000 cu.m. per hour. Max. pressure allowed 10 Kilos. Max. loading rate at Product Jetty 1,500 cu. m. per hour. Max. pressure allowed 10 Kilos.

Both Crude and Product Jetty have 6 in. 150 lbs sanitary sewer and 4 in. 150 lbs potable water connections available which may be used by running hose from ship.

All arms are hydraulically operated except those at the Coaster Jetty. No hoses are allowed for oil handling.

Ballast water can be discharged at Product and Coaster Jetties.

FUEL: Bunker C only is available at Crude Oil Jetty. Bunker C and diesel oil are available at Product Jetties and the Coaster Jetty.
FIRE PRECAUTIONS: A special Fire Instruction will be given on board on arrival.
POLLUTION: Oil pollution prevention. A special instruction will be given on board on arrival.
CONSULS: Denmark, Finland, Holland, Norway and Germany have consuls in Uddevalla, 40 km. from Scanraff.
REPAIRS: Uddevallavarvet and Skandiaverken. For hull and engine repairs, harbour and voyage service.

Pemco: For construction work, mechanical erection and repairs.

Andersson & Callenberg: For electrical installations.

Engine repairs must be reported to Port Captain for permission.

DRY DOCK: Gothenburg, capacity 250,000 tons.
SURVEYORS: Det Norske Veritas and Lloyds.
GANGWAY/DECK WATCHMEN: The crude oil jetty has gangway tower. But accommodation ladder is necessary in the product harbour.

Watchman is compulsory at the Crude Oil Jetty. At the Product Jetty watchman is available on request.

CUSTOMS ALLOWANCE: 1 bottle spirit and 200 cigarettes or 200 grams tobacco.
REPATRIATION: Changing of crew and any necessary repatriation is possible.
AIRPORT: Nearest airport is Gothenburg, 100 km. South of Lysekil.
TIME: GMT plus 1 hour all the year round.
POLICE/AMBULANCE: Dial 90 000 and ask for necessary service.
TELEPHONES: A telephone can be connected on board.
SERVICES: Compass adjusting is available.
SHORE LEAVE: Crew members are allowed ashore. No identification card or passes are needed.
REGULATIONS: The Harbour Regulations will be placed on board on arrival.

GENERAL: At the Crude Oil Jetty there is a refuse container to be lifted on board by means of the ship's gear. At the Product Jetty are 2 containers, which will remain ashore. These containers are free of charge to the ships.
AUTHORITY: Scanraff.

GAVLE: 60.41 N. 17.11 E. (See Plan Book)

PORT LIMITS: A line from Utvalnas (approx. 60° 45.2′ N. 17° 21.4′ E.) over Bakharen to Langharen (approx. 60° 41.0′ N. 17° 17.5′ E.).
DOCUMENTS:
4 Crew Lists (for European vessels).
2 Crew Lists (for other vessels).
2 Manifests.
2 Bills of Lading.
1 Tobacco List.
1 Stores List.
Following documents supplied by Agent and signed by Master:
On arrival from foreign port:
1 Maritime Declaration of Health.
4 Report of Arrival (customs).
1 Declaration of Master (of persons on board).
1 Declaration of living animals (if any).
On arrival from any port:
1 Report of Arrival (Harbour Office).
1 Report of Receivers (Harbour Office).
1 Cargo List (or Manifest).
1 Transfer.
On departure to foreign port:
4 Report of Departure.
1 Declaration of Master (of persons on board).
On departure to any port:
1 Report of Shippers (Harbour Office).
1 Declaration by foreign Master.

PILOTAGE: *(a)* Sea Pilots: Pilot station: Bonan Telephone Nos. 991 10 and 992 20. Telegraphic address: Pilotstation, Gavle. 5 hours advance notice of ETA pilot station. Notice of ETA can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish pilot station or Grundkallen lighthouse.
VHF: Channels 16: Calling and Safety} Pilot station and
13: Pilotage traffic } Pilot boats.

All pilot boats orange. International signals for calling pilot. Pilot boards: S.E. of Grasjalsbadan 60° 43′ N., 17° 27′ E., and on request South of Eggegrund Lighthouse, 60° 43′ N., 17° 34′ E. In case of bad weather closer to pilot station. Anchorages: Graberget roadstead N.E. of Bonan Lighthouse (approx. 60° 44.8′ N. 17° 20.5′ E.), about 350 m. (0.2 m.) from shore and in 18–21 m. (10–13 fathoms) deep. Open for Easterly winds. *(b)* Harbour Pilots: Available for moving within harbour area on application to Port Administration, Telephone Nos. 12 49 10 or 11 31 56 or by VHF to Gavle Port Radio, Channels 16, 14 and 13.

ANCHORAGES: See "Pilotage". Outer roadstead situated inside of Northern entrance and in red sector of Fredriksskans light. Outer roadstead well protected, depth of 15-11 metres (8–6 fathoms). Anchoring forbidden:
(a) In dredged channel between lights in Northern channel and to a point 800 m. (875 yds.) W.S.W. of Light No. 4.
(b) In white sector of Fredriksskans light E.N.E. within a distance of 2,000 m. (2,190 yds.) from same.
(c) In navigable channel from Fredriksskans Light to Gavle Dolphin Light.
(d) In Fredriksskans Harbour basins.
(e) In Gavle River from berth No. 18 to berth No. 10.

RESTRICTIONS: Two fairways lead to harbour. Northern fairway is 11, 1 m. (36 ft. 6 in.) deep and has bottom width of 60 m. (196 ft. 11 in.) Day-time: max. draft 10.6 m. (34 ft. 5 in.); max. length 210 m. (689 ft.); max. breadth 28 m. (91 ft. 10 in.). Night-time: max. draft 7.55 m. (24 ft. 5 in.); max. length 172 m. (565 ft.). Southern fairway (daylight only) permits draft of 3 m. (9 ft. 9 in.). All depths are referred to mean water level. Ships on way from outer roadstead or passing from Fredriksskans Harbour to Inner Harbour shall give way to vessels proceeding in opposite direction. This shall not apply to vessels with tow unless vessel approaching also has tow.

MAX. SIZE: Max. permissible draft (at mean water) as follows:
Fredriksskans Harbour

	Max. Draft m.	*ft. in.*	*Real depth m.*	*Allowance m.*
Oil berth No. 21	10.5	34 05	10.9	0.4
				Max. length 210 m. (689 ft.)
Oil berth No. 1	7.45	24 05	7.8	0.35
				Max. length 200 m. (656 ft.)
Oil berth No. 2–3	5.3	17 05	5.5	0.2

Berth No. 110, South end. Length 35 m. (115 ft.)	4.7	15 05	4.9	0.2
Berth No. 110, North end. Length 75 m. (246 ft.)	6.1	20 00	6.4	0.3

Terminal Granudden: See"Cargo Handling".

HEALTH: Pratique always automatic. If any suspected disease or fever on board, notify ship's Agent.
RADIO: Stockholm Radio (SDH) or Harnosand Radio (SAH).
RADAR/VHF: No port radar service, but Bonan pilot station, Eggegrund Lighthouse, and one pilot cutter equipped with both radar and VHF and assists any ship approaching pilot station on request. After calling pilot station on VHF Channel 16, ships will be given assistance on Channel 13, 12, or 6.
TUGS: Join vessel outside Fredrikskans Lighthouse or outside Korsnas Works for berthing, and outside Northern entrance channel for passage through same. Ship's lines always used.
CARGO HANDLING: Container berth, max. draft 9 m. One crane with 30-ton capacity.
Roll-on/roll-off berth, max. draft 4.7 m.
Terminal Granudden: A new port terminal at Granudden which is situated opposite Fredriksskans Harbour. The terminal comprises of 350 m. of quay with a Roll-on/Roll-off berth, having max. draft for vessels: 9.0 m. for length of 150 m. adjacent to the Roll-on/Roll-off ramp and 10.5 m. for length of 200 m., 2 warehouses each having an area of 22,000 sq.m., as well as extensive storage space. The total terminal areas is 150,000 sq.m. and it will have an annual maximum capacity of 1.2 million tons forest products. The terminal has very good connections with both main roads and the railway system.
STEVEDORES: 24 hours notice (if possible) order arrange gangs.
MEDICAL: Notice of medical attention to Agent as early as possible. All kinds of medical and hospital facilities available. Smallpox vaccination required on arrival from non-European ports. Other vaccinations necessary on arrival from diseased area. (Common for all Swedish ports.) Quarantine station established at Gavle with quarantine anchorage on outer roadstead.
TANKERS: *Tanker Berth No. 21*
Max. length 210 m. (689 ft.). Max. draft (M.W.) 10.5 m. (34 ft. 5 in.).
Manifold connection size (all grades) 200 mm. (8 in.).
Berth to Depot pipe-line size:

	mm.	in.
Heavy Fuel Oils	450	18
Gas Oil	400	16
Gasoline	350	14
Kerosene	250	10

Tanker Berth No. 1:
Max. length 200 m. (656 ft.). Max. draft (M.W.) 7.45 m. (24 ft. 5 in.).
Manifold connection size:

	mm.	in.
Fuel Oils	250	10
Gasoline	200	8
Kerosene	200	8

Berth to Depot pipe-line sizes:

	mm.	in.
Fuel Oils	350	14
Gasoline	300	12
Kerosene	250	10

Tanker Berth No. 2 and 3:
Max. length 125 m. (407 ft.). Max. draft (M.W.) 5.3 m. (17 ft. 5 in.).
Manifold connection size (all grades) 150 mm. (6 in.).
Berth to Depot pipe-line sizes (all grades) 150 mm. (6 in.).
Tanker Berth No. 105-106:
Max. length 195 m. (640 ft.). Max. draft (M.W.) 6.6 m. (21 ft. 8 in.).
Manifold connection size (all grades) 200 mm. (8 in.).
Berth to Depot pipe-line (all grades) 250 mm. (10 in.).
Tanker Berth 107-108:
Max. length 195 m. (640 ft.). Max. draft (M.W.) 7.9 m. (25 ft. 11 in.).
Manifold connection size (all grades) 200 mm. (8 in.).
Berth to depot pipe-line (all grades) 250 mm. (10 in.).
New Tanker Quay K201:
Max. length 210 m. (689 ft.). Max. draft 10.5 m. (34 ft. 5 in.).
Owned by Krangede A.B.

DENSITY: Fresh water.
FRESH WATER: Delivered from water posts at all quays in Fredriksskans Harbour. Inner Harbour, at Korsnas Works and on roads fresh water delivered by water boat.
FUEL: All kinds of fuel oils available either from pipe-lines at oil berths or by lorries at all other quays. Following viscosities (Redwood I) normally in stock: 35, 225, 650, 1500, and 3500 secs. Other viscosities can also be delivered. Notice of delivery is required day before.
DEVELOPMENTS: New shipping terminal for coal and coke where discharging capacity will be very high.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Only patent hatches have to be opened by crew.
CERTIFICATES:

Tonnage Certificate.
Derat Certificate (Not older than 6 months).
Certificate of Nationality (for Swedish ships only).

CUSTOMS ALLOWANCE: Tobacco: each crew member 200 cigarettes or 100 grammes of tobacco out of Bond.
Wine and spirit: Each crew member 1 bottle (75 centilitres) of spirit and moderate quantities of wine and beer out of bond. After a week in Sweden the same quantity may be taken out on request to Customs Office.
IDENTIFICATION CARDS: Not needed.
CONSULS:

Denmark
Finland
France
Great Britain
Netherlands
Norway
Portugal

REPAIRS: The former shipyard Gavle Varv carries out all types of deck and engine repairs along fitting-out quay 200 m. (656 ft.) long, with water depth 3.8 m. (12 ft. 6 in.) and with max. draft 3.65 m. (11 ft. 11 in.) at mean water. One 10-ton luffing crane. Another berth along South side of former slip-way with water depth 5.9 m. (19 ft. 7 in. and maximum draft 4.7 m. (15 ft. 5 in.) at mean water also available. Repairs can also be carried out in all parts of harbour.
DRY DOCKS: None.
REPATRIATION: Crew changes and repatriations arranged by Agent.
AIRPORT: Stockholm Airport (Arlanda) 145 km (90 miles) served by regular airlines. Rorberg airport 16 km. (10 miles). Regular traffic to Swedish airports.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: New Year's Day (Jan. 1st); Twelfth Day (Jan. 6th); Good Friday; Easter Day; Easter Monday; First May (May 1st); Whit Sunday; Whit Monday; Midsummer Day (Saturday nearest to June 24th); All Saints' Day (first Saturday in Nov.); Christmas Day (Dec. 25th); Boxing Day (Dec. 26th).
POLICE/AMBULANCE/FIRE: Police 11 53 00; Ambulance 12 90 90; Fire 12 90 90. Emergency 90 000.
TELEPHONES: Fredriksskans and Inner Harbour: Telephones can be placed on board at all berths in Fredriksskans Harbour and at three berths in Inner Harbour. At Korsnas Works: Telephones can be placed on board at two berths in Karskar and one at Kastet Pier.
SERVICES: *(a)* Minor quantities of oil and other liquid residues can be discharged into tank lorries with special suction equipment (approx. 6 cu.m. = 210 cu.ft. per lorry). *(b)* Compass adjusting by licensed adjusters. *(c)* An area for compass adjusting is established on outer roadstead. *(d)* Speed trails can be made on measured mile between Eggegrund Lighthouse and island of Limo
DELAYS: Normally no delays in berthing, loading, discharging or bunkering.
AUTHORITY: Gavle Hamn (Gefle Port Authority).

GOTHENBURG: 57.42 N. 11.57 E. (See Plan Book)

DOCUMENTS:

3 Cargo Declarations (Imco model).
4 Crew Lists.
3 Passenger Lists.
2 Tobacco Lists (must be signed by each Crew member).
1 Stores List.
1 Health Document.
Ship's Papers.
Nationality Certificate.
If stay more than 48 hours, Articles to Consulate.
Manifests, Bills of Lading.

PILOTAGE: Cable address: 404 47 Vinga. Vessels with VHF equipment may contact on international call frequencies 156.8 Mc/s. (Channel 16). Working frequencies for Sea Pilots 156.65 Mc/s. (Channel 13) and for Harbour Pilots 156.6 Mc/s. (Channel 12). Pilot station located at Vinga Lighthouse. Sound or light signal G towards Vinga lookout. Pilot boat located outside Trubaduren Lighthouse, where Pilot taken on board. Approved pilot ladder, if rail is high accommodation ladder, heaving line, and a man standing-by to receive Pilot. (Also see "Stockholm").
ANCHORAGE: At Rivo Fiord and Dana Fiord. VLCC's anchor 2 miles S.W. of Trubaduren Light.
MAX. SIZE: Torshamnen, water depth 64 ft. 4 in. (19.6 m.). Tankers of 225,000 d.w.t. received. Skarvik Harbour, water depth 42 ft. (13 m.). Tankers up to 50,000 d.w.t. Skandia harbour, general cargo, container vessels, water depth up to 39 ft. (12 m.). General cargo harbours: for other cargo and passenger vessels 39 ft. (12 m.). Water depth at MWL. Tide of no importance.
HEALTH: The Master of every ship, whose voyage has touched lands outside Europe (excepting U.S.A., Canada, Azores, Canaries, Madeira and Morocco), and who within 28 days arrives at Gothenburg from a port in any such land, shall submit to Customs on demand a Declaration of Health for the ship in the prescribed form. If ship arrives within 14 days of calling at any such port she must not touch land until inspected by the Quarantine Medical Officer and permission to land granted. Master must be prepared to state whether all persons on board possess internationally valid evidence of inoculation for smallpox. Compulsory medical examination not required where a ship liable to inspection has undergone an approved Quarantine Inspection in either a Danish, a Norwegian or a Finnish port, and all questions in the Declaration of Health have been answered negatively. Exemption may also be granted to any other ship which would otherwise be liable for examination, if Master, pursuant to Article 21 of Quarantine Regulations for Sweden, has previously radioed all information regarding state of health on board to Health Authorities (radio-pratique). Telegraphic address: "Portsan, Gothenburg". Messages must be made not less than 4 hours prior to ETA. (Preferably, messages should not be made during night). Free-pratique messages should include: Name of the ship; estimated time and day of arrival; number of crew; number of passengers; information as to whether all persons on board possess valid certificates of vaccination for smallpox (issued within the last 3 years); names of the last two ports called at outside Europe, and dates of departure therefrom; replies to the 6 questions contained in Declaration of Health.
RADIO: Goteborgs Radio, call sign SAG.
TUGS: Tugs normally join vessel between the island Nya Alvsborg and Rya Nabbe. Vessels use their own lines. Tugs join at Dana Fiord for tankers bound for Torshamnen.
BERTHING: No restrictions at any time of day and night. VLCC's berth in daylight only.
BRIDGES: Alvsborg Bridge (suspension bridge) in Western part of city, clearance 147.5 ft. (45 m.). Gotaalv Bridge in centre of city, clearance 64 ft. (19.5 m.). Ships should give three long blasts with whistle for bridge to be opened. If opening not required they have to give one long and one short blast. It is possible to contact Gotaalv Bridge on frequency 156.80 Mc/s. (Channel 16). Working frequencies are 156.70 Mc/s. (Channel 14) and 156.60 Mc/s. (Channel 12).
STEVEDORES: Goteborgs Stuveri AB provides dock workers.
CONTAINERS: The Skandia Harbour for container handling with 4 terminals including 15 berths and 9 ferry ramps. Depths up to 39 ft. 04 ins. (12 m.).
TANKERS: One berth for discharging of crude oil with draft of 62 ft. 6 in., and lines 12 in. and 16 in.

		Permitted draft at MWL	*Lines diameter (in.)*
Tors Harbour	1 berth for disch. crude oil.	52 ft.	12 & 16
Skarvik Harbour	1 berth for disch. and loading.	40 ft. 6 in.	10
	4 berths for disch. and loading.	31 ft.	8
Rya Harbour	4 berths for disch. and loading.	31 ft.	8
In Oil Harbour	18 berths for coast-distribution.		

Reducing pieces available in Oil Harbours.
DENSITY: Average density 1030. Tide of no importance.
FRESH WATER: Available from quay or water boats.
FUEL: All grades available at short notice.
GANGWAY/DECK WATCHMEN: Watchmen accepted by Harbour and Fire Authorities on tankers and vessels loaded with explosives. On other vessels not necessary.
OPENING/CLOSING HATCHES: By crew or stevedores.
CUSTOMS ALLOWANCE: Tobacco, per week 200 cigarettes or 250 gram other tobaccos. Wine and/or Spirits, per week 1 bottle of spirits and 1 litre of wine, alternatively 2 litres of wine.

Require report latest 24 hours prior to arrival, and re-confirmation of arrival time latest 2 hours in advance.
CARGO GEAR: Certificates that equipment is approved.
IDENTIFICATION CARDS: Not necessary. Crew list to be furnished in the oil harbours.

REPAIRS: All kinds of repairs possible.

DRY DOCKS: One dry-dock, 7 floating docks with lifting capacities up to 55,000 tons.
REPATRIATION: Excellent communications by air or by rail.
AIRPORT: Distance of Landvetter Airport 20–30 km. depending on where ship is berthed. Airport served by regular airlines.
HOLIDAYS: 1st January; 6th January; Good Friday; Easter Sunday; Easter Monday; 1st May; Ascension Day; Whitsun; Whit-Monday; Midsummer Day; All Saints' Day; Christmas Day and Boxing Day. No work in port on Sundays and holidays except in terminals for container and passenger traffic.
POLICE/AMBULANCE/FIRE: Tel. 90 000, ask for "Polislarm", "Ambulans", or "Brandlarm".
TELEPHONES: At all quays ships can be connected to telephone.
GENERAL: Seaman's Institute, Amerikagatan 2, open weekdays 1000 to 2000 hrs., Sundays 1400 to 2000 hrs.
SERVICES: Tank-cleaning equipment and facilities for discharge of tank-washings in the Skarvik Harbour. Compass adjusting.
AUTHORITY: Port of Gothenburg.

HALLSTAVIK: 60.03 N. 18.35 E. (See Plan Book)

DOCUMENTS: 4 Crew Lists; other documents see "Stockholm".
PILOTAGE: Svartklubben Pilot Station. VHF Channel 16 and others. Radar at station and in boats. 5 hours notice prior to arrival. Phone: Hallstavik 0175/10006. Cable: "Pilotstation Hallstavik".
ANCHORAGE: Good and protected anchorage places available.
RESTRICTIONS: Tankers are navigated in daylight only.
MAX. SIZE: Draft not to exceed 23 ft.
HEALTH: No special action except for suspected disease. In case of disease contact Agent for information.
RADIO: Stockholm Radio.
TUGS: Normally available.
STEVEDORES: Loading effected by factory. Ordinary working hours: 0630–1530, maximum 1 hour overtime. Saturdays no work.
MEDICAL: Medical attendance available day and night.
TANKERS: Max. draft 23 ft. Connection 6 in., pipe quay-cisterns is about 1,000 m., discharging rate about 200 t.p.h.
DENSITY: Practically fresh water.
FRESH WATER: Available from quay; rate 1 t.p.h.
FUEL: Delivered by lorries from Stockholm.
CONSULS: At Stockholm, 100 km. away.
REPAIRS: Minor repairs only.
OPENING/CLOSING HATCHES: Ship's crew.
CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle of spirits out of bond.
CARGO GEAR: Loading by ship's gear.
AIRPORT: Stockholm Airport Arlanda, 75 km. away.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: Easter; Whitsuntide; Midsummer; Christmas and New Year's Day.
POLICE/AMBULANCE/FIRE: Alarm Tel. 90000.
GENERAL: Shippers: Holmens Bruk AB. Export about 250,000 tons of newsreel/year. Import about 130,000 tons of fuel oil. 2 ordinary loading quays and 1 roll-on/roll-off berth available.

HALMSTAD: 56.40 N. 12.52 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
5 Manifests.
2 Bills of Lading and Ship's Papers.
PILOTAGE: Advance notice of ETA 5 hours before required. Pilot station and pilot boat equipped with VHF, Channels 16, 13, 6. Pilot boards by lightbuoy Halmstad Road (Fl. 3 secs.) Pos. 56° 38′ N. 12° 48.9′ E. (Also see "Stockholm".)
ANCHORAGES: Good holding ground in 30-40 ft. on road 1 to 2 miles S.E. of breakwater.
MAX. SIZE: Max. length 700 ft.; max. draft 30 ft.
RADIO: Gothenburg Radio.
VHF: Port Authority on Channel 16 and 19.
TUGS: Meet at Halmstad Road. Ship's lines used.
MEDICAL: Hospital facilities available.
TANKERS: Max. draft at oil berth 30 ft. Diameter of discharge lines 8 and 10 in.
FRESH WATER: Fresh water available from berth 35 t.p.h.
FUEL: Viscosities available 1.2 englergrades/20°C. By arrangement ship's Agent.
GANGWAY/DECK WATCHMEN: Not necessary. Available if required.
OPENING/CLOSING HATCHES: Normally carried out by crew, but if carried out by stevedores cost charged to vessel.
SHIP CERTIFICATES: Bill of Measure, Nationality Certificate and Derat Certificate.

POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONE: For placing a telephone on board cost is 42 crs., and 15 crs. a day for hire.
SHORE LEAVE: Crew members allowed ashore.
AUTHORITY: Halmstad Hamnforvaltning.

HARGSHAMN: 60.10 N. 18.29 E.

The port is situated in the Archipelago of Oregrund, about 130 km. North of Stockholm and about 110 km. South of Gefle. Only iron ore products are exported, and the port is managed by the shippers, AB Dannemora Gruvor. It is a natural and well sheltered harbour, suitable for vessels up to about 25,000 d.w.t., bigger vessels are loaded with limited cargoes.
DOCUMENTS: ETA is to be given 48 and 24 hours in advance by cable or phone to "Oreship Uppsala". On arrival a cargo-plan is to be given to the Agent or foreman, stating quantity required and loading-rotation of hatches, as well as estimated draft on sailing.
The Customs Officers require the following documents on arrival.
Tonnage Certificate (Certificate of Registry).
Certificate of Nationality.
Swedish Light Dues receipts for current year.
Crew List IMCO FAL Form No. 5, 3 copies
Crew's effects declaration IMCO FAL Form No. 3, 1 copy
Ship's stores declaration IMCO FAL Form No. 4, 1 copy.
If the international IMCO Forms are not available, similar Forms are accepted.
PILOTAGE: It is not compulsory to engage a Pilot except for tankers and other vessels carrying dangerous cargoes. Entry without a Pilot is not recommended and should not be attempted without the most detailed local knowledge and previous experience of the port. Pilotage dues will only be charged if a Pilot is actually employed.

Pilot is embarked off Svartklubben lighthouse (60.09 N. 18.52 E.) and has to be ordered 5 hours before needed. Pilot can be ordered via the Agent, the Svartklubben Pilot station, phone: Hallstavik (0175) 100 06. Cable: "Pilotstation Hallstavik" or by VHF at any of the Swedish Pilot stations. Distance to Hargshamn is about 17 miles. For vessels arriving from ports in Gefle district, Pilot will board on request at Oregrund or North thereof, such request to be made as above.
RESTRICTIONS: Loaded vessels with draft over 23 ft. 6 in. at MWL are navigated in daylight and good visibility only.
MAX. SIZE: Max. draft allowed (at MWL in FW) 34 ft. (10.4 m.). Density of water: 1,006. Max. length about 575 ft. (175 m.). Max. breadth about 80 ft. (24.4 m.). The breadth limitations may be increased in the case of ore-carriers with side tanks. Max. distance water level to hatch coamings about 33 ft. (10 m.).
TUGS: A steam tug of 800 h.p. is available from Hallstavik, and is normally used to assist vessels over 9,000 d.w.t. on departure only. A small tug of 230 h.p. is available at the port.
BERTHING: There is an ore quay about 90 m. in length and depth alongside of 36 ft. The loading conveyor moves along the quay over a distance of 85 m., therefore only the biggest vessels have to shift during loading. Loading capacity 650–800 t.p.h. Stowage factor of the ore 17–18 cu. ft./ton and concentrate about 13/14 cu.ft. per ton.
STEVEDORES: Work is effected in 2 shifts: 0600–2200 hrs., Saturdays and days before holidays 0600–1200 hrs. Work on night shift and on Sundays/holidays can be arranged on request. However, on the following holidays work cannot be arranged: New Year's Day, Good Friday, Easter Eve, Easter Sunday, 1st May, Whitsun Eve, Whit Sunday, Midsummer holidays (last Friday/Sunday in June), All Saint's Day (1st Saturday in November), Christmas Eve, Christmas Day, New Year's Eve.
FRESH WATER: Available.
CUSTOMS ALLOWANCE: 100 cigarettes per man and 1 bottle of spirits per officer.
ICE: The port can be kept open all Winter by an ice-breaking tug. Normally there is ice from the last week of December until the last week of March/first week of April. In port and the entrance there is fast ice up to 1.5 – 2 ft. Navigation is maintained in a broken ice-channel. At the pilot station or in the Aland Sea there is very seldom packed ice or other difficulties during a normal Winter.
AUTHORITY: AB Dannemora Gruvor.
AGENT: Bjorsbo Shipping HB, S-740 73 Hargshamn. Tel: Osthammar 0173-200 80. Telex: 76042. Telegrams: ORESHIP UPPSALA.

HARNOSAND (Hernosand): 62.37 N. 17.58 E.

DOCUMENTS:

2 Crew Lists and/or 2 Passenger Lists (stating what tobacco, cigarettes or spirits each man has).

Deratification certificate.

Manifest and/or Bills of Lading.

Register, and if vessels before in Sweden same year, bills for light dues paid.

PILOTAGE: Applications for licensed Pilots should be made at least 5 hours before arrival. When making application, specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable make application by telephone or by radio via a coastal station or by some other method direct to Pilot station. Also possible request Pilot by VHF.

Pilot Station at Harnoklubb.

ANCHORAGES: In port approaches in depth of 20 to 40 m.

RESTRICTIONS: Harbour can be closed by ice some time during Winter but assistance given by State Ice-breakers as long as possible.

MAX. SIZE: Up to 33 ft. draft.

RADIO: Cable Agents to give ETA, draft and cash required via either Hernosand Radio SAH or Stockholm Radio SDJ.

HEALTH: Vessels arriving from ports outside Europe must, for inward clearance, provide Customs Officer with written declaration of freedom from infection. Further instructions will be issued by Customs Office were such a declaration cannot be given.

TUGS: Tug assistance is available.

BERTHING: Depth alongside main quays from 7 to 8 m.

TANKERS: Oil pier, depth alongside 10.50 m.

DENSITY: Nearly fresh water.

FRESH WATER: Available from the quays or by barge.

FUEL: Can be supplied.

GANGWAY/DECK WATCHMEN: Available for gangway. Not compulsory.

OPENING/CLOSING HATCHES: Normally done by crew.

CUSTOMS ALLOWANCE: 200 cigarettes and one bottle of 75 centilitre per man/week. Extra granted on request.

CERTIFICATES: See "Stockholm".

IDENTIFICATION CARDS: Not necessary.

REPAIRS: Most repairs possible.

DRY DOCK: At Gustavsvik.

TIME: GMT plus 1 hour permanent.

HOLIDAYS: New Year's Day; Epiphany; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Midsummers Day; All Saint's Day; Christmas Day; Second Christmas Day.

Working ceases at 1130 hrs. on the following eves of holidays and is voluntary and paid with 100 per cent overtime: Easter Eve; Whitsun Eve; Midsummer's Eve; Christmas Eve and New Year's Eve.

POLICE/AMBULANCE/FIRE: Telephone numbers: Accidents, Police, 90000; Fire: ask for alarm 90000.

AUTHORITY: Harnosands Hamn.

HELSINGBORG: 56.03 N. 12.41 E. (See Plan Book)

DOCUMENTS: See "Stockholm".

PILOTAGE: Call Pilot on the VHF Channel 16. Pilots board about half nautical mile off jetty of Helsingborg Northern Harbour. Good anchorage within area of about half nautical mile off jetty.

ANCHORAGES: Areas as above, depths of water 50–70 ft.

MAX. SIZE: Permissible length about 220 m.; breadth unlimited; draft 34 ft. on MLW. No tides but certain variations following prevailing winds.

Tankers: Max. draft 10.5 m.

HEALTH: Pratique automatic for all vessels arriving from non-infected ports. In cases where pratique should be obtained, notice to be given through ship's Agent. Further directions given by Pilot.

RADIO: For communication – Goteborgs Radio.

VHF: 24 hours watch on Channel 16. Call sign "Helsingborg Harbour", working Channels 11 and 12. Ships to contact the harbour 1 hour before arrival and 1 to 1/2 hour before departure.

Pilots: Channel 16, working Channels 13, 14 and 69.

Tugboats: Working Channels 11, 12 and 69.

TUGS: Join vessel outside entrances. Vessel's lines used.

3 tugs available, up to 2,640 h.p.

BERTHING: Basin No. 1, depth 6 m.

Basin No. 2 depth 5 to 7.3 m.

Basin No. 3 depth 5 to 7 m.

Basin No. 4 (Ocean Terminal), depth 8 to 10 m.

Basin No. 5 (Tanker Terminal), see "Tankers".

Basin No. 6 depth 8 to 10.5 m.

Basin No. 7 (Skane Container Terminal), depth 8 and 11.5 m.

Basin No. 8 (Copper Mill Harbour), depth up to 11.5 m.

CRANES: 35 cranes with capacity up to 45 tons.

BULK CARGO FACILITIES: 2 berths of 215 m. length for grain and fertilizers, max. draft 9.9 m.

SPECIALISED CARGO-HANDLING FACILITIES: Complete container terminal "Skane Terminal" with 540 m. berths and 2 Ro/Ro berths, max. draft 11 m. All types of handling equipment. Liquid chemicals handled at the tanker terminal.

STEVEDORES: Cargo handling performed by "Skaneterminalen AB" offering all kind of harbour works including loading, discharging, warehousing, etc.

MEDICAL: for attention, application to be made through ship's Agent. Hospital facilities available.

TANKERS: Dimensions of pipe-lines – for oils, 14 in., 12 in., 8 in., petrol, 12 in., 10 in., 6 in., slops, 6 in. Discharge facilities for slops through pipe-lines from berths numbers 503, 504 and 505. Tankers berth at quay numbers 503 and 504 with depth of water alongside 36 ft. MLW, and quay number 505 depth of water alongside 26 ft. MLW.

DENSITY: 1007. No tides, but slight variations in accordance with prevailing currents.

FRESH WATER: Available for quay connections.

FUEL: Bunker fuel delivered from pipe-lines. No advance notice required. Any grade available.

FIRE PRECAUTIONS: Standard procedures apply.

GANGWAY/DECK WATCHMEN: Watchmen generally at Master's option.

OPENING/CLOSING HATCHES: By crew or stevedores.

CERTIFICATES:

Certificate of Nationality.

Bill of Measurements.

Bill of Health.

Deratification Certificate.

Crew List.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes or equivalent quantities for each person on board. Wine and/or Spirit, one bottle each member to be held out of bond.

CARGO GEAR: Usual Board of Trade Regulations valid.

IDENTIFICATION CARDS: Not needed.

CONSULS:

Belgium	Tel. 15 10 00	Netherlands	Tel. 12 09 20

REPAIRS: All kinds of deck and engine repairs can be carried out.

DRY DOCKS: Length of largest dry dock 354 ft. Depth on sill about 16 ft. One smaller dry dock.

SURVEYORS: Lloyds local agent: AB Otto Hillerstrom.

REPATRIATION: Repatriation possible, by air and by train.

AIRPORT: Kastrup 60 km., Sturup 70 km., Angelholm 30 km.

TIME: GMT plus 1 hour. No alterations.

HOLIDAYS: Official holidays 1st and 6th January, 1st May, 1st Saturday November, 25th and 26th December, plus 2 holidays for Easter, 1 holiday for Whitsun and 1 holiday for Midsummer on appropriate dates.

POLICE/AMBULANCE/FIRE: Police 14 40 40; Ambulance and Fire 12 00 35; or in an emergency situation all functions via tel. 90 000.

TELEPHONES: Quay-connected telephones are placed on board.

SERVICES: Tank cleaning, discharge of tank washings, compass adjustments, etc., can be carried out after application through local Agents.

SHORE LEAVE: No restrictions.

REGULATIONS: Normal regulations apply.

DELAYS: No other delays than berths being occupied by working vessels can be expected.

AUTHORITY: Port of Helsingborg.

HOGANAS: 56.12 N. 12.33 E. (See Plan Book)

Privately-owned port serving only owning company – Hoganas AB. Customs and pilotage arranged through authorities in Helsingborg (12 nautical miles South-East of Hoganas).

DOCUMENTS: See "Stockholm".

PILOTAGE: Compulsory. Pilot obtainable at Hoganas or at Helsingborg. Pilot service day and night, available after request to pilot office at Helsingborg.

RESTRICTIONS: Entrance channel, Length 750 m.; width 65 m.; depth 8.25 m.

The harbour is seldom closed by ice.

TUGS: There are no tugs stationed at Hoganas, but tugs are available after request to the Harbour Office at Helsingborg.

BERTHING: *The Pier (Extending South-westerly).*

Length of quayage:	380.00 m.
Depth alongside:	
For 120 m. (from outer end)	6.60 m.
For the next 160 m.	8.25 m.
For remaining 100 m. varies down to	4.00 m.
The Cross Quay:	
Depth alongside at 75 m. from Northern end	3.50 m.
the remainder is unnavigable	
Quay in the middle of the Harbour:	
Length of quay:	180.00 m.
Depth alongside N.W. side:	
For 120 m. (from outer end)	6.60 m.
For the next 35 m. the depth varies from to being unnavigable.	4.2 m.
Depth alongside S.E. side:	
For 30 m. (from outer end)	5.00 m.
remainder	unnavigable

The depth of water at this port is somewhat affected by winds.

CRANES: 1×25 ton and 1×5 ton railbound electric grab cranes, 1×25 ton mobile crane.
REPAIRS: Machine-shop repairs only.
STEVEDORES: Working hours; a normal working day, Monday to Friday from 0653 to 1600 hrs. Normally no working on Saturdays.
FRESH WATER: Available.
FUEL: Can be supplied.
AUTHORITY: Hoganas AB.

TELEPHONES: None available for placing on board.
AUTHORITY: Norrlands Skogsagares Cellulosa AB.

HUDIKSVALL (including Iggesund and Stocka): 61.44 N. 17.07 E. (See Plan Book)

PORT LIMITS: Vessel is considered to be an "arrived vessel" when berthed alongside quays in port or if berths not available, at anchor in inner roads, outside berths, but not when vessels, owing to darkness, etc., are anchored outside pilot stations or in outer fairways.
DOCUMENTS: If arriving direct from foreign port, following documents presented to Customs officer who embarks during office times (0800–1700 hrs.).

3 Crew Lists.
2 Tobacco Lists.
Deratification Certificate (not over 6 months old).
Certificate of Nationality.
Certificate of Tonnage.
2 Manifests covering incoming cargo.
Receipts of Light Dues, paid to Swedish authorities during year.

PILOTAGE: Hoelick Pilot Station 61° 37′ N.; 17° 28′ E. Open for ordering pilots every day 0530–2100 hrs. local time. VHF Channel 16, after contact – working Channel VHF 13. Pilot to be ordered 5 hours before arrival. If ordered before 2100 hrs., vessel can obtain Pilot also during hours between 2100–0530 hrs. Pilot boat: orange painted cutter. International pilot signals. Pilot boards near "Myran" lightbuoy: 61° 36′ N., 17° 29′ E. Telegraphic address of pilot station at Hoelick: "Pilotstation Hudiksvall." (Also see "Stockholm".)
ANCHORAGE: Anchorage places for vessels awaiting pilot or anchoring owing to weather conditions: 61° 37.5′ N. 17° 25.0′ E.; 61° 37.0′ N. 17° 22.0′ E.; 61° 37.7′ N. 17° 21.3′ E. depending upon prevailing winds etc. Bottom mud and/or sand. Depth 10–30 m.
RESTRICTIONS: No tidal water at Hudiksvall. Tankers of more than 100 m. in length between p.p. not during darkness because of narrow channel with some curves. Dry cargo vessels up to 150 m. length after dark.
MAX. SIZE: *Tankers:* Daylight 45,000 d.w.t. Length 210 m., draft 9.2 m. After dark 6,000 d.w.t, length 100 m., draft 7.5 m.

Other Vessels: 16,000 d.w.t., length 160 m., draft 8.7 m.

Low water between 0.2–0.5 m. may occur often, sometimes as much as 0.7 m. below mean water level. Low water periods may occur when N.W. winds blowing over Northern Sweden.

HEALTH: Pratique automatic. No doctor visits incoming vessels if not specially ordered for treatment on board, etc.
RADIO: Vessels coming from South and having not yet passed the Stockholm area are recommended to call Stockholm Radio – VHF Channels 25 or 28 for vessels between Gotland/Sweden, 24 outside Stockholm South, 28 Stockholm East and North, 23 North of Aalands Sea, and in Gefle Bay, Hernoesand Radio SAH Channels 25 Hudiksvall area, 24 Sundsvall area, 23 Hernoesand area, 28 Oernskoeldsvik area. Hudiksvall harbour office: Channel 16. Working Channel 9.
TUGS: Tug compulsory for tankers over 6,000 tons d.w. and for other vessels over 8,000 tons d.w. in fairway. Vessels met near isle of "Enbarsskar" at 61° 39.5′ N., 17° 17.0′ E. For mooring purposes tug compulsory for tankers over 6,000 tons d.w. and for other vessels exceeding 5,000 tons d.w. Ship's lines used. Ice-breaking tug *Ago*, 203 tons, 1,260 EHK available in Hudiksvall during the whole year.
STEVEDORES: Ordered 1600 hrs. on day preceding vessel's arrival. For loading starting Monday morning, gangs to be ordered before 1100 hrs. local time Saturday. 3–5 gangs available at Hudiksvall and Iggesund; Stocka 3 gangs. Working hours: Monday-Friday, 0700–1600 hrs.; Meal hours: 0900–0930, 1230–1300. 2 hours overtime at extra cost of 50% Monday, Tuesday, Thursday, Friday (1600–1800 hrs.). For completing vessel, further 3 hours Monday, Tuesday, Thursday, Friday (1800–2100 hrs.). Extra cost of 100%. For completing vessel 5 hours' overtime can be obtained on Wednesday (1600–2100 hrs.), 2 hours at 50% and 3 at 100% extra.

On Saturdays no normal work, but stevedores available for maximum eight hours work, but 100 per cent overtime has to be paid and for minimum five hours even if vessel working less than five hours on Saturdays.

BERTHING: Main berth Hudiksvall draft allowed at mean water 8.7 m. alongside 165 m., thereafter 5.4 m. alongside 30 m. and therefore 4.9 m. alongside 160 m. One Ro/Ro ramp draft allowed 8.7 m. at mean water.

Pier at Iggesund 7.4 m. draft allowed mean water 150 m. length of pier. Ro/Ro berth 17.4 m. draft if more than 12 m. from Ro/Ro berth, if less draft allowed 6.3 m. Ro/Ro berth II 7.4 m. draft allowed if more than 12 m. from berth, if less 6.7 m.

Pier of Stocka 110 m. length, draft allowed mean water 4.9 m. On Southern side of pier draft allowed 3.9 m. alongside 48 m.

TANKERS: One berth only. Draft allowed: 9.2 m. at mean water. Pipe diameter for fuel: 10 in. light oils: 8 in. Connecting hoses between pipes and vessel: 8 in. diameter, both types. Shore tanks lie about 100–200 m. from berth, 5–8 m. above sea. Surface of jetty about 2 m. above sea level.
DENSITY: Average 1002–1001.
FRESH WATER: Fresh water available all berths. Delivery capacity about 15–20 t.p.h. During Winter it is difficult to arrange hoses, vessels assist with own hoses.
FUEL: Available all berths. Delivered by tank-lorries from Sundsvall 50 miles North of Hudiksvall. 24 hours' notice required.
FIRE PRECAUTIONS: No special precautions. Within bounded area oil jetty smoking prohibited. Also on new quay outside sawmill.
GANGWAY/DECK WATCHMEN: Available in all ports, not necessary if not required by vessel.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCE: Crew over 18 allowed 200 cigarettes; one bottle of spirits out of bond. If vessel stays in Swedish ports but still in foreign traffic, above quantities obtained from bond once a week (every 7 days). Instead of spirits one bottle wine or 6 bottles export beer.
IDENTIFICATION CARDS: Not needed. If crew going to doctor or to hospital preferable has passport.
CONSULS:

Country	*Address*	*Tel. Office*	*Tel. Home*
Denmark	Marknadsgatan 1 Hudiksvall	0650/11 712	0650/10 983
Finland	Varvsgatan 2–4 Hudiksvall	0650/15 250	0650/10 056
Gt. Britain	Drottninggatan 48 Gefle	026/18 03 00	
West Germany	Skeppsbroplatsen Sundsvall	060/15 55 00	060/15 24 40 060/62 22 2

REPAIRS: Small engine and deck repairs. To be ordered through vessel's Agent or through stevedoring foreman onboard.
DRY DOCKS: None.
REPATRIATION: Possible.

AIRPORT: Nearest regular airport: "Midlanda", near Sundsvall, 60 miles North of Hudiksvall. Regular Swedish inland airlines. Regular flights to Swedish main airports.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: No work on following days, although not all legal holidays. New Year's Day; Epiphany; Good Friday (Easter); Easter Eve; Easter Monday; Labour Day; Ascension Day; Whitsun Eve; Whit Monday; Midsummer Eve; Midsummer Day; All Saint's Day; Christmas Eve; Christmas Day; Second Christmas Day; New Year's Eve.
POLICE/AMBULANCE/FIRE:

Police Hudiksvall	0650/15 600	,, 90 000
Police Iggesund	0650/20 820	,, 90 000
Ambulance Hudiksvall	0650/10 670	,, 90 000

Hospital Hudiksvall	0650/92 000	
Hospital Iggesund	0650/92 000	

For Stocka: as Hudiksvall.
TELEPHONES: At Stocka and Iggesund: no telephones available for connecting onboard. At Hudiksvall telephones available. Skr 25 per day plus cost of calls.
GENERAL: Hudiksvall port is very near town. Railway station, bus station, etc., very near port. Oil port about 700 m. from town.
SERVICES: No tank cleaning or discharge of tank washings. Compass adjusting: 0650/10 339 (Pilot office). Ordered through Agent.
PORT REGULATIONS: Speed limit: max. 5 knots within the harbour basin. As plastic pipe is laid out on the bottom around the oil berth, anchoring during berthing is prohibited. Pipe filled with compressed air after vessel's mooring, comes up to the surface forming ring around vessel and oil jetty as shelter against oil leakage.
DELAYS: During Winter (December–April) delays on berthing/sailing owing to ice in fairways and alongside quays. Special mooring delays will occur owing to ice between vessel and quay.

KALMAR: 56.40 N. 16.20 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Compulsory for vessels carrying dangerous cargo. Pilot may be ordered on VHF, Channel 16 or by telephoning 0480/10719. Approaching from North, Pilot boards at Skaggenas or Krongrundet, from the South at Tradgardsgrundet. Round-the-clock service provided. (Also see "Stockholm").
ANCHORAGE: Good anchorage outside port available.
MAX. SIZE: Largest vessel 25,000 tons deadweight, draft 24 ft. Channel and harbour depth 26 ft.
TUGS: Available, order by tel. 15775.
RADIO: Stockholm Radio.
VHF: Harbour Master on VHF Channel 16.
CARGO HANDLING FACILITIES: 3 portable electric cranes of 5 tons each, 3 mobile cranes of 23 tons each and 1 mobile crane of 18 tons. 1 floating crane available, maximum lifting capacity 75 tons.
STEVEDORES: Available weekdays 0700-1630 hrs. Overtime is worked Saturdays and eves of public holidays. The operations comprise work on board, work ashore and rough sorting.
TANKERS: Oil dock has depth of 26 ft. alongside and has dealt with partly loaded ships of 25,000 tons. Discharge capacity about 28,000 cubic ft. an hour.
MEDICAL: Hospital available.
FRESH WATER: Available from wharves.
FUEL: Bunkers available by barge or at Oil dock.
DEVELOPMENTS: Ro/Ro berth will be erected 1981 at Barlastholmen. (Depth about 21 ft.)
Store houses for general cargo and sawn timber about 7,000 sq.m. will be erected 1979.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Crew or stevedores.
CUSTOMS ALLOWANCE: 200 cigarettes plus 1 bottle spirits.
CONSULS:

Danish Vice-Consulate	tel. 14719.
Finnish Consulate	tel. 10700.
The Netherlands Vice-Consulate	tel. 14444.
Norwegian Vice-Consulate	tel. 22330.
German Consulate	tel. 21769.

REPAIRS: Available. Divers for underwater repairs; major repairs undertaken.
DRY DOCKS: 2 floating docks. 1 for vessels up to 3,000 d.w.t. and 1 for vessels up to 10,000 d.w.t. also slip for vessels up to 850 tons. (AB Kalmar Varv 0480/15390, telex 43100).
AIRPORT: Ten kilometres from the port.
AUTHORITY: Harbour Master.

KARLSBORGSVERKEN (Kalix District): 65.48 N. 23.17 E.

Axelsvik (Oil Harbour) 4 miles East.
PILOTAGE: Pilot station "Erikoren", Karlsborgsverken. Pilots embark or disembark at Maloren 18 nautical miles South Karlsborgsverken.
MAX. SIZE: Max. draft entrance to Karlsborgsverken 6 m., to Axelsvik 8.8 m. Size no limit.
TUGS: Available.
BERTHING:

	Max. draft.	Length of quay
Cellulose Quay	6.0 m.	145 m.
Sulphate Quay	5.0 m.	80 m.
Timber Quay	6.0 m.	250 m.
Kalix Outer Harbour Quay	5.4 m.	145 m.
Axelsviks Oil Harbour	8.8 m.	60 m.
Tore (17 nautical miles)		
N.W. Karlsborgsverken	6.0 m.	170 m.

STEVEDORES: Available, No particular ETA advice required except as normally sent by Master to the Agent.
MEDICAL: Hospital and dental services available.
FRESH WATER: Available at all berths except at Axelsvik's Oil Harbour.
OPENING/CLOSING HATCHES: Usually carried out by the vessel's crew.
FACILITIES: No land cranes. Mobile cranes to hire for loading/discharging.
CONSULS: None.
REPAIRS: Workshop available for repairs.
AIRPORT: Lulea 85 km. from Karlsborgsverken.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Telephone 90000 for emergency and ask for service required.
TELEPHONES: Available at quays.
SHORE LEAVE: Allowed.
AGENT: Kalixspedition, Svanberg & Co. AB, Box 61, S-952 01 Kalix Telex No. 8311.

KARLSHAMN: 56.10 N. 14.52 E. (See Plan Book)

DOCUMENTS:
- 3 Crew Lists (IMCO Forms).
- 3 Passenger Lists.
- 2 Tobacco Lists.
- 2 Store Lists.
- 1 Manifest.
- 1 Bill of Lading.

PILOTAGE: Vessels approaching port call on VHF Channel 16, Karlshamn Pilot station 5 hours in advance. Pilot boat orange coloured. Lights and sound signals as international regulations. Pilot boat always located 2 nautical miles South from Pilot station Ortholmen, this point marked on charts. Location of anchorage in same area where Pilot taken. (Also see "Stockholm").
ANCHORAGE: Depths of water in anchorage area about 20–25 m.
RESTRICTIONS: Tankers not allowed to enter during darkness. Max. draft for tankers 32 ft. 06 in.
MAX. SIZE: Max. length 180 m., max. draft 32 ft. 06 in. Oil pier outside main harbour, Kolo harbour, length unlimited, max. draft 41 ft. No tide.
HEALTH: If infectious disease on board Captain must immediately send information to Agent.
RADIO: Karlskrona Radio.
RADAR/VHF: The Pilot station is fitted with radar and VHF.
TUGS: 3 tugs available, 3,000 h.p., 2,000 h.p and 800 h.p. Join vessels about 1 nautical mile outside Harbour boundary. Ship's lines always used.
BERTHING:
Inner Harbour: West Harbour Area.

Berth	*Length (m.)*	*Depth (m.)*
Ocean Quay	150	10.0
Soja Quay	250	8.5
West Quay	400	7.5–6.0

These quays are served by 5 rail-bound bulk goods cranes of 5–10 tons and have 2 railway tracks.

Via the West Harbour area oil seed plants, copra and vegetable oils for the Karlshamn Oil Factory (AKO) are shipped as well as timber, pig iron, scrap and other bulk goods.
East Harbour Area.

Berth	*Length (m.)*	*Depth (m.)*
East Pier	160	8.5
East Quay	500	6.0

The East Pier, is equipped with 2×6.7-tons rail-bound unit goods cranes and served by 2 railway tracks. Adjacent to the East Pier are 2 cold stores with a total floor area of 7,000 sq.m.

Loading and discharging is carried out with mobile cranes at the East Quay. The Harbour has 7 mobile cranes with lifting capacities ranging from 4 to 23 tons.

Goods shipped via the East Harbour area include timber products, timber, bulk goods and general cargo.
Sterno Harbour:
A special harbour for stone products, wood and timber. Water depth is 6 m.

Stone blocks are loaded at a special quay and crushed stone products, chiefly diabase which is used for producing mineral wool, are discharged from a quay by a newly-erected stone-crushing plant. The crushing plant is owned by Armerad Betong-Vagforbattringar.

At Sterno Harbour a timber-floating terminal consisting of an 80-m. long quay and timber landing areas both on land and in the water have been arranged and leased to Mo och Domsjo AB. The timber is floated from Karlshamn to MoDo's pulpmill at Husum.

The quays of the old shipyard are used chiefly for shipping timber. Timber Terminalen AB have built a timber terminal with a sawmill, planing mill and sorting plant adjacent to the quay area.

Stilleryd Harbour:
Karlshamn's new outer harbour; it was inaugurated in 1975 and consists of a 400-m. long quay with water depths of 8 and 10 m. Dredging to a depth of 11 m. is planned at the 10-m. quay. 2×35-ton luffing cranes are used for loading and discharging vessels and they are backed up by mobile cranes. Double railway tracks serve the quay.

The harbour also has ro-ro facilities with a water depth of 8 m. Stilleryd Harbour accommodates vessels of up to 35,000 d.w.t. The harbour area features 3 warehouses with a total storage area of 21,000 sq.m. Adjacent to the quay area is a stockyard of approximately 200,000 sq.m., of which 40,000 sq.m. is asphalted.

Sodra Skogsagarna ship products like paper pulp, paper, wood chips, pulpwood, etc. via the Stilleryd harbour. Fernstroms Granitindustrier ship stone blocks while Vikingtra AB ship wood and timber via this harbour.

CRANES: In addition to the cranes mentioned above, there is a heavy lift crane capacity 300 tons.
MEDICAL: Hospital facilities available.
TANKERS: Different lines used. From 12 to 6 in. depending on cargo to load/discharge. 3 different loading/discharging berths available. 1 at Inner Harbour 32 ft. 06 in. draft, 1 at Kolo Harbour 41 ft. draft and 1 at Oxhaga.

Kolo Oil Harbour:
Position 56° 09′ N. 14° 43′ E. Pilot boards by Laknallarna, position 56° 07′ 8″ N. 14° 53′ E. Berthing during daylight only. Max. size 250 m., draft 41 ft. 75,000 d.w.t. or 100,000 d.w.t. with part load. Depth at berth and approaches 46 ft. 2 tugs are generally used.

The pipe-line is 20 in., length 400 m. and hose connection 12 in. Max. rate, 1,500 cbm/hour (hfo). There are no ballast facilities and no clean ballast can be discharged into harbour. Vessels are allowed to clean tanks and gas free in the roads only.

Fresh water available at 20 t.p.h. by pipe-line.

Old Oil Harbour:
Situated at Sutudden where a large number of major oil corporations and manufacturing companies have their depots. Heavy and light fuel oils, diesel oil, petrol and paraffin are imported and stored here. Storage capacity amounts to approximately 180,000 cu.m. of which half consists of underground rock storage facilities.

The oil quay has a depth of 11 m. and can accommodate fully laden tankers of up to 30,000 d.w.t.

Oxhaga Oil Harbour:
Karlshamn's new oil harbour, situated at Munkahusviken where the water depth at the quay is 13 m. Underground rock storage facilities with a total capacity of 400,000 cu.m. – 200,000 cu. m. for heavy oil and 200,000 cu.m. for light oil have been constructed. Storage has been leased to manufacturing companies, municipalities and oil companies.

Oxhaga Nabb's oil harbour is used by fully laden tankers of 50–55,000 d.w.t.

An above-ground storage area for petroleum, oil and chemicals is planned for the oil harbour areas. Surveys have shown that it is possible to build additional rock storage facilities for petroleum products in the Oxhaga area.

DENSITY: 1003.
FRESH WATER: Fresh water available and delivered by hoses.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Watchmen only necessary when tankers discharge petroleum products.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Certificates of Tonnage, Derat Certificate.
CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes per man/week. Wine and/or Spirits, 1 bottle per man/week.
IDENTIFICATION CARDS: Not needed.
CONSULS:
Netherlands, Tel. 10041
Denmark, Tel. 52080.
Norway, Tel. (0454) 14225
Finland, Tel. (0454) 11319.
REPAIRS: Small deck and engine repairs can be effected.
DRY DOCKS: None.
REPATRIATION: Facilities for repatriation of crew possible.
AIRPORT: Distance from airport 3 Swedish miles. 3 flights per day.
HOLIDAYS: January 1st and 6th; Easter; May 1st, 15th, 26th; June 21st; November 1st; December 25th, 26th. No work can be arranged during holidays.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONES: Telephones on board arranged at cost of 70 Sw. Cr.
DEVELOPMENTS: An extension of Stilleryd harbour is planned. By 1980 it is expected that an additional 200-m. quay with a water depth of 8 m. will be ready for service. It is judged that quay capacity at Stilleryd harbour will be fully developed during the 1980's. Total quay length will then amount to 1,100 m.
AUTHORITY: Harbour Master.

KARLSKRONA: 56.10 N. 15.36 E.

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot is taken at Aspo. Tel. 0455/39016. (Also see "Stockholm"). Ordering Pilot between 2100–0500 hrs. contact Karlshamn Pilot station 0454/14102. Stations operating on VHF Channel 16. Pilot should be ordered 5 hours in advance. Pilot boats usually orange.
ANCHORAGE: On roadstead. Reference to nautical chart No. 821 (Swedish).
MAX. SIZE: Max. draft 9.1 m. (30 ft.).
HEALTH: See "Stockholm".
RADIO: Stockholm Radio. Karlskrona Radio.
VHF: Karlskrona Port office equipped with VHF. Channels 16, 14.
RADAR: Radar service available when entering port. Tel. 0455/25075 or 0455/50780.
TUGS: Tugs assistant available.
BERTHING: Total quay length 4,700 ft., oil terminal 400 ft., depth alongside quay 13–33 ft., oil terminal 29.5 ft. Ro/Ro Quay 23 ft.
STEVEDORES: Available. Ordered through Agents or directly 0455/10518.
MEDICAL: Advance notice to Agents desirable.
TANKERS: No specific requirements applicable on oil carriers. Two tanker berths available. Draft 7.0 and 8.5 m.
FRESH WATER: Available, customary delivery from quay-berth.
FUEL: All grades available. No advance notice required.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CONSULS:
Danish Vice-Consul, Tel. 15006.
Netherlands Vice-Consul, Tel. 10926 and 12495.
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: Largest dry dock: length 185 m., breadth 20.76 m., depth 8.80 m. Six smaller docks.
REPATRIATION: Not allowed.
AIRPORT: 30 kms. from port.
TIME: GMT plus 1 hour. Permanent.
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: None available.
SERVICES: Compass adjusting.
AUTHORITY: Harbourmaster.

KARLSTAD: 59.23 N. 13.31 E. (See Plan Book)

PORT LIMITS: Vessel considered to be an "arrived ship" when berthed or anchored South of the Gerholmsrevet buoy in case of congestion.
DOCUMENTS: As usually required in Swedish ports.
PILOTAGE: Not compulsory. However Pilots available.
ANCHORAGES: There is a safe anchorage South of the Gerholmsrevet buoy, sand and clay.
RESTRICTIONS: There are no restrictions imposed upon entry. Vessel to give 1 prolonged blast – 1 short blast – 1 prolonged blast to call the attention of boatman.
MAX. SIZE: Vessels length, breadth and draft maximized by the locks of the Trollhatte canal (87 m. × 13 m. × 5.3 m.).
HEALTH: Documents etc. as usually required in Swedish ports.
RADIO: Gothenburg Radio.
VHF: ETA to be given to Karlstad Port Radio (0800-1600 hrs. MET)
RADAR: No port radar available.
TUGS: Two icebreaking tugs available. Ship's lines usually used.
BERTHING:

Vanerterminalen	Length	175 m.
(The Venerterminal)	Shipdraft	5.3 m.
Mobile cranes		
Styckegodskajen	Length	270 m.
(The general cargo quay)	Shipdraft	5.3 m.
Three general cargo cranes	6 tons	
Trakajen	Length	120 m.
(The wood quay)	Shipdraft	5.3 m.
Mobile cranes		
Kolkajen	Length	350 m.
(The coal quay)	Shipdraft	5.3 m.
One bulk cargo crane	5 tons	
One heavy-lift crane	28 tons	
Lambergshamnen	Length	230 m.
(The Lamberg Harbour)	Shipdraft	5.0 m.
Mobile cranes		
One heavy-lift crane	160 tons	
Inrehamnen (Inner harbour)	Disused by merchant vessels.	
Oljehamnen (Oil harbour) Each pier	70 m. Mooring space both sides	
Three jetties for handling oil, etc.	Shipdraft	5.3 m.

STEVEDORES: Modern and extensive machinery equipment. Loading/discharging can be arranged in two or three shifts.
MEDICAL: Hospital facilities available.
DENSITY: Fresh water in the port.
FRESH WATER: Delivered by hose from piping on the quay.
FUEL: All kinds of bunker oil available.
CONSULS: Danish, Norwegian and German.

REPAIRS: All kinds of deck and engine repairs possible. Slipway 2,300 tons
SURVEYORS: All major classification societies represented in nearby port of Gothenburg. Government ship surveyor situated at Karlstad.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Usually carried out by crew
CUSTOMS ALLOWANCE: As usually allowed in Swedish ports.
CARGO GEAR: Shore gear usually used.
REPATRIATION: Crew changes and repatriation can be effected.
AIRPORT: Regular domestic airlines. Several flights per day to and from Stockholm and Gothenburg.
TIME: Local time is GMT plus 1 hour.
HOLIDAYS: Cargo work can not be arranged on Christmas, New Year's and Easter day or on Good Friday.
POLICE/AMBULANCE/FIRE: Telephone number 90 000.
SERVICES: Tank-cleaning equipment and facilities for discharge of tankwashings available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary for shore leave.
REGULATIONS: Ship's propulsion machinery may not be used when ship is berthed.
DELAYS: Normally not to be expected.
DEVELOPMENTS: Number of cranes and sheds will be increased. A 35 ton container crane is to be purchasd in the near future and will be sited on the Coal Quay.
AUTHORITY: Port Manager and Port Captain, Port of Karlstad.

KLINTEHAMN: 57.23 N. 18.11 E.

Harbour is being rebuilt. Quay will then be 330 m. and depth 5 m. Depth on entrance 5.5 m.

The most unfavourable winds are South — West. The harbour is however to be considered as good and safe.

Most products are loaded/discharged with mobile cranes.

Documents needed are Nationality Certificate, Bill of Measurement, Passenger List, Crew List, Derat Certificate, Ships and Crew Declaration.

Pilot Station at Visby. Pilots have VHF and operate on Channel 16.

Bunkers and water can be obtained.

KOPING: 59.31 N. 16.00 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Via Sodertalje: Pilots obtainable for inward bound vessels from Landsort to Sodertalje and from Sodertalje to Koping; for outward bound vessels from Koping and Sodertalje. Via Stockholm: Pilots obtainable for inward bound vessels from Simpnas, Furusund, Sandhamn, Dalaro and Landsort to Stockholm and from Stockholm to Koping; for outward bound vessels from Koping and Stockholm. (Also see "Stockholm"). Harbour pilotage obtainable but not compulsory in harbour area.

Distances: Landsort – Sodertalje (nautical miles), 34; Sodertalje – Koping, (nautical miles) 69; Landsort – Dalaro, (nautical miles), 32; Dalaro – Stockholm, (nautical miles), 46; Sandhamn – Stockholm, (nautical miles), 36; Stockholm – Koping, (nautical miles), 78; Vasteras – Koping, (nautical miles), 27; Harbour Pilotage, (nautical miles), 2.

ANCHORAGES: At the "Broken" light buoy, clay bottom.
RESTRICTIONS: Ice is prevalent in lake Malaren and the inlet from the Baltic from January to March, but the entrance channel is kept open during Winter season.
MAX. SIZE: The Pilot station on Lake Malaren, Tel. 0755/30467, will give information on the max. admissible sizes of vessels. In general the following applies:

Max. Admissible	*Via Sodertalje*	*Via Stockholm*
Length	124 m.	110 m.
Breadth	17 m.	15 m.
Draft	6.8 m.	5.65 m.
Height of masts above water level	35 m.	26 m.

The figures stated for the draft are subject to variation according to the water level. The entrance fairway to the port has been dredged to a depth of 7.6 m., the width of the bottom being 60 m.

VHF: Work freq. Channel 14. Call Koping Port Radio, Channel 16.
TUGS: Available day/night.
BERTHING: Deep-water harbour. Has 529 m. of quayage with depth of 6.2–7.3 m. alongside and is equipped with three 6-tons portal cranes and four 7-tons level-luffing jib cranes, two having max. lifting capacity 11 tons. Also 80 m. cross-quay – without cranes – loading/unloading with vessels own winches. Quays are rail-connected and equipped with electricity, telephone and fresh water. About 10,000 sq.m. of concrete stockyards within reach of cranes and outside this area at short distance from cranes, space of about 25,000 sq.m. available for storage of goods. Also about 18,000 sq.m. sheds of different types in connection to quays.

Cranes well equipped with lifting devices such as grabs of different types, etc. Conveyor belts of varying length, fork trucks, trimming and other cargo handling equipment also available.

Old Harbour: Has 400 m. of quayage with depth varying from 3.6 to 4.5 m. alongside, mobile cranes are used.

Oil Harbour: A modern oil harbour (built 1969) is situated at the mouth of River Kopingsan (North side), the jetty having one outside and one inside berth with depth of 7.6 and 5.7 m. respectively.

On the North side is a new (1975) 80 m. concrete quay for grainloading vessels. Depth alongside 7.3 m.

Private Wharves: There is (on the North side) a private 120 m. concrete quay, depth 6.2 m., belonging to Messrs. Tibnor Ltd., (Iron and Steel Merchants). One 10 ton travelling portal crane available.

A private harbour, belonging to Cementa Co., is situated in the immediate vicinity of the "Deep-water harbour". There is a 110 m. concrete quay, with 7.3 m. alongside, and one 6 ton travelling portal crane and one belt conveyor available. There is also a 50 m. pier, same depth, for self-unloading (cement) vessels.

STEVEDORES: Working hours: 0700–0900, 0930–1300 and 1330–1600 hrs. (Monday to Friday). Special conditions on Christmas Eve, New Year's Eve, Easter Eve, Whitsun Eve and Midsummer Eve.

Overtime work: can usually be executed on Mondays, Tuesdays, Wednesdays, Thursdays and Fridays for 3 hours daily and 6 hours on Saturday.

GANGWAY/DECK WATCHMEN: Always available.
FUEL: Water, provisions, coal and oil obtainable.
REPAIRS: Minor mechanical, electrical and other repairs can be carried out by different local firms. Diver available.
AUTHORITY: Harbour Master.

LANDSKRONA: 55.52 N. 12.48 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot available on request from Helsingborg Pilot station or from Landskrona Pilot station in daytime. 5 hours' notice required. Pilot stations and boats equipped with VHF. (Also see "Stockholm")
ANCHORAGE: Vessels of up to 10 m. draft can safely anchor North of Staffans Bank.
MAX. SIZE: Depth in channel and harbour 11 m. (36 ft.) Max. draft 10 m. Vessels up to 253 m. length have sailed from harbour.
HEALTH: See "Stockholm"
RADIO: Gothenburg Radio call sign SAG; Malmo Radio call sign SDP. The harbour office, Pilot station, Pilot boats and tug boats equipped with VHF.
TUGS: Tugs usually meet off Pilhaken lightbuoy. Ship's lines to be used.
BERTHING: Terminal for handling bulk cargoes. Rock phosphate can be discharged with a capacity of 8,000 tons per 24 hours.
MEDICAL: Medical attention and hospital facilities available.
TANKERS: No oil berth in Landskrona.
DENSITY: Density of water changes with currents.
FRESH WATER: Available from quay.
FUEL: Small quantities of fuel oil can be obtained from quay.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Usually carried out by ship's crew.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCE: See "Stockholm".
IDENTIFICATION CARDS: Not needed.
CONSULS:

Finnish Vice-Consulate	Tel. 0418/16020
Danish Vice-Consulate	Tel. 0418/16150
Netherlands Vice-Consulate	Tel. 0418/16020
Norwegian Vice-Consulate	Tel. 0418/77000

REPAIRS: All types of deck and engine repairs.
DRY DOCKS: Dry dock for ships up to about 25,000 tons d.w. (189 m. length). Floating dock for up to about 5,000 ton d.w.
AIRPORT: Sturup, 60 km.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: Can be placed aboard.
SERVICES: Compass adjusting.
REGULATIONS: Anchoring prohibited between and up to 50 m. from harbour lights.
AUTHORITY: Landskrona Hamnforvaltning.

LULEA: 65.35 N. 22.09 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Telegraphic address, "Pilotstation Lulea". Advance notice 5 hours. VHF Channel 16, 156.80. Pilot boat, orange with international signals. Pilot boards about 2 nautical miles West of Rodkallen for entering Germandoleden and 1 nautical mile N.E. of Farstugrundens Light House for entering Sandoleden. Location of anchorage when awaiting Pilot, West of Rodkallen and South of Farstugrunden Light House.
ANCHORAGE: Germandofjarden, 1.5 nautical miles S.E. of Larsgrundet Light House and inner roads.

MAX. SIZE: Max. draft at mean water 11.4 m. in Sandoleden and 7.5 m. in Germandoleden.
HEALTH: No special regulations.
RADIO: Harnosand Radio, call signal SAH.
TUGS: At the inner road for the ore dock, and in Sandoleden 1 nautical mile South of the coal quay and the oil terminal. Ship's lines to be used.

Two tugs of 4,200 h.p. each are available for towing and icebreaking.
BERTHING: *Deep Quay:* Length 345 m., depth 6.5 – 9 m. General cargo and wood. Two 7.5-ton cranes. Railway.

SJ-Coal Quay: Length 190 m., depth 6.9 m. Bentonite and general cargo. Two 4-ton cranes. Railway.

Cement Silo Quay: Length 50 m., depth 9 m. Cement.

LKAB Ore Quay: Length 415 m., depth 13.2 m. Iron ore. Two shiploaders of 4,000 t.p.h. each.

SSAB Quay: Length 498 m., depth 8.0 m. Iron, steel. Eight 6 – 12-ton cranes.

Coal Quay: Length 575m., depth 12.2 m. Coal, coke, iron, steel, limestone. Three 18-ton grab cranes, 35 tons with hook.
BRIDGES: When passing up to Northern side of port, notice has to be given 2 hours in advance for opening of Bergnasbridge.
STEVEDORES: Bottenvikens Stuveri AB.
TANKERS: Dia. of lines from 150 mm. up to 350 mm. 2 oil jetties depth 7.8 m. and 12.2 m. Length 20 m. and 60 m. respectively. Facilities for receiving dirty ballast. Rate 300 cu.m. per boat.
DENSITY: Fresh water, 1000.
FRESH WATER: Fresh water available at any berths.
FUEL: All grades of oil available.
GANGWAY/DECK WATCHMEN: Safety watchmen are to be on board all tankers when loading or discharging.
OPENING/CLOSING HATCHES: Stevedores.
SHIP'S CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCE: (Tobacco) 200 cigarettes or 250 grams of tobacco for each Crew member once a week. (Wine/Spirits) 0.75 litre for each Crew member over 20 years old, once a week.
IDENTIFICATION CARDS: Not necessary.
CONSULS:

British	16329	Norwegian	13040
Danish	20240	Netherlands	12030
Finnish	10440	German	23025
France	10440		

REPAIRS: Only small engine repairs.
AIRPORT: 10 km. from port. Served by regular airlines.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: See "Stockholm".
POLICE/FIRE/AMBULANCE: Telephone 90 000.
TELEPHONES: Connections available at oil terminal, coal terminal, ore terminal and Deep Quay.
GENERAL: All ships mooring at oil terminal over 3,000 d.w.t., and ore dock have to use tugs.
AUTHORITY: Lulea Hamn.

LYSEKIL: 58.17 N. 11.26 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot boards 2 miles West of Gaven lighthouse. 5 hours advance notice required. Pilot ordered by VHF Channel 16 or telephone No. 60800.
ANCHORAGES: Safe anchorages both for small and large vessels inside harbour or just outside harbour in Gullmarsfiord.
RESTRICTIONS: No restrictions night entry, except max. draft possible 30 ft. No tide.
MAX. SIZE: Maximum permissible length for berthing about 600 ft. Draft 30 ft.
HEALTH: Declaration of health only when required from Customs or for vessel coming from outside Scandinavia.
RADIO: Cable Agents giving ETA, draft, cargo and cash required via Gothenburg Radio.
RADAR/VHF: No port radar service, VHF for calling Pilot, Channel 16.
TUGS: Must be requested from Uddevalla or Gothenburg at least 1 day before arrival.
BERTHING: 3 berths available. Gullmarskajen length 600 ft. max. draft 30 ft., Grotokajen 500 ft. max. draft 22 ft. Anderssons Kav 400 ft. max. draft 18 ft. Railway on all berths.
CRANES: 5 mobile harbour cranes working all berths. Maximum capacity 40 tons. No restrictions against using ships own gear.
STEVEDORES: Ordered by Agents.
MEDICAL: Hospital in town.
TANKERS: See the port of "Brofjorden".
DENSITY: About 1027.
FRESH WATER: Available from shore installation.
FUEL: Gasoil and Diesel available.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally opened by crew.
CERTIFICATES: Registered Tonnage Certificate.
CUSTOMS ALLOWANCE: See "Stockholm".
IDENTIFICATION CARDS: Not required.
CONSULS: Denmark, Finland, Iceland, Norway.
REPAIRS: Small repairs possible.
HOLIDAYS: See "Stockholm".
REPATRIATION: Change of crew and repatriation possible.
AIRPORT: None.
TIME: Local time GMT plus 1 hour. Permanent.
TELEPHONE: Police, Ambulance, Fire Brigade 90000.
AUTHORITY: Lysekils Hamnforvaltning.

MALMO: 55.37 N. 13.01 E. (See Plan Book)

DOCUMENTS:

2 Crew Lists.
1 Passenger List.
2 Lists of Personal Effects (Tobacco List).
1 Declaration of Health.
2 Stores Lists.
3 Cargo Manifests.
1 Bill of Measurement.
1 Certificate of Nationality.
1 Deratisation Certificate.

PILOTAGE: Vessel applies for Pilot by telegram, by telephone or VHF (telegraphic address, Pilotstation, Malmo; tel. 115269; VHF Channel 16). Advance notice required 5 hours before pilotage to commence. Pilot boat orange-coloured cutter equipped VHF and radar. Pilot boards at Malmo roadstead. In case of bad weather vessel awaits Pilot at roadstead. (Also see "Stockholm").
ANCHORAGE: Vessels anchor about 5 cables North of fairway buoy "Roder Prick" and East of leading lights Centralhamnsrannan Nedre and Ovre, and S.W. of leading lights Malmo Oljehamn, Nedre and Malmo Oljehamn Ovre. Depth 12 to 14 m. and bottom hard clay.
RESTRICTIONS: Speed must be reduced inside breakwaters. When red flag hoisted (red lantern at night) at the N.E Dry dock pier head, indicating dock gates open, vessels may pass breakwater at min. speed. Bridge opening signal for passing from South Wharf Basin 2 long blasts, followed by 1 short.
MAX. SIZE: Max. length recommended in Oil Harbour 700 ft. on draft not exceeding 34 ft. Max. length recommended at Oil Jetty in Free Port 650 ft. on draft not exceeding 24 ft., or 600 ft. on draft not exceeding 26 ft. Max. length recommended in New Harbour is 490 ft. on max. draft 21 ft. and in Industrial Harbour 550 ft. on max. draft 26 ft. No tides.
HEALTH: Free pratique automatically granted arriving from non-infested areas. If arriving from infested areas health declaration must be presented immediately on arrival. If diseases on board suspected, vessel allowed to enter after approval City Medical Adviser, but nobody allowed on board until vessel's crew examined by doctor and after approval of medical adviser.
RADIO: Vessel can route ETA cables to Gothenburg Radio (call sign SAG or Channel 26 on VHF), open all hours. Radio stations can also be called by radio-telephone on 2182 kHz.
VHF: Port Control Office equipped with VHF (Channel 16, 12 and 14), open 24 hours a day. Masters can receive information about berthing place, present traffic and existing hazards to navigation in harbour area.
TUGS: Tugs usually meet vessels at roadstead. Ship's lines used. 4 tugs, supplied at all hours, also carry out ice-breaking.
BERTHING:

12 of these cranes can be equipped with grabs

BRIDGE: Will be opened with certain exceptions 0700–1700 hrs. weekdays. May be opened other hours on request to Port Control Office.

STEVEDORES: Work in shifts from 0600 through to 0100 hrs.

CONTAINER HANDLING FACILITIES: 10 Roll-on/Roll-off ramps, 2 container berths with 40 tons capacity container cranes, 3 forklift trucks with 25–40 tons capacity.

MEDICAL: No advance notice required for medical attention. Good hospital facilities available. See also "Health".

TANKERS: The Oil Harbour in the Northernmost section of the port of Malmo, and can be reached by a special approach fairway, the Oil Harbour channel, which has a depth of nearly 37 ft. The harbour is equipped with 7 berths, 2 of these being for ocean-going tankers with modern equipment for the unloading of oils and chemicals. Water depth varies between 20 and 36 ft.

The harbour can accept fully-loaded tankers of up to 32,000 d.w.t. as well as partly-loaded ships of up to 65,000 tons.

The berths for ocean-going tankers are each equipped with 3 hydraulically manoeuvrable transfer plants for faster and more reliable unloading. A piping system leads from the berths, unloading capacity of up to 2,000 tons per transfer plant, berth and hour. Tanks and pipes can be heated from a central steam-production station used by all firms. The Oil Harbour area also contains storage tanks for liquid chemicals and solvents. There are also good possibilities for development within the area, for e.g. petrochemical industries.

Berth	*Quay Length*	*Depth*
1003	770 ft.	36 ft.
1004	770 ft.	36 ft.
1006–1007	295 ft.	19.5 ft.
1008–1009	295 ft.	19.5 ft.
1010	328 ft.	19.5 ft.

DENSITY: Average density 1010. No tide experienced.

FRESH WATER: Fresh water available all berths and delivered by private company (AB Malmo Skeppshjalp, tel. 970470.) Rate of delivery 60 t.p.h.

FUEL: All normal grades available. No special advance notice required.

FIRE PRECAUTIONS: Apart from usual non-smoking precautions, vessel discharging or loading dangerous goods of Class 1 in IMCO code required to have a fire guard on board at all times.

In Oil Harbour the shore-valve watchman also serves as fire guard.

GANGWAY/DECK WATCHMEN: Not considered necessary other than in Malmo Oil Harbour. Decision to be made by Master.

OPENING/CLOSING HATCHES: Normally carried out by stevedores on ocean-going vessels.

CERTIFICATES:

International Bill of Measurement.
Certificate of Nationality.
Deratisation Certificate.
Load-line Certificate.
Radio Certificate.
Safety Equipment Certificate.
Gear Certificate.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes or 40 cigars or 150 grams of smoking tobacco per week out of bond. Spirits, 0.7 litre spirits per week out of bond.

CARGO GEAR: No additional requirements.

IDENTIFICATION CARDS: Not needed.

REPAIRS: Ship and engine repairs of all kinds, and dockings carried out by Kockums Mekaniska Verkstad, one of biggest shipyards in world. Certain kinds of repairs carried out by other firms in town.

DRY DOCKS: 2 dry docks for ships up to 25,000 d.w.t. and 1 dock with a capacity of 750,000 tons. Efficient crane equipment permits single lifts of up to 800 tons. Kockum are also large manufacturers of ship's engines, in particular MAN diesels and De Laval steam turbines.

REPATRIATION: Facilities exist for effecting crew changes and arranging repatriations.

AIRPORT: Sturup Airport, served by regular airlines, situated about 25 kms. from Port of Malmo.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: See "Stockholm". Cargo work can be arranged on those days after agreement with Stevedore Company. Oil tankers can be dispatched all hours.

POLICE/AMBULANCE/FIRE: 90000.

TELEPHONES: Can be connected at most berths. Cost Sw. kr. 15:-/day plus actual cost of long-distance calls.

SERVICES: All services available.

DELAYS: No delays expected.

AUTHORITY: Malmo Hamnforvaltning.

NORRKOPING: 58.36 N. 16.12 E. (See Plan Book)

DOCUMENTS: 3 Customs Documents. 3 Health Documents. 3 Crew Lists. 3 Passenger Lists. 3 Manifests.

Master of ship arriving from abroad to first Swedish port has to give Maritime Declaration of Health on special form.

PILOTAGE: See "Stockholm". Ships will be received 2 nautical miles North of the lighthouse Gustav Dahlen. The Pilot must be ordered on radio, telephone or in some other way at least 5 hours before piloting to start.

ANCHORAGES: 58° 38.7' N. 16° 22.5' E. Depth 70 ft.

RESTRICTIONS: Tankers loaded with more than 10,000 tons gasoline must not move in port at night-time. Tankers over 15,000 d.w.t. will not be shifted at night-time. Pampushamnen Oil Jetty: Tankers loaded with more than 10,000 tons must not enter at night-time. Inner Harbour: Tankers loaded with more than 15,000 tons must not enter at night-time.

MAX. SIZE: Pampushamnen Oil Jetty can berth vessel of about 45,000 d.w.t. with max. draft of 32.5 ft. MLW Gastgivarehagen Oil Jetty can berth vessel with a max. draft 26.5 ft. MLW and length 600 ft. Ramshall and Tallbracken Oil Jetty can berth vessel with max. draft 26.5 ft., MLW length 580 ft., breadth 80 ft., daytime only. General cargo quay (Ohmanskajen) can berth vessel max. draft 27.5 ft. MLW and max. LOA 195 m. Dry cargo vessels of 15,000 d.w.t. or more for Ohmanskajen daylight entry only. Dry cargo vessels of 25,000 d.w.t. or more should have bridge controlled main engines. Inner Harbour can berth vessel max. draft 20.5 ft.

Largest tanker at Pampushamnen, 65,405 d.w.t. LOA 236.66 m. Also see "Tankers".

RADIO: Stockholm Radio, Tingstade radio.

RADAR/VHF: VHF radio Channel 14 and 16. No radar.

TUGS: 3 tugs available, 1,680 b.h.p., 1,265 b.h.p. and 310 b.h.p. The 2 large tugs are icebreaking. Join vessel off St. Juten 58° 38.1′ N., 16° 19.6′ E. Ship's lines to be used. All towing is carried out subject to "Scandinavian Tugowners Standard Conditions of the year 1959 revised 1974".

BERTHING: No specific requirements except at Oil Jetty Tallbacken and Ramshall, which require daylight docking and undocking.

Berths specially equipped for grain, berths equipped for containers, berth for roll-on/roll-off traffic, berths handling liquid chemicals. 4,500 m. of quayage with depths of 5–10.5 m. and 6 oil jetties.

Roll-on Roll-off berths:

One Ro-Ro berth with a fixed concrete ramp and a water depth of 9 m. Loading and discharging by shore cranes may take place simultaneously with Ro–Ro operations. Sternloading vessels port side alongside.

One Ro–Ro berth with a fixed concrete ramp and a water depth of 8 m. for Ro–Ro operations only. Sternloading vessels starboard side alongside. One Ro–Ro berth with a fixed concrete ramp adjacent to the heavy lift crane specially designed for heavy loads. Water depth 9 m.

Djuron

Grain terminal, position 58° 38′ N., 16° 20.1′ E. 160 m. long concrete pier with a water depth of 13.5 m. MLW. Travelling grainloader with maximum loading capacity 500 tonnes/hour. Max. elevation above MLW 18 m.

Braviken

Paper Mill, Holmens Bruk AB. Position 58° 38.3′ N., 16° 16.1′ E. 126 m. long concrete pier with a water depth of 9 m. MLW. Mobile cranes for loading on request. Otherwise ships gear. Roll-on/Roll-off fixed concrete ramp 20 m. wide with a water depth of 7 m. MLW. Stern loading vessels starboard side alongside.

CRANES: All cranes are owned and operated by the Port Authority. These include 26 electrical transportable quay cranes with a capacity of 4–10 tonnes, two 25 tonnes cranes adapted for 20 ft. and 40 ft. container handling which together can lift 45 tonnes, two 25 tonnes mobile cranes, one fixed heavy lift crane with a maximum lifting capacity of 320 tonnes and one 4-tonnes floating crane.

STEVEDORES: Gangs must be ordered before 1500 hrs. day before arriving.

MEDICAL: Arranged by Agent. All services available.

TANKERS: *Pampushamnen:* Pier I: Depth alongside 10.5 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum and bitumen products. Permanent gangway for the use of tankers.

Pier II: Depth alongside 10.5 m. The berth is equipped with a crane for the handling of hoses, and 3 mechanical couplings and has pipe connections for all petroleum products. Permanent gangway for the use of tankers

Pier III (coastal tonnage): Depth alongside 7.5 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum products.

Fuel oil: one 18 in. and one 16 in. pipe-lines for discharging. 2 connections with 8 in. hoses. Gas oil: 14 in. pipes with 2 connections to 8 in. hoses. Asphalt: 10 in. pipes. Kerain: 10 in. pipes with 1 connection to 8 in. hose. Gasoline: 12 in. pipes with 1 connection to 8 in. hose. Connection to bigger or smaller hoses possible through existing flange-connections.

Pipe connections for discharging ballast water are installed at all piers at Pampushamnen. Receiving of ballast water is covered by ballastage. Ballast water containing any chemical agents not accepted.

Receiving capacity during the first hour is 650 cu. m. Thereafter, 150 cu. m./hr.

Tallbacken (Shell): Depth alongside 9 m. Beam of vessels restricted to 24 m. (78 ft. 9 in.) due to passage through the Handelo drawbridge. Vessels require own gear for the handling of hoses.

3 connections for variable kinds of oil, 8 in. hose connections.

Gastgivarehagen (Gulf): Depth alongside 9 m. The berth is equipped with a crane for the handling of hoses.

4 connections for variable kinds of oil, 8 in. hose connections.

FRESH WATER: Delivered by 1 water boat of 90 cu.m.

FUEL: All grades available. Notice: daytime not necessary.

DENSITY: 1000.

GANGWAY/DECK WATCHMEN: Watchmen are not necessary. Hose-watcher required during loading and discharging.

OPENING/CLOSING HATCHES: Decided from case to case.

CERTIFICATES: International Tonnage Certificate, Derating Certificate, Trade Certificate, and Radio Safety Certificate.

IDENTIFICATION CARDS: Not needed. Crew List to be used in Oil Jetties.

REPAIRS: Minor repairs can be effected.
DRY DOCKS: None.
AIRPORT: Norrkoping 80 km., and Stockholm 120 km.
HOLIDAYS: New Year's Day; Good Friday; Easter and Easter Monday; Labour Day (1st May); Whit Monday; Midsummer Day and Christmas Day.
POLICE/FIRE/AMBULANCE: Police 17100; Ambulance 90000; Fire 90000.
TELEPHONE: None available for placing on board.
SERVICES: None.
AUTHORITY: Hamnkontoret Nykoping.

NYNASHAMN: 58.55 N. 17.58 E. (See Plan Book)

OIL HARBOUR
DOCUMENTS:
2 Crew Lists, and 3 Crew Lists on Imco form.
3 copies General Declaration (form supplied on arrival).
Bill of Health.
Deratisation Certificate.
3 copies Cargo Manifest/Bills of Lading.
Tonnage Certificate.
Certificate of Nationality.
Stores and Personal Effects Declaration.
Tovalop Certificate.
RESTRICTIONS: Draft limited to 13 m. through the archipelago to the harbour.
MAX. SIZE:

Berth	*Max. Length of Vessel*	*Max. Distance Bow-manifold*	*Water Depth*
1	300 m.	140 m.	17 m.
		165 m.	15 m.
2	110 m.	60 m.	7 m.
3	250 m.	90 m.	12.5 m.
		105 m.	12.0 m.
4	120 m.	60 m.	12.9 m.
5	70 m.	—	*5.2 m.

*As far as 18.0 m. N.E. of the berth.

HEALTH: Vessels arriving from ports outside Europe must, for inward clearance, provide Customs Office with written declaration of freedom from infection. Further instructions will be issued by Customs Office when such declaration cannot be given.
RADIO: Stockholm Radio; call sign SDJ.
VHF: Channels 8, 9, 12, 13 and 16. Channels 8, 12 and 16 are portable and used during mooring operations.

Nynasoil on Channels 16, working 9 and 13.

BERTHING:

Berth No. 1: Loading arms: 3×12 in. for crude oil, 1×8 in. for bunker. Min. height of loading arms above sea level 2.5 m. Max. height of loading arms above sea level 23 m. Min. distance between connections of 2 loading arms 1.5 m.

Fresh water supply max. 15 t.p.h.

Ballast water can be pumped ashore at a max. rate of 300 cu.m. per hour.

Connection with the loading arms. Vessels usually berth starboard side alongside.

Berth No. 3: Loading arms: 1×10 in. for dirty oil. 1×10 in. for light fuel oil. 1×10 in. for gasoline. Min. height of loading arms above sea level 1 m. Max. height of loading arms above sea level 16.5 m. Min. distance between connections of 2 loading arms 1.5 m. Fresh water supply max. 15 t.p.h.

Ballast water can be pumped ashore at a max. rate of 300 cu.m. per hour. Connection with the loading arms. Vessels usually berth portside alongside.

Berth No. 2, 4 and 5: For coasters only. Jetty No. 2 and 4 are equipped with loading arms and hose connections of 6 in., 8 in. and 10 in. Jetty No. 5 hose connections only.

DENSITY: 1010.
FRESH WATER: Can be supplied from the piers. No barges.
FUEL: All grades can be supplied from the piers. No barges.
CUSTOMS ALLOWANCE: 200 cigarettes per person per week. 1 bottle of wine and spirits per person per week.
CONSULS: All consuls available at Stockholm.
REPATRIATION: Can be arranged.
AIRPORT: Nearest at Stockholm.
TIME: GMT plus 1 hour. Unchanged throughout the year.
SHORE LEAVE: No restrictions.
AUTHORITY: Nynashamnsraffinaderiet.

ORNSKOLDSVIK: 63.17 N. 18.43 E. (See Plan Book)

DOCUMENTS:
1 Crew List.
1 Passenger List.
4 Customs Documents.
1 Health Document.
1 Manifest.
1 Bill of Lading.
1 Ship's Paper.
PILOTAGE: Pilot station, Ornskoldsvik, tel. 0660/66003. 5 hours' notice. VHF Channel 16. Orange-coloured motor launch fitted with radar and VHF. International signals. Station 2 miles South Skagsudde Lighthouse. Pilots serve all ports between Umea and Harnosand, also sea Pilots and ice advisers for Gulf of Bothnia. (Also see "Stockholm").
ANCHORAGE: Ornskoldsvikfjarden 30–75 ft. Anchorage forbidden in area Raskarson-Malmon-Buron.
MAX. SIZE: Length, 700 ft.; breadth, 100 ft.; draft, 34 ft.

AIRPORT: Oskarshamn, 3 km. away, 2 flights daily to Stockholm.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Police, tel. 15090; Alarm, Police/Ambulance/Fire 90000.
TELEPHONES: Available, for connection on board.
SERVICES: Compass adjusting.
AUTHORITY: Hamnforvaltningen.

OTTERBACKEN: 58.57 N. 14.02 E. (See Plan Book)

DOCUMENTS:
2 Crew Lists.
1 Store List.
Ship's Register.
1 Manifest of Bill of Lading.
PILOTAGE: Pilotage is not compulsory. Pilot obtainable at Vanersborg.
ANCHORAGE: In the roads in depths from 16 to 19.5 ft., clay bottom, and in the bay E. of Storon from 18 to 16.5 ft., clay and sand bottom.
MAX. SIZE: All ships able to pass through the Trollhatte Canal with a max. draft of 16.7 ft. at MWL can enter the harbour.
HEALTH: No certificates required. In event of any disease or fever contact agent.
RADIO: All messages to Agent via Gothenburg Radio.
VHF: Port of Otterbacken can be reached by VHF Channel 16.
TUGS: Tugs available when icebreaking is necessary.
BERTHING: Gamla Kajen (old quay) Length of quay 374 ft. Depth alongside 13 ft.
Nya kajen (new quay) Length of quay 890 ft. Depth alongside 17-18 ft.
CRANES: One 50-ton fixed crane; two 7-ton travelling bridge cranes; two 10-ton movable diesel cranes; one 5-to 7-ton portal crane.
STEVEDORES: Provided by Speditionskontoret (Otterbacken) Ordinary working hours: From 0700 to 0900, 0930 to 1300 and 1400 to 1630.
MEDICAL: Hospital available.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Minor repairs only can be effected.
GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.
HATCHES: Opening/closing is normally carried out by the crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 0.75 litres spirits for each crew member.
AIRPORT: Karlstad 90 km; Gothenburg (Torslanda) 180 km.
TIME: GMT plus one hour.
HOLIDAYS: January 1st and 6th; Good Friday; Easter Monday; May 1st; Whitsuntide; December 25th and 26th.
POLICE/AMBULANCE AND FIRE: Tel. 90000
TELEPHONES: Not possible to place telephones on board. Telephones available at harbour office.
SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
AUTHORITY: Otterbackens Hamn A.B.

OXELOSUND: 58.40 N. 17.08 E. (See Plan Book)

PORT LIMITS: The seaward boundaries of the port is a line between the Eastern point of Ljungholmen and the ore quay. However, for ore-loading ships, a vessel is considered to be an "arrived vessel" when at anchor at the roads West of Vinterklasen.
DOCUMENTS:
4 Crew Lists (3 for Customs and 1 for Ship's Agent).
4 Passenger Lists, if passengers are not inserted in Crew List.
2 Customs Documents, showing all alcoholic liquors and tobacco, belonging to officers, crew and passengers.
2 Customs Documents, showing ship's store of alcoholic liquors and tobacco.
Health Documents, not necessary.
Manifests, at least 4 copies, normally only for general cargoes.
Bills of Lading, at least a copy if not otherwise stipulated.
Ship's Paper, Ship's Register and Deratisation Certificate, not older than 6 months.
PILOTAGE: (See "Stockholm"). Pilot station located at Havringe Lighthouse, tel. 0155/32920 or 30200. ETA required 5 hours in advance in order to avoid charge for waiting. When ships in open sea inform Pilot station over telephone, transfer over Stockholm Radio, call sign SDJ or Gothenburg Radio, call sign SAG, will be recommended. VHF Channel 16 can be used for contacting Pilot station or Pilot boat. Approaching vessel applies for Pilot when daylight with flag signal G and when dark with Pilot-light or Morse Code PT. Pilot boats orange. Ships advised to proceed by Northern inlet, where Pilot will board at Norra Krankan Lighthouse, Lat. 58° 37′ N., Long. 17° 27′ E. International requirements with respect to boarding and safety measures. Vessels awaiting for Pilot are prohibited to ride at anchor North of Lighthouse "Gustaf Dalen".
ANCHORAGES: Suitable anchorages West of Vinterklasen; clay-holding ground, depth 30–40 m., and between Beten Lighthouse and Harbour, clay-holding ground, depth 20 m. Ships are not allowed to berth until they receive orders and in the meantime they must anchor and await orders.
RESTRICTIONS: No tides. Draft not over 44 ft. 4 in. at mean water level. No other special restrictions with exception of berthing ships of and over 30,000 tons d.w.t.
MAX. SIZE: Ore loading berth: Vessels between 3,000 and 80,000 tons d.w.t. can be loaded. Depth at quay 45 ft. Berth for unloading coal, iron ore: Ships of up to 40,000 tons d.w.t. can be discharged. Depth at quay 39 ft. 4 in. Berth for general cargo: Depth at quay 32 ft. 10 in. Container terminal: Depth at quay 32 ft. 10 in. Oil pier: Oil carrier up to 80,000 tons d.w.t. can be berthed. Depth at quay 45 ft.
HEALTH: No special regulations.
RADIO: Stockholm Radio, call sign SDJ, or Gothenburg Radio, call sign SAG.
VHF: Harbour authorities and Clearance Department for ore loading ships has VHF Channel 16.
TUGS: Two modern combined tugs and ice-breakers of 1,680 and 1,260 IHP. Ship's lines to be used. Tugs normally join vessel near Beten Lighthouse, just near harbour.
BERTHING: Harbour Pilot compulsory and normally ordered by ship's Agent. No tides. Depths in harbour can vary occasionally from minus 1 ft. 6 in. to plus 1 ft. according to temporary alterations of mean water level. Ships of and over 30,000 tons d.w.t. cannot be berthed when dark.
CARGO-HANDLING FACILITIES: The port has, among other things, one ore quay equipped with a travelling ore-loader with an average capacity of 2,000 t.p.h. One quay for unloading coal, iron ore and similar equipped with two travelling cranes with a capacity of 600 t.p.h. One quay equipped for container-handling with a 35-ton travelling container crane of Paceco type. In connection with the container quay there is a 25 m. traverse ferry ramp equipped to accommodate roll-on/roll-off traffic.
STEVEDORES: No special ETA advice required. Master of ship with general cargo has to inform Agent in advance number of gangs required.
MEDICAL: Necessary for Agents to receive advance notice of required medical attention, informing Agent if doctor should meet upon ship's arrival, if ambulance is required for transport to hospital and promptness required. No special vaccination/fever certificates necessary. Hospital at Nykoping, about 8 miles from Oxelosund.
TANKERS: One tanker berth, depth at quay 45 ft. Connection to load/discharge lines, have diameter of 12 in. for products and 14 in. for heavy products. Almost all types of oils. No slop/residue/facilities.
DENSITY: 1006–1016, 75% fresh water. No tides.
FRESH WATER: Always available. Delivery through lines from quays at a rate of 10 t.p.h. Fresh water can also be delivered by tugs which have fresh-water tanks.
FUEL: All grades of heavy fuels can be delivered. At least one day's notice.
FIRE PRECAUTIONS: Watchman necessary loading/discharging gasoline.
GANGWAY/DECK WATCHMEN: When ship berthed, reliable gangway must be arranged to quay. Tankers discharging/loading gasoline must have watchmen, arranged through ship's Agent.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Usual international certificates. In order not to delay despatch, important that following certificates are available and valid: Measurement, Life-boat, Radio and Deratisation (not older than 6 months).
CUSTOMS ALLOWANCE: (Tobacco), each crew member permitted out of bond about 200 grams tobacco and 5 packets of cigarette-paper. (Wine and/or Spirits), each crew member is permitted to have out of bond 1 bottle spirits or 2 bottles of wine, if he is over 20.
CARGO GEAR: International certificates necessary. No additional requirements.
IDENTIFICATION CARDS: Not needed.
CONSULS: Denmark, Percy Tham AB, tel. 0155/30600; Finland, Percy Tham AB, tel. 0155/30600; Norway, Percy Tham AB, tel. 0155/30600.
REPAIRS: Minor repairs can be undertaken at workshop on No. 1 quay. Tel. 0155/30547.
DRY DOCKS: None.
REPATRIATION: Crew changes can be effected and necessary repatriation arranged by Agent.
AIRPORT: Arlanda 40.4 miles outside Stockholm. Distance Oxelosund–Stockholm 92.8 miles. Total distance 133.2 miles. Served by regular airlines.
TIME: GMT plus 1 hour. No alterations during year.
HOLIDAYS: General holidays on which no cargo work can be arranged: New Year's Day; Epiphany; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Christmas Day; Second Christmas Day; New Year's Eve; Whitsun Eve; Midsummer Eve; Christmas Eve.
POLICE/AMBULANCE/FIRE: Dial tel. 90 000 and ask for "Police-alarm", "Ambulance" or "Brandalarm" (Fire alarm).
TELEPHONES: Arrangements for placing telephones on board exist at berth Nos. 9.5 and 10. Cost for connection is charged per day.
SERVICES: No tank-cleaning equipment or facilities for discharge of tank-washings.
SHORE LEAVE: No restrictions.
REGULATIONS: Ice-breaking dues equal to harbour dues are charged 21st December-20th March each year.
DELAYS: Normally no delays. Modern installations for loading and discharge.
AUTHORITY: Port is owned by the railway company, TGOJ, Eskilstuna. Local Authority: TGOJ, Harbour Office.

PITEA (Incl., Haraholmen, Pitsundet): 65.19 N. 21.29 E. (See Plan Book)

DOCUMENTS:
2 Crew Lists.
2 Lists Spirits and cigarettes.
Manifests and Bills of Lading of incoming cargoes to be presented to Customs.
1 Deratting Certificate.

PILOTAGE: Pilot to be taken at Gaasoeren-Skelleftea district. Must be ordered at least 5 hours prior arrival. All VHF Channels used - also onboard pilot-boats. (Also see "Stockholm".)

Outward-bound vessels must order Pilot from Harbour Office during office hours.

Signal station at Pitsund.

ANCHORAGES: Accordance Pilots advice.

RESTRICTIONS: No entry in darkness to smaller ports in district.

MAX. SIZE: Max. size through Pitsundet draft up to 22 ft. Max. draft to Skuthamn 22 ft. and Pitea Town 17 ft. To Pitea max. about 3,000 d.w.t. No tides. Also see "Berthing".

HEALTH: No special restrictions. Diseases must be reported to Customs before entering port.

RADIO: Stockholm Radio, Hornosand Radio.

Radar and VHF on all stations. VHF also at signal station in Pitsundet – entrance to Pitea. Channel 16 only. Harbour Office, Channels 16, 9 and 13.

TUGS: Tugs available if ordered beforehand. Tugs compulsory for larger vessels. Costs for three tugs about Skr 15,000.

BERTHING: At Pitea, larger vessels berth in daylight only.

Haraholmen: Quay recently completed, length 600 m. plus Ro/Ro ramp, depth 12.5 m., max. draft 11.5 m. Quay is equipped with electricity, telephones, water and oil. Quay is very strong, capable of taking loads up to 250 tons.

Harbour is specially built for all year round traffic. Eight propeller engines are installed under the quay to keep water running and quay ice-free. Special lights are installed to assist in bad visibility.

Quay is equipped with 2 "*Asea*" cranes of 12.5 tons and 19.5 m. outreach.

STEVEDORES: Bottenvikens Stuveri AB – Pitea. Labour must be ordered latest at 1400 hrs. for morning start following day. Tariff available from Agents.

MEDICAL: All treatments available without notice.

TANKERS: Only one berth at Haraholmen. Max. draft 37 ft. 10 in. FW. No further restrictions. 3 tugs compulsory for vessels over 15,000 d.w.t.

FRESH WATER: Available by pipe and lorries.

FUEL: All grades available.

GANGWAY/DECK WATCHMEN: Not necessary but available if ordered.

OPENING/CLOSING HATCHES: Normally done by ship's crew.

CUSTOMS ALLOWANCE: (Tobacco), 200 cig./man per week. (Wine and Spirit), 1 bottle man/week. Only crew members over 18.

IDENTIFICATION CARDS: Not needed.

CONSULS: None.

REPAIRS: All types of repairs can be effected.

DRY DOCKS: None.

AIRPORT: Regular flights 9 times per day. Kallax Airport at Lulea. Distance 50 km. from port. 60 minute flight to Stockholm.

TIME: GMT plus 1 hour. No alterations during year.

POLICE/AMBULANCE/FIRE: Tel. 90.000.

TELEPHONES: Facilities for placing on board available.

GENERAL: Masters to note the signals to be given before passing Pitsundet. Master must not forget that Pilot must be taken at Gaasoeren-Skelleftea district. If Pilot on bridge all way from Skelleftea to Pitea, a distance fee is charged. Piloting from Nygraan Lighthouse (entrance Pitea) only normal fee.

AUTHORITY: Hamnkontoret Pitea, Sjofartshuset-Haraholmen.

RONNEBY: 56.10 N. 15.17 E. (See Plan Book)

DOCUMENTS:
2 Number of Crew Lists.
2 Passenger Lists.
4 Customs Documents.
1 Health Documents.
2 Manifests.
1 Bill of Lading.

PILOTAGE: Pilot is taken at Karlshamn or Aspo (Karlskrona) pilot stations. Tel. Karlshamn 0454/14102, Aspo 0455/29016. Ordered over Karlskrona Radio on 3289 kHz or by VHF on Channel 16 (156.80 mc). Pilot should be ordered 5 hours in advance. (Also see "Stockholm").

ANCHORAGE: Open roads.

MAX. SIZE: Limited by depth in fairway: 20 ft. 9 in.

RADIO: Karlskrona Radio, 2182 kc/s.

VHF: VHF call sign Ronnebyhamn, Channel 16, 12, 13.

TUGS: None, when necessary such ordered from Karlsham or Karlskrona.

STEVEDORES: ETA given to ship's Agent sufficient.

MEDICAL: Medical attention required ordered from Agents.

TANKERS: Only small tankers with max. draft 20 ft. 6 in. 1×10 in. and 1×6 in. line. No facilities for residue discharge.

DENSITY: 1000. No tide.

FRESH WATER: From water post on quay.

FUEL: Diesel oil from tank-lorries.

OPENING/CLOSING HATCHES: Performed by crew.

CERTIFICATES:
Deratisation Certificate not over 6 months old.
Certificate of Nationality.
Certificate of Tonnage.

CUSTOMS ALLOWANCE: 200 cigarettes plus 1 bottle spirits out of bond.

IDENTIFICATION CARDS: Not needed.

CONSULS: Danish Consulate, tel. 0457/10675.

REPAIRS: Minor repairs only.

DRY DOCK: None.

AIRPORT: About 6 miles from Ronneby Harbour; daily flights to Malmo, Stockholm and Visby.

TIME: GMT plus 1 hour. Permanent.

POLICE/AMBULANCE/FIRE: Police 90000; Ambulance 90000; Fire 90000.

TELEPHONES: Telephone box on Quay.

AUTHORITY: Ronneby Hamnstyrelse (Harbour Board).

SIKEA: 64.09 N. 20.59 E.
SHIPPING HAS CEASED AT THIS PORT.

SKELLEFTEHAMN: 64.41 N. 21.15 E.

DOCUMENTS:
2 Copies of Crew Lists (at Ronaskarsverken 3 copies).
List of Provisions.
Measure Bill.
Manifests and Bills of Lading.

PILOTAGE: Telegraphic address: "Pilot station. Skelleftehamn". Advance notice required, 5 hours. Contact pilot boat or pilot station on VHF Channel 16. Calling signal "Skelleftea Pilot" (pronounced – Shellefteo Pilot). Pilot motor boats usually orange. Pilot taken on board 2 miles East of Gasoren Lighthouse. (Also see "Stockholm".)

RESTRICTIONS: No tides or tidal current.

MAX. SIZE: Maximum permissible length of tanker 590 ft. in accordance to dredged basins length.

HEALTH: In case of disease or suspected disease, ship should call for medical assistance in common Swedish order.

RADIO: Stockholm Radio or Harnosand Radio. When in reach of VHF station of harbour office, at 0830–1200 hrs. and 1300–1700 hrs., or else through pilot station VHF. Call signals "Skelleftea Hamnradio" or "Skelleftea Pilot Station".

RADAR/VHF: Radar service available when entering or leaving port. Contact Pilot station (Channel 16).

TUGS: Normally meet at passage of Gasoren Lighthouse. Ship's lines should be used. Tug of 3,000 h.p. also acts as local icebreaker.

BERTHING: No special requirements. *Kage:* Depth in harbour at quay 23/20 ft.; length 609 ft. *Ronnskarsverken:* Southern quay (jetty), depth 30.5 ft.; length 394 ft. Northern quay, depth 42/19.4 ft. and length 1,814 ft. *Skelleftehamn:* North quay, depth 26/21 ft. and length of 1,300 ft. Oil Terminal, (jetty), depth 34 ft. and length 210 ft. with dredged basin of 656 ft. Orviken, depth of 12 ft. along a wooden wharf of a length of 200 ft. Siporex, quay depth 19.7 ft. and a length of 150 ft.

Ronnskarsverken. Northern quay, depth 42/19.4 ft. Bjuroklubb. Length 230 ft., depth 17.5 ft.

STEVEDORES: No stipulated ETA regulations.

MEDICAL: Available at short notice. Government hospital in town.

TANKERS: One tanker berth. Max. draft 33 ft. Diameter of discharge lines 8 in. Flanges Din 2633.

FRESH WATER: At oil terminal 25 t.p.h. Elsewhere 15 t.p.h. except at Ronnskarsverken, where fresh water delivered by road tanker.

FUEL: All usual grades available.

FIRE PRECAUTIONS: Standard.

DEVELOPMENTS: Planned to build jetty for drafts of about 42.5 ft.

GANGWAY/DECK WATCHMEN: Watchmen recommended.

OPENING/CLOSING HATCHES: Carried out by crew.

CERTIFICATES: See "Stockholm".

CUSTOMS ALLOWANCE: (Tobacco): 200 cigarettes. (Wine Spirits), 1 bottle of wine and 1 bottle of spirits.

CARGO GEAR: No additional requirements.

IDENTIFICATION CARDS: Not needed.

CONSULS: Denmark, Norway, Finland and Netherlands.

REPAIRS: Minor repairs only. Patent slip, max. size 1,000 tons displacement.

REPATRIATION: Every kind of facility for effecting changes of crew.

AIRPORT: 18 km. Regular airlines, 2 flights a day.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: New Year's Day; Good Friday; 1st and 2nd Day of Easter; Ascension Day; 1st and 2nd Day of Whitsuntide; 1 May; Midsummer Day; and 1st and 2nd Day of Christmas. Cargo work cannot be arranged.

POLICE/AMBULANCE/FIRE: 14070, 31080; 90000; 17200.

TELEPHONES: Available for placing on board at the Northern quay in Skelleftehamn.

GENERAL: All waste to be taken to special waste containers ashore.

SERVICE: Small amounts of tank-washings can be taken ashore. Compass adjusting carried out. Tug stationed in harbour.

DELAYS: In exceptionally bad weather.

AUTHORITY: Harbour Board of Skelleftea.

SKREDSVIK: 58.25 N. 11.30 E.

Oil-harbour in the Lysekil area.

DOCUMENTS:
3 Crew Lists, on Imco form.
1 Cargo Manifest.
1 Copy Bill(s) of Lading.
1 Stores List.
1 Personal Effects List.
Derat Certificate.
Tonnage Certificate.
Certificate of Registry.

PILOTAGE: Pilot station at Lysekil, tel. 0523/60800. VHF Channel 16. Five hours' notice of ETA required. Pilot vessel is an orange-coloured motor launch fitted with radar and VHF. International signals. Pilot boards between Gaeven and Tovas Ungar, about 6 miles West of Lysekil.

ANCHORAGE: Gullmarsfiord, South-East of Lysekil, depth about 60 m.

RESTRICTIONS: Draft not to be in excess of 40 ft. on passage from Pilot to Skredsvik.

MAX. SIZE: Length 180–190 m. draft 10.0 m. No limit on breadth.

TUGS: Have to be ordered either from Gothenburg or from Uddevalla.

FRESH WATER: Can be supplied from the pier.

FUEL: Can be supplied from the pier.

CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle spirits or wine per person per week.

IDENTIFICATION CARDS: Not required.

TELEPHONES: Police 0522/14920, or 0524/10068 and 90000; Ambulance and Fire 0522/10051, or 0524/10550 and 90000.

AIRPORT: Nearest at Gothenburg.

TIME: GMT plus 1 hour.

SHORE LEAVE: No restrictions, but photographing ashore is not permitted.

AUTHORITY: OE.E.F. Skredsvik.

AGENT: Ferm & Olsson AB. Post Box 66, 45300 Lysekil. Tel. nos. 0523/14060. Telex: 42080. Cables: "Fermson" Lysekil.

SLITE, Gotland Is.: 57.42 N. 18.50 E.

DOCUMENTS:
Crew Lists.
Customs Documents
Health Documents.
Bills of Lading.
Measurement Bill.
National Certificate.
Valid Derat Certificate.
All compulsory (also see "Stockholm".)

PILOTAGE: Service centralised to main station at Visby. Service day and night. Tel. 0498/10138. 5 hours notice required VHF Channel 16 (also see "Stockholm").

ANCHORAGE: Sheltered anchorage on Inner Road with up to 8.4 m. depth of water.

RESTRICTIONS: No restrictions. Entrance possible day and night.

MAX. SIZE: Draft not to exceed 21 ft. 6 in. alongside for cargo vessels. The depth at the entrance was in May 1978 increased from 7.2 m. to 8.4 m. Depth alongside remains at 7.2 m. except for vessels berthing at Bulk cement berth where depth is 8.4 m.

HEALTH: Restrictions only if fever on board or vessel coming from a port where disease or fever in existence.

RADIO/VHF: Tingstade Radio Station, call sign SAE, VHF see "Pilotage".

TUGS: No tug available.

BERTHING: No restrictions if due notice to Port Authority given.

STEVEDORES: Notice to be given latest noon on day before arrival, order to make start next morning (unless special arrangements or agreements made).

MEDICAL: Attention by doctors-in-charge. Central hospital at Visby.

TANKERS: Pipe-line connection flange 8 in.

FRESH WATER: Available alongside quay.

FUEL: Practically all grades bunker oil available subject prior notice.

GANGWAY/DECK WATCHMEN: Not compulsory but available.

OPENING/CLOSING HATCHES: Ship's crew to open or close.

CUSTOMS ALLOWANCE: Presently 200 cigarettes per head/week. Practically no spirits allowed out of bond.

IDENTITY CARDS: Seamen's book or passport if travelling outside port area.

CONSULS: No consul representations at Slite. Nearest consuls (for Denmark, Norway, Finland, West Germany) at Visby.

REPAIRS: Only minor repairs possible.

DRY DOCKS: None.

REPATRIATION: Good possibilities for changing crew.

AIRPORT: About 40 km. to Visby Airport.

TIME: GMT plus 1 hour. Permanent.

TELEPHONE: Alarm tel. 90 000.

SERVICES: No services for tank-cleaning, tank washing, or compass adjusting.

SHORE LEAVE: Permitted.

AUTHORITY: Cementa AB.

AGENT: Atktiebolaget Rob. Myrsten, 620 30 Slite, Telex 4137 – A/S Myrsten. Cables: "Myrsten – Slite." Tel. 0498/20001/02/03. After hours 0498/20102/20021/20634.

SODERHAMN: (includes Stugsund, Langror oilberth, Sandarne factory berth and Orrskar woodchip berth.) 61.18 N. 17.05 E. (See Plan Book)

DOCUMENTS:
2 Crew Lists.
3 Bills of Lading.
3 Manifests.
1 Tobacco List.

PILOTAGE: Pilot must have 5 hours notice. Telegraphic address "Soderhamn Pilot Station", Ljusne. VHF Channel 16 for calling pilot boat and pilot station (frequency 156.8 mHz). and 13 (frequency 156.656 mHz). Pilot boat is orange. International signals to be used. Vessels can normally receive Pilot between Hallgrund and Storjungfrun. In case of bad weather or ice, Master consults Pilot for advice (also see "Stockholm").

ANCHORAGE: Lilljungfru anchorage S.W. Lilljungfrun, where depths are 15–20 m., is W. or S.W. of Norrutharet. Branthalls anchorage W. Branthall isl., depths 10–15 m.

MAX. SIZE: Langror oil berth. Breadth of entrance fairway 55–60 m. and depth 8.5 m. at mean level. Max. ship length about 170 m. at the quay.

Orrskar: Woodchip terminal, breadth of entrance fairway 110 m., depth 13 m. m.l.
Sandarne. Breadth 30 m., depth 7.2 m. m.l. 55–60 m. in unlit fairway.
Stugsund. Breadth 30 m., depth 6.2 m. m.l.
Soderhamn. Breadth 10–15 m., depth 3.7 m. m.l.

Depth varies about 1 foot below and 1 foot above m.l. Breadth given at narrowest point in fairway.

HEALTH: No special action except for suspected disease. In case of disease contact Agent for information.

RADIO: Stockholm Radio when vessels come from South and Harnosand Radio from North. Within reach Master may call Soderhamn Port Radio. Tug station is Stugsund. Tug fitted VHF, Channels 16, 13, 12.

There is a radar station at Soderhamn. Pilot station, Ljusne, and some of the pilot boats are fitted with radar.

TUGS: Normally meet large vessels at Otterhallans Lighthouse and others off quays on request. Ship's lines to be used.

BERTHING: Boatmen can be ordered by Pilots or Agents. Large ships berth oil berth only in daylight because channel not lit.

STEVEDORES: Gangs to be ordered by Agent usually at 1500 hrs. for starting next morning at 0700 hrs.

MEDICAL: Medical attendant available day and night.

TANKERS: 6-in. or 8-in. connections. Only 1 berth and max. depth at quay 8.5 m.

DENSITY: Practically fresh water.

FRESH WATER: Available in all ports. Delivered through pipe-lines on wharf. Rate: 10 t.p.h.

FUEL: Any normally used grade on request to oil company with few hours' notice.

DEVELOPMENTS: A new quay at Langror berth for general cargo will be established in a few year's time.

GANGWAY/DECK WATCHMEN: Watchmen available.

OPENING/CLOSING HATCHES: Normally carried out by crew.

SHIP'S CERTIFICATES: Traffic permission (not necessary for ports within the custom district boundaries), Nationality and Reg. Certificate (or interim Nationality Certificate), Bill of Measurement, Swedish Sailor's Roll (only Swedish ships), Foreign Nation Crew Passport, Derat Certificate (6 month), Certificate of Health.

CUSTOMS ALLOWANCE: (Tobacco), out of bond, 200 cigarettes or 100 gr. tobacco and 100 cigarettes. (Wine/Spirits), out of bond, 1 bottle of spirits, 75 cl.

CARGO GEAR: Valid cargo gear certificates.

IDENTIFICATION CARDS: Not needed.

CONSULS: Danish, French and Dutch.

REPAIRS: Minor plate-work and welding can be carried out.

REPATRIATION: Facilities exist for effecting crew changes.

AIRPORT: Nearest international airport. Stockholm.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: No work on official holidays, but may be possible on special request. New Year's Day (1st January); Twelfth Day (6th January); Good Friday; Easter Sunday and Easter Monday; 1st May; Whit Sunday and Whit Monday; Midsummer Day; All Saints' Day; 25th December and 26th December; New Year's Eve; Easter Eve; Whitsun Eve: Midsummer Eve: Christmas Eve.

POLICE/AMBULANCE/FIRE: Police 90000 or 0270/10020; Ambulance 90000; and Fire 90000 or 0270/12249.

TELEPHONES: In Sandarne, quay telephones can be placed on board. 2 telephones.

GENERAL: There is a VHF port radio at the Port Office, Soderhamn. Working time 0800–1700 hrs. Channel 16 for call and working Channel. During the ice-breaking season the tug may be out even at night. Tug has same Channels. Soderhamn custom district includes only Stugsund. Illjungfrun Pilot also serves ports of Ala, Ljusne and Vallvik.

SERVICES: Facilities for discharge of tank-washings max. 20 tons. Tank-cleaning and facilities for discharge of tank-washings of great extent are Stockholm and Sundsvall. Compass adjusting in Stugsund berth.

REGULATIONS: Port regulations available from Agent or Port Office.

DELAYS: Fog, ice and bad weather may delay berthing. Rain and snow can delay loading and discharging of dry cargo.

AUTHORITY: Hamnforvaltningen.

SOLVESBORG: 56.03 N. 14.35 E. (See Plan Book)

DOCUMENTS: See "Stockholm".

PILOTAGE: Pilot station at Ahus, tel. 044/240027, needs 5 hours notice. Pilot station and pilot boat can be ordered by VHF Channel 16 (156, 80 mHz). Harbour office in Solvesborg can be called on same frequency. (Also see "Stockholm".)

ANCHORAGE: Roadstead to South of harbour 25 ft. deep with good holding ground.

MAX. SIZE: Depth in outer harbour 8.2 m. (27 ft.) and in inner harbour 7.5 m. (25 ft.) Recommended for ships to have 1 ft. 6 in. of water under keel. Max. length 170 m. (656 ft.) Breadth 30 m. (98 ft.). Draft 7.7 m. (25 ft.) for vessel entering harbour. Largest ships to enter harbour were 26,000 tons oil tanker with load of 16,000 tons and 30,000 ton dry cargo ship loading 5,000 tons of pulp.

HEALTH: See "Stockholm".

RADIO: Stockholm Radio and Gothenburg Radio.

VHF: Harbour Office can be reached by VHF, Channel 16 (156.80 mHz). Working frequency Channel 14 (15.70 mHz).

TUGS: Available. Ordered through Agent or directly to Harbour Office.

BERTHING: *Roll-on/Roll-off Quay:* Depth in Roll-on/Roll-off harbour 6.0 m. (19.69 ft.).

STEVEDORES: Need notice before 1500 hrs. if loading/discharging shall start at 0730 hrs. following morning, or notice before 1000 hrs. if loading/discharging shall start 1300 hrs. the same day.

TANKERS: 3 Shore-lines for oil products from oil jetty to depots. 1. 250 mm. for bunker C (2nd fuel); 2. 200 mm. for paraffin oil; 3. 200 mm. for petrol. For discharge coasters use ship's equipment. Bigger ships discharging bunker C oil use harbour's 8 in. rubber hose.

FRESH WATER: Fresh water available.

FUEL: Ordered from oil companies by ship's Agents.

GANGWAY/DECK WATCHMEN: Watchmen normally not needed. Can be ordered by ship's Agents.

OPENING/CLOSING HATCHES: Normally opened/closed by crew.

SHIP CERTIFICATES: See "Stockholm".

CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes/week per head. Wine/spirit: normally 1 bottle/week.

IDENTIFICATION CARDS: Not needed.

CONSULS: Royal Danish Vice-Consulate. Railway Station Building. Tel. 0456/10115.

REPAIRS: Carried out by Solvesborgs Shipyard. Tel. 0456/10950.

DRY DOCKS: Dry dock in ship yard, 341 ft. long, 51 ft. wide at entrance, 14.5 ft. deep on sill HWOST.

Floating dock with 6,000 tons lift capacity, 476 ft. long 65 ft. wide and allows ship's draft to be 19 ft. (For ships up to about 10,000 d.w.t.).

REPATRIATION: Possible.

AIRPORT: 50 km. to Kristianstad Airport and 60 km. to Ronneby Airport. Served by regular inland airlines.

TIME: Local time is GMT plus 1 hour. Permanent.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Dial 90 000 and ask for Police, Ambulance or Fire Department.

TELEPHONES: Telephones available in Agent's offices at quay and telephone boxes.

DELAYS: Normally no delays.

AUTHORITY: Solvesborgs Hamn.

STENUNGSUND: 58.04 N. 11.49 E. (See Plan Book)

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists.
1 Tobacco and/or Stores List.
1 Manifest.
1 List of Animals on Board (if any).
Access to the usual ship's papers (measurement, register, certificate, etc.).

If away from Sweden more than 15 days: Bill of Health.

PILOTAGE: Pilots board West of Skallen Lighthouse outside Marstrand. Pilots will not take big ships during darkness. Those ships must anchor and await daylight. Calling for Pilot can be made in usual manner and on VHF, Channel 16. Give 24 hours notice of ETA through Agents. (Also see "Stockholm".)

ANCHORAGE: While awaiting berth vessels anchor outside harbour N.W. of jetty. Safe anchorages everywhere, but fairway South of Galteron Lighthouse has to be avoided.

RESTRICTIONS: Large vessels daylight entry only.

MAX. SIZE: 65,000 d.w.t. Draft at berth is only limit, 12.7 m. at North side, and 11 m. at South side of jetty at mean water level.

HEALTH: No special pratique necessary. If any disease or fever suspected on board, doctor must be called on arrival. Pratique automatically granted when entering from another port in Sweden.

RADIO: Gothenburg radio.

VHF: Channel 16.

TUGS: Tugs from Gothenburg will join at bridge South of harbour. Ship's lines always used.

MEDICAL: Doctors and dentists available at short notice. Hospitals situated at Uddevalla and Kungalv, ambulances at Stenungsund.

TANKERS: 8 in. hoses at jetty. At North side of jetty tankers berth starboard side to, and at South side port side to. 4-ton crane situated on jetty but ship's derrick also used for hoses.

FRESH WATER: Supplied by hose at a rate of 25 t.p.h.

FUEL: Only available by barge from other places (i.e. Gothenburg). Bunkering only during daylight. Can be ordered at short notice.

FIRE PRECAUTIONS: Normal.

GANGWAY/DECK WATCHMEN: Watchmen from ashore necessary when telephone connected.

CUSTOMS ALLOWANCE: 200 cigarettes. 1 bottle of spirits.

IDENTIFICATION CARDS: The gate is TV-guarded. Each Crew member must carry a Passing Permission allowing passage of gate. Required number of permissions will be handed over to the Master by the Agent at ship's arrival.

CONSULS: None at Stenungsund, but at Gothenburg.

REPAIRS: Some minor repairs may be effected.

REPATRIATION: All facilities exist. Consuls at Gothenburg.

AIRPORT: Gothenburg 50 km. away. Regular airlines.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: Tankers load and discharge all year round.

TELEPHONES: Connected on board if required. Watchmen attend calls. Fireman and alarm on jetty during whole operation.

AUTHORITY: Statens Vattenfallsverk.

STOCKHOLM: 59.19 N. 18.03 E. (See Plan Book)

DOCUMENTS:

(*a*) Crew List; normally 2 copies; for oil harbour at Loudden and Free Port, 3 copies.
(*b*) Passenger List: regular passenger services 2 copies; cruise ships (lists for cruise ships must be sent in advance to Agent for forwarding to Immigration Authorities), 2 copies.
(*c*) Customs Documents: Arrival report (form can be obtained on arrival), 4 copies.
(*d*) Quarantine Certificate or Bill of Health: Deratisation Certificate not more than 6 months old to be shown. *Note:* Additional quarantine regulations may be imposed in special circumstances.
(*e*) Manifest: 3 copies.
(*f*) Bills of Lading: 1 copy of each. Liners may be subject to other regulations with regard to (*e*) and (*f*) above.
(*g*) Ship's documents: Tonnage Certificate. Certificate of nationality.

PILOTAGE: *(Sweden General).* Applications for licensed Pilots should be made at least 5 hours before pilotage is due to commence. When making application specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable make application by telephone, or by radio via a coastal station or by some other method direct to Pilot station nearest point where pilotage is to begin. Also possible request Pilot by VHF (ultra shortwave) telephone to any Maritime Service Pilot station, Pilot waiting point or lighthouse which is equipped with VHF.

The Maritime Service's network of permanent VHF telephone stations has been extended to give almost complete coverage of all pilot stations and waiting points and is also operative for a number of lighthouses. The radio stations can operate on different Channels and are equipped for frequency modulation. During hours when pilot stations are open, a constant watch is kept on frequency 156.80 mc/s (Channel 16). This frequency should be used for all signals and replies – and for distress traffic. Outside these hours, normal traffic transmissions, i.e. applications for Pilots, etc. should be made on frequency of 156.65 mc/s (Channel 13) or on reserve operating frequency of 156.60 mc/s (Channel 12).

When making VHF telephone call, the type of call signal that should be sent is "Lotsarna (or pilot station) plus the name of the pilot station or the pilotage attendance".

	Arholma	*Sandhamn*	*Landsort*

HEALTH: Vessels arriving from ports outside Europe must for inward clearance provide Customs Office with written declaration of freedom from infection. Further instructions will be issued by Customs Office where such a declaration cannot be given.

RADIO: Stockholm Radio, call sign: SDJ.

RADAR/VHF: All 3 pilot stations have radar for internal use. No harbour radar service. VHF Channels 16 and 12.

TUGS: Very large vessels may be met by tugs by special arrangement at pilot boarding point. Tugs available to special order to assist with berthing; the rendezvous usually near berth.

Rates: According to fixed tariff.

BRIDGES:

RULES CONCERNING VESSELS CROSSING SEALANE AT LIDINGO BRIDGE

In force as from 1st May 1970 until further notice. Movable part of Lidingo Bridge is opened after request for letting vessels pass through 5 minutes before full-and half-hour, in accordance with following table.

October–April: Weekdays except day before Sunday or holiday, 0825 – 1600 hrs.

May–September: Every day 0825 – 1600 hrs.

Vessels in regular traffic may pass the bridge at other times than those stated above after application to the bridgekeeper during working hours, before 1300 hrs. if the passage is to take place the same day.

The passage is free of charge.

HOURS FOR OPENING FOR MOVABLE ROAD BRIDGES OVER HAMMARBY SEALANE

Movable parts of road bridges over sealane of Hammarby opened on request for vessel unable freely to pass under the bridges, all through the year at regular hours.

BERTHING: Services of boatmen available any time day or night. *See Table overleaf.*

STEVEDORES: Stevedores available at 0700, 0930, 1100 and 1330 hrs., Stevedores required for 0700 hrs. must be booked previous day: otherwise can be booked for next starting time.

MEDICAL: Duty medical officer available all hours day or night. Tel. Stockholm 21 55 49, 11 83 31 or 20 30 91. Seamen admitted to hospital with note from Medical Officer for Seamen, but not necessary for emergency admissions. Valid certificates of vaccination must be produced. Any necessary vaccinations carried out by Medical Officer for Seamen.

TANKERS:

Tanker discharge quay	*Diameter of discharge pipe-lines* in.	*No. of tanker berths*	*Depth of water at quayside* ft. in.
Bergs oil harbour	12–20	1	43 0
Flaxenvik	12	1	35 08

Stora Hoggarn	6–10	1	38 08
Telegrafberget	6–8	1	39 04
Vartan	8–10	3	24 08–36 00

DENSITY: Salt content of 0.5%. No variations.

FRESH WATER: Fresh water may be obtained from quayside as well as from water barges or tugs. 1,000 cu.ft. per hour can be delivered from quayside, but at Loudden max. 3,500 cu.ft. per hour can be delivered. Water supply capacity of tugs and waterboats varies up to max. of 1,750–5,250 cu.ft. per hour. Special delivery charges payable for delivery of water to tanker discharge quays outside Port area by water-boat.

FUEL: All grades bunker oil, lubricating oil, etc. can be supplied.

GANGWAY/DECK WATCHMEN: Not essential, but recommended for large tankers.

OPENING/CLOSING HATCHES: If opened and closed by stevedores, subject to extra fee.

CERTIFICATES:
Tonnage Certificate.
Certificate of Nationality.
Deratisation Certificate not more than 6 months old.
Ship's articles, crew list or similar document listing all persons signed on aboard.

CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes per person per week or 200 g. (7 oz.) of tobacco per person per week. Wine and/or spirit: One bottle of spirits per person per week, one bottle of wine per person per week.

CARGO GEAR: Cargo vessels carrying goods which constitute a fire or explosion hazard or other flammable or otherwise dangerous goods must notify Port Authorities in advance the nature and quantity of goods concerned. In certain cases a red flag or red light must be carried at mast head.

IDENTIFICATION CARDS: Passport or seaman's discharge book with photograph.

REPAIRS: All types of deck and machinery repairs can be carried out.

DRY DOCKS: Gustav V Dock, length 598 ft., width 79 ft., depth 31 ft. Also 3 other dry docks and 5 floating docks.

REPATRIATION: Crewmen may be signed-on and paid-off. Whether paid-off crewmen will be allowed to remain in the country and seek new employment, depends on existing bilateral agreements between countries. Generally, only a citizen of a Scandinavian country may seek work in Sweden without a special labour permit.

AIRPORT: Arlanda, approx. 22 miles from central Stockholm. Served by regular airlines.

TIME: GMT plus 1 hour. Unchanged throughout year.

HOLIDAYS: New Year's Day (January 1st); Epiphany (January 6th); Good Friday (variable Friday in March/April); Easter Monday (variable Monday in March/April); May 1st; Ascension Day (variable Thursday in May/June); Whit Monday (variable Monday in May/June); Midsummer Day (variable Saturday in June); All Saint's Day (first Saturday in November); Christmas Day (December 25th); Boxing Day (December 26th). No work is normally done on these days.

POLICE/AMBULANCE/FIRE: Tel. 90 000.

TELEPHONES: Ship-to-shore telephone connections can be provided at most quays.

GENERAL: Degaussing station available.

SERVICES: Electric current can be laid on at some quays. Port has a special barge for collection of oil residues. Licensed compass adjusters available.

SHORE LEAVE: No restrictions.

DELAYS: Occasionally shortage of stevedores. Some delay may be caused by ice, but port kept permanently open by ice-breakers.

AUTHORITY: Stockholms Hamn.

STORUGNS, Gotland Is.: 57.50 N. 18.48 E.

(See Plan Book)

Situated on Eastside of Bay of Kappelshamn on the North coast of Gotland.

DOCUMENTS:

Vessels arriving from foreign ports shall have the following documents:

1 Crew Manifest.
1 Stores List.
3 Crew Lists.
Tonnage Certificate.
Certificate of Nationality.
Declaration of Health (Deratisation Cert.), not older than 6 months. Not applicable to vessels from Scandinavian ports.

NOTICE OF ARRIVAL: On which the loading turn number is based, should be given when the vessel has passed Lat. 57° 52′ N. The notice can be given by VHF (Storugns harbour radio) or by telephone 0498/27160 (outside normal working hours by telephone only).

Vessels may not berth without permission of the Company.

PILOTAGE: Pilot who boards in the outer approaches and should be ordered at least 5 hours in advance by tel. 0498/27010 or 10138. Pilots keep watch on VHF Channel 16.

ANCHORAGE: With good holding ground. Vessels waiting in the roads should keep watch on VHF Channel 16 during ordinary harbour working hours.

Ships lying in the roads shall anchor so that in-going and outgoing vessels can pass without hinderance or risk. Anchoring in Kappelshamnsviken in the area between Lat. 57° 51′ N. and an E.W. line 200 m. South of the quay's Southernmost point is prohibited unless permission is obtained from the Company.

RESTRICTIONS: The harbour can be entered at all times regardless of wind direction except during strong Northerly winds.

The bay is normally ice-free. During exceptionally cold spells with Northerly winds traffic may be temporarily stopped or hindered by ice-floes.

MAX. SIZE: Depth at entrance and at quay 10 m. Vessels up to 20,000 tons have loaded to full draft. Max. draft 9.2 m.

HEALTH: No restrictions provided no disease or fever on board and vessel not arriving from port where disease or fever in existence.

RADIO: 96 and 24 hours before vessel's ETA preliminary notice must be given to the Company. Changes of ETA exceeding 10% of the remaining time must be reported. It is, however, not necessary to report changes of less than 1 hour. The Company may under special circumstances waive the obligation to give 96-hour notice.

On the arrival of a vessel in the harbour area notice of arrival must be given either in writing, by telephone 0498/27160 or by VHF radio. In respect of notice of arrival the harbour area is Kappelshamnsviken South of Lat. 57° 52′ N. If a vessel, owing to bad weather or for any other reason cannot safely lie within the harbour area, the Company may accept notice of arrival from vessel North of above mentioned latitude. At night (from 2230 to 0530 hrs.) notice of arrival can be given by telephone only (automatic answering service).

Between 0500 and 2230 hrs. vessels waiting in the roads shall keep watch on VHF radio or, if the vessel is not equipped with such, on the ordinary radio.

Coastal Radio Stations: Stockholm Radio and Tingstade Radio (Tingstade Radio, radio telegrams only).

VHF: Storugns Harbour Radio VHF Channels 16 and 9.

TUGS: Not available on the island of Gotland.

BERTHING: The harbour which is situated on the Eastern side of Kappelhamsviken is intended solely for the loading of limestone which is obtained from the nearby quarry. The Gotland limestone which is of high purity and has a very low percentage of impurities is used in cellulose, sugar, metallurgic and chemical industries, and in iron production.

The limestone is delivered in 11 different grades. The density is 2.5/2.6 tons/cu. m.

The stowage factor varies between 17 and 26 (17–18 for grades 0–3 mm., 23–26 for grades between 3 and 120 mm., and 20–24 for grades above 120 mm.).

Quay		*Length*		*Depth*
Quay 1	outside	140 m.	outside	9.5 m.
	inside	120 m.	inside	7.0 m.
Quay 2		48 m.	(no loading)	5.0 m.
Quay 3		110 m.	outer	7.0 m.
			inner	6.0 m.

Boatmen: Vessels with Pilots on board need not order boatmen. Other vessels should contact the Company well in advance. During night time boatmen can be obtained by contacting Securitas; tel. 0498/19000 not later than 2 hours before ETA.

BULK HANDLING FACILITIES: The loading elevators are movable along their respective quays. The capacity on Quay 1 is about 500–600 t.p.h and on Quay 3 about 300–350 t.p.h.

Cleaning of holds, discharging of ballast and opening of hatches shall be carried out in sufficient time to avoid delays in loading. The loading should be so planned that shifting of the vessel and loading elevators can be avoided as far as possible.

STEVEDORES: Normal working hours are Monday–Friday 0530-2230 hrs. Overtime working to complete loading is available to a limited degree, as is loading on Saturdays and Sundays. Vessels requiring overtime loading Sat./Sun. must give notice not later than Friday 1100 hrs.

During ordinary working hours vessels are loaded by turn. The turn is based upon the time of notice of arrival.

MEDICAL: Central hospital at Visby.

FRESH WATER: Not available.

FUEL: Most grades available from Visby subject prior notice.

GANGWAY/DECK WATCHMEN: Not compulsory but available.

OPENING/CLOSING HATCHES: Ship's crew open and close.

CUSTOMS ALLOWANCE: Presently 200 cigarettes per head/week. Practically no spirit allowed out of bond.

IDENTIFICATION CARDS: Seamen's book or passport if travelling outside port area.

CONSULS: Nearest consuls (for Denmark, Norway, Finland, West Germany) at Visby.

REPAIRS: Only minor repairs possible.

DRY DOCKS: None.

REPATRIATION: Good possibilities for changing crew.

AIRPORT: Visby.

TIME: GMT plus 1 hour. Permanent.

SHORE LEAVE: Permitted.

POLICE/AMBULANCE/FIRE: Dial 90 000.

AUTHORITY: Cementa AB.

STROMSTAD: 58.56 N. 11.10 E.

DOCUMENTS/PILOTAGE: See "Stockholm".

ANCHORAGE: Available within port to vessels up to and including 3,000 d.w.t.

MAX. SIZE: Cargo ships (not tankers), max. 3,000 d.w.t.

BERTHING: No particular restrictions for berthing within the port.

FRESH WATER: Available.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: Carried out by crew.

IDENTIFICATION CARDS: Needed.

CONSULS: Norwegian Consul: Karl Krohn, Adr: Karlsgatan 2.

REPAIRS: No repairs possible.

REPATRIATION: Facilities exist for effecting crew changes.

AIRPORT: Torslanda (Gothenburg). Distance: 200 km.

HOLIDAYS: Cargo work cannot be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police 12530; Ambulance 90000 (ask for ambulance); Fire 11160.

TELEPHONES: Arrangements exist for placing telephones on board.

TIME: GMT plus 1 hour. Permanent.

DELAYS: No delays in load or discharge.

AUTHORITY: Hamnforvaltningen Stromstad.

SUNDSVALL: 62.25 N. 17.20 E. (See Plan Book)

DOCUMENTS:

Crew Lists 4.
Passenger Lists 4 (if passengers onboard only).
Crew Declaration on tobacco, liquer, Cigarettes and spirit etc.
Derat. Certificate.
Tonnage Certificate.
Register.
Swedish light dues.
Manifest and/or Bill of Lading.

PILOTAGE: Pilot station at Spikarna Southern point of Alno Island VHF Channel 16. For communication and instructions Channel 13.

Pilot boarding from pilot cutter 2.5 miles East of Gubben Lighthouse in position 62° 21′ N. 17° 40′ E.

Entrance passage Gubben Light – Spikarna Light – Draghallan Light all 14 m. deep.

ANCHORAGE: Between islands of Tjufholmen and Alno and also in Svartvik Bay.

MAX. SIZE: See "Berthing" and "Tankers".

RADIO: Cable Agents giving ETA, draft and Cash requirements either via Hernosand Radio SAH or Stockholm Radio SDJ. At least 24 hours notice required. Change in time to be given at least 5 hours before ETA pilot.

TUGS: Available, ordered by Agent. Compulsory at Sundsvall Oil terminal for Tankers of more than 10,000 d.w.t.

BERTHING: Around the clock berthing. No restrictions except draft. Following drafts (fresh water) accepted in Sundsvall and adjacent ports.

Essvik: 62° 19′ N. 17° 24′ E.

Length of quay 30 m. Tankers secure with mooring lines aft and anchors forward. Discharging by aft connection. Max. draft at 170 m. length – 7 m. Pilot distance 10 nautical miles. Distance from Sundsvall town 16 km.

Johannedal: 62° 25′ N. 17° 24′ E.

Length of quay 60 m. Max. draft 4.3 m. Pilot distance 13 nautical miles Distance from Sundsvall town 9 km.

Kubikenborg: 62° 22.7′ N. 17° 22′ E.

Length of quay 150 m. Max. draft 10.5 m. 1 shorecrane, capacity 5 tons. 1 suction-installation, capacity 100–150 t.p.h. Pilot distance 12 nautical miles. Distance from Sundsvall town 4 km.

Norra Nyhamn: 62° 20′ N. 17° 24.8′ E.

Length of quay (pierhead only) 8 m. Tankers to be secured aft and drop both anchors forward. Discharging aft-connection. Max. draft, along the quay, 10 m. Pilot distance 6 nautical miles. Distance from Sundsvall town 18 km.

Ortviken: 62° 23.8′ N. 17° 21.8′ E.

Oil Berth: Length of quay 140 m. Max. draft at max. 200 m. length – 10.8 m. Pilot distance 12 nautical miles. Distance from Sundsvall Town 4 km.

Ostrand: 62° 29′ N. 17° 21′ E.

Salt Berth: Length of quay 75 m. Max. draft 5 m. (port side alongside). 1 shore crane, capacity 5 tons.

Glaubersalt Berth: Length of quay 40 m. Max. draft 5.4 m. 1 shore crane, capacity 4 tons.

Oil Berth: Tankers berthed outside 3 timber rafts, max. draft 5.5 m. Pilot distance 17 nautical miles. Distance from Sundsvall town 15 km.

Soraker: 62° 30.5′ N. 17° 30′ E.

Length of quay 170 m. Max. draft 7.0 m. 1 shore crane, capacity 10 tons. Pilot distance 11 nautical miles (East of the island Alno). Pilot distance 20 nautical miles (West of the island Alno). Distance from Sundsvall town 34 km.

Stockvik: 62° 20′ N. 17° 22′ E.

Length of quay 140 m. Max. draft 7 m. 3 shore cranes, capacity 6 tons each. Pilot distance 10 nautical miles. Distance from Sundsvall town 9 km.

Sundsvall Town Quay: 62° 23.5′ N. 17° 19.5′ E.

Berths 7–8:	Length of quay 240 m.	Max. draft 6.7 m.
Berths 11–12:	Length of quay 240 m.	Max. draft 7.8 m.
Berth 13:	Length of quay 90 m.	Max. draft 6.7 m.
Berths 14–15:	Length of quay 65 m.	Max. draft 6.5 m.
Berths 16–17:	Length of quay 110 m.	Max. draft 5.0 m.
Berth 32:	Length of quay 109 m.	Max. draft 4.0 m.
Berth Mokajen:	Length of quay 50 m.	Max. draft 4.0 m.

1 shore crane, capacity 3 tons, working in Berth 32. Cargo to be handled by mobile cranes. Pilot distance 12 nautical miles.

Sundsvall Oil Berth: (Vindskarsudde) 62° 23.2′ N. 17° 21.8′ E.

Length of quay 100 m. Max. draft 11.3 m. 3 swinging arms, each of 10 in. dimension. Pilot distance 12 nautical miles. Distance from Sundsvall town 3 km.

Svartvik: 62° 19′ N. 17° 22′ E.

Length of quay 140 m. Max. draft at 100 m. length – 7 m. 1 shore crane, capacity 4 tons.

Oil Berth: Tankers berthed outside 3 timber rafts. Max. draft at 170 m. length – Forward 6.9 m., Aft 9.1 m. Pilot distance 10 nautical miles. Distance from Sundsvall town 11 km.

Tunadalshamnen: 62° 25′ N. 17° 23′ E.

Length of quay 450 m. Max. draft 9.2 m. 2 shore cranes, capacity 10 tons. Additional berth: Length of quay 230 m. Max. draft 12.6 m. Pilot distance 13 nautical miles. Distance from Sundsvall town 7 km.

Tunadal Sawmill: 62° 25′ N. 17° 23′ E.

Length of quay 195 m. Max. draft at 80 m. length – 7 m. Pilot distance 13 nautical miles. Distance from Sundsvall town 7 km.

Vivstavarv: 62° 29′ N. 17° 28′ E.

Length of quay 180 m. Max. draft 7.3 m. Pilot distance 17 nautical miles. Distance from Sundsvall town 18 km.

MEDICAL: First class medical attention and dental care available.

TANKERS: See "Berthing".

STEVEDORING:

Ordinary working hours Monday-Friday 0700-1600 hrs.

5 hours overtime may be worked to complete cargo. Saturdays 0700-1530 hrs. minimum of 5 hours at double time. 2 hours may be worked to complete cargo.

CRANES: 2 cranes available 10 ton. In Sundsvall City cargo is handled by mobile cranes. Also see "Berthing".

CUSTOMS ALLOWANCE: See "Stockholm".

DENSITY: Nearly fresh, 1005.

FRESH WATER: Supplied at all berths.

FUEL: All grades delivered. Notice must be given in good time, since these installations normally close down weekends.

SHIP WATCHMEN AND SHIP'S TELEPHONE: Available. Compulsory at Oil terminals only.

CONSULS: Finland, Norway, Denmark, Germany, Great Britain, Holland, Belgium, France, Iceland.

REPAIRS: Most repairs possible through local repair shops.

DRY DOCKS: Lunde Varv outside Kramfors.

AIRPORT: International airport 22 km. outside town. Good facilities to effect repatriation.

TIME: GMT plus 1 hour permanent.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Dial 90 000.

GENERAL: *Dangerous Cargo:* Ships carrying dangerous cargo must notify Port authorities in advance of nature, quantity and Imco code number of goods concerned.

Wintertime: Ice-breaker service available if needed. Wintertime November to April.

AUTHORITY: Sundsvalls Hamnforvaltning.

TRELLEBORG: 55.21 N. 13.09 E. (See Plan Book)

DOCUMENTS: See "Stockholm".

PILOTAGE: Available day and night. Meet inward-bound ships on roads with motor boat. Outward-bound Pilot obtained from Pilot station of Trelleborg. Tel. 10141. Pilots also attend warpings and hawser-moorings. Pilot boats provided with short-wave radio telephone, and in Pilot station an up-to-date radar set is installed. Also see "Stockholm".

ANCHORAGE: Recommended West of entrance fairway between fairway buoy and No. 1 light buoy. Depth varies from 7–14 m. Anchor ground good – clay and sand.

RESTRICTIONS: Entrance a straight, perch-buoyed fairway of about 1,300 m. length, having measured depth of 8.5 m., and a bottom width of 100 m. Distance between moles (outer – 125 m.) and (inner – 86 m.)

HEALTH: See "Stockholm".

TUGS: Tug-boats can be promptly obtained from Malmo.

BERTHING: New Harbour has depth of 8 m. with quay on Northern side of basin. It is 1,640 ft. long and served by one bridge crane (6.2 tons) and one gantry crane (5 tons), also one mobile crane. Western harbour basin has depth of 7 m. in Western and Northern part and 8 m. in Eastern part. The Western part is served by a 5 ton bridge crane. Eastern harbour basin has depth of 6.5 m. in Eastern and Northern part and 8 m. in Western part. Oil quay 230 ft. long has depth at quay of 8 m. is situated on Southern side of New Harbour. Tankers of max. length 570 ft. can approach this quay. From oil harbour area direct importation of oils is made to Svenska Fina, Statens Jarnvagar (the Swedish State's Railway Company), the Trelleborgs Gummifabriks AB (Trelleborg Rubber Factory Ltd.). Five berths equipped for Ro/Ro traffic.

STEVEDORES: Available (tel. 112 66,112 69).

FRESH WATER: Available on all quays at request in Harbour Office.

FUEL: All grades bunker oils supplied at oil quay through direct pipe-line from sea depot. Order on phone Trelleborg 107 76. Bunker coal can be ordered via the harbour office.

REPAIRS: Available through private firms. Tel. Trelleborg 150 60, 109 66 or 124 50.

CONSULS: Denmark, Finland, Norway and West Germany.

TIME: GMT plus 1 hour. Permanent.

TELEPHONES: Ship's telephone available at oil quay, tel. 148 28, and at the Harbour Bridge, tel. 147 67. Order is made through Harbour office.

SERVICES: Divers available through the Harbour office. Refuse containers can be hired.

AUTHORITY: Trelleborgs Hamnforvaltning, Trelleborg Harbour Authority.

UDDEVALLA: 58.21 N. 11.56 E. (See Plan Book)

DOCUMENTS:

3 Crew Lists.

3 Passenger Lists.

Health Document. Derat. Certificate when ship arrives from abroad, except from Denmark, Norway and Finland.

3 Manifests.

2 copies of Bills of Lading.

Tonnage Certificate.

Nationality Certificate.

1 Crew Effects Declaration.

2 Ships Stores Declaration.

1 Declaration of Living Animals (if any).

PILOTAGE: Pilotage at Marstrand. Address "Marstrand Pilotstation". Required ETA 5 hours. VHF 16 and 6. Pilot boat South of Pater Noster Lighthouse. (Also see "Stockholm".)

MAX. SIZE: Draft 11 m.

HEALTH: Cable to Agent and he will arrange with health authorities.

RADIO: SAG. Gothenburg Radio (Goteborg Radio).

RADAR/VHF: No port radar service, VHF Channels 16 and 14.

TUGS: 5 Tugs up to 5,000 h.p. available. Can be ordered through Pilot or Agent.

BERTHING: Depths alongside (at M.W.) as follows:

	Depth
Skeppsholm Quay	10.5 m.
Bado Quay	7.0–9.5 m.
Bave Quay	7.0 m.
Skans Quay	5.5 m.
Thule Quay	4.5 m.
Juno Quay	7.0 m.

CARGO-HANDLING FACILITIES:

Skeppsholmspiren: 5 electric cranes of 12 to 25 tons capacity. This berth is especially constructed to handle the loading/unloading of bulk cargoes ore, coal, coke, scrap iron etc. Very large storage areas. berth equipped for Ro/Ro traffic.

Bado Quay: 8 electric cranes with capacities of 7–12 tons. 7,000 sq.m. of warehouses and 9,000 sq.m. of storage.

Bave Quay: 2 electric cranes with capacities of 6 tons. 3,000 sq.m. of warehouse and 14,000 sq.m. of storage.

Grain Cargoes: 2 silos owned by private companies.

STEVEDORES: Arranged by Agent.

TANKERS: Draft in the Skeppsviken Oilport, 11 m.; at the Bado Oilport, 9.5 m.

FRESH WATER: Available at all quays.

FUEL: All grades available.

FIRE PRECAUTIONS: Watchmen necessary when loading or discharging oils in pipe-lines.

GANGWAY/DECK WATCHMAN: Watchman accepted by Harbour and Fire Authorities on vessels loaded with explosives.

OPENING/CLOSING HATCHES: Preferably by crew. Can be arranged by stevedores.

CERTIFICATES: Tonnage Certificate, Nationality Certificate; Derat Certificate.

CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle of spirits for each man as a normal quantity. Possible to be increased for Master.
IDENTIFICATION CARDS: Not required.
CONSULS:

TELEPHONES: Available for placing on board.
SERVICES: Compass adjusters and Ship's chandler available.
SHORE LEAVE: No restrictions.
DEVELOPMENTS: Bado Quay – A new warehouse of 4,500 sq.m.
AUTHORITY: Harbour Manager, Port Authority of Uddevalla.
AGENT: Anders Smith Shipping AB, Bavebacksgatan 19, P.O. Box 31, S–451 01 Uddevalla 1. Telex: 42044 Smith S. Tel: 0522-36280, after hours Tel: 0522-13013. Cables: "Andsmith Uddevalla".

UMEA: 63.49 N. 20.16 E. (See Plan Book)

DOCUMENTS:
Ship's Documents:
Tonnage Certificate.
Certificate of Nationality.
Deratisation Certificate (not older than 6 months).
Supplied by Master on arrival:
1 copy of each Manifest.
1 copy of each Bill of Lading.
Supplied by Agent and signed by the Master on arrival from foreign ports:
1 Maritime Declaration of Health.
3 Crew Lists (one set).
2 Passenger Lists (one set).
1 Crew Effects Declaration.
2 Ship's Stores Declarations.
2 Cargo Declarations.
4 Reports of Arrival.
1 Declaration of Living Animals (if any) (supplied by the Customs Officer).
Furthermore on arrival from any port:
1 Report of Arrival, with double net tons, if applicable (Harbour Office).
1 Passenger List (if any in transit).
1 Crew List.
On departure to a Foreign Port:
5 Reports of Departure.

PILOTAGE: Umea Pilot Station: Bredskar. Tel. 090-45021 and 090-45544. Telegraphic address "Pilotstation Umea".

At least 5 hour's advance notice of ETA at Pilot station, stating time and Pilot station and destination, can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish Pilot station and some lighthouses.

Pilot station and pilot boats fitted with VHF Channel 16 – calling and safety; Channel 13 – pilotage and traffic; Channel 12 – spare Channel.

All pilot boats orange with flag "H" and equipped with radar.

Boarding point, 63° 36.5′ N. 20° 25.5′ E., 0.5 nautical miles South of Vaktaren Lighthouse. In case of bad weather, in the fairway, closer to the Pilot station.

Anchorage for vessels awaiting Pilot: 63° 36′ N. 20° 28′ E., 1.5 nautical miles S.E. of Vaktaren Lighthouse. Depth 18 to 30 m.

ANCHORAGES: See "Pilotage".

Osterfjarden roadstead between Umea Uthamn and Obbola. Length about 2,800 m. and about 400 m. wide, midstream in River Umea. To the North and South of 63° 42.3′ N. 20° 21.0′ E. and with a depth of 12 to 22 m.

Anchorage is forbidden around position 63° 40.5′ N. 20° 20.0′ E. Cables and fresh water pipe-line on Osterfjarden roadstead passing East-West around Lat. 63° 42.5′ N.

RESTRICTIONS: Entry permitted during darkness, for tankers, not more than 13,000 d.w.t. and a max. draft of 7.62 m., and dry cargo vessels with a draft not exceeding 8.53 m.

During unsuitable weather conditions, according to the Pilot on duty.

Tankers exceeding 1,600 g.r.t. and with a cargo of mineral oil products and other dangerous cargoes, must take a Pilot.

MAX. SIZE: Max. depth and max. permissible draft (at MW) in the fairway as follows:

The fairway to:	*Maximum draft (m.)*
Ferry Station No. 1-2	7.5
Ferry Station No. 3 Oil Berth	10.2
Stormskar Berth No. 1-10 and Obbla	10.2
Holmsund Oil Jetty	5.5
Umea Inner Harbour and Gimonas Oil Jetty	3.0

No tide.

HEALTH: Free pratique automatically for ships arriving from non-infected areas. In event of any suspected disease or fever on board notify the Agent, who will give necessary directions. It is possible to send a telegraphic message to "Sanitary Authority, Umea" containing state of health on board, in ordinary items or code. (Also see "Documents".)

RADIO: Harnosands Radio (SAH) on 2182 k/Hz or on VHF Channel 23-26 or 28 (depending on ship's position).

Port radio: Umea port radio keeps watch, Monday to Friday, 0815 to 1630 hours on VHF Channel 16. Working Channels 11 and 13. At other times Umea Pilot station. No port radar service, but Umea Pilot station and the pilot boats are equipped with VHF and can assist on request.

TUGS: Normally necessary only for larger tankers when berthing. Tugs join vessels just off the jetty. Ship's lines always used.

BERTHING: Depth alongside (at MW) as follows:

Umea Outport:	*Depth in metres*
Ferry Stations:	
No. 1 Hillskar	6.0
No. 2 Hillskar	7.0
No. 3 Truthallan	7.0
Oil Berth, Stormskar	11.0
Pilot Berth	5.3
South Quay, Berth Nos. 9 to 10	11.0
Pier Quay, Berth Nos. 7 to 8	9.0
Pier Quay, Berth No. 7	7.0
North Quay, Berth Nos. 2 to 6	7.0
North Quay, Berth Nos. 1 to 2	6.0

CRANES:
North Quay: 5 cranes, 2–7.5 tons.
Pier Quay: 3 cranes, 3–7.5 tons.
South Quay: 1 crane of 40 tons.

TANKERS: Oil berth at Umea Outport.

Stormskar, Depth 11 m. Reducing pieces for all diameters between 6 in. and 12 in. and all types of flanges available. One crane for handling hoses.

Obbala: Oil Jetty, depth 11.0 m.

DENSITY: Nearly fresh water.

STEVEDORES: Holmsunds Stuveri AB. Tel. 090-40970. To be ordered before 1300 hrs. local time, day before gangs required. For work on Saturdays, Sundays, and holidays, special regulations.

Working hours: Monday–Friday 0600 to 1500 hrs., meal hour 1000 to 1100 hrs. Coffee breaks 0800–0810 hrs.; 1300–1310 hrs.

MEDICAL: All kinds of medical attention and hospital facilities available. Notify Agent as soon as possible.
FRESH WATER: Delivered from water posts in Umea Outport at Ferry Station No. 1, oil berth, Berth Nos. 1–10 and in Umea Inner Harbour.
FUEL: All kinds and grades of fuel oil available in Umea Outport. Bunkering at Berths 1–10 possible during normal loading or unloading from pipe-line. At ferry station Nos. 1 and 2 and the oil berth also bunkering from pipe-line. Fuel can also be delivered from lorries. Notice as soon as possible.
FIRE PRECAUTIONS: Security watchmen from port of Umea while alongside the oil berth. Alarm regulations in writing will be delivered on arrival.
GANGWAY/DECK WATCHMAN: Available but not compulsory except for tankers.
OPENING HATCHES: Can be done by stevedores if necessary, except patent hatches.
CUSTOMS ALLOWANCE: *Tobacco:* 200 cigarettes or 250 grammes of tobacco (7 ozs.)

Spirits and Wine: 1 bottle of each (1 litre), minimum age 20 years.

Above mentioned quantities are per crew member and per week in Sweden. After a week quantities are taken out after request to the Customs Office.

IDENTIFICATION CARDS: Not required. Seaman's book sufficient.
CONSULS: Following countries have representatives in Umea: Denmark, Finland, Netherland, Norway.
REPAIRS: Most deck and engine repairs.
REPATRIATION: Facilities exist for effecting crew changes and arranging repatriations.
AIRPORT: Umea, approx. 20 km. away, served by regular airlines.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: New Year's Day (1st Jan.); Twelfth Day (6th Jan.); Good Friday; Easter Monday; May Day (1st May); Whit-Sunday; Whit-Monday; Midsummer's Day (nearest Saturday to 24th June); All Saints' Day (1st Sat. in November); Christmas Day; Boxing Day.
POLICE/AMBULANCE/FIRE: Alarm central 90-000 and ask for service required.
TELEPHONES: Available for placing on board at berths 1-10. and oil berth at Stormskar.
AUTHORITY: Port of Umea.

VALLVIK: 61.11 N. 17.10 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot station at Lilljungfrun. For further information, see "Port of Soderhamn". (Also see "Stockholm".)
ANCHORAGE: *(a)* Ljusne bight sheltering for W., N. to N.E. winds, depths 6 to 8 fathoms. *(b)* North side of Storjungfrun island sheltering for S. to S.W. winds, depths 10 to 12 fathoms.
RESTRICTIONS: No direct restrictions. Ships of about 5,000 tons d.w.t. or more are recommended not to enter or leave the harbour in darkness (due to pilot and weather conditions).

MAX. SIZE: Max. draft in fairway 25 ft. 6 in. Loading pier 650 ft., available on both sides (West side up to 320 ft. only) *Depths:* East side, from 28 ft. at the outer end to 18 ft. at the inner, with max. breadth 50 ft., breadths more than 50 ft. allow only 23 ft. 5 in. abreast of the pier. West side, from 28 ft. at the outer end to 20 ft. at the inner, max. breadth 50 ft.

HEALTH: No special action except if suspected disease. In that case contact Agent.

RADIO: Northward bound ships contact Stockholm Radio, Southward bound Harnosand Radio.

RADAR/VHF: No port radar service. There is a radar station at Lilljungfrun. Pilot station and some of the pilot boats are fitted with radar. Master may contact Pilot by means of VHF Channel 16 (frequency 156.8 mHz) and 13 (frequency 156.656 mHz).

TUGS: Usually only needed when ships are leaving. Ship's lines always used.

BERTHING: Ship's Agent keeps contact with port authorities.

STEVEDORES: Agent arranges needed or available gangs according to the Shipmaster's wishes.

TANKERS: 10 in. diameter discharging hoses and pipe-line. Tanker berth at loading pier, 3 different connecting points.

FRESH WATER: Delivered by hose from quay. Rate about 8 t.p.h.

FUEL: Tanker lorries ordered through Agent, available with a few hours' notice.

GANGWAY/DECK WATCHMEN: Not necessary. If wanted, can be arranged.

OPENING/CLOSING HATCHES: Normally carried out by crew. Can be done by stevedores.

CARGO GEAR: Cargo gear certificates valid.

IDENTIFICATION CARDS: Not needed.

CONSULS: Danish, Dutch, and French Consuls in Soderhamn.

REPAIRS: Machinery repairs, plate-work and welding can be carried out to a certain extent.

DRY DOCKS: None.

REPATRIATION: Facilities for crew changes available.

AIRPORT: Nearest airport Arlanda, about 15 miles North of Stockholm.

TIME: Local time GMT plus 1 hour. Permanent.

HOLIDAYS: See "Soderhamn".

POLICE/AMBULANCE/FIRE: See "Soderhamn".

TELEPHONES: No arrangements for placing telephones on board. Telephone for ship's use, available in Harbourmaster's Office.

AUTHORITY: Hamnkontoret, Vallviks fabriker.

VARBERG: 57.07 N. 12.15 E. (See Plan Book)

DOCUMENTS:

Crew List.
Passenger List.
Maritime Declaration of Health (incl. Certificate of Derating).
Ship's Certificate of Registry.
Manifests and B/L copies.

PILOTAGE: Application for sea pilot through ship's Agent. Telephone to Pilot station 0340/10300. Pilot to board vessel on the road about 0.5 nautical miles off Varberg. (Also see "Stockholm".)

ANCHORAGE: On the roads 33 ft. depth.

RESTRICTIONS: No tide or other entry restrictions.

MAX. SIZE: Length 170 m., breadth 25 m., draft 23 ft. No tide.

HEALTH: Vessel to be kept in quarantine if disease on board suspected.

RADIO: Gothenburg Radio, SAG. VHF Channels 16 and 26.

TUGS: Tugs to be ordered 12 hours in advance.

STEVEDORES: Gangs to be ordered in advance through ship's Agent.

MEDICAL: Hospital facilities available. Desirable to give advance notice.

TANKERS: 1 tanker berth, max. draft 23 ft.

FRESH WATER: Available all docks 35 t.p.h.

FUEL: Fuel oil No. 1-5 available from tank trucks.

FIRE PRECAUTIONS: Oil No. 1 and petrol to be discharged under supervision of watchman.

DEVELOPMENTS: Planned increases of draft at the entrance to 9 m. = 29 ft. and in the harbour to 8 m. = 26 ft.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Generally done by stevedores.

CERTIFICATES: Certificates of Registry and Derating and also Crew List.

CUSTOMS ALLOWANCE: (Tobacco), 200 cigarettes per man. (Wine/Spirits), 1 bottle per man.

IDENTIFICATION CARDS: Not needed.

CONSULS:

Vice-Consul of Finland, tel. 0340/16000
Vice-Consul of Netherland, tel. 0340/16270
Vice-Consul of Denmark, tel. 0340/16190

REPAIRS: Only minor repairs.

REPATRIATION: Can be effected.

AIRPORT: Nearest airport with regular airlines, Torslanda/Gothenburg, 50 miles North Varberg.

TIME: Local time GMT plus 1 hour. Permanent.

HOLIDAYS: Principle Swedish Holidays – when no cargo work is obtainable: New Year's Day; Good Friday; Easter Day; 2nd Easter Day; Labour Day (May 1st); Whitsun Day; 2nd Whitsun Day; Midsummer Day; All Saint's Day (November); Christmas Day; 2nd Christmas Day.

POLICE/AMBULANCE/FIRE: Tel. 90 000.

TELEPHONES: Available on dock but not for placing on board.

AUTHORITY: Port Authority of Varberg, Hammnkontoret.

VASTERAS: 59.37 N. 16.33 E.

DOCUMENTS:

Ship's Register.
2 Crew Lists.
1 Tobacco List, signed by all hands on board.
1 Valid Deratting Certificate.
1 copy of Manifest or Bill of Lading for each Swedish port of call.
Light dues receipts, if on board.

PILOTAGE: Incoming ships receive Pilot from Landsort. Pilot ordered by VHF Channel 16 (165.80 m/c) or by RT. Pilot boats fitted with VHF. Give order 5 hours before Pilot required. Pilots meet ships about 2 nautical miles outside Landsort. Light and signals in accordance with the international rules. (Also see "Stockholm".)

ANCHORAGE: Within harbour area. Depth 9-10 m.

RESTRICTIONS: None. No tides.

MAX. SIZE: Vessels reach port through two deep navigable channels – through Soderjtalje Ship Channel or via Stockholm through Hammarby Ship Canal. Lowest depth of channels at average water level is 7.3 m. (24ft. 1 in.).

Sizes of Locks:

	Length	*Width*	*Depth*
Sodertalje	136 m.	20 m.	7.5 m.
Hammarby	115 m.	17.4 m.	7.0 m.

Limitation of vessels: For Sodertalje. With beam of 18 m. max. draft 6.5 m. With beam of 17 m. max. draft 6.8 m. Max. LOA 124 m.

HEALTH: No special requirements or health documents, only valid deratting certificate. Disease or fever on board must be declared before entering port.

RADIO: Stockholm Radio.

VHF: The harbour office. VHF Channels 16 and 14. Monday-Friday 0800-1600 hrs.

TUGS: 1 tug for unberthing. Ship's lines.

BERTHING: *Deep Harbour:* 730 m. quay length, depth alongside 7.6 m. Roll-on/roll-off ramp. Two container handling cranes of 33 tons and one of 22 tons.

Old Harbour: 1,100 m. quay length, depth 4.5 m. to 7.6 m. Container handling crane of 22 tons. Heavy lift crane of 210 tons.

Little River Harbour: Quay 120 m. length, 7.6 m. depth alongside.

Power Plant Harbour: Quay 200 m. length, 5.8 m. depth alongside.

Oil Harbour: Quay 125 m. length, 7.6 m. depth alongside.

BRIDGES: 4 bridges. All of them to be opened at passage except bridge at Sodertalje which closed from 1630 until 1830 hrs. weekdays and 1300-1500 hrs. Saturday or day before a holiday.

STEVEDORES: Stevedores for next working day ordered at least 1500 hrs. day before and ETA to be given in due time.

MEDICAL: Necessary service given by local hospital and private doctors. Vaccinations carried out.

FRESH WATER: Ordered through port administration.

FUEL: Bunkering of all grades of oil can be carried out at all quays from trucks.

FIRE PRECAUTIONS: Accordance harbour regulations.

DEVELOPMENT: Constant new development and extensions. Additional room for extension in old harbour, deep harbour and oil harbour.

GANGWAY/DECK WATCHMEN: Can be obtained from shorewatch companies at different rates for night/day work.

OPENING/CLOSING HATCHES: Crew. Can be carried out by stevedores.

CERTIFICATES: Measurement certificate and all gear test certificates required, if ships gear to be used.

CUSTOMS ALLOWANCE: (Tobacco), 200 cigarettes or 200 gr. tobacco. Additional allowance depending on expected stay in port and size of vessel. (Spirits), 1 bottle of 0.75 c.l. for each crew member over 21. Additional allowance on request.

IDENTIFICATION CARDS: None required.

CONSULS: Denmark, Finland and Norway.

REPAIRS: Most deck and engine repairs, as well as electrical.

DRY DOCKS: None.

REPATRIATION: Yes. Accommodation to be ordered in good time.

AIRPORT: Arlanda, 120 km. International lines.

TIME: GMT plus 1 hour.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Tel. 90000.

TELEPHONES: In oil and deep-water harbour, most quays fitted with telephones.

SERVICES: Compass adjusting. Small radio repairs by local radio men.

SHORE LEAVE: Crew can leave vessel after customs clearance and immigration control.

AUTHORITY: Vasteras Harbour Board.

VASTERVIK: 57.46 N. 16.38 E.

PILOTAGE: Pilot boards at Ido, available day and night.
BERTHING: *Outer Harbour:* Djuphamnskajen, length 200 m., depth 8 m.

Oil Quay: depth 8 m., equipped with 3 × 8 in. pipe-lines.

Ferry Harbour: quay length 100 m., depth 5.5 m.

Inner Harbour: quay length 900 m., depth alongside from 4 to 6 m.

Oil berth: depth alongside 6 m.

FRESH WATER: Can be obtained from all quays.
AUTHORITY: Vasterviks Hamn.

VISBY: 57.38 N 18. 17 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Tel. 0498–10138 at 0600–2200, if possible five hours before arrival. Pilotage day or night. Embark/disembark outside port entrance. Radar–VHF on pilot station. (Also see "Stockholm".)
ANCHORAGE: Outside harbour, water depth 30 to 50 m. Clay bottom. No mooring buoys anywhere.
RESTRICTIONS: No tide in harbour. Currents outside harbour up to 4-5 knots running along coast. Prevailing winds, Summer time mostly S.W., Winter between N.W. and N.E. Harbour open to winds between S.W.-W., which with strong winds will make swell along the piers.
MAX. SIZE: Largest vessel, 2,500-3,000 d.w. Max. length about 100 m., turning in harbour.
TUGS: None available.
BERTHING: Four roll-on/roll-off berths. Oil Quay. Depth at all quays 5 to 6 m. No mooring buoys inside harbour. Prohibited anchor in inner basin.
BRIDGES: No bridges or overhead cables.
STEVEDORES: Working hours, Monday-Friday 0700-1600. Overtime possible.
FRESH WATER: Available.
FUEL: Oil available.
REPAIRS: Only small repairs are possible.
AUTHORITY: Visby Harbour Office.

WALLHAMN: 58.01 N. 11.42 E. (See Plan Book)

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists.
1 Tobacco and/or Stores List.
Manifest.

PILOTAGE: Pilots board West of Skallen Lighthouse outside Marstrand. No pilotage of big ships during darkness. Big ships will have to anchor and await daylight. Address: "Marstrand Pilot Station", Tel. 0303-60004, VHF Channel 16. 24 hours' notice to be given through Agents.
ANCHORAGE: Whilst awaiting berth, vessels can anchor South of the entrance.
RESTRICTIONS: Large vessels entry only in daylight.
MAX. SIZE: About 50,000 d.w.t. Draft not to exceed 36 ft. (20 ft. at the inner quay for stone-loading).
HEALTH: No special action except for suspected disease, in which case Agent should be contacted for further information.
RADIO: Gothenburg Radio.
TUGS: Tugs from Gothenburg will join at entrance.
BERTHING: Four berths for roll-on/roll-off: (1) 180 m. × 11 m. depth. (2) 120 m. × 11 m. depth. (3) 30 m. + 70 m. × 8.5 m. depth and (4) 200 m. × 8.5 m. depth.

200 m. of quay for conventional handling; 50 m. of quay for loading of stone-products.

STEVEDORES: ETA given to Agents is sufficient.
MEDICAL: Doctors and dentists available at short notice. Nearest hospital in Kungaelv, 35 km.
FRESH WATER: Supplied from quay.
FUEL: Most grades of bunker oil available with short notice.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: By crew or by stevedores.
CUSTOMS ALLOWANCE: 200 cigarettes, 1 bottle of spirits allowed each man.
IDENTIFICATION CARDS: Not necessary. Seamen's Book or Passports should be carried.
CONSULS: In Gothenburg, 55 km. away.
REPAIRS: Smaller repairs performed by own workshop. More complicated repairs by experts from Skaerhamn, 30 km. away.
REPATRIATION: All facilities available.
AIRPORT: Torslanda International Airport, Gothenburg, 55 km. away.
TIME: GMT plus 1 hour, all the year round.
HOLIDAYS: Stevedoring and clearance of vessels can be performed every day of the year, 24 hours' service.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
SHORE LEAVE: No restrictions.
AUTHORITY: Wallhamn AB Port Authority.
AGENTS: Wallhamn AB – Roto Line, POB 103, S–444 01 Stenungsund, Sweden. Tel. 0304-60720. Telex 2429.

YSTAD: 55.26 N. 13.50 E. (See Plan Book)

DOCUMENTS: Crew List.
Passenger List.
Custom Documents.
Manifests.
Bills of Lading.
Ship's Papers, etc.

TRAFFIC WARNING SYSTEM: Vessels approaching Ystad listen on Channel 16 for broadcast announcing ferry departures. All inward bound vessels have to make contact.
PILOTAGE: Vessels approaching Ystad's Harbour must apply for Pilot at Trelleborg at least 5 hours before pilotage due to commence. Tel. 10141 or VHF (Channel 16), stating tonnage, draft and destination. VHF tel. call sign "Lotsarna" plus name of pilot's station (Also see "Stockholm"). Pilot boards at Ystad entrance buoy.
ANCHORAGE: Road: 1.0 n.m. S.W. harbour entrance, 9-10 m. depth; sand and clay, good anchorage ground. The road is open for winds between S.S.W.
MAX. SIZE: Largest fully loaded vessel that can enter harbour about 5,500 d.w.t.
RADIO: Goteborg and Stockholm.
VHF: 24 hour watch at Trelleborg pilot station on VHF Channel 16 and "Ystad Port Radio" on Channel 16 during office hours.
TUGS: Tug usually meets vessel at entrance buoy. Ship's lines used. Tugs not compulsory.
BERTHING: Vessels of 160 m. length and 20 m. breadth can enter harbour. Draft 22 ft. at M.W.L.
STEVEDORES: Stevedores must be ordered from Ystads Stuveri AB. Working hours Monday-Friday 0700-1630 hrs. Meal intervals 0900-0930 and 1200-1300 hrs.
MEDICAL: Agents to be notified in advance if medical attention wanted.
TANKERS: Load/discharge lines 8 in. diameter, but reducing pieces for 6 in. and 10 in. diameter.
FRESH WATER: Available from quays. About 10 t.p.h.
FUEL: Coal and oil can be obtained by lorries.
GANGWAY/DECK WATCHMEN: Can be arranged.
OPENING/CLOSING HATCHES: Crew or stevedores.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCE: (Tobacco), about 200 cigarettes or 200 gram of tobacco for each member of crew. (Spirits), one bottle for each member of crew.
CARGO GEAR: Loading/discharging with shore cranes and 4 roll-on/roll-off ramps.
IDENTIFICATION CARDS: Not needed.
CONSULS: Danish Consul, tel. 13800. Finnish Consul, tel. 13940. Norwegian Consul, tel. 13930.
REPAIRS: Mechanical workshop.
AIRPORT: 30 km. distant and served by regular airlines.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: Christmas; New Year; Easter; Whitsun and Midsummer. No cargo work.
POLICE/AMBULANCE/FIRE: Police tel. 13620; Ambulance and Fire 90000.
SHORE LEAVE: Permitted.
AUTHORITY: Ystads Hamnforvaltning.

Syrian Arab Republic

BANIAS: 35.14 N. 35.56 E.

DOCUMENTS:
5 Copies Crew List.
1 Copy Vaccination List.
1 Copy Store List.
1 Copy Private Store List.
1 Copy Slop Chest.

In case of cargo to be discharged, following are required:
Original and 2 Copies Manifest.
3 Copies Bill of Lading.

PILOTAGE: Compulsory. Pilots board all tankers approaching the Terminals. These Pilots act in the same capacity as Mooring Masters in the berthing of vessels, after which they supervise the raising of the flexible hoses and their connection to the ship's manifold. During loading operation they act as the Company's Representatives. The Company's Mooring Masters will meet tankers in the vicinity of Marqab Light Buoy.

It is requested that tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft., above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable the Pilot to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules 1965 is relevant.

APPROACHES: Vessels approaching the port should keep to the authorised passage, defined by the following co-ordinates:
(a) Lat. 35° 13′ 00″ N. Long. 35° 42′ 00″ E.
(b) Lat. 35° 13′ 00″ N. Long. 35° 56′ 00″ E.
(c) Lat. 35° 16′ 00″ N. Long. 35° 55′ 24″ E.
(d) Lat. 35° 16′ 00″ N. Long. 35° 40′ 34″ E.

ANCHORAGE: In the event of a berth not being available, or suspension of mooring operations on arrival, a good anchorage can be used South of the berths in the vicinity of the Marqab Light Buoy positioned at: Lat. 35° 12′ 7″ North, 35° 54′ 46″ East. It is important to maintain a listening watch on Channel 16 VHF, or visual watch on the shore Signal Station positioned approximately at Lat. 35° 13.4′ N., Long. 35° 56.9′ E. in order to avoid delays.

MAX. SIZE:

Berth No.	*Draft* *Winter (ft.)*	*Summer (ft.)*	*Length of Vessel (ft.)*	*Purposes*
1	Removed			
2	48	48	960	Discharging Crude Oil
	50	51		Loading
3	49	49	960	Discharging Crude Oil
	51	52		Loading
4	40	42	600	Loading
5	34	34	600	Load./Disch. white Product
6	30	32	550	Load./Disch. white Product

N.B. (1) Above is actual and temporary up to 1980.
(2) New installations will be commissioned after 1980.

NOTICE OF READINESS: Time of Notice of Readiness tendered will be considered when vessel arrives in the very near vicinity of the Marqab Light Buoy (position Lat. 35° 12′ 27″ N. Long. 35° 54′ 46″ E.), where the Mooring Master, who is the Company's Representative, will board and receive ship and remain on board throughout the entire operation.

HEALTH: Masters of tankers due may obtain free pratique by addressing the usual quarantine message to their Agents through commercial radio channels.

RADIO: Syrian Company for Oil Transport, Banias Terminal must be informed 72, 48 and 24 hours prior to arrival of a vessel's ETA, quantity of cargo required if in a state to load and maximum loading rate required. All times to be given in GMT.

Banias Terminal Radio Station. Call sign: "YKM 5". Frequency: 500 kc/s and 442 kc/s and VHF Channel 16.

Tanker VHF Radio Communications. Vessels approaching Banias can communicate with the Terminal by FM, VHF, Channel 16. Range 30 to 40 miles. Frequency 156.8 Mc/s. Simplex Operation. Call sign: Banias. On arrival, ships radio installations will be sealed according to normal practice and the boarding Mooring Master will put his own portable equipment on board. Communications will then be as follows:

Banias. Equipment: Fixed station sited in the Terminal. Call sign: "Banias". Frequency: Transmitting 163.6 Mc/s. Receiving 159.1 Mc/s. Range: 8 miles. Watches: Continuous whilst vessels are in port or immediate vicinity.

Mobile Station. Equipment: Placed aboard vessel on arrival at Banias. Call sign: Ship's name. Frequency: Transmitting 159.1 Mc/s. Receiving 163.6 Mc/s. Range: 5 miles. Watches: Mutually agreed between ship and the Terminal on first establishing contact.

Note: The radio telephone circuit is connected with the main Company Communications network in Banias Terminal.

TUGS: Available only on demand from General Directorate of Harbours at Lattakia.

MOORING REQUIREMENTS: For tankers loading/discharging at Banias are as follows:

Forward

Anchors to be fitted with marker buoys with 20 fathoms of line.
2×120 fathom mooring lines.
2 rope stoppers.
1 suitable wire stopper (preferably carpenter patent) for use with 4.75 in. to 5.5 in. mooring lines.

Aft

4×120 fathom mooring lines.
4 rope stoppers.
2 suitable wire stoppers (preferably carpenter patent) for use with 4.75 in. to 5.5 in. mooring lines.

Boat Ropes

To be rigged on either side of ship, and of not less than 4.5 in. circumference.

BERTHING: At all berths vessels moor using both anchors forward, with wires to a buoy on the port bow, one buoy astern and one on each quarter. Hoses are lifted on the port side to be connected to the ship's manifold which must have pressure gauge fitted.

HOSES:
Berth No. 2: 2×20 in./16 in. hoses.
Berth No. 3: 2×20 in./16 in. hoses.
Berth No. 4: 1×16 in. hose.
Berth No. 5: 2×12 in. hoses.
Berth No. 6: 2×12 in. hoses.

N.B. All strings of hoses end in 12 in. reducers.

FRESH WATER: Facilities are not available for the supply of potable or boiler water.

FUEL: Bunkers are not available at Banias.

BALLAST: All tankers should ensure ballast is clean. Authorities are most strict and impose heavy fines for the slightest contravention. Ballast quantity should be kept to the minimum required to ensure safe manoeuvring. No facilities for disposal of ballast ashore.

Banias is an open roadstead and sudden changes in weather can be experienced especially during the Winter months. It is good practice to commence loading as soon as hoses are connected and whilst ballast discharge is still in progress, always providing this can be achieved safely and with no danger of contamination.

POLLUTION: The Port Authorities will, in cases where pollution is ascertained, collect a declaration from the Master of the offending ship, in which declaration he authorises his Agents to pay any fine to be levied by the official committee in the future.

In the light of the above and to avoid any delay to vessels, owners are kindly requested to:

1. Supply vessels with necessary chemicals to destroy any quantity of oil overflowing into the sea.
2. Provide a bank guarantee of Stg. £5,000 to be deposited against eventual fines. Such a guarantee (or cash) must be given before offending vessel is released.

LOADING: Ships' Personnel are solely responsible for the loading operation, i.e. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to the shore control. It is in vessel's interest to advise loading rate required, also to give 30 minutes' notice of expected time of commencing loading. Order to start will be taken as final.

The Mooring Master must be advised when ship estimates 1,000 tons to go for completion of loading.

Ensure scuppers are effectively plugged. On no account are plugs to be removed.

A complete watch on deck must be maintained throughout the operation, especially towards the shore signal station, to ensure safe loading and avoid delays.

Loading Rates: No. 2, 7,000 t.p.h.; No. 3, 8,500 t.p.h.; No. 4, 6,500 t.p.h.; No. 5, 4,000 t.p.h.

Discharging pressure which should be maintained during the operation at ship's manifold is to be according to the Terminal Requirements which will be handed over to the Master at each call of vessel.

MEDICAL: Hospital facilities or other relevant medical information are available through Agent on and/or prior to arrival of vessel.

TANKERS: See "Hoses". Slops (residue) are not allowed to be discharged as no facilities for treating same are available.

CUSTOMS ALLOWANCES: According to regulations or at Customs' own discretion.

SURVEYORS: Lloyds, who are represented by the Syrian Maritime Transport Agency.

REPATRIATION: Facilities exist through Agents.

TIME: Local time is GMT plus 2 hours.

SHORE LEAVE: Permission may be obtained from Immigration Dept. ashore through Agents.

DELAYS: Unsuitable weather, and Free Berths providing berthing day and night.

REGULATIONS: Terminal Requirements and Conditions of Use of Terminal Facilities will be handed over to Master of vessel at each time of call. The following are some of the regulations in the booklet.

Vessel in berth: Ships are not allowed to remain in berth for any reason when loading operation stopped. Hoses should be disconnected and dropped to sea unless stay authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold and poop mooring area of the sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on shore notice. Repairs which will immobilise must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, provisions, etc: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress. Launches or other craft must not lie alongside during the same period.

Tanker Safety Regulations: Tanker Safety Requirements must be strictly adhered to at all times. The Mooring Master is authorised to stop all operations should he consider the safety regulations are not being complied with.

Boarding: The boarding of a vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Syrian Company of Oil Transport (SCOT) on application to ship's Agents and authorised chandlers.

This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

WEATHER: The Director of Port Authorities has issued statistics of the weather conditions along the Syrian coast after an experience of 20 years.

State of winds and whirlwinds on the Syrian Coast

Winter	*Kind and direction of winds*
December	Regular winds blowing from N.E. to S.E., sometimes S. to S.W., the alteration of winds is accompanied with rains.
January	Excess of storms starting to blow from S.E. to N.E. The alteration of winds from the E. is occasionally accompanied by heavy rains with probability of hail.
February	Excess of storms and heavy rains blowing from S.W. to N.E. and E.
Spring	
March	Variable winds from S.E. to S.W. and accompanied by heavy rains and altering to N.W. slight.
April	Variable winds from N.W. and S.W., and S. winds accompanied with light rains.
May	Regular winds blowing S.W. to N.W. and altering to S. sometimes accompanied by rain.
Summer	
June	Slight winds from S.W. and S.
July	Moderate winds from S. to S.W.
August	Slight N.W. winds.
Autumn	
September	Winds S.W. and N.W. accompanied by some rain from 15th September. Winds will lighten during the end of the day and will alter at night to slight E.
October	Variable winds from W. to S. and N.W. accompanied by rain will alter at night to E.
November	The winds are variable from N.E. and N.W. accompanied sometimes by rain which will alter to E.

SERVICES: In the event of tankers requiring assistance to lift loading hoses, recover lost anchors, and cables, etc., limited aid may be given during normal working hours. Current charges are available on application from Agent.

SHIPMASTER'S REPORT: Cigarette allowance is strictly enforced at 40 cig. per man, and has to be carefully declared. If the Chief Steward has a slop-chest, it has to be carefully declared. Whisky has to be declared separately from other spirits, but in practice it is better to declare each type of spirits separately.

The ship's Log Book is stamped by the police.

The new flag is red, white and black, with an eagle in the centre and may be obtained through the Agent.

AUTHORITY: Port Captain, Banias.

AGENT: Gulf Agency Co. (Syria) Ltd., P.O. Box 12, Banias, Syria. Cables "Gacship", Banias. Tel. 455. Telex 20906 Beirut or 216344 Athens.

LATTAKIA: 35.31 N. 35.46 E. (See Plan Book)

PORT LIMITS: The seaward boundary of the port is about 2 miles West of the main breakwater, starting with the entrance line of 133° South.

DOCUMENTS: In addition to the copies of Bills of Lading, Cargo Manifests and the various Ship's Certificates, the Master of an arriving vessel must produce the following documents:

Crew List, showing full names of crew members, nationality, date of birth, and rank onboard.
Stores List.
Passengers List.
Health Certificates and International Inoculation Certificates.
All other documents relevant to the ship.

PILOTAGE: Upon a vessel's arrival at the anchorage area, she may call the Pilot in any of the following ways:

(a) Flying the internationally recognized flag.
(b) Blowing the ship's whistle – 2 long and 1 short.
(c) Calling the pilot station on VHF – Lattakia pilot station – using Channel 16.
(d) Signalling the pilot boat. – Grey colour hull and white colour bridge, always flying the Pilot's flag.

The Pilot boards an arriving vessel when she has reached a distance of about a few hundred metres West of the Breakwater Head under good weather conditions. When the weather is bad, an arriving vessel is directed to the port basin entrance by VHF. The Master is advised the proper directions to follow and when he is to lower the pilot ladder to the lee side.

ANCHORAGES: Upon arrival at the anchorage area referred to under "Port Limits", the vessel has to wait for orders. This Anchorage Area has a draft of 20–25 m., and all Masters awaiting there have to keep listening on VHF Channel 16, from 0600 until 0900 hrs. and from 1800 until 2100 hrs. local time, for fresh orders. It is always recommended to keep a special watch on VHF Channel 16, for sudden orders.

RESTRICTIONS: The state of tide at Lattakia is negligible, and all vessels may enter and sail out of the harbour by night or day provided she has a Pilot onboard.

MAX. SIZE: The maximum permissible length, breadth and draft of an arriving vessel are determined by the place of berth or anchorage point.

HEALTH: All arriving vessels are boarded by the quarantine service to whom all relevant documents are submitted, in particular the Deratisation Certificate, and incidents onboard reported.

The application is filed by the Agent, who accompanies the boarding authorities. Free pratique is never automatic.

RADIO: The name of the Lattakia station is "Lattakia Radio" on 2182 kc/s. or Channel 16 on the VHF. Following first contact another Channel is agreed upon, leaving Channel 16 for the pilotage service.

VHF: See "Radio".

TUGS: Tugs are always under the direct orders of the Pilot and join the vessel at the point the Pilot boards. Usually ship's lines are used but there is no charge for the use of the tug's lines.

BERTHING: Quay berths available as follows:

Name	*Length*	*Depth Alongside*
Main Quay	600 m.	9.50 m.
Silo Quay	180 m.	9.50 m.
Passenger Quay	160 m.	8.00 m.
Eastern Quay	250 m.	7.00 m.
Northern Quay	200 m.	4.00 m.

None of these quays is a specialized one. The water is always salty. Cargo is loaded or discharged either by the ship's gear or Port Co. Cranes, at the entire discretion of the latter. A ship may operate in the basin or open road in and from barges.

BULK CARGO FACILITIES: At the silo quay, grain and molasses are the only types of cargo which can be handled in bulk. Grain may be loaded into a vessel's holds at the rate of 450 t.p.h., and discharged at the rate of 50 t.p.h.

STEVEDORES: 24 hours ETA advice is required to arrange working gangs if vessel is scheduled to operate on arrival. The average loading and discharging rates vary with the type of vessel, nature of cargo, where berthing and whether working in lighters or not.

MEDICAL: Except for urgent cases on board, the Agent need not be notified in advance. Hospitals in town available, and likewise doctors and private clinics. No particular inoculations are required.

DENSITY: Salinity is 1.033 (33 grams Salt per cu.m.).

FRESH WATER: Supplied either from hydrants alongside main quay or from tank barge at a price of LS 1.00 per ton from hydrants and LS 2.50 per ton from tank barge.

FUEL: All types of known marine fuels are available, may be delivered in any quantity from cistern trucks alongside quay. 48 hours notice is required.

FIRE PRECAUTIONS: No specific precautions except that vessels carrying explosives must operate and discharge into lighters in the open road.

CONSULS: Sweden, Finland, Holland, Greece, Italy, Spain, Portugal.

REPAIRS: Only minor deck, radio, and radar repairs may be carried out. Extensive and specialised workshops are not available.

DRY DOCKS: Not available. Only a 900 ton slipway is in operation.

SURVEYORS: Only minor surveys by Lloyds, German Lloyds, and Veritas.

GANGWAY/DECK WATCHMEN: Compulsory and are supplied at a hire rate of LS 48.00 per watchman per day.

HATCHES: Normally opened and covered by the ship's crew.

CUSTOMS ALLOWANCE: Cigarettes, 2 packs per man. Spirits, as would be reasonably agreed with the Customs on board prior to sealing the vessel's stores.

CARGO GEAR: Both may be used at the entire discretion of the Lattakia Port Company. Two floating cranes are available – one of 100 ton capacity and the other of 35 ton. Also one mobile crane of 25 ton capacity.

REPATRIATION: All facilities exist and are attended to by the vessel's Agent.

AIRPORT: Damascus International airport is 340 km. from Lattakia by road.

TIME: Winter Time GMT plus 2 hours. Summer Time GMT plus 3 hours. (1st May through Septembr).

HOLIDAYS: Following the Lunar Calendar, the first 2 days of Bayram and Al-Adha are the only non-operational days.

POLICE/AMBULANCE/FIRE: Police phone No. 93; Ambulance phone No. 93; Fire phone No. 91.

TELEPHONES: No proper arrangements exist. Vessels in port may use VHF Channel 16 with the pilot station of Lattakia Radio.

SHORE LEAVE: Crew members allowed ashore with shore passes.

IDENTIFICATION CARDS: Shore passes in addition to the seaman's book.

DELAYS: Vary with state of congestion prevailing in the port.

DEVELOPMENTS: The execution of the 2nd development stage has just started and it will cover the following new facilities:

Specialized container and Ro/Ro quays.

Draft	*Length*	
13.0 m.	260 m.	Containers
11.5 m.	190 m.	Containers
11.5 m.	200 m.	Ro/Ro
11.5 m.	350 m.	General Cargo
10.5 m.	425 m.	General Cargo
7.0 m.	450 m.	General Cargo

In addition there will be new warehouses and stacking areas totalling 230,000 sq.m.

AUTHORITY: General Manager, Lattakia Port Company, Lattakia, administered by the Syrian Ministry of Transport.

AGENT: Gulf Agency Co. (Syria) Ltd., POB 210, Lattakia, Syria. Cables "Gacship". Lattakia. Tel. 26300, 26301. After hours Tel. 26303, 26304. Telex 20906 Beirut or Athens 216344.

TARTOUS: 34.53 N. 35.45 E. (See Plan Book)

DOCUMENTS: Bill of Health – The usual International form should be filled in on arrival and the Agent will deliver on board the Bill of Health and Port Clearance upon departure.

Manifests – Should be certified by the Syrian Consulate at port of loading in 4 copies.

Ship's Registry – To be presented to the Port Authorities upon request.

Crew List – 4 copies should be handed over to the Agent along with passenger or transit manifests.

Store List – 2 copies required by Customs who will allow 40 cigarettes to be retained by each person on board, the balance of slop chest and stores shall be sealed during ship's stay in port. Customs officers are at liberty to search crew quarters.

Deratisation Certificate – Valid certificate required and no extension can be obtained.

APPROACHES: Vessels approaching the port should keep to the authorised passage defined by the following co-ordinates:

Lat. 34° 56′ 24″ N.	Long. 35° 38′ 00″ E.
Lat. 34° 56′ 24″ N.	Long. 35° 48′ 36″ E.
Lat. 34° 59′ 00″ N.	Long. 35° 50′ 00″ E.
Lat. 34° 59′ 00″ N.	Long. 35° 52′ 36″ E.
Lat. 34° 54′ 24″ N.	Long. 35° 51′ 12″ E.
Lat. 34° 54′ 24″ N.	Long. 35° 37′ 48″ E.

ANCHORAGE: Vessels proceeding to Tartous pick up Pilot at the Anchorage which is 0.5 miles S.W. of the main breakwater. The rocky bottom constitutes good holding ground with a depth of up to 20 m. of water.

MAX. SIZE: At present minimum depths are at the entrance of the harbour about 2 cables seaward of the green light on the S.W. Breakwater. Depth about 33 ft. Max. draft 32 ft. dependent on swell. Also see "Tankers".

RADIO: Tartous Radio, call sign YKO, continuous watch on 2182 kHz from 0600 to 2400 hrs.

BERTHING: Mooring Masters are temporarily supplied by Lattakia port and vessels should therefore contact Agents at Lattakia giving them their ETA and requirements. Vessels berth heading to the predominant S.W. winds, i.e. starboard side alongside unless contrary winds prevail at the time of the berthing.

Southern breakwater – 2,650 m. long called Main breakwater
Northern breakwater – 1,650 m. long called Lee breakwater

The distance between the 2 heads of these breakwaters is 250 m. with a depth of 10.5 m., which is being dredged in order to bring it up to 13 m.

The harbour is divided into 3 basins which are protected by the 2 breakwaters: (1) The North basin; (2) The Middle basin; (3) The Southern basin. The Southern basin is the only one used presently, for the discharge of cargo.

12 vessels can be moored at anchor inside the breakwater of this basin, the depth being between 8–13 m. The turning circle at the entrance is 450 m. diameter with a depth of 11–13 m.

The main quay which is 150 m. wide offers on its Southern side from the shore side 300 m. of jetty with a depth alongside of 2–4 m., 300 m. with 8 m. and 200 m. with 9 to 10.5 m. depth. A standard gauge railway line is installed on the entire length of the quay.

POLLUTION: See "Banias".

TANKERS: *Operator:* Syrian Crude Oil Transportation Co.

Maximum safe length of tankers acceptable – 1,500 ft.
Maximum safe draft of tankers acceptable – 68 ft.
Maximum deadweight of tankers acceptable – 100,000 tons.

There are 2 berths for loading:

No.	*Max. Rate*	*Sealine*	*Hoses*	*Depth of Water*
1 (North)	4,000 t.p.h.	1×28 in.	2×12 in.	76 ft.
2 (South)	5,000 t.p.h.	2×28 in.	2×16 in.×12 in.	72 ft.

Loading is by gravity and loading rate depends upon height of tank and level of oil. All strings of hoses are fitted with 12 in. butterfly valves.

ETA: It is essential that tankers bound Tartous Terminal, S.A.R. communicate with "YKM – 5", at least 48 hours, prior to arrival, stating cargo required, maximum loading rate, SWL of derrick and confirming that the ballast is clean, and the last ETA Tartous Terminal.

Confirmation of ETA: Tartous Terminal control is equipped with Channel 16. Arriving ships should make contact at least 2 hours before ETA Tartous anchorage area. It is in vessel's interest to make contact to avoid delay on arrival. Vessels not equipped with Channel 16 should contact "YKO" Tartous Control on frequency 2182 – 2662.

Notice of Readiness: Notice of Readiness will be accepted when vessel arrives in the very near vicinity of the anchorage area (Position Lat. 34° 57′ N., Long. 35° 49′ 45″ E.) where the Mooring Master, who is Company's representative will board and receive vessel and remain on board throughout the entire operation.

Pilot Ladder: Combination of accommodation and pilot ladder to be rigged, accommodation ladder to be lowered to within 12 ft. of water. Pilot ladder to be placed abaft and to within 3 ft. of water.

Anchorage: In the event of berth not being available or suspension of mooring operations on arrival a good anchorage is to be used South of the berths in the vicinity of the anchorage area.

Shore Control will keep vessel advised of expected time of berthing, etc.

It is important and in the vessel's interest to maintain a listening watch on Channel 16 or a visual watch on the shore Signal Station, to avoid delays.

On being advised of expected time "Mooring Master will board", heave short anchor before his arrival.

Moorings:

Forward: Anchors to be fitted with marker buoys with 20 fathom of line. 2×120 fathom mooring lines; 2 rope stoppers; 1 suitable wire stopper (preferably carpenter patent) for use with 4.75 in. – 5.5 in. circ. mooring wires.

Aft: 4×120 fathom mooring lines; 4 rope stoppers; 2 suitable wire stoppers (preferably carpenter patent) for use with 4.75 in. – 5.5. in. circ. mooring wires.

Boat Ropes: To be rigged on either side of ship and of not less than 4.5 in. circ.

Derricks and Cranes: SWL of 7 tons is recommended. it must be capable of plumbing overside abreast of loading manifold.

Loading Manifold: 2 suitable reducers to be fitted prior to arrival on port side and to be connected to the Oil Company's hose connections (12 in. series 150 flanges). The following tools to be available: 2 spanners 0.375 in., 2 spanners 0.875 in., 2 hammers 7 lbs., 1 axe 2.5 lbs.

Hose hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure submarine hoses on the port side.

Safety of Mooring: On completion of mooring operation vessel must have not less than 7.5 shackles of anchor chain in the water.

Ballast: No dirty ballast.

(a) The Port Authority is most strict and will impose heavy fines for any oil pollution of the sea. In addition they may order vessel out of the berth to sea to clean any such contaminated ballast, and keep it on board vessel in a separate or slop tank. N.O.R. will not be accepted until ballast becomes clean.

(b) Ensure ballast quantity on board is kept to a minimum to safe manoeuvre in the prevailing weather conditions.

(c) Excess ballast causes delay, Tartous is an open roadstead consequently sudden changes in weather can be experienced especially during the Winter months. It is good practice to commence loading as soon as hoses are connected and whilst ballast discharge is still in progress, always providing, this can be achieved safely and with no danger of contamination.

(d) Leakage or spillage of oil on board ship must be collected and not be swept or washed overboard.

Ship's Assistance: Ship's crew with an Officer in Charge to assist in All operations as advised by the Mooring Master. This includes lifting, connecting, disconnecting, lowering of hoses and tending anchor cables and moorings.

Deck Watch: A complete watch on deck must be maintained throughout the operation, especially towards the shore Signal Station to ensure safe loading and to avoid delays.

Deck Scuppers Plugs: Ensure scuppers are effectively plugged. On no account should plugs be removed.

Loading Operations: (a) Ship's personnel are solely responsible for the loading operations, ie. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to Shore Control. It is in vessel's interest *to advise loading rate required, also to give 30 minutes notice of expected time of commencing loading.*

(b) Should vessel require adjustments in the loading rate, please advise the Mooring Master, sufficient notice must be given to enable shore operators to comply. Failure to give proper warning may cause delay or a tank overflow on board.

(c) The Mooring Master will not transmit any loading instructions to the shore until the responsible ship's Officer has admitted that:

Ship is safely moored.
Hoses are correctly connected.
All valves have been set for receiving cargo.

Order to start will be taken as final.

Vessels in berth: Ships are not allowed to remain in berth for any reason when loading operation is stopped, or disconnect hoses and drop them into the sea unless authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold, poop, mooring area of sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on short notice. Repairs which will immobilise them must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores Provisions, etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress, launches or other craft other than Company launches must not lie alongside during the same period.

Tanker Safety Regulations: Must be strictly adhered to at all times. The Mooring Master is authorised to *stop all operations* should he consider that Safety Regulations are not being complied with.

Boarding: The boarding of vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Terminal Superintendent on application to ship's Agents and authorised Chandlers. This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

Vessel not allowed to send any crew or materials outboard for any reason before asking Agents for granting the official authority.

Guests: Masters wishing to receive guests on board should make arrangements through their Agents.

Action in case of emergency: In the event of fire, oil spillage or other emergency on the vessel

The Emergency Signal is

3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

Corridor: The corridor must be followed by vessel to Tartous Terminal:

Corridor Leading to Tartous Terminal

(a)	Lat. 34° 59′ 00″ N.	Long. 35° 50′ 00″ E.
(b)	Lat. 34° 59′ 00″ N.	Long. 35° 52′ 36″ E.
(c)	Lat. 34° 56′ 24″ N.	Long. 35° 38′ 36″ E.
(d)	Lat. 34° 36′ 24″ N.	Long. 35° 38′ 00″ E.
(e)	Lat. 34° 54′ 24″ N.	Long. 35° 37′ 48″ E.
(f)	Lat. 34° 54′ 24″ N.	Long. 35° 51′ 12″ E.

FRESH WATER: Unlimited supplies available to vessels berthed alongside the main pier.

FUEL: Only available in very limited quantities by tanker truck.

MEDICAL: Medical facilities are available, but serious cases may involve transportation to Lattakia or Damascus.

DEVELOPMENTS: A new quay for phosphate is now under construction 300 m. long and 4 m. depth and will be prolonged by a quay of 250 m. length and 11 m. depth for vessels loading phosphate up to 35,000 tons capacity. 1 shiploader, rate 1,000 t.p.h.

A dry dock will be soon under construction for repairing vessels and tankers with a capacity varying between 40 and 60,000 tons. Also 2 slip-ways for general overhaul for small vessels of 1,000 tons and less.

FLOATING CRANE: A floating crane of 100 tons lifting capacity available.

SHORE LEAVE: No amenities for the crew exist in the town of Tartous but crew may, if required, proceed ashore with a landing permit issued by the local security services.

WEATHER: See "Banias".

AUTHORITY: Harbour Master.

AGENT: Gulf Agency Co. (Syria) Ltd., Houssein Ali Building, Alnarges Street, PO Box 19, Tartous, Syria. Cables "Gacship", Tartous. Tel. 21897, 22287. Telex: Beirut 20906 or Athens 216344.

NOTES

Please also advise Shipping Guides Ltd.

Taiwan

HUALIEN: 23.59 N. 121.38 E.

PORT LIMITS: Radius of 1 mile from the centre of Hualien Kan Breakwater Beacon (23° 59′ 11.3″ N. 121° 38′ 35″ E.).

DOCUMENTS:

Ship's Register.
Derat Certificate.
Last Port Clearance.
Taiwan Tonnage Dues Certificate.
Pratique.
8 copies Crew List.
1 copy Crew List visaed by office of China Mission (applicable to American vessels).
8 copies Passenger List – landing and transit.
1 list showing dates of vaccination (within 3 years) of all crew and any landing passengers. WHO "Yellow Books" may be examined.
1 Chinese Maritime Customs Stores List.
1 list Foreign Currency in safe.
1 list Narcotics in safe.
1 list Arms and Ammunition.
1 set of copy Bills of Lading.
2 Manifests of Inward Cargo.
3 Manifests of Through Cargo.
2 lists of Unmanifested Inward Parcels.
2 lists of Mail for landing.
Vessel's Log Book.

PILOTAGE: Compulsory. At anchorage hoist 'G' flag.

ANCHORAGE: *Quarantine Anchorage:* Positions:

(A) Lat. 23° 58′ 30″ N. Long. 121° 36′ 50″ E.
(B) Lat. 23° 58′ 30″ N. Long. 121° 37′ 10″ E.
(C) Lat. 23° 57′ 50″ N. Long. 121° 36′ 50″ E.
(D) Lat. 23° 57′ 50″ N. Long. 121° 37′ 10″ E.

RESTRICTIONS: Hualien Harbour closed to all ships at 0000 until 0500 hrs. Large ships not allowed to enter after sunset.

MAX. SIZE: Draft not exceeding 8.5 m. and length 150 m. may enter Hualien Harbour at present time.

HEALTH: At anchorage hoist 'Q' flag.

RADIO: Hualien Radio XSY; ETA reported at least 24 hours before arrival.

TUGS: Normally used in harbour. Ship's lines should be used.

BERTHING: *Deep water wharf:* 1,238 m. (8 berths) capable of berthing 1×4,000, 3×6,000, 3×10,000 and 1×15,000 ton vessels, at the same time.

There is an additional 1,120 m. of deep-water wharves, with 6 berths which were built under the third extension project.

CRANES: 1×52 ton electric derrick crane.
6×3–25 ton mobile cranes.

STEVEDORES: Stevedores will be assessed against ships except when otherwise agreed between ships and consignees or shippers.

MEDICAL: Hospitalization can be arranged through Agent.

FRESH WATER: Hoses from water-lines to tanks.

FUEL: Fuel viscosity, special regular full SUS at 122°F, max. 225; regular full SUS at 85°F, min. 225; SUS at 122°F, max. 200; Diesel fuel viscosity, SUS, 100°F 35–45. Fuel line 6 in. connection, otherwise notify in advance.

DEVELOPMENTS: The outer harbour extension began 1978 and will be completed in 1985. The project will increase the berthing capacity to 25 ship berths.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES:

Ship's Nationality Certificate.
Passenger ship Safety Certificates.
Cargo ship Safety Construction Certificates.
Cargo ship Safety Equipment Certificates.
Cargo ship Safety Radiotelegraphy (Radiotelephony) Certificates.
International Load Line Certificate.

IDENTIFICATION CARDS: Passport or Seaman's book required.

AIRPORT: Domestic airport connected to Taipei and Kaohsiung International Airport.

TIME: GMT plus 8 hours.

AUTHORITY: Hualien Harbour Bureau.

KAOHSIUNG: 22.37 N. 120.16 E.

PORT LIMITS: Ship considered to be an "arrived vessel" when anchored at either of following locations:

1. Northern anchorage: Within 2 miles radius off Kaohsiung Lighthouse (22° 38′ 01″ N. 120° 15′ 25″ E.) forming a sector between Southern side of outer harbour channel toward shore line Southward.

2. Southern anchorage: Within a radius of 2.5 miles from the signal station of the second harbour entrance (22° 33′ 21″ N. 120° 18′ 26″ E.) forming a sector between Northern side of outer harbour channel toward shore line Northward.

3. For VLCC to discharge at 2 Monobuoys: SBM No. 1 position 22° 30′ 29″ N. 120° 17′ 49″ E. SBM No. 2 position 22° 29′ 45″ N. 120° 16′ 41″ E. Tankers are to anchor 1.5 miles West of the respective SBM as directed by Agents.

DOCUMENTS:

10 Crew Lists.
1 Customs Stores List (plain form acceptable).
1 Narcotic List.
1 Foreign Currency List.
1 Crew's Declaration List.
1 Arms and Ammunition List.
1 Parcel, Passenger and Mail List (all nil items may be put in one statement).
1 Set of Bills of Lading and Manifests if any.

PILOTAGE: Compulsory. Agents will arrange for Pilot to board vessel at anchorage outside breakwater. Pilot boat flies code flag "H".

Containerships over 15,000 g.r.t. and other freighters or tankers over 200 m. LOA must take 2 Pilots at double pilotage.

ANCHORAGE: See "Port Limits".

RESTRICTIONS: Containerships can enter and sail 24 hours a day. Other vessels up to midnight only. Vessels with max. draft 34 ft. must await high water to enter via Northern entrance.

MAX. SIZE: Length and breadth no restriction (largest containership entered: 950 ft. LOA and 106 ft. beam). Max. draft inner harbour 34 ft. during high tide. Tankers with draft over 34 ft. discharge at Monobuoy outside.

HEALTH: Free pratique granted at anchorage after Master completes Quarantine Declaration Form furnished by quarantine doctors. No radio pratique available. No quarantine necessary if second port in Taiwan.

Shipmaster's Report: Master visited the port in 1976 and Cholera Certificates were not requested for inspection.

RADIO/VHF: Kaohsiung Radio (XSW). Normally used by Agents when cabling vessels. Contact with the Agent and Port Authorities may be made via Kaohsiung Port Radio on VHF Channel 16. Call Port Radio on Channels 16/14, 156.8 mHz. 1 hour before arrival to report ETA at Kaohsiung Roads.

TUGS: Harbour tugs usually join vessel after entry and while berthing. Ship's lines always used. Largest tug 2,400 h.p.

BERTHING FACILITIES: No specific requirement except bulk-carriers and tankers with max. draft of 34 ft. must berth during high tide.

Wharves: There are at present 55 wharves (including 2 shallow-water berths) with a total length of 10,582 m., capable of accommodating 66 ships. Buoys: The harbour has in all 37 mooring buoys capable of berthing 26 ocean-going ships of various sizes.

Container Terminals: No. 1 – consists of 3 berths Nos. 41–43. Berths Nos. 42–43 served by 1 MHI 35-ton gantry crane. 4 straddle-carriers available for 20 ft./40 ft. containers.

No. 2 – Includes 4 berths Nos. 63–66. Berths Nos. 64–66 are leased to lines for exclusive use. Berth 63 is the only common user berth. Container handling equipment includes 6 SIS gantry cranes and 20 straddle-carriers for handling 20 ft./40 ft. containers.

No. 3 – Planned to build 3 berths Nos. 68–70. first Berth No. 68 completed 1977. Each berth 320 m. long with water depth 14 m. and will have 2 gantry cranes and 4 travel-lifts.

Grain and other bulk handling equipment: For grain, there are 2 silos of 40,000 tons capacity each, unloading rate 300–400 t.p.h. Another 80,000-ton silo being built. 105 grabs also used to discharge grain by ship's gear at hourly rate of 40–50 tons per gang/hour. For heavy lifts, there are 3 floating cranes of 120, 60 and 30-ton capacity available.

STEVEDORES: All Government stevedores ordered by Agents as required.

MEDICAL: No advance notice required unless emergency case. Vaccination Certificates against smallpox (3 years) and cholera inoculation (6 months) required.

See "Health" – Shipmaster's Report.

TANKERS: Discharge lines at oil terminal inside harbour 8 in. (2 berths), and 12 in. at Monobuoy outside with necessary reducers supplied from ashore. In latter case, Master must inform Agents size of ship's manifold.

There are two Monobuoys situated about 7 miles S.S.E. of the Northern Anchorage. Their positions are:

SBM No. 1 – 22° 30′ 29″ N. 120° 17′ 49″ E. A white flashing signal light is mounted at the centre of the buoy with a range over 5 miles. The light appears for 1 second and goes off for 2, it then appears for 1 second and goes off for 11 seconds. This cycle is repeated. The area around the mooring buoy has a depth of 68 ft. and can accommodate tankers up to 140,000 d.w.t. The current runs at a maximum of 2.5 knots.

SBM No. 2 – 22° 29′ 45″ N. 120° 16′ 41″ E. depth around the area about 98 ft. capable of discharging tankers up to 250,000 d.w.t. Characters of signal light mounted at the centre of the buoy: White flash 1 second on and 1 off for 3 times then 1 second on and 8 seconds off in that cycle.

The 2 buoy moorings have facilities for 2×12 in. hose connections. Bunkers and fresh water not obtainable. Stores can be arranged for delivery by boat. Other services available to tankers at the buoys are confined to those of urgent nature.

VLCC's programmed to use the SBM Terminal are required to anchor 1.5 miles West off the respective SBM for arrival clearance. Pilot/Quarantine/Immigration, Cargo Supervisor and his hose-handling party board in this vicinity from a tug. After the discharge of cargo, the vessel is required to proceed to the Northern Anchorage to receive sailing clearance.

DENSITY: Average 1015 in Summer, 1023 in Winter.

FRESH WATER: Most berths supplied from shore line, otherwise from barge paying additional lighterage.

FUEL: All grades, mostly received from barge. Owners must contact suppliers for nomination through Chinese Petroleum Corp. before ship's arrival.

FIRE PRECAUTIONS: No specific regulations, but routine precautions should be enforced.

DEVELOPMENTS: 8 new wharves for handling bulk cargo were added in 1976. No. 3 Container Terminal with first of 3 berths (No. 68) completed in 1977 (Length 320 m. each, depth 14 m.).

GANGWAY/DECK WATCHMEN: Recommended, to meet local security requirement.

OPENING/CLOSING HATCHES: Mostly handled by stevedores except steel hinged covers, which are to be done by crew.

CERTIFICATES: Ship's registry, Load-line, Safety Construction, Safety Equipment, Safety Radio-telegraphy and Derat Exemption Certificates must be inspected by Customs/Harbour Authorities.

CUSTOMS ALLOWANCE: 200 cigarettes or 1 box cigars and 1 bottle of wine or spirit allowed each. Application can be made to break seal for next issue once every 4 days.

CARGO GEAR: No additional requirements, but Cargo Gear Certificate must be valid.

IDENTIFICATION CARDS: Not required.

CONSULS: All in capital city Taipei, 230 miles North of Kaohsiung.

REPAIRS: China Shipbuilding provide 1,800 m. of quaywall and can handle any kind of repairs.

DRY DOCK: China Shipbuilding Corp. have a dry dock of 950 m. long with breadth 92 m. and average depth of 14 m. This dry dock is separated into 3 stages by 2 intermediate gates in between, of 380/390/180 m. respectively. Each stage can be independently operated to facilitate fabrication of ship sections, as well as to dock and repair ships.

A floating dock "Viva Island" LOA 174 m. with distance between side walls of 30 m. Draft over keel blocks 7.3 m. with lifting capacity of 11,500 tons.

REPATRIATION: Crew changes arrangeable.

AIRPORT: 7 miles from main port area. Presently linked with Hong Kong, 1 return flight daily.

TIME: Local: GMT plus 8 hours. No alteration during the year.

HOLIDAYS: New Year's Day (Jan. 1st–2nd); Youth Day (Mar. 29th); Ancestors' Memorial Day (Apr. 5th); Labour Day (May 1st); Dragon-boat Day (5th day of 5th Lunar Month); Mid-Autumn Festival (15th Day of 8th Lunar Month); Confucius' Birthday (Sept. 28th); National Day (Oct. 10th); Taiwan Restoration Day (Oct. 25th); Late Pres. Chiang's Birthday (Oct. 31st); Dr. Sun's Birthday (Nov. 12th); Constitution Day (Dec. 25th); and Chinese Lunar New Year's Day (2 days mostly in Feb.). No work on New Year's Day (Jan. 1st), Labour Day (May 1st) and Chinese Lunar New Year's Eve and New Year's Day. Double stevedoring rates for rest of holidays.

POLICE/AMBULANCE/FIRE: Police and Ambulance: call 562311 Ext. 441; Fire: 562311 ext. 441 or 226119.

TELEPHONE: Telephone available for ships alongside wharf.

SERVICES: Laundry, ship-chandler and competent technicians available for repair of radar, radio, compass adjusting and other navigational aids. Tank cleaning equipment and facilities not available.

SHORE LEAVE: Normally arrangeable.

REGULATIONS: No curfew exists. Port opened for containerships 24 hours day and night; for other vessels between 0600–2300 hrs. only. Vessels flying flag of nations without diplomatic relation with the Republic of China must send 1 copy each of ship's photo (8 in.×10 in. broadside) and photocopy of Registry or Tonnage Cert. and 10 crew lists for application of entry permit.

DELAYS: With rapid extension of the harbour and more new wharves and container terminals built. Delay has been considerably reduced and very rarely occurs.

AUTHORITY: Kaohsiung Harbour Bureau.

KEELUNG: 25.08 N. 121.45 E. (See Plan Book)

PORT LIMITS: Any ship is considered to be an "arrived ship" once she has reported to Keelung Harbour Radio Station whether or not actually entering the outer harbour. However, Quarantine and Customs Inspectors do not attend ships outside the breakwaters due to lack of adequate transportation also they do not consider any ship an "arrived ship" unless she actually enters the outer harbour.

DOCUMENTS:

Ship's Registry.
International Load Line Certificate.
International Safety Certificate.
Last Port Clearance.
Crew List.
Fumigation Certificate.
Import Manifests.
Through Cargo List.
Store List.
Arms and Ammunition List.
Narcotics List.
Foreign Currency List.
Parcel List.
Passenger List.
Yellow-book for every person on board (Vaccination Certificate).

PILOTAGE: Compulsory from anchorage to dock and any other movements in port. Pilot may also meet ships within 1 or 2 nautical miles North of breakwaters, commencing sunrise till sunset upon ship's/agent's request. While waiting outside breakwaters for a Pilot, vessels shall keep adequate space and take care of both ship's and Pilot's safety. Before arrival, vessels shall contact Keelung Harbour Radio Station (25° 09′ 42.5″ N. 121° 44′ 57.5″ E.) via VHF on Channel 16 to ascertain Pilot's exact boarding time.

ANCHORAGES: Area in outer harbour is 8 to 16 m. in depth and can only contain 8 ocean-going vessels at a time. Vessels may also anchor outside breakwaters for Pilots or entry instructions.

RESTRICTIONS: Keelung Harbour Radio Station consists of Naval Harbour Control Signal Station and Harbour Bureau Signal Station. The former control the entry and exit of all the vessels with the latter's assistance. Any ship shall apply in advance of her actual entry/exit by light signal or via VHF to Keelung Harbour Radio Station and shall not leave dock nor weigh anchor nor sail and remain close to harbour entrance before obtaining from Naval Harbour Control Signal Station the signal permit to entry or leave.

HARBOUR APPROACHES: At a location of 2.5 nautical miles N.N.W. from Keelung Isle ships should take Wan Jen Tsui Pi lighthouse and Chiu Tzu Shan lighthouse as coordinates and sail in on course of true bearing 201°. When 2 nautical miles North from harbour entrance, ship's course should be adjusted for entry. Ships should allow adjustment for their planned course and speed and should pay special attention to Hsin Lai Reef, East Breakwater, wind and current.

MAX. SIZE: Max. possible overall length less than 900 ft. Vessels or Agents shall declare ETA to Harbour Bureau 24 hours prior to their arrival.

HEALTH: Radio pratique not possible. Pratique will be granted when vessel is in anchorage. Stool test will have to be conducted for all Crew members if the vessel arrives from an affected area within 5 days.

RADIO:

1. Call Name: Keelung Harbour Radio Station is called Keelung Port Radio (or K.P.R.).
2. Channel:
   (1) Channel 16 (156.8 mHz.) is a duty channel, used for establishing communications.
   (2) Channel 14 (156.7 mHz.) is used for longer communications after making contact on Channel 16.
   (3) Channel 12 (156.6 mHz.) is a spare Channel, used for emergency.
3. Communication Contents:
   (1) Messages for vessels to enter or exit.
   (2) Matters concerning navigation and anchorage.
   (3) Other Emergencies.
4. Communication Distance: Any waters within diameter of 10 nautical miles from this station.
5. Priority:
   (1) Emergency salvage at sea.
   (2) Messages for vessels waiting outside breakwaters for entry instructions.
   (3) Messages for vessels at anchor in outer harbour.
   (4) Messages for vessels departing.
6. Languages to be used:
   (1) Mandarin.
   (2) English.
7. Remarks: Communications always in plain languages. Any codes or private conversations are not allowed unless approved by officers in charge.
8. Vessels shall contact Keelung Harbour Radio Station via VHF as soon as they are 10 nautical miles from the harbour and shall not be considered as "reported" unless answered by the station. The reporting time is to be counted for the basis for allocating berths. The report includes:
   (1) Nationality.
   (2) Vessel's Name.
   (3) Call Letters.
   (4) ETA Outside Harbour.
9. Communication Procedures: In accordance with international radio communication procedures.
10. Vessels without VHF or with VHF out of operation and thus unable to report earlier to Keelung Harbour Radio Station (25° 09′ 42.5″ N. 121° 44′ 57.5″ E.) shall contact the station by light signal until answered, as they report when vessel arrives within the visual scope of Ton Pan Yu Signal Station (domiciled with Keelung Harbour Radio Station) in the waters outside the harbour. The report includes:
    (1) Nationality.
    (2) Vessel's Name.
    (3) Call Letters.
    (4) Actual arrival time or anchoring time outside the harbour.
11. Vessels unable to report by light signal through lack of power shall use other means to report same information as indicated in item 10 above or hoist vessel's call letters enabling registration at the station.

RADAR/VHF: No radar service to aid navigation in port. VHF and flashing lamp only used on ship's arrival. However, Pilots carry pocket walkie-talkie's to communicate with tugs and line-men on dock.

TUGS: Three tugs with 2,000 to 2,400 h.p. and 3 other tugs with 1,500 to 1,700 h.p.

BERTHING: Docking during daytime, and also during night-time if weather permits.

SPECIALISED CARGO HANDLING FACILITIES: Wharves No. 2 to 4 and 14 to 18. 2 at 4 tons stationary shore cranes on each wharf.

Berth 2 and E2, passenger ships (and cargo ships if no passenger ships in port).

Berth 21, for receiving ore, sulphur, etc., and loading fertiliser.

Berth 22-26, for container ships and "lash" vessels. Equipment includes 4 gantry cranes capacity 35 tons. 12 straddle-carriers for 20–40 ft. containers and 1 side-loader for 20–40 ft. containers.

Berth 30, 3 elevators for grain in bulk. Max. capacity 600 t.p.h., average capacity 480 t.p.h.

CRANES: 21 mobile cranes, capacity 10–100 tons, 17 wharf cranes, capacity 3–30 tons. 4 container cranes, capacity 35 tons, 4 floating cranes, capacity 90 tons, 60 tons, 50 tons and 30 tons.

Other equipment: 260 forklifts, capacity 1–40 tons; 40 electric platform trucks; 8 towing tractors; 5 portable pneumatic unloaders, and 30 grab buckets.

STEVEDORES: Owned and operated by Harbour Bureau, a government agency. Stevedores paid by tonnage instead of hours. Stowage plan and cargo details must be presented to concerned offices 24 hours prior to operation.

MEDICAL: All clinics and hospitals in Keelung area with English-speaking doctors and modern hospitals available in Taipei, a city 30 km. away.

TANKERS: Wharf No. 33 specially reserved for tankers, draft limited to 35.6 ft.

DENSITY: 1002 to 1023.

FRESH WATER:

1. Water supply facilities: Every wharf equipped with 2 hydrants of 2.5 in. in diameter, each tap delivering at rate of above 20 t.p.h.
2. 5 water barges, each barge delivering at rate of over 60 t.p.h.
3. Price:
   (1) Water supplied alongside priced at NT$40.00 (current exchange rate NT$38.00 to US$1.00) per ton.
   (2) Water supplied by barges at NT$63.00 per ton.
4. Application: Ships/Agents shall notify Harbour Bureau as early as possible if they need fresh water.

FUEL: Bunkers available subject to ship's/Agent's advance notice to C.P.C. who operate the bunker facilities.

FIRE PRECAUTIONS: Special wharves for tankers, wharves No. 33 and 33B having automatic fire equipment; fire brigade and fire boats available.

GANGWAY/DECK WATCHMEN: Harbour policemen always assigned by authorities at gangway free of charge. Other gangway/deck watchmen are recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, excepting new designs on modern vessels.

CUSTOMS ALLOWANCE: (1) Each Crew member allowed 200 cigarettes in bulk or half a pound of tobacco. (2) Each Crew member allowed 1 opened bottle of wine and 1 dozen cans of beer. Tobacco and wine stored in store room for purser must be declared and are limited to 3 cartons of cigarettes and 3 bottles of wine. Slopchest will be sealed on arrival.

IDENTIFICATION CARDS: Passport or other identification papers are needed.

CONSULS: None. Mostly stationed at Taipei.

REPAIRS: Any ship which needs repairs must itemise repairs and declare them to Harbour Bureau via shipping company or Agent and then the repairs will be carried out in accordance with the relating articles under Administration Regulations on Harbour Business for Taiwan Provincial Commercial Harbours. As to docking, ships may deal with China Shipbuilding Corp. Keelung Dockyard or Keelung Harbour Bureau repair plant via shipping companies or Agents.

DRY DOCK: China Shipbuilding Corp. Keelung Dockyard has 2 dry docks, 1 for vessels under 100,000 tons and another for 25,000 tons. Keelung Harbour Bureau Repair Plant has 1 dock for vessels under 5,000 tons.

REPATRIATION: Crew repatriation usually carried out through International Airport in Taipei, and Immigration prefer either individual or group visa for landing crew from ship.

AIRPORT: International airport in Taipei only 30 minutes by car.

TIME: GMT plus 8 hours. No alterations.

HOLIDAYS: New Year's Day (1st–2nd Jan.); Lunar New Year's Day (2 days in Feb.); Youth Day (29th Mar.); Labour Day (not a national holiday but only for labourers) (1st May); Dragon Boat Day (1 day in June); Mid-Autumn Day (1 day in September); Confucius Birthday or Teachers' Day (28th Sept.); National Day (10th Oct.); Taiwan Restoration Day (25th Oct.); late President Chiang's Birthday (31st Oct.); Dr. Sun's Birthday (12th Nov.); Constitution Day (25th Dec.).

POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbour Police or ship's Agent will act in emergencies.

TELEPHONE: Local telephones available to be placed on board.

GENERAL: Shore pass issued by Immigration for each Crew member on ship's arrival and will be collected on ship's departure. Anyone who loses a shore pass is subject to fine.

SHORE-LEAVE: Crew allowed ashore except for Crew members from Communist countries.

REGULATIONS: Searching for stowaways is strictly carried out on arrival and departure.

Discharge of smoke, tank washings, garbage, etc., not allowed.

DELAYS: Keelung has rainfall on about 210 days in a year, port is sometimes congested after continuous rain.

AUTHORITY: Keelung Harbour Bureau.

SUAO: 24.36 N. 121.51 E.

SHIPMASTER'S REPORT: February 1979.

PORT LIMITS: Radius of 1 mile from North Point Lighthouse.

DOCUMENTS: Ship's Register. Derat Certificate, Last Port Clearance, Taiwan Tonnage Dues Certificate (valid 1 year), Crew List (8 copies), Stores List, Vaccination List and Yellow Book, Foreign Currency in Safe, Narcotics List, Bills of Lading, manifest of Inward Cargo, manifest of Through Cargo, Mail and Parcels List. Also see "General".

PILOTAGE: Compulsory, at anchorage hoist "G" flag.

ANCHORAGE: Water area from North shore to South shore, depth 14 to 31 m. and outer depth over 30 m. Ship may anchor and remain outside breakwater (under construction) when waiting for Pilot, or entry instructions.

RESTRICTIONS: Permission to enter must be granted by naval signal station located on North shore, ship's Agent should give ship's ETA to Port Authority of Keelung 24 hours before arrival. Port closes from 0001 to 0500 hrs. daily.

MAX. SIZE: Max. draft 10 m. and LOA less than 150 m. (7 berths under construction).

HEALTH: Radio pratique not possible. Quarantine will clear vessel in anchorage area. Stool test will be conducted if vessel arrives from an affected area within five days.

RADIO: Radio Keelung, send cables to Harbour Master Keelung, or Agent. Report ETA, draft, etc.

VHF: Channel 16 – 156.8 mHz for calling. Call sign "Keelung Harbour Radio".

TUGS: Port Authority tugs assist with mooring and unmooring. Ship's lines used.

BERTHING: Docking during daytime and sometimes at night time, Pilot compulsory. Vessel usually anchors in outer harbour for pratique and inspection.

SPECIALIZED CARGO HANDLING FACILITIES: The port has no special facilities for bulk and container handling cargoes, but will have by 1981. For the present time ship's derrick only for logs, timber, cement and general cargo.

STEVEDORES: Arranged by local Agent.

MEDICAL: Clinics with English speaking doctors available, modern hospitals available in Lotung, Ilan and Taipei by train or by car, 20 minutes, 30 minutes and 2 hours away respectively.

DENSITY: 1025.

FRESH WATER: Available, subject 24 hours advance notice.

FUEL: Bunkers available in Keelung, but this port requires 7 days advance notice. Fuel barge operated by C.P.C.

DEVELOPMENTS: First stage of five year development plan being carried out. After completion which is expected in 1981, every year cargo handling quantity will be 6,300,000 tons. 7 new deep water berths including 2 container berths, will be completed in 1981.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by Authority for gangway, free of charge.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: International certificate, safety equipment, safety construction, safety radio, load line, cargo gear, etc.

CUSTOMS ALLOWANCE: Each Crew member allowed 200 cigarettes for own use and one bottle of wine for entertaining and for own use, Master enjoys some privileges and can keep additional cigarettes for entertaining.

IDENTIFICATION CARDS: Shore pass for the foreigners issued by immigration office according to the passport or other indentification papers.

CONSULS: None.

REPAIRS: Minor repairs can be carried out in port.

REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan, near Taipei.

AIRPORT: International airport in Taoyuan, 1.5 hours by car from port.

TIME: GMT plus 8 hours. For local time check in Chinese, dial telephone 117 (free of charge).

HOLIDAYS: New Year's Day (1st–2nd, January), Lunar New Year's Days (2 days in February), Youth Day (29th March), Labour Day (1st May), Confucius Birthday (28th September), National Day (10th October), Taiwan Restoration Day (25th October), Dr. Sun's Birthday (12th November), Constitution Day (25th December).

POLICE/AMBULANCE/FIRE: The gangway guard assigned by harbour police or ship's Agent will act in emergencies; in case of fire dial 119. Police and ambulance dial 110.

TELEPHONE: Local telephones available to be placed on board.

GENERAL: 3 Crew Lists sent by airmail from last port to Agent. Shore pass issued by immigration office for each Crew member on ship's arrival and will be collected on ship's departure.

SHORE LEAVE: Crew allowed ashore, except for Crew members from Communist countries.

REGULATIONS: Crew cannot shelter any unlawful person on board. Searching for stowaways is strictly carried out on arrival and departure.

DELAYS: Port is sometimes congested after continued rain and delays of a few days may be caused.

AUTHORITY: Harbour Master or Ministry of Communications, Taipei.

24.15½ 120-30

TAICHUNG: 24.17 N. ~~119.30~~ E.

SHIPMASTER'S REPORT: February 1979.

PORT LIMITS: Radius of 1.5 miles from centre of the entrance between North and South breakwater.

DOCUMENTS: Ship's register, safety equipment, safety construction, safety radio, load line, derat certificate, sanitary certificate, last port clearance, Taiwan tonnage dues (valid 1 year), crew list, passenger list, vaccination list and yellow book, stores list, foreign currency in safe, narcotics list, arms and ammunition list, bills of lading, manifest of inward cargo, manifest of through cargo, mail and parcels list. Also see "General".

PILOTAGE: Compulsory, at anchorage hoist "G" flag, contact Taichung port radio on VHF Channel 16.

ANCHORAGE: Water area in port limits, except entrance channel, can be used for anchoring, depth from 10 m. to 20 m. Ship may anchor and remain outside breakwater when waiting for Pilot.

RESTRICTIONS: Permission to enter must be granted by signal station. Ship's Agent to report ETA to Port Authority 24 hours before arrival. Port closed from 0001 to 0500 hrs. daily.

MAX. SIZE: Max. draft 10 m. and LOA less than 150 m., (second stage 7 berths under construction).

HEALTH: Radio pratique acceptable, also quarantine will clear vessel at anchorage. Stool test will be conducted if vessel arrives from an affected area within 5 days.

RADIO: Via Radio Keelung or Radio Kaohsiung. Send cables to Agent or "Harbour Master Taichung" report ETA, draft, etc.

RADAR: No radar service to assist navigation in port.

VHF: Channel 16 (156.8 mHz) for calling purposes, call sign "Taichung Port Radio". VHF is used on ship's arrival. Pilots use walkie-talkies to communicate with tugs and mooring men on dock.

TUGS: Authority tugs assist mooring and unmooring, ship's line used.

BERTHING: Docking during daytime and sometimes night time, Pilot compulsory, vessels usually anchor outside the breakwater for pratique and inspection. But if radio pratique granted, vessel can enter port. Contact signal station by VHF to get instructions.

SPECIALISED CARGO HANDLING FACILITIES: Container terminal handling equipment includes straddle carriers for handling 20 to 40 ft. containers (under construction).

STEVEDORES: Owned and operated by Port Bureau.

MEDICAL: Clinics and hospital with English speaking doctors available at City of Taichung, 30 km. from port.

DENSITY/TIDE: 1023/High tide and low tide difference 4.5 m., when alongside pier keep watch on moorings.

FRESH WATER: Available, no limitation on quantity.

FUEL: Ordinary bunkers available but 3–5 days advance notice required. Fuel barge operated by C.P.C.

DEVELOPMENTS: The second and third stage development plan is being carried out. After completion which is expected in 1983 cargo handling capacity will be 12,000,000 tons per year.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by authority at gangway free of charge.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, except new designs on modern vessels.

CUSTOMS ALLOWANCE: Each Crew member allowed 200 cigarettes and 1 bottle of wine for own use. Bonded store will be sealed on arrival.

IDENTIFICATION CARDS: Shore pass for foreigners issued by Immigration Office according to the passport or other identification papers.

CONSULS: None.

REPAIRS: Minor repairs can be carried out in port.

REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan near Taipei, or Kaohsiung. About 200 km. from this port.

TIME: GMT plus 8 hours. For correct local time dial tel. 117, time report in Chinese, free of charge.

HOLIDAYS: New Year's Day (1st–2nd January), Lunar New Year's Day (2 days February), Youth Day (29th March), Labour Day (1st May), Confucius Birthday (28th September), National Day (10th October), Taiwan Restoration Day (25th October), Dr. Sun's Birthday (12th November), Constitution Day (25th December).

POLICE/AMBULANCE/FIRE: The gangway guard assigned by harbour police or ship's Agent will act in emergencies. Fire and ambulance tel. 119. Police tel. 110.

TELEPHONE: Local telephone available to be placed onboard.

GENERAL: 3 crew lists airmailed from last port to the Agent, shore pass issued by immigration officer for each Crew member on ship's arrival and will be collected on ship's departure.

POLLUTION: Harbour Master prohibits discharge of tank washings, etc. in port.

SHORE LEAVE: Crew allowed ashore except for Crew members from communist countries.

REGULATIONS: Searching for stowaways is strictly carried out on arrival and departure.

DELAYS: Strong monsoon winds and heavy swell in the Winter, and in Summer approaching typhoon may cause congestion and delays for a few days.

AUTHORITY: Harbour Master, or Ministry of Communications, Taipei.

NOTES

Please also advise Shipping Guides Ltd.

Tanzania

GENERAL: *All Ports: (Ship's Officer's Report):* The Boarding Customs require crew declarations on their special form duly signed by each individual member of crew. The excess private property or the items not required during the ship's stay in port, are to be collected and placed in a locker or room and sealed by the Customs. This seal has to be kept intact even in the case of the vessel sailing from Tanzania to Kenya or vice versa. On arrival at the next port, the previous Custom's seal is replaced by the local authorities. No new crew declaration is needed if once filed at first port. However, it is recommended that an extra copy of the crew declaration is kept on board as a record in case it is requested by the local authorities.

CHAKE CHAKE: 05.14 S. 39.46 E.

DOCUMENTS, HEALTH: Refer to "Zanzibar", where vessel required call for clearance by Port Officals.
PILOTAGE: Not compulsory, but restricted to daylight only.
RESTRICTIONS: Entrance approached through Owen Channel or through passage between Mesale Island South and Ras Kingojelin. Depths from 10 to 22 fathoms but there are patches of 2.5 fathoms. Narrowest part of channel is 1.5 cables wide.

Vessels may enter and leave at any state of the tide, but in daylight hours only.
ANCHORAGE: No mooring buoys. Vessel's work cargo to lighters. Depth decreases to 3 fathoms for coastal anchorage off Ras Banani.
MAX. SIZE: 170 ft. length: 15 ft. draft.
TUGS: Not available and not required.
FRESH WATER: Not available.
FUEL: Not available.
AUTHORITY: See "Zanzibar".

DAR-ES-SALAAM: 06.50 S. 39.17 E.

PORT LIMITS: The port of Dar-es-Salaam includes all tidal waters enclosed by a boundary which, commencing at high water mark at a point S.E. of Ras Koronja (approximately 9.66 km. East of the city of Dar-es-Salaam), follows a straight line due North to the West tip of the Outer Sinda Island. Thence a straight line to Makatumbe Lighthouse, thence a straight line drawn to South tip of Mbudya Island, thence a straight line drawn 254° to the high water mark at a point on the mainland South of the entrance to Mto Peremji. Thence following the high water mark around Msansani Bay, Dar-es-Salaam Inner Harbours to the first point due South of Outer Sinda Island.
DOCUMENTS:

Health Certificates (forms supplied by Pilot).
6 Crew Lists.
10 Passenger Lists.
Ships Manifest.
Heavy Lift List.
Dangerous Cargo List.
Ship's Register.
Declaration and Advice of Consumable Stores (Form C-7 supplied by Customs).
Crew Declaration (Form C-8 supplied by Customs).

PILOTAGE: Compulsory South of Makatumbe lighthouse, for all vessels over 200 n.r.t. The pilot launch is painted white and shows the conventional day and night signals.Vessels wishing to enter must await the arrival of the pilot launch at the Outer Anchorage, and, if necessary, must anchor clear of the leading marks. During the hours of darkness ships entering or leaving the port are limited to 485 ft. LOA on tides not exceeding 9 ft. range.
ANCHORAGE: Anchorage outside in 7-8 fathoms, sheltered by Nakatumbe Island during S.W. monsoon but exposed to swell in N.E. monsoon.

Shipmaster's Report: In good weather tankers waiting can anchor in a depth of 18 m., 12 cables from Makatumbe Light true bearing 250°.
RESTRICTIONS: Movements in and out of the basin are subject to restrictions depending on drafts and state of the tide at Spring tides. Tankers, vessels over 135 m. LOA and vessels carrying explosives are not allowed to leave or enter during hours of darkness.

There is a signal station (with tower, flagstaff and red roof) on East Ferry Point (Lat. 6° 50' S, Long. 39° 18' E.). Entry prohibited signals are: day signal – black flag on masthead; night signal – 3 red lights disposed vertically, and distant signals – black square on white background.

The entrance channel at North end of the basin is about 1.25 miles in length from its outer entrance between the edges of the banks fronting North and South Reefs to the Inner Harbour, South of West Ferry Point.

There is a sharp bend in the channel at West Ferry Point. Minimum depth of 6.7 m. LWOST, and minimum width of 128.02 m. between the 4 fathoms contour lines. A very strong ebb and flood runs through the channel at periods of Spring tides. Maximum current at Spring tides – 3.5 knots. During period of S.E. monsoon strong winds and heavy seas may make entry difficult, but in Inner Harbour port working is normally unaffected by weather.
MAX. SIZE: Twin-screw vessels not exceeding 182.9 m. Draft 10.1 m. at HWOST, 7.0 m. at LWOST, and 9.1 m. at HWNT and single-screw vessels not exceeding 175 m. Tankers LOA 175.26 m., 36,000 d.w.t., and draft 9.75 m. Also refer to "Mjimwema".
HEALTH: Radio Port Health officer giving ETA, name last port and health condition of passengers and crew. "Q" flag to be displayed until free pratique given.
BERTHING: In the Inner Harbour there are mooring and anchorage berths for up to 9 deep-sea ships ranging from 350 ft. to 600 ft. (106.48 – 182.88 m.) in length and from 23 ft. to 30 ft. (7.01 – 9.14 m.) in draft.

Deep water quays total length 2,013 m. comprising berths numbers 1-11 with 10.06 m. in depth at LWOST.

Accommodation:

Harbour sheltered and roomy, water area 95.9 ha; consists of tidal basin and Southern Creek, the latter having 11 deep-water berths. Anchorage in basin and creek.

		Depth	*Max. length*
"A"	Stern mooring	9.1 m.	183 m.
"B"	Moored Mooring	7.6 m.	153 m.
"C"	Moored mooring	7.6 m.	183 m.
"D"	Single Anchor	7.3 m.	183 m. waiting berth only.
"F"	Moored, buoys and anchor	7.3 m.	152 m.
"G"	Buoys	7.3 m.	168 m.
"H"	Buoys	7.1 m.	168 m.
"K"	Moored, buoys and anchor	9.1 m.	183 m.

In addition there are 2 coaster anchorages. The Southern Creek, at the South-east corner of the basin had a navigable distance of 1.5 miles for ships drawing up to 30 ft. of water.
CARGO HANDLING FACILITIES: The port has no special facilities for bulk handling cargoes but, subject to advance notice being given, vacuvators and grabs can be made available.

Equipment and other facilities:

Deep water vessels berthed in stream are loaded and discharged by lighters. At the lighter quay there are 8 electric portal cranes for working the lighters (1 × 5-ton and 7 × 3-ton), on the main quay, the port has 6 × 7-ton and 21 × 5-ton. There are 8 other portal cranes on the stacking yards as per details below:

(a) Belbase (AMI) — 2 × 10-ton cranes.
(b) Tanzania — 3 × 5-ton cranes.
(c) Yard 5, 6 & 7 — 1 × 7-ton and 1 × 7-20 ton Gosna Cranes
(d) Yard 8 — 1 × 5-ton Conrad.

11 other Canadian portal cranes are still under construction at yard 8/9.

Mobile Cranes: 2 × 30-ton, 13 × 11 – 7-ton, 14 × 6-ton, 2 × 4-ton and 1 × 60-ton (Floating Crane – "Kifaru"). These are moved between deep-water quays, lighterage quays and any other points of work on the stacking yards as and when required.
DENSITY: 1025.
TANKERS: Bulk Oil Jetty at which tankers up to 175.26 m. LOA, and 9.75 m. draft can discharge to tanks ashore. Depth alongside of 10.06 m. There is a refinery on the opposite side of the creek to the Bulk Oil Jetty; the tankers serving the refinery are not to exceed 20,000 s.d.w.t. capacity. Also refer to "Mjimwema".
STEVEDORES: Week days (except Saturday) 0700–1500 hrs. (45 minutes break), 1500–2200 hrs. (no break), 2200–0600 hrs. (no break). Saturdays 0700–1345 hrs. (no break), 1400–2100 hrs. (no break). Sundays and public holidays 0700–1500 hrs. (45 minutes break), 1500–2200 hrs. (no break).
FRESH WATER: Available at deep-water berths, and a water barge supplies water to ships at anchorage. All water is chlorinated but should be boiled and filtered. Water for boiler requires feed treatment (formal solutions adequate).
FUEL: Not generally available.
MEDICAL: Doctors and good modern hospital facilities exist.
DEVELOPMENTS: 3 more deep-water berths are under construction with an option of 2 more.
REPAIRS: Several light engineering workshops. There is a Tanzania Harbour Authority Dockyard for construction and maintenance of Tanzania Harbour Authorities lighters and other small craft. This has a slipway for vessels up to 100 ft., lifting power 100 tons. The Port Administration employs a skin diver.
REPATRIATION: Can be arranged.
CUSTOMS ALLOWANCE: Each crew member is allowed 1 carton of cigarettes, 1 opened bottle of spirits and 8 small beers.
AIRPORT: International airport with daily connections to all parts of the world.
TIME: GMT plus 3 hours. No alterations.
HOLIDAYS: Christmas Day and International Workers' Day are the only holidays on which no work is performed. Other holidays on which restricted working may be carried out are: Zanzibar Revolutionary Day (January 12th); Id-el-Fitr (2 days); Id-el-Haj; Good Friday; Easter Monday; Union Day (April 26th); Maulidi Day; Saba Saba Day (July 7th); Tanganyika Independence and Republic Day (December 9th).
SHORE LEAVE: Allowed.
DEVELOPMENTS: Future plans of the port include the construction of 2 additional deep water berths Nos. 12 and 13, expansion of the dockyard capable of dry docking tugs, small ships up to 1,500 d.w.t. A new oil jetty will be constructed to give way for

the construction of 2 additional deep water berths. Straightening, widening and deepening of the entrance channel to at least 10 m. depth will enable vessels of up to 35,000 d.w.t. to enter the port at all times of the day. It will also enable night pilotage to all types of ships which at present is restricted to vessels of up to 135 m. in length only.

AUTHORITY: Tanzania Harbour Authority.

MJIMWEMA TERMINAL: 06.49 S. 39.22 E.

DOCUMENTS and all General Information; refer to "Dar-es-Salaam".

LOCATION: The position of the Mono Buoy is Lat. 6° 49′ 20″ South, Long., 39° 22′ 00″ East, lying approximately 1.5 miles offshore in Mjimwema Bay. The buoy lies in 24 m. depth of water. The currents are up to about 1 knot and the direction varies.

PILOTAGE: Mooring Master/Pilot boards in an approximate position Makatumbe Island lighthouse bearing 240°. True distance 3.5 miles. Should the Pilot not be available on arrival, vessels are advised to keep underway and await the Pilot rather than anchor.

After mooring operations a Mooring Master/Pilot will remain on board.

Vessels must provide adequate means of boarding for Pilot, Customs and other officials. A pilot ladder with spreaders 4 ft. from the water and manropes are required.

The Mooring Master shall be provided with meals and accommodation comparable to a senior officer on board. The crew of the mooring launch will be provided with food comparable with ratings on board. No special foods need be provided.

RESTRICTIONS: Initially, berthing and unberthing will be in daylight hours only. It is expected after experience is gained that there will be no pilotage restrictions. It is anticipated that after the first few departures, night departures will be allowed and night arrivals may later be allowed at the discretion of the Harbour Master.

MAX. SIZE: The Mono Buoy accommodates tankers up to 100,000 tons d.w.t. Min. length allowed, 650 ft. Max. draft allowed, 55 ft.

HEALTH: Customs, Port Health and Immigration will board vessels on arrival.

RADIO: Within 6 hours of clearing the loading port, each tanker shall provide the Agent with the following information:

- *(a)* Name of Ship.
- *(b)* Name of last port from which the vessel cleared and the loading port if different from above.
- *(c)* Estimated date and time of arrival at Dar-es-Salaam (Mjimwema).
- *(d)* Cargo loaded.
- *(e)* API gravity.
- *(f)* Arrival draft, fore and aft.
- *(g)* Lifting capacity of derricks.
- *(h)* Size of manifolds.
- *(i)* Personnel requirements.

72 hours from the pilot station, a second cable should be sent to Agent with following information:

- *(a)* Name of ship.
- *(b)* Amended time of arrival.
- *(c)* Names of crew leaving the vessel (if any).
- *(d)* Requirements of doctor and dentist.
- *(e)* Any other requirements.

A final cable should be sent about 36 hours from the pilot station giving finally amended ETA.

When within 20 miles of Dar-es-Salaam Signal Station vessel should call the Signal Station on either Channel 12 or 16. A continuous watch is kept on both channels. Call sign is Dar-es-Salaam Signal Station.

VHF Channels 16 calling, 12 berthing. VHF Channel whilst discharging to be decided.

Portable radios can be provided for vessels not having a VHF set and the Agent should be so informed in order to allow time to dispatch a portable radio on arrival. A vessel arriving without suitable means of communication and not having informed the Agent of the fact could incur delays which would be to ship's account.

The Mooring Master will be in direct control of all radio communications on the vessel while in the terminal area. Any unauthorised communications may result in the immediate cessation of all operations and removal from the berth.

READINESS: Notice of readiness will only be accepted by the Pilot/Mooring Master on behalf of the Harbour Authority, when the ship is berthed and connected.

Any vessel which is not, in the opinion of the berth controller, ready in all aspects to discharge, may be rejected until corrections are made. The Harbour master's decisions are final.

BERTH: The Mono Buoy is a single point mooring buoy. The body of the buoy being secured in a fixed position with 6 moorings and the top of the buoy is in the form of a turntable allowing the ship, moorings and hoses to take up the position the vessel lies naturally due to tide, wind and current conditions.

MOORING: The following equipment is required to moor with safety: Two 10-in. nylon circumference ropes. 100 ft. in length. 4 end joining shackles.

The vessel approaches the Mono Buoy head to wind and tide or the resultant of these forces, and should have 2 mooring ropes lowered to the water, each having a 15 ft. lashing of 3-in. rope on it.

As the vessel nears the mooring, a launch will take the port rope from the ship and connect it to the port pick-up rope and return to the ship to take the starboard rope and repeat the operation on that side.

The vessel should heave on the ropes as soon as they are inboard and heave herself to the buoy until the chain is on the fairlead. The ship wire should then be shackled to the chain and turned up on bits. This applies to both sets of moorings.

HOSES: Raising and lowering of, connecting and disconnecting of hoses as well as other shipboard duties will be performed by the ship's crew under the advice of the Mooring Master. The ship should be capable of lifting 10 tons on her derrick, with a minimum of 7.5 tons.

When the vessel is securely moored, the launch will bring the hoses alongside on the port side. The vessel will lower the cargo hook to the boatman who will hook it on to the lifting ring on the forward hose. The hose will then be lifted to full height on the boom and secured on the "Hang off Chains" supplied. The hose is then lowered to the deck and the operation repeated with the after hose.

After completion of discharge the hoses will be filled with sea water by the ship. The hoses can then be disconnected from the manifold and lifted over the side of the ship and hung there on the slip ropes to be slipped off simultaneously with the moorings. This last operation will be carried out on the advice of the Mooring Master.

UNMOORING: On sailing, hoses will already have been disconnected and ready to be slipped at the direction of the Mooring Master.

The weight will be taken on the 2 approach ropes by heaving slowly with the winch. The shackles will then be released and the ropes slacked away until they are finally paid out through the fairlead and dropped into the sea.

The shore equipment should then be collected together under the derrick and returned to the boat.

BALLAST: Ballasting will be allowed during discharge but only with the express permission of the berthing controller, and in the case of ballasting in dirty tanks a dry certificate must be issued. Vessels will not be allowed to tank clean. There are no sludge tanks ashore.

FUEL: No bunkers available.

FRESH WATER: Only very limited quantities of fresh water in the region of about 50 tons can be provided.

STORES: Stores are available in Dar-es-Salaam, but the Tanzania Harbours Authority cannot undertake to transport stores to the Mono Buoy. Transport of stores to the buoy will be the responsibility of the Agent.

REPAIRS: During periods of calm and the fact that there is little current, it is foreseen that the problem of riding up on the buoy may occur. The vessel's engines shall therefore be available at all times and the telegraph shall be on stand-by while the vessel is in the berth. Engine repairs are not permitted. Should a vessel not be able to use her engines the cargo will be stopped and the vessel towed to a safe anchorage at the vessel's cost, until she can safely return to the berth.

SHORE LEAVE: Shore leave will not be permitted. Should any of the crew require to be landed for medical or relief reasons, the Agent will be reponsible for providing transport to the Inner Harbour. Tanzania Harbours Authority craft will on no account be available to ferry crew members to and from the passenger pontoon. The Mono Buoy lies 4.5 miles from the passenger landing pontoon, which is situated in the Inner Harbour.

POLLUTION: It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oily water from bilges, crude residues from the previous voyages or any other matter that may result in the pollution of the area. Owners and Masters should comply with any international regulations and recommendations concerning the prevention of pollution of the sea.

Serious consequences will arise if the above rule is broken. All costs and expenses involved will be for the account of the vessel concerned and the Master may be prosecuted under the Tanzania Merchant Shipping Act.

REGULATIONS: While in the berth the vessel should provide a pilot ladder on the opposite side of the vessel to the gangway, secured at the rail and ready for use.

No boats of any kind shall be lowered without permission from the Customs, Immigration and Harbour Master, except in an emergency.

Tanzania Harbours Authority maintains vessels to assist in berthing. These vessels are under the direct supervision of the Mooring Master/Pilot. Any service or facility provided by the Tanzania Harbours Authority, including the services of the Mooring Master/Pilot and boats are the vessel's risk. The furnishing of Mooring Master/Pilot and launches or other services and facilities shall not be construed to be or give rise to a personal contract.

AUTHORITY: Harbour Master, Dar-es-Salaam, for Port Manager.

MKOANI (KOHANI): 05.21 S. 39.38 E.

DOCUMENTS, HEALTH: Refer to "Zanzibar."

PILOTAGE: No pilot available.

RESTRICTIONS: Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.

Entrance through Mkoani leading marks, buoyed and well-lit channel, depth of 11 fathoms. Vessels may enter and sail any time night and day.
ANCHORAGE: No mooring buoys. Min. depth 6 fathoms. Vessels work cargo to lighters. Sandy bottom with mud close inshore.
MAX. SIZE: Length 250 ft.
TUGS: Not available and not required.
FRESH WATER: Not available.
FUEL: Not available.
AUTHORITY: See "Zanzibar".

MTWARA: 10.16 S. 40.12 E.

DOCUMENTS, HEALTH: Refer to "Dar-es-Salaam".
PILOTAGE: Compulsory. Pilot based at Dar-es-Salaam and flys to Mtwara when required. Flights once daily except Wednesdays. Early information concerning ETA to Harbour Master, Dar-es-Salaam. (South-bound vessels requested to divert to Dar-es-Salaam to embark Pilot).

Pilot boards 0.5 mile North of Shangani Reef Buoy from tug.

Signal Station can be contacted on VHF, Channels 12 and 16, between 0800 and 1800 hrs.
APPROACHES: The entrance is approached by a channel marked by buoys and leading beacons. At its narrowest point abreast of Msemo spit the channel is 1.5 cables wide. In spite of the sharp turn in this vicinity, vessels of up to 175.26 m. in length can enter the harbour at all stages of the tide. Once around the Msemo spit there is a very good natural harbour with room for two moderately large vessels and one coaster alongside. There are six marked anchorages to accommodate vessels of up to 9.5 m. draft.
ANCHORAGE: No safe anchorage outside port.
RESTRICTIONS: Port closed from 1800 to 0600 hrs. No tidal restrictions.
MAX. SIZE: Length 575 ft., draft 32 ft.
RADIO: Dar-es-Salaam or Mombasa Radio.
TUGS: Join vessel off Signal Station. Tug's lines used.
BERTHING: Deep-water Quay; 1,248 ft. length; 9.75 m. depth alongside at low water. Two berths available at quay.
CARGO GEAR: Vessels load/discharge using ship's gear.
STEVEDORES: Stowage plan required preferably before ship's arrival. Small coasters use the ports mobile cranes.
MEDICAL: Doctor available. All crew require valid smallpox vaccination and yellow fever inoculation certificates.
DENSITY: 1025.
FRESH WATER: Not normally available.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Arranged by Agents.
IDENTIFICATION CARDS: Required.
REPATRIATION: Possible.
AIRPORT: 7 miles distant. Daily service to international airport.
TIME: GMT plus 3 hours.
HOLIDAYS: All holidays worked as Sunday except following when no work done: Christmas Day and 1st May.
TELEPHONES: Direct connection on board not possible.
SHORE LEAVE: Crew allowed ashore.
AUTHORITY: Tanzania Harbours Authority, Dar-es-Salaam.

TANGA: 05.04 S. 39.08 E.

PORT LIMITS: From high water mark at Ras Kwawa 090° to the meridian of 39° 15' E., thence 180° to the parallel of Lat. 5° 05' S., thence 270° to the mainland at high water mark. Time of anchorage within port limits to constitute an "arrived vessel".
DOCUMENTS, HEALTH: Refer to Dar-es-Salaam.
PILOTAGE: ETA required via Mombasa Radio, if not given by Agents at previous port of call. Pilot embarks from white launch in vicinity of Ulenge Beacon on Ras Kazone leading line. Pilot ladder required on port side in N.E. monsoon, and on starboard side in S.W monsoon.

Vessels wishing to enter must await the arrival of the Pilot at the outer anchorage and, if anchored, must anchor well clear of the leading lines.
APPROACHES: Tanga is approached from the S.E. through channel in line with Ulenge leading marks bearing 319° T. A 3 fathom bank to starboard is marked by ship channel buoy. Care should be taken in this vicinity as there is frequently a strong set to the N.E. On the port hand, Niule Reef is marked on Northern tip by a buoy. After passing Niule Reef Beacon it is necessary to turn to port on to Ras Kazone leading marks bearing 266° T. until Ulenge Beacon is sighted.

A signal station is situated immediately below Ras Kazone High light. Signals are exhibited to indicate if inner channel to harbour is clear. Morse lamp messages may be exchanged with incoming vessels.

Late afternoon arrivals to Tanga may encounter poor visibility of land marks due to haze from setting sun, but a chimney on the fertiliser factory site on Ras Kazone with 3 vertical red lights at a height of 100 m. is conspicuous.
RADIO: Mombasa Radio. Ras Kazone Signal Station keeps 24 hour VHF watch on Channel 16, working on Channel 12.
ANCHORAGES: Tanga has no deep water berths. It is a lighterage port where ships are worked at anchor in the stream. Eleven safe anchorages have been marked by means of beacons. The inner harbour provides 7 anchorages for use by deep sea vessels with length of up to 213 m., and drafts of between 6.4 m. and 9.5 m.

The outer harbour has 3 anchorages with drafts well over 9.45 m.

Incoming vessels without Pilot should not anchor within 1 mile of Ras Kazone.
BERTHING: All except bulk cargo work is carried out at anchor. Vessels are not berthed in Inner Harbour during hours of darkness except by special request in cases of urgency. 35 lighters available, capacity up to 250 tons each.
CARGO-HANDLING FACILITIES: One 20-ton fixed crane is available on lighterage wharf for heavy lifts. A jetty on the Eastern side of Ras Kazone provides 1 berth for vessels of 20,000 dwt. equipped for the discharge of bulk cargoes and liquid ammonia. Two portal cranes of 7 tons capacity fitted with grabs. Jetty currently handling bulk products for fertiliser factory.

5 new cranes have been assembled and will be put into operation as soon as the berth modifications have been completed.
PASSENGER FACILITIES: All passengers and visitors to ships pass through the customs passenger terminal at the Eastern end of the new lighter wharf, and embark or disembark from the pontoon landing stage. Private hire launches available.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: Refer to "Dar-es-Salaam" for all general information.
AUTHORITY: Tanga Port Manager.

WETE (Pemba): 05.14 S. 39.43 E.

DOCUMENTS, HEALTH: Refer to Zanzibar.
PILOTAGE: Not compulsory, but restricted to daylight only. Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.
RESTRICTIONS: Entrance through Uvinje Cap, channel depth decreasing to 11 fathoms, with shallow patches to be avoided. Narrowest part of channel is 1.5 cables wide. Vessels may enter and leave at any state of tide but in daylight only.
ANCHORAGE: No mooring buoys, Vessels work cargo to lighters. Depth decreases to 2.5 fathoms. Mud bottom.
MAX. SIZE: 240 ft. length; 25 ft. draft.
TUGS: Tug and 1 Labour boat.
LIGHTERS: 3 lighters of 200 tons each.
6 lighters of 100 tons each.
FRESH WATER: Not available.
FUEL: Not available.
AUTHORITY: See "Zanzibar".

ZANZIBAR: 06.09 S. 39.11 E.

DOCUMENTS:
Bill of Health.
3 Crew Lists.
6 Passenger Lists.
3 Cargo Manifests.
3 Customs Manifests.
PILOTAGE: Compulsory. Vessels approaching from English pass embark Pilot at Seagull Buoy, and vessels approaching from South pass meet Pilot at Penford Buoys. Pilot takes vessel in and out, day and night. Notice of ETA required 6 hours in advance. Pilot on VHF Channel 16.
ANCHORAGE: Six anchorages to accommodate vessels drawing up to 32 ft. Additional anchorage provided for vessels carrying explosives.
RESTRICTIONS: Two entrances, English pass and South pass. The former is approximately 1 mile wide and has min. depth of 6 fathoms and 4 ft. and a very narrow angular turning corner of 1.7 cables width. South pass wider and deeper than English pass. Passes are well buoyed and lighted. In English pass, tidal stream runs North and is stronger on ebb than on rising tide. South pass, tidal stream runs N.N.W. and stronger on flood than on ebb-tide. Vessel may enter or leave at any state of tide at any time.
MAX. SIZE: (Anchorage) Length 1,100 ft., beam 110 ft., draft 32 ft.
HEALTH: Pratique given by Quarantine Officer who boards on arrival. All crew required to be in possession of valid smallpox vaccination and yellow fever inoculation certificates.
TUGS: 3 tugs and 2 labour boats.
BERTHING: Concrete pile wharf 800 ft. long to North of Ras Shangani used mainly for lighterage purposes and for berthing Government coasters. Under special circumstances, upon prior request to Port Officer, vessels of less than 375 ft. length and drawing less than 20 ft. may be permitted to berth alongside, but due prevailing onshore winds this practice not encouraged.
STEVEDORES: Normal working hours Monday to Thursday, 0700 to 1500 hrs. Friday 0700–1200 hrs.

Work can be extended on overtime for a second shift up till 2300 hrs.

Average rates: bagged cargoes 15 tons per gang hour, general cargo 8 tons per gang hour.

LIGHTERS: 2 lighters, open at the top for heavy equipment 280 tons each.

2 lighters for bag and general cargo, each with a capacity of 300 tons.

5 lighters for bag and general cargo, each with a capacity of 200 tons.

5 lighters for bag and general cargo, each with a capacity of 150 tons.

6 lighters for bag and general cargo, each with a capacity of 100 tons.

FRESH WATER: There is one water barge of 250 tons capacity. Water can be supplied at the wharf by wharf hydrant or at the anchorage in the stream by water barge.

FUEL: Not available.

AUTHORITY: Serikali ya Zanzibar, Port and Marine Dept.

BANGKOK: 13.42 N. 100.34 E. (See Plan Book)

KOHSICHANG:

North-east Monsoon 13.09 N. 100.50 E.
South-west Monsoon 13.11 N. 100.50 E.

PORT LIMITS: A vessel is normally considered to be an "arrived ship" on passing the Paknam Customs Station.

DOCUMENTS: Ship's forms: Crew List; Passenger List; Store List; List of arms and ammunitions for ship's use; List of Arms and Ammunitions in possession of passengers; List of opium and harmful habit-forming drugs; List of crew private belongings (cigarettes, radio, gramophone, camera, etc., including foreign currencies and liquors); Dangerous Cargo List; List of heavy lifts; Stowage plan; Inward cargo manifest; Transit cargo manifest; Through Cargo manifest; list of containers.

Documents to obtain from officials and agents: Immigration forms No. 3, 4 and 35, obtainable from Agents. International Maritime Declaration, obtainable from Quarantine Officer.

APPROACHES: The entrance of the river Chao Phraya is marked by the Bangkok Bar light beacon situated at the Lat. 13° 26′ 24.3″ N., Long. 100° 35′ 48.1″ E. Sea-going vessels have to cross the bar at the mouth of the river through an 18 km. long bar channel, which is dredged to a depth of 8.5 m. from MSL (mean sea level), and a bottom width of 100 m. in the straight section and 250 m. in the curve.

The depth of the river within the port area varies from 8.5 m. to 11 m. from MSL.

The MSL at the Bangkok Bar and at Klongtoi is 2.3 m. and 1.63 m. above lowest low water respectively.

At present the limiting length of vessels entering the port is 172.2 m. (565 ft.). The limiting draft of vessels will be determined by the bar adder plus the depth of water (predicted in the Tide Table published yearly by the Hydrographic Department RTN) from LLW at the Bangkok bar, but the max. draft of vessels allowed to cross the bar is not over 27 ft.

The MSL at the Bangkok Bar and at Klongtoi is 2.3 m. and 1.63 m. above lowest low water respectively.

PILOTAGE: Compulsory at Bangkok; Kohsichang not required; Advance notice required 48 hours prior to arrival.

Location Pilot vessel Bangkok: Lat. 13° 23′ 33″ N., Long. 100° 35′ 12″ E. Area waiting pick-up Pilot will be anchorage close to Pilot vessel, preferably 500 to 600 m. from Pilot vessel, enabling Pilot boat to get alongside safely. Pilot vessel marked by white flashing light every 2 seconds.

ANCHORAGE: (Map/DeLong Pier site.) Capacity – 10 deep draft ships. Location – N.E. of Ko Khram Yai Island between 12° 43′ N. and 12° 44′ N. Minimum depth 7.5 fathoms. Good holding ground. (Deep water port site.) Capacity unlimited. Location – South and S.W. of Channel entrance between 12° 34′ N. and 12° 35′ N. Miniumum depth 9 fathoms. Good holding ground. No protection from weather.

RESTRICTIONS: *Bangkok:* No restrictions, able enter day and night, dependent tide at Bar Channel. *Kohsichang:* No restrictions, able enter day and night.

MAX. SIZE: Bangkok: not exceeding 565 ft. LOA Kohsichang. See "Berthing".

HEALTH: *Radio Pratique:* According to the Thai Ministry of Health's Regulations and International Health's Regulations article 36:

Under the responsibility of ship's captain and shipping Agents, vessels from infected areas may apply for exemption of Quarantine through radio pratique by telegram sent to Quarantine Bangkok, stating name of ship, last port, number of passengers and health of crew and passengers.

(a) Vessels with passengers from infected areas proceeding to the berthing places in Bangkok must slow down at Paknam enabling Port Health Officer to board the ship for inspection.

(b) Vessels without passengers from infected areas go directly to berthing places in Bangkok where they will receive Port Health Officer for inspection.

Remarks: In case of suspected infectious disease on board any ship or anything wrong about health or ship sanitation, the ship's captain is requested, as early as possible, to inform the Port Health Officer at International Quarantine Office (Medical) Section, Immigration Division, North Sathorn Road, Bangkok, Tel. 39588.

Documents Required: 1 copy of Maritime Declaration of Health; 1 copy of Crew List; 1 copy of Passenger List; Derating or Derating Exemption Certificate.

Vaccination: Vaccination Certificates required: Smallpox; Cholera (only when leaving from infected areas); Yellow fever (only when leaving from infected areas).

However, vaccination may be done as deemed necessary by Port Health Officer even if the crew or passengers are from non-infected areas.

Vaccination certificates will be shown collectively for transit passengers/crew members and individually for disembarking passengers/crew members only.

Exemption from Vaccination: If the Port Health Officer is of the opinion that vaccination is contra-indicated on medical grounds, he shall provide the persons with reasons, written in English, underlying that opinion, which health authorities should take into account.

Death on Board: In the case of death on board after the ship was at the anchorage or at the port, permission to land the corpse must be obtained after the inspection of the Port Health Officer, if the cause of death was not quarantinable diseases.

Ship's Captain or shipping Agent must inform the Port Health Officer for inspection if there are cadavers and/or remains on board, who died in a foreign port, in order to pass through the quarantine. The dead should be accompanied by a death certificate (or a true copy), signed by the medical officer and placed in a coffin hermetically sealed in a casket, which is air-tight and waterproof.

According to Immigration Law B.E. 2493 (1950): The traveller to Thailand must be free from diseases forbidden under section 14 (4) of the Immigration law such as: trachoma, leprosy, tuberculosis, venereal diseases, including physical or mental defects who cannot earn their living.

RADIO:

Name of Station	*Frequencies*	*Remarks*
Bangkok Radio:		
HSA Long Wave	500 kHz (for calling) 480, 512 (for traffic)	operate 24 hours
HSA Short Wave	8686 kHz (for calling) 8686, 12800 kHz (for traffic)	operate 7 times a day every day beginning hours of 0000, 0200, 0500, 0800, 1100, 1400 and 1600 (GMT).

In addition to above, communication can be made through the Port Radio and Pilot Radio; however these 2 stations can be reached within steaming time of less than 24 hours prior to arrival at Bangkok, their particulars as follows:

HSC 61 L.W. 500 kHz (for calling)
operate 2300–1700 hrs. GMT
512, 480, 468, 454 and 425 kHz.
(for working)
Traffic Lists broadcast at 0450 hrs. GMT, and the beginning of every hour every day.
HSC 62 S.W. 8466 kHz.
Operate 5 times a day every day beginning hours of 0000, 0300, 0600, 0900 and 1300 hrs. GMT.

Information to be supplied by incoming Vessel:

(1) Last port of departure.
(2) Estimated time of arrival pilot station.
(3) Draft (fresh water).
(4) General cargo tonnage for discharge.
(5) Dangerous cargo.
(6) Heavy lift required.
(7) Fresh water required.
(8) Number of passengers (landing and transit).
(9) Time of dropping anchor at pilot vessels.

VHF: VHF communication with port radio and pilot radio through Channel 16 (24 hours service). Also VHF communication with shore for International Maritime Mobile Service under following:

Channel 24
For ship transmitting frequencies 157.20) } (for calling)
For shore ,, ,, 161.80) }
Channel 26
For ship transmitting frequencies 157.30) } (for traffic) service
For shore ,, ,, 161.90) } 24 hours
Channel 28
For ship transmitting frequencies 157.40) } (for traffic)
For shore ,, ,, 162.00) }

TUGS: Will join when vessel approaches berth, using tug's line without extra charge. 6 tugs available, 25 tons static pull.

BERTHING: No difficulties in approaching berth. Agents will cable to Master to inform when Pilot has been ordered to board vessel.

Midstream: 21 anchorage places and mooring buoys for sea-going vessels.

2 berths in front of Co-operative Salt wharf for 500 ft. vessels
4 berths in front of Customs boarding station for 300 ft. vessels.
2 berths at Bangplakod for 565 ft. vessels.
1 berth at Bangplakod for 500 ft. vessels.
5 berths South Sathupradit (6 mooring buoys) for 450 ft. vessels.
3 berths North Sathupradit for 400 ft. vessels.
4 berths North of Krungthep bridge for 280 ft. vessels.

Berths: 87 wharves on both sides of the river for sea-going vessels:

16 berths for imported general cargo (km. 27 to km. 29) on the left bank of the river at Klongtoi operated by the Port Authority of Thailand for 565 ft. vessels.

1 berth for imported general cargo (km. 39.5) on the right bank of the river operated by Thai Maritime Company for 400 ft. and 280 ft. vessels.

2 berths for imported general cargo (km. 46) on the right bank of the river operated by Thai Maritime Company for 250 ft. vessels.

14 berths for imported petroleum products operated by private and government organization for 150 ft., 350 and 565 ft. vessels.

54 berths for export cargo operated by private companies for 280 ft. to 565 ft. vessels.

36 dolphins in front of Klongtoi wharf. A row of 36 dolphins along the river at a distance of 275 m. from the Klongtoi wharf, to accommodate 7 ocean-going freighters for exported cargo.

Kohsichang: 7 berths available, no limit on length, max. draft 35–47 ft.

CRANES: 2 floating cranes at 125 tons capacity may be used for handling cargo in the ship's holds. Both are owned and operated by private companies.

BRIDGES: Bangkok port has one bridge only. However, as bridge up river, vessel permitted to pass bridge with LOA not exceeding 280 ft.
STEVEDORES: Vessel to advise Agents 48 hours prior arrival, text required in this cable to be ETA, Drafts, Tonnage of cargo aboard for Bangkok, Number of crew/passengers, Dangerous cargo/Heavy lifts, Gangs required.
MEDICAL: Hospital facilities available, advance notice of ETA required.
TANKERS: Diameter of shore line various from 6 in. to 20 in. All terminals are able to provide reducers.
DENSITY: Bangkok: Min. 1000, max. 1011; Kohsichang: 1021.
FRESH WATER: Available, supply can be made through barges and shoreline. Capacity of barges from 120 to 250 tons, rate of supply approx. 30 t.p.h. Advance notice 24 hours.
FUEL: Available. Supply can be made by barge and alongside terminals, no delay on bunkering, advance notice 48 hours.
DEVELOPMENTS: *East Quay wall expansion at Klongtoi Wharf:* This project provides 6 more berths for ocean-going vessels, consisting of 2 berths for conventional freighters, 4 berths for special container ships and a 450 m. long wharf for lighter aboard ship (LASH). The construction work is now completed.

Laem Chabang deep sea port: The location of this deep sea port is expected to be at Laem Chabang on the Eastern side of the Gulf of Thailand near the town of Sriracha and about 120 km. S.E. of Bangkok. A Dutch engineering firm has been appointed to make the initial survey and final design under the financial assistance of the Dutch Government. This project is now under consideration and construction work is expected to commence in 1979.
GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: In general carried out by stevedores without extra charge. (Ordinary hatch covers, not new hatch cover system.)
CUSTOMS ALLOWANCE: 200 cigarettes for officers, while crew member only 100 for 3 days. Wine/Spirit; 1 bottle each, opened.
CARGO GEAR: Supplied by stevedores except cargo tent and forklift truck.

IDENTIFICATION CARDS: Required for all crew and officers.

REPAIRS: Only minor repairs.
DRY DOCKS: 1 for vessels up to 360 ft. LOA.
REPATRIATION: Possible; however, no facilities for crew changes.
AIRPORT: About 25 kms. from Bangkok, regular services by airlines.
TIME: GMT plus 7 hrs. No change of clock during the year.
HOLIDAYS: Able work all around the year except December 31st and January 1st.
POLICE/AMBULANCE/FIRE: Police (Highway) 816240, 816241, 816250. (C.I.D.) 219111, 225151; Ambulance 811544; Fire 816666, 811544.
TELEPHONE: Available when alongside PAT berths.
SERVICES: No tank cleaning equipment. No facilities for discharge of tank washings. Compass adjusting, but spare parts unavailable. Radar/VHF/radio repairs. Lloyd's/ABS/Veritas/Nippon Kaiji Kentei Kyokai, Surveyors available.
SHORE LEAVE: Permitted.
DELAYS: Occasionally congestion, delay 1 to 2 days.
AUTHORITY: Chairman: Port Authority of Thailand.

PHUKET: 07.50 N. 98.25 E.

DOCUMENTS:
PRIOR TO ARRIVAL AT PHUKET:
Entry documents and advance information.
Custom and Immigration Entry forms as well as list of other documents required on *vessel's own forms* to be completed in advance for presentation on arrival Phuket will be sent in advance to the Agent at one of the previous ports together with request for the following information required 4 days in advance of vessel's arrival.

Confirmation of ETA and any subsequent revised ETA.
Captain's name.
Last port of call before Phuket.
Next port of call after Phuket.
Net registered tonnage (n.r.t.).
Hatch distribution and gangs workable.
Cash advance of Master.

Flags: Vessels are required to fly the Thai flag and display the code flag "Q" on arrival.
PILOTAGE: There is no official Pilot available.
ANCHORAGE: The following anchorages are regularly used by ocean carriers of deep draft calling Phuket for loading or discharging cargo.

During the N.E. Monsoon Season: Prevailing wind from November through March and periods of strong Easterly winds, vessels are recommended to anchor in position 7° 53′ N. and 98° 27′ 15″ E. about 0.5 mile off Laom Mai Pai to pick up the boarding party and stevedores before proceeding to the actual anchorage for loading at position 7° 57′ N. and 98° 33′ E., about one mile off Koh Yac Hyai, draft approx. 16 m. (50 ft.) at LWOS. However, during calm weather periods cargo operation will be carried out at the first mentioned anchorage.

During the S.W. Monsoon season: Prevailing from April through October and any periods of strong Westerly winds, vessels are recommended to anchor at position 7° 53′ N. 98° 27′ 15″ E. about 0.5 nautical mile off Laom Mai Pai, draft approx. 14 m. or 45 ft. at LWOS.

To facilitate cargo operations during swell from South, vessels are requested to anchor as close as possible to the above anchorage positions according to the Master's judgement.

No Pilot is required on approaching the above anchorage; however, it should be noted *three ocean-going dredgers* are operating in the area between Koh Dok Mai and Kon Khai Nok which should be passed at a distance of about 1,500 ft. to keep clear of their anchor lines. The dredgers are lit up and clearly visible at night.

It should also be noted during the new moon period there are several small fishing craft in the area.
RESTRICTIONS: *Channel:* The channel around Koh Tapae Kyai is normally passed clockwise and is marked by a system of buoys, the position of which are shown on Thai charts. However, it is also possible to turn around by swinging on the anchor just after passing buoy No. 3 on a rising tide (South to North) just before high tide.

Width of Channel; Min. 230 ft. at buoy No. 6 measured (chart datum at LLW) at 6 m. depth curve. Max. 900 ft. at buoy No. 4 measured at 6 m. depth curve.

Restriction in Navigation: (1) Entering or leaving through the North channel involves a rather sharp turn with a radius of about 1,000 ft. and angle of about 115° between the axis of channel in a restricted area between buoy No. 6 and Koh Tapai Noi Island. Please also note the wreck buoy between buoy No. 6 and Koh Tapao Noi.

(2) The draft at buoy No. 6 is about 24 ft. 6 in. at Lowest H.W.

(3) At buoy No. 5 are placed two pairs of mooring buoys parallel in the channel, occasionally used by tankers discharging petroleum products to Esso and Shell installations ashore. The width between the narrowest pier is about 150 ft. and vessels are required to pass between these mooring buoys.
HEALTH: All crew and passengers must have valid health certificates for small-pox and cholera.
RADIO: Messages to and from vessels at sea on the West coast of the Malayan Peninsula are best transmitted via Penang Radio in time to allow retransmission to Phuket at about the following local times:

Weekdays at 0930 hrs., 1400 hrs. and 1630 hrs. Sundays at 1630 hrs.

For vessels outside this area, messages can be sent via Bangkok or Singapore as applicable. Cables via Bangkok Radio are normally transmitted every second hour from 0800 to 2100 hrs. local time, whereas cables via Singapore are sometimes retransmitted via Bangkok Radio and sometimes via Penang Radio.

There are no facilities for ship-to-shore communication in Phuket, but vessels are *not* required to close down their radio station or VHF set while in port.

There is long-distance telephone connection with Bangkok, Penang, Singapore and Kuala Lumpur from Phuket at all hours.

Despatch Cables: Agent will in all probability need to send cables via the ship's radio reloading results, etc., subject to the Captain's approval. The cost of all such cables is to be borne by the vessel.

TUGS: No tugs available.

BERTHING: *Pier Facilities:* At Laen Klusi, Thailand Smelting and Refining Co. Ltd. have built a crossway connected by a short bridge to a pier which is parallel to the channel. The pier and channel are presently only suitable to accommodate vessels up to about 10,000 d.w.t. and approx. 430 ft. long, not exceeding 22 ft. draft. Vessels berthing at the pier are recommended to anchor at position 7° 48′ 24″ N. and 98° 25′ 12″ E. to await loading and favourable tide.

Dimensions of the pier: Length 61 m. (200 ft.), width 12 m. (40 ft.). Depth about 24 ft. 6 in. at LLW.

Fenders: The pier is protected by a system of wooden fenders in addition to which there is one fender at each end of the pier with solid rubber buffers.

Mooring buoys: There are two mooring buoys about 700 ft. apart each at equal distance from the end of the pier.

MEDICAL: It is only possible to get a doctor on board in the most severe cases, but otherwise there are two hospitals in Phuket, one of which is managed by American Seventh Day Adventists Mission Doctors and the other is a General Hospital.

FRESH WATER: Limited and difficult to obtain.

FUEL: Limited and difficult to obtain.

CONSULS: None.

SURVEYORS: No marine surveyors in Phuket; however, a surveyor can be called from Bangkok.

REPAIRS: No facilities.

SATTAHIP: (Military port, Royal Thai Navy).
Chuk Samet Port 12° 30′ 40″ N. 100° 55′ 00″ E.
Tungprong Port 12° 41′ 58″ N. 100° 50′ 21″ E.

PORT LIMITS: Extend to approximately 1,500 yards from the quay wall at Chuk Samet Port, and 1,000 yards from piers at Tungprong Port.

DOCUMENTS: See "Bangkok".

PILOTAGE: Recommended working daily during the day time only. Advance notice required 4 hours prior to arrival on working day (on holiday notice required at 0830-1200 hrs.) Radio frequency used when handling the vessel is 27125 mHz.

ANCHORAGE: Anchorage area for waiting berth and Pilot:

Chuk Samet Port; Capacity: eight deep-draft ships min. depth 8 fathoms.

Lat. 12° 34′ N.	Lat. 12° 36′ N.
Long. 100° 50′ 35″ E.	Long. 100° 51′ 35″ E.

Tungprong Port; Capacity: four deep-draft ships minimum depth 10 fathoms.

Lat. 12° 43′ N.	Lat. 12° 45′ N.
Long. 100° 49′ E.	Long. 100° 49′ 30″ E.

RESTRICTIONS: Berthing day time only.

MAX. SIZE: See "Berthing".

RADIO: Radio telephone.

Name of Station	*Frequencies*	*Remarks*
MSC	2738 mHz	Day time
Portsat	2738 mHz	Day time

TUGS: Join when vessel approaches berth, charge for use of tug's lines.

BERTHING:

Limitation of Draft:

Chuk Samet Port: Depth 32 ft. below LWOS or 36 ft. below MLW.

(1) For cruising in the channel
32 ft.
– 3 ft. for squat, tidal phenomena, etc.
– 2 ft. for under keel clearance
Draft = 27 ft. at LWOS

(2) For staying in port
32 ft.
– 2 ft. for under keel clearance
Draft=30 ft. at LWOS

(3) Draft of the vessel could be increased for the day of staying by adding the figure of the height of tide at low water of that day to the figure of draft in (2) above (30 ft.+Height of tide at LW).

Tungprong Port: Depth 29.8 ft. below LWOS or 33 ft. below MLW Draft of the vessel to be brought and stayed alongside is 27.8 ft. at LWOS.

	No. of Berths	*Max. LOA (ft.)*	*Remarks*
Chuk Samet	4	600	General Cargo
	1	600	Tanker
Tungprong	3	600	Ammunitions

Cruise passenger ships are permitted to berth at Sattahip.

STEVEDORES: Vessel to advise Agent 7 days prior to arrival. Text required in this cable are: flag, ETA, draft, tonnage of cargo aboard for port, number of crew/passengers, dangerous cargo/heavy lifts, gangs required.

MEDICAL: Hospital facilities available.

TANKERS: Diameter of shore lines are 6, 12 and 20 in.

DENSITY: 1021.

FRESH WATER: Limited, 200 tons per trip, addition 100 tons for boiler. Supply can be made by water trucks, advance notice of ETA required.

FUEL: Available, supply can be made by barges, advance notice of ETA required.

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: Carried out by stevedores without extra charge.

CUSTOMS ALLOWANCE: 200 cigarettes for each officer, 100 for each crew member for 3 days. One bottle each, wines and spirits, opened.

CARGO GEAR: Supplied by stevedores.

IDENTIFICATION CARDS: Required for all crew and officers.

REPAIRS: Only for minor repairs.

TIME: GMT plus 7 hours. Throughout the year.

POLICE/AMBULANCE/FIRE: Security centre 2187; Duty officer 2102 (after duty hours); Police 3180; Ambulance 116; Fire 117.

TELEPHONES: Available (U.S. military circuits).

SHORE LEAVE: Permitted.

AUTHORITY: Port Director.

SRIRACHA: 13.07 N. 100.51 E.

DOCUMENTS:

For Customs

6 copies Crew List.
6 ,, Personal Belonging List.
6 ,, Provisions – Stores List.
6 ,, Foreign Currency List.
6 ,, Deck Stores List.
6 ,, Arms – Ammunition List.
6 ,, Opium List.
6 ,, Drug Store List.
6 ,, Bonded Store List.
6 ,, Passenger List (to be typed also if no passengers aboard).

For Immigration

3 copies No. 3, 4 Inward Form.
3 ,, No. 3, 4 Outward Form.
2 ,, No. 35 Immigration Form.
2 ,, Crew List.

The above forms No. 3–4–35 will be handed to Master by the Agent's representative on arrival.

For Quarantine

2 copies Vaccination List (Cholera–Smallpox).
1 copy Maritime Declaration of Health.

PILOTAGE: Not compulsory. The terminal will provide a Mooring Master to give assistance in berthing. Advance notice required 48 hours prior to arrival. No VHF communications between ship and terminal.

The Mooring Master boards off the berth in approx. position 13° 07′ N., 100° 50.5′ E.

It is reported that, when crossing the Bar with Ko Nok Islet abeam, distance 1.5 miles, vessel steering 048T, least recorded depth approximately 56 ft. LW.

The Mooring Master acts as supervisor and liaison between ship and shore and remains on board until clear of berth.

Accommodation ladder required.

APPROACHES: The recommended courses approaching seaberth through the Southern part of Ko-Sichang are as follows:

from Junction point named "A"	Lat. 12° 43′ 00″ N. Long. 100° 44′ 36″ E.	TC=360°
to Junction point named "B"	Lat. 12° 56′ 14″ N. Long. 100° 44′ 36″ E.	
from Junction point named "B"	Lat. 12° 56′ 14″ N. Long. 100° 44′ 36″ E.	TC=022°
to Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 46′ 12″ E.	
from Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 46′ 12″ E.	TC=037°
to Junction point named "D"	Lat. 13° 06′ 20″ N. Long. 100° 51′ 00″ E.	

from point "D" A/C to 000° (T) up to Anchorage Area or Point "E".

Point "E"	Lat. 13° 07′ 00″ N. Long. 100° 51′ 00″ E.

ANCHORAGE: Within 1 mile of position "E" in a depth of 12 fathoms. The bottom is mud.

RESTRICTIONS: Tankers berth in daytime only.

MAX. SIZE: Length 900 ft. max. draft 50 ft.

HEALTH: If vessel arriving from foreign port, cable required 48 hours prior to arrival at Quarantine Bangkok, stating number of crew and passengers, ETA, last port of call and date of sailing, any sickness or death arising during the voyage, otherwise confirming all well.

Vessels shall have derating certificates valid on arrival as well as all passengers' and crew members' valid vaccination certificates against cholera and smallpox.

RADIO:

Name of Station	*Frequencies*	*Remarks*
Bangkok Radio:		
HSA Long Wave	500 kc/c (for calling) 554, 512 480, 468 (for traffic)	operate 24 hours.
HSA Short Wave	8686 kc/s (for calling) 8450, 8420, 8400 8380, 8360, 8330, 8320 kc/s (for traffic)	operate 5 times a day every day beginning hours of 0900, 1200, 1500, 1800 and 2100 hrs.

Masters of all vessels proceeding to Sriracha are to notify their Agent by radio of their expected time of arrival at least 3 days prior to arrival. This notice shall be amended in the event of any change in the time of arrival.

In addition to the above, the ETA message shall be confirmed 24 hours before arrival. The first notice of arrival is to contain the following information:

Cargo grade and quantities to be discharged.
Discharging rates, barrels per hour.
Deepest salt water draft
Bunkers and water on arrival.
Urgent stores to be delivered on arrival, if any.
Bunkers and water to be delivered, if any.
Laundry service, if any.
Nature of any extraordinary repairs to be effected.
Any other matter to be attended to on arrival such as electronic equipment repairs, medical attention or hospitalisation, crew repatriation (in this case advise name, age, nationality, passport number).
Cash required, if any.
Crew liberty launch service, if any.

BERTHING: One buoy berth for tankers up to 50 ft. draft. Other berths where draft 43 ft. 6 ins. and 32 ft. 6 ins. Reducers available. No facilities for discharge of tank washing.

Each berth consists of 6 buoys – one at either bow and quarters, and inshore beam buoys abreast of focsle and poop breaks. The main berth is arranged to accommodate a tanker of 90,000 d.w.t. The required moorings are 2 ropes and a wire to each bow and quarter buoy, and 1 wire to each breast buoy. The offshore anchor is used (1.5 to 2 shackles) but only for purposes of dredging into the berth, and holding the vessel's bow whilst moorings are run out.

The discharge hoses connected to the vessels manifold are 2×12 in. being in turn connected to 2×16 in. hoses which leads into a common manifold on the sea bed. The submarine line to the shore is of 32 in. diameter and about 1 mile in length.

Maximum permissible discharge pressure at ships rail, approx. 110 PSI.

Upon completion of discharge and clearing berth, vessels proceed to an anchorage off the berths, in order to carry out the Immigration Clearance, which necessitates the signing of an Immigration Form by every Crew member in the presence of the Immigration Officer. After signing the form the vessel is free to sail.

MEDICAL: Hospital facilities available, advance notice of ETA preferred.

DENSITY: About 1021.

FRESH WATER: Can be supplied by barge. 24 hours notice required.

FUEL: Can be supplied by barge. 48 hours notice required.

DEVELOPMENTS: A project for a new deep-sea port at Sriracha has been approved and is under survey.

CUSTOMS ALLOWANCE: 200 cigarettes for each officer, 100 for each crew member for 3 days.

Each man allowed 1 opened bottle wine/spirits.

IDENTIFICATION CARDS: Required for all officers and crew.

CONSULS: At Bangkok:

Argentina	36911–3	Korea	31940
Australia	35970	Laos	32010
Austria	58327	Malaysia	36927
Belgium	30840	Netherlands	53368
Brazil	59070	New Zealand	31318

AIRPORT: Situated about 25 km. from Bangkok, regular international services.

TIME: GMT plus 7 hours. No changes during the year.

AUTHORITY: Director General.

NOTES

Togo Republic

KPEME: 06.12 N. 01.30 E. (See Plan Book)

PORT LIMITS: In accordance with the terms of Charter-party a vessel is considered to be an "arrived ship" when she is anchored between one mile and two miles from the end of the jetty.

DOCUMENTS:

2 Crew Lists.
2 Stores Lists.
2 Private Property Declaration Lists.
2 Lists of last two Ports of Call.
2 Passenger Lists (if no passengers, 2 lists stating same).
2 Cargo Manifests (if no cargo for Kpeme, 2 lists stating same).

PILOTAGE: The limits of the port of Kpeme are fixed at 1 mile from all points of the jetty . Pilot boards out of the above limits. The Company Pilot remains on board while ship is berthed and disembarks when vessel cleared port limits. International code pilot signal used. At night, vessel should anchor between 110° and 180° at least 1 mile from the end of jetty.

VHF: Radio station, call "Kpeme pilot station" on Channel 16. Pilot boat grey motor boat without special signals.

APPROACHES: By day the extremity of the jetty (three artificial islands and two loading machines) forms an obvious landmark.

At night a white light (situated at the extremity of the jetty, 23 m. above the sea) all around horizon – light 3 sec., occulting 1 sec., light 1 sec., occulting 1 sec.

ANCHORAGE: Good holding ground (sand and mud) between 14 and 16 m.

RESTRICTIONS: Vessels should signal twice the date and probable time of her arrival. The first time 72 hours and the second time 24 hours prior arrival. Vessels berth in daylight only from 0530 to 1530 hrs. GMT. Unmooring can be effected day and night. Water approaches are clear. Any ship should have both fore anchor cables in perfect order and capable of being used in their entirety. Any ship should be able to leave immediately if she receives order to do so from Harbour Master. With this in mind, engines must be on standby. Ships are not authorised to cross port entrance without a Pilot on board. After winches in perfect order.

MAX. SIZE: Tankers up to 31 ft. draft on arrival. Bulk carriers up to 38 ft. draft on sailing. Bulk carrier up to 32 ft. max. on berthing. LOA up to 215 m., max. airdraft 12.20 m.

HEALTH: Send message for free pratique within 24 hours of arrival to Port Health Officer, Kpeme.

RADIO: Until vessel within 600 miles, communicate through Portishead Radio, Senlis Radio and Dakar Radio. Within 500 to 300 miles via Abidjan Radio TUA 487 kHz. and within 300 miles via Lome Radio 5VA 472 kHz.

VHF: VHF radio station, call "Kpeme Port" on Channel 16.

TUGS: No tugs available. Two mooring launches of 150 h.p. each are at vessel's disposal.

BERTHING: Loading facility comprised of three artificial islands carrying conveyor belts (2) for loading phosphate only. They are breasted by a row of four dolphins. Vessel moors using port anchor and wires to four buoys which hold the ship parallel to the dolphins and about 20 m. off. Springs are run to the dolphins. Each loader delivers at a rate of 1,250 t.p.h. and two holds can be loaded at same time.

TANKERS: Moor at a special berth situated to the East at 0.4 miles away from the extremity of the phosphate pier. One submarine line 12 in. diameter, hose connection 8 in. diameter. At any time sufficient draft for securing and sailing, also fire hoses ready rigged on deck.

FRESH WATER: Not available. Vessel has to go to Lome.

FUEL: Not available.

MEDICAL: No facilities at Kpeme. In emergency, doctor obtained from Lome, about 25 miles away, or from Anecho, 7 miles away.

OPENING/CLOSING HATCHES: By ship's crew.

CONSULS: Nearest at Lome.

REPAIRS: No facilities available. Emergency repairs could be arranged in Lome.

CUSTOMS ALLOWANCE: 200 cigarettes or 2 oz. tobacco; one bottle of spirits. No Customs Authorities board the vessels or seal bonded stores.

REPATRIATION: No facilities exist for effecting crew changes. However, in emergencies repatriation can be arranged.

AIRPORT: Nearest Lome – four flights a week to Europe.

TIME: GMT.

TELEPHONES: Placed on board, charges included in stay-in-port tax.

SHORE LEAVE: Not allowed.

GENERAL: In the rainy season, high winds and swell may delay berthing operation.

AUTHORITY: Compagnie Togolaise des Mines du Benin.

LOME: 06.08 N. 01.17 E. (See Plan Book)

DOCUMENTS:

13 Crew Lists.
5 Kru-boy Lists.
5 Passenger Lists.
4 Lists Previous Port of Call.
1 Maritime Declaration of Health.
1 List of vaccinations.
3 Crew effects Lists.
1 List of arms and ammunition.

APPROACH: The approach to the port, by night, is assisted by 3 lights:

(1) *Baguida* (position 06° 09.5′ N. and 01° 19.5′ E.) occulting white and red. Lt. 2.5 secs., occ. 0.5 sec. period 3 sec. Vis. 17 miles. Sector: red 042°, covers the breakwater as well as the old Lome Wharf (position 06° 07′ N. and 01° 13.5′ E.).

(2) *Lome Togo-Port* situated on head of West breakwater (pos. 06° 08′ N. and 01° 17.5′ E.). Qk. Fl. (4) white and red every 10 sec. Vis. 5 miles. Red light sector covers only old wharf and is not visible seawards.

(3) *Lome Light* situated near town of Lome (position 06° 07′ N. and 01° 13′ E.). Group Fl. (2) white every 10 sec. Vis. 15 miles all around horizon.

By day, large, light-coloured transit sheds and a high, grey water tower (position 06° 08.5′ N. and 01° 16.5′ E.) are the first indications of port from seawards.

PILOTAGE: Pilots available 7 days a week from 0600 to 2100 hrs.for vessels to enter. Sailing possible at anytime but if sailing after midnight Agent has to advise pilot station before 22.00 hrs. Pilot station equipped VHF radio and works 24 hours per day on Channel 16. Pilot boat green motorboat with orange superstructure and international flag "H". Pilot boards 0.5 mile to 1 mile S.E. of breakwater.

ANCHORAGE: Vessels which arrive during darkness should anchor about 0.5 to 1 mile South to S.E. of breakwater, in white sector of Baguida light in 8 fathoms, where good holding ground (sand) obtained. Northern boundary of anchorage is red sector of Baguida light.

MAX. SIZE: Max. length 900 ft. (270 m.) and max. draft 31 ft. (9.5 m.). Tankers 39 ft. and bulk carriers 38 ft.

HEALTH: Health Inspector will board on arrival alongside and examine for cases of infectious diseases, after which will declare vessel free or not. Vessels entering must fly international quarantine signal "Q". Large hospital situated in Lome with doctors in attendance.

RADIO: Port operations carried out on VHF Channel 16,14 and 12, with range of approximately 30 miles. Aero beacon (position 06° 10.7′ N. and 01° 16.3′ E.) call sign "LME" on 379 kHz.

TUGS: 2 tugs, 960 and 3,200 h.p. available. For vessels of more than 500 g.r.t. tug is obligatory when berthing or unberthing.

STEVEDORES: Agent should be informed as soon as possible of ship's ETA, length, max. draft, tonnage to load and/or discharge and number of gangs required. Agents should advise pilot station of vessel's ETA.

TANKERS: Togo-Port has sea pipe-line belonging to the Societe Togolaise d'Entreposage. Tankers should moor at 3 large mooring buoys outside breakwater. Diameter of pipe-line 8 in. Discharging about 230 t.p.h. (depending on ship-pumps). Max. length which can be handled at buoys is 720 ft. (220 m.) max. draft 31 ft. (9.5 m.). There is also a Refinery which has a tanker berth on the East Breakwater max. LOA 250 m. and max. draft 39 ft.

DENSITY: Density 1025. Harbour open to sea.

FRESH WATER: Available at every berth except tanker Sealine. Delivery rate 45 t.p.h. Fresh water examined monthly for purity by Sanitary Authority.

FUEL: Diesel fuel available for small craft, such as fishing vessels, small motor-ships and tugs.

Gas oil available in any quantity.

FIRE PRECAUTIONS: No extraordinary precautions are required. Vessels with hazardous cargo should declare this on ETA telegram to Agent. During time in port these vessels should take necessary precautions themselves, and all fire hoses should be ready rigged on deck. By day international code signal "B" should be displayed and by night a red light should be shown at masthead or at an all-round visible place.

Smoking on berths and within sheds *strictly* prohibited. Infringements of fire regulations punishable by fine.

DEVELOPMENTS: A second quay and a slip for small vessels.

GANGWAY/DECK WATCHMEN: Gangway watchmen and hatch security watchmen available; they wear a distinctive uniform.

OPENING/CLOSING HATCHES: Either ship's crew or dockworkers.

CERTIFICATES: All normal ship certificates should be available for inspection.

CUSTOMS ALLOWANCE: Because Togo-Port is a Free Port, no individual declaration by Crew members necessary.

CARGO GEAR: No extraordinary regulations. no cranes available and ships' own gear used for discharging and loading.

IDENTIFICATION CARDS: Shore landing passes issued by port police and should be supplemented by personal ID-Cards.

CONSULS: Ambassadors or Consuls from nearly all major maritime nations at Lome.

REPAIRS: Minor repairs only.

DRY DOCKS: Not available at present, but a slip for small vessels is included in future development.

AIRPORT: Lome airport with daily flights to Europe.

SEAMEN'S CLUB: A modern Seamen's Club with swimming-pool, bar and library situated 0.5 mile from port.

TIME: GMT throughout year.

HOLIDAYS: New Year's Day (1st January); Independence Day (27th April); Labour Day (1st May); Christmas Day (25th December). All other holidays will be worked in port with supplementary labour charges.

POLICE/AMBULANCE/FIRE: Push-button fire alarms situated in every shed and on exterior South wall of shed "B". Telephone for contacting Police, Fire-Station or Hospital available day and night in Harbour Masters office.
TELEPHONES: 3 public telephones within the port limits. No telephones on board.
SERVICES: No tank cleaning or compass adjusting available.
DELAYS: Ships berth in rotation of arrival at anchorage. Priority given to passenger ships as well as to vessels having less than 50 tons of cargo for discharge.
GENERAL: Distance from port to Lome city-centre is 4 miles. Taxis available at entrance of port.
SHIPMASTER'S REPORT: July 1978.
Documents: A mooring boat is available to Agents for the collection of documents on the roads given prior notice.
Max. Size: Berth No. 1 depth 5.5 m. Berth Nos. 2, 2/3, 3, depth 10.5 m. Berth No. 4, depth 9.5 m. Berth No. 5, depth 11.5 m. Berth No. 6 (New oil pier), depth 14.7 m.

Allowance is made for swell hence the max. draft at No. 6 is 39 ft.
Health: Free pratique can be obtained from the roads if all documents are sent to Agents concerned with directions for distribution.
Radio: Lome Radio has been out of commision since May, 1978, and may continue thus until further notice unless spares are obtainable from France.
Tugs: There is an additional tug 3,000 hp, 42 ton bollard pull, fully equipped for fire and salvage. The smaller tug of 17 tons bollard pull, is also equipped for fire-fighting.
Tankers: Berth No. 6 on Western side of East Mole with a depth of 14.7 m. and max. draft allowed of 39 ft.
Fuel: Gas Oil available ex-road tankers at all berths but full range of fuels to be provided at new tanker berth (No. 6) by August, 1978.
Cargo Gear: While no fixed cranes are available, there is a range of mobile cranes 5×10 tonnes, 1×25 tonnes, 1×45 tonnes and a container tower crane of 70 tonnes. All capacities are reduced by reach and angle while freeboard may limit use still further. A grain hopper and vacuvator gear will be in use shortly (July, 1978).
Airport: Flights are frequent, mainly indirect, to and from Europe, with 1 weekly direct to New York.
Consuls: At present there is no British representation in Togo but a Consulate may be re-established. Accra is 3/4 hours drive from Lome.
Seamans Club: A large accommodation block offering various rooms and flatlets is part of the compound. Seamen have priority and at reduced rates. The Home is in the charge of a Dutch pastor and under German control and has a VHF set for communication with vessels on the roads. It is open to non-seafarers.
Hotels: A wide range of hotels are available including luxury type catering for the expanding tourist traffic which takes advantage of the unique climate for this part of the Gulf of Benin.
Delays: While there is no registration as such, certain vessels on regular trade, plus those with cargoes qualified as important, do get priority and all are subject to the daily (except Sunday) Port Captain's Meeting at which all elements are represented. The results are not available until 1300 hrs. after which most Agencies communicate by VHF to their vessels on the roads. Container ships have a priority.
Working Hours: Gangs work 0600 to 1400 hrs.; 1400 to 2200 hrs. and 2200 to 0600 hrs. daily except, there is no 2200 to 0600 hrs shift on Sunday nights. Each has a half hour break after 4 hours working.
Surveyors: The Port Captain and Senior Pilot, represents Germanisher Lloyd. There is no Lloyds representative.
General: Lome is the entry port for Niger and Upper Volta as well as Western Ghana so the road and rail traffic is considerable. The border with Ghana is on the Western side of Lome City. A re-entry visa is necessary when proceeding to Accra and takes 1 or 2 days to process. The Ghana Border Police can issue 1 day Visitors passes.
AUTHORITY: Port Autonome de Lome.

AGENT: Socopao Togo, B.P. 821, Lome. Tel. 5588/89; Telex 5205. Cables, "Freight Lome".

Tonga (Friendly Islands)

NOTES

Please also advise Shipping Guides Ltd.

NUKU'ALOFA: 21.08 S. 175.12 W. (See Plan Book)

DOCUMENTS: *Immigration Dept.*

2 Crew Lists.
2 Passenger Lists.

Customs Dept.

2 Crew Lists.
2 Passenger Lists.
1 Bond List.
3 Cargo Manifests.

Agents

1 Crew List.
1 Passenger List.
3 Cargo Manifests.

PILOTAGE: Order through Agents at least 24 hours prior to arrival. Pilot boat may be contacted on R/T 1 hour before arrival at Pilot station. This position is indicated on B.A. Chart (approaches to Nuku'alofa). There are 2 approaches, namely the Ava Lahi Passage and the Piha Passage. Vessels using Piha Passage are limited to a length of 500 ft.

Vessels may anchor in the vicinity of No. 1 Buoy if required to await Pilot, but this is not normally necessary as the Pilot is available as requested. Pilot boat carries usual signals.

ANCHORAGES: Vessels may anchor wherever they wish within the port, subject to the approval of the Harbour Master.

MAX. SIZE: Length unlimited, beam unlimited, draft 40 ft.

HEALTH: Radio pratique may be requested from "Tongamed", Nuku'alofa. Any suspected disease or fever must be reported by radio.

TUGS: No tug is required for berthing, but a tug is available in case of breakdown.

BERTHING: Queen Salote Wharf, only wharf in use. Vuna Wharf damaged by an earthquake in 1977 and as yet has not been repaired.

Queen Salote Wharf is expected to be extended by 1983.

STEVEDORES: There is a Master Porter employed by the Queen Salote Wharf Administration, who will supply whatever gangs are required. The number of hatches to be worked and the tonnage of cargo must be passed by the Agent to the Harbour Master at least 24 hours before vessel arrives.

MEDICAL: It is advisable to inform Agent in advance should medical attention be required. Hospital facilities are available. Vaccination certificates are required for visitors who are staying. Ship's crew do not require them generally.

DENSITY: 1025 at all states of tide.

FRESH WATER: Available ex Queen Salote Wharf at 25 t.p.h. delivery.

FUEL: A small quantity of light diesel fuel could be supplied, sufficient to enable a vessel to make the port of Suva.

DEVELOPMENTS: Queen Salote Wharf to be extended to at least 600 ft. Land is to be reclaimed on the Eastern and Western sides of the Wharf.

GANGWAY/DECK WATCHMEN: Not necessary as entry to wharf is restricted.

OPENING/CLOSING HATCHES: This work is completely optional.

CERTIFICATES: Normal requirements. Harbour Master may require to inspect cargo gear record.

CUSTOMS ALLOWANCE: A reasonable quantity is allowed by Customs according to expected stay in port. There are heavy penalties for smuggling.

CARGO GEAR: Valid certificates issued by competent authorities are recognised.

IDENTIFICATION CARDS: Not necessary.

CONSULS: None.

REPAIRS: Repairs can be carried out in the Marine workshop.

REPATRIATION: No facilities.

AIRPORT: 14 miles from town. Flights to and from Suva on Tuesdays, Thursdays, Fridays and Saturdays. There are also flights to New Zealand, same days as Suva.

TIME: The local time is 13 hours fast on GMT.

HOLIDAYS: *No work of any description is permitted on the Sabbath. This is strictly enforced.* Official Holidays are: Christmas Day; Boxing Day; Good Friday; New Year's Day; Easter Monday; Anzac Day; Emancipation Day (June 4th); Constitution Day (4th November); H.M. Queen Elizabeth's Birthday; King's Birthday (July 4th).

POLICE/AMBULANCE/FIRE: Telephone numbers not necessary. Just ask for the Department required.

OTHER PORTS: Pangai, Ha'apai Group; Neiafu, Vava'u Group; both these ports are suitable for any size of vessel at anchor. Service is by lighter. Vessels of 400 ft. in length with a max. draft of 22 ft. may berth at Neiafu.

AUTHORITY: Harbour Master, Nuku'alofa.

Trinidad

BRIGHTON (Texaco Oil Terminal): 10.15 N. 61.38 W.

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory.
ANCHORAGE: Good holding ground in roadstead. Loading pier situated 10° 15′ N. 61° 38′ W., extending in a N.W. direction for 2,010 ft.
RESTRICTIONS/MAX. SIZE: Outer Berth East, 29 ft. 6 in. MLWST; Outer Berth West, 24 ft. 6 in. MLWST; Centre Berth East, 21 ft. 6 in. MLWST; Centre Berth West, 21 ft. 6 in. MLWST; Inner Berth West, 21 ft. 6in. MLWST.
TUGS: Not used. Launch assists with lines.
STEVEDORES: Supplied by Agent if necessary for loading Asphalt in drums only.
FRESH WATER: Available only at berth. Pumping rate 15 to 20 t.p.h.
FUEL: All grades of fuel alongside or by barge. Fresh water.
GANGWAY/DECK WATCHMEN: Customs guard on 24 hours duty at ship's side.
CUSTOMS ALLOWANCE: 200 cigarettes and moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
REPAIRS AND DRY DOCKS: At Chaguaramas.
MEDICAL: All facilities available.
REPATRIATIONS: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.
DELAYS: Not usual.
AGENT: See "Port of Spain".

CHAGUARAMAS: 10.40 N. 61.39 W.

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory. Pilots board in Chaguaramas Bay – 10° 46′ N. – 61° 43′ W.
ANCHORAGE: Safe anchorage in Chaguaramas Bay between mainland and Gaspar Grande Island about 0.5 miles off the dock.
RESTRICTIONS/MAX. SIZE: No restrictions night operation. 2 docks – main wharf with overhead cranes for loading and discharging bauxite – 960 ft. long, max. draft 32 ft. Smaller wharf – 400 ft., draft 25 ft.
TUGS: Not used. Launch assists in mooring.
STEVEDORES: Not necessary. All loading/discharging done by Chaguaramas Terminals employees.
FRESH WATER: Available from dock, 40 t.p.h. Also supplied by barge.
FUEL: Can be delivered from dock or supplied by barge.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ships side.
CUSTOMS ALLOWANCE: 200 cigarettes and a moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
CARGO GEAR: Loading – carried out with travelling tower rate 1,000 t.p.h. Conveyor system. Discharging – carried out with travelling rig of 2×4 ton grabs. Conveyor system.
REPAIRS/FLOATING DOCK: Operated by Swan Hunter Docks. Displacing up to 11,380 tons, 560 ft. long vessels. Also good berthing alongside, draft to 35 ft., and a safe close anchorage, draft 50 ft. General extensive repairs undertaken.
MEDICAL: All facilities available.
REPATRIATION: Can be arranged.
AIRPORT: See Port of Spain.
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.
AUTHORITY: Chaguaramas Terminals Limited.
AGENT: See "Port of Spain".

CRONSTADT ISLAND: 10.39 N. 61.38 W.

Terminal owned and operated by Barytes and Minerals Ltd., handling bulk barytes.

Vessels from abroad calling at Cronstadt are required to proceed first to Chaguaramas for clearance formalities.

DOCUMENTS/HEALTH/CONSULS, etc.: refer to "Port of Spain".
PILOTAGE: Compulsory.
TUGS: One tug used for berthing if required.
RESTRICTIONS: Berthing/unberthing in daylight only.
MAX. SIZE: 400 ft. length. This size vessel would overhang wharf approx. 100 ft. fore and aft. Draft not limited as depth of water alongside is 60 ft.
BERTHING: Vessel moored with 2 springs, 3 head and stern lines to dock. Discharging carried out with shore crane grab bucket 3 tons capacity.
FRESH WATER: Available by barge.
FUEL: Available by barge.
AGENT: See "Port of Spain".

GALEOTA POINT: 10.05 N. 61.01 W. (See Plan Book)

LOCATION: Galeota Single Buoy Mooring Terminal is located 2.6 miles on a bearing of 208° from Galeota Point Lighthouse, and is an open unsheltered roadstead. Galeota Point is a narrow headland about 210 ft. high and located in Lat. 10° 08′ 00″ N., and Long. 60° 59′ 30″ W. The lighthouse, situated on top of the point, exhibits a light 240 ft. above sea level which flashes white every 5 seconds and is visible for 22 miles. The buoy itself exhibits a quick flashing, (1 flash per second), red light, 10 ft. high, and visible for 4 miles through 360°

DOCUMENTS:

Health Declaration (International Health Form to be filled out by Master on arrival.)
De-Rat Cert./De-Rat Exemption
Crew List (4).
Crew Customs Declaration (2).
Register.
Store List (2) (Signed by Master).
Passenger Manifest (2) (If any passengers are aboard).
Bonded Store List.
Clearance from last Port.
Manifest (if no cargo, a statement that vessel is in ballast).

ESSENTIAL REQUIREMENTS: MOST ESSENTIAL REQUIREMENTS TO BE MET BY TANKERS LIFTING OIL AT GALEOTA TERMINAL.

1. *Disposal of Ballast:* No dirty ballast will be pumped overboard. A separate ballast disposal line (16 in.) is available at the Terminal to pump ballast to a pit onshore where oil and water can be separated and disposal made.
2. *Notice of Arrival:* Incoming tankers must send ETA via commercial radio at least 72 hours before arrival at Galeota. Local time is GMT minus 4 hours and daylight saving (Summer Time) is not applicable.
3. *Arrival:* Company Loading Master and a Government Pilot if requested by the Tanker's Master will contact all incoming tankers about 3 to 4 miles from Galeota Point on a bearing of 220°/230° from the lighthouse, and will advise the ship's personnel in mooring and unmooring. If the buoy is occupied, or if arriving at night, vessels should anchor at least 1 mile South-west of the buoy.
4. *Tankers to have ready:* (a) 2 nylon or manila messenger lines of not less than 6 in. circumference and at least 300 ft. long, placed at the bow. (b) at ship's manifold there must be equipment capable of lifting the floating hoses. Weight of hose is about 3 tons.
5. *Crew Duties:* The tanker's crew will raise, rig, and operate vessel's derrick and winch for the hoisting of the floating hose. The Terminal crew will connect and disconnect loading hoses.
6. *Tanker's Valves:* Tankers valves must not be closed against incoming oil stream. At least 1 minute is required to shut down pumps and stop flow of oil from the Terminal storage.
7. *Communication-Emergency:* If ship-to-shore communications fail, a line launch is always alongside and has radio contact with the Terminal Control Centre.
8. *Responsibility:* The Tanker's Master is responsible at all times for the safety of all ship's operations. Galeota Terminal rules and regulations do not contravene International Safety rules such as SOLAS (Safety or Life at Sea) or other maritime regulations such as those of appropriate classification societies. In case of any conflict, the latter shall apply.

PILOTAGE: Vessels arriving should approach to within 3 to 4 miles of Galeota lighthouse on a bearing of 220°/230° and will be met by the Amoco Loading Master and a Trinidad and Tobago Pilot (if requested through vessel's Agent). The Pilot will be stationed on the bridge and will advise the vessel on the approach to the buoy. The Amoco representative will be positioned in a most advantageous position and will advise the ship's crew on picking up and making fast the floating nylon mooring lines.

Vessels are requested to make a proper lee and to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Loading Master's launch. At night, adequate lighting must be rigged overside for the Loading Master to approach the side of the ship and climb the ladder safely.

Raising, connecting, disconnecting and lowering of floating hoses will be performed by the Terminal's crew with the assistance of the ship's crew as advised by the Amoco Loading Master, who will remain on board while the ship is secured to the buoy. The Loading Master will be in direct charge of the portable VHF ship-to-shore radiotelephone communications.

If, in the opinion of the Loading Master, the vessel is not equipped with adequate mooring or hose lifting facilities, he will so inform the vessel's Master, and in such event the vessel shall not be brought into the moorings until facilities, lines, or gear are deemed satisfactory.

APPROACHES:

Port Limits: Approaching vessels should never anchor to the East or North-east of Galeota Point. A submarine pipeline from a platform in Lat. 10° 10′ 24″ N., and Long. 60° 39′ 56″ W., enters the Galeota Point area about half a mile Northward of the lighthouse. Vessels should approach from the South-westward and never anchor less than 1 mile from the SBM or between the buoy and the coastline.

Navigational Aids: Galeota Point lighthouse is located in Lat. 10° 08′ 00″ N., and Long. 60° 59′ 30″ W., and exhibits a white flashing light every 5 seconds and is visible for 22 miles. The lighthouse is unattended and frequently does not operate. The SBM exhibits a quick flashing red light every second, and is located in Lat. 10° 05′ 47″ N., and Long. 61° 00′ 45″ W.

Landmarks: Galeota Point appears as an island when approaching from seaward, since it is connected to the island of Trinidad by lower land. Situated on this lower land about 0.5 mile Northward of the lighthouse is the tank farm and processing area.

There are 5 oil storage tanks and they are painted a grey colour.

A small boat harbour is located 0.5 mile due West of the lighthouse in Guayaguayare Bay. The sheet piling type jetty extends seawards, on a bearing of 245°, 1,900 ft. from a point at Lat. 10° 08′ 14″ N., and Long. 61° 00′ 00″ W. The seaward 300 ft. of this jetty has a controlling draft of 13 ft. at extreme low water.

Vessels approaching from a North through East direction will observe lighted drilling platforms with following locations:

1. Teak "A"	Lat. 10° 10′ 24″ N.,	Long. 60° 39′ 56″ W.
2. Teak "B"	Lat. 10° 11′ 41″ N.,	Long. 60° 39′ 55″ W.
3. Teak "C"	Lat. 10° 10′ 29″ N.,	Long. 60° 40′ 36″ W.
4. Teak "D"	Lat. 10° 02′ 12″ N.,	Long. 60° 38′ 54″ W.
5. Teak "E"	Lat. 10° 10′ 26″ N.,	Long. 60° 39′ 55″ W.
6. Samaan "A"	Lat. 10° 20′ 30″ N.,	Long. 60° 40′ 47″ W.
7. Samaan "B"	Lat. 10° 19′ 46″ N.,	Long. 60° 41′ 04″ W.
8. Samaan "C"	Lat. 10° 19′ 47″ N.,	Long. 60° 41′ 35″ W.
9. Poui "A"	Lat. 10° 06′ 35″ N.,	Long. 60° 49′ 47″ W.
10. Poui "B"	Lat. 10° 06′ 55″ N.,	Long. 60° 49′ 02″ W.
11. Tesoro "A"	Lat. 10° 11′ 05″ N.,	Long. 60° 54′ 59″ W.

Vessels should exercise caution and keep well clear of these platforms because of unlighted buoys, small boat operations, submarine pipelines, and anchored test barges nearby.

The lighthouse 4 miles to the Southwestward of Manzanilla Point situated on Brigannd Hill is an excellent landmark for vessels approaching from the Northward. The lighthouse is elevated 712 ft. and exhibits a group flashing (3) white light every 30 seconds and visible for 35 miles.

RESTRICTIONS: The Terminal operates 24 hours per day, 7 days a week. Ships are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, however an exception to this rule may be made at the discretion of the Terminal. The Terminal will never be closed due to holidays.

MAX. SIZE: 250,000 d.w.t. Depth of water 95 ft.

RADIO: *Long Range and Radio Communications:* Ships may send their cable(s) to the Amoco office through the commercial station, "North Post Radio/9YL", which is about 10 miles Northwest of Port of Spain. Upon receipt of such cable(s) North Post will immediately relay it to Amoco's office through their Telex system. Messages pertaining to oil liftings should be addressed to AMOCOTRI, Trinidad. If it is necessary to send messages through vessels' Agents or Owners via International Telex Service, then they may be sent to Amoco by using the Telex address "WG 287" (Amoco–Port of Spain).

Cable or Telex messages addressed to Galeota Terminal would undergo the same procedures, but upon receipt in Amoco's radio office in Port of Spain, they will immediately be relayed to Galeota Point by HF/SSB radio teletype channel.

Cables from Galeota Terminal to the ships would be given to Amoco, Port of Spain radio office on the SSB, which will be telephoned to North Post Radio Station.

The coast radio station transmits traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. At the end of their traffic lists, the coast radio station starts searching for answers on the frequency bands listed below. Thus, any vessel hearing its call sign in the traffic list, will immediately start calling the coast station on its own working frequency in the same band on which the traffic list has been heard. The searching coast station radio operator would eventually pick up the signals from the calling ship and would pass her his traffic.

Listed below is information on "North Post Radio Station" – 9YL:

Station	*Call Sign*		*Frequency*	*Hours*
North	9YL	(H.F.)	17,184 kHz	1200 hrs – 1530 hrs. (GMT)
Post		(H.F.)	12,885 kHz	1330 hrs. – 2050 hrs. (GMT)
Radio		(H.F.)	8,710 kHz	0100/0600/0900/1300 1500/1730 & 2130 hrs. (GMT)
		(H.F.)	6,470 kHz	2300 hrs.
		(M.F.)	476 kHz	0300 hrs. and every 4 hrs. thereafter.

Medium Short Distances: Ships may contact Galeota Terminal within 3 days before arrival on the marine HF frequencies. Galeota Point listens on 2182 kc/s and operates with Amoco's marine units on 2398 kc/s.

Ships equipped with FM/VHF radios may call Galeota Point on 156.8 mc/s=Channel 16 and/or Channel 8.

Advice of Arrival: It is important that ships establish radio contact with Amoco when 3 days distant from Terminal and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hours ETA message to Amoco giving the best estimates of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to Amoco when the vessel is 24 hours and 12 hours distant from Galeota Point and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding ship's readiness to load on arrival, and the number of hours that will be required to discharge ballast after the ship is berthed in mooring (see "Ballast").

Ship-to-Shore Communication: Ship-to-shore communication, while ships are in moorings, will be by portable VHF radiotelephone units. The Loading Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units become inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Ship's Radio Stations: The use of ship's radio equipment while ship is on anchorage in Terminal waters is prohibited by law, unless transmission is made through the local commercial station.

BERTHING:

Single Buoy Mooring: Tankers are loaded by means of a 42 in. pipeline from shore to the SBM which is 2.6 miles offshore. The ballast water is pumped ashore through a 16 in submarine line. The buoy piping consists of 2×20 in. diameter pipes for crude and 1×16 in. diameter pipe for deballasting with 2 by-pass valves. The loading hoses from the buoy to the tanker consist of 2×20 in. floating hoses, 755 ft. and 790 ft. long ending in 3×12 in. hoses of 90 ft. length. Valves are fitted in the buoy connectors so that the flow in one 20 in. diameter floating hose string can be diverted to the 16 in. diameter underbuoy hose string.

The SBM is designed for maximum tanker size of 250,000 d.w.t. and is located in 95 ft. water depth. The buoy is 11 m. in diameter, 4.80 m. high, and equipped with a navigation light and radar reflector. There is a skirt at the bottom of about 15 m. in diameter.

Ship's Gear: Vessels calling at the Galeota Point must be equipped with 2 nylon messenger lines of a minimum 6 in. circumference and at least 300 ft. long. These lines should be laid out free for running at the bow of the vessel. Warping winch or windlass should be in good working order and adequate to handle 12 in. nylon floating rope under heavy strain. Efficient stoppers must be available to transfer floating nylon from winch to bitts.

Vessels must be equipped to fit flanges on floating hoses which are ASA standards.

Ships must be adequately equipped with blocks, tackle and booms to hoist the floating hoses, each weighing about 3 tons, from the sea surface over the ship's port rail to the manifold, in a safe, efficient and expeditious manner. Ships must also have an adequate supply of nuts, bolts, gaskets, and wrenches to connect cargo/deballast hoses.

Ship's Alertness: The Terminal is an open roadstead, therefore, during the time a ship is moored at the Terminal, the ship's engines and gear must be ready with full power for immediate use.

Vessel at the SBM must be able to clear and shall clear immediately upon advice of the Loading Master or as directed by Amoco's Terminal Superintendent.

Ship's personnel should be at their stations and alert at all times during mooring, unmooring and cargo transfer operations.

Mooring Launches: Amoco maintains launches to assist in mooring and unmooring vessels.

BALLAST: It is the ship's Master's responsibility to see that no oil (crude, diesel, bunker C, or bilge) is pumped or spilled overboard from the ship. Galeota Terminal has 2 ballast water pits which are equipped with oil skimming equipment to accommodate any ballast water. The tanker may discharge ballast as desired into the proper line as soon as all arrangements have been made for this action.

All precautions shall be taken to prevent any loss of oil overboard; drip pans must be in place and used when disconnecting oil hoses from manifolds. The waters in and adjacent to the Galeota Terminal, and Amoco's offshore platforms must *never be polluted.*

As soon as practical after arrival, all vessel's tanks will be inspected. If during first inspection or during loading, it is revealed that ship's tanks are not oil-tight, tanker will be rejected and refused further loading. Ship will not be accepted later for loading unless satisfactory evidence, duly certified by Lloyds, ABS Surveyors, or other authorised survey agency, of effective repair is submitted.

A vessel must have sufficient ballast for safe manoeuvring and usually one-third of its tonnage is adequate. However, by a careful watch of the weather information and berthing instructions and by a knowledge of the behaviour of his own vessel, a master may desire to come to the Terminal with minimum ballast.

Ship's Master should be aware that at any time deballasting at sea occurs and has been reported or viewed by Amoco Trinidad Oil Company personnel, the offence will be documented, where possible, by Amoco personnel, and a report submitted to the proper Ministry of Trinidad and Tobago.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area around the ship, to the satisfaction of the Loading Master, in order that any oil on the surface of the sea may be readily detected, and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast during darkness. Vessels should provide explosion proof flood lights for working on deck during night operations.

Loading and Deballasting Simultaneously: Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is received from the Terminal Superintendent.

LOADING:

Rate of Loading: Maximum crude oil loading rate through 2×12 in. deck hoses is approximately 40,000 b.p.h. The flow is by pump and the line pressure will not exceed 100 p.s.i.

In order to save ship's time, it is requested that ballast water be pumped *as fast as possible* and that the tanker receives oil as fast as it can be delivered, both operations having due regard for safety. It is requested that any impediment (such as "Y's", strainers, or mud boxes) to the flow of oil be removed before arrival at the

Terminal. Connections should be provided so that 12 in. ASA deck hoses may be used.

Berthing: Tenders to load crude oil cargo will normally be accepted and the berth will be assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time and are in all respects equipped and ready to moor. In the event that the berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the port area on account of weather (port closed) should keep in contact with the Terminal via radio in order that they will be available when the weather moderates. Amoco reserves the right to load vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. For example, in the event that weather makes it necessary for vessels awaiting berth to vacate the terminal and put to sea, Amoco may load another vessel which arrives first after the return of good weather, but before the return of the vessels waiting in line ahead of it. And further, Amoco reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading, even though the port may be open to other vessels.

Connecting Hoses: After the tanker is securely moored, the floating loading/deballasting hoses must be lifted to the rail with ship's equipment. The two 12 in. hose lifts weigh about 3 tons each. The flange connection on each hose is for a 12 in. manifold. Hoses are lifted individually by the ship's gear and are connected on the port side. The 12 in. hoses are connected direct to the manifold and tankers should have their manifold fittings available.

The Loading Master and the hose crew will sling and connect the hoses to the vessel's manifold. The ship's personnel are expected to operate the winch and assist where necessary. A deck officer should be present at all times.

Loading Readiness and Arrival Time: The Company will make every effort to load vessels upon arrival or as promptly as berth is available, weather permitting.

Notice of readiness will not be accepted as at time of arrival, unless the vessel is in all respects ready to load. Arrival time will be considered as the time the Loading Master boards the vessel or the time that vessel anchors, whichever occurs first.

Responsibility: The vessel is responsible for the deballasting and loading. The Company Loading Master will advise the vessel in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect the terminal facilities. Manipulation of ship's valves is the direct responsibility of the ship's personnel.

Deballasting Control: As soon as the vessel is ready to deballast and the line connections have been made, the manifold valves should be opened and the shore notified. Upon advice from the Terminal, ship may begin discharging ballast into shore line. Line pressures should not exceed 120 p.s.i. This corresponds to a flow rate of 800/1,000 t.p.h.

Oil Valve Control: Caution: The incoming oil stream is controlled onshore, and it is extremely dangerous to close a ship's valve against the incoming stream. Such a procedure creates excessive pressure, which may damage hose, ship's piping, or Terminal facilities. Vessels will be held responsible for damage resulting from failure to observe this precaution.

A reduction in loading rate before topping the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge and a normal standby warning should be given about 15 minutes before the shut down of loading operations per normal tanker practice. On advice from the ship a minimum of 1 minute is required to stop the flow of crude oil.

Emergency Signal: A battery-operated emergency shut down signal is expected to be installed in the near future.

Code Flag: During loading or deballasting the International Code Flag "B" shall be displayed from a topmost signal halyard during daylight hours. During hours of darkness, a red light shall be displayed. This light should be of a character such as to be visible at a distance of at least 1 mile, and show an unbroken light all round the horizon.

Shore Stops: Requests for the Terminal to stop the flow of cargo at a pre-determined tonnage will be made verbally to the Loading Master, and Amoco will not be responsible for any error, and in the case of overloading excess cargo will not be pumped back ashore.

Some delays are always incurred when such a shore stop request is made.

MEDICAL: Vessels requiring emergency medical assistance should immediately contact the Terminal, by marine VHF radio, and supply the necessary pertinent information which will be passed on to the vessel's Agent.

Neither medical nor hospital facilities are available at Galeota or provided by Amoco. Limited facilities are available in Mayaro, which is about 30 minutes drive and unlimited service is available in Port of Spain which is two hours drive.

FRESH WATER: Only available by barge from Port of Spain.

FUEL: Only available by barge from Port of Spain.

REPAIRS: Masters of vessels loading or discharging at Galeota Terminal are advised that this port is considered an "Open Roadstead", and under no circumstances may engines be shut down for repairs while their ships are moored to the SBM system. There are no facilities at Galeota Terminal for making vessel repairs, but arrangements may be made through vessel's Agent, to utilise the Port of Spain facilities. It is emphasised that all vessels at the SBM must be in readiness to clear immediately on instructions to do so.

SURVEYORS: Amoco maintains an inspection laboratory at Galeota Terminal and will inspect cargo on specific request of off-tanker companies.

Classification agencies are represented in Port of Spain as follows:

American Bureau of Shipping
Grell and Company Ltd.,
60 St. Vincent Street,
Port of Spain

Lloyds Register of Shipping
Geo. F. Huggins and Co. Ltd.,
72–74 South Quay
Port of Spain

TIME: GMT minus 4 hours, and daylight saving (Summer time) is not applicable.

CONSULS: There are no consulates at Galeota; however, consular or diplomatic representatives for most nations maintain offices in Port of Spain.

CUSTOMS ALLOWANCES: Each Crew member is allowed to retain in his possession 200 cigarettes and 1 bottle of spirits. The balance must be listed and will be sealed in a locker by the Customs.

SHORE LEAVE: Shore leave for personnel of vessels loading or unloading at the Terminal is arranged through the vessel's Agent. All personnel going ashore must land at the Amoco small boat harbour. Sufficient crew must be aboard at all times for letting go lines in order to clear the mooring immediately if necessary.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Loading Master, having in mind, the hazards of the operation because of the product being handled, weather conditions and any other circumstances requiring special care or caution.

It will be well to remember that Amoco *does not have* any tug or floating vessel in the area equipped with fire-fighting apparatus.

While the vessel is moored or within the vicinity of the moorings, all vessel's personnel and vessel's operations must comply or be in accord with the following safety rules:

1. The ship's engines must remain ready with full power for immediate use.
2. The Loading Master may request the Master to extend the ship's "No Smoking" areas as conditions warrant. Masters are also requested to instruct their crew not to throw lighted cigar or cigarette butts over the side or out of the portholes. All alleyway doors to passage ways leading to deck areas are to be kept closed during cargo transfer operations.
3. Not less than 1 deck officer and 3 seamen shall be available on deck at all times while vessel is in the mooring system.
4. Power must be available at all times on all deck winches and on the anchor windlass while vessel is in the mooring system.
5. Explosion proof deck lighting must be available for night mooring and loading. A good floodlight will be required to illuminate the area around the cargo hose connections during cargo transfer operations. During the discharge of ballast at night, the sea area around the vessel is to be adequately lighted.
6. All deck scuppers must be plugged tight before connecting the floating and deck hose and remain plugged until all hoses are disconnected.
7. The presence of unauthorised craft alongside is extremely hazardous. Ship's Masters are requested to require all non-Amoco craft to clear ship's side as soon as personnel have been embarked or disembarked.
8. No stores may be handled on the weather deck while ship is loading cargo, discharging dirty ballast, or while any ullage hatches, loading hose, or tank tops are open.
9. No cargo will be loaded while tank tops or ullage hatches are open.
10. During the time a vessel is moored in the Galeota Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. Fire hose (at least 2 pairs) shall be left out for immediate use at all times while in the berth.
11. In the event of fire breaking out in any part of the vessel, however minor it may be, the fire alarm must be given immediately. This will consist of a succession of long blasts on the ship's whistle, together with a rapid and continuous ringing on the ship's bell.
12. A safety check-off list and Terminal rules for safety will be delivered by the Loading Master.

WEATHER:

Climate: The climate around Trinidad is generally very good, and is strongly influenced by the North-east trade winds. Visibility is usually excellent except during passing thunderstorms and the percentage of days with less than one mile visibility is very small.

Weather Data and Summary:

Average rainfall	60.0 in.
Mean maximum temperature	87°F
Mean minimum temperature	69°F
Extreme maximum temperature	101°F
Extreme minimum temperature	52°F
Average relative humidity (0700 hrs.)	92%
Average relative humidity (1500 hrs.)	67%

Winds: Winds are predominantly from the North-east and East (about 90% of the time). The mean velocity is about 8/12 knots and infrequently 30 knot winds may be experienced.

Tides: A tidal range on the East coast of Trinidad is 4–5 ft., and the tides occur 17 minutes later than Port of Spain.

Sea Conditions: As Trinidad is constantly under the influence of the North-east trade winds, the seas and swells are predominantly from the Eastern quadrant throughout the year. Wave heights average about 6–8 ft. and during a 2-year observation period waves of 11 ft. and higher occurred for as many as 20 days per year.

Currents flow to the North-west 53%, North 24%, and N.N.W. 14% The currents are not seasonable as currents of 2 to 3 knots are experienced during all months of the year. Average current velocity is about 1.5 knots.

Sea Temperatures: The surface temperature over coastal areas average about 75° to 80°F in the Winter months and 80° to 85°F in Summer.

General: Trinidad is an area where buildings have been damaged by earthquakes and the South-west tip has experienced mud volcanoes and disappearing islands. The rainy season occurs in late Summer and Fall at which time as much as 15 in. per month may be experienced. Hurricanes are seldom felt in Trinidad and Tobago since these islands are to the South of the storm track.

GENERAL:

Government Officials: Trinidad and Tobago Customs officials will be stationed at Galeota and in most instances the Customs officer will also handle the duties of the Quarantine and Immigration officers. Should Customs guards be stationed on board vessels while in the moorings, it is expected that ships will provide food for these guards and other officials.

Quarantine Regulations: The rules governing quarantine of vessels are the same found in other ports of the world.

Visitors: Visitors must obtain a special pass from the Amoco Terminal Superintendent and it is strongly recommended they be restricted to a minimum due to the hazards involved.

Supplies: Commissary supplies, as well as steward's stores are not available at Galeota Point, but a limited amount of fresh fruits and vegetables may be purchased at the market in Mayaro, which is 30 minutes drive from the shore terminal. Unlimited supplies may be purchased in Port of Spain and all arrangements must be made through the ship's Agent.

Bunkers, gas, oil, marine lubricants or potable water are not available at Galeota.

Flag: All vessels are required to fly the Trinidad and Tobago ensign on the foremast during daylight hours. TT flags may be obtained from ship's Agent.

Contraband: Amoco prohibits unauthorised craft from coming alongside ships while in the moorings.

To avoid the possibility of undesirable items getting aboard vessels, it is recommended that Masters discourage "bumboats" or similar craft, coming alongside while vessel is in the Terminal vicinity.

Small Boat Harbour: A sheet piling type jetty is used for the harbouring of mooring launches and supply vessels. The entrance is defined, by night, with a red flashing light mounted on the seaward end of the jetty.

Company's Terminal: The Company's Terminal and marine administrative offices, storage tanks and laboratory for testing stock are located onshore at Galeota Terminal.

Agency: Amoco does not perform any vessel agency functions. Owners of vessels calling at Galeota Terminal must arrange for their own Agent.

OPERATOR: Amoco Trinidad Oil Company.

AGENT: See "Port of Spain".

POINTE-A-PIERRE (Texaco Oil Terminal and Refinery): 10.19 N. 61.28 W.

DOCUMENTS/HEALTH, etc.: As for "Port of Spain".

Officials require accommodation ladder to be rigged, usually on port side, for boarding and clearance.

PILOTAGE: Compulsory. Pilot ordered by Agent after receipt of ETA. Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

ANCHORAGE: Safe anchorage and good holding ground in the roadstead. On acount of Pierre Shoal, a 21 ft. patch about 1.75 cables S.W. of the head of the main viaduct, vessels of moderate draft should approach with the main viaduct bearing more than 075°. The main viaduct consists of pipe-lines supported by reinforced concrete piling, located at 10° 20' N. 61° 30' W. and extends in a W.S.W. direction for 6,190 ft.

RADIO: Texaco Trinidad Inc. maintains their own radio station on frequency 2638 Mc/s. and VHF Channels 16, 13, 12, 11, 8 and 6.

MAX. SIZE:

No. 1 berth North: 40 ft. MLWST; 720 ft. LOA.
No. 2 berth North: 40 ft. MLWST; 775 ft. LOA.
No. 2 berth South: 35 ft. MLWST; 330 ft. LOA.
No. 3 berth North: 35 ft. MLWST; 640 ft. LOA.
No. 3 berth South: 20.5 ft. MLWST; 350 ft. LOA.
No. 4 berth North: 21 ft. MLWST; 350 ft. LOA.
No. 5 sea berth: 40 ft. MLWST; 900 ft. LOA.
No. 7 berth: 35 ft. MLWST; 700 ft. LOA.
No. 8 berth: 33 ft. MLWST; 570 ft. LOA.

Also see "Developments"

TUGS: Texaco Trinidad Inc. maintains three tugs to assist in berthing.

FRESH WATER: Available alongside or by barge (if available and adequate notice given prior arrival).

FUEL: All grades supplied alongside or by barge.

SPECIAL PRECAUTIONS: Tankers loading or discharging.

Bonding: When a ship has docked, the bonding cable and hose shall be connected.

Weather: Loading and discharging of dangerous petroleum may be stopped during an electrical storm and ullage screens or ullage plugs must be put in place.

Emergency alarm: This safety device is conveniently placed on all docks and is under the control of the jetty personnel. This is used only in cases of emergency and has the effect of stopping all shore pumps immediately it is used. Loud-sounding horns are situated on the hose structures and are sounded by the jetty attendant when urgent attention from the ship is required.

Hose pressure: The max. discharge pressure allowed on the jetty hose is 130 pounds. Pressure of jetty hose for loading shall not exceed 130 pounds.

Hot work: No burning, welding or major repairs can be carried out in the harbour without permission. Repairs involving hot work may be started only if a permit has been issued and the necessary gas-free certificate granted by the Company's qualified inspector.

Hoses: Loading hoses are connected up by dock personnel, but must be supported by ship's tackle at the rail during loading or discharging. Ship's officers should keep a close watch on the hose during operations and stop loading and/or discharging operations if anything untoward happens to the hoses. A drip pan is to be placed under all hose connections in use, After loading fuel oil, Marine diesel or NOR, air is used for displacing hose contents into the vessel before being disconnected. For all other products the hose is drained into ship's tanks or jetty slop tank.

Towing wires: On completion of mooring on arrival, a suitable wire shall be hung over the bow and stern on the side away from the dock so that, in an emergency a tug can tow the ship off. The wire should be properly secured on board and it should be long enough to reach the water's edge at the ship's lightest draft.

No Smoking: Smoking is prohibited on all the piers and launches. Smoking on board ship is permitted only in those enclosed spaces that are specifically designated by the Master as "Smoking Areas".

Tank Lids: Tank lids must be closed while handling cargo, and at all other times if tanks are not free of gas. Flame screens must be in position on all open ullage plug holes.

GANGWAY/DECK WATCHMEN: An efficient watch must be maintained on deck and in the engine room of all ships in port, and a sufficient number of men must be on board at all times to move the vessel either for harbour operations or in emergency situations.

CUSTOMS ALLOWANCE: 200 cigarettes and moderate amount of spirits.

IDENTIFICATION CARDS: Not required.

MEDICAL: Advance notice of medical attention preferred. Modern hospital facilities.

TELEPHONES: On dockside and at all sea berths.

SHORE LEAVE: Crew not allowed ashore at Pointe-a-Pierre. Regular launch service from ship to San Fernando, 3 miles away.

DEVELOPMENTS: Dredging of the Pointe-a-Pierre harbour carried out a few months ago (Summer 1978) has not been fully accomplished and, therefore, the draft alongside the undermentioned berths has been restricted to the following depths until final completion of dredging which is expected by year end 1978.

	MLWST
No. 1 Berth	37 ft. 6 in.
No. 2 Berth (North)	37 ft. 0 in.
No. 2 Berth (South)	22 ft. 0 in.
No. 3 Berth (North)	35 ft. 0 in.
No. 3 Berth (South)	20 ft. 0 in.
No. 4 Berth	23 ft. 0 in.
No. 5 Berth	39 ft. 0 in.
No. 7 Berth	36 ft. 0 in.
No. 8 Berth	28 ft. 6 in.

AGENT: See "Port of Spain".

POINT FORTIN: 10.12 N. 61.42 W. (See Plan Book)

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to 'Port of Spain".

PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles off main jetty (Lat. 10° 12' N. Long. 61° 42' W.).

ANCHORAGE: There is safe anchorage 0.5 miles off the head of the jetty.

MAX. SIZE: Jetty 2 miles long with "T" head providing two outer berths of 700 ft. length and a depth of 38 ft. 1 inner berth of 300 ft. length and a depth of 35 ft. and other inner berths of 300 ft. length with a depth of 15 ft. 6 in.

1 conventional buoy mooring (6-buoy mooring) of 850 ft. length and a depth of 53 ft. situated 4,819 ft. North off jetty head.

TUGS: Required for berthing at outer berths for vessels of 30,000 d.w.t. and over and for unberthing vessels with a draft of 36 ft. or deeper. Also required for berthing and unberthing at conventional buoy mooring. Launch assists in berthing and unberthing.

BERTHING: Bottom alongside, mud; back pressure (hose), 100 lb; Current, flood S.W., ebb N.E. 2 to 5 knots; rise and fall tide, 4 ft.

FRESH WATER: Not available at CBM.

FUEL: Not available at CBM.

DIRTY BALLAST: No facilities available. Only small amount (approx. 200 tons) tank drainings acceptable on jetty and only if fluid at ambient temperature.

PRECAUTIONS: Normal oil terminal safety precautions applicable.

GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.

CUSTOMS ALLOWANCE: 200 cigarettes, and a moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
REPAIRS AND DRY DOCKS: At Chaguaramas.
MEDICAL: All facilities available.
REPATRIATIONS: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.
SHIPMASTER'S REPORT: April 1977

The port of Point Fortin is situated in South West Trinidad. The light beacon on the "T" pier head is in position Lat 10° 12′ 05″ N. Long. 61° 42′ 06″ W. The port is owned and operated by the Trinidad and Tobago Oil Company Ltd. (TRINTOC), to serve the 100,000 bbls. per day refinery at Point Fortin. A 24 hour communications service is provided, telex via international lines (TRINTOC Point Fortin) or VHF 16 (Call sign: Point Fortin Shipping) working on Channel 11.

Pilotage is compulsory with the boarding area 1 mile seaward from the jetty head. There is 1×1,000 h.p. tug normally available for berthing vessels over 30,000 Summer d.w.t.

Tides in the area of Point Fortin vary in strength throughout the year with a max. rate of 3 knots. Masters are advised to check sea water density for corrected loadline readings. Water density varies throughout the year from salt to fresh.

Engine repairs which entail immobilisation of engines are not permitted when moored at the berths.

Vessel must arrive with clean ballast consistent with safe manoeuvring of the ship. A ballast condition of 25% of the vessels Summer d.w.t. is recommended.

Only clean ballast may be pumped overboard.

Notice of readiness is accepted when vessels' tanks are ready to receive cargo.

Bunkers and fresh water can be supplied at all berths except No. 5 (C.B.M.) Stores and laundry facilities are available on request. A diver is available. The only way of getting ashore is by means of a liberty launch. Walking the pipe-line bridge is strictly forbidden.

Inward Clearance is effected immediately on arrival by the Port Authorities; the following documents should be available for official use:

Clearance from Last Port.
Deratization Certificate
International Health Certificate
Declaration and Crew Vaccination Certificate
Cargo Manifest, if any
Bill of Lading, if applicable
List of unmanifested packages, if applicable
3 Copies arrival Report
7 Copies Crew List
3 Copies Store List
3 Copies Personal Effects
License for Dangerous drugs, if any aboard.

In the interest of reducing tanker port time, vessels' Masters are advised to request Pratique by Radio prior to their arrival.

Berths:

No. 1 – Draft 37 ft. 6 in. (Loading over tide 39 ft.).
Max. length 700 ft. – Max. berthing displacement 45,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Kero, LDF, JP4, Platformate. All via 10 in. hoses. Napthanic Oil Residue via 4 in. hose.

No. 2 – Draft 36 ft. (Loading over tide 38 ft.).
Max. length 700 ft. Max. berthing displacement 25,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Platformate, Kero, LDF, JP4, Mogas. All via 10 in. hoses. (Napthanic Oil Residue via 1×4 in. hose).

No. 3 – Draft 34 ft. 6 in.
Max. length 300 ft. max. berthing displacement 5,500 tons.
Grades handled: Fuel oil, Diesel oil, Gas oil, Kero, Mogas, all of them through 6 in. hoses.

No. 4 – Draft 14 ft. 6 in.
Max. length 300 ft. Max. berthing displacement 3,000 tons. Berth port side to. Berthing at slack water and flood tide, unberthing at slack water tide and flood tide.
Grades handled: Fuel oil, Diesel oil, Gas oil, LPG, Bitumen, Emulsion (COLAS).

No. 5 – C.B.M., 6 buoys, max. draft 51 ft. max. length 850 ft. Berth either side. Daylight berthing only.
Grades handled: Crude oil, Fuel Oil via 2×16 in. hoses.

AGENT: See "Port of Spain".

POINT LISAS: 10.22 N. 61.29 W.

DOCUMENTS:

7 Copies Crew List.
2 Copies Ship's Stores List.
1 Copy Crew Stores List.
4 Copies Immigration arrival Report (supplied on arrival).
1 Declaration of Health (supplied on arrival).
Ship's Register.

PILOTAGE: Pilots ordered through Agent; 48/24/12 hour ETA needed. Pilotage is compulsory. Pilots board at Head of Pt. Lisas Channel (10° 22′ 37″ N. 61° 39′ 38″ W.); Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

Launch hire arranged by Dock Master to take out Pilot to vessels on arrival, and again take off Pilots from vessels on departure.

CLEARANCE: Point Lisas being a port of entry is equipped with resident Customs Officer and Guard. Ships arriving from abroad could proceed directly to Point Lisas as Customs officer acts for Harbour Master/Immigration/Port Health. Tel. 659 2221.

ANCHORAGE: Safe anchorage 0.25 miles off head of channel. On occasions, when port congested, vessels may be requested to anchor Port of Spain Roads (10° 41′ N. 61° 33′ W.) before proceeding Pt. Lisas.

RESTRICTIONS: No restrictions on night entry – departure.

MAX. SIZE: Point Lisas "Liquid Pier" (vessels handling bulk sugar, molasses, caustic soda and Anhydrous Ammonia in Liquid form), Maximum LOA: 550 ft. Maximum draft: 28 ft. LW.

Point Lisas "Solids Pier" (vessels discharging plant equipment, and loading sulphuric acid in drums and bagged and bulk fertiliser). Maximum LOA: 400 ft. Maximum draft: 20 ft. LWOST.

HEALTH: Crews of vessels arriving must have valid Vaccination Certificates, covering smallpox. If not in possession, Master should advise when giving ETA and Port Health Officer will vaccinate on arrival.

For quarantine if required, or authentication of vaccination certificate, Honorary Port Health Officer could be in attendance at short notice. Tel. 656 2311.

VHF: Pt. Lisas Dockmaster can be contacted on VHF Channels 16, 14 and 12.

TUGS: Molasses, bulk sugar and LPG carriers use a tug to assist in berthing and unberthing at Pt. Lisas "Liquid Pier". Tug will be ordered by the Agent.

STEVEDORES: If necessary will be ordered by Agents. No ETA to stevedores necessary.

FRESH WATER: Supplied at both piers. Also by barge.

FUEL: All grades supplied by barge. At "Solids Pier" gas oil only can be supplied ex shore installation.

FIRE PRECAUTIONS: When loading LPG. No smoking on pier or on ship's deck.

GANGWAY/DECK WATCHMEN: Customs guards on 24 hours duty at ship's side.

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCE: 200 cigarettes and a moderate amount of spirits.

IDENTIFICATION CARDS: Not required.

CONSULS: At Port of Spain.

REPAIRS AND DRY DOCKS: At Chaguaramas 20 miles North of Pt. Lisas.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Whit Monday; Corpus Christi; Discovery Day (August 8th); Independence Day (August 31st); Diwali Day (late October/early November); Eid-ul-Fitr (December 21st-22nd, approximately); Christmas Day (December 25th); Boxing Day (December 26th); Labour Day (June 19th); Republic Day (September 19th). Work is possible, except for Labour Day, on these holidays.

POLICE/FIRE/AMBULANCE: Accidents — Police — Help, 62999; Fire — First Aid, 62998; Foreign Calls, 6216, 35900, 31913.

MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.

REPATRIATIONS: Crew changes and repatriation can be arranged.

AIRPORT: Piarco International Airport — 30 miles from Point Lisas. Daily flights to world-wide destinations.

TIME: GMT minus 4 hours.

TELEPHONES: No facilities for telephones on board.

SERVICES: Efficient maintenance gang available for normal work, tank cleaning, painting, etc.

SHORE LEAVE: No restrictions.

DELAYS: Due to congestion, sometimes delays are unavoidable, usually not more than 24 hours.

DEVELOPMENTS: Dredging of the channel is taking place and initially the depth will be 32 ft. increasing to 42 ft. when completed in 1980.

AUTHORITY: Federation Chemicals Ltd.

AGENT: Melville Shipping and Trading Ltd., Steamship Operators and Agents, 68/70 Sackville Street, Port of Spain. Tel. 54060, 54218, 52384, 54977, 54287. Telex POS 265. Cables "Meltra". Code: New Boe. Bankers: Royal Bank of Trinidad & Tobago Ltd. AO Tel. 662-5177, 41950, 41925, 22212.

PORT OF SPAIN: 10.39 N. 61.32 W. (See Plan Book)

DOCUMENTS:

For Immigration. On boarding, 3 Crew Lists and 3 Passengers Lists if passengers on board. Inspection of Derat. Certificate. Health Declaration and arrival report forms supplied by Immigration on boarding to be made up. Passengers and Crew must have valid smallpox certificates.

For Customs. 2 Crew Lists and 1 Passengers List if passengers on board, 2 Customs Ship's Stores Lists, 1 Crew's Stores List. Forms supplied boarding.

Port doctor will board if calling from quarantine port. No forms required other than inspecting smallpox certificates of crew and passengers.

PILOTAGE: Not compulsory to Port of Spain anchorage but if required will attend from outside Bocas or where required through Agents in ETA message. Calling Pilot International Code Flag "H" by day and white light over red at night or International Code signal "G" on whistle.

Gangway or standard type pilot ladder with spreaders about 10 ft. apart. Ladder must be clean. It is desirable that 1 stanchion be securely fitted in the bulwalk at the top of the ladder.

Pilot station is situated on Port of Spain Wharf.

ANCHORAGE: Depends entirely on draft but should not be nearer than 0.5 miles from Grier Channel entrance, except in cases of vessels loaded with explosives; this anchorage is clearly defined on Chart.

Open roadstead in Gulf of Paria but can be considered as sheltered with choppy seas at times. Bottom shelves gradually from shoreline to 7 fathoms at Western end of harbour limits, increasing to 20 fathoms outside harbour limits Westward. Type of bottom, mud. Swinging area unlimited. No mooring buoy. Distance from anchorage to shore 2.25 miles at 5 fathoms to 5 miles at 7 fathoms, vessel will swing to the tide if loaded, and to the wind if light.

Currents 0.5 to 1.5 knots flood and ebb rise and fall of tides, variable minimum 1 ft. 5 in. maximum 4 ft. Rainy season June-December. Dry season December-June not always predictable. Rain squalls occur during months of July, August and September up to 30 to 40 knots unpredictable hurricane most unusual. Prevailing winds are mostly Easterly. Normally stronger during daylight.

RADIO: Advise through North Post wireless or telephone, call sign 9 YL. ETA 48 hours and 24 hours with other requirements.

RESTRICTIONS/MAX. SIZE: The Grier Channel, 350 ft. wide, leads to a dredged basin in which are the docks. No restrictions length, but maximum draft in channel, in basin and alongside is 32 ft.

HEALTH: Crews of vessels arriving must have valid Vaccination Certificates, covering smallpox. If not in possession, Master should advise when giving ETA and Port Health Officer will vaccinate on arrival.

TUGS: There are 3 tugs in Port of Spain to assist in docking operations.

BERTHING: *Container Terminal:* The new Container Terminal at Berth 6A includes 1,085 ft. of deep water berth which links King's Wharf and King's Wharf Extension. The total paved back-up area covers 15 acres and is used exclusively for the handling of containers. The Container Terminal is serviced by the existing Sheds 9 and 10 with a total covered space of 162,000 sq. ft. In addition, there are 27 acres of paved space designated for the handling of containers.

The Container Terminal is equipped with two 40-ton Paceco gantry quay cranes. The outreach of the cranes is 115 ft. with a backreach of 50 ft. In addition, 2 rubber tyred yard gantry cranes manufactured by Diamond Manufacturing Co. were commissioned in September, 1977. These cranes are capable of straddling 5 rows of containers plus a truck lane.

It is estimated that the Berth 6A Container Terminal with its full back-up facilities is capable of handling 80,000 t.e.u.'s per annum.

King's Wharf: Length 3,900 ft. Berthing for 6 vessels with max. draft of 30 ft. 5 transit sheds available (Nos. 1-5). Apron width 50 ft.

King's Wharf Extension: Length 1,200 ft. Berthing for 2 vessels with max. draft of 30 ft. 2 transit sheds available (Nos. 7-8). Apron width 75 ft.

Large cruiser vessels berth at No. 5, 6 and 7. Vessels with length in excess of 525 ft. are unable to berth at No. 1 berth as width of basin is 700 ft.

STEVEDORES: Labour on Docks and labour on ships: Controlled by Port Contractors Ltd. Ordered by Agents. Gang size on Docks: 14 to 18 men. Gang size on vessels: 13 men, 1 gangman, 2 winch drivers, 8 hold men, 1 cooper, and 1 hatch foreman.

CARGO HANDLING: One berth on the Eastern side is an open wharf without a seafront warehouse. This berth is strictly used for containerised and passenger (cruise) vessels. The Eastern wharf is 3,300 ft. with five seafront warehouses. On the Western side the wharf is 1,200 ft. long with two seafront warehouses for general cargo, but at these two berths there are also facilities for receiving bulk cargo, i.e. grain, liquid oil, fats and molasses. These cargoes are usually discharged by vessel's equipment, but grain can be discharged by shore equipment at a slower rate.

There is now one floating crane, 60 tons capacity, one crawler crane of 160 tons capacity and also one 125-ton fork lift handling 20 ft. containers. There is also a trailer service for 20 ft. containers from dock to consignee's warehouse.

FRESH WATER: Supplied alongside all berths. Also available by barge.

FUEL: All grades supplied by barge.

GANGWAY/DECK WATCHMEN: Customs guards on 24 hours duty at ship's side.

OPENING/CLOSING HATCHES: This is handled by stevedores.

CUSTOMS ALLOWANCE: 200 cigarettes and a moderate amount of spirits.

CARGO GEAR: Vessels normally load and discharge with their own gear but shore cranes and heavy lift cranes available on the dock.

IDENTIFICATION CARDS: Not required.

Health Declaration.

PILOTAGE: Vessels approaching the port applying for Pilot by day by flying the flag "G". Advise Pilot of ETA 48 hours before arrival. Pilot vessel and pilot station may be contacted by VHF Channel 16. The Pilot boat exhibits the letters "P" & "H". The Pilot boards half a mile from the Southern fairway, vessels have to slow down to enable the Pilot to board. The anchorage for vessels awaiting the Pilot is half a mile from the Southern fairway.

ANCHORAGE: See "Pilotage".

RESTRICTIONS: Entry at night is forbidden for tankers.

MAX. SIZE: See "Berthing".

HEALTH: Free pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.

RADIO: Tunis Radio.

VHF: Channel 16.

TUGS: The tugs join the vessel at half a mile from the fairway. The 2 tugs available are equipped with radar.

BERTHING: There are 10 alongside berths in the 3 docks at Bizerte and 3 alongside berths at Menzel Bourguiba. The water is salt. Length of the main quays: 360 m., depth 9.15 m.
Length of the oil handling berth "A": 200 m., depth: 8.50 m.
Length of the oil handling berth "B": 150 m., depth: 8.50 m.
Molasses handling berth, depth: 7.5 m. Berth in front of the silo: depth 8.50 m. Iron ore handling berth "Douaria": depth 8.50 m. Berth in front of the cement factory: depth 7.6 m. Wooden wharf No. 2 at Menzel Bourguiba depth; 8 m.

Load and discharge is carried out by ship's own gear.

CRANES: 1 travelling gantry crane, capacity 6 tons. 2 travelling gantry cranes, capacity 3 tons. 1 crane car, capacity 6 tons. 1 crane car, capacity 3 tons. 1 fork lift, capacity 7 tons. 2 fork lifts, capacity 3.5 tons. 2 tractors with tipping wagons. 1 floating pontoon crane of 30 tons.

BULK HANDLING FACILITIES: Grain is handled on the main quay, if cargo in bulk it is loaded into bags. Fertilizer also handled in bags. Ore and coal is unloaded into lorries.

SPECIAL CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Minimum of 24 hours advance notice of ETA to Agent is required.

MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available. 48 hours notice required for Smallpox, Cholera, and Yellow Fever inoculations. Advise Agent of requirements.

TANKERS: Crude oil load/discharge line 20 in. diameter. Fuel oil load/discharge line 14 in. diameter. No slop discharge facilities. Tugs stand-by during cargo operations.

FRESH WATER: Available from the quay at most berths. Rate 20 cu.m.p.h.

FUEL: Not available.

FIRE PRECAUTIONS: The Petrol Harbour is equipped with fire hydrants. A tug of 1,200 h.p. is required to be permanently standing by when tankers are moored alongside the quay.

GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCE: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.

IDENTIFICATION CARDS: Crew members' identification cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.

CONSULS: Italy Tel. 02.31.747.

REPAIRS: Some types of deck and engine repairs can be effected.

DRY DOCKS: There are 4 dry docks which are located at Menzel Bourguiba.

Dry Dock No. 1 & 4	length	190.90 m.
	higher width	30.25 m.
	lower width	26.50 m.
	draft	8.80 m.
Dry Dock No. 2	length	247.50 m.
	higher width	40.60 m.
	draft	12.00 m.
	lower width	36.00 m.
Dry Dock No. 3	length	84.10 m.
	higher width	14.78 m.
	lower width	13.00 m.
	draft	4.15 m.

SURVEYORS: Bureau Veritas.

REPATRIATION: Can be arranged.

AIRPORT: Tunis/Carthage airport is situated 70 km. from Bizerte. Served by international airlines.

TIME: GMT plus 1 hour all year round.

HOLIDAYS: There are 17 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.

POLICE/FIRE/AMBULANCE: Police Tel. (02)31.200; Fire (02)31.022; Ambulance (02)31.422.

TELEPHONES: No arrangements exist.

SHORE LEAVE: Allowed.

AUTHORITY: Direction du Port de Bizerte.

LA GOULETTE (Including Tunis): 36.49 N. 10.18 E.

DOCUMENTS: *Required by Police:*
2 Crew Lists.
2 Passenger Lists.
Required by Customs:
1 Crew List.
2 Passenger Lists.
2 Crew Manifests.
Required by Port Health:
1 Crew List.
1 Passenger List.

PILOTAGE: To call Pilot contact Goulette Radio station, call sign 3VW, 24 hour watch on 2182 kc/s. or VHF Channel 16. Pilot boats are in permanent direct contact with Goulette Radio. International code visual and sound pilot signals may be used on arrival at the sea buoy.

Pilot launches are stationed inside the port, and proceed on call to meet vessels about 0.25 mile beyond the sea buoy, i.e. the buoy No. 1 in the entrance channel to the port.

ANCHORAGE: Anchorages in the port roads are safe except during strong winds and heavy seas from the North or N.E.; good holding ground.

Larger vessels anchor about 0.5 miles N.E. of the sea buoy in depths of 12-14 m. Small vessels may anchor either North or South of the approach channel in depths of 7-9 m. in the vicinity of buoys Nos. 4 and 5 provided that they do not obstruct navigation in the entrance channel.

RESTRICTIONS: Tankers and ore carriers are not allowed to enter and leave port during the hours of darkness. Depth of water at low water is 32 ft.

MAX. SIZE: *La Goulette:* up to max. draft 32 ft. Max. length 200 m. *Tunis:* up to max. draft 21 ft. 6 in.

HEALTH: Master is required to complete Declaration of Health on arrival. Vessels which have previously called at another Tunisian port are given automatic free pratique except in time of epidemic.

RADIO: Tunis Radio 24 hour watch on 2182 kc/s, radio-telephone watch from 0600 to 2200 hrs. on 500 kc/s. Goulette Radio call sign 3VW 24 hour watch on 2182 kc/s. and VHF Channel 16.

TUGS: Are available to assist berthing as directed by the Pilot. Tugs join vessels in the vicinity of buoys Nos. 4 and 6, that is 400 or 500 m. from the berths. Vessels lines always used.

BERTHING: *La Goulette:* one ore berth, unloading rate 2,000 t.p.h.

STEVEDORES: Gangs are ordered before 0600 hrs. for morning work; before 1300 hrs. for the afternoon and before 2000 hrs. for night work.

MEDICAL: Preferable to advise Agent in advance if doctor required on board. Crew members should possess international vaccination certificates.

TANKERS: One berth is reserved for tankers with a max. draft of 27 ft. 6 in.

FRESH WATER: Hydrants are situated on the quays supplying fresh water at a rate of 12-15 cu.m.p.h. A water barge of 50 tons capacity can supply vessels at anchor.

FIRE PRECAUTIONS: A watchman has to be permanently employed on board tankers when alongside. A tug equipped with fire-fighting equipment is required to stand by tankers discharging.

GANGWAY/DECK WATCHMEN: The employment of gangway watchmen is necessary.

OPENING/CLOSING HATCHES: Are performed by ship's crew .

CUSTOMS ALLOWANCE: Each crewman is allowed two packets of cigarettes or 4 cigars or 50 gr. of tobacco and one opened bottle of alcohol.

CONSULS: Following countries are represented in Tunisia:
Algeria
Australia
Denmark
France
Great Britain
Greece
Italy
Morocco
Norway
Panama
U.S.A.
Venezuela

REPAIRS: Machinery and boiler repairs can be effected on board. For large repairs it is necessary to send part to the Shipyards of Soconema at Menzel Bourguiba 70 miles away.

DRY DOCKS: At Menzel Bourguiba 4 dry docks, the largest of which is 253 m. long, 41 m. wide, 10.5 m. depth.

REPATRIATION: Can be arranged.

AIRPORT: Situated 10 km. from the port. Regular daily flights to Europe and N. Africa.

TIME: GMT plus 1 hour. No alterations during the year.

HOLIDAYS: 20th March (Independence Day); 1st May (Labour Day); 25th July (Republic Day); 15th October (Evacuation Day). In addition there are 13 other holidays on which work is carried out on payment of overtime.

POLICE/FIRE/AMBULANCE: Tunis Police, tel. 5389; Goulette Police, tel. 275.028; Fire. 198; Ambulance 260.022.

Telephones can be connected on board vessels and are compulsory for tankers.

SHORE LEAVE: Crew members are permitted to go ashore after obtaining a pass from the Port Police.

AUTHORITY: Director of the Port, Office des Ports Nationaux.

LA SKHIRRA (Terminal Platform): 34.18 N. 10.09 E. (See Plan Book)

DOCUMENTS:

5 Crew Lists.
2 Lists of Crew Personal Effects.
2 Stores Lists.
5 Passenger Lists, if passengers carried.
Manifest of cargo on board.
Manifest of cargo in transit.

PILOTAGE: Compulsory for berthing alongside. Pilot employed by TRAPSA. ETA required 48 hours and 24 hours before arrival. Call Pilot by international code signals on arrival, or by VHF Channel 16. TRAPSA will advise if vessel required to anchor, or berth immediately. Pilot boards 2 miles off the terminal by black and white motor launch. If it is necessary (vessel without chart) Pilot will proceed outside the port limits.

ANCHORAGE: Vessels should anchor outside the prohibited zone which is limited to the South by the parallel of Buoy No. 5 and to the East by bearing 350° from the terminal platform light.

MAX. SIZE: Length 300 m. Draft 47 ft. 6 in. or up to 51 ft. at high water.

HEALTH: International Quarantine signals to be shown on arrival. Vessels normally receive free pratique at the quay after berthing. Suspect vessels must wait at anchor until pratique is given.

RADIO: TRAPSA operate coastal station Laskhirra Radio (3VP). Messages for TRAPSA passed by other stations should be addressed Rapetrol Laskhirra.

VHF: The harbour office and loading terminal are equipped with VHF on the following channels: 156.8 Mc/s (calling), 156.6 Mc/s., 156.7 Mc/s., 156.55 Mc/s. Contact with tugs can be made on all 4 channels.

TUGS: Two tugs 1,500 h.p. each, normally used for berthing. Lines provided by tugs.

BERTHING: Two loading berths situated one each side of terminal platform connected by a gangway from the shore. For safe manoeuvring tankers are recommended to arrive with ballast up to 30% of summer deadweight. Mooring may need to be doubled during months of December to April, when sudden violent squalls sometimes occur. A vessel alongside requiring tug assistance may sound one long blast at frequent short intervals.

Depth alongside loading berths is 15 to 16 m. Loading platform is served by three 30 in. oil pipe-lines and two 24 in. ballast lines. Each berth equipped with four 12 in. flexible hoses. Max. loading rate 12,000 cu.m. per hour.

MEDICAL: Advance notice required of any medical assistance needed. Hospital facilities available. Crew members require valid vaccination certificates.

BALLAST: All ballast, except permanent, to be pumped to shore installation. Heavy fines for water pollution. Max. rate 6,000 cu.m. per hour.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCE: 2 packets cigarettes allowed each Crew man. No alcohol allowed.

CONSULS: Following countries are represented at Sfax: France, Sweden, Great Britain, Netherlands and Italy.

REPAIRS: There are no facilities for repairs. Nearest at Sfax.

REPATRIATION: Can be arranged.

AIRPORT: Nearest at Tunis 350 km. away.

TIME: GMT plus 1 hour all year round.

SHORE LEAVE: Not allowed in Trapsa installation. Can be arranged through Agent.

AUTHORITY: T.R.A.P.S.A.

SFAX: 34.44 N. 10.46 E.

DOCUMENTS: Within 24 hours of arrival Masters must submit a written declaration giving the name of ship and of the Master, Owner or Charterer, vessel's tonnage, draft, cargo, port of origin and destination, number of crew on board. Also required:

Customs Manifest.
Crew List for Police.
List of Dangerous Cargo.
Health Declaration.

PILOTAGE: Compulsory for all vessels over 100 gross tons. Pilotage commences at the outer buoys of the entrance channel. Day signals for Pilot, International Code Signal "P.T" or Code flag "S" hoisted alone or below code pennant. Night signals according to International rules. For entry at night, vessels must radio Harbour Master at the latest one hour before sunset to confirm their intention. Before boarding, Pilot will check that vessel does not exceed the max. authorised draft. If the "Entry Prohibited" signal is not hoisted at the port signal mast, vessel may await Pilot in the channel axis about 1 mile off the outer buoys. Pilot boards from a launch 11 m. long, displaying international pilot signals. Pilot may be contacted by radio through Radio Port de Sfax. Agent must give advance notice of vessels arrival to Harbour Master 24 or 48 hours beforehand.

ANCHORAGE: In immediate vicinity of the port, depths up to 15 m., good holding ground.

MAX. SIZE: Length 192 m., beam 26 m., draft 33 ft.

HEALTH: To request free pratique, hoist "Q" flag on arrival, or radio to Port Health Service. Pratique normally given at the berth after mooring. Suspect vessels are required to wait at anchor until pratique is given.

RADIO: Sfax. Port Call—call sign 3VW2, operating from 05.00-09.00 and 15.00-19.00 hrs. GMT.

Calling frequency 2182 kc/s., working frequency 1743 kc/s. CR3. Used only for communications with port services. Meteorological information provided on request.

TUGS: Join vessel at outer buoys or according to circumstances in the outer port.

BERTHING: N.E. Quay 820 m. long phosphate berth.
West Quay 150 m. long phosphate berth.
Petrol Pier 105 m. long Max. size: length 180 m., draft 33 ft.
Salicole Pier salt loading berth.

STEVEDORES: Available, arranged by Agent basis vessel's ETA.

MEDICAL: Advance notice preferred if medical attention required. Hospital facilities available. Vaccination certificates required for all crew.

DENSITY: 1025.

FRESH WATER: Hydrants fitted on all quays. Written request for replenishing water is required by Harbour Master.

FUEL: Available by barge.

DEVELOPMENTS: Entance channel to be widened to 60 m. Dredging to 12.50 m. of channel and principal quays. These projects are under study.

GANGWAY/DECK WATCHMEN: Normally ship's crew. Available from shore if required.

OPENING/CLOSING HATCHES: Normally performed by crew.

IDENTIFICATION CARDS: Required by all crew.

CONSULS: Local representatives for France, Great Britain, Netherlands, Norway, Sweden, Denmark, Spain, Italy, Greece, Portugal and Belgium.

REPAIRS: Small engine repairs can be effected. Floating dock for vessels less than 350 tons.

REPATRIATION: Can be arranged.

AIRPORT: There is an airfield 7 km. from the city. No regular services.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January; 18th January; Aid El Kebir; Hegirian New Year; 20th March; 9th April; 1st May; Mouled; 1st and 2nd June; 25th July; 3rd August; 13th August; 3rd September; 15th October; Aid Es Seghir.

POLICE: Tel. 21-700.

SHORE LEAVE: Allowed.

SHIPMASTERS REPORT: 1976.

Documents:

1 General Declaration.
2 Stores Lists.
3 Crew Lists.
1 List of Dangerous Cargo.
1 Health Declaration.

Pilotage: To be contacted on VHF Channel 16, between 0600–1000 hrs. local time and between 1600–2000 hrs. local time. Also Harbour Master may be contacted at the same hours on Channel 16. At other times the same Authorities may be contacted by radio 2182 kc/s.

My vessel had a draft of 26 ft. By the VHF the Harbour Master ordered me to enter the channel and continue up to the Outer Basin where a Pilot would embark on the Port side.

It was later confirmed both by the Pilot and Agent to be usual for ships up to 10,000 tons to enter the outer Basin without Pilot. Also upon our departure, the Pilot disembarked at the outer harbour Basin.

The Agent told me the channel was 34 ft. deep. Although no measurements have been taken for 10 years. Lately a ship with draft of 33 ft. has passed through the channel without any difficulties.

An unmarked wreck is situated in position 34° 37.5′ N., 10° 49.5′ E. The best way to approach the outer channel from S.W. or South, would therefore be to navigate to a position 6.5 miles S.E. of Tina's Lt. Tr., then change course for the outer buoys of channel.

The only Beacons illuminated around Kerkenah Banks were Beacon No. "1" and No. "8". All other buoys were in correct position, but extinguished.

Stevedores: Work in shifts from 0700 hrs. till 1300 hrs. and from 1400 hrs. till 2000 hrs. In case of sailing it is possible to arrange overtime up to 2100 hrs. It is also possible to have night gangs from 2100 hrs. till 0300 hrs.

AUTHORITY: Direction du Port de Sfax.

Rom.

SOUSSE (Suza): 35.50 N. 10.38 E.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
4 Crew Personal Effects Lists.
Health Declaration.
Manifest of Provisions on Board.
2 copies vessel's particular declaration.

PILOTAGE: Contact Pilot Station on VHF Channel 16 or Tel. 03.20.401.
RESTRICTIONS: Entrance to the port coming from the sea is East to West. Channel 820 m. long, dredged to 10 m. Depth in port area 7.80 m., height of tide 0.40 m.
MAX. SIZE: Max. LOA. 170 m.
HEALTH: Free pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.
RADIO: Sousse Control "3VW4" 2182 kHz.
BERTHING: One basin for ocean-going ships, yacht basin and fishing vessel harbour.

Length of quays 830 m. 8 berths. Also see "Developments".
STEVEDORES: Minimum of 24 hours advance notice of ETA to Agent is required.
MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available.
REPAIRS: No facilities.
GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.
OPENING/CLOSING HATCHES: Carried out by stevedores at the request of Masters.
CUSTOMS ALLOWANCE: Each crew member is allowed one carton of cigarettes and one opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.
IDENTIFICATION CARDS: Crew member's identification cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.
TIME: GMT plus 1 hour all year round.
HOLIDAYS: There are 17 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.
DEVELOPMENTS: In August 1979 the following will be available:—

South Basin Quay, length 140 m., dredged to 9.5 m. The channel will be dredged to 10.5 m.

A tug of 1,200 h.p., 1 crane 18 tons and 2 cranes 10 tons will be available.
AIRPORT: Skanes Monastir – 13 km. from the port.
AUTHORITY: Direction du Port.

NOTES

Please also advise Shipping Guides Ltd.

Turkey

GENERAL:

On arrival off Canakkale, coming from the Aegean, or off Buyukdere, coming from the Black Sea, ships must stop for sanitary inspection. However, tankers with a d.w.t. over 100,000 tons proceeding to the Gulf of Izmit to discharge or load petroleum products may obtain pratique there without stopping at Canakkale, provided Agents are notified 96 hours in advance.

In the event of bad weather at Canak, vessels may be allowed to continue their voyage to Istanbul and undergo the sanitary inspection there. Permission to do so is notified to them by the Canak Sanitary Office with the signal "H.M." in daytime and three vertical lights (green, white, green) at night.

Pilotage through the Dardanelles and the Bosphorus is not compulsory. Pilot stations, equipped with VHF operating on Channel 16, are located at Canakkale, Istanbul and Telli Tabia (Upper Bosphorus).

Turkish Flag: All foreign ships are required to fly Turkish flag during their stay in Turkish ports or when passing through the Straits (Dardanelles and Bosphorus).

Sanitary and Port Inspections: On arrival at a Turkish port, every ship is boarded by a Sanitary Officer for examination. Nobody may join or leave the ship before this inspection is completed.

The ship must produce the following documents:

Sanitary Declaration Form.
Deratisation Certificate.
Ship's Register.
Load-line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Cargo Ship Safety Construction Certificate.

Police Customs Controls: After obtaining free sanitary pratique, the ship must likewise produce:

(1) 3 Crew Lists together with every member's passport, discharge book or Z-card.
(2) 1 List of Provisions, Stores and Bunkers.
(3) 1 Declaration of all Monies or cheques carried in the ship's safe.
(4) Manifests of all cargo on board, whether for discharge at Turkish or foreign ports.
(5) 1 List of Passengers landing in Istanbul showing nationality, number, date and source of entrance visa (if such visa is required) together with the passports.
(6) 1 List of Transit Passengers together with the passports.

Documents covered by items 1, 2, 3, 4 and 6 as well as a list of passengers embarking at Istanbul are also required on departure.

Police and Customs Controls are effected at Istanbul when arriving from the Aegean and at Buyukdere when arriving from the Black Sea. However, vessels under 500 n.r.t. have to undergo control formalities at Canakkale, both inwards and outwards, apart from those to be effected at Istanbul. It is recommended to prepare the accommodation ladder to facilitate the boarding of officials.

Excepting the case of tourist vessels, the Customs Officers will seal stocks of provisions and tobacco, spirits, as well as any other items in bond. Sufficient quantities of the foregoing will be left unsealed for the needs of the ship during the stay in port.

If stores left unsealed are exhausted while a ship is in port, a request to the Customs Officers will ensure further withdrawal.

The seals must not be broken before the ship's exit from territorial waters or if sailing from one Turkish port to another Turkish port.

Special Rules for the Passage of the Bosphorus: Art. 35 of the "International Regulations for Preventing Collisions at Sea" does not apply to ships navigating in the Bosphorus. Ships proceeding up the Bosphorus must keep to the European side, and coming down must keep to the Asiatic side of the mid-stream; that is to say they must always keep to the left in so far as is consistent with safety.

During their passage through the Bosphorus, ships must regulate their speed, without exceeding the 10-knot limit over the bottom, so that piers, landing stages, etc., or other craft (sailing and rowing boats, etc.) may not be damaged by their wash. Further, they must take care not to hinder fishing and diving operations or to damage submarine telephone, telegraph or electric cables.

Sound Signals, Wireless Sets: It is forbidden to make use of sirens or steam whistles in the harbour, except for manoeuvring purposes as laid down in the regulations for the avoidance of collisions.

Wireless transmitters are not sealed on arrival of a vessel but it is recommended that their use in Turkish territorial waters be restricted to cases of emergency.

Refuse: No refuse such as garbage, ashes, polluted oil and the like can be thrown or pumped overboard, nor any scraping, cleaning of tanks and/or bilges can be effected inside port limits.

SHIPMASTER'S REPORT: For outward clearance through the Dardanelles vessel has to produce: 1 Crew List, 1 Stores List, 1 Manifest and Customs Clearance.

SHIPMASTER'S REPORT: 1978

Procedures for entering Dardanelles: Send ETA to Agent at Istanbul and pilot station Mehmetoik 24 hours in advance or if sailing from Piraeus via Agent at Piraeus stating ETA Mehmetoik Bornu for Dardanelles and Bosphorus Pilot.

Approaching Dardanelles all communication with pilot station was on VHF Channel 14. Keep to South side (Kum Kale Bornu). Pilot ladder starboard side 3 ft. from the water.

When Pilot boards and vessel proceeds to Canakkale where Catering Officer boards the health launch via the accommodation ladder.

Requirements: Nett Tonnage; Gross tonnage; Last Port; Next Port; Cargo; Amount and type; One crew list with vaccination dates; Derat certificate to be sighted; Ship's register sighted.

Other information: In consultation with Pilot; ETA Istanbul; ETA Buyukdere.

Pilot disembarks at Kavak Bornu but slows passing Buyukdere where sub-agents launch comes alongside and passes aboard a small information sheet which requires ETA next port. It is 3.5 miles from where Pilot disembarks to the entrance to the Black Sea and extreme care has to be taken due to the multitude of fishing vessels which are working across the entrance to the Bosphorus in a zone clearly marked on the chart 6 miles by 4 miles which the caption reads "No fishing allowed". Due to other vessels disembarking Pilots, and also having to negotiate path through the itinerant fishing boats one is strongly advised to proceed at slow speed until approximately 2 miles clear on the mouth of the Bosphorus.

In the Dardanelles starboard hand rule applies but in the Bosphorus a local left hand rule applies. This is in order to aid the South bound traffic to have the benefit of the continuous South bound current which runs 1.5 to 3 knots depending on the time of the year.

The passage through the Dardanelles was approximately 3 hours and the passage through the Bosphorus was 2 hours. The same Pilot makes the complete transit, spoke good English and was very competent. Engines were on standby for the whole transit which was approximately 13 hours and for a period through the Sea of Marmara for 5 hours we were on full speed with 1 hour's notice. The narrows at Canakkale and passing Istanbul are two points which have to be navigated with extreme caution due to ships passing on bends and crossing ferries. The entrances at each end are also congested points and have to be navigated with caution.

It states in the Pilot Book (Volume 24 – The Black Sea Pilot) that Pilotage is not compulsory in the Dardanelles or the Bosphorus. This is a misnomer and in my opinion should be totally disregarded for practical purposes. Nowhere in the Pilot Book does it mention the fact that vessels taking a Pilot off Memetcik Bornu should keep to the South side of the entrance. This is important as the outgoing traffic which is mainly Russian have no Pilots and keep to the Northern side of the Dardanelles which is on their starboard hand. The Pilot informed me that they accept the fact that their pilot station is situated on the wrong side of the channel for inward bound vessels and their launch will make its way across to the South side where inside of Kum Bernu there is room to wait if a vessel finds no Pilot immediately available (not to anchor). Pilot station will give instructions on the approach of a vessel. Vessels proceeding South disembark their Pilots off Mehmetoik Pilot station which presents no problem as it is on the starboard side of the channel.

ALIAGA: 38.50 N. 26.57 E. (See Plan Book)

Aliaga Refinery Terminal.

LOCATION: *Northern Point:* Lat. 38° 50′ N. Long. 26° 57′ 36″ E.
Southern Point: Lat. 38° 50′ 10″ N. Long. 26° 46′ 33″ E.

DOCUMENTS: See "Izmir".

PILOTAGE: Pilot boards 2 to 3 miles West of Tasli Burnu Light.

ANCHORAGE: The port itself is situated about 40 miles N.N.W. of Izmir on the Southern arm of the Gulf of Candarli and the anchorage is considered safe for large ships.

RESTRICTIONS: Water depth at entrance about 14 fathoms. Water depth at crude oil wharf 17-18 m.

MAX. SIZE: Crude oil berth designed for up to 100,000 d.w.t. Products berth designed for up to 40,000 d.w.t.

HEALTH: *Customs:* Customs post at refinery.

Immigration: None locally. Incoming and outgoing personnel have to be processed at Izmir and escorted under guard to and fro.

Health: No office locally. Officials have to be brought from Izmir.

RADIO: Cable address of Aliaga Refinery: "Petrol Izmir".

Four days prior arrival, Agents require notice of ETA (time and date) followed by any subsequent change.

TUGS: Two 2,400 h.p. tugs are on order. Meanwhile tug can be obtained, if free, from Port Monopoly Izmir at additional cost. Mooring boat also on order, meanwhile local boat available for hire.

BERTHING: Incoming tankers discharge at a "T" type oil jetty just South of Tasli Burnu Light. The jetty runs parallel to the coastline and is situated 39° 49′ 30″ N. 26° 57′ 30″ E. approximately. The outer arm of the jetty, 317 m. long, is designed for crude oil tankers of 75/100,000 d.w.t. on the outer side and for tankers of 25,000 d.w.t. on the inner. The outer S.E. arm is designed for products tankers of up to 22,000 d.w.t. and the inner berth for small tankers of up to 5,000 d.w.t.

The crude oil berth is roughly in the centre of the N.W. arm and has 4 loading arms. The jetty is protected by 4 pivotal concrete buffers.

The products berth is similarly in the centre of the arm and is equipped with flexible hoses. Crude oil pumping rate up to about 3,000 t.p.h.

FRESH WATER: Available.

FUEL: Available.

AIRPORT: Izmir is not an international airport and cargo is nearly always transhipped leading to unforeseen delays.
SUPPLIES: From local towns; adequate fresh fruit and vegetables and meat.
AUTHORITY: See "Izmir".

AGENT: See "Izmir".

BANDIRMA: 40.22 N., 27.59 E.

Port under construction.
BREAKWATERS: North Breakwater length 995 m. and West Breakwater length 250 m.
TUGS: 1 tug 970 h.p. and 1 tug 250 h.p. 2 mooring boats also available.
BERTHING: At present there are 3 positions alongside at which vessels may berth. Lengths 280 m., 190 m. and 100 m. Depth alongside varies from 8.30 m. to 10.0 m.

Cargo operations are affected by ships own gear.

Loading/discharging capacity per hold in 8 hours is of 100/150 tons for bulk, 70/100 tons for bale and 40/60 tons for mixed cargo.
FRESH WATER: Available. Rate 25 t.p.h.
DEVELOPMENTS: Upon completion there will be 2 mooring places: 1 of 10 m. depth, 1,866 m. length and another of 12 m. depth, 250 m. length. Later a number of cranes of 5 tons, 1 of 25 tons and 1 of 50 tons will be installed.
AGENT: See Istanbul.

CANAKKALE: 40.08 N. 26.24 E.

DOCUMENTS: Vessels in transit through the Dardanelles must stop at Canakkale and produce following documents to boarding Officer.

Certificate of Registry.
Deratisation Certificate.
Crew List.
Name of Agent in Istanbul.

Vessels proceeding to a Turkish port will require in addition:
4 Crew Lists.
2 Personal Effects Lists.
2 Currency Lists.
2 Stores Lists.

PILOTAGE: Not compulsory for vessels proceeding to Istanbul. Compulsory for vessels over 1,500 g.r.t. proceeding to Canakkale. Vessels requiring a Pilot use International Code signals, or signal "G" by light or whistle. No advance notice required. Telegraphic address of pilot station, Kilavuzluk Canakkale, via radio station TAM 7. Pilot boards off Khepez lighthouse, where vessel should slow down but no need to anchor. In bad weather pilot boat will anchor in Gulf of Kilya.

Also see "Shipmaster's Report".
ANCHORAGE: Vessels may anchor in position 40° 09′ 00″ N., 26° 23′ 09″ E. in depths of 12 to 16 fathoms.
MAX. SIZE: Vessels of any size may navigate Canakkale Strait.
HEALTH: All vessels bound for a Turkish port must stop for Sanitary Clearance at Canakkale. Any suspected disease on board must be declared. Sick crew members may be landed for hospitalisation.

Also see "Shipmaster's Report".
RADIO: Radio station TAM 7 situated at local Post Office.
TUGS: One tug available, belonging to pilot station. Ship's tow lines always used.
BERTHING: Agents require at least 24 hours notice to arrange berthing at Canakkale Pier. Vessel may be required to shift anchorage to give place to Turkish passenger vessels which have priority.
STEVEDORES: Arranged by Agent on basis of Master's ETA.
MEDICAL: 12 hours notice required to arrange medical assistance. Hospital facilities available.
DENSITY: Salt water. No tide.
FRESH WATER: Only available from the pier, rate approx. 10 t.p.h.
FUEL: Marine grades not available.
DEVELOPMENTS: New installations and berths under construction.
GANGWAY/DECK WATCHMEN: Customs guard compulsory for vessels at the pier.
OPENING/CLOSING HATCHES: May be operated by crew or stevedores according to Charter Party.
CUSTOMS ALLOWANCE: Crew allowed to retain only quantities for personal consumption.
IDENTIFICATION CARDS: Required for crew members going ashore.
CONSULS: Italy, tel. 1008.
REPAIRS: Minor repairs can be effected.
REPATRIATION: Can be arranged if visa requirements are satisfactory.
AIRPORT: Situated 2 km. from Canakkale, internal services only.
TIME: GMT plus 2 hours, Summertime GMT plus 3 hours.
HOLIDAYS: Cargo work can be arranged on all holidays by agreement.
POLICE/FIRE/AMBULANCE: Police Tel. 1181; Fire 00; Ambulance 1098.
SHORE LEAVE: Allowed at all times.
SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* A pilot station has been established at Mehmetcik Point (Cape Helles); if the weather is too bad to embark the Pilot here, vessels should proceed to Canakkale. If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and South-bound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.

Sanitary Control: White launch. Officers do not board but require Chief or 2nd Officer to go down into boat. Canakkale required Ship's register, Derat, Crew List and Quarantine Declaration of Health. It is also required to fill in a form giving details of ship, cargo, last port, number of crew and passengers, etc., also name of ship's Agent in Turkey.
AUTHORITY: Canakkale Liman Baskanligi.

AGENT: See "Istanbul".

DERINCE: 40.45 N. 29.49 E.

PILOTAGE: Pilotage in the Gulf of Izmit is compulsory for foreign flag vessels. The Izmit Gulf Pilot will disembark at harbour limits. Harbour Pilot also compulsory for all foreign flag vessels.
ANCHORAGE: Suitable anchorage at harbour entrance.
TUGS: Two tugs are available, 970 h.p. each.
BERTHING: Pier length 207 m., depths alongside vary from 5 m. up to 7.35 m.
BULK HANDLING FACILITIES: Two silos with storage capacity 5,000 tons each. Loading capacity 160 t.p.h., discharging capacity 120 t.p.h.
SHIPMASTER'S REPORT: Fresh water available in small quantities from fire engines but expensive.
AUTHORITY: General Directorate of Turkish State Railways.
AGENT: See "Istanbul".

EREGLI (Karadeniz Eregli), including Usunkum: 41.18 N. 31.27 E. (See Plan Book)

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
3 Provisions Lists, including Bonded Stores.
3 Cargo Manifests.
3 sets Bills of Lading.

PILOTAGE: Pilotage available night and day for use in port under all weather conditions. Pilotage is carried out by qualified and experienced Pilots.

Compulsory for ships over 500 tons to have pilot service, and for ships over 1,000 gross tons to have pilot and tug-boat service.

Ships will take Pilots on board at a reasonable distance off the breakwater's red light. It is strongly advised that ships awaiting Pilot should avoid drifting South of the transit line of the green light on the breakwater ruin (Boshane Mendiregi) and the Citadel ruin which can be seen on top of the hill. (Transit direction is approximately 041° true.) The distance from the entrance of the port to the dock is approximately 4.6 cables, and the depth gradually decreases from 10 fathoms to 5 fathoms at the dock side.

In stormy weather, if the Pilots are unable to board, ships will proceed to a point in the Inner Port enabling the Pilots to board.
ANCHORAGE: Vessel waiting Pilot may anchor about 1 mile West of breakwater red light. The bottom of the port is muddy and sandy, and therefore ships can lay at anchor in any weather without fear of drifting.
RESTRICTIONS: *Eregli:* The depth of water in Outer Harbour is 15 m. (49.2 ft.) and Inner Harbour has 10 m. (35 ft.)

Usunkum: The length of Usunkum breakwater is 1,250 m. The depth of water is 42 ft. Under normal weather conditions ships up to 34 ft. (inclusive) can enter into the Inner Harbour and berth alongside the dock safely. Average tide is about 1 ft. The width of channel is 200 m. but safe lane is 144 m. wide.
MAX. SIZE: *Eregli:* Under normal weather conditions ships up to 35 ft. draft can enter Inner Harbour and dock safely.

Usunkum: Up to 34 ft. draft can be berthed.
Also see "Developments".
HEALTH: Pratique given after port doctor's visit on vessel's arrival. Crew vaccination certificates should be presented if required. Sanitary certificate required for any live animals on board.
RADIO: Istanbul Radio, TAH.
TUGS: Available. Normally join vessel outside the breakwater. Ships lines always used. Towing is done by one or two 600 h.p. diesel tugs. Towage is required for entering, leaving, berthing and shifting according to the size of the ship. Ships having a draft of over 20 ft. shall not use their own propellers in the Inner Harbour except in case of danger or absolute necessity.

Vessels with a draft greater than 30 ft. may be asked by the Port Authority to use a second tug at a very high cost.
BERTHING: *Eregli:* Inner quay is about 400 m. long for general cargo and 135 m. for coal loading.

The normal depth alongside quay is 30 ft. The docks have loading and unloading facilities, a railway track and open and closed warehouses at a very short distance. The railroad is a local system and is not connected to the Turkish railroad network. It has a length of approximately 16 km. for coal mine operations.

Buoys: There are four mooring buoys in the port 105 m. apart and at a distance of 170 m. from the breakwater at an average depth of 8 fathoms, buoys anchored with 50 tons concrete blocks and marked I, II, III and IV starting from the main breakwater head.

It is possible and safe to moor to the buoys with or without anchor and to moor to the breakwater by the stern (if the ship's length is adequate).

Usunkum: Usunkum has one loadout dock of about 280 m. length and one ore unloading dock about 220 m. length. Max. size 35,000 d.w.t. Max. draft 35 ft. Max. LOA 665 ft. Discharge rate 600 t.p.h. Coal also discharged, rate 600 t.p.h. also one small general-purpose quay for small ships.
See "Developments".

STEVEDORES: At least 24 hours notice required to order gangs.

MEDICAL: All details of any medical assistance required to be given to Agent with one hours notice. Hospital facilities available. Vaccinations can be arranged.

FRESH WATER: Can be delivered at 40 t.p.h.

REPAIRS: Small repairs such as lathing, levelling, welding, blacksmith work and woodwork can be effected ashore.

OPENING/CLOSING HATCHES: By either stevedores or crew according to Charter Party.

CUSTOMS ALLOWANCE: 200 grams tobacco and two bottles wine/spirits allowed each man per week.

IDENTIFICATION CARDS: Needed for crew going ashore.

CONSULS: No local representatives.

REPATRIATION: No facilities exist.

TIME: GMT plus 2 hours, Summertime GMT plus 3 hours.

HOLIDAYS: Cargo work can be arranged on all holidays.

POLICE/FIRE/AMBULANCE: Police tel. 28; Fire tel. 00; Ambulance tel. 500.

TELEPHONES: Cannot be connected on board.

SHORE LEAVE: Crew permitted to go ashore at all times.

DEVELOPMENTS: The channel at Usunkum is being dredged to 14 m. and the inner harbour to 13 m. It will be possible to berth vessels up to 60,000 d.w.t. in the near future.

AUTHORITY: Karadeniz Eregli Liman Baskanligi.

GIRESUN (Kerasunda): 40.56 N. 38.24 E. (See Plan Book)

PORT LIMITS: The Port of Giresun is the sea area contained in the inner part of the imaginary lines which joins 40° 56′ 40″ N., 38° 19′ 40″ E. and 40° 54′ 51″ N., 38° 26′ 10″ E., Aksu River mouth and the point 2,778 m. (1.5 miles) away from this mouth in an 019° true direction with the 40° 56′ 15″ N., 38° 27′ 00″ E. and 40° 55′ 10″ N., 38° 19′ 40″ E. Gure River mouth and the point 2,778 m. (1.5 miles) away in the true North direction.

PILOTAGE: Pilot ordered by Agent who requires 24 hours notice in advance of vessel's arrival. Compulsory for all foreign flag vessels.

Pilot service operates 24 hours a day and vessels may enter and leave at any hour on request.

ANCHORAGE: Good anchorage in Outer Harbour. Vessels should keep the entrance channel clear.

TUGS: Compulsory for all foreign flag vessels.

BERTHING: The port of Giresun is composed of 2 parts. These are the inner harbour and the outer harbour.

(a) The inner harbour is the sea area contained in the inner side of the line which joins the light at the end of the main breakwater with the light at the end of the auxiliary breakwater.

(b) The outer harbour is that part of the sea which remains between the port boundary and the inner harbour boundary.

The Inner Harbour

The berthing, tying-up and stern to shore anchoring places for the ships are given below:

A – The passenger quay is reserved for the berthing of passenger ships but when there are no passenger ships, cargo ships may berth here providing the Harbour Authority's permission is obtained. This quay is 150 m. long and the water depth is 8 m.

B – The cargo wharf: This is reserved for cargo ships. It is 250 m. long and the water depth is 7 m.

C – The small craft quay is 135 m. long and the water depth is 3 m. Small tonnage ships are berthed here.

D – Service wharf: This is 88 m. long and the depth of the water is 4 m. The service craft of the harbour authority berth here.

E – Providing that they obtain the Harbour Authority's permission, ships waiting their turn to berth may tie-up stern to shore, at the bollards on the main breakwater in such a way as not to impede the traffic.

F – The outer harbour is an unrestricted anchoring area but it is strictly forbidden to anchor or wait at the mouth of the breakwater. Anchoring is unrestricted 315° true North of and 2.5 cables away from the centre of the main breakwater North of the normal anchoring area.

STEVEDORES: Working hours normally 0800 to 1200 and from 1300 to 1700. Four gangs available.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: No repair facilities.

DEVELOPMENTS: During 1978 mobile cranes will be installed.

AUTHORITY: Giresun Port Authority.

GOLLUK: 37.14 N.27.38 E.

DOCUMENTS: The following documents have to be prepared by Masters before arrival:

4 copies of Crew Lists.
2 copies of Store Lists.
1 copy Health Document.
4 copies of Passenger Lists.
3 copies of Customs Documents.
3 copies of Manifests for cargo destined to port.
1 copy of Manifest for all transit cargo aboard.

N.B. Ship's particulars Form is to be filled by Masters upon arrival and remitted to the Port Authorities.

RESTRICTIONS: Golluk is a well-protected natural harbour, not affected by winds from any direction. Deep water approaches to pier.

PILOTAGE: Pilot unavailable.

HEALTH: Vessels to show their Sanitary Certificate if available aboard and also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by sanitary officials. Pratique is necessary on arrival even if vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard.

RADIO: Izmir radio station, call letters TAN2. Istanbul radio station, call letters TAH.

TUGS: Not available.

BERTHING: One pier 170 m. long used for handling emery ore in bulk. Depths alongside 39 ft. shelving to 20 ft. at 90 m. from seaward end.

CUSTOMS ALLOWANCE: 50 cigarettes for each member of crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. One litre wine/spirits for each member of the crew in opened bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.

TIME: Local time GMT plus 2 hours, Summertime GMT plus 3 hours.

HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to January 1st 2400 hours); National Sovereignty Day (from April 22nd 1200 hrs. to April 23rd 2400 hours); Spring Day (1st May), Constitution Day (27th May); Sports Day (19th May); Victory Day (30th August); National Holiday (28th October 1200 hrs to 30th October 2400 hrs); Sheker Bayram (3 days movable); Kurban Bayram (4 days, movable).

GOLOVASI, Botas (Ceyhan) Terminal: 36.53 N.35.56 E. (See Plan Book)

PORT LIMITS: The Botas (Ceyhan) Harbour is operated under the Authority of Iskenderun Harbour Master's Office and the harbour area is bounded by the following points:

(a) Point (A) on the shore, Latitude 36° 52′ 12″ N. and Longitude 35° 55′ 07″ E., to point (B) on the sea Latitude 36° 49′ 30″ N. and Longitude 35° 56′ 40″ E.;

(b) and from point (B) to point (C) Latitude 36° 50′ 30″ N. and Longitude 35° 59′ 30″ E.;

(c) and from point (C) to point (D) on the shore Latitude 36° 53′ 25″ N. and Longitude 35° 56′ 41″ E.;

(d) and the shore line between points (A) and (B).

DOCUMENTS:

Sanitary declaration form
Exemption certificate
Ship's register
Load line certificate
Ship safety construction certificate
Safety radio certificate
Safety equipment certificate
Personnel list
Provision, store and bunker lists
Monies or cheques declaration list

PILOTAGE: Pilotage is compulsory for mooring and unmooring. Pilot will meet the ship 1 mile South of the pier in the anchorage zone.

It is requested that pilot ladder be of an approved pattern and securely rigged.

ANCHORAGE: In the event of berth not being available on arrival, vessel must anchor in the anchorage zone (To the S.S.E. of the berth beyond the prohibited area). Terminal Shore Control will keep vessel advised of expected time of berthing etc., by means of VHF on Channel 16.

Prohibited Anchorage: Vessels on arrival shall not anchor within a radius of 1 mile from the light at the end of the jetty.

RESTRICTIONS: Berthing and unberthing possible at any time day or night, weather conditions permitting.

MAX SIZE: 300,000 d.w.t. at outer berths and 150,000 d.w.t. at inner berths.

RADIO: It is essential that tankers bound for the Botas terminal, communicate with their Agent with at least 72 hrs., 48 hrs. and 24 hrs. before arrival and state ETA, cargo required, maximum loading rate, S.W.L. of derrick, manifolds measurements and quantity of ballast on board. Vessel should request Agent to forward the information to BOTAS.

VHF: Botas Terminal Shore Control on VHF Channel 16.

Arriving vessels should make contact at least 4 hours before arrival at the anchorage in order to avoid delays.

TUGS: There are 4 tugs available to assist in berthing and unberthing. Three are 2,600 h.p. each and the other 1200 h.p. The tugs are all provided with fire fighting equipment.

BERTHING: Four loading berths available:

Berth No.	Max. size	Depth Alongside
1 (Outer East)	300,000 d.w.t.	72 ft. – 98 ft.
2 (Outer West)	300,000 d.w.t.	72 ft. – 98 ft.
3 (Inner East)	150,000 d.w.t.	66 ft. – 72 ft.
4 (Inner West)	150,000 d.w.t.	66 ft. – 72 ft

LOADING:

Berth No.	Max. Ldg. Rate cu.m.p.h	Loading Arms	Ballast Arms
1	15,000	4×20 in.	20 in
2	15,000	4×20 in.	20 in.
3	7,500	4×16 in.	16 in.
4	7,500	4×16 in.	16 in.

Maximum loading rates are dependent upon availability of loading lines on the ship

Terminal Port Operator is adviser for all mooring, unmooring operations and communications with shore etc.

Derricks and Cranes: Derricks and cranes S.W.L. of (5) tons is recommended.

Loading operations and shore communication: Ship's tanks are inspected by an authorised inspector from Terminal and passed as suitable for loading.

Responsible ship's officer must certify to the Berth Operator that all ship's valves are closed or blanked except those required for loading and water circulation purposes, and that these Rules and Regulations are being and will be observed.

The Berth Operator will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

Loading rates requested by the vessel or quoted by the Terminal will be the peak or maximum rate at any time during the loading period.
